Immigration officers will board to check any changes in the crew.

The Agent will put aboard the clearance and the sanitary clearance and the senior official guard will demand a written statement that all crew are aboard.

The sea Pilot will board with the harbour Pilot. The latter disembarks into a motor boat as soon as the ship is clear of the berth, the former when she is clear of the Great Pass. If the weather is rough, a pilot ladder will be required outside instead of the accommodation ladder.

AUTHORITY: Alexandria Port Authority.

MARSA AL HAMRA (El Alamein): 30.59 N. 28.52 E.

WEPCO Terminal

The Mono Mooring Buoy is in an open and unsheltered roadstead. The mooring buoy is located at Lat. 30° 58'.7 N. Long. 28° 52'.2 E. It is 53 miles on a bearing of 255° from Ras-el-Tin lighthouse, Alexandria, and 3 miles off shore in approximately 66 ft. of water.

DOCUMENTS:

4 copies Crew List.

Deck log books showing date of last call at a U.A.R. port, completed up to the time of arrival.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

Deratisation Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate, showing rate of consumption of each.

PILOTAGE: The S.-S.W.-W. quandrant from the buoy is prohibited anchorage area, Gebisa Reef is at Lat. 30° 58' 30" N., Long. 28° 49' 10" E., at 2.7 miles on a bearing of 260° from the buoy.

The mooring buoy carries a light, flashing 6 times per minute, and visible all round to a distance of 4.5—5 miles in clear tropical weather.

Surface current sets East at 10 miles offshore at the rate of 1 knot. Maximum rise and fall of tide in the mooring area is 2 ft.

Vessel arriving should approach to within 2 miles North of the buoy, where they will be met by the Harbour Master or Pilot who will advise the ship's Master on approaches to the mooring buoy, mooring and unmooring.

RESTRICTIONS: Normally vessels are moored during daylight hours only, but permission can be obtained to sail at night. arriving vessels should keep 50 miles off shore between sunset and sunrise.

HEALTH: Hoist International Code Quarantine signals when entering. Any sickness must be reported to local authorities.

RADIO: The commercial radio station at Alexandria will handle WEPCO radio traffic. Alexandria Coast Radio Station (call sign SUH) operates 24 hours a day on 444, 500 and 8,578 kHz, and between 0600 hrs. and 1800 hrs. GMT on 12,974 kHz.

Ships nearing Al Hamra Terminal may contact the terminal by FM/VHF radio on 156.70 mHz or 2182 kHz.

While at the mooring, ship-to-shore communication is by portable VHF radio-telephone units, under the direct charge of the Mooring Master.

TUGS: Not available and not required.

BERTHING: 2 good lines must be ready on the forecastle to be sent to the buoy plus a further 2 lines for use as messengers. Ship's lifting gear must be ready near the port manifold for lifting and connecting 2×12-in. hoses, with proper reducers if the manifold does not fit 12 in. hose with 150 ASA standard flanges. The total weight per hose assembly is approximately 5 tons. Maximum loading rate is 3,700 t.p.h.

A pilot ladder must be safely rigged for immediate use and long enough to reach the Mooring Master's launch. At night adequate lighting must be rigged overside to enable the Mooring Master to approach and board the ship safely, and searchlights should be rigged on both sides of the bridge to assist in running lines to the buoy.

BALLAST: No dirty ballast may be pumped overboard, and it is the ship's Master's responsibility to ensure that no oil – whether crude, diesel, bunker or bilge – is pumped or spilled into the waters of and surrounding the Terminal. Ballast can be pumped ashore through one or both of the floating hoses direct to disposal facilities on shore.

CUSTOMS ALLOWANCE: Present regulations at El Alamein allow each seaman to retain in his possession a maximum of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines. There must be no items aboard of Israeli origin.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: Nearest hospital facilities are at Alexandria, at least 90 minutes drive from the terminal.

TIME: From 1st October to 30th April, local time 2 hours ahead of GMT. From 1st May to 30th September, local time 3 hours ahead of GMT.
AUTHORITY: Western Desert Petroleum Company.

RAS GHARIB: 28.21 N. 33.06 E.

A natural port at the Western side of Suez Gulf sheltered by the Cape and a chain of reefs.
DOCUMENTS:
4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passengers' List in duplicate, showing rate of consumption of each.
Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.
PILOTAGE: Compulsory. International Pilot flag must be hoisted and Pilot will board vessel on arrival. Vessels should approach the anchorage from South-eastward and wait Southward of the prohibited anchorage until boarded by the Harbour Master who will pilot them either to moorings or to an anchorage clear of the prohibited area of the pipe-lines.

2 pairs of leading beacons stand about 4 and 5.5 cables, beside 3 others that stand about 12 cables Southward of Ras Gharib light-structure. About 2 cables further Southward are 2 leading beacons. All the above beacons are difficult to identify until close inshore.
ANCHORAGE: Ras Gharib anchorage, South-westward of the cape, affords some shelter, but a moderate swell round the cape is experienced on most days. Vessels can obtain anchorage in depths of about 5 fathoms.

During most of the year there are Northerly winds, force 3–5, but in December and January there are occasionally calms. On very rare occasions, there are Southerly gales of short duration which make the anchorage untenable.

The Northerly wind causes some swell in the anchorage, but it is not normally severe enough to interfere with the working of lighters or boats of moderate size. It is, however, unpleasant for small boats, except alongside the piers, which are well protected.

Except in the vicinity of the piers, there is usually some swell on the beaches. There is practically no rainfall and sand storms occur only very occasionally and they do not interfere with work in the anchorage.

Anchorage is prohibited, owing to the existence of pipe-lines, within an area indicated by pecked lines on the chart.
HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor, specially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

MAX. SIZE:

	Northern Pier No. 1	*Southern Pier No. 2*	*New pier No. 3*
Depth at the pier	27 ft.	36 ft.	78 ft.
Max. permissible draft	24 ft.	32 ft.	55 ft.
Max. length for tanker	450 ft.	600 ft.	980 ft.
Min. length for tanker	350 ft.	500 ft.	600 ft.
Diameter of crude hose	18 in.	18 in.	30 in.
Diameter of water hose	10 in.	12 in.	18 in.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by the United Arab Contracting and Marine Supply Company.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCE: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines. There must be no items aboard of Israeli origin.
TIME: *Winter:* from 1st October to 30th April, local time 2 hours ahead GMT. *Summer:* from 1st May to 30th September, local time 3 hours ahead GMT.
AGENT: Canal Shipping Agencies Co. Through its 4 branches, Asswan, Assuit, Damanhour and El Menia Shipping Agency. Cable address 'Canaship". Telex 2275. Agency UN, Cairo.

RAS SHUKHEIR: 28.08 N. 33.17 E.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with "GUPCO" (Gulf of Suez Petroleum Co.) when 3 days distant from Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72-hour ETA message to "Panintoil Cairo" giving the best estimate of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to "Panintoil Cairo" when the vessel is 24 hours and 12 hours distant from Ras Shukheir and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival and the number of hours that will be required to discharge ballast after ship is berthed in mooring.

6 hours before arrival, tankers should call Ras Shukheir on VHF Channel 16 to be advised if berthing is available or not, also to be advised of the approximate time for berthing.
DOCUMENTS:
4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Bonded Store List, in duplicate.
Crew List and Passengers' List in duplicate, showing rate of consumption of each.
Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.
PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Ras Shukheir lighthouse is located in Lat. 28° 08′ 15″ North, and Long. 33° 16′ 20″ East. It is a white flashing light, flashing every 3 seconds and visible for 10 miles.

Gebal Gharib, situated about 18 miles South-westward, 5,742 ft. high. It makes a nearly perfect equilateral triangle with Ras Shukheir and Ras Gharib Lighthouse. Ras Gharib Lighthouse is an excellent landmark whether by day or night for vessels approaching from North, but cuution should be exercised since this Light is obscured from 308° to the Westward. The sea-berth buoys are unlighted.

The company's Mooring Master will meet all incoming tankers about 2 miles from Ras Shukheir Terminal on a bearing of 290/300 degrees from Ras Shukheir Lighthouse and will advise ship's personnel in mooring and unmooring, raising and lowering of hoses.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side and climb the ladder safely.
ANCHORAGE: There are a number of oil well installations, structures and submarine pipelines located in the Gulf of Suez opposite to Ras Shukheir Terminal and approaching vessels are warned of these obstacles in manoeuvring and anchoring. Vessels should approach from the Eastward and if necessary anchor S.E. of the sea berth. *Never anchor North of the sea berth.*

Tankers should not anchor except in Ras Shukheir anchorage area which is located as follows:
Lat. 28° 04′ 30″ N.
Long. 33° 22′ 30″ E.
RESTRICTIONS: The Ras Shukheir Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however, an exception may be made at the discretion of the Terminal.
HEALTH: The vessel's personnel should carry international vaccination and/or inoculation certificates.
RADIO: The Alexandria or Port Said coast radio stations will handle GUPCO radio traffic. Ships may contact GUPCO through their cable address "Gupcoil Cairo". The message will be received on their Cairo Radio Telegraph Office local teleprinter circuit. Tape perforated and relayed to the Ras Shukheir Terminal.

Cables from Ras Shukheir Terminal to the ships would be handled in the same manner. The Alexandria or Port Said coast radio stations transmit traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. Thus any ship hearing its call sign in the traffic list of the coast station would call the coast station immediately after the traffic list.
VHF: When ships are near Ras Shukheir Terminal, they may use their FM/VHF radios to contact the Terminal using 160.70 mc/s or 160.80 mc/s.
MAX. SIZE:

	Pier No. 1	*Pier No. 2*	*Pier No. 3*
Depth at the pier	60 ft.	95 ft.	90 ft.
Max. permissible draft	45 ft.	55 ft.	58 ft.
Max. length for tanker	800 ft.	1200 ft.	800 ft.
Min. length for tanker	600 ft.	750 ft.	600 ft.
Diameter of crude hose	36 in.	36 in.	36 in.
Diameter of water hose	16 in.	16 in.	18 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity	4000 t.p.h.	4000 t.p.h.	4000 t.p.h.
Max. permissible load	60,000 tons	200,000 tons	70,000 tons

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by United Arab Contracting and Marine Supply Co.
SUBMARINE HOSE LOADING BERTH: Tanker is loaded by means of submarine pipelines to which are attached 2 hoses for oil loading and 1 hose for discharging ballast water. A 36 in. line transports the oil and a 16 in. line, the ballast water. The loading berth is located approx. 940 m. (3080 ft.) offshore in a water depth of approx. 60 feet (10 fathoms). The loading and ballast lines are laid in the same trench and run in a direction N. 55° 00′ E. The mooring buoys are

numbered 1, 2, 3, 4 and 5 starting with No. 1 North of the mooring and running consecutively in a clockwise direction.

LOADING READINESS AND ARRIVAL TIME: The company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting. Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Mooring Master boards the vessel or the time that vessel anchors, whichever occurs first.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not recommended.

CUSTOMS ALLOWANCE: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines. There must be no items aboard of Israeli origin.

TIME: Winter: from 1st October to 30th April, local time 2 hours ahead GMT. Summer: from 1st May to 30th September, local time 3 hours ahead GMT.

AGENT: Canal Shipping Agencies Co. Through its 4 branches, Asswan, Assuit, Damanhour and El Menia Shipping Agency. Cable address "Canaship". Telex 2275. Agency UN, Cairo.

SAFAGA: 26.46 N. 34.00 E.

DOCUMENTS: The following documents are required on arrival Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.
Deratisation Certificate should be handy for inspection.
Clearance from Last Port.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of Passengers in Transit.
4 copies Crew List.
Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.

PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Masters should endeavour to arrive at the N. end of the island by sunrise, at Safaga Port by early morning; the light behind them will show up the reefs clearly. Wind, light in the morning, gains strength during the day, making tying up more difficult. A beacon (Morewood Beacon), visible a mile off, is erected on the Southern spit of the island. After rounding the spit, Masters keep 5 cables clear of visible reefs and enter the harbour keeping the 2 large beacons to the North of the pier in line. Anchorage is then indicated by a small red or white flag. The Manager or his representative, of the Safaga Phosphate Company will meet ships in launch with instructions on berthing.

MAX. SIZE: Safe draft in the fairway, over reefs and alongside pier: 27 ft. 6 in.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor especially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

BERTHING: There are 2 mooring buoys marked B and C and 2 mooring posts marked A and D.

(1) The anchor position is marked by a small red or white flag. When mooring, manilla ropes only should be used, as wire ropes can be run out afterwards when ship is alongside.

(2) Due to rocky nature of sea bottom, it is very desirable that ship in coming into berth, does not override her anchor, as, if this happens, chain is apt to foul coral bottom and cause trouble later on.

(3) Endeavour to have all way off ship when anchor position is reached. Drop anchor as close to flag as convenient and go astern. If necessary check cable when 2 shackles have been paid out.

(4) Run rope to Buoy C, run rope to Buoy B, run rope to Post D, then run rope to Post A. Run Spring to S1, S2, S3, and pull alongside. Company's launches will run all ropes.

(5) If wind is blowing strongly off shore, a Spring to S3, may be run immediately a good rope to Buoy B is made fast.

(6) The best way to reach the anchor position is to steer straight for same, keeping Buoy C on port side. This will keep vessel clear of Buoy C and when anchor is dropped, the stern should swing clear of this Buoy. If it does not, a rope can be run to S3 and the stern pulled in before falling back on pier.

(7) With anchor dropped as shown, 6 shackles should see No. 1 hatch at the pier, but if chain is slackened carelessly, it may foul bottom and be insufficient to reach pier.

If visibility is very good, a course can be made between the Hyndman and Cannon Reefs, and altered to bring the beacons referred to into line. Rock phosphate and ground phosphate are loaded at this port for shipment all over the world. The mines are situated some 30 km. away and are connected by company's own railway. Rock phosphate loaded (200 t.p.h.) from elevator and phosphate in bags by ship's gear. No water or stores.

Cargo vessels can berth alongside a new quay of 600 m. with a draft of 27 ft.

TIME: *Winter:* from 1st October to 30th April, local time 2 hours ahead GMT. *Summer:* from 1st May to 30th September, local time 3 hours ahead GMT.

HOLIDAYS: The following are the public holidays in the A.R.E.:

1st and 2nd day of Ramadan Bairam Courban Bairam Eve	changeable dates
1st and end day of Courban Bairam Mohamedan New Year's day Prophet's Birthday (Mewlid El-Nabi)	as based on Moslem Calendar

Eastern Monday (Sham El Nassim (changeable); Evacuation Day (18th June); Revolution Day (23rd July); Victory Day (23rd December). Friday is the Sabbath day.

AUTHORITY: Ports and Lights administration.

AGENT: Canal Shipping Agencies Co. Through its 4 branches, Asswan, Assuit, Damanhour and El Menia Shipping Agency. Cable address "Canaship". Telex 2275. Agency UN, Cairo.

SUEZ CANAL (including Port Said and Suez):

DOCUMENTS:

Also see "Restrictions".

The following documents are required on arrival;
4 copies Crew List.
Ship's Register and Suez Canal Special Tonnage Certificate.
General arrangement and capacity plans of the vessel, if transitting the Suez Canal for the first time, or, undergone any alterations.
Suez Canal Authority's double bottom tanks capacity form.
Navigability form.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of Passengers in Transit.
Landing cards for passengers landing finally in the A.R.E. and for those landing in the A.R.E. in transit.
4 copies List of passengers finally landing in the A.R.E. (if any) together with their addresses in the A.R.E.
Deck Log Books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.
Mail Waybills for ports beyond Suez Canal ports and alternatively, a document from the Master is required (cargo and passenger ships only).
Quantity of bunkers, water and cargo on board.
Free Pratique Certificates issued by the local Quarantine Doctor.

In case of a Northbound vessel loading or discharging alongside quay staying more than 24 hours in Suez, the following documents should also be presented.

(1) Load Line Certificate.
(2) Safety Equipment Certificate.
(3) Radio Safety Certificate.
(4) Documents covering names and ratings of ship's officers and their diplomas.

For Pilot's Use:

(1) Arrival form of the Suez Canal Authority.
(2) Declaration "E" form for dangerous cargo on board in transit.
(3) Any other documents relating to shipments of dangerous cargo, radio-active or fissile.

N.B. Plain Suez Canal Forms are normally handed to Master by Pilots or ship's Agents, to be filled on arrival and also for use on consequent voyages.

Quarantine Authorities:

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.
Deratisation Certificate should be handy for inspection.
Clearance from last port.

Passports:

For Immigration Officer the following documents are required on arrival:

Arrival Immigration form, duly completed.
1 Passenger List.
List of Passengers finally landing, in duplicate.
Crew List.
Valid passport with entry visa is required for landing in U.A.R. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

(1) Bonded Store List, in duplicate.
(2) Crew List and Passengers' list in duplicate, showing rate of consumption of each.

PILOTAGE: *Port Said:* On arrival at the Pilot station at Port Said, vessels should contact the pilot boat announcing their arrival and to receive the necessary instructions for either: *(a)* to stop in order to receive a Pilot; *(b)* to anchor at the waiting area; *(c)* to proceed to the channel where the Pilot boards.

Vessels arriving from sea can contact the Canal Authority by wireless on the following frequencies:

Port Said: Port Office freq. 2182 kc/s. Calling Port Said 1; freq. 156.35 mc/s. Calling Port Said 7; VHF can also be used on Channel 16.

Pilot boat: freq. 156.3 mc/s. Calling Pilot boat at a range of 20 km. Call sign 4.

Vessels transitting canal can also contact S.U.Q. at Ismailia by

wireless, on the following frequencies: freq. 454 kc/s., 425 kc/s., 468 kc/s.

Waiting area at Port Said:

The waiting area where vessels anchor waiting for Port Pilots, is situated to the West of a line joining the West buoy of the first pair of light buoys and the fairway buoy, and South of the parallel of latitude passing through the fairway buoys. All ships waiting to enter Port Said Channel, have to anchor at this area. It is of great importance that a vessel should announce its arrival immediately on reaching the Pilot station for 2 reasons:

(a) To avoid delay in entering the harbour, as vessels are piloted in accordance with their turn in contacting the pilot boat.

(b) The arrival of a vessel is immediately transmitted to the Suez Canal Authority's Office, thus enabling the Agent to declare the ship in time, even before she enters the harbour and ensure her transit with the appropriate convoy. Such registration cannot be done if the vessel does not adopt the above procedure. Passenger vessels are given priority in turn, in entering the harbour.

Notice is hereby given that the entrance channel to Port Said harbour is buoyed as follows:

(a) A Fairway light buoy painted with white vertical stripes showing a white flashing light every 5 seconds approx. fitted with radar reflector and surmounted by a top mark resembling St. Andrew's Cross.

(b) *Position of buoy;* 032° 40′ – 6.04 miles from Port Said lighthouse.

(c) The first pair of light buoys indicates the entrance of the channel. The West buoy is painted black and surmounted by a conical superstructure giving a flashing green light.

(d) *Position of buoys:* 037° 03′ at a distance of 5.13 miles from Port Said lighthouse.

(e) The East buoy is painted red and surmounted by a cylindrical superstructure giving a flashing red light.

(f) *Position of buoy:* 127° 40′ from the West buoy at a distance of 1,969 ft. from the West buoy.

(g) Several other pairs of lights indicate the limits of the channel to the East and West. The East buoys are painted red and show a fixed red light and the West buoys are painted black and show a fixed green light.

(h) A fixed red light on a pylon on the North quay of Abbas Basin in line with an occulting red light on a pylon West of the fuel oil tanks at Raswa, indicates the axis of the entrance channel to the harbour.

Pilotage is compulsory on entering or departing Port Said Harbour as well as in the Canal and it is free of charge for vessels transitting the Canal except when shifting or changing berth. Vessels not transitting the Canal are subject to the payment of these charges both at Port Said and Suez. Vessels under 300 tons Suez Canal net tonnage are allowed to transit the Canal from any direction with a *Patron* (instead of Pilot) without being compelled to attend to convoy timings and after authority had been granted by the Suez Canal Authority.

In view of the continuous expansion in the sizes of vessels, with the consequent increase in the height of the hull, it is becoming very difficult for the roads Pilot to board vessels by using the customary rope ladder without causing him considerable fatigue. Therefore, it is recommended that Owners and Masters of large size tankers instal on their vessels a mechanical hoist for Pilot, and that one of the ship's officers be present to ensure its correct use, for the safety of the Pilots and to avoid accidents.

It is also recommended that the Mechanical Hoist be installed at a convenient distance from the effect of the propeller and away from the vessel's stern.

Suez:

As regards Suez Bay, it is sheltered from all points except from South. Very occasionally during Southerly gales (period December to April) motor-launches and boats are unable to communicate with ships in the roads.

Newport Rock lighthouse marks the Southern extremity and ships usually anchor opposite the entrance to the Suez Canal. All ships entering the port of Suez have to anchor in the pilotage zone which is limited by the imaginary line which extends from Ras Adabiya to Eyoun Moussa and comprises the coastal zone North of this line up to the Suez Canal entrance.

The town stands on a spit of the desert projecting Eastward with the Bay of Suez on its Southern side, Lat. 29° 58′ N., Long. 32° 10′ E.

Pilotage in the port of Suez is compulsory for all vessels entering, moving within or leaving the port.

Naval ships and vessels whose Suez Canal net tonnage is less than 300 tons are exempted from pilotage, but they have to contact the pilot boat for orders prior to making any movement. Vessels exempted from pilotage may have a Pilot if so required.

Pilotage Waiting Area at Suez: The boundaries of the pilotage waiting area for ships arriving at Suez from South have been limited as follows:

Northerly: Lat. 29° 52.16′ N.
Southerly: Lat. 29° 51.73′ N.
Easterly: Long. 32° 34.5′ E.
Westerly: Line joining Newport Rock and Buoy No. 3.

The area East to Long. 32° 33.93′ E. is allowed for ships drawing less than 25 ft. The area West 32° 33.93′ E. is for ships drawing more than 25 ft.

The pilot boat is normally stationed at the proximity of green buoy No. 1 South of Newport Rock.

When entering the pilotage waiting area, the following signals should be hoisted: Pilot – Vessel's signal letters. Quarantine – Nature of dangerous cargo (if any).

Vessels have to contact the pilot boat for instructions, reduce speed and have the pilot ladder ready.

Vessels wishing to anchor in Suez roads on their exit from Canal for the purpose of carrying out repairs, cargo operations, replenishment of bunkers, water, etc., should when ready to sail hoist the pilot signal and send the following message to S.U.Q. *Ismailia:* "Vessel's Name in Suez Roads ready to sail Please send Pilot thanks". In case of rough weather, the pilot boat leaves its station.

ANCHORAGE: Anchorage in the Port of Suez:

RESTRICTIONS: We reproduce hereunder Suez Canal Authority Circular No. 1/3T1-425004 dated 1st October, 1976 and updated by Circular No. 4751/T76 dated 13th October, 1976.

FIRST: Convoy Times:

(1) **From North:**

First Convoy N 1 Starts at 0200 hrs. and ends at 0600 hrs., direct to Bitter Lakes.

Second Convoy N 2 Starts at 0930 hrs. and ends at 1130 hrs. This convoy is to be moored at El Ballah Western Cut.

Vessels permitted to Join the second convoy:

Vessels up to 10,000 tons

Maximum draft 8.85 m. (29 ft.)

Maximum breadth for ships and floating units 30 m. (98 ft.)

Slow or damaged ships are to join this convoy providing their dimensions are within the limit shown above.

Number of vessels in this convoy are limited to the number of mooring berths available in El Ballah.

(2) **From South:**

One convoy starts at 0600 hrs. and ends at 1000 hrs.

SECOND: Following details and documents are required to be submitted:

(1) Masters are requested to *wire* at least 48 hours before vessel's arrival giving the following details:

- ✓ Gross and net tonnage with date of last Suez Canal Tonnage Certificate.
- ✓ Gross and net tonnage and date of last Registry.
- ✓ Nationality, Owner's name, previous name if any, and category of vessel according to its registry, i.e. Cargo, Containers Ship, Lash vessel, Ro/Ro.
- ✓ Has the vessel transitted the Canal before.
- ✓ Has there been any damages in the ship. If no alteration the following message is to be sent "PARTICULARS NO CHANGE".
- ✓ Documents must be submitted in any case.

N.B. – Huge vessels which their transit necessitate the employment of tug escort, Suez Canal Authority must be advised at least 4 days before their arrival by telex, No. Sucan UN 2153.

(2) *Documents*

(a) Suez Canal Special tonnage Certificate.
(b) Ship's Registry.
(c) Statistical Declaration.
(d) Information concerning a ship extracted from its official documents and its load of containers or barges.
(e) Declaration of Double Bottom Tanks.
(f) Declaration concerning vessels in ballast.
(g) Declaration of Navigability.

THIRD: Conditions for vessels to join the convoys, times for registration and submission of documents:

(1) **From Port Said:**

First South Bound Convoy N1

(a) Vessel *in Port* and requires to transit the Canal must adhere to the following:—

Called the Pilot (by hoisting the Pilot Signal)

Having registered for transitting at the measurement office.

The required documents were submitted latest at:

2200 hrs. for vessels not previously transitted or have previously transitted, but due to alteration must be remeasured.

2300 hrs. for vessels previously transitted.

(b) Vessels entering the Canal directly from Sea must:

Arrive at the waiting area at Port Said anchorage not later than 2000 hrs. for New V/L's., 2200 hrs. for vessels which have previously transitted.

Have called the Pilot.

It is permitted for these vessels to be registered preliminary in the Measurement Office without submitting the documents from the time of her arrival at Port Said anchorage till 2100 hrs. for new vessels or in such condition.

2300 hrs. for vessels which have previously transitted, provided that these documents are submitted before the vessel passes in front of the Suez Canal Authority's building.

(c) Latest permissible time to hoist the Pilot Signal:

Whenever the vessel is berthing is 2300 hrs.

Second Southbound Convoy N2

(a) (1)Vessel *in Port* must:–

Have called the Pilot,

Have been registered in the Measurement Office,

Have submitted the documents latest:

At 0530 hrs. for new vessels or in such condition

At 0630 hrs. for vessels which have previously transitted.

(2) Vessels are considered in Port and can join the convoy:

Vessels arrived at the waiting area at Port Said anchorage.

Before 0330 hrs. vessels which have not transitted the Canal before or in such condition.

Before 0530 hrs. for vessels transitted before.

These vessels will enter the Port when traffic permits.

It is permitted to register these vessels preliminary at the Measurement Office, without submitting the documents from the time of her anchoring at Port Said anchorage till the latest permissible time:

0330 hrs. for new vessels or such vessels.

0530 hrs. for vessels transitted before, provided that documents are submitted within one hour and half from the official time the vessel entered the outer harbour limited by Hectometer 22, otherwise the application for transitting will be cancelled and the vessel will be delayed from the convoy.

(b) Vessels which are allowed to enter the Canal from Sea direct without stopping in Port must:

Arrive at the waiting area at Port Said anchorage not later than

0330 hrs. for new vessels or in such condition.

0530 hrs. for vessels which have previously transitted.

Application for transitting the Canal should be registered not later than:

0430 hrs. for new vessels or in such condition.

0630 hrs. for vessels which have previously transitted and documents submitted before the vessel passes in front of the Suez Canal Authority's building.

(c) Latest time permitted to hoist the Pilot Signal wherever the vessel is berthed is 0630 hrs.

(2) **From Suez:**

Conditions to join the Northbound Convoy:

(a) Latest time permitted to arrive at the waiting area at Suez anchorage:

Tankers group, and the following are considered as such:

(1) Car carriers
(2) Ro/Ro
(3) Containers
(4) Lash vessels
(5) Ordinary vessels with 35 ft. draft.

By 0000 hrs. for tankers not transitted before,
0100 hrs. for tankers transitted before.

Other Vessels:

0130 hrs. for vessels not transitted before, 0230 hrs. for vessels transitted before.

(b) Registering of application of transit at the Measurement Office:

Submitting the documents: Short time after anchoring of the tankers or other vessels.

Without submitting the documents: As stated above in Para *(a)*.

(c) Latest time permitted to hoist the Pilot Signal: As stated above in Para *(a)*.

MAX. SIZE: We reproduce here under Suez Canal Authority Circular No. 2/6B5–422432. Dated 1st November, 1975.

Maximum dimensions and conditions of ships authorized to transit the Canal:

General:

(a) Maximum length of ships authorized to transit 1100 ft. (by length of ship it is meant the underwater length including bulbous bow).
(b) Maximum breadth 160.5 ft.
(c) The enclosed tables indicate the maximum draft authorized relative to the breadth of ship, speed and direction of transit. (See below).
(d) Ships transitting the Canal according to the the terms of this circular are required to fulfill the following conditions:

(1) The ship's loadline for tropical zones must be apparent and in compliance with the provisions of International Convention regarding loadlines.
(2) The ship's draft marks fore, aft and amidships will be existent on port and starboard sides.

(e) All ships have to conform to the Suez Canal Rules of Navigation and its Appendix for dangerous cargo.
(f) This circular cancels and replaces our previous circulars concerning the maximum dimensions of ships authorized to transit the Canal, and our circular No. 2/6B5 – 422174 issued 23.6.1975 concerning transit of ships at a draft of 38 ft.

Escorting by Suez Canal tugs:

(a) Ships with length less than 1000 ft. and breadth less than 147 ft. can transit the Canal without escort tugs.
(b) Ships with a draft not exceeding 37 ft. fore, aft and amidships can transit the Canal without escort tugs.
(c) Ships with length less than 1000 ft. but breadth from 147 ft. to the maximum of 160.5 ft. are to be escorted by 1 tug during the first transit of Canal. If this transit proves successful the following transits will be without escort tugs.
(d) If draft exceeds 37 ft. and up to the limit draft of 38 ft. (fore, aft and amidships), the ship will be escorted by 1 tug for her first transit. If this transit proves successful the following transits will be without escort tugs.
(e) Ships with length of 1000 ft. and up to the maximum limit of 1100 ft. are to be escorted during the first transit by 2 tugs. If this transit proves successful the ship will be escorted by 1 tug only during the following transits.
(f) Sisterships are not to get benefit of authorisation granted to a particular ship of the group.
(g) Ships which are to be escorted by 1 or 2 tugs according this circular have to notify Suez Canal Authority at least 4 days prior to arrival to Canal zone.

Draft for large ships in ballast:

The recommended draft for large ships in ballast is to be 25 ft. forward and 29 ft. aft. This draft may be amended to give the best view from the bridge, or better steering, but must not depass the maximum authorized draft according to the attached tables, and transit will be effected in good weather conditions.

Tables indicating the maximum draft for different breadths and speeds for ships:

Speed not exceeding 14 Km./H (From North or South):

Breadth (ft.)	113	116	119	123	126	130	133	138	143	148	153
Draft (ft.)	38	37	36	35	34	33	32	31	30	29	28

Speed not exceeding 13 Km./h. (From North or South):

Breadth (ft.)	120	123	127	130	134	137	142	147	150	157	160.5
Draft (ft.)	38	37	36	35	34	33	32	31	30	29	28

Special Transit

Speed not exceeding 13 Km./H. (From South):

Breadth (ft.)	128	131	134
Draft (ft.)	38	37	36

Exceptional Transit

Speed not exceeding 12 Km./H.

Breadth (ft.)	160.5
Draft (ft.)	29

We reproduce hereunder Suez Canal Authority circular No. 2237/T76 dated 31st March, 1976.

Recommended drafts for tankers in ballast when transitting the Suez Canal are as shown below:—

Tonnage S.D.W. From	To	Draft Forward (ft.)	Aft (ft.)
120,000	230.000	25	29
100,000	120,000	24	28
80,000	100,000	23	27
65,000	80,000	22	26
50,000	65,000	21	25
32,000	50,000	20	24
23,000	32,000	18	22
15,000	23,000	15	19

N.B. These drafts may be amended, when necessary, to give better steering.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor specially when it is presumed that the sick will be hospitalised. The Quarantine doctor meets the ships whilst entering the port and the ships are boarded in turn. To get a quick clearance and not to be left for later attendance, Masters are requested to receive the doctors as soon as they board and to have the following documents ready:

Quarantine Forms in Duplicate: When inserting the ship's register net tonnage special care should be taken in indicating same on the 2 quarantine forms (Form No. 15 Q.A.) as the dues are calculated on that tonnage, as incorrect information may cause complications.

Deratisation Certificate should be handy for inspection.

Clearance from Last Port should also be handy.

All ports at which the vessel has called as well as dates of sailings for the last 30 days should be inserted in the form.

Quarantine Signals:

By day: "Q" flag (signifying vessel healthy). *"Q" Over first substituted (QQ).* (Vessels have cases of infectious diseases more than 5 days ago, and there have been unusual mortality among the ratings or crew on board.) *"Q" over L flag (QL)* signifying (vessel is infected and has cases of infectious diseases less than 5 days ago.)

By night: red light over white: The flags and lights must remain hoisted until free pratique is granted. Ships in transit under Quarantine through the Suez Canal will use the same signals until they clear the other end of the Canal.

Important: In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at a U.A.R. port the vessel is put under compulsory Quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless, the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under Quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique granted by radio: Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner to the Quarantine Authorities and has a doctor on board.
(2) Details shown on the Quarantine Statement should be radioed to the Quarantine Authorities 24 hours prior to ship's arrival.
(3) Captains of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.
(4) The ship must not have called at any infected port.

RADIO: ETA messages can be transmitted to Agent and Suez Canal Authority through Port Said Radio and/or Alexandria Radio for vessels calling at Port Said. The same procedure can also be adopted for vessels calling at Suez through Kosseir Radio.

As a rule, Masters should send their ETA not less than 48 hours before ship's arrival. In addition to the ETA, all requirements should be included in the wireless message as well as detailed information regarding cargo operations, draft, number of passengers disembarking, details of their baggage and crew changes, if any. If the ship is operating a tour in the town and/or a quick trip to Cairo, numbers of participants must also be contained in the same wireless message. Number of bags of mail to be discharged, if any, should also be included.

This is to enable the ship's Agent to notify, in good time, the parties concerned, to prepare in advance the necessary custom permits, and to ensure all requirements to be supplied without delay.

Vessels transitting the Canal for the first time, should also include in the ETA message, whether fitted with a projector or not and if in the affirmative to state number electricians required, thus enabling the Agent to make the necessary arrangements and avoid any delay.

In accordance with the Suez Canal Authority's instructions and in order to avoid delaying vessels from joining the respective convoys, vessels transitting the Canal for the first time are required to include the following information in their ETA message:

Suez Canal gross and nett tonnages and date of last Suez Canal Special Tonnage Certificate.

Registered gross and net tonnages and date of last register. Ship's nationality and Owner's name.

If the ship has previously transitted the Canal, the following information should be included in the ETA message:

Whether there have been any constructional changes. If no changes have taken place, the following message should be sent: "Particulars no change navigable".

RADAR/VHF: There is no radar service at either Port Said or Suez, but VHF can be used with the Suez Canal Authority on Channel 16. Transit vessels can also contact S.U.Q. at Ismailia by wireless on the following frequencies: Freq. 454 kc/s., 425 kc/s., 468 kc/s.

TUGS: Highly qualified crew are available on board several tugs owned by the Suez Canal Authority in Port Said, Suez and in all Suez Canal stations. These tugs assist vessels to berth in Port Said harbour as well as in Canal if a case arises. It is left solely to the Canal Authority to decide whether more than 1 tug is needed (free of charge) to assist any ship to moor in the Port Said harbour, but if a Master of a vessel finds it necessary to employ an extra tug for berthing or if he needs a tug for any other reason, such an operation will then be charged against the vessel.

Salvage tug boats:

(1) 3,000 h.p. *Mounir.*
(2) From 3,500 to 5,000 h.p. *Antar.*
(3) 6,500 h.p. *Mared, Shahm.*

Harbour tug boats:

(1) 800 h.p. *Moein, Monkez, Montasser.*
(2) 1,600 h.p. *Bori, Wakar, Chadid, Hout, Kirsh, Morgan.*

General conditions:

(1) Hire is reckoned from the time of starting to raise steam and ceases when the tug returns to its depot.
(2) The charges for "waiting" will not apply while the tug has to remain under full steam either for a long or short period, ready to proceed. These charges only apply while waiting for a long period and when the tug is able to bank fires while at the disposal of the client.
(3) Fractions of hour will be reckoned as full hour.
(4) Hire charges are increased by 10% when tug is used after official office hours, on Fridays or on public holidays.
(5) Hire charges are increased by 50% when tug is used outside Canal waters.
(6) Towing charges outside the territorial waters are agreed upon with the Authority.
(7) This tariff may be revised every 3 months without notice.

		5 R	284	813	198	850	
		6 R	280	919	226	742	

Note: In good weather the length on buoys may be increased from 3 to 9 m. according to the length of the berth and height of the vessel.

Quays at Port Said: The Suez Canal Authority had built new quays to enable vessels to berth alongside at Cheriff and Abbas Basins. Length about 1300 m. Height about 2 m. from sea level. Also 14 cranes of 3 tons lifting capacity each, running on rails have been installed. Maximum draft allowed is 27 ft. The best part of these quays is ready and vessels with full cargo for discharge, are now berthing alongside. Vessels drawing more than 27 ft. have to lighten their cargo into lighters to that draft before berthing.

The distance between Bollards 23 and 24 South of deep Abbas Quay (30 m.) has been reserved for the berthing of one Ro/Ro vessel by the stern, within the present allowed draft (27 ft.).

Height of quay from sea level: 2 m.
Average tide all year: from 40 to 50 cms.
Thickness of fender: about 50 cms.
Breadth of quay edge: from 50 to 60 cms.

Suez:

Port Ibrahim: Port Ibrahim is the port of Suez. It consists of North and South basins.

North Quay: The North basin has, on the North side, a quay length of 2,415 ft. a total breadth of 975 ft. and depth of 26 ft. 06 in. at high tide. Quay is connected with the railway which runs the whole length of this quay and which can accommodate 4 large ships.

Berths 4 and 5 where stores are available are suitable for loading and discharging cement in big quantities.

Khedivial Quay: Berths Nos. 9, 10 and 11, length 119 ft., depth 24 ft. at high tide.

N.B. No cranes are allocated to these quays but mobile cranes (5-15 tons) only can be used.

Pilgrim's Quay: (Pontoon Berth) No. 6, 1 berth, length 500 ft., depth 24 ft. at high tide.

Adabiya Quay: This quay is situated on the Western shore of the Suez Bay, and is under the control of the Naval Authorities. The max. draft is 26 ft. 06 in. and can accommodate 4 large vessels. Quay is equipped with an electric crane, capacity 15 tons, max. length of vessel allowed to berth alongside quay 425 ft.

Marakib Quay: Situated at the entrance of the Canal depth 28 ft.; can accommodate passenger and cargo vessels.

Storage Capacity at Suez:

North Quay	40,150 sq. ft.
Pilgrims Quay	20,952 sq. ft.
Khedivial Quay	8,448 sq. ft.
	69,550 sq. ft.

While stacking spaces on the quays are: 332,050 sq. ft.

STEVEDORES: As stated in the ETA messages, Masters are advised to include in their messages details of cargo to be discharged in either Port Said or Suez, hatch by hatch and gangways required, if possible. All loading and discharging operations in Port Said harbour and Suez Roads are effected by lighters. There are steel lighters, wooden barges and self-propelled barges available for this purpose that will allow rapid work to be carried out. At Port Said several frozen cargo ships are provided with flat floating pontoons to facilitate discharge of cargo. At Port Said the draft of water does not allow ships to be berthed alongside quays to carry out cargo operations except in Cherif and Abbas Quays which accommodate vessels up to 27 ft. and consequently same are carried out also from and into lighters which are brought alongside the vessels whilst at anchor.

MEDICAL: It is very essential for Agent to receive advance notice of required medical attendance at least 24 hours prior to ship's arrival. All ordinary medical supplies are available and prescriptions are executed at any time at moderate prices and delivered during ship's stay in port. Medical assistance at Port Said and Suez is available. Consultations on board could be arranged through ship's Agent at any time by day or night. Reliable dentists are available at Port Said and could be consulted on board, if necessary, and during the following period at their clinics: From 0900 to 1300 hrs. and from 1600 to 1900 hrs.

Occulists are available for consultations at town clinics in Port Said during usual working hours. Opticians are also available at Port Said. The following hospitals are available with ample first, second and third class accommodation, accepting patients irrespective of nationality at reasonable charges:

At Port Said	*At Suez*
Al Mabarra Hospital	Al Helal Hospital
Notre Dame de la Deliverande Hospital	Abou El-Azayem Hospital
Two General Government Hospitals	General Government Hospital
T.B. Hospital	Isolation Hospital
Isolation Hospital	Ophthalmic Hospital
Ophthalmic Hospital	

Ship's personnel should carry international vaccination and/or inoculation certificates if a vessel is arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of arrival.

TANKERS: There is a bunkering station at Port Said harbour which can accommodate 4 tankers with not more than 38 ft. for the purpose of discharging their cargo of fuel or diesel oil to the different oil bunkering companies, but the petroleum basins for tankers at Port Said is as follows:

7 jetties can accommodate vessels with max. length of 555 ft., loaded with draft of 26 ft. 6 in.

If jetties 2 and 4 are occupied by large tankers, then No. 3 would have to be used by a small tanker.

Oil Storage: There is ample tank storage for bulk petroleum products.

New Suez Terminal: The terminal is situated in Suez Roads.

(1) Presently one berth has been reconstructed and is used by tankers chartered by EGPC.
(2) Minimum depth of water at L.W.O.S.T. in the approach Channel is 38 ft.
(3) Minimum depth of water at L.W.O.S.T. alongside each berth is 38 ft.
(4) Maximum safe length of tanker applicable 750 ft.
(5) Has six pipe lines each berth:–
    4 lines × 20 ins.
    2 lines × 16 ins.
    1 line × 4 ins. (fresh water)
(6) All types of oil products can be handled at this berth.
(7) No facilities are available at present for reception of ballast.

FRESH WATER: Is available for supply ex self-propelled barges to any quantity required at all times with a min. supply of 50 tons.

FUEL: Different grades of fuel oil are available from different firms. It is customary that the Master should advise in his ETA message of the vessel's requirements, fuel or diesel oil, at least 24 hours prior to ship's arrival into port. Bunkering is by contract between the Owners and the different bunkering firms, and nominations should be arranged for each vessel separately between the Owners and Head Office of the bunkering firm abroad, and for which payment is also effected abroad. Only the Compagnie Orientale des Petroles accepts payment in cash out of Shipping Account No. 2 for supplies effected by them and in which case a nomination is not required. Vessels can be berthed in the oil installation and thus can effect their bunkering requirements through pipe-lines. Tankers which are not gas-free, cargo vessels carrying dangerous materials and passenger vessels, which are moored opposite the town, can be supplied with requirements of fuel and diesel oil ex self-propelled barges with max. capacity of 700 tons.

FIRE PRECAUTIONS: In accordance with the Suez Canal Authority's regulations, tankers and vessels carrying dangerous materials must comply with their requirements, concerning fire regulations.

GANGWAY/DECK WATCHMEN: In both basins Cherif and Abbas at Port Said, where cargo vessels are normally berthed, ships' gangways can be used for disembarkation and embarkation. Passenger vessels are moored in special berths, i.e. Red Buoys, opposite the town, and can be supplied with 1 or 2 floating bridges (snake pontoon) which can connect the ship with the shore to enable the transit passengers and members of crew to proceed ashore. Cargo ships and other vessels mooring at the different buoys must lower their gangway to facilitate disembarkation and embarkation of ship's personnel as well as different officials. As far as Suez is concerned, all vessels must lower their gangway for the same purpose stated above. A deck watchman is recommended.

OPENING/CLOSING HATCHES: In accordance with Charter Parties, the opening and closing of hatches are dealt with as instructed in this Agreement, but for vessels carrying out minor cargo operations, it is customary that stevedores open and close ships' hatches against ships' account. To expedite vessel's transit, it is always recommended that ship's crew, during vessel's entering into the harbour should open the hatches and rig ship's derricks in order that they may be ready for cargo operations immediately upon ship's arrival at either Port Said or Suez.

CERTIFICATES:

Ship's Register.
Suez Canal Special Tonnage Certificate.
General Arrangement and Capacity Plans.
Load Line Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Documents covering names and ratings of ship's officer and their diplomas.

CUSTOMS ALLOWANCE: Every member of crew is entitled to have 1 carton of cigarettes, 8 ounces of tobacco, and 1 bottle of spirits for his own consumption during ship's stay in Port Said, Suez Canal transit, until vessel exits the Canal or vice-versa. Same applies to passengers, and a limited quantity of bonded stores can be permitted in public rooms and bars on passenger ships. Crew and passenger list, in duplicate, showing the amount in possession of each must be ready on vessel's arrival for submission to the Customs Representatives who normally proceed on board on arrival to seal up the Bonded Stores.

CARGO GEAR: These are normally supplied by the stevedores to comply with the nature of cargo discharged or loaded from cargo ships. Rope lengths and other cargo gear may be additionally required to expedite ship's discharge.

IDENTIFICATION CARDS: Every member of crew must have a seaman's book deposited with the Officer in charge for inspection, if so required by the Immigration Authorities. If a vessel is stopping in Port Said or Suez for a lengthy time, these seamen's books are normally taken off the ship by the said Authorities and kept in their departing office pending ship's sailing day when they are placed on board by the proper officer on a previous advice. Identity cards are also needed if a crew member wishes to proceed ashore for a short visit to the town or for proceeding to any excursion inland.

CONSULS: The following countries have Consulates or Consular Agencies in Port Said:

U.S.S.R.	Panama	Finland
U.S.A.	Republic of China	Sweden
Italy	Holland	Spain
Greece	Norway	U.K.
West Germany	Demark	

REPAIRS: Most types of repairs whether temporary or permanent can be carried out here by the Suez Canal Authority's shipyard or its

subsidiary companies, under the supervision of the appropriate surveyors, if necessary. Suez workshops are well equipped for undertaking all kinds of marine repairs to hull, main and auxiliary engines, boilers, navigation aids, radar and cooling, and installations.

Vessels carrying explosives are not allowed to carry out repairs. Tankers loaded or in ballast but not gas free are not allowed to carry out repairs, except in cases of force majeure of which the Canal Authority is sole judge. Gas-free tankers must present Gas-free Certificate before they are allowed to carry out any repairs. If unavailable, a chemist approved by the Suez Canal Authority can be appointed for testing the tanks and issuing the Gas-free Certificate. The aforementioned restrictions are applicable at Port Said only and not at Suez where vessels anchor at roads and are of no danger.

Other Repairs Facilities: Exist at Port Said for air conditioning, wireless telegraphy, radar, course and rudder recorder, refrigerators, and refrigerating units.

All kinds of repairs to echo sounding devices are carried out at Port Said by experienced specialists at reasonable charge, for the different types and dealt with by the Port Said Engineering Works with the exception of Raytheon radar, B.T.H. radar and Cossor radar which are represented by the Eastern Electronics.

DRY DOCKS: A floating dock of 25,000 tons, capable of docking vessels up to 50,000 d.w.t., is available at Port Said as well as a dry dock at Suez. Sufficient notice is required to book the date for either the floating or the dry dock.

Repair facilities are available at Suez, where a dry dock is suitable to accommodate vessels up to 8,000 d.w.t.

Dimensions:

Extreme length to inner sill	464 ft.
Breadth at entrance	73 ft.
Height of water over keel blocks:	
at Spring tide	22 ft., for., 26 ft. 3 in. aft
at Neap tide	19 ft., for., 23 ft. 3 in. aft

The max. draft at wnich a vessel can use the dry dock is 17 ft. for. and 20 ft. aft. Deeper drafts may be arranged with the management.

The Suez Canal Authority's Floating Dock and Shipyard is situated at the Northern entrance of the Suez Canal, opposite to Port Said lighthouse.

Ships up to 50,000 d.w.t. may undergo all kind of repairs in the shortest possible time. Tankers, by gas-freeing during their voyage from their home harbour to Port Said, will save at least 4 days if they carry out their repairs in our dock.

REPATRIATION: It is quite common that crew changes can be effected without any hinderance. As regards "signing off" members of crew, necessary facilities are given by the Immigration Authorities for their landing by granting them emergency visas and thus their repatriation arrangement by sea or by air can be effected easily. The "signing on" of foreign seamen is subject to the following regulations:

(a) A seaman and/or officer (non-residents) must be of the same nationality of the ship when arriving from abroad for this purpose.

(b) If a ship requires any rating, priority to engage Egyptian crew is given, unless indicated otherwise by means of a telegram or a letter from the ship's Owners abroad.

AIRPORT: The distance between the international airport at Cairo and Port Said or Suez is normally 2.5 hours. International airlines serve this airport. Cairo Shipping Agency is on constant contact with Agent for the necessary instructions.

In the interest of all and in order not to lose any time and to avoid any restrictions when sending crew members by plane to join their respective vessels, it is essential that the Agent concerned should notify by cable in good time the flight number as well as the time and date of the arrival in Cairo, thus enabling the Agent to notify Cairo Shipping Agency for the necessary clearance and as to whether they should be sent to join their vessels.

TIME: Local time is 2 hours ahead of GMT.

HOLIDAYS:

General Holidays Year: 1977

Date and Month	Name of Holiday
February 22	Unity Day
March 2	Mouled el Nabi (Birth of the Prophet)
March 8	Syria-Revolution Day
April 11	Sham el Nessim
May 1	Labour Day
June 18	Evacuation Day
July 23	Revolution Day
September 1	Libya – Revolution Day
September 14/17	Ramadan Bairam
October 6	Armed Forces Day
November 20/24	Courban Bairam
December 12	Mohammedan New Year

The Dates of the Islamic holidays are stated approximately. Working hours: 06.00–1800 hrs. Overtime: 18.00–06.00 hrs. Friday is the weekly day of rest but it does not affect labour.

If a holiday falls on a Friday it is possible that the following working day will be decreed a holiday also.

Ramadan: Thirty days' fast and how it affects labour; Cargo operations can be carried out at night and on Fridays and General Holidays against payment of overtime rates. Arrangements should be made on the previous working day to enable Customs to delegate the necessary personnel in time.

Local Holiday

Port Said:

December 23 ..... Port Said Day

Suez:

October 24 ..... Suez Day

POLICE/AMBULANCE/FIRE: Vessels which are moored in the harbour either in Port Said or Suez requiring assistance from the Port Police, should hoist the International Code Signal (Y.M.). There is always a police guard appointed by these Authorities on each ship in either Port Said or Suez harbour. First-aid assistance can provide ambulances at a request through the Agent. In case of fire on board when in port, the Captain must inform the Port Authorities (the Suez Canal Authority) immediately and at the same time give a general warning by means of a long blast of whistle or siren and be prepared to move his ship to another berth if so required. The Suez Canal Authority own 7 tugs and other craft distributed in various points of the Canal with individual output from 10 to 950 t.p.h. well equipped with fire-fighting appliances, ready for use at any moment.

TELEPHONES: There are no telephone facilities available in Port Said except at berth No. 4 Red where passenger ships are normally berthed, and this can be connected when snake pontoon is fixed with ship's gangway.

SERVICES: Port Said and Suez being situated at a middle point between the East and the West, have become an ideal centre for replenishing stores and provisions which can be obtained in bond or from town. The chandling firms attending to all ships calling at A.R.E. ports are:

(a) The United Arab Marine Contracting & Supply Co., (cable address: "Consup").

(b) The International Marine Services Co. (cable address: "Marinco").

Delivery of provisions and stores is effected 24 hours a day at Port Said and Suez.

It is recommended that Masters should order their requirements prior to their arrival with a view to avoiding any delay specially for ships joining the 0700 hours convoy Southbound.

Deck and engine stores are ample and are also available and sold at (in bond) prices.

Paints: All kinds (bottom, boot-top, topside, enamel, engine ready mixed, heat resisting, varnishes) are also available at "in bond" prices. Painting of ships or undertaking any maintenance work on board is permitted while ship is in port waiting to join the North or the Southbound convoys as well as while transitting the Suez Canal.

The following companies are represented here:

International Marine Paint	Represented by The United Arab Contracting Co. (cable address: "Consup")
Hamples Marine Paint	Represented by The International Marine Services Co. (cable address: "Marinco")
Campex Marine Paint	
Wiederhol Marine Paint	

Chemicals: The following chemical firms are represented in Port Said and Suez:

Gemlen & Co.	Represented by The United Arab Contracting Co. (cable address: "Consup")
Bird Archer/Norus (Tommons & Chartes) Chemicals.	Represented by The International Marine Services Co. (cable address: "Marinco")
Drew Chemicals Cameroid Products.	
Paroline Chemicals Cameroid Products.	
Walker Bow.	

Grease and lubrication oils. Available from:

Esso Petroleum Co.	Wisure Oil Co.
Misr Petroleum Co. (ex Shell)	Fina Oil Co.
Mobile Oil Co.	Gulf Oil Co.
Caitex Oil Co.	Castrol Burma Oil.
Ocean Oil Co.	

An advance notice of 48 hours is necessary to arrange for lubricating oils and/or bunkers required.

Charts: Admiralty Charts are available at Port Said only from the United Arab Marine Contracting & Supply Co. If any order has to be supplied at Suez, arrangements can be made for the required charts to be sent there.

Cigarettes: American and British cigarettes are available "in bond".

Technical Gases: Technical gases are also available at Port Said and Suez, and empty containers can be exchanged.

Fish: Bream, prawns, crab, rock fish available throughout the year; Mullet available June/February; Slip soles available November/March.

Vegetables: Beans, beetroots, cauliflower, cabbages, carrots, eggplant, endive, garlic, herbs, lettuce, marrows, parsley, radishes, spinach, tomatoes, turnips, escarole, onions, potatoes: *available throughout the year.*

Green peas, celery, pumpkins: *available January/March.*

Artichokes: *available October/April.*

Parsnips, spring onions: *available November/May.*

Green pepper, mint, lady's finger: *available June/September.*

Capsicum: *available May/December.*

Cucumber: *available February/December.*

Lemons, limes: *available throughout the year.*

Fresh figs, fresh dates: *available August/October.*

Bananas: *available October/June.*

Grapefruits, oranges, tangerines, *available October/May.* (When out of season import citrus are available).

Apricots: available May/June.

Water melons, sweet melons: *available May/October.*

Grapes: *available June/October.*
Plums, peaches: *available June/October.*
Mangoes: *available August/September.*
Pears: *available August/October.*
Apples: *available November/February* (also imported the whole year).

Eggs: Eggs are available throughout the year.

Meat: Fresh meat is only supplied to vessels having a Mohammedan Crew after permission is obtained from the Customs. Other vessels are supplied with "frozen" in bond.

Laundry: Well equipped, reliable and fast services are available at Port Said, through the ship's contractor. Ship's laundry is usually delivered within 24 hours. For vessels remaining a few hours in Port Said and transitting the Canal, their laundry could be collected, washed and ironed and then transported to Suez by special car or lorry for delivery to them there.

Garbage: No refuse or ashes are allowed to be thrown whilst ships are moored in Port Said, transitting the Canal or in Suez Roads. Small barges are available in Port Said and Suez for disposal of garbage or ashes, which craft can be obtained at a reasonable hire.

Motor Launches and Tugs Hire: Motor launches and tugs required for extra service are charged for as under:

At Port Said:

Motor launches per hour at day time, pt. 60 each; night-time, pt. 75 each; motor launches per day, pt. 300 each; night, pt. 450 each.

At Suez:

Motor launches per hour, pt. 1,250 each; tugs per hour, pt. 5,000 each.

Divers: Suez Canal Authority's Divers as well as other Contractors' experienced divers are available, capable of carrying out any kind of underwater repairs including welding and fees are subject to the kind of job to be performed. Anchors and other articles left behind by any ship in Canal waters are retrieved on no cure no pay basis.

SHORE LEAVE: Crew members are allowed ashore provided that they obtain a shore leave pass issued by the Immigration Authorities through the local Agent. They can proceed ashore by means of motor launches or rowing boats at their own expense. For vessels mooring opposite the town and connected with the shore by snake pontoon. Crew, together with passengers, can proceed ashore free of charge.

REGULATIONS: As Port Said and Suez are considered the leading ports to the Suez Canal, the Suez Canal Authority has established a convoy system for vessels transitting the Suez Canal.

It is important that the timings indicated are to be complied with. However, it is recommended that Masters arrive half an hour earlier to eliminate the possibility of their vessels being delayed on account of alleged late arrival at the pilot station or being considered as having anchored at an area away from the pilot station.

Conditions of Transit: Each vessel must be provided with a projector, either its own which should be in compliance with the Canal Authority's regulations, or a hired one obtainable from the Suez Canal Light Company. In case of hire, 2 electricians will be provided and the vessel is to supply them with food and accommodation.

2 or more mooring boats will be provided with a crew consisting of 3 men for each, to assist the vessel in mooring in the Canal when required. A sheltered place or accommodation, as well as food has to be provided by the ship.

Connecting links made fast to bitts or clinched on board should be hung over the vessel's side.

Wireless watch should be kept in accordance with the indication of the Pilot. The Authority's station S.U.Q. transmits on a frequency of 420 kc/s. (714 m.) Vessels communicating with S.U.Q. must transmit on a frequency of 425 kc/s. (841 m.).

Canal Pilots will be supplied with a wireless telephone to facilitate the despatch or receipt of messages. These sets require a direct current of 6 volts and special sockets according to the dimensions stated below, and which should be installed on the bridge within reach of the Pilot. The potential difference at the socket must not be less than 6 volts. The socket must withstand a current of 5 amps.

The socket's dimensions are as follows:

Diameter of each female	4 mm.
Length of each female	18 mm.
Distance between the two females	12 mm.

In the event of such sockets and/or the required current not being available, the telephone will be accompanied by a battery, at vessel's expense. Each vessel should be equipped with: (*a*) Rudder Angle Indicator, (*b*) R.P.M. Indicator.

According to Article 15 para. 2a of the Suez Canal Rules of Navigation, the above appliances must be fitted on the bridge in such a position that the Pilot may read both, without having to move away from his situation. An exemption to the above requirements is granted to vessels having a Suez Canal gross tonnage of less than 2,500 tons (excluding spaces not permanently added to the gross tonnage) and to ships not passing through the Canal more than 3 times a year.

Pilot Signals:

By Day: International Code Flag "G" under a black ball, (for entrance in Suez Basin, only "G" flag).

By Night: 3 white lights vertically hoisted, which must be clearly visible from the watch tower of the Suez Canal Authority's offices.

DEVELOPMENTS: Since the nationalisation in 1956 of the former Suez Canal Company, several improvements have taken place to facilitate transit and to accommodate larger ships. A by-pass between Kantara and Ferdan of about 9 km. in length exists to enable Northbound vessels to pass Southbound ships. The max. draft allowed presently in the Canal is 38 ft. for Northbound vessels only. The Suez Canal Authority is undertaking a project to be accomplished by 1978 aiming at increasing the Canal cross sectional area to 2,500 sq. m., so as to allow the transit of vessels with a draft of 48/50 ft. and a beam of about 135 ft. Same draft will be applicable to both Port Said and Suez and at the same time, as the project is being accomplished.

Plans have been confirmed to extend the capacity of the Canal to accommodate tankers of up to 150,000 d.w.t. Completion date of the work involved is presently uncertain. Additional plans call for further extension allowing transit of loaded tankers up to 300,000 d.w.t.

SHIPMASTER'S REPORT No. 1: *Suez Canal Transit (South/North) (January 1976)*

C. Guardafui light was clearly seen and identified at a range of 39 miles.

There was an oil rig operating Southwards of the Cape in approximate position 11° 44′ N.: 51° 21′ E.

The Straits of Bab El Mandeb were congested but the traffic separation scheme seems to be satisfactory. The passage of the Red Sea does not seem to be any different from the past.

When passing Aden, a preliminary message was sent to the Suez agent. This was of doubtful value but it is advisable to send a message addressed to 'Port Authorities Suez', via station SUK, giving the following information:–

Ship's name and flag.
Whether transit of canal is desired.
Destination.
Where from.
Cargo aboard.
Whether any dangerous cargo carried.
Draft
ETA at – 23° North, Straits of Gubal, Suez.

All radio messages through the Egyptian radio stations must have a signature, i.e. 'Master'.

The ETA's can be updated as necessary. The message to the Port Authorities is mandatory.

Approaches: The Gulf of Suez is congested by oil rigs – particularly in the vicinity of Ras Shakheir and the Ramadan and July oil fields where there are many rigs and flares and supply vessels crossing the Gulf. One oil rig was working in the middle of the fairway East of Ras Dib. With poor visibility, if a Southbound convoy were to be met in this region, it might be wise to proceed at manoeuvring speed.

Most of the lights in the Gulf are extinguished but Newport Rock lighthouse, the buoys and other lights in Suez Bay are working and are efficient.

A pilot cutter operates just South of the waiting area but an approaching ship will be called by signal lamp from ashore, asking for the ship's name and making "VHF". Contact is then established on Channel 16, changing to 6 when the ship will be told whether to anchor in the waiting area or remain under weigh until the Pilot boards.

Pilotage: The Pilot boards from a launch by means of the accommodation ladder (which should be lowered to within 3 ft. of the water) and takes the ship to her designated anchorage in Suez Bay.

Arrival Formalities: Quarantine and Customs authorities (about 8 people) board the ship at the anchorage together with the Agent. The accommodation ladder is used for all boarding and disembarkation within the canal. It should be raised when not actually in use otherwise the ship will be boarded by numerous "Businessmen".

A list of forms required is listed below but there are others which the various authorities bring with them and some are presented for filling in more than once and by different officials. This ship's transit was delayed because the Agents had not received funds from London. Deck log books for the past six months have to be landed.

The Suez Canal Cargo Declaration Form (in duplicate) is handed to the Pilot who disembarks at Ismailia.

At Anchor: With 3 shackles out, this ship lay comfortably at A8 berth. Some difficulty, however, was found in reconciling the various anchor bearings with the chart.

A bumboatman will seek permission to set up shop aboard. Care should be taken to agree methods of payment beforehand.

A listening watch should be kept for Suez Control on Channel 6. Water can be ordered through the Control and will be delivered in a large water boat carrying about 300–400 tonnes. Rate of delivery is about 50 t.p.h.

Convoy lists are made out at about 0300 hrs. and ships can call Suez Control soon after that to learn their convoy number and time of Pilot boarding. Convoys can start as early as 0500 hrs. This vessel was number 10 and hove up at 0830 hrs. Our searchlight was brought out at 1700 hrs. and the boats at 0500 hrs. We were asked to carry 4 extra boats but Pilots advise against this as the time taken to unload 6 boats can cause delay at the other end of the canal.

Transit: There seems to be no change in the transit of the canal. The Pilots change at Ismailia. The convoys cross in the Great Bitter Lake, anchoring as necessary. There is now one convoy from each end every day.

A Harbour Pilot takes over on reaching Port Said and, as soon as the searchlight and boats have been off-loaded and the ship has entered the approach channel, he disembarks.

The Agent will board at Port Said with yet another form to be filled in and he will return the log books.

Documentation:
2 Health Forms (Egyptian)
1 Passport Form (Egyptian)
1 D.B. Tank Statement (Egyptian)
1 Radio Frequencies Form
2 Cargo Declarations
*4 Cargo Manifests
8 Crew Lists
Plus several others which will be produced by the various officials.

* It was explained that our company's vessels do not carry cargo manifests but the Agent said that a typed statement of the amount of cargo aboard, destination and where loaded would suffice.

SHIPMASTER'S REPORT No. 2: *Suez Canal Transit (South/North) – (April 1976)*

After clearing Aden a radio message was sent to the Port Authorities Suez via Port Said Radio advising them of the following:—

Ship's name and flag.
Whether desire transit.
Destination and last port.
Cargo aboard total tonnage and type of cargo.
Whether dangerous or explosive cargo carried.
Draft.
British tonnages gross and nett.
Date Suez Canal Certificate issued.
Tonnages gross and nett from Suez Canal Certificate.
Advice as to whether searchlight required.
ETA's 23° North Straits of Gubal Suez.

During the passage in the Red Sea both Port Authorities and Agents received up-dated ETA messages. When using SUK radio to give up-dated ETA this station advised that a cable was necessary to be sent to Port Authorities Port Safaga via SUK giving ETA Strait of Gubal.

Navigation in the Red Sea does not seem to be any different from the past. The Traffic separation scheme in the Straits of Bab El Mandeb seems satisfactory.

Straits of Gubal and passage in the Gulf of Suez was in daylight. Especially in the Straits of Gubal very few seem to adhere to any form of traffic separation scheme. There is no doubt that if it were night time or poor visibility then it would be advisable to be on 'Stand-by'. There is now an oil rig 27° 57′ N., 38° 41.2′ E., or 349° 5.7 miles from Ashrafi Lt. Ho.

The Ramadan and July Oil Field area has many oil supply ships, most of the Southbound traffic was met in the Straits of Gubal thus further North it was very quiet.

The ship was anchored in the waiting area South of Newport Rock but alas this area shown as being to the East of the 2 green flash buoys is *now wrong!* The waiting area is to the S.E. of the most Southern Green flash buoy. About 1 mile South of the previous position. Evidently there is shoaling in the old area and ships have grounded.

On arrival at the waiting area the ship had to anchor as the Southbound convoy was clearing. A tug with Pilot Signal closed the ship to ask for information with regard to tonnages, cargo etc. After first vocal contact Channel 6 VHF was used. The ship was not called up by lamp nor did the Port Control answer any VHF requests etc. It would seem that if the Tug is on station advice is received from there. They did not, however, attempt to advise the ship that the waiting area had been altered.

As the ship anchored a boat came alongside with two watchmen but as I had not requested these and the visitors had not boarded they were sent ashore.

Later a Pilot boarded via the accommodation ladder to shift the ship from the waiting area to a designated anchorage, in our case '1B'. Ship was anchored in '1B' by 0030 hrs. on 12th, having arrived at the waiting area at 1947 hrs. on the 11th.

As the ship had some essential repairs to the main engine which would only take a short time, engines were immobilised. Pilot had advised that 0800 hrs. would be earliest time for transit. During the middle watch the area was hit by a fierce short lived blow from a Southerly direction. Although the vessel did not drag, ships close by did. It was necessary to pay out more cable to ensure a bulk carrier cleared us comfortably. During this time a ship called Port Control to say they had dragged some 3 to 5 cables.

As the weather for some 3 hours was considered bad for small boats the first of the visitors did not board until 0515 hrs.

The Canal Surveyor, who was the first to board was quite helpful and pleasant. He took the Suez Canal Tonnage Certificate for verification as the ship was making a first transit. This I have been informed will be returned to the Company in about 2 months.

Later other officials boarded about 0700 hrs. The Agent also came off with the mail. The 2 electricians for the searchlight insisted on being given a cabin or they would not remain on board. As there was no spare cabin, except one in the crew accommodation, I endeavoured to explain that a reasonable shelter had been built on the after end of No. 2 hatch. It transpired that in the end I moved a patient who had tonsilitis out of the hospital. Later the Canal Pilot informed me that the electricians can not be so demanding provided a reasonable shelter is provided.

Documentation was found to be as advised in the report above. One small difference is that the Cargo Declaration form is only required as 1 copy and is now in English with one form for South to North ship's and another for North to South ships.

At the moment there is only the 1 convoy each way per day. Hours of commencing transit seem a little doubtful. I gather that first Southbound ship leaves Port Said at 0200 hrs. while the first Northbound ship now leaves Suez at 0800 hrs.

Searchlight and 2 boats were brought alongside and loaded in ample time prior to the Canal Pilot boarding at 0909 hrs. I gather that because of the 'bad' weather for those few hours the delivery of searchlights and boats was delayed. Also no advice was obtainable on the VHF after 0300 hrs. with regard to convoy number or time of proceeding. About 20 minutes notice was given over the VHF.

The Transit was quite straight forward. Ship was anchored in the North Anchorage, Bitter Lakes for 3.5 hours, the Southbound convoy passing. Transit was commenced at 0947 hrs. At Ismailia the Pilot changed. He took the Cargo Declaration with him.

Port Said was reached at 0033 hrs. on the 13th. The Sea Pilot boarded here as did the Agents who returned the Ship's Register and Log Books which had been landed at Suez. The ship had to keep moving while the boats and searchlight and personnel were either off-loaded or disembarked. At night this is not easy and the whole crew are required to ensure a safe and quick operation. Once these matters were completed the Sea Pilot left well within the breakwater. Accommodation ladder was used at all times for Pilots, Officials and Agents boarding and disembarking. Fairway Buoy was abeam at 0148 hrs. on the 13th.

On the Eastern Banks of the Canal there is much work being done with levelling ground and widening the canal. Also in the Little Bitter Lake. *According to the Pilot 2 convoys from North will be put into operation in about 1 month.*

AUTHORITIES: The Suez Canal Authority is the Authority governing Port Said harbour as well as Suez Bay, as far as reception of ships and their transit of the Suez Canal. The Suez Canal Shipping Agencies Company is responsible for shipping companies in Canal Zone, Suez Gulf and A.R.E. Red Sea ports, through 4 branches at Port Said for each of which there is a branch at Suez and 1 in Cairo. Their names are:

Asswan Shipping Agency	tel. 5051 (7 lines)
Assiut Shipping Agency	tel. 2710 and 2722
Damanhour Shipping Agency	tel. 4231 and 2951 (3 lines) and 8606 (8 lines).
El Menia Shipping Agency	tel. 4462 and 3333 (3 lines). Telex No. 4187 Suezag.

There is also Cairo Shipping Agency, Tel. No. 77893, who looks after crew arrival and repatriation through Cairo Airport as well as receiving parcels for vessels calling at either Port Said or Suez.

WADI FIRAN: 28.44 N. 33.13 E.

An open anchorage on Sinai coast in the Gulf of Suez about 85 nautical miles South of Suez.

There are 6 large and conspicuous storage tanks in 2 parallel rows of 3 tanks each lined on shore near the pumping station and painted with aluminium.

PILOTAGE: Pilot boards each tanker at anchorage.

BERTHING: Tankers must approach berth from West, never from North, and must follow same track on their departure to be entirely clear of shallow water. Three berths: No.1, length 430 m., depth 17 m., for tankers of max. 47 ft. draft, 60,000 d.w.t., No. 2 length 430 m., depth 10.3 m. for tankers of max. 28 ft. (to be increased to 31 ft.) draft 25,000 d.w.t., No. 3 length 230 m., depth 6 m., for tankers (unloading only) of max. 17 ft., draft, 20,000 d.w.t. Tankers at berth will be connected to shore pumping station by submarine telephone cable. Mooring and unmooring operations normally take place in daylight.

AUTHORITY: Cie. Oriental des Petroles d'Egypt.

Eire

BANTRY BAY: 51.41 N. 09.27 W. (See Plan)

DOCUMENTS:
1 Crew List.
1 Stores List.
1 Crew Declaration.
1 Maritime Health Declaration.
Ship's Register (tonnage).
British Light Dues (receipts).
Clearance from Last Port.

APPROACHES: The approaches to the Bay are marked by the Sheep Head Light, visible 18 miles, Roancarrig More Light, visible 12 miles, and Whiddy Island Light, visible 3 miles.

The channel to the Gulf Oil Terminal is marked by radar reflecting buoys numbered 1 to 9, the starboard hand buoys having odd numbers.

The buoys marking the channel to the Inner Harbour do not have radar reflectors, but can easily be picked up on radar screens.

PILOTAGE: Pilot can be requested through Land's End Radio or Valentia Radio to "Harbour Master Bantry", giving 6 hours notice. Also through VHF Channels 11, 14 and 16 to Gulf Control when within 10 miles. Pilot boat blue and white fast motor launch (28 ft.) flying Pilot flag from stern.

For tankers of 250,000 tons and upwards, Pilot boards between No. 2 and No. 3 buoys.

For all other vessels, Pilot boards at West Ground Buoy.

ANCHORAGE: For tankers of 250,000 to 350,000 tons in vicinity of No. 2 Buoy.

For tankers of 45,000 tons in vicinity of No. 5 buoy.

All other large vessels, South of No. 5 buoy at mouth of Glengarritt Harbour. For smaller vessels, the East end of Whiddy Island (10 fathoms) and Bantry Harbour (25 ft. depth).

MAX. SIZE: (a) Oil Terminal – up to 500,000 tons with draft up to 96 ft.
(b) Bantry Harbour – draft not more than 25 ft.
(c) Bantry Pier – 150 ft. length with draft 12 ft.

HEALTH: All vessels must exhibit quarantine signals until quarantine formalities completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light.

No person other than Pilot is allowed to board any vessel either alongside jetty or at anchorage until pratique has been granted. Pilot to be informed when any suspected disease or fever on board.

RADIO: Messages and ETAs through Valentia Radio, Land's End or any UK station. Port Operation (Gulf) Service, call sign "Gulf Control" (24 hours) VHF Channels 11, 14 and 16.

TUGS: Four tugs of 3,200 h.p. serve Oil Terminal. Two tugs of 300 h.p. available in Inner Harbour. Tugs' lines used.

BERTHING: Allowed at all stages of tide at Oil Terminal Jetty, depending on weather conditions.

Berthing at Bantry Pier depends on size of vessel and state of tide.

GULF OIL TERMINAL: Tankers berth alongside island jetty 1,600 ft. in length situated approximately 1,300 ft. offshore. The Island is comprised of a central loading platform with connected mooring dolphins. The outside berth designed for tankers up to 500,000 d.w.t. with max. draft of 96 ft. The inside (South) berth can accommodate vessels up to 85,000 d.w.t. with max. draft of 85 ft.

Outside berth fitted with 16-in. cargo lines.
Inside berth fitted with 12-in. cargo lines.
All bunker lines are 12-in. diameter.

BALLAST: There is strict enforcement of law against oil pollution. All ballast must be discharged ashore at terminal, where 16-in. ballast lines available to shore.

STEVEDORES: Available; 24 hour advance notice to Agent required.

MEDICAL: 24 hour standby launch available if vessel enters Bantry Bay for medical attention to crew. Vessels should give instructions whether doctor needed on board. Vessel should pass ETA through Valentia Radio to "Harbour Master Bantry". Or if in VHF range (50 miles) ETA to "Gulf Control" on Channel 14.

FRESH WATER: Available at Bantry Pier. At Oil Terminal Jetty or Harbour, water not available unless special arrangements made for barges.

FUEL: Gas oil and heavy fuel for tankers available at Oil Terminal. Gas oil and fuel available at Bantry Pier in road tenders of 20 tons.

REPAIRS: Local repair firms can undertake limited repairs, but nearest dockyard available for major repairs is at Cork.

DENSITY: 1025.

CUSTOMS ALLOWANCES: Tobacco: Depending on stay in port. Approximately 80 to 100 cigarettes per man for 2 to 3 days. Wine and/or Spirits: half litre per man.

IDENTIFICATION CARDS: Required.

REPATRIATION: There are facilities for crew repatriation.

CONSULS: No local representatives.

AIRPORT: Situated 48 miles away; 2 to 4 flights to London per day. Flights also to Paris twice a week.

TIME: GMT plus 1 hour during Summer months. GMT from October to March.

HOLIDAYS: Cargo work can be carried out on most holidays, except Christmas.

POLICE/AMBULANCE/FIRE: Call local exchange.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Permitted. Liberty launch available for tankers at 1 hour's notice.

SERVICES: Vessels requiring any of the following services should advise Agent prior to arrival, giving fullest possible details:

Divers: Services of divers available to vessels for inspection and freeing fouled propellers.

Provisions: Normal supplies of most categories available. Ample time should be given to ship chandler.

Laundry: Small laundry takes limited amount in Bantry (24 hrs.). Large amounts sent to Cork (24 hrs. return service), but rather expensive.

GENERAL: All vessels required to fly Irish Ensign on foremast during daylight hours. Irish territorial waters extend 12 miles seaward from mainland.

AUTHORITY: Harbour Master.

CASTLETOWNBERE: 51.41 N. 09.54 W.

DOCUMENTS:
Health Certificate.
Crew List.
List of Bonds.
Ship's Register.
Log Book.
Crew Passports.

PILOTAGE: No recognised Pilot; Pilot can be contacted through Harbour Master.

ANCHORAGE: See Charts: 13 ft. available at MLWST.

MAX. SIZE: Max. permissible draft 13 ft.

HEALTH: Customs give pratique if ship clear; if not, Doctor will be notified.

RADIO: Land's End and Valentia.

TUGS: No tugs.

BERTHING: In accordance with Harbour Master's instructions.

STEVEDORES: No stevedoring arrangements.

MEDICAL: No advance notice necessary. Hospital facilities available.

FRESH WATER: Available at quay.

FUEL: Diesel available at quay; no advance notice necessary.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by crew.

CUSTOMS ALLOWANCE: Tobacco: Captain 8 oz. Officers 6 oz. Crew 4 oz. Wine and/or Spirits: Captain: 1 gal. wine, 1 gal. beer and 1 pint spirits. Officers: 1 gal. wine, 1 gal. beer and 1 pint spirits. Crew: 1 gal. beer or 1 gal. wine and 1 pint spirits.

IDENTIFICATION CARDS: Required.

AIRPORT: 80 miles to Cork Airport, served by regular airlines.

TIME: GMT plus 1 hour. Reverting to GMT from October to March.

HOLIDAYS: Cargo work can be arranged on all holidays.

POLICE/AMBULANCE/FIRE: Police Castletownbere 2; Ambulance Castletownbere 4; Fire Castletownbere 49.

TELEPHONES: Not available for placing on board.

SHORE LEAVE: Allowed.

AUTHORITY: Ministry for Agriculture and Fisheries, Dublin.

CORK (including Cobh, Whitegate): 51.50 N. 08.17 W. (See Plan)

PORT LIMITS: Line joining Cork Head and Power Head.

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Health Declaration.
3 Customs Manifests.
For shore formalities
Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Light Dues Certificates.
Deratisation Certificate.

PILOTAGE. Minimum 24 hours notice of ETA and draft to Agent. Accurate ETA's are vital as Pilots only go afloat on this basis. When within VHF range, contact should be established through "Cork Harbour Radio" (see "Radio"). This station combines Port Operations and Information service and co-ordinates the pilotage service. The pilot launches are also fitted with VHF. Channels 6, 12 and 16.

For large deep-drafted vessels, Pilot usually boards up to 2 or 3 miles South of Roches Point. Compulsory river pilotage area extends upstream from Spit Bank Light.

ANCHORAGES: Safe deep-water anchorages as arranged with Pilots.

RESTRICTIONS: Navigation by night and day. Ships of 5.4 m. draft can make passage of river to Cork at any stage of tide.

MAX. SIZE: *Cork:* Max. length 152 m. extendable to 158 m. at discretion of Harbour Master. Draft fresh water on spring tides 8.7 m. on neap tides 7.8 m. *Whitegate:* Tankers up to 244 m. length. 11.6 m. draft. Max. draft 12 m. at highest tides.

HEALTH: Health Declaration form is presented to Customs Officer or Port Health Inspector and pratique issued without delay. in cases of disease on board notify Agents who inform Health Authorities.

RADIO: Coast Coast Station – Valentia Radio. W/T and R/T. R/T link call facilities available. Telex fitted. In U.K., Coast Stations also relay messages direct to Agents.

Harbour Radio: VHF Channels 12, 14 and 16, 24 hour watch maintained. Call sign "Cork Harbour Radio". A port operations and information service is provided and it is through this organisation that the requirements of the Harbour Master will be made known.

TUGS: Deep draft vessels take tug assistance from Horse Head to

Cork and vice versa. Tug's lines are used. Tankers use two to four tugs for berthing at Whitegate Terminal.

BERTHING: The quays at Cork afford good accommodation for vessels up to 152 m. LOA, on fresh water drafts of 7.8 m. on Mean Neap tides and 8.7 m. on Mean Spring tides with 9.1 m. alongside quay. The The Deep Water Quay at Cobh is 183 m. long and vessels of 5.5 m. draft can berth with safety.

SPECIAL CARGO FACILITIES:

Grain: Two mobile suction discharge plants, combined discharge rate up to 240 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tide. Storage capacity 80,000 tons.

Ore: One mobile loading conveyor, max. rate 250 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tides. Conveyor system used in conjunction with mobile cranes for discharging of vessel up to 5,000 d.w.t.

Coal/Fertilisers/Sulphur: Four 6 ton level luffing grab cranes combined discharge rate up to 360 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft.

Containers: 30 ton travelling transporter crane. Length of berth 122 m. Max. depth at LWOST 5.5 m.

Roll-on/Roll-off and Passenger Car Ferry Terminal: Max. height of link span 8.6 m. above LWOST. Min. height of link span 2.7 m. above LWOST. Max. loading 65 tons. Distance from side of berth to centre line of link span 11.4 m. Max. ship size 137 m. LOA. Berth dredged to 5.5 m. LWOST.

Livestock loading Ramp and Lairage: Max. ship size 106.7 m. plus LOA. Berth dredged to 5.5 m. LWOST.

Pfizer Jetty: Length between dolphins 259.2 m. Max. draft 10 m. on all tides.

Molasses discharge rate, 1,000 t.p.h.
Fuel Oil discharge rate, 600 t.p.h.
Sulphuric Acid discharge rate, 200 t.p.h.

STEVEDORES: Labour hiring times. Week-days 0800, 1000 and 1130 hrs. Gangs for week-end working must be hired at 1700 hours on Fridays. ETA advice could include number of gangs workable.

MEDICAL: All medical and hospital services available at short notice.

TANKERS: Irish Refining Co. Terminal at Whitegate is situated on East side of Lower Harbour. Two deep water berths for tankers. Max. size, 55,000 d.w.t. or 90,000 d.w.t. partly laden. Slop reception facilities available.

Length between dolphins, 366 m.
Crude discharge rate up to 4,000 t.p.h.
HOF loading rate up to 1,700 t.p.h.
Gas Oil loading rate up to 700 t.p.h.
Petrol loading rate up to 600 t.p.h.
LPG loading rate up to 20 t.p.h.

DENSITY: Average density of water in river 1008.

FESH WATER: Available at all quays ex hydrants – delivery rate 25 t.p.h.

FUEL: All fuels with exception marine diesel oil available. 24 hours notice required.

DEVELOPMENTS:

N.E.T. (Nitrigen Eireann Teo.). Jetty under construction in 1976/7 at Marino Point. Overall length dolphin to dolphin 375 m. Dredged to 10.6 m. to accommodate Ammonia tankers of up to 15,000 d.w.t. and bulk or general cargo vessels of up to 25,000 d.w.t. (Partly loaded). Vessels of up to 186 m. OAL and 9.5 m. draft will be acceptable.

Dredging: Dredging of Eastern entrance to a depth of 14.6 m. and a width of 152 m. is expected to be carried out in 1976. Dredging of Bar Rock Channel to a depth of 11.5 m. and a width of 240 m. is expected to be carried out in 1976.

WATCHMEN: Recommended but not compulsory.

OPENING/CLOSING HATCHES: Crew must perform this work as dockers decline to do it.

CUSTOMS ALLOWANCES: 200 cigarettes per man, and 1 bottle spirits per man.

CARGO GEAR: No special local requirements. Regulations similar to British Board of Trade safe working requirements.

IDENTIFICATION CARDS: Not required.

CONSULS: *France, Sweden, Norway, Netherlands:* B.A. Gotto, c/o James Scott & Co., Glanmire House, Lower Glanmire Road, Cork. Telephone No. 54200. *Finland, Denmark:* J. C. Hannigan, c/o James Scott & Co., Glanmire House, Lower Glanmire Road, Cork. 54200. *Belgium:* G. Jones, 33 St. Patrick's Quay, Cork. 54018. *Italy:* P. Cali, University College, Cork. 26871. *Germany:* T. J. Clifford, Cooper & Lybrand, South Mall, Cork. 21552.

REPAIRS: All types of deck and engine repair facilities available.

DRY DOCK: Verolme Cork dockyard main dry dock can take vessels up to 158.5 m. in length. Floating docks of 2,000 and 10,800 tons lifting capacity, also four 40 ton cranes. Able to carry out repairs to ships afloat of any tonnage using the port.

REPATRIATION: Can be carried out without difficulty.

AIRPORT: Five miles from city. Regular flights twice daily to London. Onward connections to all destinations.

TIME: GMT from 0200 hrs. on Sunday following 3rd Saturday in October to 0200 hrs. on Sunday following 3rd Saturday in March (unless latter is Easter Saturday, in which case to 0200 hrs. on Sunday following 2nd Saturday in March).

One hour ahead on GMT (i.e. Standard European time) for remainder of year.

HOLIDAYS: St. Patrick's Day (March 17th); Good Friday; Easter Monday; First Monday in June; First Monday in August; Christmas Day (December 25th); St. Stephen's Day (December 26th).

POLICE/AMBULANCE/FIRE: 999 is emergency number for all services. Actual: Police 23161; Fire 21107; Ambulance 21107.

SERVICES: All tanker services available at Whitegate. Otherwise, various general services required by ships available at Cork.

SHORE LEAVE: No restrictions on shore leave.

DELAYS: Except waiting for tide there are very few occasions on which entry to or departure from the port is subject to delay.

AUTHORITY: Cork Harbour Commissioners.

AGENT: James Scott & Co. (Cork) Ltd., Glanmire House, Lower Glanmire Road, Cork. Telephone No. 54200, and Yacht Club Building, Cobh. Telephone No. 811549, Telex 6120. Cables "Scott Cork".

DUBLIN: 53.21 N. 06.15 W. (See Plan)

PORT LIMITS: Port of Dublin includes all water between Rory O'More Bridge (over River Liffey) and imaginary line drawn from Martello Tower at Sutton on North side of Dublin Bay to Sorrento Point at Dalkey on South side, but excluding Dun Laoghaire Harbour.

DOCUMENTS:

Forms C. 1 or C. 2 Customs report form (actually a copy of Manifest).
Form CU. 35 Victualling Bill (note covering Bonded Stores to be loaded Dublin).
Form CU. 7 Entry Outwards in ballast (for vessels sailing light).
Form CU. 10 Entry Outwards with cargo.
Form CU. 25 Entry Outwards (details of previous and forthcoming voyages.
Health Form.
"Jerque" Note (list of bonded stores on board on arrival).
Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).

PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:

(1) Ships trading coastwise of not more than 200 tons gross tonnage.
(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

Incoming Vessels: Pilots board incoming ships from black-hulled pilot cutter in Dublin Bay. Cutter only cruises when vessels are expected, and accurate ETA requested to avoid delay.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Channel 16; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office Tel. 748771 or Telex No. 5476 during office hours; and Tel. 48772 outside office hours. Following details should be given: name and situation of vessel, destination, draft, time of departure. It must be stressed that such orders must be made in sufficent time making due allowance, particularly at night, for accessibility of vessel.

ANCHORAGES: Scotch Bay – S.E. Dublin Bay and just East of Dun Laoghaire 6/10 fathoms at low water.

RESTRICTIONS: Draft restrictions: 30 ft. HW Neap Tides; 30 ft 6in. HW Normal Tides; 31 ft. 6 in. HW Spring Tides. Vessels less than 400 ft. overall, drawing 20 ft. 6 in. or less can enter at any state of tide.

ENTRANCE: Approach well lighted and easy of access. Inner Channel of Harbour, formed by almost straight channel of River Liffey from entrance at Poolbeg Lighthouse to Alexandra Basin, is 800 ft. wide for greater part of length and maintained at depth of 27 ft. LW. From Alexandra Basin entrance, River is quayed for a distance of nearly 2 miles to Butt Bridge in centre of City.

MAX. SIZE: State of tide governing max. draft, but no length or breadth restrictions.

HEALTH: Pratique automatic for movements Ireland/U.K. area. Maritime Declaration of Health indicates requirements. This declaration must be submitted on arrival by master of ship coming from foreign port. This requirement does not now normally apply to vessels trading *solely* between the Republic and ports in West Germany, Belgium and Netherlands, Atlantic and Mediterranean coast of France, Italy and Greece. Other requirements mentioned on Maritime Declaration of Health form still apply to such ships.

"Foreign Port" is port situated elsewhere than Eire, Northern Ireland, Great Britain, Isle of Man, or Channel Islands.

Master of foreign-going ship may be asked to produce valid Derating Certificate or Derating Exemption Certificate in respect of vessel. Travellers (passengers and crew) may be requested to produce valid certificates of vaccination against smallpox if from an infected local area, or if from countries in Africa, Asia, North and South America. This requirement does not apply to arrivals from Azores, Bermuda, Canada, Canary Islands, Madeira, French Guiana, Guadeloupe, Martinique, Greenland, Surinam, Netherlands – Antilles, United States of America. Ships may be subjected to sanitary inspection by inspectors of Port Health Service.

Swill must not be landed from vessels which trade outside Eire.

Granting of pratique by radio not practised at Dublin, But is under consideration at present.

RADIO: Valentia Radio, Ireland. Portishead Radio, U.K. Anglesea Radio, U.K.
TUGS: Normally meet vessels at North Bank Lighthouse (roughly half-way mark of main channel) 1 mile West of Poolbeg Lighthouse. Tugs rope optional.
BERTHING: Customs House Docks – from 2 hours to one half hour before high water. Otherwise no restrictions.
The area available for shipping extends from Eastern Breakwater to Butt Bridge and inclusive of Alexandra Basin, Alexandra Basin Extension, Custom House Docks and Grand Canal Docks; it is 227 acres in extent.

North Side of the River, from Butt Bridge to North Wall Light, available as berthage, 7,529 ft., depth LW 9 to 22 ft.

South Side of the River, from Butt Bridge to Ringsend Gut, available as berthage 5,728 ft., depth LW 16 to 22 ft.

South Bank Quay serving Electricity Supply Board's Ringsend Power Station, 700 ft., depth LW 28 ft. Two transporter cranes of 5 tons each for discharge of coal, and pipe-lines for discharge of oil.

Alexandra Basin. Quays on *South* and *West* sides 2,690 ft., depth LW 24 to 26 ft.

Alexandra Quay West on North side of Alexandra Basin, 1,230 ft., depth LW 32 ft.

Alexandra Quay East, 1,200 ft., depth LW 32 ft.

Alexandra Basin East comprises East side Ocean Pier, Alexandra Quay East and East and West Oil Jetties.

Fertilizer Jetty in Alexandra Basin has a main section of 750 ft. used for bulk cargoes, depth LW 31 ft. with provision for deepening, equipped with pipe-lines for liquid sulphur and ammonia; conveyor and 2 electric cranes of 10 tons each for rock phosphate and potash in bulk. 300 ft. long approach section leading to main jetty (with special facilities for working acids and ammonia and loading out grain) for accommodation of smaller bulk vessels.

Ocean Pier West at Eastern end of Alexandra Basin, 1,372 ft., depth LW 32 ft.

Ocean Pier South at Eastern side of Alexandra Basin entrance, 467 ft., depth LW 32 ft.

Ocean Pier East, 800 ft., depth LW 32 ft.

STEVEDORES: ETA required by Stevedores before 1500 hrs. Monday to Thursday for work the following day, and by 1500 hrs. Friday for work Saturday, Sunday or Monday.

Average discharge rates: *Grain:* 3,000 tons per day. *Timber:* 30 standards loose per gang/day. 120 standards packaged per gang/day. *General:* Bagged cargo and fast general, including paper, 250 tons per gang/day. *Other Generals:* 90 tons per gang/day.

TANKERS: No slop residue discharge facilities.

Tanker Berths	*Max. Draft*
No. 1, West Oil Jetty, West Side	31 ft.*
No. 2, West Oil Jetty, East Side	31 ft.*
No. 3, East Oil Jetty, West Side	31 ft.*
No. 4, East Oil Jetty, East Side	19 ft.
South Bank Quay (E.S.B.)	27 ft. 6 in.*
South Bank Quay (Poolbeg)	35 ft.*

*Time suitable for navigation in approaches – 1 hour before High Water.

Common User Oil Pipe-line System: This system provides 5 pipe-lines to Eastern Oil Jetty and 7 pipe-lines to Western Oil Jetty. Cargoes of tankers berthed at these jetties can be discharged to storage installations of any of the oil companies.

E.S.B. (Electricity Supply Board): At Poolbeg Jetty (formerly known as "Pigeon House 'B' Jetty"). Max. size 35,000 d.w.t. with the aid of tugs. Present depth sufficient for vessels of this size.

DENSITY: 1025 at all stages of tide.

FRESH WATER: Available at all berths by 2.5 in. hoseline – 8/10,000 gal. per hour per hydrant.

FUEL:

Grades of Fuel Oil	*Viscosities*
Heavy Fuel Oil	3,500 sec. max.
Inter. Fuel Oil	1,500 sec. max.
Medium Fuel Oil	950 sec. max.
Light Fuel Oil	200 sec max.

Advance Notice required. Bunkering by pipe-line depends on availability of Oil Berth. Bunkering by Oil Barge normally a.m. notice on day required. Bunkering by Road Tanker – 24 hours notice.

FIRE PRECAUTIONS: Port By-Laws; Harbour Master's orders/Letters to Masters. Ref.: Board of Trade "Carriage of Dangerous Goods in Ships" and Aeby "Dangerous Goods".

Packed Petroleum: Small consignments (7,000 gal. max.) Class A product – must be removed from port area ex-ship, or to special compound. Class B or Class C may be permitted on quays after check for leaks.

Fibrous Cargoes: See Directives No. 2 and 3 to Masters. Jute, hemp and sisal must be removed ex-ship from port area.

Cotton, cocoa fibre, kapok, etc., must be removed ex-ship to Hazardous Goods Shed.

General: Harbour Police-Watch obligatory during handling of all hazardous or inflamable cargoes, and on tankers during vessels' stay in port. No smoking permitted in Oil Zone, sheds, etc.

GANGWAY/DECK WATCHMEN: If no watchmen from crew, then shore watchman is recommended.

OPENING/CLOSING HATCHES: Patent hatches by crew; other hatches with some assistance from dockers.

CERTIFICATES:
Certificate of Registry.
Radio Safety Certificate.
Load Line Certificate.
Current Trinity House light bills.
Safety Equipment Certificate.

CUSTOMS ALLOWANCE: Tobacco per 8 days: 200 cigarettes – Master; 150 cigarettes – Officers; 100 cigarettes – Crew. Wine and/or Spirits: quarter pint per day per man.

CONSULS:
Brazil: P. J. Murphy, Honorary Consulate of Brazil, Shottery, Killiney, Co. Dublin. Tel. 851971.

Honorary Vice-Consul: Paul J. Byrne, Panamanian Consulate, 20 Eden Quay, Dublin 1. Tel. 747867.
Peru: *Consul General:* D. T. Figgis, Peruvian Consulate General, Clyde House, Clyde Road, Dublin 4.
Philippines: W. Sandys, Consulate of the Philippines, 18/21 St. Stephen's Green, Dublin 2.
South Africa: *Honorary Trade Commissioner:* N. P. McEvoy, 4 Mary's Abbey, Dublin 7. Tel. 47372.
Turkey: *Honorary Consul General:* William Anderson, Turkish Consulate, 5 Clyde Road, Dublin 4. Tel. 758721.

REPAIRS: All classes of repairs carried out by Liffey Dockyard Ltd.

DRY DOCKS: Graving Dock No. 1: Length overall 412 ft.; width at entrance 70 ft.; depth over sill at HWOST 17 ft. 9 in., depth over blocks at HWOST 15 ft. 6 in. Equipment – one 6 ton EP crane.

Graving Dock No. 2: Inside length with caisson gate in: Extreme outer position 663 ft.; normal outer position 637 ft. Centre position 367 ft.; inner position 257 ft. Width at entrance 80 ft.; depth over sill at HWOST 25 ft. 6 in. Depth over blocks at HWOST 23 ft.

The intermediate positions for the caisson gates make it possible to operate inner section so as to accommodate a small or medium-size vessel independently of remainder of dock.

Equipment: One E.P. crane, 25 tons at 72 ft. radius to 5 tons at 100 ft. radius. Seven power capstans of 5, 10 and 15 tons pull. Fresh and salt water hydrants at dock sides.

Patent slips: No. 1 – Length of cradle 76 ft. for vessels up to 200 tons displacement. No. 2 – Length of cradle 106 ft. for vessels up to 900 tons displacement.

REPATRIATION: May be arranged by ship's Agent through Department of Justice.

AIRPORT: Dublin Airport, 6 miles North of city centre, served by regular services direct to U.K., Europe, U.S.A. and Canada.

TIME: GMT plus 1 hour. Reverting to GMT between October and March.

HOLIDAYS: New Year's Day (1st January); St. Patrick's Day (National Holiday) (17th March); Good Friday*; Easter Monday†; Spring Bank Holiday† (1st Monday in June); August Bank Holiday† (1st Monday in August); Christmas Eve, half holiday (24th December); Christmas Day (25th December); St. Stephen's Day (26th December).

*Not a port holiday, but all other offices closed.

†These days can be worked at Sunday rates and conditions.

POLICE/AMBULANCE/FIRE: Contact Harbour Police patrol or at Dock Gates, or dial 999 on public telephone for all emergency services.

TELEPHONES: Coin-box telephones available on request at Oil Berths. No rental charges; normal coin-box rates.

GENERAL: Masters' cash requirements for week-end must be notified to Agent by noon on Friday.

SERVICES: No facilities for tank cleaning or discharge of tank washings.

SHORE LEAVE: No port restriction on crew's shore leave.

AUTHORITY: Dublin Port and Docks Board.

DUN LAOGHAIRE: 53.18 N. 06.07 W.

PORT LIMITS: As defined by Dublin port and docks Board, as ships have to pass through their pilotage area. The limits of Dun Laoghaire Harbour are defined in its bye-laws as per its fairway extending beyond its pierheads.

DOCUMENTS: See "Dublin".

PILOTAGE: See "Dublin".

ANCHORAGES: See "Irish Coast Pilot".

RESTRICTIONS: See "Irish Coast Pilot".

MAX. SIZE: Fairway dredged to 5.2 m.

HEALTH: See "Dublin".

RADIO: See "Dublin".

VHF: British Rail operate channels 14 and 16 when their vessels approach the port. The Harbour Office does not have VHF.
TUGS: None.
BERTHING: Harbour formed by 2 breakwaters, East breakwater length 4,230 ft. West breakwater, length 5,080 ft. Width at entrance between breakwaters, 760 ft. Depth at entrance 22-28 ft. MLWS.

	Length ft.	*Depth MLWS* ft.
Mail Boat Pier, E. side	760	17–22
Mail Boat Pier, W. side	570	15–20
Car Ferry Pier, E. side	460	18
Car Ferry Pier, W. side	460	18
Traders Wharf, outside (Foal)	490	12
Traders Wharf, inside	430	12

CRANES: A 3.5 ton fixed electric crane on each side of the mail boat pier and one 2 ton and one 5 ton crane, available for fitting out yachts.
SPECIALISED CARGO HANDLING FACILITIES: Three Ro/Ro ramps. Ramps are to M.O.T. loading requirements, width of ramps – 3 m.
BRIDGES: None.
STEVEDORES: None. British Rail arrange gangs.
MEDICAL: See "Dublin".
DENSITY: 1025.
FRESH WATER: Available at all berths.
FUEL: Arranged by Agent.
FIRE PRECAUTIONS: Only usual non-smoking precautions.
CONSULS: See "Dublin".
REPAIRS: See "Dublin".
DRY DOCKS: See "Dublin".
SURVEYORS: As per Lloyd's Shipping Agents, Dublin.
GANGWAY/DOCK WATCHMEN: The ship's watch.
CUSTOMS ALLOWANCES: As per E.E.C. regulations.
REPATRIATION: See "Dublin".
AIRPORT: Dublin Airport, Collinstown, 20 km.
TIME: As United Kingdom.
HOLIDAYS: Seven (7) Bank Holidays each year.
POLICE/AMBULANCE/FIRE: Available locally. Police. Tel. 801285 Fire Brigade and Ambulance, Tel. 801903.
TELEPHONES: None on board visiting ships.
SERVICES: None.
SHORE LEAVE: Possible, Seamen's I.D. card sufficient, shore passes are not issued.
REGULATIONS: Nothing unusual.
DELAYS: There are no delays.
DEVELOPMENT: None in foreseeable future.
AUTHORITY: Commissioners of Public Works, Dublin 2.

GALWAY: 53.16 N. 09.03 W. (See Plan)

DOCUMENTS:
1 Crew List (official form).
1 Passenger List (official form).
1 List of Articles (dutiable) in Possession of Crew (official form).
1 Stores List (to include bonded surplus stores for seal, firearms, ammunition, animals, radio transmitting and receiving sets) (unofficial form).
Maritime Declaration of Health (official form).
Documents, etc., required by Agent for Customs Purposes:
Ship's Register.
Load Line and Safety Certificates, etc.
Receipt for previous payments of light dues if any.
PILOTAGE: Pilots board incoming vessels only at "tide times" (approx. 2.5 hours before HW until HW); vessels arriving at times outside this period should anchor and await Pilot. Safe anchorages at inner roadstead or near Margaretta Buoy according to tonnage and draft, Pilot will board at either. Application for Pilot should be to Agent with notice of ETA. International light and sound signals may be used.
ANCHORAGES: During S.W. gales safest anchorage is at Black Head.
RESTRICTIONS: Entry from 2 hours before HW until HW only.
MAX. SIZE: Governed by depth on sill of 28 ft. at springs and 24 ft. at neaps: width of dock gates, 65 ft. and length of turning area 480 ft.
HEALTH: Master of ship arriving from foreign port must deliver Maritime Declaration of Health in order to obtain Pratique. An oral Declaration will suffice for ships trading solely between Republic of Ireland and Belgium, Holland and European France. Pratique will be granted or withheld depending on answers given to questions put in Health Declaration.
In event of a suspected disease or fever on board, vessel is detained pending arrival of Medical Officers of Health. No unauthorised person is allowed to leave ship without authority of Chief Medical Officer.
Pratique is automatic when vessel arrives from ports in Great Britain, Isle of Man, Northern Ireland and Channel Islands or another port within Eire.
RADIO: ETA cables to Agents, etc., through Valentia Radio if approaching from South or Malin Head if from North. Valentia has telephone link service. Port VHF on Channel 16.
TUGS: No tugs available.
CARGO HANDLING FACILITIES: One 30-ton cantilever crane in operation at Dun Aengus South Quay. Grain, ore, coal, bulk fertilisers, etc. are all handled by grabs. Ore is loaded by special conveyors (200 t.p.h.).
STEVEDORES: Agents arrange after receipt of ETA.
MEDICAL: No special port medical requirements. Ships medical requirements should be included in ETA signal.
TANKERS: No special requirements. 1 berth.
DENSITY: 1012 (average).
FRESH WATER: Available by hose.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: (Open quays) watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: Wine, Spirits and Tobacco: members of a crew who remain out on a vessel during her stay in port are allowed to retain in their own possession, under certain conditions, the following quantities of the undermentioned goods:

	Tobacco in any form (to cover 8 days)	*Spirits in any form* (to cover 4 days)	*Wine* (to cover 4 days)
The Master	8 oz.		
Officers (i.e., mates, engineers, wireless operators, ship's surgeons, pursers, chief stewards or serangs)	6 oz.	1 pint	1 gallon
Other Crew members	4 oz.	1 pint	

IDENTIFICATION CARDS: Not needed.
CONSULS: T. McDonogh & Sons Ltd., Merchant's Road, Consuls for France and Belgium only. No others in Galway.
REPAIRS: Deck and engine repairs carried out afloat.
DRY DOCKS: No dry dock.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Dublin (140 miles) and Shannon (55 miles). Airports served by regular flights.
TIME: GMT plus 1 hour. Reverting to GMT from October to March.
HOLIDAYS: Christmas Day; St. Stephen's Day (26th December); St. Patrick's Day (17 March); Easter Monday; Whit Monday; First Monday in August.
POLICE/AMBULANCE/FIRE: Police 2121; Ambulance 4141; Fire 999.
TELEPHONES: No arrangements exist for placing telephones on board.
SERVICES: Compass adjusters available in Dublin. 24 hours notice to Agent.
SHORE LEAVE: Allowed.
DELAYS: Apart from tidal, none.
AUTHORITY: Galway Harbour Commissioners.

KILLYBEGS: 54.38 N. 08.26 W.

DOCUMENTS: See "Dublin".
PILOTAGE: No permanent Pilot but one can be acquired on request.
ANCHORAGE: Very safe anchorage.
RADIO: Malin Head Station.
BERTHING: Large fishing fleet has to be accommodated.
MEDICAL: Necessary to send advance warning re illness or injury to a Crew member.
FRESH WATER: Available.
FUEL: Fuel oil available.
DEVELOPMENTS: Major harbour scheme has commenced – additional wharves, and piers.
IDENTIFICATION CARDS: Not needed.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Department of Agriculture and Fisheries, Dublin.

LIMERICK: 52.40 N. 08.38 W. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Custom's Manifest (Tobacco List).
Health Declaration.
Ship's Register (Tonnage Certificate).
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Receipt for last previous Trinity House Light Dues payment (if any).
Derat Certificate.
PILOTAGE: Compulsory from Scattery Island (52.35 N., 09.31 W.) to Limerick. Pilot may be taken off Kilcredane Head about 9 miles further West as an optional extra (usually by vessels over 5,000 d.w.t.). ETA for Pilots passed in advance by Agents. Masters may call Pilots (Scattery Pilot Station – Channel 16 VHF) or by normal International Code sight or sound signals. ETA to be sent 24 hours in advance and amended as necessary. Pilots watch only when vessels are expected inwards or outwards.
ANCHORAGE: Vessels normally wait tide to Limerick at Scattery Roads; Beighcastle Anchorage depth over 60 ft. (52.40 N. 08.57 W.) about 18 miles downstream off Limerick is nearest deep-water anchorage; now disused as lightening place for bulk grain cargoes.
RESTRICTIONS: Entrance to Limerick Dock is limited to 2 hours preceding HW; for vessels over 3,000 d.w.t. (laden) daylight HW only.
MAX. SIZE: Dependent on tide. Up to 21 ft. draft on spring tides

(neap tides about 16 ft.) Vessels of 500 × 65 ft. beam have berthed Limerick Dock on suitable draft.
HEALTH: If no infectious diseases on board, pratique granted by Customs Preventive Officer on arrival on presentation of Health Declaration of Master. Landing of dogs and cats from outside British Isles strictly forbidden.
RADIO: Irish Stations; Valentia Radio (links-calls available) or Malin Head Radio, or any U.K. Radio Station. Agents have special arrangements with Valentia Radio and Malin Head Radio, cables passed by direct telex to Agent's office.
VHF: Masters can call Scattery Pilot Station on Channel 16, or Limerick Harbour Radio – same, working on Channels 12 and 13.
TUGS: One 400 h.p. tug available. The Harbour Dredger is also fitted with a towhook and used as tug if necessary.
BERTHING: In Limerick Dock there are 10 berths of which only 1 (Shell berth) is reserved exclusively for tankers. Drafts on all berths approx. tidal gauge plus 2 ft. Extensive berthage on tidal quays now used by fertilizer vessels up to about 1,000 d.w.t. lying safe ground on mud berths.
TANKERS: Dernish Oil Jetty situated approximately 1 mile South of Shannon Airport. Jetty head 150 ft. long. Distance between head and stern buoys 430 ft. Depth alongside LW 26 ft. Jetty designed for vessels of up to 12,000 d.w.t. Aviation fuel pumped direct to airport.
STEVEDORES: Sole stevedores Limerick Cargo Handling Ltd. (as a result of rationalisation scheme). ETA per Agent before 1600 hrs. each day Monday to Thursday for labour next day. Master to state number of gangs/workable hatches. Crew open and close hatches. Normal work 0800/1700 hrs. but overtime can be worked 24 hours per day, Saturday and Sunday included. Requisition for labour for weekend work and 0800 hrs. Mondays by 1600 hrs. Friday.
Discharge rates: Bulk cargoes 1,000 tons per day.
D.B.B. 60 standards per day.
Packaged timber 150 stand. per gang day.
Bagged cargoes (palletised in hold) 400 tons per gang day.
Generals 130 tons per gang day.
All cargoes by crane discharge.
Grain consigned to Ranks is discharged directly to mill by floating grain elevator "Garryowen" in Wet Dock.
CONTAINER HANDLING FACILITIES: A 32-ton Gantry Container Crane at Limerick Docks.
MEDICAL: All medical facilities available short notice.
DENSITY: 1000 in Limerick Dock.
FRESH WATER: Available at all berths ex hydrant. Average rate 7.5 t.p.h.
FUEL: All grades available in reasonable quantities per road truck on 24 hours notice. (Non-bunker port prices).
WATCHMEN: Watchmen from crew, or if none available shore watchmen available.
HATCHES: Opening and closing of hatches, setting up derricks, shifting of hatches, beams, patent hatches, etc., all to be done by ship's crew with no assistance from shore gangs.
CONSULS: Belgium, Denmark, Finland, France, Germany (Fed. Rep.), Holland, Spain, Sweden.
CUSTOMS ALLOWANCES: (Tobacco per 8 days). Master 200 cigarettes; Officers 150 cigarettes; Crew 100 cigarettes. Wine/Spirits: quarter pint per man per day.
REPAIRS: Limited facilities. Dry dock available for vessels up to 40 ft. beam and not exceeding 15 ft. draft.
REPATRIATION: No difficulties. Shannon International Airport 15 miles. Daily flights world-wide destinations.
TIME: As U.K. GMT or GMT plus 1 hour (Summer Time).
HOLIDAYS: (For dock working), New Year's Day (1st January); St. Patrick's Day (17th March); Easter Monday; First Monday in June; First Monday in August; half-day 24th December, 25th December, 26th December (Christmas Day and St. Stephen's Day).
POLICE/AMBULANCE/FIRE: Dial 999 for all emergency services.
SHORE LEAVE: No restrictions.
AUTHORITY: Limerick Harbour Commissioners.

AGENT: Mullock & Sons Ltd., Ship's Agents and Chartering Brokers, Security House, 15 Lower Mallow Street, Limerick. Tel.: 061-45044; 061-45155. Cables: "Mullock Limerick". Telex: 6986.

NEW ROSS: 52.23 N. 06.56 W.

PORT LIMITS: Drumdowney Point to Kilmore Quay adjacent Barrow Bridge 52° 23′ N. 06° 56′ W. The vessel is considered to be an arrived ship at the time of first high water after arrival off Barrow Bridge.
DOCUMENTS:
2 Cargo Manifests.
1 Bill of Lading.
1 Crew List.
1 Ship's Store List.
1 Passenger List.
1 Clearance.
Register.
Light Dues Certificate.
Deratisation Certificate.
PILOTAGE: For estuary Pilot (see Waterford).
New Ross Pilots Tel. 051-82206. Pilotage messages received and transmitted by Barrow Bridge VHF Channels 16 and 11. Early ETA advisable. Pilotage compulsory.
ANCHORAGE: To Pilot's advice.
RESTRICTIONS: Max. draft 19 ft. at neap tides, 22 ft. at spring tides, max. length 420 ft., max. beam 60 ft.
Navigation of the River Barrow for max. size vessels usually restricted to 2 hours before, to 2 hours after high water.
HEALTH: Declaration on arrival, international signals for pratique.
RADIO: Malin Head, Land's End or Ilfracombe Radio Station.
TUGS: Available on request.
BERTHING: 1,400 ft. new jetty, depth 25 ft. below LW Spring tide. Roll-on/Roll-off facilities available.
STEVEDORES: 24 hours notice required.

Bulk discharge rate:	200 t.p.h.
Bag rate	100 t.p.h.
Liquid discharge	300 t.p.h.

FRESH WATER: Available at all berths.
FUEL: Obtainable by road tankers.
CONTAINER FACILITIES: 45-ton crane. Five-acre storage space.
MEDICAL: Services available locally.
DENSITY: 1012 New Ross.
WATCHMAN: Available if required.

TIME: GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Work can be arranged on all church and bank holidays.
POLICE/AMBULANCE/FIRE: Police, Rathmullen 2; Fire, Letterkenny 112; Ambulance, Letterkenny 230.
TELEPHONES: No arrangement for placing telephones aboard.
SERVICES: No special services.

AGENT: Charles Deeney, Kerrs Bay, Rathmullen, Co. Donegal, Eire. Tel. Rathmullen 10.

ROSSLARE: 52.16 N. 06.20 W.

PORT LIMITS: The limit lines start from a point on shore 4,000 ft. South-east of viaduct and extend due North for a distance of 6,000 ft. and thence due West for a distance of 7,000 ft., thence due South for a distance of 3,430 ft., terminating on shore at a point 3,650 ft. West of existing viaduct.
DOCUMENTS:
Customs Documents.
Ships Manifests.
Crew List.

PILOTAGE: Not compulsory.
ANCHORAGES:
Prohibited Anchorage: 304° – 4.5 cables from Lighthouse
Thence 214° – 2 ,, ,, ,,
,, 124° – 4.5 ,, ,, ,,
,, 034° – 2 ,, ,, ,,
No anchorage inside breakwater. Sheltered from Southerly round to North Westerly winds.

Dangers: Shoals with depths of less than 18 ft. extend about 4 cables E.S.E. from head of breakwater. Shoal 18 ft., Southern end of which lies about 0.75 cables Northward of end of breakwater. Southern end of an extensive stony flat, having depths of 13 ft. to 18 ft. lies about 3.5 cables further to N.W. Between these shoals lie several outcrops of 18 ft.-19 ft.
MAX. SIZE: Max. draft 16 ft. 6 in. No. 3 berth – 440 ft. length, 16 ft. 6 in. draft. No. 4 berth – 380 ft. length, 16 ft. 6 in. draft. Also see "Berthing".
HEALTH: If no infectious diseases on board, pratique given by customs on arrival. If from a port within E.E.C. this may be given verbally, otherwise required in writing.
RADIO: Ilfracombe or Lands End radio station.
VHF: Call sign "Rosslare Harbour radio". Channel 16. Channel 14 for further communication when within radio range.
TUGS: None available.
BERTHING: Berth No. 3 reserved for British Rail and Irish Shipping Ferries. Berth No. 4 must be clear for all departures from Berth No. 3. Port caters for Roll-on/Roll-off traffic only, via stern loading terminal and ramp on West side of pier.
STEVEDORES: Ordered by Agents. ETA necessary.
MEDICAL: Advance notice required at least one hour. Hospital facilities 12 miles away.
DENSITY: Average 1025.
FRESH WATER: Laid on, delivery by hose. Cost £1.00 per 1,000 gals, or part thereof.
FUEL: No facilities.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: Crew assisted by stevedores.
CUSTOMS ALLOWANCE: Tobacco: 50 grammes per day or (40 cigarettes or 10 cigars). Spirits, 0.25 litres per day. Wine, 0.50 litres per day.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: No repair plant. Minor repairs possible by firms at Wexford (12 miles), Waterford (52 miles), Arklow (50 miles).
REPATRIATION: No facilities.
AIRPORTS: Dublin 110 miles. Cork 134 miles.
TIME: GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: New Year's Day; St. Patrick's Day (17th March); Easter Monday; June Bank Holiday; August Monday; Christmas Day (December 25, and 26). No work Christmas Days – December 25,and 26.
POLICE/AMBULANCE/FIRE: Police: Rosslare Harbour 33204; Ambulance: County Hospital, Wexford 22233; Fire: Fire Brigade, Wexford 22618.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Seaman's Book sufficient.
DEVELOPMENTS: Proposed additional Ro/Ro berth.
GENERAL: Leading lights for berth are fixed red, visible over an arc of 90° from 079° to 169° surmounting yellow diamond shaped daymarks.

Lighthouse on pier end, height 50 ft. flashing W.R.G. every 5 seconds.

Vessels coming astern to berth should make due allowance for N.E. and S.W. cross currents off pier end.
AUTHORITY: Coras Iompair Eireann.

SHANNON ESTUARY: (See Plan)

(*a*) Foynes Harbour: 52.36 N. 09.06 W.
(*b*) Foynes Island: 52.37 N. 09.07 W.
(*c*) Tarbert Island Oil Terminal: 52.35 N. 09.21 W.

(*a*) FOYNES HARBOUR

DOCUMENTS: See "Limerick".
PILOTAGE: Compulsory from Scattery Island to Foynes Buoys. Pilot may be taken off Kilcredane Head about 9 miles farther West as an optional extra (usually by vessels over 5,000 d.w.t. ETA for Pilots passed in advance by Agent. Masters may call Pilots (Scattery Pilot Station, Channel 16 VHF) or by normal International Code sight or sound signals. Foynes Harbour Pilot boards at Foynes Buoys. Call Foynes Harbour Radio VHF Channel 16.
ANCHORAGE: Vessels waiting to enter Foynes normally anchor Foynes Roads (West of Foynes Buoys).
RESTRICTIONS: No restrictions by day or night on vessels under 3,000 d.w.t. Vessels over 3,000 tons, up to 500 ft. BP length, without limit on beam, and up to 30 ft. draft in daylight only on suitable tidal conditions. Large vessels in ballast normally enter on early flood tide and swing with tidal stream berthing port side to quays ready for departure after loading. Similar vessels loaded enter on last of flood. Alternatively berth starboard side to quay on early ebb and swing after unloading with reduced draft on departure.
MAX. SIZE: Vessels up to 500 ft. BP length and 30 ft. draft with no restriction on beam. Ore cargoes of up to 16,000 tons have been loaded and tankers up to 20,000 tons have discharged.
HEALTH: See "Limerick".
RADIO: See "Limerick".
VHF/RADIO: As for Limerick except for "Limerick Harbour Radio" substitute "Foynes Harbour Radio".
TUG: None available.
BERTHING:

West Pier: 30 ft. LWOST neap tides. 350 ft. quay with mooring buoys ahead and astern. For tankers, crude ore (loading by conveyor system) and other cargoes. See "Stevedores".

East Pier: 32 ft. LWOST neap tides – 450 ft. quay with mooring buoys ahead and astern. Metal concentrates bulk (loading by conveyor system) and other cargoes. See "Stevedores".

Three other berths where vessels up to 2,000 d.w.t. lie safe aground on soft mud during low water.
STEVEDORES: ETA per Agent before 1600 hrs. Monday/Thursday for labour next day 0800 hrs., before 1600 hrs. Friday for labour Saturday or 0800 hrs. Monday. For cargoes other than bulk ore or concentrates in bulk Masters should state number of gangs/workable hatches.

Crude Ore: West Pier Conveyor: 500 t.p.h. loaded normally on continuous basis, day and night, commencing on berthing (16,000 tons in 28 running hours).

Concentrates in bulk. East Pier Conveyor: 250/300 t.p.h. normally loading 12 hours per 24 hours (running hours). Other import/export cargoes by ship's gear or shore mobile cranes (max. 3 units available).

Packaged D.B.B.: 120 stds. per gang day (pre-slung).
Packaged D.B.B.: 70 stds. per gang day (shore slings).
Bulk Fertilizers: 750 tons per day (mobile grab crane).
Bag Fertilizers 400 tons per gang day (shore mobile cranes).
Bagged Barytes, bagged cement and other bagged commodity: 400 tons per gang day (ship's gear/mobile crane).

Storage facilities: 15 acres of open landing ground and 25,000 sq. ft. of covered storage.

Weighbridge: An electronic weighbridge with a capacity of 50 tonnes, and length of bridge is 50ft.
MEDICAL Emergency facilities available at short notice locally. Full general hospital facilities at Limerick, 25 miles distant.
DENSITY: Variable on season and tidal conditions between 1008/1020.
FRESH WATER: Available at all berths. Quantities over 35 tons must be notified 24 hours in advance. 12p per ton.
FUEL: See "Limerick".
WATCHMEN: Normally crew watchmen.
HATCHES: See "Limerick".
CUSTOMS ALLOWANCE: See "Limerick".
REPAIRS: Limerick facilities – no dry dock.
REPATRIATION: No difficulties – Shannon Airport 40 miles.
TIM : See "Limerick".
HOLIDAYS: See "Limerick".
POLICE/AMBULANCE/FIRE: Call local telephone operator and request service required.
SHORE LEAVE: No restrictions.
AUTHORITY: Foynes Harbour Trustees.
AGENT: See "Limerick". Full time Tel.: Foynes 45 and part-time at Foynes 84.

(*b*) FOYNES ISLAND

LOCATION: Cement Limited Oil Jetty is located on N.W. side of island. Buoyed moorings for tankers up to 60,000 tons (length 950 ft.). Vessels lie alongside breasting dolphins off pipe trestle in 50 ft. min. LWOST.
DOCUMENTS: See "Limerick".
PILOTAGE: Compulsory from Scattery Island to Foynes Island (otherwise as Limerick).
ANCHORAGE: Vessels normally wait at Scattery Roads or at anchor N.E. of Foynes Island Jetty waiting daylight early flood tide for berthing.
RESTRICTIONS: None for vessels up to 60,000 d.w.t. subject daylight movements berthing early flood tide and departures during flood tide.

Mooring lines required: at least 4×120 fathoms and 6×90 fathoms polypropylene or similar.
MAX. SIZE: A min. depth alongside 50 ft.
RADIO:
VHF:
HEALTH:
TUGS:
} See "Limerick".
MEDICAL: No facilities on island. See "Foynes" and "Limerick".
TANKERS: Flexible hoses 2×8 in. passed by derrick from pipe trestle to ship. Connections – PCD 11.75 in., 8 holes.
DENSITY: 1025 except in very exceptional conditions.
FRESH WATER: None available.
FUEL: None available.
CUSTOMS: See "Limerick".
REPAIRS: None except via Foynes or Limerick.
REPATRIATION: Via Foynes.
TIME: See "Limerick".
HOLIDAYS: As Limerick. Vessels normally discharge without regard to holidays.
TELEPHONES: Shore 'phone placed on board for ship's use with cargo hoses. Tel.: Foynes 55.
SHORE LEAVE: Restricted to daylight hours as launch service only then available. No access to mainland except by launch.
AUTHORITY: Limerick Harbour Commissioners.
AGENT: See "Limerick".

(*c*) TARBERT ISLAND OIL TERMINAL

LOCATION: Electricity Supply Board power station and Jetty located on N.W. shore of Tarbert Island (with road access from the

mainland) 52.35 N. 09.21 W. Berth 48 ft. draft LWOST overall length including outer mooring dolphins 1,050 ft. with berthing face of 300 ft.
DOCUMENTS: See "Limerick".
PILOTAGE: Compulsory from Scattery Island to Tarbert (otherwise as Limerick).
ANCHORAGE: Vessels normally wait at Scattery Roads for daylight flood tide for berthing.
RESTRICTIONS: None for vessels up to 70,000-80,000 d.w.t. on suitable draft, berthing daylight flood tide, departure on flood tide in daylight or darkness (subject good weather).
MAX. SIZE: The berth has 48 ft. alongside at low water.
RADIO:
VHF: } See "Limerick".
HEALTH:
TUGS: Not required.
MEDICAL: No facilities. Nearest doctor at Glin, Co. Limerick (6 miles), See "Limerick".
TANKERS: 2, Marine Arms – 10 in. PCD 14.15/16 in. Outer diam. 16 in., inner diam. 11 in. Holes, 12 of 0.75 in. diam.
DENSITY: 1025, except in very exceptional conditions.
FRESH WATER: Limited supply on special request.
FUEL: None available. Jetty head approached from shore by footway (4.5 ft. wide×650 ft. long), therefore no direct access to berth from shore for road transport.
WATCHMEN: Watchmen from crew.
CUSTOMS ALLOWANCES: See "Limerick".
REPAIRS: None locally. Nearest Limerick 40 miles distant. Difficulty of access should be noted. Stores/provisions and/or spares, except the lighters, must be transported by launch from Tarbert Old Pier on East side to the Oil Terminal Berth and taken on board by ship's tackle.
REPATRIATION: Via Limerick.
TIME: See "Limerick".
SHORE LEAVE: No restrictions.
TELEPHONES: At jetty head. Tel.: Extension to Power Station telephone.
AUTHORITY: Limerick Harbour Commissioners.
AGENT: See "Limerick".

SLIGO: 54.16 N. 08.28 W.

DOCUMENTS:
Crew List.
Aliens List for other than Irish and British Ships.
Customs Clearance from previous port.
Health Declaration.
Manifest.
Surveys 109 Deck Cargo and 107 for Grain.
PILOTAGE: Tel. 071-73157 for Outside Pilot, Sligo 3036 for Inside Pilot who can be contacted on VHF Channels 12 and 16. Pilot boat a black yawl. Pilot boards off Raghley Head.
ANCHORAGE: East of Wheat Rock Buoy depth 40 ft.
RESTRICTIONS: Small vessels from half tide to 2 hours after high tide, large vessels near high tide and daylight.
MAX. SIZE: 275 ft. long, breadth not restricted, draft 16 ft. Spring tides, 13 ft. neap tides.
HEALTH: Home trade areas, verbal declaration, all others written declaration. Vessels from Great Britain automatic procedure. Suspected diseases inform Customs Officer or County Medical Officer of Health. Appropriate signals day and night.
RADIO: Malin Head, Wick or Port Patrick Radio.
TUGS: None.
STEVEDORES: 24 hours notice required. Coal 500 tons per day for crane. Fertilisers in bags 2 gangs, 500 tons per 8 hour day. Timber 40 stds. per hatch per day.
MEDICAL: No facilities.
DENSITY: 1004, high tide.
FRESH WATER: Available by hose, at 12.5p ton.
FUEL: All grades available, 24 hours notice required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES:
Register.
Articles.
Light Dues Certificate.
Deratisation Certificate.
CUSTOMS ALLOWANCE: Members of crew who remain on a vessel during stay in port allowed to retain, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days): Master 8 oz. 200; Officers 6 oz. 150; crew members 4 oz. 100.

Spirits in any form (to cover 4 days) 1 pint (1 bottle each). Wine of any strength, allowed in place of spirits at rate of one pint wine to 0.5 pt. spirits. In addition, an allowance of 1 quart of beer or 1 pint of wine per man per day.

Members of a crew of whatever rank finally leaving vessel allowed take ashore, free of duty, for own personal consumption, following quantities of undermentioned goods, when they form whole of their unconsumed stores:

(a) If from ports in Great Britain, Northern Ireland or the Isle of Man, or continental ports between the Elbe and Brest (except vessels crossing at regular and frequent intervals): Tobacco in any form 4 oz. Spirits (ordinary drinkable) 0.25 pint. Spirits (Cordials or perfumed) 0.25 pint.
(b) If from any other port, double the quantities specified at *(a)*.
(c) Irrespective of the port from which arriving.

IDENTIFICATION CARDS: Required.
CONSULS: Netherlands Vice-Consul, Sligo 2622.
REPAIRS: Welding and light repairs.
REPATRIATION: Facilities exist.
AIRPORT: Dublin, 135 miles away.
TIME: GMT plus 1 hour. Reverting to GMT between October and March.
HOLIDAYS: St. Patrick's Day (17th March); Easter Monday; Whit Monday (1st Monday in August); 25th and 26th December. Not usual to work on any of these days.
POLICE/AMBULANCE/FIRE: 999.
TELEPHONES: None available for placing on board.
GENERAL: In N.W. gales, shelter available at Killybegs, Donegal Bay.
SHORE LEAVE: Allowed.
AUTHORITY: Sligo Harbour Commissioners.

WATERFORD: 52.15 N. 07.07 W. (See Plan)

DOCUMENTS:
3 Manifests.
1 set Bills of Lading.
1 Crew List (aliens).
1 Ship Stores List.
1 Passenger List.
PILOTAGE: Compulsory. Tel. Address "Dunmore Pilots" 24 hours ETA if possible. Tel. Dunmore East 83119. VHF call sign "Dunmore Pilots". Channel 16 calling up, Channel 14 working.

Pilot Boat black hull with words "Pilots" in white on sides. Location off Dunmore East Pier.

In event bad weather a vessel is directed to Passage East by VHF where a Pilot will board in smooth water.
ANCHORAGE: Good anchorage on Eastern Shore at entrance to Harbour in Easterly winds. 30 ft. LWOST.
RESTRICTIONS: Draft restricted by 2 bars. At Duncannon, a sand bar with a low water depth of 14.5 ft. The other at Cheek Point with low water depth 11.5 ft.

Vessels of deeper draft await tide at Dunmore East Anchorage.
MAX. SIZE: 450 ft. LOA normally; 475 ft. LOA by arrangement. Draft 22 ft. neap tides; 24 ft. 6 in. spring tides. 5,000/7,000 d.w.t. or 10,000 d.w.t. partly laden.
HEALTH: Vessels fly "Q" flag, pratique given by Customs. Infectious diseases to be notified to Agent before arrival.
RADIO: Messages through Land's End or Valentia Radio Stations.

Harbour Commissioners have VHF station at Dunmore East, Channel 14 for calling, Channel 16 working.

A watch is kept at the station during the following hours:

0000 to 0100	1200 to 1300
0400 to 0500	1600 to 1700
0800 to 0900	2000 to 2100

TUGS: No tugs available.

ACAJUTLA: 13.35 N. 89.52 W. (See Plan)

DOCUMENTS:
1 Clearance.
4 Voyage Memorandum.
8 Crew List.
8 Disembarking Passengers' List (local passengers list).
8 Transit Passenger List.
8 Store List.
International Health Certificate.
Certified Manifests.
12 Copies of the Manifests.
12 Copies of Bill of Lading.
Cargo Distribution List.
Tally Books.
Shipmaster's Report: Papers required for entering as follows:
1 L.P. 1 & 2 Health Form.
Clearance from Last Port.
4 Memorandum of Voyage.
5 Spanish Crew Lists.
5 Passenger Lists.
5 Store Lists.
2 Mail List.
Agent distributes all papers. Agent also supplies list of papers for next port.
Bond sealed. Shop not sealed.

PILOTAGE: Compulsory. *(a)* Vessels requiring Pilot use International Code Signals. *(b)* Pilot boards vessel at a distance between 1 and 2 km. from the port, where vessel should wait with engine stopped. *(c)* Pilot ladder required for boarding. *(d)* Gangway ladders should be raised and folded, derricks and cranes inside, anchors ready for berthing. Pilot is equipped with walkie-talkie for communicating with tugs.

ANCHORAGE: There is no specific anchorage area. Pilot meets vessel and immediately proceeds alongside. If there are no berths available, the vessel may anchor anywhere outside the dock.

MAX. SIZE:

Berth	*Max. Draft*	*Vessel Length*	*Water Depth at MLW*
A–1	9 m.	152 m.	10 m.
A–2	11 m.	183 m.	12 m.
B–3	9 m.	152 m.	10 m.
B–4	11 m.	198 m.	12 m.
B–5	9 m.	152 m.	10 m.
B–6	9 m.	152 m.	10 m.

Tankers: At the sea-line berth, max. draft 12 m. and max. length 213 m.

HEALTH: If there is any suspicion of illness aboard, Captain has to inform by radio 24 hours in advance, indicating nature of disease and all details. On arrival, vessel should anchor with yellow flag hoisted, to wait for the doctor of the port.

RADIO: There is no special key for calling. Port VHF service is open 24 hours a day. Contact through Channels 16 and 27.

Channel 27 receives on 157.35 mHz and transmits at 161.95 kHz. Business and operation.

Channel 16, 156.8 mHz ship calling and Safety. Channel 14, working.

TUGS: Tow lines not usually used; if necessary the tug lines will be used, and their charge included in the whole service.

Three tugs, available, one 800 h.p., one 1,200 h.p., one 1,800 h.p. Tugs meet the vessels off the dock.

BERTHING: Vessels can berth in safety at any time, day or night.

In the case of cargo vessels it should be stressed that the swell experienced alongside is a serious problem and Masters would be well advised to make use of the shore lines offered on hire to save undue wear and tear on their moorings. Vessels frequently have to leave the berth because of the swell, and broken moorings are common.

There are 2 piers: the first one called "A" consists of a breakwater mole 763 m. long. The access mole runs for approximatley 400 m. and has a free width of 7 m. The pierhead which is 37 m. wide and 310 m. long, includes a combined breakwater, a mooring dock (2 berth capacity) and a transit shed. This pier can handle general and liquid cargo.

The second pier called "B" (4 berth capacity) is 360 m. long and has a free width of 28 m. Products handled in this pier, general and bulk cargo.

MEDICAL: There are doctors in the port who attend normal cases and specialists and hospitals in Sonsonate City at 20 km. (by road) and in San Salvador, capital of the Republic, 85 km. from the port.

DEVELOPMENTS: The construction of a breakwater at the end of existing pier head "A" will start in August 1974. The breakwater will extend in a N.W. direction in line with the existing pier for a distance of 35 m., then change direction to the North with an angle of 30 degrees and extend 270 m. with a width of 18 m. This breakwater will offer another berth capable of handling liquid and general cargo.

CEPA intends to develop the port to provide adequate facilities for the handling of containers in order to attend the further increase in the country's foreign trade and particularly to make provisions for the development of containerised berths in Central America.

TANKERS: Moorings at RASA (Refineria de Acajutla Sociedad Anonima). This refinery is the property of Esso Standard Oil and Shell Petroleum Company.

Buoy Berth: Depth of water is about 15 m. Diameter of buoy lines, 2 of 25 cm. for clean products and one of 75 cm. for crude oil and fuel oil. There are no facilities for residue discharge.

STEVEDORES: Must be ordered 24 hours before arrival by Agent, confirmation by radio-telephone as to the number of gangs needed is always convenient.

A line handling gang is in constant attention all day, this gang also attends gangway. No charge for this service.

Stevedores are available for nightwork.

DENSITY: Salt water.

FRESH WATER: Delivered by hoses. Rate approximately 40 t.p.h., cost US$0.50 per metric ton.

FUEL: Possible to supply diesel and Bunker "C" only in limited quantities delivered by lorries. Viscosities: Bunker "C" 175 sec. Saybolt furol. Diesel 40 sec. Saybolt universal.

FIRE PRECAUTIONS: Inspection of hoses; no smoking; not allowed to solder or light any kind of fire; isolation of the place of loading and discharging operations; fire equipment to be ready.

GANGWAY/DECK WATCHMEN: This service is done by the port staff free of charge.

OPENING/CLOSING HATCHES: This work is carried out by stevedores.

SHIP CERTIFICATES:
Vessel has to carry the Ship's Register (showing the register tonnage).
Derat. Certificate.
International Health Certificate.
Manifest Certificates.

CUSTOMS ALLOWANCES: Customs allow to take out of the vessel only tobacco for personal use. Not allowed to take any wine or spirits out of the vessel.

CARGO GEAR: Ship's gear used, equipment has to be in good state with certificates showing capacity and safety.

IDENTIFICATION CARDS: Not required, but each member of crew has to be in possession of a valid passport.

CONSULS: British Consul. In Sonsonate City there is the Consul of Guatemala Republic, tel. 51-0739, and in San Salvador City are Consulates for most countries.

REPAIRS: Possible to do minor engine and deck repairs. Other repairs can be carried out in San Salvador City. Any repairs that will delay sailing of vessels cannot be done without previous and specific authorisation of the manager of the port.

REPATRIATION: There are facilities for repatriation.

AIRPORT: There is an airport served by regular airlines in San Salvador at 95 kms. from this port (by road).

TIME: No alterations in time during the year; local time is GMT minus 6 hours.

HOLIDAYS: 1st January, Maundy Thursday, Good Friday and Saturday, 1st May, 10th May, 6th August, 15th September, 2nd November, 25th December; the port stops working only on 1st January, Good Friday and 25th December.

POLICE/AMBULANCE/FIRE: National Police (Sonsonate) tel. 51-0838; Ambulance (Sonsonate) tel. 51-0589; Fire (CEPA, Acajutla) tel. 52-3000.

TELEPHONES: No possibilities to install telephones aboard.

GENERAL: Quarantine authorities pay strict attention to the meat on board and its residuum to prevent fever and it is forbidden to remove any kind of meat from the vessel. Berthed vessels need, in case of swell, special hawsers and wires provided by the port, and charged to vessel.

Hire of these lines is US$0.60 each one and for every 1,000 tons gross.

SERVICES: No facilities to discharge tank-washings.

SHORE LEAVE: Members of the crew are allowed to go ashore.

DELAYS: There are no delays for mooring, loading and discharging. Refuelling bunkers operates slower than normal loading and discharging.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA).

AGENT: F. D. Gibson & Company, POB 242, San Salvador. tel. 213208. Telex 20174. Cables: "Gibson" San Salvador.

LA LIBERTAD: 13.29 N. 89.19 W.

CLOSED TO CARGO VESSELS SINCE MAY 1976

DOCUMENTS: Required:
By Port Captaincy
Clearance from last port called.
2 Crew Lists.
1 Store List.
1 Passengers List. In case passengers disembarking, passports to be countersigned by the migration delegate have to be shown.
1 Voyage Memorandum.
1 Manifest of Cargo from each port.
By doctor delegate of health
Health Certificate.
1 Voyage Memorandum.
By quarantine delegate
Voyage Memorandum.
Crew List.
Cargo Manifest, one for each port.
By CEPA delegate
Voyage Memorandum.
Crew List.
2 Store Lists.
Cargo Manifest (5 copies).
Tally Books for cargo.
Number of tons of diesel on board.
Number of tons of water.

By Customs delegate
Voyage Memorandum.
1 Crew List.
Passenger List.
Store List.
Cargo Manifests countersigned by the Consuls each port of origin and 7 more copies for each one.

PILOTAGE: Vessels requiring a Pilot use International Code signals. No official pilot service.

ANCHORAGE: Depths of 60 ft. available. Vessels can anchor at a minimum distance of 1 km. from the quay. All dry cargo vessels work cargo at the anchorage. No quay berths available.

HEALTH: On arrival vessel should anchor and wait visit of Port Authorities. Any suspected diseases should be notified 24 hours in advance.

RADIO: VHF Service with transmission and receiving frequency of 27.075 mHz. In the dock the set is 100 watts AM, transmitter/receiver by 3 Channels:
Channel 1, 2163 kHz calling the tugboats.
Channel 2, 2182 kHz calling and Safety.
Channel 3, 2196 kHz calling the ships.
In the tugs, the sets are 60 watts AM, transmitter/receiver by 5 Channels:
Channel 1, 2163 kHz calling the dock.
Channel 2, 2182 kHz calling and Safety.
Channel 3, 2196 kHz calling the ships.
Channel 4, 2638 kHz calling the ships.
Channel 5, 2738 kHz calling the ships.
The following set is a monitor to receive emergency calls: 2163 and 2196 kHz.

TUGS: No tugs required or available.

STEVEDORES: 24 hours notice required to arrange gangs and barges.

MEDICAL: Inform Agent as soon as possible to arrange a medical visit. The port has doctors to attend normal cases, and there are specialists and hospitals in San Salvador (capital of the Republic) at 35 kms. by road from this port.

TANKERS: At Esso Standard Oil, S.A. terminal, vessels anchor and moor to 3 buoys about 900 yards S.E. of the shore and about 1,000 yards S.S.W. of the pier. Pipe-line extends from La Puntilla in a S.E. direction. Two pipe-lines for discharging products to Esso Standard Oil, S.A, The end of each pipe-line is marked by a metallic buoy, the cargo hoses for No. 1 and No. 2 pipe-lines are connected by separate chain to a "Spreader" which by single chain is attached to a metallic marker buoy. On the "Spreader" there is marked, by welding, 1 and 11 where the chains are attached, indicating what pipe-line they are connected to. Ship's crew is used in connecting and disconnecting cargo hoses.

Vessels should moor only on high water during daylight hours; however, they may unmoor day or night. Launch available for mooring and running lines. Approach is made from the Eastward on a true course 270°, a marker buoy is placed temporarily at a distance of 700 ft. seaward from end of pipe-lines to guide vessel in mooring operations. The marker buoy should be passed on the inside at a distance of 50 ft. Port anchor should be dropped first when the end of the pier is in true bearing 006°. When about 7 shots of chain have run out, the starboard anchor should be dropped. The stern of vessel will swing or may be worked to Northward (starboard). A mooring line should be run to the port stern buoy from port side assisting in swinging the vessel into position. Vessel should tie up securely with 3 lines to each buoy, and anchor spread 60° with 60/76 fathoms of chain on each. The eyes of all lines to buoys should be well protected to prevent chafing on the buoys. When in position, the pipe-line hose buoy is taken on board at the starboard side.

DENSITY: Salt water.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: There is a service of watchmen provided by Customs.

OPENING/CLOSING HATCHES: Carried out by stevedores.

SHIP CERTIFICATES:
Ship's Register.
Deratisation Certificate.
International Health Certificates required.

CUSTOMS ALLOWANCES: Only tobacco for personal consumption may be taken ashore. No wine or spirits to be taken ashore.

CARGO GEAR: Vessels' cargo gear to be in good condition with certificates of capacity and safety.

IDENTIFICATION CARDS: Not required if crew members possess passports.

CONSULS: In the capital, San Salvador, 35 km. from the port, there are consulates for most countries.

REPAIRS: It is not possible to have repairs.

REPATRIATION: Facilities available.

AIRPORT: There is an International airport served by regular airlines in San Salvador, distance approximately 46 kms. from the port.

TIME: GMT minus 6 hours. No alteration.

HOLIDAYS: Festivals: Saturday of the Holy week, 14th April, 10th May, 22nd June, Corpus Christi, 5th August, 12th October, 24th October, 5th November, 7th December, 24th December, 31st December. Legal holidays: 1st January, Maundy Thursday and Good Friday, 1st May, 6th August, 15th September, 2nd November, 8th December, 25th December. The port is only completely out of work on the following days: 1st January, Good Friday and 25th December.

POLICE/AMBULANCE/FIRE: National Police (La Libertad), 35-3175; Ambulance (San Salvador), 21-9406; Fire (San Salvador), 21-8661.

TELEPHONE: It is not possible to place telephones on board.

GENERAL: Quarantine Authorities prohibit removal of meat from the vessel.

SHORE LEAVE: Crew is allowed to go ashore.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA).

AGENT: F. D. Gibson & Co., PO Box 242, San Salvador. Tel. 21.32.08. Telex 20174. Cables: "Gibson".

LA UNION (Cutuco): 13.20 N. 87.51 W. (See Plan)

DOCUMENTS: See "Acajutla".

PILOTAGE: Obtained usually through Agent, can be cable-requested to Port Captain-La Union.

ANCHORAGE: La Union Bay – up to 34 ft. Approximately 14 Class II and a large number of Class III anchorage berths are available in the harbour. 5 Class II berths are in the vincinity of the pier in depths of 33 ft. to 30 ft., and approximately 9 more, in depths of 70 to 30 ft., are just Westward of Isla Zacatillo. The first area has a mud bottom; the second is sandy and rocky. The large number of Class III berths are in an area Northward of the pier and in the area between the 2 anchorages providing Class II berths. The least depth in each of the areas is 25 ft. A large number of relatively unsheltered anchorage berths of all classes are available outside the harbour in the Gulf of Fonseca.

RESTRICTIONS: Enter any time – preferable on flood tide with draft over 24 ft.

MAX. SIZE: Largest vessel that can be accommodated in harbour would occupy an anchorage berth with a min. depth of 43 ft. and a diameter of 3,300 ft. Largest vessel that can be accommodated alongside wharf would occupy a berth with least depth of 25 ft.; length is not a limiting factor, although a max. 550 ft. is recommended due to strong currents, 3 knots, and pressure on part of any vessel extending for any greater distance beyond length of wharf.

HEALTH: Disease should be reported. Pratique necessary on each occasion.

RADIO: Direct to Agents or Guarailco, San Salvador.

TUGS: No tugs required.

BERTHING: Berthing usually carried out on slack tides due to cross currents, up to 3 knots. The estimated military port capacity is 1,800 tons of general cargo per day. Port can accommodate 2 standard-type ocean-going cargo vessels, and possibly one alternative class T/C (small ocean-type tanker under favourable conditions) alongside berths, and approximately 14 ocean-type cargo vessels, and a large number of Class III (coaster-type cargo vessels) at anchorage berths. Roll-on/roll-off pier, depth alongside 16 ft. LW.

STEVEDORES: Prior advice preferable. Stevedore force consists of 12 gangs of up to 16 men per gang for on-board work. Similar gangs are available on pier, and up to 300 labourers, crane and fork-lift operators comprise shore gangs.

MEDICAL: Services available – no special restrictions.

TANKERS: Drafts 25/34 ft. fore and aft. Tankers of up to 550 ft. in length can be accommodated at either side of pier, where adequate connections of 6–8 in. and 10 in. pipe-lines are located. Largest vessel that can be accommodated alongside would occupy a berth with a least depth of 25 ft.; length is not a limiting factor, except as noted previously.

FRESH WATER: Four 2 in. connections on each side; volume estimated at 10 t.p.h.

FUEL: Bunkers and diesel – can be delivered when berthed.

GANGWAY/DECK WATCHMEN: Not required – National Marines on guard.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCE: Not controlled, but restricted ashore.

IDENTIFICATION CARDS: Passes for leaving ship to have Captain's signature.

CONSULS: Only Nicaragua is represented.

REPAIRS: No facilities.

REPATRIATION: Can be arranged.

AIRPORT: San Salvador – 120 miles away – regular airlines.

TIME: GMT minus 6 hours. No alterations.

HOLIDAYS: Easter Thursday, Good Friday. Port not worked only on those dates.

POLICE/AMBULANCE/FIRE: In La Union – proximate to Port.

TELEPHONES: None available.

SHORE LEAVE: Allowed.

AUTHORITY: International Railways of Central America.

AGENTS: F. D. Gibson & Co., PO Box 242, San Salvador. Tel. 21.32.08. Telex 20174. Cables: "Gibson".

Equatorial Guinea: (Formerly Spanish Guinea)

ALL ENTRIES ARE SHIP'S OFFICERS REPORTS.

REPORT NO. 1. PURSER'S REPORTS

MALABO: (Formerly Santa Isabella)

Documents:
9 Crew Lists.
9 Passenger Lists (Marked "none" if no passengers on board).
3 Customs Declarations.
3 Stores and Provisions.
4 Arms and Ammunition.
1 Vaccination List (Smallpox, Cholera and Yellow Fever).
9 Cargo Manifests.

Stores: No stores were purchased at this port, advise top up prior to calling at this port.

Mail: Advisable to send to next big port.

BATA: Same papers as above. No officials come out to the ship at this port, however, papers should be kept ready. Vessels moor to a buoy for discharge.

Also see "Rey Malabo".

REPORT NO. 2. SHIPMASTERS REPORT

BATA: 01.52 N. 09.46 E.

Roadstead with single point mooring buoy connected to the shore with 6 in. pipe-line, 6 in. hose: (everything in a deplorable state). No tugs or Pilots available. Master should have local knowledge when approaching berth in hours of darkness. Vessels are moored with 2 anchors forward and 2 ship's lines (plus two 8 in. shore lines) to the single point mooring buoy. 5 lengths of 15 m. hose available. Preferable stern discharge connection to be used. Max. pressure: 4 kg/sq.cm. All grades through this line. Linewash of water in between the different grades. There is rubber ball for cargo separation.

Advice: 1. In view of the deplorable state of buoy, lines and hose, Master should be very careful in mooring his vessel – which has to be done by himself – in order not to damage same.
2. Master should have ship's motorboat ready to run ship's lines to the buoy because motor launch, which is supposed to do this is very old and liable to breakdown at a crucial moment.
3. Anchors should be dropped in a position S.W. of the buoy in order to stay well clear of the unmarked wrecks, in good holding ground with 4 to 5 lengths of chain.
4. Tidal currents move the ship relative to the mooring buoy – so it is necessary to heave anchors tight – bearing in mind that the construction, etc. of the buoy is very weak.
5. The buoy carries a light but the light does not work. Anyway mooring after dark is not advisable.

Documents: Only a small customs post available here:
1 Cargo Manifest.
1 Store Manifest.
1 Crew List.

Custom allowance: No restrictions – no sealing of bonded stores.

Shore leave: Allowed by ship's boat.

Radio communication: None. Though there are officially coast radio stations in this country, they do not operate on schedule. Telegrams should be sent via coastal radio stations of other countries. No VHF.

PUERTO MACIAS, (Puerto Nuevo): 01.49 N. 09.44 E.

Situated about 1 mile South of the mouth of the Rio Ekuku. This is quite a new jetty – developed in 1973 – shaped like the letter "L", where the long leg of this "L" is connected to the shore and 4 dry cargo vessels can moor alongside the short leg in about 14 m. of water Every vessel has on her off-shore side 2 mooring buoys to assist in mooring and unmooring. No tugs available. Though it is stated that a Pilot is available, this information should be treated as unreliable. The pier is used for the discharge of general cargo and the loading of logs and sawn wood. According to information received this jetty will be made available to tankers for discharge of oil products.

Documents: See "Bata". This new jetty falls under the jurisdiction of "Bata" authorities.

Radio communication: See "Bata".

REY MALABO, (formerly Santa Isabel): 03.46 N. 08.48 E.

Situated on the Island of Macias Ngueme Biyogo (formerly Fernando Poo) Capital of the Republic of Equatorial Guinea.

Documents:
9 Crew Lists.
3 Stores Manifests.
3 Crew declarations.
2 Lists of Arms and Ammunition.
4 Lists of Ports of Call.
2 Passenger lists or negative.

General: No tugs.

Pilots: Effectively none. Only a locally informed inhabitant of this port comes on board to inform the Master, he is equipped with a large scale Spanish chart of this bay, but he has no nautical knowledge and he does not know how to handle a ship.

Note: 1. Masters should bear in mind that they have to manoeuvre and moor the vessel themselves.
2. In view of the continuous breakdowns (and insufficient power) of the mooring-launch it is absolutely necessary to have the ship's motor boat at stand by to run the ship's mooring-lines ashore.

Mooring procedure: Tanker berth: old jetty (muelle viejo). The ship should be moored stern-to to this jetty. On entering the port with the lights in line starboard anchor is dropped in the middle of the bay and the ship has then to manoeuvre around with her own engines, till in line with the berth.
N.B. Because there is very seldom anybody present at the jetty to accept the mooring lines (on arrival as well as on departure) the vessel's crew should be kept on stand by to do this job.

Arrival/Departure: Between 0600 and 1800 hrs.

Tankers: Preferably stern discharge into a 6 in. line with 6 in. hose. All grades through one line – Linewash with water in between – pressure 4 kg/sq.cm. max.

Dry cargo vessels: Berth at a new jetty on the West side of the bay. No cranes available.

Advice: 1. Masters should be very careful when dropping their anchors as some vessels (Man of war) moor with their sterns to the dry cargo jetty and have their anchors in the middle of the bay. These anchors are very easily fouled by incoming vessels anchors. A useful suggestion might be to put anchor buoys on the anchors in order to show another incoming ship their position.
2. Because it is quite difficult to manoeuvre a tanker around in this bay without any tug assistance, it should be borne in mind that when the wind is over Force 2 manoeuvring with a sizeable vessel is apt to falter, and no assistance can be expected from any quarter.

Departure: Vessels are free to leave within mentioned hours without Pilot.

Radio communication: See "Bata".

Custom allowance: No limit – no sealing of bonded stores.

Shore leave: No restrictions, but with own motor boat.

Currency: Eq. Guinea Peseta = Spanish Peseta.

Also see "Mababo".

NOTES

Please also advise Shipping Guides (Services) Ltd.

Ethiopia

ASSAB: 13.01 N. 42.44 E.

PORT LIMITS: A line drawn from Ras Gombo to the Northern point of Umm al Baher (Islands) to southern point of Umm al Baher, then to Ras Marcanah.

DOCUMENTS:

5 Manifests for transit passengers and passports.
5 Manifests for landing passengers and passports.
5 Crew Lists.
1 complete Crew Provisions List.
1 Crew Personal Effects List.
1 Store List.
6 Cargo Manifests.

PILOTAGE: Compulsory Pilots take tankers in and out of oil harbour only during daytime. Pilots embark about 1 mile N.N.E. from Northern extremity of breakwater. Commercial harbour gives 24 hour service. Vessels calling Assab must advise Agent through Assab Coastal Radio Station by call sign ETC. Assab Radio Signal Station is available.

ANCHORAGES: Assab Bay provides good anchorage in 42 to 48 ft. of sand and coral bottom, good holding ground. Generally weather in Assab can be divided into two: Summer time and Winter time weather, during Summer (May–September) Northerly wind blows with a maximum force of 3/4 BS. During Winter time (October-April) South-easterly local monsoon winds blow usually 5/6 BS but reaching force 7/8 BS during daytime and generally drop at night. This 7/8 BS force is mainly experienced about December to February.

RESTRICTIONS: There are 2 entrances, the North and the South entrance, the depth at the entrances is 38 ft. Least width 1,300 ft.

Vessels of any size enter or leave port during hours of darkness except tankers, and vessels carrying dangerous cargo. In these cases, where vessels are carrying explosives or other dangerous cargoes, Agents of calling vessels must notify the Port Office in advance of discharging and/or loading of explosives. Inflammable and other highly dangerous cargoes in commercial harbour are permitted from 0600 to 1800 hrs. local time.

MAX. SIZE: Largest vessels which can enter commercial harbour 200 m. LOA, 80 ft. beam, 34 ft. draft.

HEALTH: Quarantine and sanitation services available. Quarantine officer boards arriving vessels and necessary medical clearance given.

RADIO: Coastal radio station available *(a)* position Lat. 13° 01′ 24″ N. *(b)* Long. 42° 44′ 38″ E. Coastal radio station in service for 13 hours per day 0700 to 2200 hrs. Call sign ETC. Transmits traffic lists on 489 kc/s after a premliminary announcement on 500 kc/s, 30 minutes past each odd hour starting at 0500 and ending 1700 hrs. (0530, 0730, 0930, hrs. etc.).

(c) Transmit traffic lists on 6509 at 0500, 0900 and 1300 hrs. and searches 6265.5–6280.5 between 0515–0600, 0915–1000, and 1315–1400 hrs.

(d) Transmit traffic lists on 8618 at 0700, 1100 and 1500 hrs. and searches 8354–8374 between 0715–0800, 1115–1200 and 1515–1600 hrs.

(e) Rates shall include station charges and charge of transmission over telecommunication network within Ethiopia.

(f) Accepts ship letter telegrams (SLT) from ships for delivery in Assab.

(g) For radio telephone service. Station keeps watch and replaces on 2182 for radio telephone service at 0615–0700, 0815–0900, 1015–1100, 1215–1300, 1415–1500, 1615–1700 hrs. and transmits traffic same hours on 4379.3. Service hours will be extended to 24 hours.

VHF: VHF system will be installed in the port in the near future.

TUGS: Tug service compulsory for ships over 300 n.r.t. 2 tugs of 600 h.p. each, attend ships during arrival and departure.

BERTHING:

(a) North Half Jetty 1,620 ft. Long, 36 ft. depth.
(b) South Half Jetty.
(i) 1115 ft. long and 33.8 ft. depth.
(ii) 459 ft. long and 29.5 ft. depth.
(iii) 164 ft. long and 19 ft. depth
(c) 2 coaster piers, each 260 ft. long 26 ft. depth. Temporarily out of use.

Fenders are excellent and protect ships from impact; harbour is modern and has modern breakwater 711 m. long. 7 big ships and 4 coasters can be accommodated at a time.

STEVEDORES: 14 stevedoring agencies, any kind of cargo can be discharged and loaded. Skilled labourers and loading/discharging capacity are respectively 30-15 per hour. Crane lift capacity 30 tons.

Normal working hours: 0700 to 1200 hrs., 1600 to 1800 hrs. Work can be performed 24 hours a day including holidays.

MEDICAL: 1 hospital in town and clinic in port. When sick person on board, hoist (by day) International code flag "W", (by night) 3 lights in vertical line upper one red, and middle and lower, white lights. Doctor may be called on board at any time to attend sick crew or passengers by arrangement with Agents.

TANKERS: Oil harbour about 1.5 miles S.E. of commercial harbour with draft 33 ft. Crude oil discharging terminal 500 m. from Southern end of breakwater open sea buoy berth – tankers of 800 ft. length, and 36 ft. draft can be accommodated. Diameter of pipe-line for loading and discharging black products – 12 in., white products 10 in.

Tankers at the Shell Berth are moored by dropping 2 anchors and tying up 2 ropes from each quarter to the buoys, and 1 rope from each quarter to the dolphins. All grades of oil in bulk discharged into shore storage tanks from this harbour, and fuel oil is discharged from the Commercial Harbour.

In Assab, the petroleum installations are of Shell Red Sea Co., and Mobil Oil East Africa Co.

SALT LOADING TERMINAL: Located 1.7 miles from the Commercial Harbour, salt loading ships drawing up to 33 ft. are berthed at this terminal using 2 anchors and mooring to buoys and dolphins.

DENSITY: At berths is 1.03 while the tides are negligible for all seasons; max. 1 ft.

FRESH WATER: Available. Supplied upon request by Agent and can be delivered at 60 t.p.h.

FUEL: All grades available, at commercial harbour. Advance notice necessary. Rate of 300 t.p.h.

FIRE PRECAUTIONS: Modern fire brigade.

GANGWAY/DECK WATCHMEN: Watchmen on deck necessary, and rate arranged as per agreement of employer and employee.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All ship's International Certificates should be on board.

CUSTOMS ALLOWANCES: Tobacco, 400 cigarettes. Wine and/or Spirits. 1 litre or bottle of spirit.

CARGO GEAR: Different types of certified cargo handling equipment available.

IDENTIFICATION CARDS: Needed.

CONSULS: Only Italian Consulate in Assab, others live in Asmara the capital city of Eritrea.

REPAIRS: Minor repairs can be carried out at Port Office workshop.

REPATRIATION: Possible.

AIRPORT: 15 km. from Assab. Ethiopian Airlines. 5 domestic flights per week.

TIME: GMT plus 3 hours.

HOLIDAYS: See "Massawa".

POLICE/AMBULANCE/FIRE: Port Police Tel. 60049; Hospital Tel. 60119; Port Office fire brigade Tel. 60102.

GENERAL: 1 modern hotel and 1 motel with full facilities available in town.

SHORE LEAVE: Crew allowed ashore, with boarding passes.

AUTHORITY: Ministry of Communication, Department of Marine.

AGENTS: Flli-Biga et Cie, Via Dogali, PO Box 48, Assab. Tel. 66.00.37 Correspondence to Main Office: PO Box 1108, Asmara. Telex 2037 "Speditafrica". Cables: "Speditafrica".

MASSAWA: 15.37 N. 39.28 E.

PORT LIMITS: The coastline of Gurgussum Peninsula, at 15° 39′ N. to a point 15° 39′ N. 30° 30′ E. to 15° 35′ N. 39° 30′ E. to the coastline at 15° 35′ N. 39° 26′ 50″ E.

DOCUMENTS:

2 sets Manifests.
2 sets Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
2 Stores Lists.

APPROACHES: Through North channel and South channel. In channel, in direction of leading lights 243°, max. depth 31 ft. (but alongside 30 ft.) Marking buoy showing a wreck in position approximately 200 m. S.E. of North breakwater.

PILOTAGE: Pilotage is compulsory for all vessels over 100 n.r.t. Pilot section headed by a Chief Pilot and 2 other Pilots.

There are 2 pilot boats. ETA should be given to Agent who will inform Pilot 72 hours prior to arrival. Signal tower located in port area contacts vessel on arrival informing Agent and Pilot, and receiving or transmitting by Morse lamp messages to and from vessel.

ANCHORAGES: 8 cables East of main lighthouse. Anchorage North of leading light not recommended.

Tides. Normally the range of tide varies between 1.5 and 2.0 m., but during spring tide season the range varies up to 3 m.

MAX. SIZE: Length 520 ft., draft 30 ft.

HEALTH: Doctor normally boards with Pilot, but can be asked to board together with Customs and Immigration while vessel on roads. All crew members must be vaccinated against smallpox and yellow fever, and possess necessary certificates. Deratisation and other health certificates required. Deratisation cannot be effected at Massawa, but exemption certificate can be obtained.

RADIO: Assab Radio, call sign ETC, Djibouti Radio, or Aden Radio may be used. Asmara Radio, call sign ETC 2, working hours 0500 to 1700 GMT. Radio-telegraphy and radio-telephone services.

TUGS: Join vessel in port. Compulsory.

3 tugboats are available, two of 350 h.p. and the third 1,000 h.p. The smaller motor tugboats used for assistance mainly within the port limits, and the deep-sea salvage motor tugboat, for salvage operations, but whenever conditions demand, is also employed for assistance within the port.

BERTHING: Vessels normally drop anchor before berthing.

Commercial Harbour: 6 berths, namely 1 to 6, and the overall distance from Berth No. 1 to Berth No. 6 is 907 m. These berths normally used by vessels handling general cargo, bagged cargo and livestocks. Depth of water at mean low water springs (MLWS) is shown below:

Berth No. 1 – 16 ft. 6 in.
Berth No. 2 – 24 ft. 6 in.
Berth No. 3 – 28 ft. 6 in.
Berth No. 4 – 28 ft. 0 in.
Berth No. 5 – 27 ft. 0 in.
Berth No. 6 – 30 ft. 0 in.

Salt Berth: This is a single berth where vessels load salt in bulk. The depth at the berth is 32 ft. Max. draft 29 ft. Loading with the help of conveyor belt at the rate of about 300 t.p.h.

Cement Berth: Depth 18 ft.

American Jetty: Depth 18 ft.

However, dredging will be carried out to accommodate vessels of a greater draft in the near future.

STEVEDORES: Radio 24 hours' notice of ETA stating number of gangs required. Loading discharging rates 5 t.p.h. on general, 10/15 t.p.h. on bagged cargo.

DENSITY: 1025.

MEDICAL: Notice should be given to Agent only when specialist needed. Hospital treatment available. Dental facilities available at Asmara, 110 km. away.

TANKERS: AGIP, Arkiko oil station terminal: max. draft for entering channel 29 ft.

Total Pier, depth alongside 36 ft., max. draft 30 ft.

FRESH WATER: Supplied alongside, Max. rate 600 tons per day or by barge of 50 tons on roads. Barge can be loaded/discharged in 8 hours.

FUEL: Can be obtained alongside oil terminals and at Berths 5 and 6 for heavy fuel only. Diesel can be supplied by lorries alongside. No bunker barge available.

GANGWAY/DECK WATCHMEN: Compulsory when alongside.

OPENING/CLOSING HATCHES: Normally by labourers, but can be done by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. New allowance can be delivered after 1 week. Wine/Spirits: 1 bottle of wine/spirits (opened). Wine and beer quantity necessary for the stay in port allowed upon reasonable request on arrival.

IDENTIFICATION CARDS: Not needed. Immigration gives port entry card (without crew member's name) which must be given back prior to departure. In case of loss a fine is likely.

CONSULS: Italian Vice-consulate, Box 62. Tel. 52214. Other consulates at Asmara for Belgium, France, Gt. Britain, Italy, Sudan and U.S.A.

REPAIRS: Good workshops for minor engine repairs. Slipway for vessel up to 600 g.r.t.

REPATRIATION: Via Asmara. Daily flight Massawa-Asmara, then by international flights. Or Massawa-Asmara by road, 110 km., asphalt road.

AIRPORT: 7 km. from port with daily service to Asmara. International airport at Asmara 60 km. by air.

TIME: GMT plus 3 hours.

HOLIDAYS: For 1976: January 7th (Christmas Day – Coptic); January 19th (Epiphany); March 2nd (Victory of the Battle of Adowa); March 13th (Prophet's Birthday); April 6th (Victory Day); April 23rd (Good Friday – Coptic); April 25th (Easter Sunday – Coptic); May 1st (Labour Day); September 11th (New Year's Day); September 12th (Abolition of Feudalism); September 27th (Finding of the True Cross); October 6–8th Id-al-Fatir; December 18th Id-al-Kebir and Sundays.

POLICE/AMBULANCE/FIRE: Police, tel. 52425; Ambulance, tel. 52234–5–6; Fire Brigade, tel. 52220.

TELEPHONES: Possible to place telephones on board. Arranged by Agent.

SERVICES: Radar and gyro compass technician available, but special spare parts not available.

SHORE LEAVE: Crew cannot leave vicinity of Massawa without special immigration permit.

AUTHORITY: Department of Marine.

AGENT: Please always address to: Asmara Head Office – Fratelli Biga & Company, Viale Leonardo de Vinci 2/14 – Asmara PO Box 1108. Share Company – Shipping Chartering, Stevedoring and Forwarding Agents (SCAC Group). Branches Massawa, Assab, Ababa, and Djibouti. Telegraphic "Speditafrica" Asmara. Telex 2037 "Speditafrica" Asmara. Tel. 11.03.59–11.03.62 Asmara. Tel. 55.21.4 Massawa. Home Tel. Shipping Advisor 13901 Asmara.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Faroe Islands

KLAKKSVIK: 62.14 N. 06.35. W. (See Plan)

DOCUMENTS:
One of each:
Crew List.
Passenger List.
Custom Documents (one list crew's quantity of tobacco and spirits).
Health Document.
Manifest.
Bill of lading.

PILOTAGE: Not compulsory but available. Give ETA via Torshavn radio, OXJ, 1 or 2 hours before arrival, and Pilot will meet vessel in Roads. International signals can always be used. VHF Channels 16, 12, and 6 in use.
ANCHORAGE: In Roads in 12 to 20 fathoms; good anchorage.
RESTRICTIONS: No restrictions upon entry.
MAX. SIZE: Up to 450 ft. length, but draft must not exceed 20 ft
HEALTH: Pratique usually automatic.
RADIO: Torshavn radio, OXJ, is only coast station in Faroe Isles.
TUGS: No tugs available.
BERTHING: Ships will be berthed on arrival, if ETA announced 12 hours before arrival.
STEVEDORES: Ships Agent will arrange stevedores.
MEDICAL: Inform doctors before arrival. Hospital facilities available.
TANKERS: Only small tankers, up to 2,000–3,000 tons can be handled.
FRESH WATER: Available from quay. 30 t.p.h.
FUEL: Diesel oil available, usually without notice (or short notice).
DEVELOPMENTS: Berthing place will be widened about 600 ft. on each side of bay and permissible draft will be increased.
GANGWAY/DECK WATCHMEN: Watchmen usually unnecessary, but available if desired.
OPENING/CLOSING HATCHES: Normally done by crew.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes. Wine and/or Spirits, 1 bottle of wine and 1 of spirits.
IDENTIFICATION CARDS: Not needed.
CONSULS: British, tel. 5109 and 5489; Norwegian, tel. 55018 and 55353.
REPAIRS: All types of deck and engine repairs possible. Slipways for ships up to 200 ft. length.
REPATRIATION: Small changes in crew can usually be arranged and, for example, sick seamen/fishermen are often sent home, when recovered.
AIRPORT: Nearest airport on Vagoy, about 6 hours travelling. Regular flights, 6 a week.
TIME: GMT. Permanent.
HOLIDAYS: Cargo work can be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police 5348; Ambulance 5464; Fire 04.
TELEPHONES: Can be arranged on board at one berthing place, at about 50,00 kr plus dues for conversations.
SERVICES: Compass adjusting, day and night.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Normally there are none.
AUTHORITY: Harbour Master.

AGENT: Christen Joensen Stengavegur, P.O. Box 179, 3870 Klaksvik, Faroe Islands. Cables Christen Joensen. Tel. Klaksvik 55922.

SOERVAAG: 62.04 N. 07.18 W.

DOCUMENTS:
Bill of Lading.
Customs Documents (including Crew List).
Ship's Certificate (stating size of ship).

PILOTAGE: Ships can call Pilot via Torshavn Radio. Pilot has good knowledge of local conditions.
ANCHORAGES: Danish Chart No. 82 – on Soervaag fjord – can be recommended as good. Bottom gravel.
RESTRICTIONS: Difference between high and low water up to 2 m. on Spring tide and up to 1 m. on neap tide.
MAX. SIZE: Largest vessel reported in Soervaag was 12,000 d.w.t. tanker. Harbour about 150 m. long and formed with one long pier and another 1 stretching from it. Draft at pier 8 m. Pier runs N.E./S.W.
HEALTH: Ships coming from countries having epidemic-disease have to fly the flag "Q". No persons allowed connection with shore, before official doctor given free pratique. Doctor comes from Midvaag or Wesmannahavn and can be at Soervaag in half hour.
RADIO: Only civilian radio on Faroe Islands is Torshavn-Radio (Int. call sig.: OXJ) via this radio ships can call for medical assistance and weather forecast. These 2 services are free. All traffic to Faroe Islands via Torshavn-Radio.
TUGS: No actual tugs can be obtained, but many small vessels which can be used as tugs.
BERTHING: Captains should take care when berthing not to come on to East side of pier – owing to very low water.
STEVEDORES: Arranged through A/S NI. Niclasen, Soervaag, or Harbour Master.
MEDICAL: Hospital in Torshavn with all facilities.
TANKERS: Ordinary pier also used by tankers (draft 8 m.) size of load/discharge-lines: 3 in. and 6 in.
FRESH WATER: Ships can obtain fresh water direct from pier.
FUEL: Marine diesel fuel; turbo-jet A1–100; gasoline-petroleum.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Captains have to make arrangements with stevedores, receivers or shippers.
CUSTOMS ALLOWANCE: Tobacco, each crew member is allowed to have 200 cigarettes or 250 gm. of tobacco. Wine and/or Spirit, crew members not allowed any wine or spirit. Captain allowed 2 bottles every second day.
IDENTIFICATION CARDS: Not required.
CONSULS: Belgium, Finland, Greece, Iceland, Norway, Spain, U.K., West Germany, Brazil, France, Holland, Italy, Portugal, Sweden.
REPAIRS: Small deck and engine repairs carried out.
DRY DOCKS: On Skaalefiord, dry dock up to 1,500 d.w.t.
REPATRIATION: Available.
AIRPORT: Faroe Island has 1 airport – only 3 km. from Soervaag. During Summertime daily services to Bergen, Norway and Copenhagen, and weekly services to Glasgow.
During Wintertime weekly services to above destinations.
TIME: GMT. Permanent.
HOLIDAYS: Same as Denmark.
POLICE/AMBULANCE/FIRE: Police 8; Ambulance 8; Fire 4 or 46.
TELEPHONE: Telephones can be placed on board.
SHORE LEAVE: Crew members are allowed ashore.
REGULATIONS: Per ordinary regulations in Danish Ports. Harbour dues to be paid before ship's departure.
DELAYS: Usually none.
AUTHORITY: Harbour Master.

TORSHAVN: 62.00 N. 06.45 W.

DOCUMENTS: See "Klakksvik".
PILOTAGE: Not compulsory. Can be obtained through Torshavn. Radio 2182 kHz. or Channel 16 VHF (Harbour Office).
ANCHORAGES: Due South of breakwater in depths about 30 fathoms.
MAX. SIZE: Max. draft 25 ft. This is only restriction.
HEALTH: Pratique usually automatic.
RADIO: Torshavn Radio, OXJ.
TUGS: No tugs available.
STEVEDORES: Must be arranged with the Agent.
FRESH WATER: 100 t.p.h., by pipe-line.
FUEL: All kinds of fuel at 100 t.p.h.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: Tobacco (half carton); wine/spirit (1 bottle).
IDENTIFICATION CARDS: Not required.
REPAIRS: All kinds are possible.
DRY DOCKS: Slipway for vessels up to 1,000 tons.
REPATRIATION: Can be arranged.
AIRPORT: Regular airlines, 2 hours by car from Airport.
TIME: GMT Permanent.
HOLIDAYS: Cargo work can be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police, 1448; Ambulance, 3540; Fire, 04.
TELEPHONES: No facilities.
SERVICES: Compass adjusting only.
SHORE LEAVE: Allowed.
AUTHORITY: Torshavnar Havn.

TRANGISVAAG: 61.33 N. 06.50 W.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Bill of Lading.
1 Bonded Store List.

PILOTAGE: When Pilot required pre-arrange with Agent by telegram or telephone, 2 hours notice ETA wanted. Pilot boat is local fishing-boat, usually boarding vessel at harbour entrance.
ANCHORAGE: Safe sheltered harbour up to 30 fathoms deep along the entrance transit bearing. Vessels anchor 1 cable offshore in 8 fathoms, clay bottom.
RESTRICTIONS: Vessels may enter harbour day and night.
MAX. SIZE: Vessels may berth with draft up to 7 m.
HEALTH: Pratique granted if no contagious illnesses aboard and all arrival formalities accomplished by the boarding officials.
RADIO: Torshavn Radio, call signal OXJ, 24 hours service, listens 2482 kHz, replies and transmits traffic on 1778 kHz, traffic lists on 1778 kHz 35 minutes past each even hour. VHF service: Channel 16 (156.80 mHz) Channel 26 (161.90 mHz). All ETA messages, etc. must be routed through Torshavn Radio.
TUGS: None; if required local fishing-boats are capable to act as tugs.
BERTHING: Tveraa at Northern side of fjord. Outer side of quay 180 m. length and 20/21 ft. alongside. Inner side length 170 m. and 15 ft. alongside. Quay is for general cargo, fish and salt.
Harbour basin length 58 m., depths 7 to 18 ft. alongside.
Drelnes on South side of fjord. Quay length 89 m. Depth alongside outer side 23 ft.; inner side length 43 m. depth 22 ft.
STEVEDORES: Enable Agent to arrange gang important obtain in good time accurate ETA from vessel. Work normally not carried out on Sundays.

MEDICAL: Advance notice to Agent preferable, good hospital facilities for both surgery and medicine.
DENSITY: 1024.
FRESH WATER: Water available at main quay, rate 50 t.p.h.
FUEL: Diesel gas oil available, 50 t.p.h., no advance notice required.
DEVELOPMENTS: New quay under construction in extension of existing quay.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes or 200 grams tobacco out of Bond. Limited quantity wine and spirits.
IDENTIFICATION CARDS: Not needed.
CONSULS: Spanish Vice-Consul.
REPAIRS: Local marine repair companies can undertake all repairs of general nature to deck, engines, hull, electric and radio equipment, etc. Slipway available for small vessels.
REPATRIATION: May be arranged by sea or air.
AIRPORT: (Vagar) Served by regular airlines, located 50 miles from Trangisvaag.
TIME: GMT, no alterations during the year.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Christmas Day; Second Christmas Day; work not carried out these days.
POLICE/AMBULANCE/FIRE: Police tel. 10 and 53; Ambulance 134; Fire 159.
TELEPHONES: Usually not placed aboard, but can be arranged.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

AGENT: Eyvind Mortensen, POB 38, 3880 Tvoroyri. Trongisvagur, Faroe Islands, Tel. 30–170, Cables "Insurance".

Fiji Islands

LAUTOKA, (Vuda Point): 17.36 S. 177.26 E.

DOCUMENTS/HEALTH: Refer to "Suva".
PILOTAGE: Not compulsory at present. However, most vessels avail themselves of a Pilot, who boards at Navula Passage, 20 miles South of Lautoka. Masters should telegraph to their Agents ship's ETA at Navula and indicate whether they require a Pilot or not at least 24 hours in advance.
Note: Radio communications with Fiji can be difficult and Masters are advised that telephone or telex messages worked via New Zealand or Australia direct to their Agents are far more reliable.
The Pilot normally boards from a 26 ft. wooden launch, blue hull with white superstructure, buff cabin top with orange liferaft on forward cabin. The pilot vessel can be contacted on VHF 16/6. Listening watch only when vessels are expected. Pilot normally boards 1 mile seaward of the passage on the leads. In heavy weather it may be necessary for a vessel to enter the passage to embark the Pilot. There is no anchorage outside the passage.
Vessels requiring pratique should anchor approximately 1 mile to the Westward of Vio Island in Lautoka Harbour. If prior arrangements have been made through Agent, Health Officers may board inside Navula (The Health Officers inspect vessels only from 1 hour after sunrise to 1 hour prior to sunset). The Pilot for those vessels not employing one from Navula but requiring a Pilot for berthing will board at the quarantine anchorage off Vio Island.
ANCHORAGES: The whole of the area enclosed by a circle of diameter approximately 1 mile between Vio Island and Pinder Reefs is an acceptable anchorage with depths ranging from 9 to 13 fathoms.
MAX. SIZE: Minimum depth in approaches to wharf 32 ft., depth alongside 36 ft. Generally speaking, any vessel not exceeding 32 ft. draft can be accommodated. Main wharf is only 457 ft. long but overhangs are allowable, ("Oriana" LOA 804 ft., berths at Main Wharf), dolphins for mooring lines being situated off each end of the wharf. Range of tide approximately 5.5 ft. at springs and 3 ft. at neaps, but state of tide does not affect the foregoing.
At Vuda Point, the tanker berth of Lautoka, tankers in the 18,000 to 24,000 d.w.t. class can be handled. This is a submarine pipe-line installation, the ship mooring to 4 buoys, available depth being about 36 ft.
TUGS: No tugs available. Can be obtained from Suva if reasonable notice is given.
BERTHING: Berthing and unberthing at Vuda Point only in daylight. Berthing at Lautoka is at discretion of Harbour Master or Pilot, but in normal conditions is effected at any hour of day or night.
Berthing in Lautoka is generally effected port side to.

Wharf	*Length*	*Depth*
Queens West	457 ft.	36 ft.
Queens North	257 ft.	24 ft.
Queens East	400 ft.	12 ft.
SPSM	146 ft.	32 ft.
Kings	300 ft.	6 ft.

FUEL: Diesel fuel is available at the North and East berths on Queens Wharf.
FRESH WATER: Fresh water is available at all berths, there may be some restrictions in the dry season.
TANKERS: See "Max. Size". No slop discharge facilities. Discharge line 8 in. diameter.
DENSITY: 1025.
CONSULS: None.
REPAIRS: Only comparatively minor repairs can be effected such as welding jobs and repairs to pumps and other auxiliaries.
REPATRIATION: Repatriations can be effected through vessel's Agents.
AIRPORT: Nadi International Airport is 16 miles from Lautoka. Frequent flights to all parts of the world by several major airlines operating through Nadi.
TIME: GMT plus 12 hours. No alterations to clocks.
POLICE/AMBULANCE/FIRE: Dial 000 in emergency. Police, 60222; Ambulance, 60399; Fire, 60211.
SERVICES: Tank-cleaning labour and labour for painting, chipping, etc. can be provided, but no equipment. No facilities for discharge of slop tanks etc. Compass adjustments can be arranged.
AUTHORITY: Wharf Manager, Ports Authority of Fiji, Lautoka.

LEVUKA: 17.41 S. 178.51 E.

DOCUMENTS:
Goods carried in unregistered space (C.E. 148) (1 only).
List of articles in possession of Crew, Officers and Master (1 only).
Crew List (2 only).
Passenger List (2 only).
Parcel List (1 only).
Primary Health Report (1 only).
Special Malaria Forms (1 only).
Vaccination Certificates (1 for each person).
Derating Certificates (1 only).
PILOTAGE: Pilots are arranged through Agents.
MAX. SIZE: Length 560 ft. Max. draft 25 ft.
HEALTH: Radio pratique may be granted when any vessel has not visited any malarious port and Master declares that crew and passengers are healthy and vessel has not come from any area where internationally quarantinable diseases are endemic or in epidemic. Vessel may then enter port by day or night. On berthing, Master must immediately deliver to Quarantine Officer fully completed Primary Health Report and Derating or Derating Exemption Certificate. If there is any suspected case of disease or fever on board, vessel must be anchored at quarantine anchorage until cleared by port Medical Authority. Pratique is automatic if a vessel has been granted pratique at another port in Fiji.
TUGS: No tug service available.
BERTHING: Only 1 vessel berthing at a time.
Berthing in Levuka is generally effected starboard side to, outside Queens Wharf. Both dry cargo ships and tankers use the one berth available for overseas shipping at Levuka. Berth length 575 ft. Depth 18 to 34 ft. dependent on tide.
STEVEDORES: Estimated time of arrival of any vessel and tonnage of cargo to be discharged should be received at least 24 hours from time of arrival.
MEDICAL: Normal hospital facilities are available. Specialist services not available but can be arranged for within 24 hours. Smallpox, cholera and yellow fever valid Vaccination Certificates are required to be held by ship's crew and passengers except those coming from New Zealand, Australia, Gilbert and Ellice Islands, Tonga or Samoa.
TANKERS: Load and discharge lines 8 in. steel pipe. 1 berth only.
DENSITY: 1025.
FRESH WATER: Available only during normal working hours, which is from 0600 to 1600 from Monday to Thursday, and Friday up to 1500. Rate of delivery of water is about 15 t.p.h.
FUEL: Light marine diesel only – viscosity kin. at 100°F. = 3.4.
FIRE PRECAUTIONS: Bunkering only permitted during period between sunrise and sunset.
GANGWAY/DECK WATCHMEN: Services of watchman highly recommended to stop unauthorised persons from going on board.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: All crew and officers will be issued, with 25 cigarettes per day. A maximum of 4 days' allowance may be given at any one time. Cigars or tobacco may be taken in lieu of cigarettes. Masters and other officers may be allowed to keep in their possession small quantities of liquor.
Daily allowances: spirits, 1 reputed quart to Master; beer, 2 reputed quarts to other officers; spirits,0.25 reputed quart to other officers; beer, 2 reputed quarts to Master.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: Minor engine repairs are possible, but deck and major engine repairs could be carried out at Port of Suva, which is about 57 miles away.
REPATRIATION: Facilities exist for repatriation.
AIRPORT: Is situated on island of Viti Levu and the distance is about 200 miles. It is served by regular airlines (international). Connections twice daily from local airport, 12 miles from port.
TIME 12 hours ahead of GMT.
HOLIDAYS: Working of cargo is not permitted on Sundays, Good Friday and Christmas Day. Application to work on Sundays to be made to the Senior Collector of Customs at Ovalau.
POLICE/AMBULANCE/FIRE: Police, 44033; Ambulance, 44015; Fire, 44041.
TELEPHONES: Arrangements may be made with Postmaster for installing telephone on board.
GENERAL: Rat guards must be affixed to all shore moorings or cables greased when alongside to prevent the advent of rats.
SHORE LEAVE: All crew members are allowed shore leave unless there is a special restriction from any Government authorities.
DELAYS: No berthing at night (lines cleared by quarantine authorities). Bunkering from sunrise to sunset. No loading or discharge during rain.
AUTHORITY: Harbour Master.

SUVA: 18.08 S. 178.26 E. **(See Plan)**

PORT LIMITS: A vessel is considered to be an "arrived vessel" having passed the W. Reef Beacon at the entrance to Suva Harbour.
DOCUMENTS:
1 Last Port of Clearance Certificate.
1 Declaration of Nett and Unregistered Tonnage form.
3 Passenger Lists.
3 Crew Lists.
3 Stores Lists (for high duty goods).
Passenger liners are required to submit Transit Passenger Lists and also a letter of Guarantee from Master.
Vaccination Certificates for Passengers and Crew.
Deratisation Certificates.
PILOTAGE: Arranged through vessel's Agents. 24 hours notice of ETA with confirmation 12 hours before arrival. Suva Harbour Control should be contacted on Channel 20 VHF when within VHF range. Pilot vessel is a white clipper bow launch with word "Pilot" in black on each side and will leave wharf 45 minutes before signalled ETA of vessel. Pilots board on leads 5 miles from front lead. Vessels may stand in on leads to meet pilot vessel. Vessels are advised to provide 2 manropes for pilot ladder which will usually be required on the port side. No anchorage for vessels awaiting a Pilot.
ANCHORAGES: Safe anchorage may be found in depths of 10 to 20 fathoms within the harbour. Holding is good, mud bottom.
RESTRICTIONS: Vessels may enter at any time of day or night.
MAX. SIZE: No length or draft limitation for conventional vessels entering port. Largest vessel regularly entering is 42,000 tons.

HEALTH: Health authorities require that vessels cable details of ports visited within 50 days of ETA. Radio pratique will be granted to vessels which are healthy and have not visited a port in a malarial area within 50 days. Health authorities board and inspect any vessel which has visited a malarial port within 50 days and will spray any vessel which has visited a malarial port. Authorities board from a launch as vessel enters harbour: Quarantine officer will sight Maritime Declaration of Health and Deratisation Certificate on boarding. No further pratique formalities are required in Fiji ports other than first port of entry.
RADIO: Suva Radio, call sign 3 DP.
TUGS: 2 tugs available, one of 680 h.p. and one of 340 h.p.
BERTHING: Vessels berth port or starbord side to King's Wharf or port or starboard side to Walu Bay Wharf as may be necessary. King's Wharf is 1,600 ft. in length, having a least depth alongside of 42 ft. at MLWS at the North end and 35 ft. at the South end, whilst Walu Bay Wharf is 600 ft. in length, having a least depth alongside of 31 ft. MLWS.
Vegetable oil: Vessels loading vegetable oils berth at Walu Bay or North King's Wharf.
LPG carriers: Berth North King's Wharf or Walu Bay.
STEVEDORES: Arranged by ship's Agents.
MEDICAL: Advance notice of medical assistance is desirable. Hospital facilities available. Current international vaccination certificates required.
TANKERS: Discharge lines 8 ins. diameter. Tankers discharge at King's Wharf, North and South berths. Depths alongside 42 ft. No residue discharge facilities.
DENSITY: Salt water, density 1025 approx. No tide effect on density.
FRESH WATER: Available at all berths. Delivery rate 30 t.p.h. per hose.
FUEL: Furnace fuel oil, diesel fuel oil, gas oil available by prior arrangement through oil company.
GANGWAY/DECK WATCHMEN: Employment of deck/gangway watchmen is recommended and normally provided by ship's Agents.
OPENING/CLOSING HATCHES: Normally opened and closed by stevedore labour but crew may be employed at Master's discretion.
CERTIFICATES:
Load Line.
Certificate of Registry.
Safety Equipment Certificate.
Radio Certificate.
Deratisation Certificate.
Maritime Declaration of Health.
CUSTOMS ALLOWANCES: 1 oz. tobacco per man per day. No alcohol.
IDENTIFICATION CARDS: Not compulsory.
CONSULS: The following countries are represented: Belgium, United States of America, Netherlands, France, Norway, Denmark, Sweden, Federal Republic of Germany, Great Britain, New Zealand, Australia and India.
REPAIRS: Engine and deck repairs may be carried out at local machine shops.
REPATRIATION: Facilities exist for crew changes and repatriation.
AIRPORT: 15 miles to Nausori (Suva) Airport, serving Pacific Islands on weekly basis. Numerous daily flights to Nadi International Airport.
TIME: Local time is 12 hours ahead of GMT.
HOLIDAYS: New Year's Day; Christmas Day; Boxing Day (Dec. 26th); Independence Day (Oct. 10th); Prince of Wales' Birthday (17th Nov.); Queen's Birthday (14th June); August Bank Holiday (4th August); Good Friday; Easter Monday. Cargo is not worked on public holidays.
POLICE/AMBULANCE/FIRE: Police, 23811; Ambulance, 23071; Fire, 22688; Emergency, 000 for any of the above services.
TELEPHONES: Telephone connections to ships are provided.
SERVICES: Compass adjusting may be carried out.
SHORE LEAVE: Allowed.
DELAYS: Delays are not usual except for rain during hurricane season from November to April.
AUTHORITY: Fiji Marine Department.

OUT PORTS OF SUVA: Customs and Pilot are embarked at Suva or Lautoka.

Ellington: 17.20 S. 178.14 E. Private wharf for loading sugar and molasses from Raki Raki Mill.

Lambasa; 16.26 S. 179.22 E. Open roadstead at mouth of Lambasa River where vessels load from lighters, sugar from S.P.S.M. Sugar mill.

Naikorokoro: North Coast of Kadavu. Anchorage for loading sawn timber.

Savu Savu: 16.47 S. 179.21 E. Government wharf for local coast trade and anchorage for cruise vessels.

Vatia Point: 17.25 S. 177.46 E. Private wharf for discharging explosives and fuel to gold mines.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Finland

EKENAS/TAMMISAARI: 59.58 N. 23.26 E.

DOCUMENTS:
2 Crew Lists (passengers to be included).
1 Customs Declaration (official forms supplied by the Customs Authorities).
4 Manifests.
1 Bill of Lading.

PILOTAGE: Pilots for Ekenas/Tammisaari applied for either at Hango Pilot station by approaching Pilot station outside Hango/Hanko, where Pilot boat will meet vessel right outside Pilot station; or at Koverhar Pilot station by giving ETA 2 hours ahead over VHF Channel 16, working frequencies Channels 6, 8, 12, 13.

Koverhar Pilot boat will meet arriving vessels at Ajax Buoy.

Telegram addresses: Hango Pilot or Koverhar Pilot.

MAX. SIZE: Max. draft 15.1 ft. (4.6 m.). No other restrictions. At Skogby, draft up to 24 ft.

RADIO: Hanko Radio, Call sign OFI.

TUGS: Normally no tugs stationed at Ekenas but can be arranged from nearest port.

BERTHING: Two quays at Ekenas: "Trakajen", length about 160 ft.; "Stenkajen", length about 500 ft.

"Stenkajen" is equipped with one shore crane with a lifting capacity of 5,000 kg. The shore crane is equipped with grab for lifting bulk cargoes such as coal, coke, china-clay and ball-clay. 2 mobile cranes, capacities 27 and 36 tons.

Situated about 6 nautical miles from Ekenas is Skogby Sawmill Quay. Depth alongside 24 ft. Skogby Sawmill exports sawn goods, mainly to U.K., both packaged and loose.

STEVEDORES: ETA to be given to Agent 1400 hours Finnish time on the day before arrival in order to prepare loading/discharging.

MEDICAL: Hospital treatment can be arranged when needed.

DENSITY: 1001.

FRESH WATER: Fresh water is delivered to the ship's side by means of hose.

FUEL: No bunkering available at Ekenas.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes permitted for each Crew member. 1 open bottle of 0.75 litre wine or spirit is allowed for each Crew member over 18 years of age.

IDENTIFICATION CARDS: Not needed.

REPAIRS: Minor electrical and deck repairs may be carried out.

AIRPORT: Nearest Airport is Helsinki Airport, situated about 100 kms. from Ekenas.

HOLIDAYS: On Saturdays and days preceding Church holidays, the eve of Independence Day, the day preceding May Day, on Whitsun Eve and on New Year's Eve the working day consists of four working hours, starting from 0700 or 0800 and lasting to 1100, 1200 hrs. resp. without break for meals. May Day, Independence Day, (6th December), Easter Saturday, Midsummer Eve and Christmas Eve are considered as labour free days.

POLICE/AMBULANCE/FIRE: Police, tel. 002; Ambulance, tel. 13340; Fire, tel. 005.

TELEPHONES: There are no arrangements for placing telephones on board the vessel but telephone calls can be made from the Harbour Constable's Office.

SUPPLIES: Ship stores and provisions can be ordered from Hango through Agent.

SHORE LEAVE: Shore leave allowed for crew members.

AUTHORITY: Harbour Master.

HAMINA: 60.34 N. 27.11 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when arrived at roads.

DOCUMENTS: Normally required:
1 Crew List.
1 Passenger List.
3 Manifests.
1 Bill of Lading of each consignment.

Customs documents:
1 Special List (personal effects).
1 Provision List (Ship's Articles).

Ship's papers required:
International Tonnage Certificate.
International Load Line Certificate.
Certificate of Registry.
Tonnage Dues and Ice Dues Certificates if vessel called earlier.

PILOTAGE: Sea Pilot boards at Orrengrund, 36 miles from Hamina. VHF radio telephone Channel 16; Pilot boat: hull red, superstructure yellow. Vessels coming from Eastward can take Pilot at Haapasaari (Aspo), but must order Pilot by radio via Coast Radio Station at least 6 hours before ETA Haapasaari.

Harbour Pilotage: Harbour Pilot takes over at Roads. Harbour Pilot boat: hull black, superstructure yellow, word "Pilot" painted with red letters. Harbour pilotage optional.

ANCHORAGE: 2 anchorages with good holding grounds at Roads.

RESTRICTIONS: Usually no restrictions. Draft 9.0 m. to oil harbour and 8.4 m. elsewhere. Port open throughout year.

MAX. SIZE: Draft is governing factor. No tide but prolonged Easterly winds can cause lower water level, which must be checked before entering berths.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, doctor to be contacted, preferably via Agent by radio before arrival.

RADIO: Vessels in Baltic Sea usually contact Helsinki radio/OHC, A1 and OHG, A3. VHF Channels 16 and 26. Vessels in Eastern part of Gulf of Finland contact Kotka radio/OHF, A1 and OFU, A3. VHF Channels 16, 25 and 27.

RADAR/VHF: There is no land radar service. Harbour is equipped with VHF radio telephone, Channels 16 and 12.

TUGS: Join vessels at Roads. Ship's lines usually used.

BERTHING:

Quay	*No.*	*Depth (m.)*	*Length (ft.)*
Tervasaari	1–5	4.0	270
Hailikari		3.9	62
Coaiquay		7.0	345
Kaukas	1–3	7.9	216
Kaukas-Hackman	1–5	5.2–5.5	365
Rauma-Repola	1–2	3.6	140

Hiirenkari	1–2	7.9	158
	3–5	8.4	310
	Ro/Ro	7.0	
Roads		7.9	
Outer roads		9.0	
Oil harbour		9.0	

SPECIALISED CARGO HANDLING FACILITIES: Coal and bulk quay has a length of 345 m. and loading depth of 7 m.; 5 electric cranes, the lifting capacity from 5 to 6.5 tons.

Container crane 25 tons capacity. Sawn timber quays 3–6 m. draft.

Roll-on/roll-off berths 7 m. draft.

CRANES:

	No.	*Capacity/Tons*	*Type*
Coal quay	3	5	
	2	6.5	
Rauma-Repola quay	12	2–15	mobile
Hiirenkari quay	1	24	container

STEVEDORES: ETA is expected in good time before arrival.

MEDICAL: Advance notice helpful but not compulsory. Hospital facilities available at town.

TANKERS: Ocean-going tankers effect discharging through stern pipe-line. Mooring with both anchors, and stern to quay. Tankers up to 2,000 d.w.t. can discharge through side lines. Heavy oil and light products discharged into 10 in. line through hose of 8 in. No slop tank available. 1 tanker berth, draft 9 m.

DENSITY: 1003.

FRESH WATER: Available at majority of quays; elsewhere supplied by boat.

FUEL: Fuel and diesel oils available at short notice. Delivery by tank truck.

GANGWAY/DECK WATCHMEN: Shore watchmen available, Sundays and holidays 100% extra.

OPENING/CLOSING HATCHES: Crew close automatic hatch covers. Hatches to be covered manually are usually covered by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Master 200 cigarettes or 200 grams tobacco. Others, 100 cigarettes or 100 grams tobacco. Wine and/or Spirit: Master, 3 bottles wine or spirits. Others, one bottle.

CONSULS: Great Britain, Denmark, Holland, Norway, Sweden.

REPAIRS: Minor repairs effected.

REPATRIATION: There are facilities for repatriation.

AIRPORT: Helsinki Airport, distance 145 km. Regular flights.

TIME: Local time is GMT plus 2 hours. No alterations during year.

HOLIDAYS: New Year's Day (Jan. 1); Epiphany (Jan. 6); Good Friday; Easter Monday; Labour Day (May 1); Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (Dec. 6); Christmas (Dec. 25 and 26).

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 41304 and 43111; Fire 005.

TELEPHONES: None available for placing on board.

REGULATIONS: Regular terminal vessels have preference at certain berths.

AUTHORITY: Haminan Kaupungin Satamalaitos.

HANKO: 59.49 N. 22.58 E.

DOCUMENTS:
Ship's Register.
Crew List.
Manifests.
Bills of Lading.
Provisions List.
Health Certificate.

PILOTAGE: Compulsory, distance from sea to port is 6 miles. Pilot boat painted red, arriving outside Russaro called by radio via Hanko Radio or by flag, sound or Morse: "G".

ANCHORAGE: Inside Gustavsvarn.
RESTRICTIONS: Draft 26.5 ft., length/breadth no restriction; no tide.
RADIO: Cable Agents giving ETA via Hanko or Helsinki Radio.
RADAR: At Pilot station; service for ships entering port, contact by ship's radio.
TUGS: In Winter time harbour tug boat helps ships to and from the quay.
BERTHING: Advise Pilot. Depths at piers 19-29 ft. Quay height about 6 ft. above sea level. Shore fenders keep vessel about 2 ft. off quay. Special quays for roll-on/roll-off traffic.

Quay	*Permitted draft in feet*	*Length of quays metres*

Free harbour: No crane; 21 fork lift trucks available.
STEVEDORES: Ordered by Agents.
FRESH WATER: Delivered from shore installations at daytime. Rate of delivery about 20 t.p.h.
FUEL: Delivered by rail cars only.
DENSITY: 1005.
WATCHMEN: Available but not compulsory.
HATCHES: Crew allowed to open and close hatches.
CUSTOMS ALLOWANCES: No restrictions in the Free Port, outside about 200 cigarettes and limited amount spirits per man.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Iceland, Netherlands, Norway, Spain, Sweden.
REPAIRS: Small repairs possible.
TIME: Local time GMT plus 2 hours.
TELEPHONE: Police 003; Fire 005; Ambulance 82228.
AUTHORITY: Harbour Master.

HELSINKI: 60.09 N. 24.57 E. (See Plan)

DOCUMENTS: See "Oulu".
PILOTAGE: Compulsory. ETA required 24 hours prior arrival. At present there are 2 different channels available for vessels approaching Helsinki.

1. Helsinki Lighthouse–Harmaja–Helsinki. Waterway leading from sea via Helsinki Lighthouse, situated in Gulf of Finland off the islets and shoals South of the port of Helsinki at a distance of about 12 miles may be considered as main approach. Channel navigable by vessels with a draft up to 9.6 m. (31 ft. 6 in.). Obtain Pilot from Pilot station at Harmaja. Vessels using main channel from Helsinki Lighthouse should keep Harmaja Lighthouse in line with church tower of Suomelinna, bearing about 7°. The Islet of Harmaja not navigable without a Pilot further in than 2 miles.

2. Porkkala-Helsinki. Fairway runs by Porkkala Lighthouse along the Eastern coast of Porkkala peninsula. Navigable by vessels with a max. draft of 9 m. (29 ft.). Pilots obtained from Porkkala-Ronnskar.

Harmaja Sea-Pilot station: Tel. 668 203. Harbour Pilots at Harbour Office: Tel. 634 308.
ANCHORAGE: Good anchorage available outside harbour, depth 26-30 ft. clay bottom.
MAX. SIZE: Draft 31 ft., length 200 m.
HEALTH: See "Oulu".
DIRECTION FINDING: (Harmaja Radio Beacon) Harmaja Radio Beacon (frequency 298.8 kc/s) transmits:

Non-directional radio signals, with a modulation frequency of 395 c/s. By listening to these signals with a direction finding receiver, equipped with frame aerial, a ship can determine her bearing to the beacon.

DEPTH OF CHANNELS:
(1) From Porvoo via Kuggsund and Hevossalmi Canal 2.4 m.
(2) From Porvoo to outer roads via Kalvo and straits at Kustaanmiekka 7.3 m.
(3) From Pellinki to Helsinki 9.0 m.
(4) From Helsinki Lighthouse to Helsinki 9.6 m.
(5) From Barosund to Helsinki outer route 5.5 m.
(6) From sea South via Porkkala 9.0 m.

TUGS: Several available: charges based upon time when tug leaves station berth until moment of return to same station.
BERTHING: Port and equipment owned by Municipality of Helsinki. 5 principal parts of port are South and West Harbours, Sornainen Harbour, and Herttoniemi and Laajasalo Oil Harbours. North Harbour serves only passenger-launch traffic to surrounding islands.

Foreign passenger traffic is concentrated on the South Harbour. Piece-goods traffic is also handled on Katajanokka quay.

West Harbour handles main part of transoceanic traffic, heavy goods and bulk cargoes. This part of port is Helsinki's coal harbour with necessary discharging equipment and coal storage facilities; also, silos of 2 flour-milling plants (Vaasan Hoyrymylly Oy and Sate Granary), into which grain discharged by suction. On silo quay pneumatic grain unloader owned by State Granary travels along 71 m. long bridge alongside ship to be unloaded. Equipment is 30 m. above quay level and range of suction pipe 11 m. from edge of quay. Unloading equipment can handle 100 t.p.h. Mass export articles such as cellulose, paper and wood goods, loaded chiefly in his harbour. In West Harbour is free-zone warehouse, which offers same privileges as free port.

The Sornainen Harbour operates mainly as a North Sea piece-goods harbour. The area contains a coal harbour.

Herttoniemi and Laajasalo form the oil harbour, where the leading oil companies have oil storage tanks and own piers.

See Table opposite

BULK HANDLING FACILITIES: Specially equipped berths for handling bulk cargoes in Sornainen Harbour and Saukko coal harbour. Berths equipped for containers or roll-on/roll-off traffic in West Harbour (40-ton container crane) and Sornainen Harbour.
STEVEDORES: 24 hours ETA required. 5 companies available of which 2 specialise in discharging timber and coal.
Working hours; Weekdays, 0700–1600 and 1600–2230. Saturdays, 0700–1500. Lunch break weekdays and Saturdays 1100–1130.
MEDICAL: Agents to be informed by radio if fever suspected.
TANKERS: Max. draft 31 ft.
DENSITY: Fresh water.
FRESH WATER: Unlimited amount available by hoses from Hydrants at quays.
FUEL: All grades available; any amount of short notice.
GANGWAY/DECK WATCHMEN: Recommended but not necessary.
OPENING/CLOSING HATCHES: Crew/Stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle wine or spirits each man.
IDENTIFICATION CARDS: Not needed.
CONSULS: All maritime countries are represented in Helsinki.
REPAIRS: All types available.
DRY DOCKS: 2 dry docks and 1 floating dock, maximum length of dry docks 120 m., breadth at entrance 20 m. Depth on sill 5.8 m. and 140.7 m., 14 m., 4.5 m. Maximum size of floating dock, length 165 m., breadth 28 m., depth 7.8 m.
REPATRIATION: Available.
AIRPORT: Distance to airport 25 km. Flights every day all over Europe.
TIME: GMT plus 2 hours. No alterations.
HOLIDAYS: New Year's Day (1st January); Epiphany; Good Friday; Easter Monday; Workers' Holidays (1st May); Ascension; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Day (25th December); Boxing Day (26th December).
POLICE/AMBULANCE/FIRE: Police 002; Ambulance 006; Fire 005.
TELEPHONES: Facilities for linking up vessels to telephone network available on all of the most important quays. Apparatus handed over to vessel by port official on duty for purpose, who also gives its number. Charge for annual contract is 600 mks per vessel. For short-term use charge is 20 mks a day and 50 mks a month. Charge entitles to unlimited local calls. Trunk calls charged separately.
SERVICES: Compasses are adjusted by competent adjusters approved by the Board of Navigation. For compass adjustment the port has constructed piles or buoys with direction markings. These appliances can be used also for radio direction-finders.

Vessels using the compass-adjustment facilities must have on board a Harbour Pilot, who is entitled to the same compensation as for harbour pilotage.
CLASSIFICATION SURVEYORS: Lloyd's Register of Shipping, Bureau Veritas, American Bureau of Shipping, Germanischer Lloyd, Det Norskey Veritas.
ICEBREAKERS: *Teuvo*, length 39.9 m., breadth 12.9 m., fitted with 2 combined water/foam cannons for firefighting purposes, total capacity of 300 cu. m. per hour. VHF-telephone: call OIEV.

During ice seasons one of the following Government icebreakers assigned to assist ships from open water to harbour area and vice versa:

	Length (m.)	*Breadth (m.)*
Varma	86.5	21.2
Apu	86.5	21.2
Tarmo	84.0	20.5
Voima	83.5	18.7
Sampo	74.1	16.7
Murtaja	74.1	16.7
Karhu	74.1	16.7
Hanse	74.1	16.7
Sisu	65.3	14.4
Urho	65.3	14.4

Masters should communicate with icebreakers between January and March.
DEVELOPMENTS: New passenger terminal will be ready by the Spring 1977 on Katajanokka quay. Coal traffic will be removed from Saukko Quay to Sornainen Harbour. Container terminal activities will be started in the West Harbour.
AUTHORITY: Captain of the Port.

INKOO: 60.01 N. 23.55 E.

PILOTAGE: Pilot boards off Ronnskar Lighthouse (Tel. Helsinki 294112, telephone and VHF). Distance to coal Harbour 18 miles, Oil Harbour 17 miles.
MAX. DRAFT: *Approaches:* Fairway to Coal Harbour 29 ft. 6 in. Fairway to Oil Harbour 32 ft. 10 in.
TUGS: Available any time. 1 tug stationed at Inkoo.
BERTHING: Coal Quay length 175 m.; depth alongside 25 ft. 6 in.
Paper Quay length 140 m.; depth alongside 25 ft. 6 in.
CRANES: On the Coal Quay, one crane, 10 tons and one crane, 6 tons, by hook and half of the capacity by grab. Mobile cranes to hire of several capacities on Paper Quay.
DENSITY: 1004.
FRESH WATER: Available.

JAKOBSTAD (Alholmen): 63.42 N. 22.42 E. (See Plan)

DOCUMENTS:
International Measurement Certificate.
3 Manifests.
2 Bills of Lading of each consignment.
Customs Documents:
1 Crew List.
1 Special List (personal effects).
1 Provision List (ship's articles).
Important: If the vessel is calling at two or more Finnish ports, 2 of each of these lists are to be produced at the first port of call.
PILOTAGE: VHF Channel 16, MF 2182 kHz. Anchorage for vessel awaiting a Pilot: outside the lighthouse "Kallan". Pilot boat equipped with radar.
ANCHORAGES: On inner roads called "Ado Roads", depth of water 28/30 ft.
MAX. SIZE: Max. draft in the inner harbour 24 ft. 3 in. No tide.
HEALTH: See "Oulu".
RADIO: Vasa Radio Station. Gamlakarleby/Kokkola VHF Channel 28.
TUGS: Tugs are normally stationed in the harbour. Ship's lines to be used.
BERTHING: Laukko Pier. Length 2×100 m., depth 24 ft. 3 in.
New Quay. Length 200 m., depth 24 ft. 3 in.
Old Quay. Length 300 m., depth 17 ft. (inside) 19 ft. (outside).
Kantlax, Oilport. Depth 7 m.
Busto Quay (roll-on/roll-off) length 160 m., depth 24 ft. 3 in.
Cranes: 8 mobile cranes available.
STEVEDORES: Working time: 1st shift Monday-Saturday 0700–1600 hrs. (meal hours 1100–1200); 2nd shift Monday-Friday 1600–2400 hrs. To commence loading at 0700 hrs. notice must be given latest at 1600 hrs. the day before, or before 1200 hrs. if commencing at 1600 hrs.
MEDICAL: Advance notice not required. All facilities available.
TANKERS: Vessel's draft must not exceed 24 ft. 3 in.
DENSITY: Fresh water.
FRESH WATER: From pipe-line alongside quay.
FUEL: Only gas oil available.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Derat. Certificate to be kept on board.
CUSTOMS ALLOWANCES: Tobacco: 100 cigarettes per 3 days for each crew. Wine and/or Spirits: 1 bottle per 6 days for each man of 21 years age.
IDENTITY CARDS: Not needed.
CONSULS: Danish, Tel. 10144; Norwegian 10444; Swedish 10444.
REPAIRS: All types of repairs possible.
DRY DOCKS: Only a small slipway.
REPATRIATION: Crew changes can be effected.
AIRPORT: Kronoby Airport about 30 km. from Jakobstad. 2 flights daily.
TIME: The local time is 2 hours later than GMT.
HOLIDAYS: 1st and 6th January; Good Friday; Easter Eve; Easter Monday; Labour Day (1st May); Ascension Day; Midsummer Eve; Whit Monday; 6th December (Independence Day); 25/26th December All Saint's Day.
POLICE/AMBULANCE/FIRE: Police 10039; Ambulance and Fire 10055.
TELEPHONES: Connection for telephone on board available.
AUTHORITY: Harbour Master.
AGENT: Wilkman & Lenander Ab, POB 6, SF-68601 Jakobstad, Finland. Telex 7516 (answer back: 7516 wilkm sf). Tel. 10148, 10278. A.O.: 12171, 10446. Shipbrokers, Liner Agents, Forwarding Agents.

KASKO (KÅSKINEN): 62.23 N. 21.13 E.

DOCUMENTS:
2 Crew Lists.
2 Customs Lists.
2 Passenger Lists.
Manifest, Bill of Lading, etc.
Between 1st December/30th April Iceclass Certificate required (can be given in Kasko).
PILOTAGE: Pilot boards 4 miles outside Pilot station. Pilot boat or station can be called by radio telephone 2182 or VHF Channel 16. Notice is not required. Pilot can be called, daytime flag "G" or "PT", night-time by Morse "PT".
ANCHORAGE: Safe areas of anchorages, 3 miles W.S.W. of Pilot station Salgrund, depths 15–20 m.
MAX. SIZE: Max. draft 8 m.
HEALTH: Pratique automatic.
RADIO: Vasa Radio.
VHF: VHF Channel 16 (Salgrund Pilot).
TUGS: None.
BERTHING:

Deep Harbour Quay	Depth 27 ft.
Outer Harbour Quay	,, 22 ft.
Inner Harbour Quay	,, 23 ft.
Total length of quays 2,694 ft.	

DENSITY: 1004.
STEVEDORES: Available; rates about 250-300 tons pulp per work gang.
MEDICAL: Hospital available.
FRESH WATER: Brought by truck Winter-time; Summer by pipe-line.
FUEL: Available by tank truck.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle spirit.
CONSUL: Swedish Consul, Tel. 427.
REPAIRS: Only small repairs.
AIRPORT: Distance to Vasa Airport 100 km. Served by regular airlines.
TIME: GMT plus 2 hours.
HOLIDAYS: See "Oulu".
POLICE/AMBULANCE/FIRE: Police 002; Ambulance 300; Fire 005.
TELEPHONE: Can be connected. No cost for connection.
GENERAL: Port is the most Northern in Finland which under reasonable conditions can be kept open throughout Winter.
AUTHORITY: Harbour Office.

KEMI: 65.44 N. 24.33 E. (See Plan)

PILOTAGE: Pilot boards from Pilot station at Kemi Lightvessel. VHF and radio telephone watch maintained. Pilotage distance: Ajos 17 miles; Veitsiluoto 22 miles.
MAX. SIZE: Sea to Fairway at Ajos. Max. draft 10 m. Sea to Fairway at Veitsiluoto. Max. draft 7.3 m. Also see "Berthing".
TUGS: One tug available, 450 h.p. Icebreaker tug of 3,500 h.p.
BERTHING:

AIRPORT: Nearest airports in Vaasa and Pori within 100 km., several flights per day.

TIME: Local time GMT plus 2 hours.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police Station of Kristinestad 104; Ambulance 60; Fire Brigade 005.

TELEPHONE: Public telephones on the pier.

GENERAL: Timber pier in Port of Kristinestad closed from the end of December to the middle of April owing to ice. Oil port will be kept open according to the general ice situation of Gulf of Bothnia.

SHORE LEAVE: Allowed.

AUTHORITY: Harbour Master.

MANTYLUOTO, Pori (including Reposaari and Tahkoluoto): 61.36 N. 21.29 E. **(See Plan)**

PORT LIMITS: The line between the lighthouses on Mantyluoto and Reposaari.

DOCUMENTS:

Ship's Register.
Crew List.
Passenger List.
Customs Documents.
Manifests.
Bills of Lading.

PILOTAGE: Pilot compulsory. Telegr. address: Luotsiasema, Mantyluoto (Pilotstation Mantyluoto), VHF Channel 16 or frequency 2182. 24-hr. service by pilot boats from Mantyluoto Pilot station, boats red-painted, international light or sound signals. Pilot to be taken 4 miles off Mantyluoto. In heavy fog, if required, Pilot station able to navigate vessels into harbour by radar, provided vessel has corresponding equipment.

ANCHORAGES: Reposaari Roads and outside the breakwater.

RESTRICTIONS: Depth in the channel 7.6 m.

MAX. SIZE: No other restrictions, but max. draft 25 ft. (7.6 m.).

Tahkoluoto Oil Harbour: Max. draft: 10.0 m.

Tahkoluoto Bulk Harbour: Max. draft: 10.0 m. Length of the quay 145 m. For self-discharging bulkships only.

Reposaari: Max. draft: 3.9 m.

RADIO: Inform Agents giving ETA via Helsinkiradio, Hankoradio, or Mariehamnradio, or VHF Channel 26, Pori.

TUGS: 5 tugs available from 200 h.p. up to 3,520 h.p. Tugs normally join the vessel near the quays. Tugs use ship's lines.

BERTHING:

Quay	Quay Section	Depth of water (at normal water) (m.)	(ft.)

CARGO HANDLING FACILITIES: Three Ro/Ro berths, 30–ton crane able to handle containers.

STEVEDORES: The vessels receive workers in the order in which they enter the harbour. ETA advices appreciated in order to facilitate arranging gangs.

MEDICAL: No advance notice for medical attention required. Hospital facilities available.

DENSITY: 1004.5.

FRESH WATER: Supply by shore installation.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Load Line Certificate and during Winter season Ice Dues Certificate which issued by authorities for each season.

IDENTIFICATION CARDS: Not needed.

CONSULS: Vice-Consuls: Britain, tel. 939/43122; Denmark, tel. 939/43122; Netherlands, tel. 939/43222; Norway, tel. 939/43222; Sweden, tel. 939/11141.

REPAIRS: Most repairs possible.

AIRPORT: Distance from airport 22 kms. Served regularly by Finnair.

DEVELOPMENTS: Coal quay under construction at Tahkoluoto.

TIME: Local time 2 hours ahead of GMT. No seasonal alterations.

AUTHORITY: Porin Kaupungin Satamalaitos, Pori.

MARIEHAMN: 60.06 N. 19.56 E.

PORT LIMITS: The Southern boundary of the port is on a line between 60° 03.5′ N., 19° 56.1′ E. and 60° 04.2′ N., 19° 55′ E.

DOCUMENTS:

1 Crew List.
1 Passenger List.
3 Provision Lists.
2 Special Lists (in possession each crew member – cigarettes, tobacco, spirit, radios, etc.).
2 Bills of Lading.
Registered Tonnage Certificate.

PILOTAGE: Pilot arrives from station at Lotsberget in Westerhamn harbour, and meet entering vessels about 2 nautical miles southwest of Marhallan lighthouse. 3 hours notice of ETA is required. Pilot station and cutter are fitted with VHF-radio and keep watch on Channel 16, 24 hours a day. Working-Channel is 13. Pilot can also be ordered by cable via Mariehamn Radio.

Pilot can also be taken from Nyhamn pilot station 12 miles from the port. Nyhamn has VHF, Radio 2182 kc/s and Radar.

ANCHORAGES: Good anchorages North of Grano Island in 10 to 20 m. water.

MAX. SIZE: Ships of 130 m. length and 6 m. draft can enter the port.

RADIO: Mariehamn Radio, call/sign OHM on telegraphy and OFH for telephony. Connected to the public telegraph and telephone service.

VHF: Following stations keep watch on VHF Channel 16: Mariehamn Radio, Mariehamns Pilot, Mariehamns Hamn (Harbour Office), Sjobevakningen Mariehamn (The Coast Guard at Mariehamn).

TUGS: 1 tug of 320 h.p. available. The m/s *Gustaf Erikson* belonging to the Alands Lifeboat Society. Usually ships' lines are used.

BERTHING: Deep Water quay. Length 315 m., depth 20 ft. Total length of other quays 690 m. Average depth 18 ft.

Power Station Pier. Depth 16 ft. Oil Pier, depth 16 ft. 5 in., max. length of tanker, 80 m.

There are 2 mobile cranes of 10 tons capacity.

CRANES: 3 mobile cranes can be rented from Alands Kranservice. Maximum lift, one crane of 15 tons and two of 25 tons on the shortest radius.

SPECIALISED CARGO-HANDLING FACILITIES: 2 berths for roll-on roll-off traffic, used by car ferries.

STEVEDORES: Ordered by Agents. ETA in good time to obtain gangs.

DENSITY: 1005.

MEDICAL: All services available.

FRESH WATER: Most berths supplied by shore installations about 15 t.p.h., otherwise by truck.

FUEL: Only diesel oil, no heavy products.

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Normally done by crew.

CERTIFICATES: International Tonnage Certificate or National Tonnage Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes and limited amount spirits for each crew member.
CREW IDENTIFICATION CARDS: Not needed.
CONSULS: Denmark 11 454, Holland 12 070, Iceland 21 849, Norway 12 050, Sweden 11 624, U.S.S.R. 11 524, West Germany 11 410.
REPAIRS: Most repairs possible.
DRY DOCKS: Slipway for small vessels, max. about 3-400 d.w.t. Floating dock, length 117.8 m., width 28.4 m., draft 5.8 m. Able to dock vessels up to 6000—8000 d.w.t.
SURVEYORS: No permanent surveyors at Mariehamn.
REPATRIATION: Mariehamn is a good place for repatriation, with many connections to Sweden and to the Finnish mainland every day, with car-ferries and aeroplanes. About 1 million tourists are visiting Aland Island every year.
AIRPORT: About 5 km., daily traffic to Stockholm and Abo.
TIME: GMT plus 2 hours.
HOLIDAYS: See "Oulu".
POLICE/AMBULANCE/FIRE: Police 002 or 11 126; Ambulance 005, Fire 005 or 11 000.
TELEPHONES: Available at berths for passenger ships. Connection will cost 120 Fmk. year 1976.
AUTHORITY: Harbour Master, Port of Mariehamn.

NAANTALI: 60.28 N. 22.01 E. (See Plan)

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Dangerous Cargo List.
Ship's Register.
PILOTAGE: Pilot compulsory at Uto Pilot station. When approaching Uto communicate with VHF Channel 16. ETA, name of vessel, destination, draft. Change of Pilot takes place in Lohm. Harbour pilots available at the port. Distance Uto-Lohm, 25 miles. Lohm-Naantali, 28 miles.
ANCHORAGE: Good safe anchorage in harbour area. Max. draft 10 m.
MAX. SIZE: Maximum permissible length for tankers 210 m., Mainguay – maximum length for any vessel 150 m.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise ask Agent.
RADIO: Hanko Radio; Mariehamn Radio; VHF Turku 26; VHF Mariehamn 27; VHF Korppoo 23.
VHF: Communication on Channel 16, own working Channel 11.
RADAR: When Radar Service needed, ask Agent.
TUGS: Harbour icebreaker tug *Naantali* 1,200 h.p., equipped with bow steering propeller. Use ship's lines. Additional tugs on application from Turku.
BERTHING: No special requirements. Harbour/Drafts: No tide. Main quay, length 275 m., draft 10 m. Timber quay, length 80 m., draft 6.7 m. 3 car-ferry piers, length 80 m./80 m./95 m., drafts 9 m./6.5 m./6.5 m. Lubricating Oil pier, length 33 m., draft 6.5 m. Sugar quay, length 35 m., draft 4.5 m.
CRANES: 2 cranes owned by electric powerplant of 6 tons each and heavy-lift of 200 tons.
BULK CARGO FACILITIES: Grain handled by pneumatic elevator and belt conveyor, Loading/Discharging 200 t.p.h., maximum reach for outlet/inlet 13 m., maximum height above quay level 8 m. when loading, discharging no limits, 135 m. of main quay intended to be for handling of grain, 120 m. for coal,, which is handled by 2 cranes of 6 tons each and belt conveyor, discharging rate about 300 t.p.h.
SPECIALISED CARGO-HANDLING FACILITIES: Roll-on/roll-off traffic possibility.
STEVEDORES: Available, ordered by Agent.
MEDICAL: Advise by radio prior arrival if medical attendance required aboard.
TANKERS: Oil Harbour, Neste Oy. Discharge lines ashore 10 in., 12 in., 18 in., Diameter of cargo hoses and respective draft of tanker berths:
Berth No. 1, 6 in., 5.7 m.
Berth No. 2, 10 in., 10.0 m.
Berth No. 3, 8 in., 10 in., 12 in., 11.5 m.
DENSITY: 1007.
FRESH WATER: Supplied by shore installations at most berths.
FUEL: All grades available.
FIRE PRECAUTIONS: Usual precautions.
GANGWAY/DECK WATCHMEN: Available. Tankers compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: 200 cigarettes/200 gr. tobacco and 1 bottle spirits/wine,
IDENTIFICATION CARDS: Not required.
CONSULS: In Turku 17 km. away.

REPAIRS: Small repairs can be carried out, ask Agent.
DRY DOCKS: None, See Turku. Naantali, Oy Navire Ab Navire yard, new buildings, main dimension of building dock 220 m. × 70 m., outfitting dock 180 m. × 125 m., sill depth 8.2 m.
SURVEYORS: Ask Agent.
CARGO GEAR: Heavy-lift crane of 200 tons, max. reach 9.1 m., max. lifting height 18 m. from quay level.
REPATRIATION: Good connections everywhere.
AIRPORTS: 20 km. distant. Regular service.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day, Epiphany, Good Friday, Easter Monday, Labour Day, Whit Monday, Midsummer, All Saints' Day, Independence Day, (6th December), Christmas.
TELEPHONES: A telephone connection available at Main quay.
SERVICES: Facilities for discharge of tank-washings, 10,000 cu. m. (Oil Harbour). Compass adjusting, ask Agent.
SHORE LEAVE: No restrictions for crew members.
IDENTIFICATION CARDS: Not required.
REGULATIONS: Oil pollution strictly prohibited, as well as all kind of dirt.
DELAYS: Usually no delays.
DEVELOPMENTS: Summer 1977 one more pneumatic elevator for grain, rate 200 t.p.h., max. reach 16 m.
POLICE/AMBULANCE/FIRE: Police 751 133; Ambulance 751 123, Fire Brigade 005.
AUTHORITY: Harbour Master, Naantalin Satamalaitos.

OULU: 65.01 N. 25.28 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is drawn West of Oulu Roads. The arriving vessel passing the Hermanni Island is inside the boundaries and if necessary to anchor on the roads, is considered to be an "arrived vessel".
Port consists of four separate parts *(a)* Toppila – Main Harbour. *(b)* South Harbour – Nuottasaari Quay – Ore Harbour. *(c)* Oil Harbour (Vihreasaari). *(d)* Oritkari Quay, inc. roll-on/roll-off quay.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ships bond-store Lists.
Derating Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of tonnage.
PILOTAGE: Vessel requiring Pilot applies from Marjaniemi. Pilot station, Lat. 65° 02′ 4″ N., Long. 24° 34′ E., near West point of Hailuoto Island. Pilots require 12 hours notice of ETA to Peltinmatala lightbuoy (Pilots) or to alternative position 3 miles North of Kelmi lightbuoy. Pilot boat red coloured displaying usual international pilot signs. Pilot station equipped with HF (2182) and VHF, Channel 16, radar and RC. Morse signalling by light. No specific requirements on part of Pilots boarding, only safe pilot ladder according to rules. Anchorage near lightbuoy Peltinmatala, when awaiting for Pilot in fine weather; in bad weather advisable to ride against weather and wind. Pilot for Oulu can also be obtained near the "Kemi I" light-tower. Vessels with a draft more than 8.0 m. must use this fairway and apply for Pilot either from Marjaniemi or Kemi Pilot station, wireless 2182 or VHF 16.
ANCHORAGE: Safe anchorage on Oulu roads. There are no safe anchorages West of Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on HF (2182), or VHF Channel 16.
MAX. SIZE: *Marjaniemi Fairway:* 8.0 m. *Kemi Fairway:* 10.0 m.
Toppila Harbour: North Quay depth 6.1 m., Hietasaari Quay, depth 6.1 m.
South Harbour: Oritkari Deep Water Quay, depth 9 m. Nuottasaari Quay depth 6.4 m.
Oil Harbour: Depth 10 m.
Also see "Berthing".
HEALTH: No special rules existing in obtaining pratique. If disease or fever is suspected on board report to ship's Agent; will contact the Health Authority for necessary arrangements.
RADIO: Vaasa Radio (North Quarken). Close to Hailuoto Island call "Oulu Radio" VHF Channel 27 or Channel 24.
RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with HF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (16).
TUGS: Tug optional, but for vessels over 140 m. long use is advisable. Tug will meet on Oulu Roads according to agreement; customary to use ship's lines.
BERTHING: *Toppila Harbour:* Depth 5.0–6.1 m. North Quay length 1,000 m. South Quay length 2,200 m. Pulp factory Quay length 200 m.
South Harbour: Length 320 m.
Oritkari Quay: Length 270 m.
CRANES:

	No.	*Capacity (tons)*	*Reach of arm (m.)*	*Type*
South Harbour	1	5	12	Movable
Toppila	1	6	22	,,
	1	3	12	,,
	1	5	12	,,
	1	8	26	,,

CARGO HANDLING FACILITIES: *(a)* Toppila Harbour is equipped with 4 cranes to discharge bulk cargoes (coal, china-clay, potash,

etc.) and with 2 pneumatic pipes to discharge grain.
(b) Roll-on/roll-off berth is adjacent to the Oritkari Quay in the South Harbour.
(c) Oritkari Quay is built to mechanically handle paper cargoes.
BRIDGES: No bridges. Electric cable across Toppila fairway, 50 m. above water.
STEVEDORES: 24 hours' notice of ETA to be given to Agent who arranges necessary gangs.
MEDICAL: Medical attention arranged through Agent, 2–4 hours notice required. Good hospital facilities available.
TANKERS: One principal tanker berth in Vihreasaari Oil Harbour, depth 10.0 m. Discharge lines of 12, 14 and 18 in. Pressure 10 Kp/Cm^2.
DENSITY: Fresh water.
FRESH WATER: Available at main berths and Oil Harbour from pipe-line, cost about 5.00 mk/ton. Elsewhere water is delivered by boat, cost about 8.00 mk/ton.
FUEL: Small quantities of all grades available, deliveried by lorries.
DEVELOPMENTS: The second stage of the Oritkari deep Waterquay will be completed in 1980. The length of the new quay is 250 m. and allowed draft 10 m. The quay is specially designed for general cargo and there will be ro/ro and container facilities.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as shipwork.
CERTIFICATES:
Nationality Certificate.
Measuring Certificate.
Load-line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Derating Certificate.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gr. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: One bottle wine or spirit allowed for each member of the crew.
CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board vessel.
IDENTIFICATION CARDS: Not needed.
CONSULS: Sweden, Norway, Denmark, Great Britain and Netherlands.
REPAIRS: Minor deck and engine repairs carried out. Docking only for small tug boats.
SERVICES: Compass adjusters and ship's cleaning.
DRY DOCKS: One small slipway. Max. vessels of 25 m. length and 8 ft. draft.
REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriation.
AIRPORT: Oulu Airport 15 km. from harbour served by regular airlines. Six daily flights to Helsinki and six flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.
TIME: Local time GMT plus 2 hours.
HOLIDAYS: General holidays in Finland: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (May 1st); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire 005, Reserve 006; Ambulance 006, Reserve 005; Police 002, Reserve 003.
TELEPHONES: A telephone connection available at Vihreasaari oil terminal.
AUTHORITY: Harbour Office of Oulu.

PARGAS: 60.18 N. 22.18 E. **(See Plan)**

DOCUMENTS:
3 Crew Lists.
1-2 Custom Provision Lists.
1-2 Custom Special Lists.
2 Passenger Lists.
2 Copies each Bill of Loading.
Tonnage Certificate and in special instances other regular documents.
PILOTAGE: On arrival at Pargas, from Gulf of FInland, from Baltic via Uto, from Gulf of Bothnia via Enskar, information of ETA to be given in good time to respective Pilot stations. VHF Channel 16 for calling, 13 for further communication. Charge for piloting in accordance with official Finnish tariff. Harbour Pilot available, but not compulsory, and can be ordered through Sea Pilot.
ANCHORAGES: Well sheltered and safe anchorage, immediately outside harbour area.
MAX. SIZE: Maximum depth both in channel and along quay 6.70 m. As regards length of quay and possibilities for a quick dispatch, it is desirable (though not an absolute stipulation) that discharging vessel be a bulk carrier with the engines aft.
HEALTH: Free pratique automatic for all vessels, but temporary exceptions in and according to regulations issued by W.H.O. and Authorities may occur.
RADIO: Radio-telephone contact with Agent and consignee/shipper is obtained via Mariehamn, radio-call 2196 kHz, reply 1852 OHF; or via Hango, radio-call 1967 kHz, reply 2649 OFO. Contact with VHF is ordered via Abo, Channel 26.
TUGS: A small motor tug of 200 h.p. available.
BERTHING: Directions to berth via nearest Pilot station, Pargasport. Quay level above water 1-2 m., dependent on berth.
Length of quays, 800 m. 2 electric coal-discharging bucket cranes and one electric conveyor belt.
STEVEDORES: Arrangements will be made by Agent, who must be advised of ETA previous day to enable arrange men, trucks, etc.
MEDICAL: Medical officer available locally. Necessary examination and taking of tests usually done in Abo. Regular appointment with local physician can be arranged by telephone with Agent or doctor.
DENSITY: Brackish water 1002.
FRESH WATER: Delivery from installation on quay.
FUEL: No local supply. In case of need delivery by truck from Abo.
GANGWAY/DECK WATCHMEN: Available but not necessary.
OPENING/CLOSING HATCHES: Must always be performed by crew.
CERTIFICATES: Normally tonnage certificate only but in special instances other regular ship's documents may also be needed.
CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits. In accordance with the decision of Customs authorities.
IDENTIFICATION CARDS: Not required.
CONSULS: See "Turku".
REPAIRS: Facilities for arranging small repairs on deck and engine in Pargas, but usually carried out by reliable companies in Abo.
DRY DOCKS: No local docking facilities. See "Turku ABO".
AIRPORT: Nearest airport in Abo. Distance about 25 km.
TIME: Local time/GMT plus 2 hours.
HOLIDAYS: New Year's Day (1st January), Epiphany (6th January), Good Friday, Easter Monday, Labour Day (1st May), Ascension Day, Whit Monday, Midsummer (2 days), All Saints' Day, Independence Day (6th December), Christmas (25th December). Work in harbour carried out during these days only under very pressing circumstances.
POLICE/AMBULANCE/FIRE: Police 744048; Ambulance 744064; Fire 005; Life-saving Corps 356595.
TELEPHONE: No facilities for placing telephone on board. Telephone available on quayside.
SHORE LEAVE: No restrictions for crew members.
DELAYS: Vessels dispatched in order of arrival. Usually no delays occur as work has generally been carried out within the time limit stipulated in C/P. Port activity aimed at good dispatch of vessels, and consequently work in 2 shifts has been arranged.
AUTHORITY: Port owned by Paraisten Kalkki Oy.

PATENIEMI: 65.06 N. 25.23 E.

OPERATORS: Oulu Osakeyhtio Sawmill. Port used for export of timber only, about 60,000 stds. per year. 12 km. North of Oulu.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ship's Bond Store Lists.
Derating Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of Tonnage.
PILOTAGE: Pilot station at Marjaniemi. Marjaniemi – Pateniemi 40 n. miles 23 ft. depth.
ANCHORAGES: Safe anchorage on Oulu roads. There are no safe anchorages West of the Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on HF (2182), or VHF Channel 16.
MAX. SIZE: Only dry-cargo vessels use this terminal. Max. draft 7 m. For length no restriction. Ship of 15,400 d.w.t. has entered.
HEALTH: No special rules existing in obtaining pratique. If fever or disease suspected on board to be reported to ship's Agent, he will contact Health Authority for necessary arrangements.
RADIO: "Vaasa Radio" (North Quarken). Approaching Oulu contact Agent through "Vaasa Radio". Close to Hailuoto Island call "Oulu Radio" VHF Station, Channel 27.
RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with HF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (16).
TUGS: Tug optional, but for vessels over 140 m. length the use is advisable. Tug will meet on Oulu Roads, according to agreement. Customary to use ship's lines.
BERTHING: Pier extends for 910 m. enabling 13 vessels of medium size to load simultaneously at quay. Depth at quays is from 20 to 23 ft.
STEVEDORES: 24 hours notice of ETA to be given to Agent, who arranges necessary gangs.
MEDICAL: Medical attention arranged through Agent. 2–4 hours notice required. Good hospital facilities available.
DENSITY: Fresh water.
FRESH WATER: Available at main berths delivered by boat and from pipe-line.
FUEL: Small quantities of all grades available, delivered by lorries.
FIRE PRECAUTIONS: Smoking prohibited in timberyards.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as ship work.

CERTIFICATES:
Nationality Certificate.
Measuring Certificate.
Load Line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Equipment.
Derating Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gr. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: 1 bottle wine or spirits is allowed for each member of the crew.

CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board.

IDENTIFICATION CARDS: Not needed.

CONSULS: British, Danish, French, Dutch, Norwegian and Swedish Vice-Consuls at Oulu.

SERVICES: Compass adjusters and ship's cleaning (no tank-washing).

REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriations.

AIRPORT: Oulu Airport 15 kms. from harbour served by regular airlines. 6 daily flights to Helsinki and 6 flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.

TIME: Local time GMT plus 2 hours.

HOLIDAYS: General Holidays in Finland: New Year's Day (January 1st); Epiphany (January 6th); Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day (May 23rd); Whit Monday; Midsummer Day (June 22nd); All Saints' Day (November 2nd); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Fire 005, Reserve 006; Ambulance 006, Reserve 005; Police tel. 002, Reserve 003.

REGULATIONS: Oil pollution strictly prohibited. Considerable timber lying in water and damages are ship's responsibility.

SHORE LEAVE: Crew members allowed ashore without restrictions.

AUTHORITY: Harbour Office of Oulu.

PORKKALA: 60.05 N. 24.23 E.

Documents and all general information, refer to "Helsinki".

PILOTAGE: A Pilot can be obtained from the Pilot station of Ronnskar or Porkkala, except for the shallowest fairway, for which the Pilot can be obtained from another Pilot station.

APPROACHES: There are 4 official ship routes leading to the port of Porkkala of Suomen Sokeri Osakeyhtio, the deepest one of which is 9.2 m. (30 ft.) and the shallowest one is 5.5 m. (18 ft.).

The port does not have an ice-breaker of its own and the fairway is kept open by means of the State's ice-breakers.

CLEARANCE: The customs formalities of the port are attended to by the Custom House of Helsinki.

TUGS: A tug-boat can be ordered either from Helsinki or from the port of Inkoo.

BERTHING: The port of Porkkala is owned by Suomen Sokeri and it is located at Kantvik. Directly in the vicinity of the port there is the factory of Suomen Sokeri Osakeyhtio (sugar mill).

The port basin has 2 parts. The outer part of the pier is 110 m. long and it can be used by vessels with a draft up to 9.2 m. (30 ft. 2 in.). The inner part of the pier is 50 m. long and it can be used by vessels with a draft up to 5.3 m. (17 ft. 4 in.). The fairway of the port basin is 120 m. wide, narrowing up at its end to 76.5 m.

South quay (at the South bank of Kantvik Bay); length 60 m., draft 21 ft. 11 in.

FRESH WATER: There is a water post for vessels, as well as distribution of electric current and connection facilities for telephones.

DENSITY: 1004.

SHIPMASTER'S REPORT: The sugar discharging berth for Porkkala is at Kantvik, situated in Lat. 60° 05′ N., Long. 24° 23.25′ E., about 21 miles West of Helsinki.

The Pilot for the port is embarked at the position indicated on British Admiralty Chart No. 2331, 115° 3.5 miles from Porkkala lighthouse. From there to the berth is 12 miles and the passage presents no difficulties. It is well lit, and there is ample water. The least depth recorded was 31 ft. and that was alongside the berth. There is a powerful tug for assisting in berthing and unberthing.

The discharging berth, alongside which vessels lie port side to, is modern and well fendered. It is sheltered from most directions. Unfortunately, the berth is short for a 500 ft. vessel, and additional moorings have to be placed from amidships.

There is only 1 crane on the berth and to work either of the end hatches a shift would be necessary. Work was continuous while the vessel discharged her part cargo at Kantvik, and an out-turn rate of 100 t.p.h. was achieved.

Fresh water is readily available from the Jetty, and presumably, fuel could be obtained by lighter from Helsinki. Telephones in the dock offices are available for official use.

There is a bus service to and from Helsinki, the journey taking about 40 minutes.

AUTHORITY: Suomen Sokeri Oy.

PORVOO (Skoldvik): 60.18 N. 25.33 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Crews' Personal Effects Lists.
2 Stores Lists.
4 Cargo Manifests.
2 Bills of Lading.
Derat Certificate or exemption.
Ship's Register.
Tonnage Certificate.

PILOTAGE: Pilots (2) board 2 miles West of Kallbadagrund's lighthouse (60.01 N. 25.34 E.). Pilot station at Emasalo. When approaching communicate with Pilot on VHF Channel 16.

RESTRICTIONS: Vessels over 40 ft. draft are restricted by depth in Great Belt Channel, entrance to the Baltic where depth is 43 ft. Otherwise approaches to Porvoo are 44 ft. depth. In bad Winter, port may be closed by ice between January and April although normally kept open by ice-breakers.

MAX. SIZE: Up to 140,000 d.w.t. Max. draft 45 ft. (13.5 m.).

HEALTH: Bill of Health not required. In case suspected disease or fever on board, radio Agent full details before arrival to advise Port Health Officer in advance.

RADIO: Helsinki Radio, call sign OHC A1 transmissions; OHG A3 transmissions. VHF Channels 16, 26 and 28.

"Neste" harbour office, VHF Channels 9, 13, 16 and 21.

TUGS: 1 tug 2,900 h.p. available. Other tugs stationed at Helsinki. Ship's lines are used.

BERTHING: Neste Oy Oil Terminal: No. 1 berth, T-head jetty, depth 41 ft. 6 in. alongside. No. 4 berth, T-head jetty, depth 46 ft. alongside. No. 5 berth, T-head jetty, depth 26 ft.

DENSITY: Fresh water.

MEDICAL: Doctors and hospital facilities available.

FRESH WATER: Available at berths.

FUEL: Available.

DISCHARGING/LOADING RATES:

No. 1 Jetty	Discharging	8,000 t.p.h.	(Crude oil)
	Loading	3,000 t.p.h.	(Fuel oil)
		1,500 t.p.h.	(Clean products)
No. 4 Jetty	Discharging	8,000 t.p.h.	(Crude oil)
	Loading	3,000 t.p.h.	(Fuel oil)
No. 5 Jetty	Loading	800 t.p.h.	(Fuel oil)
		800 t.p.h.	(Clean products)

BALLAST: A flow of 8,000 tons of oily ballast water can be fed to the water-cleaning systems of the refinery, with a flow rate of 1,000 cu.m. per hour.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine or spirits for each man.

TIME: GMT plus 2 hours. No alterations during the year.

AUTHORITY: Harbour Master.

RAAHE (LAPALUOTO): 64.41 N. 24.29 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when passing breakwaters if not ordered to anchor near Raahe Lighthouse by Port Authority.

DOCUMENTS:
Crew Lists.
Passenger List.
Ship's Register.
Custom List.
Provisions List.

PILOTAGE: Masters to contact Pilot station and pilot boat, VHF Channel 16. Pilots board and disembark by pilot cutter (red) near Raahe Lighthouse (Lat. 64° 39′ N., Long. 24° 13′ 5″ E.). Day and night service.

ANCHORAGE: Vessels can anchor outside Raahe Lighthouse, depth 15-20 m. No anchorages inside breakwaters.

RESTRICTIONS: No restrictions night entry.

MAX. SIZE: Lapaluoto Harbour, draft inside 18 ft., outside 22 ft. Length up to 140 m.

Rautaruukki Oy Harbour; draft 24 ft. 8 in., length up to 360 m.

Ore Harbour, draft 22 ft.

RADIO: Helsinki Radio, 2182 kHz, call sign OHG, Mariehamn Radio, 2182 kHz, call sign OFH; Vaasa Radio 2182 kHz, call sign OFW.

RADAR/VHF: No port radar services. Pilot station. Radio, 2182 kHz, VHF Channel 16. Rautaruukki Oy Harbour Office, VHF, Channel 16 and tugboat "Rautalouto" VHF, Channel 16.

TUGS: Tug *Rautaluoto* 600 h.p.

STEVEDORES: Rautaruukki Oy, in Steelworks Harbour; other private firms.

SPECIALISED CARGO HANDLING FACILITIES: Lapaluoto Harbour, no shore cranes, Ore Harbour (Helmi), only conveyor. Rautaruukki Oy Harbour, import quay equipped with two 12.5-ton shore cranes and conveyor; export quay equipped with two 12.5-ton shore cranes, straddle carriers and equipment for handling steel and general goods. Max. lifting capacity 24 tons.

LIFEBOAT STATION: Lifeboat cutter "Niilo Saarinen", 360 h.p., 10 kts. Radio 2182 kHz, VHF Channel 16, Radar, fire and drainage pump 4,000 lit/min. Alarm through National Lifeboat Service, Pilot or Police Stations.

DENSITY: Average density 1002.

FRESH WATER: Available from Rautaruukki harbour.

FUEL: Small quantities available, one day's notice required.

FIRE PRECAUTIONS: No special precautions in Lapaluoto Harbour.

GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally by the crew.
CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.
IDENTIFICATION CARDS: Not required.
CONSULS:
Denmark 31146 – 37269
Norway 31146 – 37269
Sweden 37300 – 37007
REPAIRS: Raahe Oy, Mechanical Workshop. Slip for small ships.
DRY DOCKS: None.
AIRPORT: Oulunsalo Airport, about 60 kms. from Raahe.
TIME: Local time is GMT plus 2 hours.
HOLIDAYS: New Year's Day; Twelth Night; Good Friday; Easter Monday; Labour Day (1st May) holiday when no work takes place; Ascension Day; Whitsun Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Police 38063; Ambulance; Fire and First Aid 005.
GENERAL: Government ice-breaker assistance available when needed.
AUTHORITY: Port of Rautaruukki Oy, Port of Raahe (Lapaluoto).

RAUMA: 61.08 N. 21.30 E.

PORT LIMITS: Southern entrance port limit when passing Tankar, northern entrance port limit when passing Riskonpoella.
DOCUMENTS: 2 Crew Lists and 1 Passenger List. Ship's Register, Customs Documents, Ship's Papers etc. (Ship's Agent will give the necessary advice).
PILOTAGE: Pilot station at Kylmapihlaja-island, Lat. 61° 08′ 7″ N. Long. 21° 18′ 4″ E. International Pilot signals, VHF Channels 16 and 13. Fairways Santakari 17 ft.; Valkeakari 24 ft.; deep passage 28 ft.
ANCHORAGE: Ample area for anchorage in Archipelago.
RESTRICTIONS: Entrance channel for 24 ft. maximum draft usable in all conditions, the 28 ft. channel to be used in daylight only. Harbour open all year round.
MAX. SIZE: Draft limit only.
HEALTH: Event any suspect contagious disease ask for orders by wireless. Port Regulations do not allow such a ship to come alongside or even closer than 350 yards. Pilot must not leave ship before allowed by the Doctor. Pilot does not board an infected ship but ship piloted to safe anchorage by pilot boat.
RADIO: Helsinki Radio, Hanko Radio, Mariehamn Radio.
VHF: Rauma VHF Channels 26 and 28, Channel 16 used for calling Pilot, tug etc. Channels 13 and 12 for further operations.
RADAR: When required pilot station radar used for advising Pilot onboard.
TUGS: 1 port owned tug 1,260 h.p. Usually one extra tug of 1,160 h.p. or 600 h.p. available but not guaranteed. An early notice recommended if more than 1 tug needed.
BERTHING: Hakuni outer quay 270 m., depth 22 ft. used for loading forest products. Central quay 410 m., depth 22-24 ft. used for forest products loading and discharging bulk cargoes. Laitsaari quay 300 m. (165 m. ready, 135 m. under construction) 28 ft. paper loading. Inner harbour 300 m. 13-16.75 ft. timber loading.
Chemical quay one berth 16.75 ft. liquid prod. load/discharge.
Oil quay one berth 24 ft. oil load/discharge.
CRANES: Central quay two 6 tons; one 5 tons; two 3 tons. Five mobile cranes 5-30 tons, available.
STEVEDORES: 24 hours notice to Agent recommended.
SPECIALISED CARGO HANDLING FACILITIES: 400 m. berth specially equipped for handling bulk cargoes, mainly china clay, sulphur, coal, etc.
No special equipment for containers, but smaller containers can be handled by harbour cranes.
Good berths for roll-on/roll-off traffic.
Different kind of liquid chemicals can be handled in special berth.
MEDICAL: Advance notice recommended if possible. Hospital available (231 beds).
TANKERS: One berth, draft 24 ft. 15 in. cargoline 1,500 t.p.h. slop discharge facilities by tank-trucks.
DENSITY: 1004-1003.
FRESH WATER: Fresh water available on quay. Charges depending on amount taken.
FUEL: Fuel brought by tank-trucks.
GANGWAY/DECK WATCHMEN: Available if wanted. Watchmen supplied by private company.
OPENING/CLOSING HATCHES: Performed by ship's crew or by Stevedores at request of ship.
CUSTOMS ALLOWANCES: Tobacco: 6 day's ration (about 200 cigarettes or 200 gr. tobacco). Wine and/or Spirits: 1 opened bottle of wine or liquor, subject to Customs Regulations.
CARGO GEAR: Central quay shore gear available other quays mobile gear or ship's gear.
CONSULS: Denmark, Norway and Sweden.
REPAIRS: All types available.
DRY DOCKS: Rauma-Repola Oy: Dry dock 505 ft. 9 in. by 70 ft. 4 in. by 24 ft. 7 in. all sorts of repairs Hollming Oy: Slipway for ships up to 600 d.w.t.
SURVEYORS: Ship's Agent will give advice.
REPATRIATION: Repatriation and signing on or off.
AIRPORT: Pori – airport 50 km. away. Regular connections.
TIME: Local time is 2 hours ahead of Greenwich (Long. 30° E.).
HOLIDAYS: See "Turku".
POLICE/AMBULANCE/FIRE: Police, 002 and 003; Ambulance, 006; Fire alarm, 005.
TELEPHONE: Oil quay only, connection Fmk 25.00.
SERVICES: Compass adjusting facilities and compass adjusters.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Normally no identification card needed but passport or seaman's book preferable.
DEVELOPMENTS: New 29.5 ft. entrance channel under construction, plans for new berths with equal depth made.
DELAYS: No delays in berthing, loading and discharging weather permitting.
AUTHORITY: Traffic Manager and Harbour Master.

SAIMAA CANAL AND PORTS IN LAKE AREA OF SAIMAA

APPROACH CHANNELS: The canal can be reached from the international waters of the Gulf of Finland through an approach channel South of Someri. The channel passes the Island of Vihrevoi and continues, at the Island of Malyj Vysotski, as the Vysotski-Viipuri Channel, from which the approach channel departs at a distance of 10 km. from Malyj Vysotski. The length of the approach channel from the point of departure to the Brusnitchnoe Lock is 14 km. The distance from the international water area to the Island of Vihrevoi is 94.5 km. and the length of the section Vihrevoi-Malyj Vysotski 12 km. The total length of the channel from the territorial waters of the Soviet Union to the Brusnitchnoe Lock is thus 131 km.

From the territorial waters of Finland the canal may be reached through the so-called coastal channel starting from the Finnish border at the island of Santio and joining the above sea channel at the Island of Vihrevoi. The length of the channel from the border to Vihrevoi is 49 km. and the overall length of the Brusnitchnoe Lock is 85.5 km. The channel and its refuge harbours have been marked on the Soviet sea charts. Nos. 1131 and 1132 and on Finnish charts Nos. 11 and 12. The coastal channel may only be used by Finnish vessels while vessels of other nationalities must use the sea channel, except for foreign tugs.

Canal: The length of the canal on the Finnish side of the border is 23.3 km. and that of the part on the Soviet side 19.6 km. The overall length of the Saimaa Canal is thus 42.9 km. The average difference in the height between Lake Saimaa and the Gulf of Finland is 75.6 m. The canal has 8 locks, the heights of fall of which range between 5.54 m. and 12.69 m. Earth transports will use the 7 moving bascule bridges and the 6 stationary bridges across the canal.

SEASON AND HOURS: The natural open-water season of the Saimaa Canal lasts an average of 211 days. In mild Spring and Autumn seasons the open-water period lasts 225 days. Since most vessels using the canal have been strengthened for navigation in ice, a season of navigation of almost 8 months will probably be normal every year. The season begins at the turn of April-May and ends in mid-December. The locks of the canal are provided with ice-melting equipment and they will not form an obstacle for lengthening the season of navigation. On the other hand traffic will be obstructed by freezing of the water system of Saimaa and by pack ice formations in the bottom of the Gulf of Finland. As to the water system, the farther North one goes the earlier will the waters of Lake Saimaa freeze in Autumn and the later will the ice melt in Spring.

The opening and closing of the season of navigation on the canal are decided each year by the Finnish and Soviet Canal Delegates. The closing date of the canal will be announced in the daily papers of Helsinki and Lappeenranta not later than 7 days before the day of closing, but for the opening day 1 day's notice is given.

During the season of navigation the Saimaa Canal is kept open throughout the day. The administration centre of the canal will be on continuous duty.

PILOTAGE: Pilotage in the Soviet area on the sea channels between Vihrevoi-Brusnitchnoe and on the coastal channel between the border and Brusnitchnoe is carried out by the Soviet Pilot Service. All vessels must use a Pilot on these channel sections.

Pilotage on section Brusnitchnoe – mouth of the Saimaa Canal on Lake Saimaa (or Lock of Malkia) is carried out by canal Pilots submitted to the Canal Office. Pilotage is normally carried out in two parts, on section Brusnitchnoe – the Lock of Palli and on section the Lock of Palli – the mouth of the canal on Lake Saimaa. All vessels, excluding Finnish small vessels and floating objects less than 25 m. in length, shall use a Pilot when proceeding through the canal. The Canal Office may grant upon application a Master of a vessel the right to navigate his vessel on the canal without a Pilot provided that the Master of the vessel has passed an examination of the Canal Office. In navigation from the Gulf of Finland the Pilot must be ordered from the Viipuri Section of Inflot 12 hours before the arrival at the point where the Pilot is taken on board. The order must be checked 2 hours before the start of pilotage. To avoid excessive work by the Pilot Service and to eliminate delays special attention is to be given to the accuracy of the time the pilotage is to be started, particularly in the last notifications.

In navigation from Lake Saimaa the Pilot must be ordered from the Canal Office 12 hours before entrance into the canal. The order must be checked 2 hours before pilotage is to be started. In navigation from the Gulf of Finland a canal Pilot need not be ordered separately. Similarly, a Soviet Pilot for the approach channel need not be ordered separately when the vessel proceeds from Lake Saimaa. These orders will be placed by the Finnish and Soviet authorities concerned.

Pilotage in the water system of Saimaa is carried out by Pilots of the National Board of Navigation in Finland. The order for Pilots shall be made in good time to the Pilot station of Lauritsala.

MAX. SIZE: The canal can be used by vessels with dimensions not exceeding the following:

Length	82.0 m.
beam	11.8 m.
draft	4.35 m.
height of mast	24.5 m.

The draft of a vessel in tow, however, shall not exceed 4.3 m. For vessels larger than those mentioned above, a permit for navigation on the canal may be granted upon application by the Canal Office of the Saimaa Canal.

Permits may be granted to vessels the dimensions of which do not (at least considerably) exceed the following:

Length	82.0 m.
beam	11.8 m.
draft	4.4 m.
height of mast	24.5 m.

and which also as to their structures and properties are suitable to navigation on the canal. The permit may contain regulations concerning the structure or equipment of the vessel or special provisions pertaining to navigation of the vessel on the canal such as good manoeuvrability, liability to wait or speed restrictions.

The Canal Office of the Saimaa Canal may also grant a vessel or equipment with slightly larger dimensions, carrying exceptional cargo, a Trip Let Pass for one passage through the canal.

The Rules and Regulations for Traffic on the Saimaa Canal also contain more detailed directions – among others on the permissible dimensions of vessels in tow and timber rafts using the open canal sections.

NEW VESSELS: When designing new vessels, to be used also in traffic through the Saimaa Canal, the designers are advised to consult the main dimensions and the structure of the vessels with the canal authorities. The conditions of navigation in the canal depend, first of all, on manoeuvrability, though certain other factors are also important. Vessels suited to canal and inland water traffic may be constructed slightly longer and wider than permitted at present on the canal.

MAXIMUM PERMISSIBLE SPEED AND TIME OF PASSAGE: The highest permissible speed on the actual channel of the Saimaa Canal is 9 km/hr. and on the lake channels of the canal 15 km/hr.

The Canal Office has the authority to issue regulations permitting higher speeds, principally for small vessels. The time of passage through the part of the canal provided with locks (mouth of the canal on Lake Saimaa-Lock of Brusnitchnoe) is 6–8 hours depending on waiting time at locks caused by heavy traffic volumes, and on size of vessels.

The average speed on deep-water channels on Lake Saimaa is estimated to be 18 km/hr.

SIGNS AND SIGNAL LIGHTS: The sign system of the approach channel of the Saimaa Canal, the canal and the channels on Lake Saimaa is adequate to ensure safe navigation throughout the day, also at night and in poor visibility.

The approach channel is provided with beacons, light buoys and signs in accordance with the lateral system. The signs have been erected by Soviet authorities. The illumination and the signalisation systems of the Saimaa Canal are based on the same principles with beacons and signs, but in the signal system of the canal, sign lanterns, signboards, line markers, water traffic signs and radar reflectors have been used. The colour of sign lanterns is orange on the West bank and green on the East bank of the canal. In marking of the lake channels of Saimaa according to the cardinal system, leading and warning lights, light buoys, range beacons, landmarks and signs have been used. Information of the marking of the water system of Saimaa has been issued as a booklet by the National Board of Navigation in Finland: "Sisavesistojen loistot I 1968" – "Beacons of Inland Water Areas I 1968".

RADIO: There are two radiotelephone networks for marine use in the sphere of influence of the Saimaa Canal. On the frequency of 160 mHz reserved for actual marine radio communications there are also the Pilot radiotelephone and the public radiotelephone networks.

The Pilot radiotelephone network covers all stationary radiotelephone equipment at all locks, on the Kansola Bascule Bridge, at Pilot stations and in the traffic office in the administrative building at Mustola as well as portable radiotelephone apparatus used by canal Pilots. The radiotelephone equipment of the canal Pilots operate on Channel 11 of the international marine radio. The telephone of the Brusnitchnoe Lock and the radio telephone in the Administrative Centre of the canal are also provided with a general calling and safety Channel 16.

When approaching from the sea the vessel makes a radio contact with the Brusnitchnoe Lock by using Channel 11. After this all radio communications required by navigation on the canal also use Channel 11. On Lake Saimaa, radio communications move over to Channel 13 on which the traffic office of the Saimaa Canal and the Pilot station of Lauritsala are also able to operate.

The general radiotelephone network on Lake Saimaa (the so-called Saimaa Radio) uses Channels 23–28 of the international marine radio. The network covers the entire region of the water system of Saimaa extending from Lappeenranta to Iisalmi and Lake Pielinen. Channel 24 is the calling channel of the Saimaa Radio.

Two marine radio stations for general traffic have been built at Nuijamaa and Virolahti especially for navigation on the Saimaa Canal. Both radio stations are on duty and they are remote-controlled from the Coast Station of Kotka. The stations have the calling and safety Channel 16 and a calling Channel 24 for public traffic. The Nuijamaa Station operates on Channel 28 and the Virolahti Station on Channel 23. The range of the Nuijamaa Station extends from South of Viipuri to Southern Saimaa and the range of the Virolahti Station covers the entire Bay of Viipuri. The stations can be called either on Channel 16 or on the operating Channel. The Kotka Radio calls vessels either on Channel 16 or 24.

The principal purpose of both the Saimaa and the Kotka Radios is to ensure the communications of the safety service of navigation. These stations may also be used to transmit calls to the public telephone network – also to foreign countries – or vice versa, to receive calls from the public telephone network.

AUTHORITIES: Board of Management of the Saimaa Canal, Lappeenranta.

Viipuri section of Inflot. Vyborg, USSR.

National Board of Public Roads and Waterways in Finland. Waterways Department, Helsinki.

THE HARBOURS OF THE LAKE AREA OF SAIMAA:

Mustola Harbour: Situated between Mustola and Soskua locks in the Saimaa Canal:

4 quays, 80 m. each. Draft alongside 4.2 m. Roll-on/Roll-off facilities are provided. 1 Coles mobile diesel electric crane: arm 9.14 m., reach of arm 3.66 m., lifting capacity 35 tons. Arm 18.3 m., reach of arm 18.3 m., lifting capacity 4 tons. Grab of capacity 2,500 litres or 1,250 litres can be installed. Possibility to hire further mobile cranes.

Lappeenranta Passenger Harbour: Situated in Saimaa Lake at Lappeenranta town:

New concrete quay with passenger terminal. Draft alongside 4.2 m. Room for 2 ships with a draft of 4.2 m. and for 3 ships with a draft of 3.0 m. Pilotage distance from canal entrance 6 nautical miles.

Kaukas Oy Pulpmill Factory Discharging Place:

Draft alongside 4.2 m. (unofficial). Mobile crane for discharging wood into water. Pilotage distance from canal entrance 1.5 nautical miles.

Enso-Gutzeit Oy Paper Mill Quay: At Imatra Kaukopaa:

Length of quay 70 m., draft alongside 4.2. m. Pilotage distance from Canal entrance 25 nautical miles.

Joensuu Town Harbour (Ukonniemi):

Length of quay 140 m., draft alongside 4.2 m. Pilotage distance from canal entrance 38 nautical miles + 45 nautical miles + 60 nautical miles + 44 nautical miles.

Savonlinna Town Harbour (Haislahti):

Length of quay 80 m., draft 4.2 m. No cranes. Pilotage distance from canal entrance 38 nautical miles + 45 nautical miles.

Ristiina Harbour:

Quay can accommodate 1 ship. Permissible draft 4.2 m.

Oy Wilh. Schauman Ab Paaskylahti Harbour at Savonlinna is planned. Quay will be built to accommodate 1 vessel.

Kuopio Oil Harbour:

Harbour located at Kelloniemi in Kuopio Town close to Oy Esso Ab storage in rock. Harbour is owned and built by Oy Esso Ab.

One of the two planned berths for ships is completed. The harbour is provided with oil discharge equipment. Permissible draft 4.2 m.

Kuopio Town Harbour (Kumpusaari):

Berth for 1 dry cargo vessel and 1 tanker. Permissible draft 4.2 m.

Varkaus (Ahoniemi Oil Harbour):

Harbour is located on the East bank of the Southern entrance fairway about 6 km. from the centre of the town. There is room for 1 ship; permissible draft 4.2 m.

Varkaus:

Harbour located at the South end of Taipale canal at Westbank. The Harbour is not built for a harbour but as waiting berth for ships passing Taipale canal. 1 ship can be berthed and permissible draft is 4.2 m. There are no warehouse and loading equipment, but A. Ahlstrom Osakeyhtio is using the berth for shipping paper to England. Loading is effected by the factory's labour and machines. Goods are transported to the port by lorries.

TOLKKINEN (Tolkis): 60.20 N. 25.35 E.

PILOTAGE: Pilot arrives from port station at Emsalo (tel. 911-27710). Station equipped with VHF, radiotelephone and radar. Pilotage distance to port 22 miles.

APPROACHES: Max. draft of fairway from sea, 23 ft. 8 in.

TUGS: One tug available, 350 h.p.

BERTHING: Tolkis Cellulose Quay, depth 23 ft. Tolkis New Quay, depth 17 ft. Oil Harbour (see "Skoldvik").

CRANES: Tolkis New Quay equipped with 2 movable cranes. Lifting capacity 2.5 tons. with grabs.

DENSITY: 1004.

FRESH WATER: Available by lorry. Minimum quantity 5 tons.

TORNIO: 65.51 N. 24.09 E.

The outharbour of Tornio is Roytta situated about 6 miles S.W. of Tornio.

DOCUMENTS:

2 Crew Lists.
2 Provisions Lists.
Passenger List.
One set of Bills of Lading, Ship's Papers, Health Documents.

PILOTAGE: AJOS pilot station VHF Channel 16. Pilot to be taken on board by lighthouse "Kemi 2" in position 65° 30.3′ N., 24° 22.5′ E., 10 miles from Ajos.

ANCHORAGE: In Roads, depth is 24 ft.

MAX. SIZE: At same time there can be 2 vessels of 100-120 m. length, draft 21 ft.; 2 vessels of 50-60 m. length alongside Main Quay; and 2 vessels of 50-60 m. length, draft 14 ft. at Old Quay.

RADIO: Vaasa Radio/OHX or Harnosand Radio, Sweden/SAH.

TUGS: No tug available at Tornio. to be ordered from Kemi 12 hours before.
CRANES: Three 20 ton mobile cranes for general cargo and several cranes for discharging bulk cargo.
STEVEDORES: Ordered by Agent (Telex 32-512). Agent must be given 24 hours ETA. Normal working time 0700-1100, 1200-1600 hrs. Warning for overtime must be given before 1100 hrs., the final confirmation before 1400 hrs.
DENSITY: 1000.
FRESH WATER: Fresh water can be delivered by tank lorry (8 tons).
FUEL: Ordinary fuel by lorries from Kemi.
OPENING/CLOSING HATCHES: By the ship's crew.
CUSTOMS ALLOWANCE: 100 cigarettes or 100 grams tobacco and 1 bottle spirits.
CONSULS: France tel. 40473; Sweden tel. 41751; Norway 14411.
REPAIRS: No docks but accommodation for small repairs.
AIRPORT: At Kemi, 20 km. from Tornio; served by Finnair.
TIME: GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police 003; Fire 005; Ambulance 006 and 40428; Salvage 47472.
AUTHORITY: Tornion Satamakonttori.

TURKU (Abo): 60.27 N. 22.15 E.

DOCUMENTS: See "Oulu".
PILOTAGE: Telegram to Agent with 24 hours ETA to Sea Pilot station (State Pilots) Uto, contact Pilot station via Hango Radio or at shorter distance by VHF. Coastal Radar service available. When approaching port ETA by VHF to Port Information Centre, international Channel No. 12 for Harbour Pilot. Cutter whilst in action, same channel, but takes orders from Information Centre only.

Pilot cutters painted red with white circular field marked "L" on the bows. Flying flag in daylight, showing red and white lights vertically at night. Coming out when required to Pilot station 0.75 mile from Main Harbour. Call signals: International flag "G", at night 3 long blasts. No special boarding measures. All ships arriving from sea will get necessary information from Sea Pilot, whose service is compulsory. Harbour Pilot not compulsory.
ANCHORAGE: Outer anchorage at Bay of Airisto, 2 miles from Port, 15-18 m. In practice all ships taken into port without anchoring or waiting.
MAX. SIZE: Maximum draft in Commercial Harbour 30 ft. fresh water. In Oil Harbour 29 ft. 6 in. fresh water. Length and breadth of minor importance. No tides.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise, ask Agent.
RADIO: Hango (Hanko) radio and Mariehamn Radio. In addition these have telephone and VHF service. Local telephone network on VHF Channel 26.
TUGS: Off Harbour Pilot station Pikisaari/Beckholmen, further out on application. Advisable apply for tugs in advance. 4 tugs available.
BERTHING: Priority given to arriving and departing passenger ships on regular lines. 6 hydraulic stern loading roll-on/roll-off berths and 3 without hydraulics..

Total length of quays 4,896 m.

Canal Bank quay	Depth 27 ft.
West quay	Depth 30 ft.
Coal quay	Depth 18 ft.
Oy Wartsila A/B	Depth 18 ft.
Linnanselka/Slottsfjarden quay	Depth 27 ft.

Container facilities available.
CRANES:

DENSITY: 1004.
STEVEDORES: Agent should be well informed about ETA and Master's Requirements. Normal working hours: 0700–2230 hrs.; Saturdays and days preceding public holidays 0700–1430 hrs. The Post Office: 0900–1600 hrs. Saturdays and days preceding public holidays 0900–1400 hrs.
MEDICAL: All medical and hospital facilities available. No special requirements regarding inoculations, etc.
TANKERS: No special requirements. Small slop discharge facilities. 1 berth, depth 29 ft. 6 in. for larger ships.
FRESH WATER: From pipe-lines along berths. Price approx. 5 fmk. per ton.
FUEL: Most grades available. No advance notice neccessary if ex. motor vehicles. In case of greater quantities: from Oil Harbour only. This requires advance notice to Agent.
DEVELOPMENTS: Entrance channel to Main Harbour is now dredged to 33 ft. Container Harbour being built. Outer Harbour planned. Recent acquirement: one 60-ton moveable electric quay crane. Draft alongside 30 ft.
GANGWAY/DECK WATCHMEN: Gangways to be rigged out so that they do not obstruct quay crane movements. Watchmen customary, but not necessarily hired.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
IDENTIFICATION CARDS: Not needed.
CONSULS: The following countries are represented by Consuls or vice-consuls in Turku: Austria, Belgium, Denmark, France, Great Britain, Greece, Honduras, Iceland, Italy, Norway, Portugal, USSR, Spain and Sweden.
REPAIRS: All types of repairs possible.
DRY DOCKS: Graving dock: length 600 ft. (183 m.), width of sluice gate 85 ft. (26 m.), depth on sill 26 ft. 3 in. (8.0 m.).

Floating dock: lifting capacity 4,000 tons, max. length of ship 358 ft. (109 m.), inner width 59 ft. (18 m.) max. draft 16 ft. 6 in. (5.0 m.). By agreement the shipyard's 80-ton crane can be used in port traffic if such is needed. Tel. 359 500, Telegrams "Wartsila". Telex 62-228.
REPATRIATION: Yes, good connections everywhere.
AIRPORT: 4 miles from port, regular lines.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: New Year's Day (January 1st); Twelfth Night (January 6th); Good Friday; Easter Bank Holiday; Midsummer Day; All Saints' Day; Independence Day (December 6th); Christmas Day; (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire 005; Police 002; Ambulance 006.
GENERAL: Ice-breakers maintain Winter traffic. 2,000 and 800 h.p.
TELEPHONES: Ships' telephones available.
AUTHORITY: Kanavaniemi, Turko/Abo.

UUSIKAUPUNKI: 60.48 N. 21.24 E.

APPROACHES: 3 fairways lead to harbour through sheltering archipelago; Uto-Uusikaupunki, 78 miles; Isokari-Uusikaupunki, 13 miles; Kylmapihlaja-Uusikaupunki, 24 miles.

Good sheltered anchorage in the roads. Depth of fairways 9 m.
DOCUMENTS:

Agent will prepare during clearance:
2 Ship's Report.
1 Declaration List, arrival (Board of Navigation)
1 Declaration List, Departure (Board of Navigation)
To be prepared before Arrival:
2 Provision Lists (own provision of the ship)
2 Special Lists (must be signed by each member of the crew)
2 Crew Lists
Bill of Admeasurement
Certificate of Registry
Ice-class Certificate (during Winter months, 1st December-30th April, issued by hull surveyor)
Bill of Beaconage (issued by Customs).

PILOTAGE: Embark Pilot at Isokari or Uto Pilot stations. Distance through archipelago Isokari-Uusikaupunki 13 miles, Uto-Uusikaupunki 78 miles. Under normal circumstances first fairway recommended. During Winter months, if ice-situation difficult in Gulf of Bothnia, traffic goes via Uto.

Both pilot stations equipped with radio 2182 kHz, Channels 16 and 24, VHF duplex-Channels 18, 20 or 22 and radar. Pilot-boat red, with letter "L" and fitted with VHF Channels 13 and 16. Pilot boards usually between Sandback-Isokari, to where "Hauteri" light leads in line 134.5°-314.5° (T). Notice of ETA at least 4 hours prior reaching station.
ANCHORAGE: Many areas of safe anchorages in Archipelago. Pilot advises.
RESTRICTIONS: No entry restrictions. No tide. During North and East winds sea-level can fall about 40 cm. below normal, which may sometimes delay deep loaded vessels reaching port.
MAX. SIZE: Longest quay 180 m. depth alongside 9 m.
HEALTH: Pratique not necessary. In the event of any disease/fever on board or in last port of departure, vessel has to inform before arrival, hoist quarantine-flags, or in darkness 2 lights, red light above white, showing all round horizon.
RADIO: Mariehamn Radio OFH; Helsinki Radio OHG.
TUGS: 2 available; normally tugs join vessel at port, ship's lines used.
BERTHING: *Kemira Quay:* 180 m. long, owned by fertiliser factory Kemira Oy, has depth 9 m. alongside, two 8 ton cranes, two discharging pipes, one for discharging ammonia at minus 32° C. and one for sulphur acid. Discharging capacity depending material 140-170 tons/hour/crane and loading/discharging bags 45-50 tons/hour/crane.

Esso Quay: 40 m. long, owned by Oy Esso AB, depth in channel and alongside 5 m. Terminal is used for discharging LP gas.

Telakka Quay: 140 m. long, owned by Uudenkaupungin Telakka Oy, has depth alongside 5 m. Quay is only used for ship repairs, and fitting works for new buildings. There is also a floating dock with 5,000 ton capacity.

Hepokari Pier: 90 m. long and 18 m. breadth, owned by town. Channel and alongside depth 7 m. There is terminal on South side for Ro-Ro traffic.

Saunasilta Quay: 60 m. long and depth 3.5 m., owned by town. Used only by small coasters.
STEVEDORES: Available. Contact Agent.
MEDICAL: Hospital facilities, vaccination, certificates, etc., available. Contact Agent.
TANKERS: For discharging liquid ammonia, diameter lines 6 and 10 in.

DENSITY: No tide, density 1004.
FRESH WATER: Water-hoses, about 20 t.p.h.
FUEL: Fuel available, contact Agent.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
SHIP CERTIFICATES: All certificates according to International Convention for the Safety of Life at Sea, Class Certificate, etc.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per each member of the crew. Wine and/or Spirit: 1 bottle wine or spirit per each member of the crew.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Uudenkaupungin Telakka Oy has a floating dock, lifting powers 5,000 tons, draft 6.1 m., breadth 19.6 m., and length 130 m.
REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.
AIRPORT: Distance to Turku Airport about 90 km. Airport is served by regular Airlines.
TIME: GMT plus 2 hours, no alterations during the year.
HOLIDAYS: Official Holidays are: New Year's Day (January 1st); May 1st; Midsummer Day (Saturday between June 20th and June 26th); Independence Day (December 6th). Usually no work on those days.
POLICE/AMBULANCE/FIRE: Police 002 or 3002; Ambulance 3005; Fire 005 or 3005.
TELEPHONES: Available.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Uudenkaupungin Satamatoimisto.

VAASA: 63.06 N. 21.36 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Customs Documents.
2 Health Documents.
5 Manifests.
5 Bills of Lading.

PILOTAGE: Compulsory for ships arriving from abroad. 3 Pilot stations: From S. = Ronnskar Pilot for ships draft 18 ft. to 26 ft. From S.W.-W. & N.W., Norrskar Pilot = 26 ft. From N. Ritgrund Pilot = 16 ft.

Pilot signals: Letter "G" as flag – light or sound. Radio telephone call: Pilots watching 24 hours on 2182 kHz, also VHF.

Pilot vessel: 30 ft. motor yacht with wheelhouse and radar. Hull red all over with letter "L" painted on bow.

Pilot vessel not cruising in open sea. Meets ship well outside Archipelago indicated on charts.

Harbour Pilot available in port from Vasklot Pilot Station. Tel. 12 496.

ANCHORAGE: In the area of port – outside breakwater about 2 miles W. of port of Vasklot. Elsewhere according to Pilot's advice.
RESTRICTIONS: No locks. Fairway lighted all the way.

No tide, but water level may be reduced by up to 20 in. in Spring and early Summer, or increased by 10 to 25 in. in Autumn.
MAX. SIZE: Depth alongside piers up to 26 ft. 3 in. At the Oil Harbour, max. recommended LOA is 610 ft.
HEALTH: See "Documents" – no restrictions. Hospital and Doctor for any purpose available.
RADIO: Vaasa Radio – OFW 2803 kc/s.
RADAR/VHF: No radar service in port area. Pilot vessels at sea Pilot stations equipped with radar; also Ronnskar Pilot station on same island. VHF radios on Pilot stations and harbour tug-boat.
TUGS: Harbour tug-boat and ice-breaker m/s *Vaasa* available 24 hours round. 650 h.p. Radio telephone/VHF – call signs OGWE. Charge according to size. Harbour tug also operating as salvage vessel in open sea.
BERTHING: 2 piers of 180 m. length and the Reins Quay of 240 m. length. Depth 26 ft. 3 in. There are three 5-ton cranes on the South Pier.

The Ferry Pier, 106 m. length, depth alongside 5.7 m. with berths for Ro-Ro traffic.

A new Ro-Ro berth for cargo vessels at South side of South pier with depth of 6.2 m. in operation.

The Oil Harbour is at Vasklot. Depth alongside 26 ft. 3 in. Tankers discharge through three arms of 500 m/m and 400 m/m diameter.
STEVEDORES: ETA as usual according to C/P to Agent, etc.
MEDICAL: If serious illness advance notice to Agent necessary. Coastguard has an aeroplane stationed at Vaasa; coast radio station will advise and arrange.
DENSITY: Nearly fresh water 1002-1004. No tide.
FRESH WATER: Available, no limit. Direct from quay-side, through pipes, rate about 25 t.p.h.
FUEL: All grades of bunker fuel available – direct from oil jetty or by lorries to berth.
FIRE PRECAUTIONS: Dry-cargo ships; no smoking in holds. Tankers: usual restrictions. Tankers with petrol cargo not allowed to berth at dry-cargo piers.
GANGWAY/DECK WATCHMEN: Not compulsory, ship's own crew can be used. Police watchmen available.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES:
Safety Equipment Certificate.
Stability Certificate.
Load Line Certificate.
Derrick and Hoisting Gear Test Certificate.
Derating Certificate.
Nationality Certificate.
Measurement Certificate.
Ice-class Bill.

CUSTOMS ALLOWANCES: Tobacco: Max. 200 cigarettes per man or 50 gr. of tobacco. Wine/Spirit: Maximum 1 bottle of each per man to be opened and used on board only.
CARGO GEAR: Cargo gear test book to be in order – all gear to be tested within a year otherwise risks for breaks in discharging/loading.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Belgium	Netherlands
Denmark	Norway
France	Sweden
Great Britain	

REPAIRS: Shipyard in Vaasa owned by Wartsila Oy. All deck and engine work can be carried out; slip for ships up to 1,500 d.w.t. Nearest dry dock Rauma. Harbour tug acting as salvage vessel, diver on board, all kinds of underwater cutting and welding, pumps, etc.
REPATRIATION: Can be carried out easily.
AIRPORT: Vaasa Airport (about 8 miles from town) served by regular airlines, domestic and abroad, Stockholm, U.K., Continent, etc.
TIME: Local time GMT plus 2 hours.
HOLIDAYS: Working hours in port: 0800-1200, 1300-1700 Monday-Friday, Saturday: 0800-1200. Sunday free. Working days in port: Monday-Saturday. Working days ashore: Usually Monday-Friday. All banks closed on Saturday. Shops open all weekdays. Other holidays: 6th December – Independence Day – Christmas, etc., as usual.
TELEPHONES: Can be arranged on board.
POLICE/AMBULANCE/FIRE: Tel. numbers Vaasa: Police 12 034, 12 374; Ambulance 005 12 641; Fire 005. Ambulance, aeroplane, coast guard: Vaasa 13 751, 14 859.
GENERAL: Ships approaching port of Vaasa in Winter time (January-May) when sea area icebound, have to call any of Government ice-breakers operating in area or to inform harbour authorities of exact ETA – engine power, size and nationality, and whether strengthened for ice or not. Call signs, etc., for Government ice-breaker can be obtained from nearest coast radio station.
SERVICES: Compass adjusting available.
DELAYS: Only Winter time when Government ice-breaker is arranging, waiting or assisting in outbound convoys of ships.
AUTHORITY: Harbour Master.

VALKO (Walkom): 60.25 N. 26.17 E.

PILOTAGE: Pilot arrives from Pilot station at Orrengrund (Tel. (915)–53334, radio telephone). Station equipped with radar. Distance to port 12 miles.
APPROACHES: Max. draft from sea to fairway 24 ft.
TUGS: 1 tug available, 200 h.p.
BERTHING: *Walkom Quay*:

New Quay, length 300 m., depth 24 ft. South Pier (outer side) length 140 m., depth 24 ft.

South Pier (inner side) length 105 m., depth 18 ft.
CRANES: 5 mobile cranes, lifting capacity 2–6 tons. 1 shore crane, lifting capacity 6 tons. 1 shore crane lifting capacity 5–25 tons.
DENSITY: 1003.

VEITSILUOTO: 65.42 N. 24.37 E. (See Plan)

DOCUMENTS: See "Oulu".
PILOTAGE: Inwards compulsory for vessel in foreign trade. Boarding at Kemi Lightship 17 miles S.S.W. of Kemi, and outwards at Ajos Pilot Station 4 miles S.S.W. of Kemi. Radio beacon at Ajos.
ANCHORAGE: Good holding ground in 3–4 fathoms of water half mile off-shore (inner roads) about 1 mile from Rautakallio, and by Koivuhauta 2 miles from harbour entrance.
RESTRICTIONS: Generally harbour open from latter part May until early December. No tide. Entry by day or night.
MAX. SIZE: See "Berthing".
HEALTH: See "Oulu".
TUGS: Available when required, charges according to net tonnage. Use ship's lines.
BERTHING: Length of Quay 552 m. plus Roll-on/Roll-off berth, depth 8.4 m., permitted draft 7.3 m.
STEVEDORES: Ordered by Agent, no ETA to stevedores necessary.
MEDICAL: Hospital at Kemi. Masters to advise if medical attendance required aboard.
FRESH WATER: Berth supply by shore installations.
FUEL: Ordinary fuel, diesel and gas oil. Deliveries by lorries only.
FIRE PRECAUTIONS: No special precautions. Company's fire-fighting corps.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed open and close.
IDENTIFICATION CARDS: Not required.
CONSULS: Norway and Sweden, others at Kemi.
REPAIRS: Available at Kemi.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Not normally expected.
AUTHORITY: Harbour Master.

Health Declaration.
Provision List.
PILOTAGE: Not obligatory for yachts. Port cannot receive pleasure boats longer than 40 m. Ensure pilotage authorities advised of ETA. VHF Channel 9 day and night.
ANCHORAGE: In winds of N.E. to S.E. anchorage in front of Antibes not advised. Recommended anchor in Bay de Golfe-Juan, in shelter of Cap d'Antibes, in direction of Juan-les-Pins. In winds from N.W. to S.W., good anchorages on East face of Cap d'Antibes, Bay of Garoupe, Bay of La Salis, Bay of Ilette.
RESTRICTIONS: Night entry not advised.
MAX. SIZE: For yachts in the old port, length 23 m., width 6 m., draft 3.5 m. For tankers, 1 berth only in tanker outer port. Max. length 110 m., draft 7 m.
TUGS: None.
TANKERS: A berth against dolphins, in Outer Port and strictly reserved for unloading refined fuels. See "Max. Size".
FRESH WATER: Oil companies have water point on berth in Outer Port.
FUEL: For pleasure boats only.
CONSULATES: None.
REPAIRS: For pleasure boats only. 2 slipways for boats of max. length 30 m.
REPATRIATION: Must be arranged through Consulates at Nice.
AIRPORT: Nice, Cote d'Azur. 15 km.
TIME: GMT plus 1.
POLICE/AMBULANCE/FIRE: Tel. Police 33.58.58 and 17; Ambulance 18; Fire 18.
SERVICES: Water and electricity on each pier.
AUTHORITY: Capitainerie du Port d'Antibes.

BASTIA: Corsica: 42.41 N. 09.27 E.

DOCUMENTS: See "Ajaccio".
PILOTAGE: Address, Vieux Port 20, Bastia. Tel. 315095. VHF Channel 16. Pilot boats, 12 m. long, black and white with navigation and pilotage lights. Previous advice to Pilots necessary before arrival. Pilot boards in bay of Porto Vecchio, North of the citadel.
ANCHORAGE: Anchoring not recommended in Easterly winds. Depth 15 to 30 m. in Porto Vecchio Bay. Bastia harbour: up to 4.50 m. deep.
RESTRICTIONS: Ships may enter harbour any time.
MAX. SIZE: Max. length: 160 m.; draft 7 m.
TUGS: None available.
BERTHING: Ships berth in order of arrival.
STEVEDORES: Mooring carried out by watermen. Same address as Pilots.
MEDICAL: Medical controls made by Customs officer. Doctor available.
BERTHING: Accommodation for about 10 ships. General Cargo.
FRESH WATER: Supplied ashore.
FUEL: Available in small amounts.
FIRE PRECUATIONS: General rules. One wharf reserved for tankers.
GANGWAY/DECK WATCHMEN: Night watchman supplied by Agent.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: None on entry, 10 packets cigarettes when leaving. Wine/spirits unlimited when leaving.
IDENTIFICATION CARDS: Required.
CONSULS: Nearest at Ajaccio.
REPATRIATION: No facilities exist.
AIRPORT: Bastia 20 km. from ports. Departures every day to continent.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 1881; Ambulance, 2281 733–2686; Firemen, 018-088.
TELEPHONES: As a rule telephone is put only on naval ships.
SHORE LEAVE: Crew may go ashore.
AUTHORITY: Department of Civil Engineering.
AGENT: See "Ajaccio".

BAYONNE: 43.30 N. 01.28 W.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Lists of Provisions on Board.
3 Individual Lists of Tobacco and Spirits.
3 Manifests of Cargo.
1 Set Bills of Lading.
PILOTAGE: Station extends 3 miles between the parallel of Ondres to the North and the limit of French territorial waters to the South. When weather permits, the pilot boat comes out of l'Adour and comes alongside ships near the light buoy situated W.N.W. of the port entrance. Contact Pilot at least 12 hours before arrival relaying through Bordeaux Arcachon Radio and stay on radio watch in the pilot zone.
ANCHORAGE: Ships must not anchor in the river.
RESTRICTIONS: In bad weather ships are led to take the Pilot at the pilot boat which is based on St. Jean-de-Luz and are led either towards l'Adour or to the anchorage of St. Jean-de-Luz.
MAX. SIZE: The Adour is accessible to ships of 160 m. length. Depth at the mouth varies with the seasons and are maintained by dredging. They are never less than 7 m. during Summer but during Winter can be reduced following Westerly storms. The height of the tide has to be added to these depths but the draft can never exceed 8.0 m.
HEALTH: A declaration of Health Form is lodged by the Customs Service on arrival; it must be completed by the Captain. In case of a suspect illness, advise Agent 24 hours in advance.
RADIO: Bordeaux – Arcachon Radio. The signal tower on the South side of the mouth, and the Harbour Master's Office, in the tower, has a VHF radio station.
TUGS: 1 tug available, 1,250 h.p., 10 tons bollard pull. Request for tug through the Agent. Tug waits at the entrance to the Adour.
BERTHING: When working berth is occupied, vessel is directed to a waiting berth. Large ships or those carrying dangerous cargo can be requested to wait outside the entrance.

Berth	*Max. Length Vessel*	*Recommended Draft*
Socadour	160 m.	25 ft.
Cement Wharf	160 m.	24 ft.
Satec Wharf	160 m.	24 ft.
Grain Silo	130 m.	24 ft.
SNPA Sulphur Quay	150 m.	25 ft.
Other berths	120 m	22 ft.

STEVEDORES: Arrival must be notified to Agent 24 hours in advance.
MEDICAL: Medical attendance can be organised by the Agent without advance notice, Hospital and private clinic available. However, if medical attendance required as soon as the ship arrives, particularly at night, it is advisable to send a radio message 12–15 hours before the arrival of the ship.
TANKERS: No installation to receive residues. Two berths for unloading of refined products. Refinery de Midi: max. length 120 m., max. draft 6 m. Total Oil berth: max. length 80 m., max. draft 5.7 m.
FRESH WATER: Available at each berth, minimum supply 3 cu.m.
FUEL: Available by arrangements in advance through Agent or suppliers.
GANGWAY/DECK WATCHMEN: Not obligatory except for ships with dangerous merchandise on board.
OPENING/CLOSING HATCHES: Generally carried out by the crew.
CUSTOMS ALLOWANCES: 200 grammes or 250 grammes of tobacco for each crew member and for 8 days (must without fail be declared in the individual list of provisions). 1 bottle of wine or spirits (must without fail be declared in the individual list of provisions).
IDENTIFICATION CARDS: Not necessary – seaman's identity card sufficient.
CONSULATES:

Belgium	Norway
Brazil	Peru
Chile	Portugal
Spain	Sweden
Finland	Uruguay
Great Britain	

REPAIRS: Running repairs to hull, machinery, radio, and radar can be effected.
DRY DOCK: Usable length 98 m. Length on stocks 94.1 m. Width of entry 15 m. Depth above sill, neap tides 4.5 m., spring tides 6 m.
REPATRIATION: Possible for all countries as well as crew changes.
AIRPORT: At Biarritz: 3 km. away. Regular service with Paris. Two services per week to and from London.
TIME: European Standard Time: GMT plus 1 hour.
HOLIDAYS: 1st January; Easter Sunday/Monday; May 1st; Ascension Day; Whitsun Sunday/Monday; 14th July; 15th August; 1st November; 25th December.
POLICE/AMBULANCE/FIRE: Police, telephone 17 or 25.50.21., Anglet: 17 or 25.94.24. Boucau: 17 or 31.80.37. St. Leon Hospital: 55.84.04. Fire Station: 18 or 25.21.84.
TELEPHONES: Telephones on board not possible.
SHORE LEAVE: Crew are authorised to go ashore.
AUTHORITY: Harbour Master.

BORDEAUX (inc. Verdon, Bassens, Ambes, Pauillac, Blaye): 44.50 N. 00.34 W. **(See Plan)**

DOCUMENTS:
Tonnage Certificate.
2 copies Provisions List.
2 copies Personal Effects List.
2 copies Crew List.
Customs Clearance.
Crew Manifests.

PILOTAGE: Vessels should announce their arrival at BXA Buoy at least 24 hours in advance to the Commandant du Port de Bordeaux through Coast Station Arcachon – Bordeaux Port Radio. In addition they should contact the pilot boat and confirm their ETA and speed 12 hours in advance The ship will be able to keep in touch with the pilot boat where radio watches are kept as follows.

1. On 500 kc/s (radio) and 2,182 kc/s (radiotelephone): permanent watches from 0800 to 1000 hrs. GMT. 1200 to 1400 hrs. GMT. 1600 to 1800 hrs. GMT. 2000 to 2200 hrs. GMT.

2. On 2,182 kc/s, a general RT call (both in French and in English) at the end of each radio contact with the Pilots' station at Le Verdon.

These contacts are made on 1743 kc/s at the following hours (GMT) 0030 – 0300 – 0500 – 0630 – 0717 – 0915 – 1030 – 1230 – 1430 – 1600 – 1715 – 2000 – 2124.

Upon request a special radio contact can be obtained at any time.

Under normal weather conditions, the pilot boat remains near the landing buoy and the West Channel entrance. In bad weather the Pilot is sent on board as soon as boarding becomes possible, usually around buoy No. 10.

Vessels less than 70 m. long, for which pilotage from the sea to Verdon is not compulsory, may embark river Pilot at Le Verdon providing Masters have advised the Pilot station accordingly. Pilots can be contacted on VHF Channels 12 and 16.

ANCHORAGE: The normal waiting anchorage area is the roadstead of Le Verdon, depth 10 to 12 m. and sand silt bottom. The big tankers with more than 10 m. draft find a good anchoring area in the Saintonge roadstead with a depth of 15 to 20 m. (sand silt bottom).

MAX. SIZE: Verdon Petroleum Harbour. Tankers up to 350 m. length or approximately 250,000 d.w.t. can be accepted, with 75% load.
Bec d'Ambes: Tankers up to 32 ft. 6 in. draft.
Pauillac: Tankers up to 34 ft. 6 in. draft.
Bassens: Vessels up to 32 ft. draft.
Blaye: Vessels up to 25 ft. draft.

RESTRICTIONS: The great entrance to the Gironde estuary (Western Entrance) is dredged to a depth of 13.50 m. under the zero of French sea charts. It permits the sailing in of ships with a draft of 15 m. (49 ft.) at practically all tides.
HEALTH: Vessel should ask for free pratique by radio at least 12 hours before arriving at port. Message should be addressed to Sanipor – Bordeaux routed via Bordeaux/Arcachon radio. Otherwise, pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.
RADAR/VHF: Port radar is in operation in the Gironde Estuary and approaches. Vessels may contact this station for navigation information by calling Verdon Port Radio on VHF Channel 14.
RADIO: Arcachon Bordeaux Port Radio: Radiotelephony 1,862 kc/s. Radiotelegraphy 421 kc/s.

Port Authority by VHF: Calling band 156.8 mHz Channel 16. Traffic band 156.6 mHz Channel 12 (port). Traffic band 156.7 mHz Channel 14 (radar).

Pilots: Telegraphy: watch on 500 kc/s at the prescribed hours. Telephony: continuous watch on 2,182 kc/s. VHF: continuous watch on Channel 16.

TUGS: Tug assistance is available as ordered by the Pilot. Tugs will join vessels at the following places: In Verdon Roads for vessels mooring at Verdon. In Pauillac Roads for vessels mooring at Pauillac. At Buoy BA1 for vessels mooring at Ambes. Off the Harbour Basins for vessels mooring at Bordeaux Docks.

As a rule ship's tow-lines are used; when a tug line is required there will be an additional charge.

BERTHING: *Le Verdon Deep Water Terminal:* 2 containership berths depth alongside 13 m. at low water; slip for quarter ramp ro/ros. (handling operations carried out 24 hours a day 7 days a week). 100 power points for reefer containers. Two container gantry cranes of 36 tons and 44 tons hoisting capacity. Two 24 ton cranes which can work in tandem.

Riverside Quays. 20 berths depth alongside 7.50 m.–9 m. at low water.

Enclosed Docks. 2 basins joined by a lock 25 m. wide. Entrance effected by two locks of the following dimensions: Large lock 152 m. long 22 m. wide. Small lock 136 m. long 14 m. wide. Depth of water in the basins is maintained at 7.50 m.

Queyries. 493 m. long, depths offered are 7–8 m. alongside.

Bassens-Amont. 770 m. long, depth alongside at LW. 10.0 m. (5 berths)

Bassens-Aval. 11 berths, total length 1,475 m. Depth alongside more than 9.50 m. at low water.

Blaye: Private berth for coasters. Public berth at present being renovated. Also private berth for tankers.

Pauillac: Public berth for vessels drawing up to 10 m. Total quay length 290 m.

TANKERS: *Verdon Terminal:* Main berth. The ship is berthed on elastic dolphins (steel pipes) with an available depth of 17 m. Ship makes fast with own hawsers on four mooring dolphins, two up and two down on the wharf and set back about 35 m. from the face. This mooring is strengthened by very flexible steel warp hawsers of 55 and 60 mm. diam. Five hawsers of this type may be placed at each end of vessel according to needs and weather conditions. Ships must have strong chain or claw-stoppers for turning on bitts.

For crude oil, the berths have following equipment: one 30 in. line connecting the main berth to storage; one 16 in. line connecting the coaster berth to the foresaid lines; 2 lines for bunkering.

Arms for connecting pipe-lines to ship. Connecting of the crude oil pipe-lines is made by ASA type, 16 in. Mannesmann arms (4 at main berth – 1 at the coaster berth). The Port Authority has a number of connecting collars in various dimensions and types. Ships are requested to inform before arrival on the type and data of their own collars. Connecting to the bunkering line is made by flexible hoses (ships must use their own handling gear).

Fire wire must be rigged on forecastle and poop, the eye 1 metre (3 ft.) above the water (all the time) when ship is light. Each fire wire must have a 10 metres (30 ft.) coil laying between bitts and fair lead.

If no other request, the ship is assisted by 2 tugs (with Kortnozzle 23 ton thrust) one of which stays at disposal during the call.

Secondary berth. This berth is for the use of shuttle-service ships, lighters and coasters, depth of 6.50 m. alongside.

Fire-fighting line. A 12 in. line supplies the wharf and the 2 berths with sea water under pressure. At each berth there are fire-fighting hydrants. The first help material for fire-fighting is ready to use at each call. It includes spray nozzles, water and foam hoses, emulsion liquid containers, powder extinguisher systems (movable and portable).

Bunkering. Supply is made by lighters mooring at the coaster berth. Tying lighters alongside tankers is forbidden, except with special permission of the Port Authority.

Telephone. Telephone is connected to every ship on arrival. In that way the ship is regularly connected to the French telephone network (tel. No. 596243 – Le Verdon).

Pauillac. Oil installation operated by Shell, 33 ft. alongside.

Ambes. Terminal for tankers up to 200 m. length, 32 ft. 6 in. draft. Operated by Societe Elf and Esso.

Blaye. Small tankers are accommodated at the private jetty of La Societe Total.

DENSITY: Verdon 1023 to 1015. Pauillac 1005 to 1000. Ambes approximately 1000. Bordeaux approximately 1000.
MEDICAL: All facilities available. Smallpox, malaria, and cholera vaccinations can be performed at the Military Hospital or at the Port Vaccination Centre.
DRY DOCKS: There are 3 dry docks and 5 small covered docks. Dimensions of the largest graving dock are 247 m. length 34 m. width 13.40 m. depth.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of alcohol per man.
IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.
AIRPORT: Situated 10 km. from Bordeaux. Frequent and Daily flights to most parts of Europe and North Africa. Good internal service.
POLICE/FIRE/AMBULANCE: Police 17; Ambulance 17; Fire 18.
TELEPHONES: Can be connected on board vessels moored at quays in Bordeaux, Bassens, Ambes, Pauillac, and Verdon.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

Le Verdon Container Terminal: Operational 24 hours per day, 365 days per year.
AUTHORITY: Port Autonome de Bordeaux.
AGENT: See "Paris".

BOULOGNE SUR MER: 50.43 N. 01.35 E. (See Plan)

DOCUMENTS: As for "Calais".
PILOTAGE: Compulsory for vessels over 60 m. length. Vessels can communicate with Pilot station, tel. 31.36.08, through Boulogne Radio. When pilot launch is at sea, contact by VHF Channel 12.

The most favourable boarding point is between the sea buoy and the wreck buoy situated 1.5 miles to the South, or slightly nearer the land if there are strong Westerly winds. In any event, the surf created by the Carnot breakwater must be avoided by keeping at least 1 mile off shore. If Pilot is not immediately available, vessel must wait in Outer Roads, if necessary at anchor, until further instructions received. On no account should vessel attempt to enter Carnot Roads without Pilot.
ANCHORAGE: The outer anchorage for large vessels is midway between Bassure de Baas and the Carnot breakwater. Anchorage prohibited in the main approach channel.
RESTRICTIONS: Entrance depends on tidal conditions. For larger vessels best to enter the breakwaters at slack water which occurs 2 hours before time of high tide. Arriving vessels are obliged to contact Harbour Master's office immediately by radio, or VHF Channel 12.
MAX. SIZE: For outer harbour: length, 205 m.; draft, 10.5 m. springs 11.00 m. neaps. Max. d.w.t., 31,000 tons. Bassin Loubet: length, 100 m.; draft, 7.5 m. springs, 7.75 m. neaps.
RADIO: Boulogne Radio, call sign FFB, also on VHF Channel 25.
HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease on board, Master should radio Agents prior arrival advising details.
TUGS: Will meet vessel as requested by Master on Pilot's advice.
BERTHING: Main berths situated inside Carnot breakwater. Mooring length of 1,000 m. available, depths vary from 5.5 m. to 10 m.

A marine terminal in the inner harbour, for landing vehicles with passengers. This terminal has 2 mobile ship-to-shore ramps.

These ramps have a load capacity of 30 and 35 ton, and the availability of parking areas allows for development of roll-on/roll-off traffic. However, the characteristics of the inner port can just accommodate ships up to a max. length of 130 m. with a draft of 4.50 m. Plans are being studied for considerably improving these facilities.
CRANES: Floating crane 150 ton capacity. Also 1 crane 25 ton capacity, 9 cranes 3–6 ton and 18 cranes 6–15 ton.
DEVELOPMENTS: Lengthening of the Quay de L'Europe which will then have a total length in excess of 800 m.

A third roll-on/roll-off position is being studied which will be located in the sheltered roadstead, on the Western side of the Sarraz Bournet mole, and will be able to handle a mixed traffic of accompanied cars and general cargo. In addition, a quayside installation equipped with a ramp is being planned in the dock for berthing Ro–Ro ships with both horizontal and vertical handling capability.

A 240 m. quay may also be available along the Western side of quay when the increased traffic warrants its construction.

The port offers 58,800 sq.m. covered area, of which 4,500 sq.m. (18,000 cu.m.) are cold stores, and 82,100 sq.m. of open area.

A clinker silo of a capacity of 42, 500 tons is currently in course of construction; its rate of loading will be 1,000 t.p.h.
FRESH WATER: Supplied by pipe-line to all berths.
FUEL: SMCL quay can supply marine fuel. Quay is limited to vessels less than 100 m. length and 5 m. draft, otherwise fuel obtainable by tanker lorry from Dunkirk.
OPENING/CLOSING HATCHES: Performed by crew.
REPAIRS: Only quick repairs may be effected because of congestion at the quays. Slipway for vessels up to 2,500 tons.
TIME: GMT plus 1 hour.
HOLIDAYS: No work Sundays and legal holidays.
POLICE/AMBULANCE/FIRE: Police, tel. 31.58.07; Ambulance/ Fire, tel. 18.
TELEPHONES: Can be connected on board vessels at Quay de L'Europe.
SHORE LEAVE: Permitted, no restrictions.
AUTHORITY: Direction du Port.
AGENT: See "Paris".

BREST: 48.24 N. 04.30 W. (See Plan)

DOCUMENTS: See "Dunkirk".
PILOTAGE: Pilots do not stay out at sea, but only go to meet ship at estimated time of arrival as sent by ship. Normally pilot boat positioned on the line Toulinguet lighthouse and Beuzec (or Charles Martel) buoy, about 2.5 miles N.W. Toulinguet lighthouse. If strong S.W. wind, pilot boat waits for ship at entrance of Camaret Bay, about 1.5 miles N.E. Toulinguet lighthouse. If sea too rough to allow pilot boat to sail out, boat waits for ship at entrance of Brest Roads, near Portzic lighthouse.

Ships proceeding Brest must send last message giving ETA Pilot station (stating if *local time or GMT*), about 5 hours before arrival. Message to be addressed *"Brest Pilot Office"* through Brest Le Conquet radio station (call sign FFU). Day and night watch at pilot office. Radio station phones message direct as soon as received. Any alteration in ETA should be passed pilot office immediately.

Pilot boat sails from Brest harbour about 1.5 hours before ship's ETA, and 0.5 hour later pilot boat takes radiotelephony watch on 2182 kc/s, calling ship from time to time on same frequency. Ships fitted with radiotelephony should listen and call on 2182 kc/s. Pilot boat also equipped VHF Channels 16, 9, 6, 12 and Pilot office Channel 9.
ANCHORAGE: At Pilot's discretion. Anchoring in main approaches restricted as indicated on charts.
RESTRICTIONS: Entry subject draft and height of tide on day in question. Two entrances to port, one dredged to 6 m. below zero of charts and the other 5.8 m. below zero. Depth at quays varies according berth from 6 m. to 11 m. below zero.
MAX. SIZE: Inside harbour, max. length 320 m. Draft up to 35 ft. subject to tide.
HEALTH: If from foreign port, cable Maritime Health Service 48 or 24 hours prior arrival requesting free pratique. If risk of contagious disease exists, vessel will be held in roads until cleared. If from another French port, free pratique automatic.
RADIO: Brest Le Conquet – FFU.
TUGS: Two port tugs of 1,250 h.p. Tugs join vessel at main entrance to port. Marine National places tugs at ship's disposal for all port movements. Generally, tow rope supplied by tug at additional charge.

The German salvage tug *Le Pacific*, or another tug of the German Bugsier Company, is stationed at the port, but only gives assistance for vessels requiring aid outside the port area.
BERTHING: According to draft, ships may have to wait in roads before berthing, depending on height of tide in fairways. Also see "Restrictions".
STEVEDORES: Agent has responsibility of making all arrangements for unloading, and is in touch with stevedores who arrange necessary gangs.
MEDICAL: Hospitals and clinics available. In the case of ship needing medical assistance, request should be addressed to Maritime Health Service through Conquet Radio Station, advising ETA, where vessel coming from and state of patient.
TANKERS: One berth for receipt of refined products destined for local storage tanks. Berth length 142 m., dredged alongside to a depth of 10 m. below zero of charts over an area 250 m. long and 30 m. wide.
FRESH WATER: All berths have fresh water supply. Apply to Chamber of Commerce who make necessary arrangements. Loading rate 13-15 t.p.h.
FUEL: Bunkering station operated by Societe de Depots de Petrole Cotiers, on the South side of the East Mole. Loading rate up to 200 t.p.h.
TANK CLEANING: Station situated at the Southern extremity of the East Mole. Can operate 4 Victor Pyrate machines simultaneously. Equipped with 3 boilers to supply steam, 3 pumps, oily water separator and an extractor for solid residues.

The tank-cleaning station is connected by pipe-line to Repair Quay No. 2 where tankers of 100,000 to 250,000 d.w.t. may be accommodated.
DEVELOPMENTS: Two large projects are currently under construction:

The first consists of a new port industrial zone with an area of 100 hectares, and frontage of approx. 1,800 m. which will enable the construction of quays with depths of 10 – 12 m.

The second consists of the construction of a large dry dock able to receive vessels of 550,000 d.w.t. and 2 floating repair quays.

The dry dock will have a length of 420 m. and width of 80 m.

The quays will have a length of 418 m. each and will be dredged to 11 – 12 m.

These new developments will be put into service by the end of 1979, and will be equipped with the most modern means to repair large vessels.

Furthermore, the Port is studying a vast plan to develop the commercial port, so that the latter may adapt itself to the requirements of modern maritime transport.
WATCHMEN: Compulsory for ships carrying dangerous materials, non gas-free tankers, vessels with chemical products, munitions, etc.

CERTIFICATES:
Nationality.
Gross Tonnage.
Classification.
Deratisation.
Vaccination.

CUSTOMS ALLOWANCES: Tobacco, Wine/Spirit. Ship's provisions must be under seal.

CONSULS: The following countries are represented by Consuls at Brest:

Belgium	Netherlands
Chile	Norway
Denmark	Portugal
Finland	Spain
German Federal Republic	Sweden.

REPAIRS: Repair Quay No. 1 at the East Quay of Basin No. 5 can accommodate vessels up to 200 m. length. Dredged to depth of 10 m. over an area 300 m. long, 52 m. wide.

Repair Quay No. 2 can accommodate vessels up to 350,000 d.w.t. Quay is 320 m. long, dredged to depth from 10 m. at the bow to 12 m. at the stern.

Repair Quay No. 3 Adjacent to Repair Quay No. 2 Length 280 m. Depth 12 m.

Quays No. 2 and 3 are equipped with modern and complete plant necessary for tanker repairs.

Vessels may also be permitted to make repairs at other quays according to their availability.

DRY DOCKS: *No. 1:* Dimensions 225 m. by 26.77 m., entrance sill 4 m. below datum, situated at the Northeast angle of Basin No. 5. The entrance lock can receive 2 vessels simultaneously, 1 of 75 m. length and the other of 150 m. length, with some adjustments.

Max. draft, at Spring tides: 11.50 m.; at neap tides: 10 m.

No. 2: Dimensions 342 m. by 55 m. Can accept tankers of up to 250,000 d.w.t. Entrance sill 7.25 m. below datum. Dock situated in the Southeast of the Industrial Port Zone. Can accept vessels of the following dimensions.

At mean Spring tides: length 335 m.; beam 50 m.; draft 12.50 m.

At neap tides: length 335 m.; beam 50 m.; draft 10 m.

AIRPORT: At Guipavas, 7 km. from Brest – 3 daily services to Paris.

TIME: Local time GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police 444850 and 445861; Police Secours 17; Ambulance and Fire Brigade 18 or 442766.

TELEPHONES: Can be placed aboard at certain berths.

SERVICES: Degassing station, tank-cleaning and slop discharge, adjustment of chronometers, chart and document department, weather forecasting, permanent daytime service for signing on crew, barometer adjustment. Also Compass and D/F adjusting.

Port Weather Service: Port Office, 30 Bis, Quai Commandant Malbert. Health Service: Quai Commandant Malbert.

AUTHORITY: Ingenieur des Ports et Chaussees, Arrondissement de Brest, Direction Departmentale de l'Equipement.

AGENT: Jolasry (France), 6 Quai de la Douane. Telex 73080. Tel. 44.32.10

CAEN: 49.13 N. 00.21 W. (See Plan)

DOCUMENTS:
3 copies Crew List.
3 copies Provisions List.
3 copies Crew Personal Effects List.
Derat. Certificate or exemption.

PILOTAGE: Pilot boat is on station from 2.5 hours before high water until 3 hours after high water. Vessels can contact the Pilot by radio on 2182 kHz or by VHF Channels 12 and 16. The pilot boat is stationed in the outer port of Ouistreham and goes out to the roads on vessels approach. International code flag signals are used to call Pilot.

Caen Pilot boat has a black hull with white stripe. The words "Pilote Caen" are written in white letters on the hull. During the Summer months the pilot boat is replaced by a launch bearing the same markings. As soon as the Pilot boards he will hand the Master an Entry Declaration to be completed.

ANCHORAGE: While waiting the tide vessels may anchor in the vicinity of the light-buoy in Ouistreham roads. The position of this buoy is 49° 19′ 50″ N. 00° 14′ 18″ W. The buoy is positioned in depth of 10 m. Anchorage is open to winds from West through South to East; good holding ground. Currents do not exceed 2 knots at spring tides.

RESTRICTIONS: Dimensions of locks – East lock length 181 m., depth 18 m. West lock length 225 m., depth 28.45 m.

The locks are open to navigation from 2 hours before high water to 3 hours after high water. The locks can be used up to a maximum of 1 hour before/after these times by special permission of the Harbour Master and payment of additional dues.

Maritime Canal, length 14 km. The canal is dredged to 9.89 m. depth. Vessels proceeding to the docks at Herouville and Calix must pass 2 bridges: Herouville 30 m. wide and Colombelles 30 m. wide.

Ships proceeding to new dock must also pass the bridge at Calix, 21.76 m. wide. Maximum speed authorised in the Maritime Canal is 7 knots.

Maximum air draft for New Dock and St. Pierre Dock, 33 m.

MAX. SIZE: Daytime, length 205 m., beam 23 m., draft 29 ft. sea water.
Night-time:

Herouville	length 170 m.	Beam 17 m.	Draft 24 ft. SW.
Calix	length 150 m.	Beam 17 m.	Draft 24 ft. SW.
New Dock	length 140 m.	Beam 15.3 m.	Draft 21 ft. 2 in. SW.

HEALTH: Free pratique is automatic for all ships. Health control is carried out by customs officers under the direction of the Havre Port Health Office. For ships coming from ports in Africa, Asia, or Pacific Islands a Maritime Declaration of Health is required.

In case of suspected epidemic or fever on board Master must advise the port authorities who will instruct him to proceed to an appropriate anchorage to be boarded by the Port Health doctor.

RADIO: Nearest radio station Boulogne Radio, call sign FFB.

VHF: Vessels may communicate with the Harbour Master's Office by VHF Channel 12. This service only operates during the hours when the locks are operating.

TUGS: The use of 1 or 2 tugs is compulsory for vessels over 16.50 m. beam.

BERTHING:

Dock	*Quay*	*Facilities*	*Length (m)*	*Sea level chart*
Saint Pierre	Vendeuvre de la Londe	1 crane 5 tons 1 apple silo of 250 t	280 250	4.5 4.3
	Cafarelli	unloading rate 50 t.p.h. Cider storage of 3,200 hectl capacity	150	4.5
Nouveau Bassin	President	3 cranes 5 t	150	7.9
	Hippolyte Lefevre President	Cereals machinery rate: two 100 t.p.h. one 200 t.p.h.	550	6.5
	Gaston Lamy	4 cranes 3 t; 2 cranes 5 t 2 cranes 10 t; 2 cranes 15 t		
	De Normandie	3 cranes 5 t; 1 crane 8 t 1 crane 10 t	375	5.8
De Calix	Calix	4 cranes 6 t Storage of Molasses: 13,500 t	165	9.9
D'Herouville	President	2 cranes 5 t; 4 cranes 6 t	370	9.9
	Delaunay	Private berth, 3 cranes 8 t	200	
	Mole a charbon	for General cargo: 9 silos of 19,600 cu.m.		
Blainville	Blainville	Cereals machinery rate 400 t.p.h.	150	9.9
	Blainville	3 cranes 20 tons	180	9.9

STEVEDORES: Arranged by Agent on basis of ETA provided by vessel before arrival.

MEDICAL: Doctors and hospital facilities available.

TANKERS: There are 2 tanker berths D.P.C. berth in Calix Dock, max. draft 8.60 m. and SONEC berth on the left bank of the Canal, max. draft 5.60 m. Gas-freeing and discharge of residues is prohibited.

FRESH WATER: Available at all berths, rate about 5–10 t.p.h.

FUEL: Can only be supplied by tanker lorries.

WATCHMEN: Not compulsory.

OPENING AND CLOSING HATCHES: This work is normally carried out by the crew.

CUSTOMS ALLOWANCES: Amount of tobacco and alcohol for crew consumption must be declared on the stores list. Quantities held out of bond are at Customs discretion.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented locally:

Denmark tel. 82.00.67	Norway tel. 82.05.42
Finland tel. 83.33.27	Sweden tel. 82.21.76

REPAIRS: Deck and machinery repairs can be carried out by local workshops. Nearest dry docks at Havre or Cherbourg.

REPATRIATION: Can be arranged.

AIRPORT: Situated 12 km. from the port. There are no regular services, but an air taxi with 5 seats can arrange connections to International airports.

TIME: GMT plus 1 hour or GMT plus 2 hours.

HOLIDAYS: Work is carried out on legal holidays. No work on "Jours de Fetes".

POLICE/FIRE/AMBULANCE: Police tel. 17; Fire 18; Ambulance 18.

TELEPHONES: Can be connected on board ships. Quayside telephone situated in the Calix dock, Herouville and Blainville.

SHORE LEAVE: Allowed.

AUTHORITY: Ingenieur des Ponts et Chaussees, Chef de l'Exploitation, Direction Departmentale de l'Equipment.

AGENT: See "Paris".

CALAIS: 50.58 N. 01.50 E. (See Plan)

DOCUMENTS:
Ship Register.
Manifest of Cargo.
Bill of Lading
3 Lists of Provisions on board.
4 Lists of Articles held by Crew.
3 Lists of Crew.
List of open spaces.
Health Certificate, endorsed by Master on arrival.
Deratisation or Exemption.
For tankers, Certificate of Cargo Specification and Certificate of vessel's suitability to transport inflammable liquids in bulk.

PILOTAGE: Compulsory when entering or leaving harbour, except for ships less than 50 m. length. Pilotage area: 3 miles from piers. Ships required to give notice of their arrival 18 hours before, through Boulogne Radio. Pilot waits between buoys CA4 and CA6. Pilot boat: Black, white side stripe, bearing the inscription "Pilote Calais". She is equipped with VHF, Channel 6 and Channel 16.

ANCHORAGES: Between CA6 and CA8, 15 to 17 m. deep, sand and

gravel. Good anchorage. When bad weather from North, ships are advised to stand out to sea or anchor in the roads of Les Dunes. Ship will receive instructions from Pilots or Harbour Captain's office when to enter roads of Calais.
RESTRICTIONS: Harbour channel 130 m. wide. In channel and outer harbour, depths are maintained at 8.40 m. MWL. Vessels should enter harbour preferably about 2.5 hours before high tide or half an hour after high tide. Because of the shape of sluice at the entrance larger vessels cannot have direct access to the Bassin Carnot at certain tides. These vessels may lighten in outer port, at "Quai Paul Devot", where depth is 9 m. LWOST.
MAX. SIZE: "Bassin Carnot", 150 m. max. length; "Bassin Ouest", (West Dock) 110 m. max. length; "Quai P. Devot", 175 m. max. length; "Bassin Carnot", 19 m. max. beam; "Bassin Ouest", 16 m. max. beam. Max. draft: 8.23 m. (27 ft.). Port accessible to vessels of 20,000 d.w.t.
HEALTH: Sanitation controls can arrange deratisations and exemptions. International Vaccination Certificates required for ships coming from an epidemic zone.
RADIO: Messages through Boulogne Radio. ETA must reach pilotage station or Harbour Captain's offices 18 hours before arrival. Near Calais, ships equipped with VHF can call Harbour Captain on Channel 12 or pilotage station on Channel 16.
TUGS: Generally join ships at end of the piers. Towing ropes are generally ships own but can be supplied by tug.
BERTHING: Max. height of tide 7.30 m. Depth on dock sills 2 m. LWOST.

At West dock, entrance between 1.5 hours before and half an hour after high tide. In Bassin Carnot, entrance between 3 hours before and 1 hour after high tide.

There are 2 berths equipped for handling roll-on/roll-off traffic, situated in Bassin Carnot.

CRANES:

Maritime Station Quay	Electric cranes – 6 tons	3
Paul Devot Quay	Electric crane – 6 tons with automatic scoop	1
	Electric crane – 12 tons with automatic scoop	1
	Electric cranes – 15 tons with automatic scoop	2
Transit Station	A block of 2 gantries able to handle a load of 40 tons (containers)	
West Basin		
South Quay of the	Electric cranes – 3 tons	3
West Basin	Electric cranes – 6 tons	2
Carnot Basin		
Vistule Quay	Electric cranes – 6 tons	2
Rhone Quay	Electric cranes – 3 tons	4
Loire Quay	Electric cranes – 6 tons	3
	Electric cranes – 6 tons with automatic scoops	8
	Electric cranes – 12 tons with automatic scoop	2
	Electric gantries – 6 tons with raisable forepeak and equipped with weights and automatic scoops	2
Crespin Quay	Electric cranes – 6 tons with automatic scoops	3
Fournier Quay	Electric cranes – 6 tons	5
	Electric crane – 12 tons with automatic scoop	1
Volga Quay	Electric cranes – 6 tons	2
	Electric cranes – 6 tons with automatic scoops	2

Dry Dock: One electric crane – 15 tons. 2 mobile cranes of 1/9 tons complete the lifting machinery of the Public Equipment of the Port.
BRIDGES: Swing bridges (West Dock) and draw bridges (Bassin Carnot) are situated on sluices.
STEVEDORES: Informed by Shipbrokers of tonnage, nature and condition of cargo.
MEDICAL: All facilities available.
TANKERS: Two posts provided for tankers: "Quai Paul Devot" for middle-sized tankers. "Bassin Ouest" (West Dock) for small tankers. "White and black" products can be accepted at "Bassin Ouest". Only "black" products admitted at "Quai P. Devot". Tankers are allowed to enter harbour only by daytime. They must leave as soon as operations are finished. Hoses 10 and 12 in. in diameter. Barges discharged with a 10 in. hose.
DENSITY: Salt.
FRESH WATER: Supplied from hydrants on wharves.
FUEL: Any fuel can be supplied by tank lorry of large capacity.
GANGWAY/DECK WATCHMEN: Ships must be guarded.
OPENING/CLOSING HATCHES: As a rule hatches are manoeuvred by crew.
CUSTOMS ALLOWANCES: Tobacco: No limit for foreign ships, but the quantity must be declared on the lists of articles held by crew.
IDENTIFICATION CARDS: Identification cards and seamen's books are required.
CONSULS:
Consuls:
Netherlands, M. G. Dumont, 12 Bd. des Allies, Calais.
Monaco, M. C. H. Loze, 38 Quai Gustave, Lamarie.
Vice-Consuls:
Denmark, M. J. Mulard Jr., Place de Suede.
Finland, M. H. Ravisse, 12 Bd. des Allies.
Great Britain, E. J. Evans, 9 Rue Felix Cadras.
Greece; M. H. Ravisse, 12 Bd. des Allies.
Italy, M. T. Simonini, 64 Rue Royale.
Norway, M. Y. Lefebvre, 12 Bd. des Allies.
Portugal, M. R. H. Delanghe, 16 Rue Ovide.
Sweden, M. T. Pagviez, 198 Rue des Quatre Coins.
REPAIRS: Deck and engine repairs possible.
DRY DOCKS: One, 153 m. long, 21 m. wide. Depth at sill, 7.45 m.
REPATRIATION: Pilot boats and tugs may trans-ship equipment or hands in outer roads.
AIRPORT: Calais, Dunkirk (International), 7 km. away.
TIME: GMT plus 1 hour. Spring and Summer GMT plus 2 hours.
HOLIDAYS: 1st January; Easter Monday; 1st May; Ascension Day; Whit Monday; Tuesday afternoon following 1st Sunday of July (local feast); 14th July; 15th August; 1st November; 11th November; afternoon of 24th December; 25th December; Sundays.
POLICE/AMBULANCE/FIRE: Police 17; Ambulance 34.39.24; Fire 18.
SHORE LEAVE: Crew are allowed ashore.
AUTHORITY: Directeur des Ports de Boulogne-sur-Mer et Calais.
AGENT: See "Paris".

CALVI: Corsica 42.34 N. 08.46 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List
1 Cargo List.
1 List of Articles (new and customs-barred) in possession each Crew member – carneras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.
PILOTAGE: Not compulsory.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 5 m.; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Not available.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour.
AGENT: Lloyd's Agent W. Tschumi, POB 55, Ajaccio. Tel. 21 43 39. Telex 46627. Cables: "Britiships Ajaccio".

CANNES: 43.33 N. 07.01 E.

DOCUMENTS:
To be sent on departure from previous port.
3 copies of Passenger List.
1 copy of Crew List.
Required on arrival:
4 copies of List of Passengers, showing Christian name, surname, age, date and place of birth, nationality.
2 Crew Lists.
5 copies of a Special Arrival form (supplied on arrival).
PILOTAGE: No Pilot station at Cannes. A tender with Company's flag on top of its mast will meet the vessel: *(a)* If ship is proceeding to anchorage No. 1, in Golfe de la Napoule, about half a mile South of the lighthouse at end of Cannes port Pier (Quai Lauboeuf); *(b)* If ship is proceeding to either anchorage No. 2 or 3, in Golfe-Juan, half a mile North of Ile Ste Marguerite.

The tender will lead to anchorage and will give 1 blast of the siren when correct position has been reached. At night, tender has a fixed white light at top of its mast, which replaces the flag. Should it not be possible to advise by wireless before arrival at anchorage and weather conditions making it necessary for ship to anchor at either position No. 2 or 3, boat will meet ship in Golfe de la Napoule, 2 miles South of Cannes port lighthouse. In this event, ship must proceed to anchorage No. 2 or 3 as appropriate, steaming to South of Ile St. Honorat, whilst tender will proceed by channel between Ile Ste Marguerite and the mainland.
ANCHORAGE: Advice of anchorage is passed to Captain via Grasse Radio or Monaco Radio, VHF Channel 16 usually about 1 hour before arrival. There are 3 anchorages, any of which may be used according to the weather:

No. 1 off the port of Cannes, approximately half a mile South of end of breakwater, used by calm sea or by East or N.E. winds.

No. 2 is situated to North of Ile Ste Marguerite, used by S.E. or S.W. or South winds.

No. 3 to the East of Cap de la Croisette, used by West or N.W. winds.

It could happen during the call, winds may change direction and movement from anchorage No. 1 to No. 2 or No. 3 become necessary. Shift takes about 1 hour.
HEALTH: Port officials will embark immediately the ship anchors. Free pratique may be granted by wireless telephone 1 hour before arrival at ship's surgeon request stating: "no illness on board".
FRESH WATER: 3 tankers of respectively 65, 75, and 95 tons capacity are available with 72 hours' notice. Water can be pumped at an average of 1,500 tons per 24 hours, with 2 hoses of 2.5 in. diameter on each tender.

GANGWAY/DECK WATCHMEN: Watchmen for gangways should be provided by ship and passengers are requested to present their landing cards every time they use the gangways.

AGENT: Agence Generale de Navigation et de Tourisme, Building du Casino, Cannes, France. Tel. 39.32.80 and 39.39.84. Telex: 47783 – back signal: Agent Cannes. Telegraphic Address: Agent-Cannes.

CHERBOURG: 49.38 N. 01.38 W. (See Plan)

DOCUMENTS:
Declaration of Health.
Manifest of Provisions on Board.
Manifest of Crew's Possessions.
Manifest of Cargo – in certain cases.
Manifest of Equipment.

DEEP SEA PILOTAGE: Pilots board off CH1. Buoy. Radio ETA to "HUTCHINSON GRAVESEND". (48 hours notice.) On approaching Cherbourg contact Cherbourg Signal Station on VHF Channel 16 confirming ETA.

PILOTAGE: Requests for pilotage must indicate arrival time at the buoy CH1. They may be addressed to Agent or direct to pilot station, telegraphic address "Pilotage Cherbourg" or through the Homet look-out station by means of the usual signals. To avoid delay it is well to warn the pilot station 4 hours in advance of arrival. As a general rule, the pilot boat always comes out, whatever the weather. In bad weather, it follows the vessel and Pilot boards as soon as shelter permits.

ANCHORAGE: Anchoring must be made strictly according to the instruments of the Pilot so as not to get in the way of movements and anchorage of steamers. Depths vary from 6 to 12 m. in safe anchorages.

RESTRICTIONS: In the wet dock, the bridge is opened one hour before until one hour after high water.

MAX. SIZE:

			Depth (m.) average tide	
	Length (m.)	*Breadth (m.)*	*Spring*	*Neap*
In the Roads	No Limit	No Limit	11	12.50
Trans-Atlantic Dock	No Limit	No Limit	7.0–12.5	8.5–14.0
Mielles Dock	150		5.00	6.50
Oil/Oil berth at Querqueville	200	31	9.0	10.50
Berth Amiot	100		3.0	4.50
RO/RO No. 1	130	20	7.0	8.50
RO/RO No. 2	200	30	8.0	9.50

HEALTH: From French port to French port, no formalities. From foreign port to French port, request for free pratique (yellow flag). In case of sickness on board, warn the Agent in advance. No crew member may leave ship before consultation and agreement of Port Doctor.

RADIO: The stations which offer the best facilities are Boulogne Radio, Brest le Conquet Radio, and St. Lys for ships which are a long way off.

TUGS: Tugs generally join vessel in the main approaches. With regard to the tow rope, a charge is made.

BRIDGES: Only the swing bridge at the entrance to the wet dock, which is opened on request from 1 hr. before until 1 hr. after high tide for the entry and exit of ships.

STEVEDORES: Agent needs ETA, to arrange personnel and equipment to be used for handling cargo.

CRANES: 2 floating cranes, max. capacity 90 tons. 1 shore crane, max. capacity 25 tons. The French Navy have 2 floating cranes, 1 of 30 tons and 1 of 90 tons capacity.

MEDICAL: Warn Agent of any requirements at the same time as ETA. There are 2 hospitals, civil and military, both very well equipped.

TANKERS: There is only one discharge berth, max. draft 9 m.

WATER: Water points on all quays.

FUEL: Available from local suppliers – Esso, Shell, etc.

WATCHMEN: Every ship in port must have a watchman, usually a crew member.

OPENING/CLOSING HATCHES: At the discretion of Master, crew may perform this.

CUSTOMS ALLOWANCES: Free allowance for each crew member – 200 cigarettes or 50 cigars, and 1 litre of alcohol.

IDENTIFICATION CARDS: Each crew member must carry his seaman's card.

CONSULS:

Belgium	Finland and Norway	Greece
Portugal	Haiti	Sweden
Denmark	Venezuela	Great Britain

REPAIRS: All types of hull and engine repairs are possible.

DRY DOCK: Commercial Port's dock: length 75 m., width 14 m.

The Naval Dry Docks	*Length*	*Width*
Homet Dock	258.50 m.	36 m.
No. 1	103 m.	19.85 m.
No. 2	113 m.	19.85 m.
No. 3	113 m.	19.85 m.
No. 4	103 m.	19.85 m.
No. 5	209.90 m.	29.75 m.
No. 6	187.50 m.	187.50 m.
No. 7	80.95 m.	19.10 m.

REPATRIATION: Can be arranged.

AIRPORT: At Moupertuis, 12 kms. from Cherbourg. There are no regular services in the immediate vicinity.

TIME: Local time throughout the year is the time zone 1 hr. East., i.e. Central European Time.

HOLIDAYS: January 1st; Easter Sunday/Monday; May 1st; Ascension; Whitsun Sunday/Monday; July 14th; Assumption; 15th August; November 1st; Victory Day, November 11th; Christmas Day, December 25th.

POLICE/AMBULANCE/FIRE: Police: 53.14.50. Ambulance: 53.13.29. Fire: 53.01.23.

TELEPHONE: Generally, ships do not request the installation of a telephone line, unless for a prolonged stay. It is only possible on the steamer berth, price 15 F.

AUTHORITY: Ingenieur des Ponts et Chaussees, Department de la Manche.

AGENT: Jolasry (France), 9, Quai de l'Entrepot, Cherbourg. Telex: 77723, Telephone: 53.24.35.

CONCARNEAU: 47.52 N. 03.55 W.

DOCUMENTS:
Ship's Registration Certificate.
Cargo Manifest.
Stores List.
Crew Personal Effects List.
List of Crew and Passengers with dates of Vaccinations.

MAX. SIZE: *Tankers:* By day: 90 m. overall; by night: 80 m. overall. *Other vessels:* By day: 95 m. overall; by night: 90 m. overall.

RADIO: Contact Conquet Radio.

TUGS: Available on demand, meet vessels near Cochon Light.

CUSTOMS ALLOWANCES: *Tobacco:* Fixed at 30 grams per day, at sea, per person. *Alcohol:* The equivalent of 5 centilitres of rum at 42° per day, at sea, per person.

These allowances are free of tax for use on board, but may not be landed.

IDENTIFICATION CARDS: Any National Identity Documentation will suffice.

POLICE/AMBULANCE/FIRE: Police, tel. 970071; Ambulance, tel. 17; Fire Brigade, tel. 19.

REPAIRS: There is a slipway which can accommodate 6 boats of 350 metric tons.

AUTHORITY: Officier de Port.

DIEPPE: 49.56 N. 01.05 E. (See Plan)

DOCUMENTS:
4 Crew Lists.
2 Lists of Stores.
1 Loading Manifest.
1 Passenger List.
1 Declaration (furnished by Agent) stating that ship possesses up-to-date Safety Certificates.
1 Bill of Health.

PILOTAGE: Compulsory. Pilot boards 4 miles from breakwaters. Pilotage is compulsory in this area except for vessels less than 65 m. long equippped with VHF (Channel 12). Pilot boat is ready to put to sea from 2.5 hours before to 1 hour after high tide. During this period maintains radio telephone watch. VHF Channel 12.

APPROACHES: Coming from the West, immediate landfall is Cap d'Ailly which is passed at 3 miles distance and then vessels proceed to the landfall buoy of Dieppe marked D.1. with black and white stripes, with a flashing light every 6 seconds and a bell:

Location: 49° 57′ 15″ N., 1° 01′ 40″ E., or 2.5 miles to the N.W. of the port entrance.

The cliffs which surround Dieppe give very good radar echoes.

ANCHORAGE: It is recommended to anchor in zone bounded by following points: *(a)* 49° 56′ 55″ N. 01° 04′ E.; *(b)* 49° 58′ 40″ N. 01° 02′ 45″ E.; *(c)* 49° 57′ 42″ N. 00° 59′ 20″ E.; *(d)* 49° 55′ 50″ N. 01° 00′ 30″ E.

This anchorage area includes buoy D.I and depths are from 6 to 12 m. with sand and broken shell bottom. Larger vessels anchor approximately half a mile to North of buoy D.I in depths of 10 to 12 m. To keep access to port free, it is forbidden to anchor in front of port entrance.

RESTRICTIONS: All except very small vessels enter port only at full tide slack water (−2 hr. to +1 hr.). In principle passenger ferries have priority. The Pilot is rarely prevented from turning out by bad weather, but it can happen once or twice a year, with a strong wind from the North. In this case ships seek shelter near the English coast. Entering and leaving signals are made day and night at the following stations:

(1) Signal station of the West jetty; (2) station signal mast in the Outer Harbour; (3) signal station of the Canada lock and of the Colbert bridge.

Sound signals: (1) To request entry to the port when in roads, or exit when in the outer harbour – 2 long blasts; (2) to request opening of Colbert Bridge – 3 long blasts; (3) entrance to Canada basin – 3 long blasts; (4) entrance to Duquesne basin – 2 long blasts.

MAX. SIZE: Colbert Lock: 230 m. length, 40 m. width, controls entrance to Inner harbour, where depth maintained about 7.50 m.

Canada Docks: length 154 m.; width, 21 m.; draft 8 m.

Paris Dock: length 154 m.; width 21 m.; draft 8 m.

Opening of Canada and Paris basins: 2 hours before to 1 hour after full tide, night or day. The port is accessible to vessels up to 10,000–12,000 d.w.t.

HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease, Master required to radio details to Agent in advance.

RADIO: Transmitter-receiver VHF at Dieppe Post Office. Ships call it on Channel 24. Boulogne-Radio (FFB) working on service 192. Harbour Master, Radio telephone 27180 kHz. Port Captain listens on VHF Channel 12.
TUGS: 3 tugs available (1,400 h.p., 750 h.p., 600 h.p.). One is a sea-going tug. No lighters in the port.
BERTHING:

Dock	*Quay*	*Facilities*	*Length (m.)*	*Sea level chart*
Paris	Norvege	6 cranes 3 t; 2 cranes 3/6 t; 1 roll-on/roll-off ramp	715	7.5/9
	Maroc	1 crane 6.5 t; 3 cranes 5 t 6 gantry cranes 6 noria conveyors for banana handling 25 handling devices for direct transhipment on to rail and road	600	7.5/9
Canada	Indes	2 cranes 6/12 t; 2 cranes 2.5 t	150	7.5/9
	Quebec	4 cranes 3 t; vegetable oil and grains	160	7.5/9
Avant-Port	Henri IV	2 cranes 3 t; 2 cranes 3/8 t 1 Roll-on/roll-off ramp	380	4.5/5 minimum

CRANES: One 30-ton crane at Quay de Tonkin. Two 40-ton jib cranes.
STEVEDORES: Normal hours are 0800–1200 and 1400–1800. Overtime currently from 1200–1400 to finish operation and 1800–2200. Meal breaks from 0800–0830 and 1745–1830 when work has to continue past 1800 hrs. No work Sundays, Bank holidays, except Ascension Thursday.
MEDICAL: All medical facilities available.
FRESH WATER: Is supplied by pipe-line. There are a great number of outlets on the quay.
FUEL: Available in small quantities; delivered by tanker lorry.
GANGWAY/DECK WATCHMEN: Available if required.
OPENING/CLOSING HATCHES: Stevedores or crew.
CUSTOMS ALLOWANCES: 200 cigarettes and limited amount (say 1 opened bottle wine/spirits) per man.
IDENTIFICATION CARDS: Required.
CONSULS:
Norway — Denmark
Sweden — Holland
REPAIRS: Good facilities exist, all types carried out.
DRY DOCKS: Dry dock in the inner harbour, dimensions 130×18 m. It can receive ships 129×17 m.
REPATRIATION: Good facilities.
AIRPORT: Nearest at Paris.
TIME: GMT plus 1 hour. No alterations.
HOLIDAYS: 1st January; Good Friday; Easter Monday; Whit Monday; 1st May; 14th July; 15th August; 1st November; 25th December.
SERVICES: Compass adjusting, etc. available.
SHORE LEAVE: Allowed.
AUTHORITY: Commandant du Port.
AGENT: Jolasry (France), 6, Quai de Norvege – Dieppe. Telex 77965. Tel. 84–24–40.

DONGES: Refer to Nantes. (See Plan)

DUNKIRK: 51.03 N. 02.24 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" is the Dyck lightship or the roads if the ship comes from the East.
DOCUMENTS:
Entry Bill (all information about ship), given by Pilot to Captain, who fills it in and gives it to Harbour Officer.
To be given to Customs:
3 Crew Lists.
3 Passenger Lists.
Manifest or copy.
Form for increase of tonnage.
Declaration of open spaces.
3 Lists of objects held by crew.
PILOTAGE: Pilotage station limits – there are 2 pilotage zones.
1. The outer zone which is limited:
To the West by the meridian of Calais lighthouse;
To the East, by the meridian of 2° 27′ of Long. East;
To the North, by the line situated 3 miles seawards of the low water mark;
To the South, by the Calais pilotage zone, the coast and the inner zone defined below.
2. The inner zone limited:
To the West by meridian 02° 08′ East;
To the North, by a continuous broken line constituted by the parallel 51° 03′ N., the line of the coast, the meridian 02° 2′ E., the parallel 51° 04′ 30″ N.;
To the East by the meridian of Dunkirk lighthouse;
To the South by the end of the water levels of the autonomous port of Dunkirk.

Pilotage is compulsory in inner zone for ships over 150 n.r.t. or ships of max. length 50 m, or with dangerous cargo.
Pilotage compulsory in outer zone for ships not fitted with VHF, or over 1,000 nett tons or max. length 100 m.
Vessels coming from the West should call Pilots 12 hours before arrival. Vessels coming from the East should call Pilots 2 hours before arrival. ETA based on time of arrival at Dyck lightship, should be given through Boulogne Radio (telegraphy) or by radiophone (2182 kHz). In vicinity of pilot boat, vessels may communicate with Pilots by VHF Channel 16, or by Aldis lamp or flag signals when pilot boat is in sight. Telegraphic address of Pilot: Piloduk. Telex 82902.
Pilot boat is about 50 m. long, black hull with white horizontal stripe, "Pilot Dunkerque" written on hull. Black funnel with white anchors insignia.
Pilot boat is positioned between Dyck lightship and buoy CA.2. In bad weather, pilot boat may heave to on a parallel South of wreck buoy (*British Liberty*) and buoy DC, or put into port.
ANCHORAGES: Large vessels waiting for entrance must anchor in the area West of Dyck Light vessel. In bad weather, ships may anchor off English coast, in the roads of Les Dunes, with good mooring ground of sand and mud 20 m. deep. On the Roads of Dunkirk, ships must anchor East of buoy E.11 so as not to disturb the entrance of ships.
RESTRICTIONS: Vessels more than 180 m. length, or of more than 10 m. of draft, normally enter only at slack water, i.e. between 3 hours before high water and 2 hours after high water.
MAX. SIZE: The new lock can now receive ships with a draft of 12 m. at slack water before high tide and ships with draft of 14 m. at slack water after high tide. At night these permissible drafts are reduced to 11.5 m. and 12.5 m. In normal conditions of work, max. length of ship 270 m. (Turbine), or 280 m. (Motor), max. width 42 m. For entry of larger ships, Director of Harbour should be consulted beforehand.
Entrance through Watier Lock: max. length 235 m., max. beam 33 m., max. draft 11.50 m.
Maximum salt water draft at Charles de Gaulle Lock is 14 m., for vessels berthing at public wharf appontement No. 1 and 2 and at private Usinor berth No. 5 and 6.
Outer Port West: V.L.C.C.s up to 470,000 d.w.t. on a max. draft of 22 m. can use the new access channel to the Flanders Oil Berth in the outer harbour.
HEALTH: For ships coming from *(a) All European countries:* Declaration of health is not obligatory but general international certificates are controlled. *(b) Other Harbours:* Admission subject to declaration of health and usual controls of certificates. Admissions in free pratique only in daytime except special cases (intervention of a physician). Request for free pratique may be made to Sani-Port, Dunkirk, through Boulogne Radio. In case of necessity, health service can – on request – intervene at night.
RADIO: Dunkirk Harbour Station (FFF) for messages about port service through VHF Channel 12 and 11. Communications other than in VHF made through Boulogne Radio (FFB).
RADAR: There is radar at the control tower of harbour. It is not a guiding radar.
TUGS: Tugs normally join vessel between buoys DW.28 to DW.30. and DW.16. Smaller vessels are joined by tugs in the outer port.
BERTHING: Berthing priority is decided by Port Captain's office. Ship is informed by radio of the location and priority given to her.

BRIDGES: Bridges of locks and wet docks are closed to navigation to allow trains or work hands to go. The maritime traffic is practically never disturbed.

BULK HANDLING FACILITIES: Bulk Quay No. 1, formerly known as the ore quay. Equipped with 3 gantry cranes. Principally used for iron ore destined for Usinor Dunkirk and Usinor Valenciennes.

Bulk Quay No. 2, a common quay with 2 berths belonging to the Dunkirk port authorities. Equipped with 2 polyvalent iron ore/coal gantry cranes. A third gantry crane is under construction. This quay is accessible for largest ships able to enter the port. Used to discharge coal destined for the Usinor coke mill, also receives coal for other operators, manganese ore and all iron ores for receivers other than Usinor.

Bulk Quay No. 3, an extension of the Usinor Quay for iron ore cargo. Equipped with 1 gantry of 50 tons capacity. Permissible draft at present 13.50 m. planned to be increased to 14.50 m. in the future.

Phosphate Quay, situated West of Bulk Quay No. 2. Berth is 600 m. long with a min. depth alongside of 14 m. Bulk carriers of 80,000 d.w.t. with a draft up to 41 ft. can be accommodated.

Unloading equipment consists of 3 cranes with grabs, each with a max. discharge capacity of 565 t.p.h.

Cereal berth is accessible to 80,000 d.w.t. ships. Along its internal face, coasters, lighters and 3,000 ton pushed convoys can be tied up. Handling operations are secured by 2 pneumatic gantries at a max. rate of 600 t.p.h.

CONTAINER FACILITIES: Quay Freycinet XIII, situated in Dock 6, has a quay length of 350 m. (1,150 ft.) with a depth of water alongside of 13 m. (42.7 ft.). It is equipped with container gantry cranes capable of lifting 45 tons on a telescopic spreader for 20 to 40 ft. units.

ROLL-ON/ROLL-OFF FACILITIES: Dover Quay is equipped for direct transhipment of vehicles, trailers and wagons.

Quay Freycinet XIII is provided with a movable steel ramp 43.28 m. (142 ft.) long with a width of 7.31 m. (24 ft.) which enables two lines of vehicles to be loaded or discharged at the same time. The axis of the ramp runs parallel to the quay 11.58 m. (38 ft.) away from it, which enables ships with a beam of up to 23.16 m. (76 ft.) to be berthed.

Quay Freycinet VII, the berth South of Freycinet VI, has been provided with a fixed ramp for roll-on/roll-off for ships up to 8 m. draft and 22 m. beam.

TANKERS: The following tanker berths are available:

Flanders Oil Berth: max. draft 22 m. Discharge lines to Total Refinery, and shortly to the B.P. Refinery. The access channel has been dredged to a depth of 22 m. at L.W. The turning circle at the entrance to the Outer Port West has a diameter of 1,400 m. Max. discharge rate 20,000 cu.m./hr.

North wharf, max. draft 12.50 m. Loading/discharging pipes 26 in. diameter, bunker line 10 in. diameter.

Middle wharf North, max. draft 12.50 m. Loading/discharging lines 2 of 22 in. and 3 of 16 in. lines, bunker line 16 in. diameter.

Middle wharf South, max. draft 12 m. Dimensions of lines as for Middle wharf North.

Coasters Wharf, max. draft 7.50 m. Diameter of loading/discharge lines 6 in.

Facilities for discharge of dirty ballast are available at all main tanker berths.

STEVEDORES: Each captain will contact his consignee.

MEDICAL: Hospitals and all medical facilities.

DENSITY: Salt.

FRESH WATER: Available in unlimited quantities. Numerous hydrants on all wharves. Price of a ton of water for ships, 2.50 Fr.

FUEL: Supplied by barges or tank lorries if no connection at wharf. Fuel, diesel and gas oil available. Requests for bunkers must be made 48 hours in advance to Agents.

FIRE PRECAUTIONS: The following preventive measures are taken for tankers: Steel rope hung fore and aft along the side (a quick tow in case of hauling out the ship). Deck scuppers plugged. Hoods open on tanks with anti-fire device. Earth connection. Rounds of the port officers. Fire hose connected. Ship's captain is given instructions of the harbour concerning tankers. In case of storm, the Harbour Officer can stop loading or discharging.

GANGWAY/DECK WATCHMEN: Guarding is strongly advised.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES:

Certificate of Nationality.
International Certificate of Tonnage.
Certificates from the Classification Office where ship is registered, especially:
Certificate of Freeboard.
Classification Certificate, engine and boiler.
Classification Certificate, hull.
Classification Certificate, electric equipment for tankers.
List of Hoisting Apparatus.
Deratisation Certificate.
TOVALOP Certificate or similar for tankers.

CUSTOMS ALLOWANCE: Tobacco: Amount allowed for each member of crew: 200 cigarettes or 200 gramme tobacco. Wine and/or Spirits: 1 bottle.

IDENTIFICATION CARDS: An official identity certificate is compulsory ashore (passport, identification card, sailor's book, etc.).

DEVELOPMENTS: The new outer harbour covers 1,400 acres and is designed for vessels with drafts of up to 73 ft.

Unloading for tankers at Total Pier at a rate of 20,000 cu.m.p.h.

The new commercial port, "Rapid Transit Port" operational in 1976. The port is tidal. Facilities include a 260 m. quay for Load on/Load off and ro/ro berth. A container vessel of 400 ft. length and a ro/ro vessel of similar size can operate simultaneously. Also berth for ferry with rail sidings, parking and all other services.

In September 1976 a 500 m. container quay is expected to become operational. 2 large container vessels will be able to berth at the same time, min. depth 45 ft. In December 1976 a second container quay of 500 m. is expected to be operational, min. depth 45 ft. The container quays will be served by 4 container cranes. Others will be added at a later date to meet requirements.

CONSULS:

Cranes	2 of 10 t.	2 of 7 t.

AIRPORT: Calais, Marck, 35 km.; Lille Lesquin, 80 km.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; Easter; Whitsuntide; 1st May; 14th July; 15th August; 1st November; 11th November; Christmas. On public holidays, handling operations can be carried out from 0600 to 1200 hrs.

POLICE/AMBULANCE/FIRE: Police 66.59.01; Ambulance, Firemen 18.

TELEPHONES: In wet dock 6, in the tankers' harbour, at the quay for minerals, at the wharf for cereals, a telephone on board can be obtained and connected to the general system.

SERVICES: No specific port equipment for gas-freeing. Dirty ballast can be received at terminal of Societe Francaise des Petroles B.P. Compass adjustment, radio repairs.
SHORE LEAVE: Crew are allowed ashore.
AUTHORITY: Port Autonome de Dunkerque.
AGENT: Jolasry (France), 11 Rue des Arbres. Telex 82911. Tel. 66–99–01.

FECAMP: 49.46 N. 00.21 E.

DOCUMENTS:
2 Crew Lists.
2 Custom Lists.
1 Health Form.
Ship's Register.
Cargo Manifest.
Bills of Lading.
PILOTAGE: Pilots informed of arrivals by Agents. Pilots wait at port station 2 hours before high water each tide. Inform Harbour Master by VHF Channel 16.
ANCHORAGE: Half mile West of jetties.
MAX. SIZE: 100 m. length, 16 m. breadth and 18 ft. draft, entry any tides.
HEALTH: Pratique obtained when Customs Officer boards few minutes after berthing.
RADIO: Boulogne Radio. VHF at Harbour Master's Office, Channel 16.
TUGS: None.
STEVEDORES: Informed by Agents (available).
MEDICAL: Notice not required for medical attention. Doctors and hospital always ready. But it is better in case of urgency.
FRESH WATER: Available from shore (pipes each 50 m. on quay).
FUEL: No fuel in port. Available only by lorries for bunkering.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: In accordance with international regulations:
Load Line.
Radio Equipment.
Safety Equipment.
Deratisation, etc.
CUSTOMS ALLOWANCES: About 200 cigarettes per man; wine/spirits at Customs Officer's discretion.
IDENTIFICATION CARDS: Not required.
CONSULS:
Vice-Consulate of Norway tel. 0.03.
Vice-Consulate of Denmark tel. 0.95.
REPAIRS: Possible.
DRY DOCKS: 1 slipway for vessels of maximum 1,500 tons displacement.
REPATRIATION: Agents carry out these operations.
AIRPORT: Paris is the nearest.
TIME: Local time is GMT plus 1 hour, no alterations during year.
HOLIDAYS: Arrangements for working during holidays can be made if necessary.
POLICE/AMBULANCE/FIRE: Police, tel. 0.17; Ambulance, tel. 9.33; Fire, tel. 0.18.
TELEPHONES: No arrangements for placing telephone on board.
SERVICES: No possibilities for tank cleaning, etc. Compass adjusting available if necessary.
SHORE LEAVE: Always possible for crew members to go ashore.
AUTHORITY: Ingenieur des Ponts et Chaussees.
AGENT: Andre Marsolet, 13a Quai Berigny. Cables: Marsolet Fecamp. Tel. 003 and 288.

GRANVILLE: 48.50 N. 01.35 W.

DOCUMENTS: See "Calais".
PILOTAGE: Pilotage not compulsory for ships of less than 45 m. length, except for those carrying dangerous cargo. Pilots board from fishing boats carrying regulation marks of a pilot boat, and maintain position at Videcoq buoy when a vessel is expected.

Limits of Granville pilotage are: 1. On entering, towards the West, the line joining "la Pierre d'Herpin", and Chausey lighthouse. To the North, alignment of Chausey lighthouse and "le Pignon". 2. On leaving, alignment of Mont. St. Michel through Champeaux Point. Ships bound Granville required notify ETA 18 hours in advance. Telegraphic address, "Telex 77777 Usaport Granville".

1 hour before to 1 hour after high tide contact with Port Officer (tel. 50.12.45 Granville) can be established by relay through "Marines" Stations. During same hours contact can be made with pilot boat and with Port Office by VHF Channel 12 (port wave band 156.6).
ANCHORAGE: At landfall buoy of Le Videcog.
RESTRICTIONS: Draft restrictions apply at slack water.
MAX. SIZE: Largest vessel admitted length 119.0 m. Draft 6.6 m. Depth of water in channel 8 m.
HEALTH: Pratique arranged by Customs.
RADIO: Boulogne Radio for ships coming from the North. Brest-Le Conquet Radio for ships coming from the South.
TUGS: Port not equipped with tugs. Pilot boats used as "pushers" for port manoeuvres, or for carrying hawsers to tying-up points.
BERTHING: Dependent nature of cargo and ETA. Depth of water at zero tide is between 4 m. and 5 m.
STEVEDORES: Work hours 0800/1200, 1400/1800.
HOLIDAYS: See "Calais". Local holiday, Mardi Gras afternoon.
MEDICAL: Hospital available. Tel. 50.11.37.
TANKERS: 2 berths for unloading domestic fuels through 8 in. pipes.
DENSITY: 1025.
WATER: Available.
FUELS: No fuels readily available. 2 days notice required for tank lorry 200 km. distant.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes. Wines and spirits. 1 bottle spirits. No ship's chandler.
CONSULS: None.
DRY DOCKS/REPAIRS: None.
REPATRIATION: Paris, 3.5 hours by train.
AIRPORT: 10 km. from the port. Air-taxi and commercial fights.
TIME: Local Time GMT plus 1 hour in Winter and GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police Tel. 50.11.16; Fire Service 18; Ambulance 50.11.37.
AUTHORITY: Officer Du Port.

HONFLEUR: 49.25 N. 00.14 E.

DOCUMENTS: See "Rouen".
PILOTAGE: Served by "Pilotage de la Seine" (address 9 Chaussee Kennedy, 76 le Havre). Ships bound for Honfleur are received on the Carosse Roads (Rade de la Carosse) where the following signals should be made for summoning a Pilot. By day – flag "G" of the international code of signals. By night – in Morse by signalling lamp.

Complementary signals which can be used on arriving on the roads. By day – globe or ship's national flag hoisted at masthead. By night – red light at main masthead. At all times, sound signal of 5 long blasts.

Advice of ETA and draft in salt water is to be given to Rouen Port at least 5 hours prior arrival roads, as well as to Agent.

Similarly, vessels anticipating a delay of more than 2 hours after their reported ETA should notify Rouen Port or the pilot boat of this at least 3 hours before the time originally reported.
RESTRICTIONS: Access to port made through channel 100 m. wide, protected by 2 dykes about 500 m. long, which leads to outer harbour. A tidal port, Honfleur possesses 3 floating basins:

Dock	*Length*	*Width*	*Sluice width*
West Dock	128 m.	77 m.	10.50 m.
East Dock	295 m.	71 m.	16.50 m.
Carnot Dock	788 m.	108 m.	13.00 m.

East Dock joins outer harbour: ships of more than 70 m. long must anchor in Carnot Dock which spans from East.
MAX. SIZE: Port can receive ships 100 m. long and 15.50 m. wide berthing in East Dock; but with Carnot Dock, only ships less than 12.50 m. wide can enter. Drafts vary according to tides: 6.00 m. with average tide, 4.70 m. in average slack water, and subject to variations because of silting up of harbour which necessitates frequent dredging.
HEALTH: Bill of Health is under the jurisdiction of Customs office of Honfleur. Hospital nearby.
RADIO: Vessels may use radio telegraphy to communicate all necessary information to the Information Centre of the Port of Rouen (Rouen Port) or to the pilot boat (call sign: FORI) These two keep each other mutually informed of all information received. A permanent watch is maintained by Rouen Port on Channel 16. Disengagement frequency after call on Channel 16: Channel 11 or Channel 12.

A Pilot is obligatory for every ship of more than 55 m. length.
TUGS: If necessary are provided by "La Societe des Abeilles" of Le Havre.
TANKERS: Berth "Miroline" on dolphins in River Seine for tanker of 18,000 tons eventually after lightening according to the depth conditions.
FRESH WATER: Available. Supplies arranged through Agent.
FUEL: Supplies arranged through Agent.
AIRPORT: 12 km. from Port.
AUTHORITY: Directeur du Port.

ILE ROUSSE: Corsica 42.39 N. 08.56 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.
PILOTAGE: Not compulsory.
ANCHORAGE: Outside of port for cruise vessels.
ENTRY TIME RESTRICTIONS: None.
MAX. SIZE: Draft 5 m; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.

STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Not available.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour.
AGENT: Lloyd's Agent W. Tschumi, POB 55, Ajaccio. Tel. 214339. Telex 46627. Cables: "Britiships Ajaccio".

LA NOUVELLE: 43.01 N. 03.04 E.

DOCUMENTS:
1 Passenger List.
4 Crew Lists.
2 Stores Lists.
1 Cargo Manifest.
Bill of Health.
Safety Certificates.
PILOTAGE: Vessels call Pilot on VHF Channels 15 and 16. 3 pilot boats available. International Code pilot signals used.
MAX. SIZE: For port entry: length 135 m., beam 25 m., draft 6.50 m. Tanker sea line: max. draft 18m.
HEALTH: Pratique is given by Customs officers who board vessel on arrival. In case of suspected disease on board, Master should radio Agents advising details before arrival.
TUGS: Not available. There are several launches to assist in mooring.
BERTHING: Is effected in the order in which ships arrive. Specialised berth for Roll-on/Roll-off available.
STEVEDORES: Arranged by consignees.
MEDICAL: Doctors available at La Nouvelle. Nearest hospital is at Narbonne, 27 km. away.
TANKERS: 1 sea line berth at buoys in depth of water greater than 18 m. 4 dolphin berths in the oil dock, max. draft 6.50 m. One of these berths is used for LPG cargoes. No slop disposal facilities.
DENSITY: 1025.
FRESH WATER: Supplied at all town berths.
FUEL: Available from several suppliers.
FIRE PRECAUTIONS: Usual safety regulations strictly applied. A barrage can be positioned across the channel to contain burning oil.
OPENING/CLOSING HATCHES: Optional, performed by stevedores or crew.
CUSTOMS ALLOWANCES: Each crewman allowed to retain only sufficient for his own consumption while in port. It is forbidden to take alcohol ashore.
IDENTIFICATION CARDS: Any man going ashore should carry a passport or identity card.
CONSULS: No local representation.
REPAIRS: Not possible ashore, except very minor ones.
REPATRIATION: No difficulties.
TIME: GMT plus 1 hour. No changes.
HOLIDAYS: In principal, no work done on legal holidays.
POLICE/FIRE/AMBULANCE: Police, tel. 332011; Fire, 332017; Ambulance, 332011.
TELEPHONES: No connections can be made on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Ponts et Chaussees, Service Maritime.
AGENT: See "Marseilles".

LA ROCHELLE/LA PALLICE: 46.10 N. 01.14 W. (See Plan)

DOCUMENTS:
4 Cargo Manifests, or Manifest of Ballast.
Certificate of Cargo Space.
3 Bills of Lading.
Ship's Provisions List.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Certificate of Crew Personal Effects.
PILOTAGE: Access from sea is through Pertuis d'Antioche, the strait between Isle of Re and Isle of Oleron. Pilotage compulsory for all vessels over 55 m. length. Pilot launch named *Armeria*, meets vessels at Chauveau Buoy in position 46° 06' 05" N. 01° 16' W. Contact Pilot via VHF Channel 16, 2 hours before arrival. ETA should be given to Agent 12 hours before arrival.
Vessels which do not receive berthing instructions on arrival should wait in the vicinity and South of Chauveau Buoy, keeping watch on VHF Channel 16.
ANCHORAGE: About 330 yds. South of the end of the outer mole in depths of 36 ft. Mud bottom, good holding ground. In Westerly winds may be preferable to shelter nearer Isle of Re where water depth is 59 ft.
RESTRICTIONS: Vessels in excess of 360 ft. length can enter Inner Basin only from 2 hours before to 1 hour after high water. Loaded tankers over 5,000 d.w.t. may enter tidal harbour in daylight hours only.
MAX. SIZE: Outer pier mole, draft 30-40 ft. Tidal harbour, length 560 ft., draft 29 ft. Wet dock (inner basin), max. beam 69 ft., draft 25 ft. 6 in. neaps, 30 ft. springs.
HEALTH: Pratique given by Customs officers who board on arrival. In case suspected disease on board, radio Agent in advance advising details.
RADIO: Bordeaux-Arcachon Radio.
TUGS: Join vessels either in outer roads or inner roads of La Pallice. Normally tugs' lines are used.
STEVEDORES: Normal working hours for stevedoring are: 0800 to 1200 hrs. and 1400 to 1800 hrs. 2 hours overtime may be worked from 1800 to 2000 hrs. When a quick despatch must be given to a vessel, an 8-hour shift can be arranged, from 0500 to 1300 hrs. and 1400 to 2200 hrs. during the week, and 0500 to 1300 hrs. on Sundays and holidays.
MEDICAL: All facilities available. Advance notice should be given if assistance required on arrival.
TANKERS: Only refined products are discharged at La Pallice.
1. Oil berths situated at West side of outer pier mole, in depths of 31 to 36 ft. low water.
Service Essence Aux Armees: flexible hoses 250 mm. diameter.
Petroles de L'Ouest: pipe-line of 200 mm. diameter. Metal loading arm of 200 mm. diameter.
Picoty: pipe-line of 200 mm. diameter.
2. Oil berths at North quay in tidal harbour in depths of 26 ft.
Raffineries du Midi: Pipe-line of 250 mm. diameter, hoses 200 mm. diameter.
Petroles de L'Ouest: Pipe-line of 300 mm. diameter, hoses 250 mm. diameter.
Total: Pipe-line of 200 mm. diameter, hoses of 150 mm. diameter.
Essence Aux Armees: Pipe-line and hoses of 200 mm. diameter.
FRESH WATER: Available from all wharves. No barges available. Loading rate from the quay 60-75 t.p.h.
FUEL: Available by pipe-line at North Quay in Tidal Harbour. Otherwise supplied by tank trucks only.
FIRE PRECAUTIONS: Tanker berths are enclosed or surrounded by a barrier system. Smoking is prohibited on the tanker berths. The presence of a fire guard or representative of the fire service is necessary while a tanker is alongside the quay.
OPENING/CLOSING HATCHES: Performed by ship's crew.
GANGWAY/DECK WATCHMEN: Available from shore if required. Necessary for tankers loading/discharging cargo.
CUSTOMS ALLOWANCES: 200 cigarettes and bottle wine/spirits per man.
IDENTIFICATION CARDS: Crew men going ashore should carry passports or identity cards.
CONSULS: No local representatives.
REPAIRS: All kinds of deck, hull and engine repairs can be carried out by Ateliers et Chantiers de La Rochelle-Pallice.
Vessels not exceeding 21 m. beam may be repaired in the inner basin. Larger vessels are repaired at berths outside the inner basin.
DRY DOCKS: 2 dry docks in Inner Basin: 577 ft.×72 ft. and 351 ft.×41 ft.
REPATRIATION: Can be arranged without difficulty.
TIME: 1 hour ahead of GMT. No change.
HOLIDAYS: New Year (1st January), no labour available; Easter Sunday, possibility of labour with overtime; Easter Monday, no labour available; Labour Day (1st May), no labour available; Ascension Day, possibility of labour with overtime; Whit Sunday, possibility of labour with overtime; Whit Monday, no labour available; National Day (14th July), no labour available; Assumption Day (15th August), no labour available; All Saints' Day (1st November), no labour available; Armistice Day (11th November), possibility of labour with overtime; Christmas Day (25th December), no labour available.
N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100% extra.
POLICE/AMBULANCE/FIRE: Police Secours 17; Commisariat Central 41.22.44; Ambulance 18; Fire Service 18.
TELEPHONES: Telephones are available at all berths at the mole, and are obligatory for vessels handling dangerous cargo.
SHORE LEAVE: Allowed, no restrictions.
GENERAL: Old harbour at La Rochelle is used only by fishing vessels and pleasure craft.
AUTHORITY: Capitainerie du Port de La Rochelle-Pallice.
AGENT: See "Paris".

LE HAVRE (Including Antifer): 49.30 N. 00.07 W. (See Plan)

DOCUMENTS: At arrival in-bound bill tendered by Pilot to be filled up and signed by Master specifying ship's data and more especially open spaces occupied (shelter) and dangerous cargo on board. After berthing:
For Custom's Officers
1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
For Health Officers
1 Crew List.
1 Health Declaration.
Deratisation Certificate.

1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
Individual international Certificates of Vaccination.

For Custom Broker
1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Certificate of open space occupied by cargo.
1 Passengers' Manifest (disembarking).
1 Baggage Manifest (non-accompanied).
Tonnage Certificate.

For Agents
1 Crew List.
2 Passengers' Manifests (disembarking).
2 Passengers' Manifests (in transit).
2 Baggage Manifests (accompanied).
2 Baggage Manifests (unaccompanied).
2 Dangerous Cargo Manifests and usual cargo documents.

For Immigration Office
1 Crew List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

PILOTAGE: ETA to be sent to Harbour Master (see Radio). Advisable then to confirm directly either to Pilot boat *Francoyse de Grace* (call sign FNZH) or to Havreport between 24 and 12 hours before arrival (see Radio). Pilot boats have black hull with "Pilote Havre" in white letters on both sides, white funnel with black top stripe, green flag with white anchor on fore-mast. Located off Le Havre channel entrance East of the intermediate landfall buoy (LH). Pilot boat on continuous service, a helicopter is also available.

Vessels may anchor near LH South of entry alignment in good weather and further off in bad weather.

Light or sound signal to be made by vessels requiring a Pilot, letter "G" in morse code.

ANCHORAGES: Anchoring forbidden in the channel between both parallels 100 m. South and North of channel and in a zone 1 nautical mile long and 500 m. wide in prolongation of channel.

RESTRICTIONS: Depth in main channel 51 ft. LW. Depth in tidal basin 49 ft. LW.

Main lock entrance to enclosed basins, length 1,312 ft. width 220 ft., depth 49 ft.

Vessels berthing in tidal docks (Bassin Theophile Ducrocq) dependent on tide if draft in excess of 30 ft.

Quinette de Rochemont Lock open from 2 hours 20 min. before high tide until 40 min. after. During this period vessels of max. length 210 m. and max. breadth 26 m. may pass through. Otherwise max. length authorised is reduced to 180 m. In some circumstances some locks are completely closed around low tide.

CIM Berth No. 10 may receive tankers up to 300,000 d.w.t. with draft varying between 63 and 68 ft. depending upon tide. Such vessels enter only by daylight and must arrive at Lightvessel at least 3 hours before high water.

MAX. SIZE: Tankers: length 1,300 ft., draft (approx.) 65 ft. subject tide. Largest vessel recorded is a tanker, length 370 m., beam 64 m., draft 20.67 m. and deadweight 290,875 metric tons.
Bulk Carriers: Up to 90,000 tons.
Antifer: "See Tankers."

HEALTH: Free pratique automatic for vessels coming direct from Continent or Italy and "Q" flag not to be flown. From other countries including Spain and Portugual usual applies. Free pratique may be obtained by radio message to Sanipor Le Havre specifying name of vessel – where coming from – total number of Crew members, number of Crew members vaccinated (smallpox, yellow fever, cholera).

Tankers: For tankers it is advisable to ask free pratique by radio in order to start operations as soon as vessel berths.

RADIO: Masters of ships are requested to send to Le Havre Harbour Master their expected time of arrival at Le Havre lightvessel.

The message will be sent through radio stations of: Boulogne-radio/FFB (working frequencies 1771 kHz and 2747 kHz) or Brest le-Conquet radio/FFU (1806/2726 kHz).

It will give the date and time GMT of ETA, and the maximum draft. It will be sent about 12 hours before arrival and corrected by another message if necessary. This service is free. Same stations of Boulogne and Brest to be used to contact Agent and in addition Saint Lys/FFL.

Port operation radio service: The Havreportradio station keeps a permanent watch on the following frequencies: 156.6 mHz (Channel 12); 156.8 mHz (Channel 16); 157.0-161.6 mHz (Channel 20 duplex). This station sends and receives all messages for the port operations control.

Ships call Havreportradio directly on Channels 12 or 20. Ships arriving, leaving or moored on roads *must keep watch on Channel 16.*

Ships with Pilot on board must keep watch on Channels 12 or 20 from Pilot on board until arrival at berth, and from departure of berth until disembarking Pilot. Havreportradio/FFY keeps watch on 2.182 kc/s. This frequency will be used only in a radius of 22 miles from Havre lightship and only when it is not possible to use VHF.

RADAR/VHF: Radar assistance may be obtained by calling Le-Havre-Radar on Channel 16 (156.80 mHz). Then working frequencies are Channels 14 and 22.

TUGS: 19 tugs available, from 650 to 4,000 h.p. Normally join vessel inside the jetties in outer harbour. Ship's lines or tug's lines used at ship's option. Extra charge for use of tug's line.

BERTHING: Agents generally inform Master by radio of berthing prospects, arrival time limits and any special requirements.

BULK HANDLING FACILITIES: *Ore Berth:* Situated South side of Mole Centrale. Accessible to 90,000 d.w.t. ore carriers. Equipment includes 4 unloading gantries, each with max. capacity 500 t.p.h.

Grain: Quai Hermann du Pasquier for ships up to 30,000 d.w.t. 3 elevators capacity each 280 t.p.h.

Quai Joannes-Coubert: for ships up to 60,000 d.w.t., 2 elevators each 600 t.p.h. capacity.

Containers: Quai de l'Atlantique: Length 800 m., 3 berths for large vessels, one of which is also equipped to handle roll-on/roll-off traffic.

4 gantry cranes of 40 ton capacity with 35 m. extension, at quay's edge. 2 French Railway's gantries for handling on to wagons. 1 7,000 sq. m. shed under construction near to terminal for container groupage and breaking bulk. 16 hectares open air areas. Extensive parking facilities.

Quai de l'Europe: Length 900 m. 4 berths for large vessels, one of which is also equipped to handle roll-on/roll-off traffic.

4 gantry cranes of 40 tons with 40 m. extension, at quay's edge. 1 shed 10,108 sq. m., 1 shed of 7,023 sq. m., already used for groupage and break-bulk of containers and 1 shed of 10,000 sq. m. under construction.

2 S.N.C.F. gantry cranes for loading and unloading of wagons. 45 hectares of open air areas. Extensive parking facilities.

Methane: The Gaz de France Methane Terminal situated at Western end of tidal basin with one berth for vessels up to 755 ft. length.

Roll-on/roll-off: Three berthing places in the tidal basin, five berths in the wet dock, eight berthing places in the non-tidal docks.

Liquid Chemicals: at the berths of "Societe Normandie de L'Azote", "Sogestrol", and "Petrochimie" along the "Canal Central Maritime".

BRIDGES: No special restrictions. Opened upon request. Master will be informed as above in case any bridge stopped for repairs.

STEVEDORES: 2 Normal shifts (0700-1500 hrs. and 1500-2300 hrs.) every week-day including Saturday. Night shift in overtime 2300-

0700 hrs. For fruits and reefer cargo and passenger ships possible working 2 hours overtime before morning shift to start at 0500 hrs. subject ordering gang the previous day at 0600 hrs., with 23 hours notice to stevedores. Night gang ordered the same day at 1400 hrs. with 9 hours notice to stevedores (same consequently involves 36 and 12 hours notice to Agents for morning and night overtime respectively).

For vessel completing loading/discharging may order 2 hours overtime from 1500 to 1700 hrs. after morning shift or only 1 hour overtime from 2300 to 2400 hrs. after afternoon shift. No possibility of dividing the shift of 8 hours. Consequently time lost between completion of work and end of shift is charged to the vessel at the cost of about Frs. 560.00 per hour (depending upon type of cargo).

No work possible on Sunday and legal holidays nor during night between Sunday or holiday and next working day. Necessary to give Agent soonest possible accurate ETA and hatch partition in order to enable his arranging work at the best, keeping in mind that shift cannot be split.

Work done with shore crane. Ship's derricks used only exceptionally. No hatch tents available from shore.

It is compulsory to put a net under the gangway before starting work, for lack of which stevedores refuse to go on board.

MEDICAL: It is not necessary for Agent to receive advance notice of required medical attention except when Master requests a doctor on board. The Master must after berthing inform Agent of number of patients and nature of disease, name of patient, rank, in order Agent may arrange corresponding appointment with doctors, dentists, specialists, etc. Hospital facilities available provided admission ordered by local doctor.

Inoculation. Yellow fever – effected only at the hospital once per week on Thursdays 1400 to 1500 hrs. Other inoculations may be effected by local doctors (with appointment) but smallpox may also be effected at the Town Hall sanitary office on Tuesday and Saturday from 0900 to 1200 hrs.

TANKERS: Berth at C.I.M. piers No. 1 to 10. Diameter of connections at different berths of C.I.M.: No. 3, 4 and 5, 10 in.; 6 and 7, 12 in.; 8 and 10, 16 in.

Tankers calling first time at Le Havre recommended to inform Agents of position of manifold connection. Slop reception facilities available up to 1,000 t.p.h.

Antifer:

The port of Le Havre – Antifer, attached to the port of Le Havre which covers it administratively, is a port on the coast, located 4 km. South of Cape Antifer, at Saint-Jouin-Bruneval.

It is an oil terminal, designed to accommodate during a first stage vessels of 540,000 d.w.t. and of 28.5 m. draft.

The port comprises: A breakwater 3,500 m. long protecting the port in its Northern area and starting at Groin Point, 3 km. South of Cape Antifer. A manoeuvring zone. A dry-land area of 35 hectares at the foot of the cliffs intended for hydrocarbon storage and for port operation installations. A 8 hectare service port. A mooring installation with 2 positions for tankers. The oil discharged into storage tanks is pumped away to installations in Le Havre port, by means of a pipe-line of 42 in. dia. and 25 km. long.

Tides and Currents: At Antifer, the influence of the Seine estuary is much less than at Le Havre. The tidal curve is of the sinusoid type, without, however, being perfectly symmetrical. Slack water only lasts a short while (about 20 minutes). With winds from the North to East, there is a drop of about 0.25 m. to 0.50 m. increasing with the amplitude of the swell.

With winds from the South to N.W., passing through a Westerly point, there is either a slight drop (0.15 m.) or a rise corresponding to the extent of swell and sometimes reaching 0.75 m.

Tidal currents are alternating in their direction and generally parallel to the coastline. With Spring tides they reach a speed of 3 knots.

The breakwater protects the port from the action of ebb currents.

Access: Vessels coming into the Port of Le Havre-Antifer will find 35 miles from the coast landfall buoys "A0", "A1" at the limit of the 50 m. depths.

Access is as follows: *An Approach Route* of a width of 3 miles and extending from the landfall buoys "A0" and "A1" on a bearing of 118.5° for 22.7 miles.

A Waiting Area which has the approach route on its Southern edge. It has the form of a trapezium 2 miles in length. The Western commencement of the large base of this area is marked by buoy "A3". It incorporates 2 anchoring areas: the N.W. area for vessels of more than 25 m. draft, and the S.E. area for vessels of less than 25 m. draft. The 2 areas are separated by buoy "A5".

A Connecting Area trapezoidal in shape and 2.5 miles in length, connecting the approach route to the approach channel.

An Approach Channel, 1,000 m. wide, marked on its Northern edge by buoys "A8", "A12", "A14", "A16", "A18", and on its Southern edge by buoys "A7", "A9", "A17". This channel is orientated in the same direction as the approach route on a bearing of 118.5°. Buoys "A7", "A8" and "A9" form at the entry of the channel a triangle easily identifiable by radar.

An Access Channel 3.5 miles long, 700 and then 550 m. wide and on a bearing of 127.5°. It is marked by 4 pairs of buoys: "A19/A20", "A21/A22", "A23/A24", "A25/A26". Its depth varies from 25 to 22 m. By dredging, during 1976 it will be brought to a uniform depth of 25 m.

A Separation Area adjacent to and to the South of the access channel, allowing vessels on entering to make a half-turn to come out of the channel and then come if necessary to the waiting area. The centre of this area is marked by buoy "DA".

A Swinging Area sheltered by the main breakwater, marked to the South by buoy "A27", and to the East by buoy "A29". This area is dredged to a depth of 21 m. and this will be increased in 1976 to 25 m.

The conditions of current (direction and force) and the height of the tide determine, in terms of the drafts of vessels, the periods during which the port may be entered, and which are somewhere between full and low tides.

Vessels must, therefore, on leaving the separation area, follow entry instructions given to Captains by the Pilots, with the agreement of the Port Captaincy of Havre-Antifer.

Pilotage: The Pilot is taken onboard in the waiting area in the disengagement area by means of a pilot boat, a launch or the helicopter allocated to the Le Havre pilotage service.

Port: To the N. of the swinging area, is the mooring area dredged to 26 m. allowing access to 2 alongside berths which have depths of water of 29.80 m.

The service port is reserved for the mooring of tugs, pilot boats, anti-pollution equipment (barrages) and servicing equipment.

Arrival Advice: Captains of vessels destined for Antifer, as well as those whose vessels may enter either Le Havre or Antifer, must send to the Port Commandant of Le Havre a message stating the date and time GMT of their arrival at the Antifer landfall buoys or at the Le Havre lightship and stating the draft of their vessel.

This message must be sent via a coastal station at least 12 hours in advance and confirmed by a VHF message 3 hours prior to arrival at the landfall buoys of Antifer or at the lightship. In return, the vessel will receive from the Havre Port station all information and necessary instructions.

Radio: The Antifer port captaincy (call sign HAVRE-ANTIFER) listens out permanently on the following frequencies:

156.8 mHz. (Channel 16)
157.10 – 161.7 mHz. (Channel 22). VHF

If Channel 22 is not available on board the vessel, Channel 14 (156.7 mHz) can be used after having first called up on Channel 16.

Radio communications are used for: Port operations (movements of vessels) and guiding vessels during times of fog.

Radar Assistance: During times of fog, radar assistance is supplied to vessels by the radar located on La Heve lighthouse (guidance provided by the Semaphore Lookout of Le Havre) as well as by the radar of the Oil Terminal (guiding provided by the Captaincy of Antifer). Vessels requiring radar guidance must start by requesting it on the call-up frequency (Channel 16). Only after an affirmative reply can they switch in to the connections affected by radar, taking necessary precautions (listening out in advance) not to disturb a guiding process already taking place. Assistance is given in strict rotation of requests. Information is supplied free of charge in French and in no way renders the Port Authority responsible. Such information covers the following: route clear or not, vessels anchored or under way in the vicinity, successive positions in relation to the landfall buoys, possible position of the pilot vessel, then guidance in the channel as far as the swinging area and mooring area.

Syledis: A system of aid to navigation and to manoeuvring, covering the receipt on board the vessels of parameters covering in particular the position, the speed, is in the course of being tried out. It requires the Pilot bringing on board a small transmitter/receiver.

Aids to Manoeuvring: In order to facilitate swinging manoeuvres and mooring of large tankers, the port of Antifer has 3 lights of different colours, the positions and characteristics of which are as follows:

Access guiding light (on the open storage area at the foot of the cliffs) – light with red, white, green sectors, regularly flashing (4 s.) the red sector to the North the green to the South.

Guiding lights for coming alongside (on the breakwater).

West light (position 3) – light of red, white, green sectors, regularly flashing (4 s.) – Red sector to the East, green to the West.

East light (position 2), light of red, white, green sectors, flashing twice (6 s.), red sector to the West, green to the East.

Each quay berth is equipped with aids for mooring comprising luminated panels showing the distance to the berthing point of the bow and the stern of the vessel; the speed (in cm/sec.) of approach or pulling away of the bow and stern of the vessel in relation to the berthing point.

Fresh Water/Fuel: Supplied by pipe-lines on the berth (S.H.M.PP. depot).

Cranes: 2 cranes of 2.5 tons capacity on the berth (1 per position). Berth for heavy items in the service port – handling by mobile crane.

Floating Equipment: Pontoon for transporting heavy items.

Tugs: Stationed in the service port 1 or 2 tugs of 3,600 h.p. Other tugs required for manoeuvring come from Le Havre.

Pollution: Barrages laid on pontoons in the service port can be very quickly placed into service.

General Information:

Port Captaincy: In the operating building of the C.I.M. (2nd floor) located in the open area at the foot of the cliffs. It will be transferred in 1976 to the operating building of the Port Authority, on the open land area of the Service Port.

Telephone: Port Officers 22.54.28 – Operating 22.54.64 and 22.56.27.

Pilot's office: In the C.I.M. operational office (2nd floor).

Customs: In the C.I.M. operational building (1st floor).

Towing: The Les Abeilles company on the pontoon in the service port.

Pilotage: In the C.I.M. operational building (1st floor).

Police: In the C.I.M. operational building (1st floor).

C.I.M. Depot: 27.21.10 – 21.21.77.

S.H.M.PP. Depot: 27.20.73.

Communications: By buses from Saint Jouin. The airport of Le Havre – Octeville is 16 kms. to the South of Antifer.

Control tower: Tel. 46.38.02.

Operating: Tel. 46.09.81.

DENSITY: In outer port and tidal docks: salt water. In inside docks brackish. Density depending upon season and amount of fresh water brought in by river Seine and Canal de Tancarville.

FRESH WATER: Most berths supply by shore hydrants. Otherwise by barge minimum quantity invoiced then being 50 c.b.m. Overtime charged in addition. Late cancellation of barge invoiced.

FUEL: All grades available, viscosities from 200 sec. to 3000 sec. Redwood. Minimum 48 hours advance notice required to prepare barges.

FIRE PRECAUTIONS: Dangerous cargo must be declared on "Inbound Bill" and in order not to delay vessel's entry it is highly recommended to inform Agent of quantity and exact nature of dangerous cargo on board 48 hours prior to arrival, thus enabling Agent to get in touch with Harbour Master and take necessary steps which may go from a single smoking prohibition up to a fire-picket on the quay during all the call.

Tankers: A "notice to Master's of ships loading/unloading hydrocarbons" is handed to Master upon arrival. This notice specifies *inter alia:* repairs, ventilation/cleaning of tanks, handling of goods subject to Harbour Master's authorisation. All naked lights and fires prohibited, boiler furnaces and galley ranges excepted, such exception cancellable on simple order of Harbour Master or Depot Manager.

DEVELOPMENTS: The new oil terminal of Havre-Antifer, built to the South of Cape Antifer will have 2 installations enabling vessels of 550,000 d.w.t. to be received at all states of the tide. Shelter will be created by a protective mole 3,520 m. in length. At the foot of the cliff, there will be a service port and open-air work areas. An access channel 550 m. wide to a depth of 25 m. will be dredged.

A second stage will see the provision of 2 further installations after further deepening of the sea to 30 m. in order to take vessels of 1,000,000 d.w.t.

GANGWAY/DECK WATCHMEN: Not compulsory. Sworn watchmen in uniform and equipped with a VHF set may be obtained from the Port Authority per hour for day and night, working days and holidays. Some other companies may also supply watchmen (not sworn) at lower prices.

OPENING/CLOSING HATCHES: May be done by stevedores at the same price as shifting of cargo depending upon the type of cargo and consequent number of men included in the gang.

It is highly recommended to carry out opening by the crew before beginning of shift to avoid both loss of time and expensive charges and also risk of accident to stevedores who are sometimes not well aware of vessel's closing system.

It is emphasised that for reefer cargo stevedores wait for cold exhaust half an hour after opening hatches before getting down in the holds. Consequently it is strongly advised to stop ventilation and start opening hatches with crew about 1 hour before beginning of shift keeping in mind that for reefer cargo, the morning shift may commence at 0500 hrs.

CERTIFICATES:

Tonnage Certificate.
Safety Construction Certificate.
Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Deratisation Certificate.
Cargo Gear Register.

(Fresh water analysis certificate may also be requested.)

CUSTOM'S ALLOWANCES: 200 cigarettes or 200 grammes tobacco plus 1 bottle spirit (must be mentioned on crew declaration list). Crew members may obtain extra allowance but only after 5–6 days' call.

CARGO GEAR: Cargo handling usually carried out by means of shore cranes. Hatch-tents to be supplied by vessel.

CREW IDENTIFICATION CARDS: Not required. Recommended to have passport or seaman book to go ashore.

CONSULS: The following countries have representatives at Le Havre:

Brazil	Haiti	Peru
Colombia	Netherlands	Salvador
Dominica	Argentina	Uruguay
Guatemala	Switzerland	Chile
Italy	South Africa	Costa Rica
Portugal	Panama	Ivory Coast
Sweden	Denmark	Spain
Germany	Belgium	Finland
Mexico	Norway	Japan
Great Britain	Greece	Liberia
Ecuador	Honduras	Madagascar
Venezuela		

REPAIRS: Several companies including Ateliers et Chantiers du Havre available to handle all types of hull and engine repairs. 5 berths available for repairs afloat.

DRY DOCKS: 7 dry docks available, largest of which is 1,095 ft. working length and 125 ft. width for vessels up to 80,000 d.w.t.

REPATRIATION: Except if airplane chartered by Owners, all crew have to pass through Paris.

AIRPORT: Le Havre airport 7 km. from the centre of the town, with a runway of 1800 m. × 40 may receive chartered planes up to 40 tons total weight (50 T. with special authorisation). Regular flights from and to Orly (Paris Airport) twice a day, holidays excepted.

TIME: GMT plus 1 hour from 26th September to 28th March and GMT plus 2 hours 28th March to 26th September.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Holiday (July 14th); Assumption B.V. Mary (August 15th); All Saint's Day (November 1st); Armistice Day (November 11th); Christmas Day (December 25th). No work possible except for passenger ships and tankers the latter being loaded/discharged round the clock every day.

POLICE/FIRE/AMBULANCE: Police 17 or 48.15.20; Fire Brigade 48.05.77 or 18; Ambulance 42.30.68 or 42.46.46; Hospital 42.77.83.

TELEPHONE ON BOARD: Possible at most berths.

SHORE LEAVE: Authorised within port and town area. Foreign seamen wishing to go further and more especially to Paris must obtain police authorisation and consequent pass.

REGULATIONS: Vessels carrying dangerous cargo must when on roads or in the entrance channel, show the red flag by daylight or 1 red light by night-time. When leaving the port they must keep their Pilot up to the end of the channel.

AUTHORITY: Port of Le Havre Authority.

AGENT: Jolasry (France), 10 Place Leon Meyer, PO Box 846, 76060 – Le Havre. Telegraphic address "Jolasry". Tel. 42.18.32 and 42.12.05. Telex 19708.

LORIENT: 47.45 N. 03.21 W.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for all vessels over 60 m. length. Vessels must contact pilot station advising ETA at least 6 hours before arrival by radio to the pilot station. On arrival at the outer roads or Groix vessels should call Pilot by VHF Channel 16. The pilot launch will be standing by from 1 hour before to 1 hour after the ETA previously advised by the ship. The pilot station is manned 24 hours per day. Pilot station telephone number 210678.

ANCHORAGE: The outer roads of the port are open to winds from the Southeast to Southwest. Vessels waiting to enter the port may anchor in depths of 15–20 m., sand and shell bottom, good holding ground.

Mooring buoys are positioned off Port Tudy on the North coast of Ile de Groix. These buoys are reserved for the use of the French Navy. There are prohibited zones for anchoring due to presence of submarine cables, marked on chart.

RESTRICTIONS There are 2 entry channels to the port. The South channel, depth 3.6 m. is used exclusively by local fishing boats. The West channel is marked by the alignment of Kerbel Light and Lohic Light. The depth in this channel is 6.25 m. Both channels are very well marked.

Traffic signals are hoisted at Port Louis Citadel as follows: Red flag or red light – entry prohibited. Green flag or green light – exit prohibited. Red over green flags or lights – port closed.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessels should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Use local station Radio Conquet or Radio Saint-Nazaire.

TUGS: 2 tugs up to 700 h.p. – 3 tugs up to 200 h.p. They belong to the French Navy.

BERTHING: Kergroise Quays, 568 m. berthing length can accommodate vessel up to 220 m. length, draft 7.50 m. at the Northern part of the quays. Draft 7.2 m. at the Southern part of the Quays. Quays are being dredged to a projected draft of 9.0 m. in the Northern part.

7 cranes in service including 16-ton crane.

TANKERS: The oil jetty is 112 m. long and can accommodate tankers up to 180 m. length, max. draft 10 m.

FRESH WATER: Can be supplied from the quays at Kergroise and at the Oil Jetty. Rate 10 t.p.h.

REPAIRS: Minor deck and engine repairs can be carried out. Slipways can accommodate 4 fishing boats at the same time. There are 3 dry docks the largest of which is 186.20 m. long×26.33 m. wide.

MEDICAL: All facilities available. Local maritime and civil hospitals.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

CONSULS:

Norway
Denmark
Netherlands
Sweden.

TIME: GMT plus 1 hour – no alterations.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July no labour available); Assumption Day (15th August no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December,

no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.
POLICE/FIRE/AMBULANCE: Police 21 19 16; First Aid 17; Ambulance (97) 65.33.44; Fire 18.
AUTHORITY: Ingenieur des Traveaux Publics de l'Etat, Ponts et Chaussees.
AGENT: See Paris.

MARSEILLES: 43.18 N. 05.25 E. (See Plan)

2 Provisions Lists.
2 Lists of Passengers in Transit.
2 Lists of Passengers disembarking.
1 List of Ports where cargo is loaded for Marseilles.
Cargo Manifests and Bills of lading.
1 List of Crew Personal Effects.
PILOTAGE: *Arrival:* Contact port authority by VHF on Channel 16, changing to Channel 12. M.W. Station, call on 2049 kHz. Station on 1933 kHz. ("Marseille Port") Compulsory. 21 pilot launches, mostly painted black, wooden hulls with white anchor insignia on the bow.
Contact pilot station and pilot boats by VHF Channel 8.
Southern Entrance: Pilot boards between "Le Frioul" and "Chateau d'If" island. Max. recommended draft 27 ft. in good weather.
Northern Entrance: Pilot boards at Estaque roads. In case of strong N.W. winds or for all deeper draft vessels the Northern entrance is preferred.
Vessels anchoring in roads without a Pilot will still incur full pilotage fee.
On departure, 15 to 30 minutes notice sufficient to order Pilot and tugs.
ANCHORAGE: Estaque Roads.
MAX. SIZE: Draft dependent on berth depth up to max. of 47 ft. 6 in.
HEALTH: Free pratique automatic vessels coming direct from continent or Italy and Q flag not to be flown. From other countries – including Spain and Portugal – usual procedure applies. Unless special arrangement for passenger liners free pratique not given by radio also practice issuing Health or Customs clearance on sailing now discontinued.
RADIO: Within 150 miles Marseilles Radio/FFM – otherwise St. Lys/FFL.
TUGS: About 40 tugs available, from 250 to over 3,000 h.p. Ship's lines normally used.
BERTHING: When specific side alongside berth required. Agents radio Master prior arrival also advise Pilot. Otherwise side alongside at discretion Master after conferring with Pilot.

Docks:	*Max. depth:*	
Grande Joilette	9.80 m.	24 berths
Arene	8.00 m.	10 berths
National	10.50 m.	15 berths
Pinede	10.00 m.	14 berths
Leon Courett	14.50 m.	6 berths
	10.5–12 m.	8 berths
Mirabeau	15.00 m.	15 berths
North and South outer harbours	—	5 berths
Ship repairs:		30 berths

BRIDGES: Turning bridge near Southern end of port – Pont d'Arenc – opens on requests. Bridge further North – Pont de la Pinede – opens: 0600 to 2200 hrs. twice each hour between 5 minutes before the hour and 5 minutes afterwards, and between 5 minutes before half hour and 5 minutes afterwards. Open continuously 2200 to 0600 hrs.
STEVEDORES: Enable Agent order gangs important obtain in good time accurate ETA from vessels. Latest times to order gangs; normal and deferred shifts 0530 hrs. same morning – night shift 1600 hrs. same day – Saturday and Sunday, 1600 hrs. Friday. Failure give precise ETA may result in ship losing 12/24 hours also cost gang waiting time includes waiting vessel's arrival – free pratique – opening/closing hatches – rain – shifting cargo or dunnage – crane or derrick break-downs – time lost between finishing and end of shift. Work can be arranged on following official holidays – New Year's Day, Easter and Easter Monday, Whitsun, 14th July, 15th August, 1st November, Christmas Day, 1st May holiday when no work takes place, Stevedoring hours (normal shift) Monday to Saturday, 0630–1310 hrs. and 1320–2000 hrs. (Two shifts). Sunday, 0630–1310 hrs., if required – one shift 0800–1130 hrs. and 1300–1620 hrs. Night work if required 2200–0400 hrs. One hour overtime may be worked before 0630 or after 0730 hrs. No work allowed Sunday night. All necessary gear supplied by stevedores except rain tents which vessel must supply.
MEDICAL: Yellow fever inoculations only in hospital. Tuesdays and Friday. Masters to advise by radio prior arrival if medical attendance required aboard.
TANKERS: See "Port de Bouc", and "Fos".
DENSITY: About 1028.
FRESH WATER: Can be obtained from hydrants or quays or from water-boats. When delivered by barge, min. quantity invoiced is 50 tons. Preferable order prior arrival to avoid delays. Min. pumping rate 50 t.p.h.
FUEL: Ordinary fuel, also fuel oil max. 1000 secs., Diesel and Gas oil. Deliveries by barge only.
FIRE PRECAUTIONS: Special harbour fire-fighting corps, with two fire-fighting Vessels.
DEVELOPMENTS: See "Fos".
WATCHMEN: Available but not compulsory.
HATCHES: Crew allowed open and close.
SHIP CERTIFICATES: On first call Registered Tonnage Certificate; thereafter not required unless Gross/Net tonnages changed.
CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.
CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.
IDENTIFICATION CARDS: Not required.
CONSULS: The following countries are represented in Marseilles:

Algeria	Guatemala	Panama
Argentina	Haiti	Peru
Austria	Honduras	Philippines
Belgium	Iceland	Portugal
Bolivia	Israel	Senegal
Brazil	Italy	Spain
Canada	Ivory coast	Sweden
Colombia	Japan	Switzerland
Costa Rica	Lebanon	Thailand
Cuba	Liberia	Tunisia
Cyprus	Madagascar	Turkey
Denmark	Mauritania	U.S.A.
Dominica	Mexico	U.S.S.R.
Ecuador	Morocco	Uruguay
Egypt	Netherlands	Venezuela
Finland	Nicaragua	West Germany
Great Britain	Norway	Yugoslavia
Greece		

REPAIRS: Most repairs and overhauls possible. Pre-advice recommended.
DRY DOCKS:

	Working lengths	*Entry width*
No. 1	561 ft.	63 ft. 3 in.

5	400 ft.	41 ft.
6	410 ft.	50 ft. 8 in.
7	656 ft.	80 ft. 8 in.
8	1,049 ft. 7 in.	164 ft.
9	820 ft. 6 in.	121 ft. 3 in.
10	1,525 ft.	276 ft. 11 in.

Depth 9.50 m. (31 ft. 2 in.)

POLICE/FIRE/AMBULANCE: Police 91 90 40; Ambulance 17; Fire Brigade 18; Special Port Fire Brigade 50 36 70 and 62 36 58.
GAS FREEING STATION: Suitable for tankers up to 28 ft. draft.
The Station is equipped with:
Boilers able to supply 34 tons of steam per hour.
A pumping station supplying hot water for cleaning, fresh water for ballast, and which is also used for transfers.
A separator for the discharge of dirty ballast able to work at 1,200 cu.m. per hour.
Two receiving tanks of 2,000 cu.m.
One tank of 500 cu.m. for treatment and 1 for subsequent storage with a capacity of 2,000 cu.m.
One extractor for removal of all traces of oil including sludge.
The Station can supply all the necessary fluids for cleaning and gas freeing (salt water, hot and cold water, fresh water, compressed air and electric current.)
From the vessels the installation receives dirty ballast and water which goes through separators.
AUTHORITY: Le Port Autonome de Marseille.
AGENTS: Jolasry (France), 6 Boulevard de Dunkerque. Tel. (91) 20 39 17, Telex. 410821. Cables: Jolasry.

(b) PORT DE BOUC, including Port de Lavera 43.23 N. 05.00 E., Port de Berre 43.27 N. 05.10 E., Port de la Mede 43.24 N. 05.07 E. Caronte 43.24 N. 05.02 E.

DOCUMENTS: On arrival:
1 Cargo Manifest or manifest in ballast.
Certificate of open spaces occupied by cargo in cu. ft. or cu. m. or in registered form if shelter deck.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or U.S.S.R. ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Deratisation Certificate.
Bunker's Supply (3 forms).
1 Crew Declaration of Personal effects – cameras, binoculars, radios, cigarettes, tobacco, etc. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Call "Port de Bouc Control" on Channel 16. Channel 12 for traffic. Pilot must be taken to enter Port de Bouc, Fos and Port St. Louis du Rhone. Contact by Marseilles Radio or pilot boat VHF (Channel 16 for calling, Channel 14 for traffic). Pilot boards in the Roads between 2 and 2.5 miles S.W. of Bouc Tower or further out if required, for entering Port de Bouc and Fos. Motor launch black hull, white cabin, white anchor on bow, "H" flag.
ANCHORAGE: It is recommended to ask for Pilot before anchoring in outer Roads to avoid forbidden places for ships bound for Port de Bouc and Fos.
RESTRICTIONS: No entry restrictions for Lavera. Night transit of Caronte Canal to Etang de Berre forbidden to tankers above 6,000 g.r.t. Transit of Caronte Canal to Etang de Berre is forbidden for vessels over 180 m. (598 ft.) overall and over 24 ft. draft.
MAX. SIZE:
Lavera: Berths A1, A2, 35 ft. draft. Berths A4, D and E, 40 ft. draft. Berth B, 38 ft. 6 in. draft. Berth C, 39 ft. draft. Berths F and G, 43 ft. 6 in. draft. Berth H, 37 ft. 8 in. draft. Coastal Berths K1 to K8 18 ft. draft.
Kuhlmann, 24 ft. draft and length 427 ft.
Caronte, 29 ft. draft.
Croix-Sainte (Verminck), 24 ft. draft and length 459 ft.
Canal de Caronte (for entering Lake of Berre, for Terminals of La Mede and Berre), 26 ft. and 25 ft. 9 in. for tankers over 18,000 tons.
HEALTH: Pratique given by Customs officers who board on arrival. In case of suspected disease on board, notify Agents by radio before arrival.
RADIO: Within 150 miles traffic through Marseille Radio/FFM, otherwise St. Lys (FFL).
Port de Bouc Radio (Harbour Office) VHF used for navigation purposes only – Channel 16 for call, Channel 12 for traffic.
TUGS: Eleven tugs available from 90 to 1,800 h.p. Normally join vessel in entrance channel off Port de Bouc. Only ship's lines used.
BERTHING FACILITIES:
Lavera:

Caronte – Port de Bouc
Quai de Provence Industrie: length, 140 m.; width, 20 m.; draft, 5 m.
Quai Kuhlmann: length, 130 m.; width, 25 m.; draft, 24 ft.
Quai de Caronte: length, 170 m.; width, 25 m.; draft, 29 ft.
Quai Verminck: length, 140 m.; width, 20 m.; draft, 24.5 ft.
Berre
Two private oil harbours:
La Mede (CFR): length, 110 m.; draft, 7.20 m.; 2 berths for sea tankers Draft, 5.18 m.; 2 berths for small tankers.
Draft, 2.30 m.; 2 berths for barges.
Flow, 100 to 600 cu.m. per hour.
Pointe de Berre (Shell):
Draft, 7.20 m.; 3 berths for sea tankers.
Draft, 3.50 m.; 1 berth for small tankers.
Draft, 4 m.; 1 berth for barges.
Flow, 120 to 250 cu.m. per hour.
BRIDGES: 1 railway bridge and 1 road bridge across Caronte Canal each having special times for opening. Ships of less than 21 m. height clearance may pass below the railway bridge. Motorway bridge over Caronte Canal with 44.60 m. clearance.
STEVEDORES: To enable Agent order gangs important obtain accurate ETA between 24 hours and 48 hours in advance. 2 shifts 0500 to 1300 hrs. and 1300 to 2100 hrs. normally 6 days a week. Confirmation to be made at 0900 hrs. for afternoon shift, and 1700 hrs. for next day morning.
MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio prior arrival if medical attendance is required on board.
TANKERS: Each of the 8 large berths, North and South, A, B, C, D, E, F, G, is fitted with lines for crude oil and all refined products. Pipe-line system leads to distributors (7 for refined products, 2 for crude oil) connected to neighbouring refineries, and to South European pipe-line (crude oil only).
Terminal hose handling: Each berth is fitted with metal gantries hanging up flexible hoses for ship's connection. They are handled with compressed-air winches and ship's boom which should be rigged before arrival.
Flexible hoses diameter: crude oil, four 12-in.; fuel oil (or crude), two 12-in.; white products, one 8-in.; ballast (or crude), one 12-in.; bunkers, one 8-in.; liquefied gas, one 4-in.; special products, one 4-in.
Decanting installation: Tankers may pump out their ballast at all berths – except tank-washing water and slops.
DENSITY: About 1028. Variable in Canal de Caronte and Etang de Berre owing to discharge of hydraulic plant of St. Chamas.
FRESH WATER: Available generally by pipes and hoses at the berths. Water barges available from Marseille.
FUEL: By barges for cargo ships and vessels in the Roads. Tankers at Lavera refuel by pipe-line at the berths. All grades available.
FIRE PRECAUTIONS: Oil Harbour is fitted with a system of 203 mm. (8 in.) or 254 mm. (10 in.) sea water pipes at 5 bars permanent pressure. It may be increased by pumping station up to 9 bars, and supply 500 c.m./h. Each wharf has 5 fire hydrants with first-aid equipment: fire hoses and spray nozzle, foam nozzle with powder cans. If fire breaks out on a ship, the hose handling gantries are protected by a screen of sprayed water. All fire equipment and installations are painted red.
There is a special fire-fighting Corps with fire vessel. Call for firemen 06.21.29 or 26.28.37. In case of fire call Port de Bouc Control – phone 05.22.25 or 06.63.39 or VHF Channel 16.
GANGWAY/DECK WATCHMEN: Available but not essential.
OPENING/CLOSING HATCHES: Always by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days; wine/spirit: limited amount per man.
IDENTIFICATION CARDS: Seamen going ashore should carry passport or identity card.
CONSULS: Norwegian, Swedish, Danish and Spanish consuls at Port de Bouc. Others at Marseille.
REPAIRS: Permission must be granted by Port de Bouc Harbour Master only.
DRY DOCKS: Nearest at Marseille.
REPATRIATION: All facilities for crew change and repatriation by railway or planes.
AIRPORT: Marignane Airport 40 km. and Nice Airport 230 km. (this last for SAS lines).
TIME: GMT plus 1 hour. No changes.
HOLIDAYS: Same as "Marseille".
POLICE/AMBULANCE/FIRE: Police, 06.23.74 or 07.03.31; Fire, 06.21.29 or 06.28.37.
TELEPHONE: On application can be connected on board at Lavera. Telephone ashore in other places.
SHORE LEAVE: Allowed.
AUTHORITIES: Port Autonome de Marseille (Director General and Managers). Capitainerie de Port de Bouc (Harbour Master).
AGENT: Agence Maritime et Fluviale Maurice Pomme, 20 Cours Landrivon, 13 Port de Bouc. Tel. 06.09.89. Telex. 420555. Cables: "Pomme".

Liquid Methane: Gaz de France Terminal, No. 1 basin, max. draft 31 ft. 02 in. Depth 34 ft. 06 in.
Ore Carriers: Private Bulk Berth, No. 1 Basin, East side, length 2,100 ft., max. draft 61 ft. Depth 65 ft. 06 in.
Private Berth, South basin, North side, length 1,300 ft. max. draft 39 ft. Depth 42 ft. 06 in.
Public Ore Berth, No. 1 Basin, West side, max. draft 49 ft. Depth 52 ft. 06 in.

Ore and Containers: Max. length 984 ft., draft 42 ft. 06 in. Depth 46 ft.
HEALTH: Pratique given by customs officers who board on arrival. In case of suspected disease on board, notify Agent by radio before arrival.
RADIO: Within 150 miles, traffic should be routed through Marseilles radio, FFM, otherwise via St. Lys. FFL.
VHF: Channel 16 for calling. Channel 12 for traffic and Channel 14 for pilot.
TUGS: Tugs normally join vessel in the entrance channel. Ship's lines are used.
BULK HANDLING FACILITIES: Ore berth, depth alongside 42 ft. 8 in. Discharge rate 600 t.p.h. 2 portico cranes with grabs.
CONTAINER HANDLING FACILITIES: Porticos for containers of 20 ft. and 40 ft. Another Portico will be built in 1977. Draft 38 ft. Depth 39 ft. 06 in.
TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipe-line. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.
FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 05 04 40.
FRESH WATER: Available by pipe-line at all berths.
FUEL: Available by barge only.
MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.
REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.
CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.
AIRPORT: Marseilles/Marignane Airport about 60 km. distance.
TIME: GMT plus 1 hour. No changes during the year.
TELEPHONES: On application, telephones can be connected on board.
AUTHORITY: Le Port Autonome de Marseilles. Capitainerie de Port de Bouc (Harbour Master).
AGENT: See "Port de Bouc".

NANTES: 47.14 N. 01.34 W., inc. Donges 47.18 N. 02.04 W. and Montoir 47.18 N. 02.08 W. **(See Plan)**

DOCUMENTS: See "St. Nazaire".
PILOTAGE: Compulsory for vessels over 225 ft. length on river Loire. Starts about 4 miles North of lighthouse of Le Pillier, on lightbuoy SN 3. Pilot boat on station day and night, if weather conditions permit, West of a line drawn between SN 3 lightbuoy and lightbuoy of "La Couronnee" about 2 miles N.N.E. If Pilot unable to come aboard, he may invite ship to follow his boat until they have reached a better shelter. Ships heading for one of Loire estuary ports should give ETA at least 24 hours ahead to Port Captain of Saint-Nazaire. Approximate time of arrival at SN 3 buoy, the further destination and speed should be given. VHF contact can be made direct with St. Nazaire Pilot boat or "Estuaire de la Loire" Pilot station.
ANCHORAGE: When Pilot service withdrawn, anchor near SN 3 lightbuoy or in "Rade des Charpentiers". In rough sea ships heave to off harbour. In case of doubt contact pilot boat by VHF or phone. Sometimes Pilot taken aboard on SN 3 is relayed by another who will board near the outer port of Saint-Nazaire to bring ship upstream. It is not allowed to moor before and below quay Emile Cormerais and Chevire Power Station Embankment (cables).
MAX. SIZE: Nantes: max. length 600 ft., breadth not limited, draft 27 ft.
Donges: max. length 760 ft., breadth 116 ft., draft 39 ft.
RADIO: Stations at: Saint-Nazaire; Brest-le Conquet and Bordeaux; Arcachon.
RADAR/VHF: Radar, none. VHF, Donges Port Operations Network—European frequencies.
TUGS: Nantes: 3 "Abeille" tugs 500 to 700 cv. Donges and St. Nazaire: Tugs are provided by "Union des Remorqueurs de l'Ocean" at Saint-Nazaire (2,000 h.p.); also "Les Abeilles".
BERTHING: Nantes: Vessels may be moored with bow facing up or downstream. During heavy flood periods, however, bow to face upstream. Donges: Mooring of vessels to the docks No. 0, 1, 2, 3 is performed with ship's ropes. On docks No. 4, 5 and 6, Port Authority use own steel cables to which ship is fastened in supplement to her own ropes.
Montoir: Port Authority use own steel cables to supplement ship's ropes.
BRIDGES: The first bridge on the estuary is upstream of Nantes.
STEVEDORES: Available.
MEDICAL: Facilities available at any time.
BULK CARGO FACILITIES: Between St. Nazaire, Donges and Montoir, berths equipped to handle bulk carriers up to 40,000 tons, subject to channel draft.
TANKERS: Channel to Donges 39 ft. Depths, Berth 0 and 1 less than 18 ft.; Berth 2, 21 to 24 ft; Berth 3, 28 to 31 ft.; Berth 4, 32 to 39 ft.; Berth 5 over 39 ft.; Berth 6 over 40 ft. Pipes: according to the berths and products, diameters from 100 m/m to over 850 m/m (crude — Berths 4, 5 and 6).
Berth No. 6 can accommodate tankers up to 200,000 d.w.t., part loaded subject to channel draft.
Donges: Berths Nos. 5 & 6: To reduce the time of mooring a special mooring gang can be put at Master's disposal for arrival and departure. Arrangements must be made 48 hours in advance of this service. Permanent watch on VHF Channel 16 is recommended.
Crude connections: No. 5 Berth 1×12 in. Chicksan arm, 12 holes type 150 pounds. No. 6 Berth 5×12 in. Chicksan arms, 12 holes type 150 pounds. Reducers available, notice required prior to arrival.
Bunkering Lines: No. 5 Berth 8 in. Chicksan arm with 6 in. connection. No. 6 Berth, 6 in., 8 in. or 12 in.
Drinking water available at both berths.
Telephone: Placed aboard as soon as vessel berths. The vessel is connected both to the Post Office and Antar Refinery. No. 5 Berth – Tel. No. 70.70.95. No. 6 Berth – Tel. No. 70.72.71.
Mobile crane available for hire for loading stores, provisions and spares. Request to be made upon arrival by Agent to Harbour Master or Port Authority Workshop.
There is a Seaman's Club at No. 4 Berth for crew and families, equipped with restrooms and accommodation.
FRESH WATER: Available on docks in Donges, Montoir, Saint-Nazaire and Nantes.
FUEL: Available in any grade or viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.
FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries; no fire, no smoking. Ground wire for ship.
DEVELOPMENTS: The access in Donges will be progressively dredged to be able to receive very large tankers during next 10 years. At Nantes the channel will also gain around 3-5 ft. during next 5 years, so as to welcome cargo-ships up to 15,000 tons. Installations to receive cereals, bulk cargoes, roll-on/roll-off ships and container-carriers are also foreseen in the near future.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Done by crew.
IDENTIFICATION CARDS: Not needed.
CONSULS:

REPAIRS: Very good facilities exist for all types repair work.
DRY DOCKS: Dry docks at Nantes for vessels under 4,500 tons.
AIRPORT: Good connections with French internal network (Air Inter) and also international mainly with stop-over in Paris. 5 daily flights to the capital. Direct flights to Bordeaux, Lorient, La Rochelle, Lyons, etc.
TIME: Paris time GMT plus 1 hour; seasonal alteration.
HOLIDAYS: Most firms close in August. National Days: May 1, July 14, August 15, Nov. 11
POLICE/AMBULANCE/FIRE: Nantes and St. Nazaire: Police 17; Ambulance 18; Fire 18.
TELEPHONE ON BOARD: Arrangements are possible.
SHORE LEAVE: No restriction.
AUTHORITY: Port Autonome de Nantes-St. Nazaire.
AGENT: See "St. Nazaire".

NICE: 43.42 N. 07.17 E.

DOCUMENTS: Master required make declaration of entry at Port Office, Harbour Master's Office, Quai Entrecosteaux, where he must present to Authority (Commissariat du Port) Crew List and Passenger List. If coming from foreign port he is also required to furnish a Customs Declaration.
PILOTAGE: Compulsory for Nice-Villefranche Station and applies to ships of more than 50 m. length. Pilot station extends 3 miles from coast between meridians of left bank of Var river (07.12.5 E.) and Cap Ferrat. Request for Pilot made by Regulation Signals day or night or through radio station Grasse on 2321 kc/s. and 2182 kc/s.
ANCHORAGES: Approaches have no practical anchorage zones and it is preferable to proceed Villefranche approaches 1 mile distant which can offer sheltered anchorage for ships of all sizes.
MAX. SIZE: Port accessible to ships of 137 m. length and 6.50 m. draft.
RADIO: Grasse Radio Station. Ships call on 2321 kc/s. and 2182 kc/s. Meteorological reports on 2649 kHz broadcast at 0833, 1330, and 1745 hrs. Port Office on VHF Channels 16, 12 and 9.
TUGS: None.
BERTHING: 9 berths for merchant vessels. Ocean-going yachts desiring berth before entering Admiral Infernet and Lympia docks must ask Harbour Master's Office about available positions. At night, a notice fixed at entrance to Harbour Master's Office indicates berths to be occupied on following day by steamers and cargo vessels. These berths must not be occupied by ocean-going yachts.

STEVEDORES: Require (if possible) 24 hours notice in advance of arrival.
MEDICAL: No port doctor. In case of emergency tel. no. 18. Ambulance and doctor on call.
FRESH WATER: Available on all quays.
FUEL: Distribution by tank lorries.
FIRE PRECAUTIONS: Town Fire Service, tel. 18 and 85.21.21.
REPAIRS: Minor engine repairs possible at local yards.
AIRPORT: 5 km. from port.
TIME: GMT plus 1 hour.
EMERGENCIES: Ambulance, tel. 18 and 85.21.21; Police, 17.
TELEPHONES: Two lines on Traverse and Commercial Quays can be connected on board on request.
AUTHORITY: 4 Quai des Docks.
AGENT: See "Paris".

PARIS

AGENTS: Enquiries relating to agency at French ports may be addressed to Jolasry (France) S.A., 14, Avenue de l'Opera, Paris, 1er. Tel. 296 1415. Telex: 210905 Paris. Cables: "Jolasry Paris".

PORT-VENDRES: 42.31 N. 03.07 E.

DOCUMENTS:
3 Crew Lists.
5 Passenger Lists.
2 Store Lists.
1 Maritime Health Declaration.
4 Cargo Manifests.
2 Bills of Lading.
Ship's Papers: Nationality Act, International Tonnage Certificate.
PILOTAGE: Three long blasts. ETA required for Agent, Pilot usually taken on outside unless in very bad weather.
MAX. SIZE: Max. length 150 m. max. draft 25-26 ft.
HEALTH: Usually Customs give free pratique. In event of suspected disease or fever on board must advise naval doctor.
RADIO: Marseille Radio (or St. Lys Radio) or Perpignan Radio.
TUGS: None available.
CRANES: 1 shore crane available only of 20 tons.
SPECIALISED CARGO-HANDLING FACILITIES: 3 roll-on/roll-off berths and 1 refrigerated warehouse 11,000 cu.m.
STEVEDORES: ETA to be given to Agent in order to arrange gangs (usual rate per day. 8 normal working hours). 200 tonnes per gang.
MEDICAL: Perpignan Hospital (30 km. away).
TANKERS: Berth for wine tankers with pipe-line.
DENSITY: Salt water.
FRESH WATER: Supplied by Chambre de Commerce, Port-Vendres.
FUEL: For small craft only, otherwise delivery by trucks.
CONSULS: Sweden.
DRY DOCK: 1 travelift for craft up to 150 tons.
SURVEYORS: Lloyds Sub Agent and Vessel's and Cargo Surveyors.
OPENING/CLOSING HATCHES: Normally to be carried out by crew (or as per charter party if any).
CARGO GEAR: Load/discharge effected by ship's gear.
GANGWAY/DECK WATCHMEN: Recommended if loading dangerous cargo.
CERTIFICATES: Load Line Certificate.
International Tonnage Certificate.
Deratisation Certificate.
CUSTOMS ALLOWANCE: See "Calais".
IDENTIFICATION CARDS: Only seamans book required.
REPAIRS: Minor repairs only.
AIRPORT: Perpignan Rivesaltes (30 km.)
TIME: Normal GMT plus 1 hour but commencing from 1976 plus 2 hours in summer.
HOLIDAYS: As for whole France – cargo work can be arranged on those days as overtime.
POLICE/AMBULANCE/FIRE: Tel. 38 00 40 or five long blasts.
SERVICES: Workshop for small repairs, radio/radar repairs available, ship chandler for bound stores, laundry.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Directeur du Port.
AGENT: See "Paris".

PROPRIANO: Corsica, 41.40 N. 08.54 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.
PILOTAGE: Not compulsory.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 5 m.; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Available.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour.
AGENT: Lloyds Agent W. Tschumi, POB 55, Ajaccio. Tel. 21 43 39. Telex 46627. Cables: "Britishships Ajaccio".

QUIMPER-CORNIQUEL: 47.58 N. 04.07 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Port Health Documents.
Manifest of Cargo.
Stores on Board.
Ship's Papers.
PILOTAGE: Pilot Station, tel. 910640. Contact via Le Conquet Radio or St. Nazaire Radio.
If vessel's ETA changes, telephone either the Agent or the Pilot at least 3 hours before arrival.
The pilot boat is a small black launch, white bulwarks with anchor painted on bow of each side, white cabin at the stern, one mast.
Only one Pilot on duty, but will meet ship at the time given in their ETA. Pilot boards either on the bearing 346° with Lighthouse of Benodet and du Coq in alignment, or on the bearing 000° with Lighthouses of Benodet and Combrit in alignment. Vessel should come as near as possible to the entrance, Vessels are anchored at the port entrance, or in the river, and await the tide, or proceed directly to the port.
In case of bad weather, when the Pilot may not embark vessel to follow the pilot launch on the bearing 346° up to Plage du Trez, where boarding is possible. Vessels at anchor awaiting Pilot should get under way to approach the pilot boat on the bearing 346° when they see the launch approaching.
ANCHORAGE: Depths of 11 m. in position with the Taro Tower, bearing 245°; distance 0.8 miles.
Depths of 6 m. in position with the Point of Combrit bearing 000°; distance half a mile.
Depth of 9 m., bottom sand and mud, in Du Trez anchorage at the mouth of the Odet.
RESTRICTIONS: Vessels arriving at night must anchor outside the port entrance. It is dangerous to enter the river at night as there are no lights, and the channel is restricted by yachts at anchor.
MAX. SIZE: At spring tides: length 78 m.; breadth 12 m.; draft 4.95 m. At neap tides: length 72 m.; breadth 12 m.; draft 3.40 m.
RADIO: The Port Superintendent requires 24 hours notice of arrival.
TUGS: No tugs available.
BERTHING: At one quay there is 226 m. length for coasters. One quay of 120 m. length for discharging sand. 3 cranes available.
TANKERS: There is a fuel/oil depot at Quimper-Corniquel supplied by coastal tankers from Donges. Max. draft for tankers at Quimper is 3.50 m. to 4.10 m.
FRESH WATER: 5 drinking-water hydrants situated on the quay, loading rate 12 t.p.h.
FUEL: Can be supplied by various companies from tanker lorries.
AIRPORT: Airport of Plugussan situated 5 km. from the port. 2 regular daily flights to Paris.
AUTHORITY: Ingenieur en Chef des Ponts Chaussees, Directeur Departemental de l'Equipement.
AGENT: See "Paris".

ROCHEFORT SUR MER: 45.56 N. 00.57 W.

For all general information refer to Tonnay-Charente.
MAX. SIZE: Max. permissible length: 115 m; breadth: 16 m. (ships must pass through a lock of 18 m. width).
Max. draft is 18 ft. at any tide, 21 ft. at Spring tides.
POLICE/AMBULANCE/FIRE: Police 17; Ambulance 99.40.69;
AUTHORITY: Bureau du Port.

ROUEN: 49.28 N. 01.04 E. (See Plan)

DOCUMENTS: Cargo Manifest or Manifest of Ballast, Certificate of Cargo Space. Bills of Lading. Ship's Register. 6 Crew Lists. 3 Passenger Lists. Health Declaration. Derat Certificate or Exemption. Declaration of Crew Personal Effects.
PILOTAGE: Vessels proceeding to the ports of Rouen and Honfleur are met by pilot boat on La Carosse Roads (Rade de La Carosse). Pilotage is compulsory between the mouth of the Seine and Rouen. Vessels of 55 m. length and less can be exempt from the obligation for the lower sector of the river, and vessels of 45 m. and less for the upper sector, on condition that such vessels be equipped with suitable radar, with VHF sets, and that they are not carrying dangerous goods. Each vessel taking a Pilot for the downriver stage between La Carosse Roads and Villequier, or vice-versa, and a Pilot for the upriver stage between Villequier and Rouen, or vice-versa.
The following signals should be made for summoning a Pilot on La Carosse Roads: By Day: flag "G" of the international code of

signals. By Night; in morse by signalling lamp. Failing this, the vessel should hoist her national ensign at the foremasthead.

The following additional signal can be made when arriving on La Carosse Roads: 5 prolonged blasts (– – – – –) to call attention to pilot boat.

Vessels leaving harbour or shifting berth should apply for a Pilot to the Pilotage office, 21 Avenue du Mont-Riboudet, Rouen (tel: 71-68-50)

The Rouen pilot boat keeps a telegraphic and telephonic watch during the following period of all tides: from 1 hour after low water Le Havre until 4.5 hours after high water (middle point stay tide). The watch is kept in the following manner: 1. Telegraphy: 500 kHz (600 m.) call sign FORI. 2. Telephony: 2.182 kHz (137.50 m.) frequency modulation (VHF) 156.8 mHz, Channel 16 call sign Pilot Rouen.

Since the pilot boat's watch is not permanent, Masters wishing to enter into direct contact with her are recommended to signal their position during the high water prior to that by which the vessel expects to enter the roads.

RESTRICTIONS: The height of water above chart datum at Le Havre is broadcast on Channel 11 every 10 minutes by Honfleur VHF port radar station starting 2.5 hours before, until 4 hours after, the initial point of stay tide.

PORT RADAR: A radar post situated at kilometric point 334.400 on the right bank at Radicatel operates, experimentally, as an aid to navigation between the Risle and the Aizier from 2 hours before until 2 hours after high water Le Havre.

To obtain information put out a VHF call on Channel 16 (156.800 mHz) and then switch to Channel 13 (156.450 mHz).

Information given by the port's Radicatel radar post and the Honfleur works radar, at ship's option, is extended as an aid only and implies no responsibility either to the Port Authority or its agents in any subsequent recourse to such information, which is given free of charge.

A new radar post is in construction at Honfleur and will be in operation by October 1976.

ANCHORAGE: In the outer roads at La Carosse and at several places in the river, particularly at Villequier (two-waiting berths on buoys).

MAX. SIZE: Vessels over 230 m. length have entered. Draft approximately 2.40 m. more than height of tide at Havre. Maximum about 33 ft. Port accessible to vessels of 25,000 d.w.t. fully laden and 55,000 d.w.t. partly laden. The Port Authority's objective is to accommodate ships of 35,000 d.w.t. fully laden by 1980. Ships of 250 m. can be received.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Vessels are obliged to give their ETA and draft in salt water at least 5 hours before arrival to Rouen Information Centre via Brest – Le Conquet Radio or Boulogne Radio. The Port of Rouen Authority has introduced a VHF network of frequency modulation for port needs working on the following frequencies: Channel 16 (156,800 mHz); international safety and watch frequency. A permanent watch is maintained on this frequency at the Information Centre of the Port of Rouen.

Channel 11 (156,550 mHz): working frequency granted to the Port of Rouen to be used after preliminary call on Channel 16.

Channel 12 (156,600 mHz): secondary working frequency for vessels without Channel 11.

Channel 13 (156,650 mHz): reserved for traffic with the Radicatel radar station.

TUGS: Permanently available in the Port of Rouen. Tug assistance in the River Seine is available on request.

BERTHING: The main Maritime Port of Rouen extends from the Guillaume le Conquerant Bridge as far as La Bouille over a distance of 11 miles. Quays and wharves cover the length of both banks of the Seine. There are also 5 basins in direct connection with the river without the interposition of any locks;

On the Right Bank: St-Gervais docks; on the Left Bank: the Timber dock, the Rouen-Quevilly dock, the Floating Docks tidal basin, and the "Bassin aux hydrocarbures" at Petit-Couronne.

The extent of quayage in the Maritime Port is about 38,000 ft., and in the river docks 5,900 ft.

Between the downstream limits of the Port of Rouen and the sea are a number of maritime establishments serving local requirements. The most important of these, all of them managed by the Port Authority of Rouen, being the petroleum terminal at Port Jerome.

Containers: 2 container berths, max. draft 10 m. One at the Africa quay with a 25-ton crane, one at the Rouen – Quevilly dock with two 25-ton cranes and two 35-ton gantry cranes.

Roll-on/roll-off: Five berths in service of which one roll-on roll-off berth at Petit Couronne able to load or unload rolling heavy lifts up to 400 tons (max. draft: 10 m.)

Dock	*Quay*	*Facilities*	*Length* (m)	*Depth at low water* (m)

St. Wandrille	St. Wandrille	Specialised quay for oil drilling platform	645	9.5
Radicatel Honfleur	Radicatel Honfleur	20,000 d.w.t. ships	420 122	

STEVEDORES: From Monday to Friday:

General working schedule; 0700–1100, 1300–1700, 1700–2300, with possible overtime.

Special working schedule for bulk vessels (excluding cereals) and roll-on roll-off vessels carrying cars: 0700–1100, 1300–1700, 2000–0600 with possible overtime.

On Saturday: for all ships 0700–1300 and 1300–1800.

MEDICAL: All facilities available. Vaccination certificates required if vessels coming from a North African port. Yellow fever inoculations required if vessel coming from South of parallel 30° N.

TANKERS: Petit Couronne, Shell, 3 berths for vessels up to 11 m. draft.

Port Jerome, Esso and Mobil Oil, 2 berths for vessels up to 11 m. draft.

Honfleur, 1 berth for vessels up to 9 m. draft.

Deballasting facilities available at all berths except at Honfleur.

DENSITY: Except at Honfleur, all berths are in fresh water.

FUEL: All grades available from berths or by barge.

CONSULS: The following countries are represented in Rouen: West Germany, Belgium, Denmark, Spain, Finland, Greece, Norway,

Netherlands, Portugal, Algeria, Mauritania, Senegal, Sweden, Tunisia.
WATCHMEN: Recommended to employ watchmen on board tankers and vessels handling dangerous cargo.
HATCHES: Opening and closing hatches always performed by ship's crew.
REPAIRS: All deck, engine and radio repairs can be effected.
DRY DOCKS: Two floating docks, the largest of which is 180 m. long. 25 m. wide for vessels up to 14,000 tons.
SURVEYORS: Are represented: Bureau Veritas, Lloyd's Register.
AIRPORT: Nearest Rouen-Boos. Le Havre, Octeville, 80 km. away. Paris, Orly, 120 km. away.
TIME: GMT plus 1 hour all year round.
POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 18.
TELEPHONES Can be connected on board.
IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.
HOLIDAYS: No labour available on the following days; New Year (1st January); Easter Monday; Labour Day (1st May); Ascension Day; Whit Monday; National Day (14th July); Assumption Day (15th August); All Saints' Day (1st November); Armistice Day (11th November); Christmas Day (25th December).
DEVELOPMENTS:
Dredging and embankment operations in order to accommodate by 1980 vessels of 35,000 d.w.t. fully laden in Rouen and of 60,000 d.w.t. at Port Jerome and Honfleur.
Building of a 430 m. quay at the Rouen-Quevilly dock. (76-77).
Building of a 200 m. quay at Moulineaux (77).
Building of a new dredger for the maintenance of the channel in the Seine estuary.
AUTHORITY: Port Autonome de Rouen.
AGENT: Jolasry (France), 52 Quai Gaston Boulet, Rouen. Telex 77588. Tel. 70-87-27.

ST. LOUIS DU RHONE: 43.23 N. 04.48 E.

DOCUMENTS:
1 Cargo Manifest or Manifest in Ballast.
Ship's Register.
Bills of Lading.
6 Crew Lists (8 if Spanish or U.S.S.R. or ships bound to these countries).
3 Passenger Lists.
Health Declarations.
Deratisation Certificates.
3 Bunker Supply forms.
1 Declaration of Crew Personal Effects. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.
PILOTAGE: Compulsory for vessels exceeding 300 tons net. Contact Pilots by Marseilles Radio or by VHF Channel 16 for calling, Channel 9 for traffic. Pilot boards 1 mile E.N.E. of the lighthouse on the jetty.
River Pilot required by vessels loading salt in the Rhone river, boards at the locks entrance to Port St. Louis basin.
ANCHORAGE: Suitable anchorage outside Port St. Louis keeping well clear of Fos channel.
RESTRICTIONS: The St. Louis Canal is 3,300 m. long and 63 m. wide, with a depth of 24 ft. 6 in. The lock has a length of 159 m., width 22 m., and depth 24 ft. 6 in.
No entrance allowed between 2100 and 0500 hrs. except in emergency, although entrance may be effected up to 2400 hrs. if ordered before 2100 hrs.
Entrance may be delayed when large tankers are proceeding in the Fos Channel.
HEALTH: Pratique given by Customs officers who board on arrival.
RADIO: Within 150 miles use Marseilles Radio FFM, otherwise St. Lys FFL.
TUGS: Four tugs available from 500 to 1,060 h.p. Ship's lines are normally used.
BERTHING:

STEVEDORES: Shifts are 0800–1200 hrs., 1300–1730 hrs. Saturday afternoon, Sunday and Holidays in overtime. Shifts of 0600–1200 hrs.and 1300–1900 hrs. count as a day each.
FRESH WATER: Available from hydrants on the quays at a rate of 100 t.p.h.
FUEL: Available only by barge or railcar.
AIRPORT: Marignane Airport distant 70 km.
AUTHORITIES: Port Autonome de Marseille. Capitainerie de Port St. Louis (Harbour Master).

ST. MALO: 48.39 N. 02.02 W.; ST. SERVAN: 48.38 N. 02.01 W. (See Plan)

DOCUMENTS:
Ship's Register.
Store List in duplicate (ship's stores).
Crew Declaration of Bonded Stores.
Health Declaration.
Manifests and B/Ls.
Crew List (duplicate).
Passenger List (duplicate, if necessary).
PILOTAGE: (1) During tidal hours, 2 hours before and after high water, vessels may enter into direct contact with the Pilots on VHF Channel 12. Call Sign "Pilot St. Malo".
(2) Outside tidal hours and during working hours, vessels may call the Port Office on VHF Channel 12. Call sign "Pilot Office – St. Malo'.
When waiting for the Pilot, vessels anchor near the land buoy and report their arrival to the Port Office.
In good weather, the Pilot boards near the "Shore-buoy". In bad weather when the wind is from N.E. or N.W. the Pilot may guide the vessel as far as Dinard Roads, where the Pilot will come aboard.
Pilot Cutters: One cutter 42 ft. 6 in. fitted with radar, relief cutter 36 ft. both fitted with radio-telephone and VHF Channels 8, 12 and 16.
ANCHORAGE: Large vessels with draft greater than 13 m. anchor by the land-buoy. Smaller vessels may anchor in St. Malo Roads, there is sufficient swinging room for vessels with draft of 7 m. It is recommended to use a Pilot to come into this anchorage.
RESTRICTIONS: Vessels are allowed to enter from 2 hours before to 2 hours after high water. To be certain of mooring, vessels should arrive at the lock at least 1 hour before high water.
Depth available 20 to 22 ft. at spring tides.
No movements during foggy weather. Large vessels (length greater than 100 m.) approach the lock at high-tide. Tankers lock in by themselves. Movements are carried out day and night.
MAX. SIZE: The height of the tide, the length of the lock and width of the channel must be taken into account.
Cargo Vessels. Length 150 m. (492 ft.), beam 20 m. (65 ft. 6 in.), draft for vessels length 135–150 m., height of tide less 2.5 m. Less than 135 m. LOA: Rise of tide. 2 tugs required.
Tankers: Length 147.50 m. (443 ft.), beam 20 m. (65.6 ft.), draft see *"Cargo Vessels"*. 2 tugs required if vessel not fitted with bow-thrust.
HEALTH: Customs Officers are appointed as Health Officers and deliver pratique. In case of suspect disease, Masters must declare it at once by radio to their Agents who will contact authorities.
RADIO: Vessels coming from West use Brest le Conquest Radio, call letters FFU. Vessels coming from North should go through Boulogne Radio, call FFB.
VHF:
(a) Port Office – Channel 12; tidal hours and working days.
(b) Pilot – Channels 6, 12 and 16, when awaiting a vessel.
(c) Tugs – Channels 6, 12 and 16, at the time of high tide.
Vessels call Pilot and tugs on 12 or 16 and change to Channels 6 or 8 for working.
TUGS: Two tugs are available at St. Malo. Usually joins vessel at the end of breakwater. Ship's lines are usually used.
BRIDGES: Can be passed during tide vacation, otherwise, notice required to open.
BERTHING:
Basin Duguay Trouin, length 1,870 m. Bassin Varebon, length 1,100 m. Bassin Bouvet, length 750 m. Duguay Trouin and Bouvet Docks: 140 m. long, 16.50 m. breadth. Vauban dock: 140 m. long, 22 m. breadth.
2 new quays in Vauban Dock, (1) Quai Des Corsaires, length 185 m. 2 cranes on rails. Capacity 12 tons at 14 m. Quay used for general cargo.
(2) Tanker quay, extension of Quai Des Corsaires, length 130 m. Diameter of discharge pipe 200 mm., one mobile arm, vessels to supply reducers. Max. discharge rate, 500 cu.m./hour.
TANKERS: Also see "Berthing".
No deballasting facilities. Tankers wishing to effect repairs must leave port and wash out their tanks and obtain a gas-free certificate.
On completion of operations tankers must leave on the next tide. If a second tanker is waiting to berth she must wait in the roads.
Safety instructions are issued when the vessel passes through the locks.
BERTH ALLOCATION: Dependent upon goods to be discharged and characteristics of vessel. Bearing in mind the widths of the channels, their depth and dimensions at the foot of the quays, the height of the dock which varies on average between 11 m. and 12.5 m.
The largest vessels tie up at Quai Des Corsaires.
It is recommended that an advance notice be sent to the Port Office 15 days prior to arrival, so that the vessel may be received under the best possible conditions.
STEVEDORES: In order to have workers ready on arrival, Masters are kindly requested to give as accurate as possible ETA the day before arrival, especially if there are many ships discharging at same time.
Normal working hours 0800-1200 and 1400-1800 from Monday to Saturday, except holidays. There is no night overtime. Dispensations may be made to finish a vessel so that she may catch the tide.
Rate of discharge dependent on type of goods involved.

MEDICAL: A little notice is better to obtain an appointment with doctors or dentists. Hospital service is available.
DENSITY: Average density is 1010.
FRESH WATER: Can be delivered from quay.
FUEL: Bunkers delivered at St. Malo (with notice varying, depending on the Company – Shell 2 days, Esso 1 week, etc.) come from Donges by road lorries and cost of haulage is supported by the ship (expensive). D.O. can be obtained from local suppliers but out of contract.
FIRE PRECAUTIONS: Usual non-smoking precaution (a watchman is compulsory for tankers).
DEVELOPMENTS: A new quay for car ferries in operation 1976.
GANGWAY/DECK WATCHMEN: Watchmen are not compulsory except for tankers.
OPENING/CLOSING HATCHES: This work is normally carried out by crew. Stevedores' cranes may help for the beams, but dockers will not touch them.
CERTIFICATES: As per International Conventions, all Safety Certificates, Load line, Radio, etc.
CUSTOMS ALLOWANCES: 200 cigarettes, or 200 grams of tobacco, and 1 bottle of spirit per crew member.
IDENTIFICATION CARDS: Crew members must have an identification card on their sailor's book when going ashore.
CONSULS:

Netherlands		56.07.21/22.
Denmark	(Vice-consul)	56.07.21/22.
Norway		56.07.21/22.
Finland	(Vice-consul)	56.31.57.

REPAIRS: Deck and engine repairs can be carried out by shipyard or workshops. Electricians are also available. RAMAC Agency can repair radars and radios, also Radio-Ocean agency.
DRY DOCKS: One dry dock. Max. length admissible 120 m., breadth 16 m. One slipway, 500 tons. Length admissible 45 m., breadth 9 m. With sufficient notice.
REPATRIATION: Can be effected from St. Malo by train up to Paris, and then by plane or train.
AIRPORTS: 8 miles from port. Wintertime, 4 services to Jersey (C.I.), with correspondence to England and Wales. Summertime, several times per day to Jersey, London, and on week-ends to Paris.
TIME: Local time is GMT plus 1 hour. No alterations to clocks.
HOLIDAYS: French legal holidays. Cargo work may be carried out, but arrangements must be made with stevedores.
POLICE/AMBULANCE/FIRE: Police, 40.85.80 and 17; Ambulance and Fire, 18.
TELEPHONES: No telephones on the quays.
DELAYS: Berthing delay will only be due to tide. For loading or discharging, it depends what kind of cargo is handled.
SERVICES: Compass adjusting, radar or radio adjusting can be carried out.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Commandant du Port.
AGENT: See "Paris".

ST. NAZAIRE: 47.17 N. 02.12 W. (See Plan)

DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo space.
Bills of Lading.
Ship's Register.
6 Crew lists.
3 Passenger lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of crew personal effects.
PILOTAGE: Compulsory for vessels longer than 225 ft. owning radar/VHF. Starts about 4 miles north of lighthouse of Le Pilier, on lightbuoy SN 3. Pilot boat on station day and night, if weather conditions permit, West of a line drawn between SN 3 lightbuoy and lightbuoy of "La Couronnee" about 2 miles N.N.E. If Pilot unable to come aboard he may invite ship to follow his boat until they have reached a better shelter. Ships heading for one of Loire estuary ports should give ETA at least 24 hours ahead to Port Captain of Saint-Nazaire. Approximate time of arrival at SN 3 buoy, the further destination and speed should be given. VHF contact can be made direct with St. Nazaire pilot boat or "Estuaire de la Loire" Pilot station.
ANCHORAGE: When pilot service withdrawn, anchor near SN 3 lightbuoy or in "Rade des Charpentiers". In rough sea ships heave to off-harbour. In case of doubt contact pilot boat by VHF or phone. Sometimes Pilot taken aboard on SN 3 is relayed by another who will board near the outer port of St. Nazaire to bring ship upstream.
MAX. SIZE: Max. length 11,610 ft., breadth 164 ft., draft 30 ft. 6 in. Entrance by L. Joubert lock. 2 other locks available – length of 173 ft. to 692 ft.
RADIO: Stations at: St. Nazaire; Brest-le Conquet, and Bordeaux-Arcachon.
HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.
TUGS: Tugs are provided by "Union des Remorqueurs de l'Ocean" at St. Nazaire; also "Les Abeilles" at Nantes.
BERTHING: Tidal basin with 8,680 ft. of public docks.
STEVEDORES: Available.
MEDICAL: Facilities available at any time.
FRESH WATER: Available on docks.
FUEL: Available in any grade of viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.
FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries; no fire, no smoking. Ground wire for ship.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Done by crew.
IDENTIFICATION CARDS: Not needed.
CONSULS:

REPAIRS: Very good facilities exist for all types repair work.
DRY DOCKS: Shipyards for large vessels at St. Nazaire.
AIRPORT: Nantes: Good connections with French internal network (Air Interin and also international mainly with stop-over Paris). 5 daily flights to the capital. Direct flights to Bordeaux, Lorient, La Rochelle, Lyons, etc., St. Nazaire: 2 daily flights to Paris.
TIME: Paris time GMT plus 1 hour; seasonal alteration.
HOLIDAYS: New Year (1st January no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.
POLICE/FIRE/AMBULANCE: Police, 17; Fire, 18; Ambulance, 18.
TELEPHONE: Arrangements are possible.
SHORE LEAVE: No restrictions.
AUTHORITY: Port Autonome de Nantes-St. Nazaire.
AGENT: Jolasry (France), 44, Boulevard Paul-Leferme, Saint Nazaire. Telex: 71931. Tel. 70-01-18.

SETE: 43.24 N. 03.42 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port within which a vessel is considered to be an "arrived vessel" are indicated as follows: To the South by a line with the red light of Eastward end of breakwater bearing 257°; to the East by a line with the church tower of Frontignan bearing 005° ; to the North by coastline.

A second zone is a circle of 1 mile radius centered on a point located on the bearing 298° and at 3.2 nautical mile from Eastward end (Red Light) of breakwater. This zone is connected from a landing buoy by a channel 200 m. wide steering 321°.This area and channel are only for big tankers from 100,000 tons up to 270,000 tons which operate at buoy IMODCO Single Point Mooring System.
DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration, eventually vaccination list.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.
2 Provision Lists.
PILOTAGE: Request Pilot by international signals (sound, flags, light signals) or telephone through Marseilles Radio or VHF by Sete Radio Channel 16, tel. 74.34.06. Description of pilot boats; cutters with black hull, white band, white anchor on hull at bow. Pilot embarks between 1 and 2 miles South of breakwater in good weather. In bad weather he embarks in the shelter of l'Epi Delon. In this case make prior contact by radio or VHF (Marseille or Sete Radio) or Port Office VHF Channel 12. In bad weather, provide a ladder on each side.
ANCHORAGE: In roads from 0.5 mile to 1 mile to South of breakwater. (See "Port Limits" and "Tankers").
RESTRICTIONS: *Commercial Harbour:* In the Canal Maritime, length max. 145 m., breadth 20 m., draft 23 ft.

In the Bassin a Petroles, max. length 140 m., draft 33 ft. except to the new petroleum pier for tankers up to 30,000 d.w.t., max. length 225 m., draft 11 m.
MAX. SIZE: *Sea Line Frontignan:* South Berth: S.B.M. Tankers 270,000 d.w.t. draft 21 m. (69 ft.).

North Berth: C.B.M. Tankers up to 100,000 d.w.t. draft 13.1 m. (43 ft.).

Bassin a Petrole: New Berth Tankers 30,000 d.w.t. draft 11 m. (36 ft.).

New dock for ore carriers 210 m. length; 10.4 m. draft (34 ft.)

Commercial Harbour up to 8.5 m. draft (28 ft.).

Commercial Harbour in the Canal Maritime: max. length 140 m; breadth 20 m., draft 7 m. (23 ft.).

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

RADIO: Marseille or Sete Radio VHF Channel 21 or 25, Port Office Channel 12.

TUGS: Tow line to be furnished by ships. Vessels taken in tow near the breakwaters on the North side.

BERTHING: Commercial Harbour Avant-Port, Nouveau Bassin, Bassin Orsetti depths 8 – 9 m.

Canal Maritime, Bassin du Midi, Canal lateral, Chenal du Bassin de Thau: Depth 7 m. New Dock; 3 berths of 150 m., depth in approach channel and alongside the South berth: 11 m., Central and North berth: depth 10.4 m.

CARGO HANDLING FACILITIES: New Dock: Berth No. 1 (Southward) and No. 2 (Centre) berth specialised in ore: Berth No. 3 (Northward) specialised in general cargo and timber and roll-on/roll-off ships. Orsetti Dock South Quay: general cargo and a berth roll-on/roll-off for early fruit and general cargo. North Quay specialised in phosphate and 1 roll-on/roll-off berth. Mole Masselin West side specialised in grain with a silo on the quay, and to lighten ore carriers. Nouveau Bassin: Quay of Morocco: a car ferry station to Morocco. Bassin du Midi: South quay for general cargo, a berth roll-on/roll-off. North quay: berths specialised in ore and coal; berth No. 20 general cargo.

TANKERS: Frontignan Sea Line Terminal North berth (C.B.M.) 1 berth for tankers up to 100,000 d.w.t. draft 13.1 m. (43 ft.). Two 12-in. hoses for crude oil discharge. Submarine pipe-line 28 in. diameter. Commerial Port: 1 berth for tankers up to 30,000 d.w.t. draft 11 m. (36 ft.). 1 old berth for tankers up to 140 m. length or 10,000 d.w.t., draft 10.1 m. (33 ft.). Slop disposal facilities available up to 1,000 cu. m. per hour.

Frontignan Sea Line Terminal (South berth) Mobil SBM.

Operator: Mobil Oil Francaise.

Position: 43° 22′ 12″ N. 03° 46′ 49″ E.

Restrictions: Least depth of water 92.5 ft.

Max. Size: No limit on length and beam. Max. draft 69 ft.

Pipe-line: Length, 26,000 ft. Diameter 44 in.

Hoses: 2×16 in. Bow to manifold distance should not exceed 600 ft. Connections port-side.

Max. Pressure: 125 p.s.i. at rail.

Pumping Rates: 8,500 t.p.h.

Density: 1026.

Fresh water: Not available.

Fuel: Bunker "C" available by barge, capacity 900 tons. D.O. not available.

Ballast: No facilities for receiving dirty ballast.

Vessels up to 50,000 d.w.t. normally berth at spread mooring.

Regulations and Information: When scheduled to discharge at SBM Master will receive the following standard message from Mobiltrans Ny: "Your vessel will discharge at Frontignan SBM. located 43° 22′ 12″ N. 3° 46′ 49″ E. stop 4 days prior arrival radio your Agent your ETA SETE contact "Sete Port Office" on VHF Channel 12 approximately 30 miles range advising your ETA to entrance buoy located 43° 14′ 55″ N. 3° 53′ 40″ E. Only when authorisation is granted by "Sete Port Office" you may proceed to SBM on *compulsory* route on course 326 degrees extending 500 m. each side of line joining approach buoy to SBM. When proceeding on compulsory route your vessel shall exhibit additional marks by day 3 black shapes in a vertical line the highest and lowest 1 ball the middle 1 diamond every one spaced by 1.5 m. stop by night 3 all-round lights in a vertical line the highest and lowest red the middle white every one spaced by 2 m. stop. Pilot will board approximately 3 miles seawards from SBM on compulsory route".

Your Agents will forward the following cable: "Advise ETA type size your manifold flanges whether suitable reducers available and Smit's Bracket fitted on forecastle stop Boom to lift 16 in. ID floating hose and two 16 in. 150 ANSI standard flanges ready on portside. On forecastle have 2 polypropylene 8 in. messengers 150 fathom ready. Accommodation ladder on starboard and boat ropes each side."

The "approach buoy" referred to in para 1, is located in 43° 14′ 55″ N. 3° 53′ 40″ E. having the following characteristics: 3 m. diameter – 7 m. height mast painted with vertical strip white and red with 2 crosswise shapes, with a white light 4 flashes every 12 seconds. Proceeding inshore of this buoy and inside the 12 mile line is not allowed without prior authorisation granted by "Sete Port Office" on VHF Channel 12.

An approach channel exists between the approach buoy and the SBM extending 500 m. each side of a line joining the approach buoy to SBM and must be used as a compulsory route on a course of 326°. Same compulsory route applies for outgoing tankers leaving the SBM.

When proceeding in the approach channel the vessel shall exhibit in addition to the normal navigation signals: *by day:* 3 black shapes in a vertical line the highest and lowest 1 ball, the middle one a diamond – every one spaced by 1.5 m. *By night:* 3 all-round lights in a vertical line, the highest and lowest red, the middle one white, every one spaced by 2 m.

The Pilot boards incoming tankers and leaves outgoing tankers approximately 3 miles seawards from SBM on the compulsory route. He will stay on board during the period the vessel remains secured to the SBM.

Vessels scheduled to discharge at the SBM or departing from it are only permitted to transit the channel between the SBM and approach buoy during certain hours as follows: From May 1 to October 31 (0800–2100). From November 1 to April 30 (0800–0300). Entrance is permitted from Saturday 0800 to Sunday 2100 all the year. It is stressed that the "Sete Port Office" shall grant the necessary authorisation to proceed inshore of the approach buoy irrespective of their time of arrival at the approach buoy.

Every vessel proceeding to or departing from the SBM which requires to anchor should use the following anchorage areas:

Anchorage A – Vessels with less than 15 m. (49 ft.) draft should anchor in the area bounded in the North by the breakwater, and in the East and West by meridian passing through the extremities of the breakwater, and in the South by the 20 m. (65.7 ft.) contour.

Anchorage B – Vessels having a draft of greater than 15 m. (49 ft.) should anchor in the Southern semicircle around the SBM extending between 400 m. (1,310 ft.) and 1,850 m. (6,000 ft.) from the SBM.

When a vessel is proceeding to the SBM a Marine Superintendent and a mooring team will board. Then anchors should be secured and cable pawls in the down position, deck scuppers must be plugged tight and VHF on standby on Channel 12.

Throughout the period the vessel remains at the SBM the engine should be ready and power available on deck winches and windlass.

Adequate deck lighting must be available at night, and a constant fo'c'sle watch kept on the SBM.

Propeller r.p.m. must be kept to a minimum. Intermediate ballasting may be required in order to prevent excessive strain on moorings.

While weather operational limits will depend on circumstances port regulations specify the following criteria: Vessel must cease discharge when wind is 30 knots, significant wave height 8 ft. (assumed current 2 knots) vessel must leave berth when wind is 45 knots and significant wave height is 18 ft.

FRESH WATER: Available on most quays or by lighter of 140 tons capacity.

FUEL: All qualities available subject to advance notice given.

REPAIRS: Handled by Scotto et Repetto: 5 slipways for handling and repair, Mechanical workshops, General repairs.

Terrin et Claverie, Mechanical workshop for heavy repairs, and boiler repairs.

Affre, General repairs.

CONSULS:

Denmark	tel. 74.30.20.	Norway	tel. 74.31.83.
Finland	tel. 74.25.72.	Sweden	tel. 74.28.87.
Netherlands	tel. 74.25.72.		

Others at Marseilles.

WATCHMEN: Service necessary for ships loading or unloading dangerous merchandise. Optional for other ships.

CUSTOMS ALLOWANCES: 40 grammes tobacco per day per man (calculated in accordance with the length of voyage undertaken by the ship). Amount of alcohol fixed by Customs in accordance with the crew, and length of ship's stay in port. It is a matter of tolerance and not of right.

REPATRIATION: Repatriation and crew changes are easily arranged.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TIME: GMT plus 1 hour – alteration from end of March to end of September to GMT plus 2 hours.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); St. Louis Day (Monday, no labour available); All Saints Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available).

N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

AUTHORITY: Commandant du Port de Sete.

AGENT: See "Paris."

STRASBOURG: 48.34 N. 07.42 E.

PORT LIMITS: In Strasbourg (Lat. 48° 34′ N., Long. 7° 42′ E.), the Port Autonome extends from the Km. 285 to the Km. 297 upon the Rhine, occupying a superficy of 1093ha., of which 234ha. are water areas including 14 docks (6 have a constant level, 8 a variable level), and 2 fore-harbours.

Out of these limits, the Port Automome de Strasbourg includes 8 branches designed for the handling of building materials, and 2 ports, Marckolsheim (at Km. 242) and Lauterbourg (at Km. 349), all the branches and ports being on the left bank of the Rhine.

DOCUMENTS: The ships must hold some documents, which they have to keep at disposal of the administration or the inspection authority when required, as following:

Certificate of Survey.

Certificate of Tonnage.

Certificate of Registration.

Log-Book.

Booklet of Verification of the used oils.
Attestation for Equipments of liquified gases.
Customs Documents for the carriage of goods.
Fluvial Bill of Lading.
Rhine Manifest.
Certificate of Ability to steer the ship.
Police Regulation for the Navigation on Rhine.
A.D.N.R., regulation for carriage of dangerous goods.
the documents relating to the boilers and other tanks under pression.

PILOTAGE: The pilotage is not compulsory on the Rhine and usually the Masters do not ask for a Pilot except for Gebirge and the Haut-Rhin. A Pilot can be obtained in the port of Kehl by dialling the number 19 — 49.7851.20.70.

ANCHORAGE: The ships have at disposal an area of about 10ha. in the North and South fore-harbours to take anchorage. Minimum depth of water: 3.2 m.

RESTRICTIONS: Restrictions to navigation are to be published in the Advices to the Nautical Corporation of the Inland Water Transport.

MAX. SIZE: The max. sizes of ships allowed on the Rhine are as follows: Length: 110 m., — breadth: 11.4 m. The ships of Rhine do not exceed a draft of 4.0 m.

Dimensions of the locks: — North lock: length 125 m., breadth: 13.5 m., South lock: length 125 m., breadth: 13.5 m.

In the constant level docks, the max. water depth allowed is 3.2 m., but only along the North — South axis of the port; if not there, the water depth is 2,5 m.

In the variable level docks, which are the docks with a direct communication with the Rhine, the max. depth is 4.0 m.

These depths are given, the Rhine being supposed at its lowest bench-mark: 135 m.

HEALTH: There is no Health Service for the fluvial navigation on Rhine.

RADIO: All communications on the Rhine are performed by radio-link and radiotelephony:

VHF Channels 10 and 13: used for ship to ship communications.

VHF Channels 20 and 22: used for transmitting of nautical advice in the way shore-ship and in the reverse order.

VHF Channels 24, 25, 26 and 27: used for public communications.

RADAR: There is no radar station on shore.

TUGS: The Port Autonome de Strasbourg put at disposal of customers four tugs and one 600 C.V. pusher according to their needs.

BERTHING: 10 km. of quays can be used for mooring. Some of these quays are situated in the constant level docks (max. draft 2.5 m.), some are in the docks that link with the Rhine (max. draft 4.0 m.). Tankers berth only in the Oil Dock Harbour.

BULK CARGO FACILITIES: — with grain elevators: 2 berths for loading, and 2 berths for discharging.

Loading of gravel on the Rhine by belt-conveyors (8 facilities).

Loading and unloading of hydrocarbons in the Oil Dock Harbour by 14 facilities operating each at the rate of 300 cu.m./hr.

SPECIALISED CARGO-HANDLING FACILITIES: Containers up to 40 metric tons; heavy packages up to 300 metric tons..

The two operations are carried out at the mooring berth named "Colis Lourds" (heavy packages) and utilise a length of 180 m. of quay.

BRIDGES: The head room under the bridges reach 8.8 m. in the constant level docks.

MEDICAL: Civil Hospital, I, place de l'Hopital, 67000 Strasbourg, tel. 36.71.11.

DENSITY: The density of water is about 1000.

FRESH WATER: Fresh water is supplied by Ets. Koejac, tel. 61.26.78.

FUEL: Bunkering can be arranged with the m/s *Robertsau*, Antar Company, tel. 61.2821.

CONSULATES:

West Germany:	(88)32.61.86.
Belgium:	(88)35.43.63
Great Britain:	(88)36.64.91
U.S.A.:	(88)35.31.04
Netherlands:	(88)61.93.67
Switzerland:	(88)35.15.17
Austria:	(88)35.13.94
Poland:	(88)61.38.00

REPAIRS — SLIP: All the repairs can be carried out at: Forges de Strasbourg — Scar, tel. 34.68.00. 101, rue du Rhin Napoleon, 67100 Strasbourg.

Any vessel capable of using the port can use the Forge-de Strasbourg slip.

SURVEYORS: Surveyors of the Commission de Visite, named by the Commission Centrale pour la Navigation du Rhin, can be obtained by the Captain.

WATCHMEN: Ship's crew, if required.

OPENING/CLOSING OF HATCHES: Opening and closing of the hatches are performed by the crew or by the staff of the company freighting the ship, as any other handling. Dockers do not exist in the port of Strasbourg.

REPATRIATION: All the facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORTS: Distances from Strasbourg: Strasbourg-Entzheim: 15 km. Strasbourg-Mulhouse: 130 km. (airport Muljouse Bale). Strasbourg-Francfort: 220 km.

HOLIDAYS: Work is stopped during the weekends and the statutory holidays. Labour can be obtained on these days if necessary.

POLICE/AMBULANCE/FIRE: Police: 17 — Ambulance: 33.33.33 — Firemen: 18.

TELEPHONES: Office of the P et T, 5, rue du Port du Rhin, 67000 Strasbourg. In case of emergency: La Capitainerie du Port, 5, rue du Port du Rhin – North Lock of the Port, quai Jacoutot, can be contacted at any time. Tel. 32.49.15.

SERVICES: For the ship: Tank cleaning: SPIRS, 14, rue de Rouen, 67000 Strasbourg, tel. 61.40.45

Supplying of material: Koejac, quai des Belges, 67000 Strasbourg, tel. 61.26.78.

Electronic repairs or supplies: Radio-Metzger, 17, rue de Dunkerque, 67000 Strasbourg, tel. 35.45.42.

For the crew and various formalities (customs): La Capitainerie du Port, 5 rue du Port-du-Rhin, 67000 Strasbourg, tel. 32.49.15.

SHORE LEAVE: The Master must introduce himself, within the 2 hours following his arrival, to the Commissariat Special du Port, 5 rue du Port du Rhin, 67000 Strasbourg, and produce the passports of the crew. The passenger ships have to comply with the regular supervision of authority. Each member of crew must be holder of an identification card or a passport when he is ashore.

REGULATION: The Reglement Particulier de Police du Port are very helpful to the Master and let him know the particulars of the Port of Strasbourg.

DELAYS: The commercial operations begin and finish at the dates and hours shown upon the fluvial bill of lading. Every delay is subject to the payment of penalties. Except for the passenger ships, ships do not give notice of their arrival to the authority, before they enter into the port.

TONNAY CHARENTE: 45.57 N. 00.53 W.

DOCUMENTS:

2 copies Crew List.
2 copies Ship's Stores Lists.
2 copies Crew Manifests (Tobacco List).
2 copies Passenger List (if any).
1 Declaration of Ballast.
Manifest form Last Port.
1 copy Bill of Lading (in case of any cargo to be landed).
Ship Register to be shown.
Deratisation Certificate or Exemption.

PILOTAGE/ANCHORAGE: Vessels have to proceed to about half a mile S.S.W. Isle of Aix Lighthouse and to drop anchor in the No. 115 alignment when safe anchorage is open (lowest tides; minimum depth of water 26 ft.).

River Pilot joins ships there, about 3 to 1 hour before high water, depending on draft and size of vessel concerned.

Pilot boat is equipped with VHF.

RESTRICTIONS: As the River Charente is unlighted, movements are not possible at night. However, vessels may leave anchorage in dark and come up river at daybreak (anchorage area is about 5.5 miles from the mouth of the river).

MAX. SIZE: Max. permissible LOA about 378 ft.; max. permissible draft about 18 ft. 6 in. at any tide; max. permissible draft 21 ft. 6 in. at spring tides.

HEALTH: Free pratique is to be obtained on arrival at port. Usual yellow flag signal to be raised.

RADIO: Ships coming from South: Bordeaux-Arcachon Radio Station. Ships coming from North: Saint-Nazaire or Brest le Conquet Radio Stations.

VHF: No continuous listening out at the port. Nevertheless, vessels coming into the Roads can call up a correspondent by phone through La Rochelle – Radio – Channel 26.

TUGS: No tug is available. In case of need, tug may be obtained from La Rochelle-Pallice (about 20 miles).

BERTHING: 1 private berth for grain loading, which can take vessels up to 100 m. length. 1 berth 200 m. long for handling general cargo. 3 waiting berths. The central waiting berth can be used for handling small cargoes from 500 to 1,000 tonnes. Depth of water along the quays is an average of 6 m.

CRANES: 2 × 5 tonne cranes. 2 × 3 tonne cranes. 1 mobile crane of 5 tonnes. All the cranes are capable of working with hooks or scoops.

BRIDGES: The Rochefort Bridge clearance over highest water is about 98 ft. (30 m.).

STEVEDORES: A 24-hour notice is required in order to arrange loading/unloading operations.

Discharge rates: Coal – about 1,200 tons per day of 8 hours' work.
Phosphates – about 1,500 tons per day
Zinc concentrates – about 1,400 tons per day.
Loading rates: Grain 2,000/2,500 tons per day.

OPENING/CLOSING HATCHES: This work is the responsibility of the crew.

MEDICAL: The nearest hospital is at Rochefort (about 4 miles).

FRESH WATER: Fresh water may be obtained alongside, from hydrants, at the rate of about 10 t.p.h.

FUEL: Must be obtained from La Pallice (about 20 miles) by lorries.

REPAIRS: Small repairs may be carried out by local workshops. Nearest shipyard is at La Pallice.

REPATRIATION: Changing crew and necessary repatriation formalities may be effected.

AIRPORT: The nearest airport is Bordeaux Merignac (about 100 miles). Possible to reach Paris airports in a a few hours by train.

POLICE/AMBULANCE/FIRE: Police: Rochefort H.Q. – Tel. 17; Tonnay-Charente Gendarmerie: Tel. 88.20.38; Ambulance: Tel. 99.30.69; Fire: Tel. 18 or 88.20.38.

AUTHORITY: Harbour Master.

AGENT: See "Paris."

TOULON: 43.07 N. 05.55 E.

DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Pilot station is situated on President Fournel Quay, telegraphic address; Capitainerie de Port de Commerce, Toulon. Pilotage compulsory for vessels over 150 g.r.t. Pilot boards 100 m. North of the semaphore station at Cap Cepet.

There are 3 mooring buoys in the Inner Harbour owned by the Navy. The buoys can be utilised by merchant ships on request and are able to accommodate vessels up to 30,000 tons displacement.

RESTRICTIONS: Entry can be made by day and night except for vessels loading with refined petroleum or dangerous cargoes which are not allowed to enter between sunset and sunrise.

MAX. SIZE: The port is approached by a channel 125 m. wide. The docks can accommodate without tug assistance ships up to 250 m. length and 8.80 m. draft.

Renovation and reconstruction work is being carried out, after which passenger vessels of over 300 m. length and cargo vessels of up to 11 m. draft will be accommodated.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

TUGS: Naval Tugs. There are many harbour tugs up to 1,000 h.p. and several deep sea tugs up to 2,000 h.p. controlled by the French Navy which may be called on for assistance by the Harbour Master or Pilots.

Commercial Tugs. 2 tugs of 180 h.p. owned by the Port Authority are used to assist smaller vessels.

BERTHING: President Fournel Quay, 335 m. length, depth alongside 9 m.

East Quay, 193 m. length, depth alongside 8.50 m.

Minerve Quay, length 147 m., depth alongside 7 m.

TANKERS: Tankers discharge at naval installations at Milhaud and Lazaret.

Total Terminal. 1 jetty berth for tankers up to 6 m. draft, and a buoy berth for vessels up to 15,000 tons displacement.

Societe de la Raffinerie du Midi. 1 dolphin berth for white oil cargo only.

STEVEDORES: There is a permanent working force of 40 dockers which can be increased by casual labour to 120 men if required. Shifts are available for 4 hours, 8 hours or 9 hours with possibilities for overtime.

FUEL: Only available by tanker lorries.

REPAIRS: Forges et Chantiers de la Mediterranee, Shipyard specialising in naval construction. Total length of repair quays 835 m. Heavy-lifting facilities available.

All types of repairs can be carried out at the Naval Dockyard.

DRY DOCKS: Several dry docks available in the Naval Dockyard, of which 3 can accommodate vessels in excess of 250 m. length.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TIME: GMT plus 1 hour – no alterations.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

AUTHORITY: Direction Departmentale de l'Equipment, Etablissement Maritime de Toulon.

AGENT: See "Paris".

TROUVILLE-DEAUVILLE: 49.23 N. 00.05 E.

The port situated on mouth of River Touques, is composed of 2 parts: Trouville for small fishing vessels, and Deauville including 2 docks for cargo ships and pleasure boats.

DOCUMENTS:
1 Crew List.
1 Passenger List.
Tonnage Certificate.
2 Cargo Manifests.
Bills of Lading.
1 Crew Manifest.

PILOTAGE: Pilot must be requested 12 hours in advance to Harbour Master or Agent, for a determined tide, giving dimensions of length and draft. Pilot vessel is fishing-boat showing international lights or "P" flag. Anchorage for vessels awaiting Pilot is situated 2 miles by 310° true from entrance (49° 23′ 30″ N. 0° 01′ E.).

In case of bad weather, it is recommended to anchor near the pilot boat of Rouen and contact her by VHF for instructions.

ANCHORAGE: The best one is Rade de la Carosse (49° 27′ 30″ N. 0° 01′ E.).

RESTRICTIONS: No restrictions at night time. Draft allowed 10 ft. neap tides, 14 ft. spring tides, Entrance is dangerous with wind from N.W. to N. over force 6.

MAX. SIZE: Length: 210 ft. (64 m. OA); breadth: 45 ft.

RADIO: Radio-Boulogne FFB.

TUGS: No tugs available.

STEVEDORES: Loading and discharge by shore crane.

MEDICAL: All hospital facilities available.

DENSITY: 1025.

FRESH WATER: Available from quay.

FUEL: Small quantity by tank-lorry on demand.

CONSULS: See "Caen" or "Le Havre".

REPAIRS: Small repairs only.

AIRPORT: Deuville St. Gaitien 3 miles away.

AUTHORITY: Commandant du Port.

AGENT: See "Paris."

Gabon

CAPE LOPEZ: 00.38 S. 08.42 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Lists of Ports of Call.
2 Manifest of Ships Stores.
Clearance from Previous Port.

PILOTAGE: No official radio station pilotage not necessary to approach Port Gentil Roads.

For the private tanker ports at Pointe Clairette and Cape Lopez, pilotage is compulsory. The Mooring Master will board vessel in approximate position 0° 37′ S. 8° 44.5′ E., in a launch carrying proper pilot signals. The Mooring Master will stay on board throughout the vessel's time in port to assist in mooring, hose handling and loading operations.

ANCHORAGE: The whole of Baie du Prince is a good anchorage, sheltered from winds from S.S.E. through W. to N.W. Depths about 40 m., hard sand, good holding ground. 2 buoys mark the 10 m. line to the South.

It is necessary to guard against violent tornadoes occurring between December and May coming from the East or the North. These tornadoes occur very suddenly and are extremely strong.

MAX. SIZE: S.E.R. Terminal, Pointe Clairette, up to 30,000 tons. Elf-Spafe Terminal, Cape Lopez; 80,000 d.w.t. tankers have loaded.

RESTRICTIONS: Berthing is effected only in daylight hours. Vessels which arrive between 1730 hrs. and 0600 hrs. local time should anchor about 800 m. North of Cricri Buoy so as to facilitate moving to the moorings. Unberthing is effected by day or night.

Berthing is not effected in rough weather. At the berth mooring lines must be in good condition and well tended. In case of storm or tornado loading operations must cease and vessel be prepared to leave the berth if so directed by the loading Master.

RADIO: Private radio station of Cape Lopez call sign TRP394; transmitting on 2705 kHz and watching on 2506 kHz during loading operations. Before vessels arrival watch is kept on 2182 kHz.

TUGS: Owned by Elf-Spafe, can be contacted on 2182 kHz. Ship's tow lines not required. 3 tugs are available up to 400 h.p. There is a launch for handling mooring lines.

BERTHING: *Shipmaster's Report:* Anchors are not required for mooring operations. Depth of water in the Berth is about 40 m. *Twelve (12) mooring* ropes to 6 buoys as follows: 2 head lines, 2 port bow lines and 2 starboard bow lines. Aft: 2 ropes by the "Panama", 2 port quarter ropes and 2 starboard quarter ropes. Manila or Polypropylene ropes are preferred. 2 tugs are used for mooring operations.

Vessel's engines must be ready for immediate operation all the time vessel is at the berth. A small tug will remain standing by.

HOSE HANDLING: *Shipmaster's Report:* Two (2) 12 in. floating hoses are connected on the port side. A derrick of 5 tons SWL should be prepared for lifting hoses.

BALLAST: Vessels must arrive with clean ballast only. There are no facilities for discharging dirty ballast at the terminal. In no circumstances should dirty ballast be pumped overboard.

LOADING: The following signals are used for communication between ship and shore loading installations: Green flag or green light, or 6 short blasts on the whistle signifies "we are ready".

Red flag or red light, or 2 long and 1 short blast on the whistle signifies "slow pumping is necessary". 2 red flags or 2 red lights or 2 short and 1 long blast on the whistle signifies "pumping rate will be increased to maximum".

Waving flags and extinguished lights or 6 long blasts on the whistle signifies "pumping to be stopped".

International code pennant or a white light signifies "we wish to talk". The loading terminal should be given 10 minutes notice of the time when loading is to be completed.

MEDICAL: Doctors and hospital facilities available. All vaccinations can be arranged.

DENSITY: Varies between 1021 and 1025.

FRESH WATER: Can only be provided in case of absolute necessity.

FUEL: 1,500 secs. and 3,500 secs. fuel can be supplied by barge subject to 48 hours notice.

CUSTOMS ALLOWANCES: No restrictions for quantities tobacco and spirits held on board the ship. It is prohibited to allow dutiable articles to leave the ship.

CONSULS: France. Tel. 2086.

REPAIRS: There are facilities for hull and engine repairs for barges and river craft. Slipway for vessels up to 300 tons.

AIRPORT: Can be reached in 15 minutes by road. Regular services to Europe.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: French national holidays are observed and in addition Independence Day (17th August). Holidays do not affect tanker working.

POLICE/FIRE/AMBULANCE: Police tel. 17; Fire tel. 18; Ambulance tel. 23-33.

SHORE LEAVE: Crew members are allowed ashore. There is no regular immigration control but identification papers should be carried.

GENERAL: *Shipmaster's Report:* An accommodation ladder should be positioned on the port side as soon as mooring is completed. Hoses are handled by shore personnel. Accommodation for 6 shore people must be arranged.

AUTHORITY: Societe Elf des Petroles d'Afrique Equatoriale Port Gentil.

AGENT: Socopao-Gabon BP 560, Port Gentil. Tel. 52491. Cables: "Freight Portgentil". Telex 8223.

GAMBA: 02.50 S. 09.59 E.

SEA TERMINAL: SBM.

DOCUMENTS:
Last Port Clearance.
2 lists of Last Ports (during last month).
2 Stores Lists.
2 Crew Lists.

APPROACHES: The approaches to the terminal are open deep water. Gamba sea terminal fairway buoy is located in position 2° 50′ S. 9° 57.8′ E. about 4.8 miles offshore.

The single buoy mooring is located in position 2°50.1′ S. 9° 58.9′ E. and exhibits a white flashing light, visible for 5 miles. Water depth 69 ft.

PILOTAGE: Pilot will board incoming vessel 1.5 miles N.W. from sea terminal SBM. Pilot boat small tug: GRT 50T, 70 ft. long, 320 h.p. grey hull and white upper work – shows pilot light.

ANCHORAGE: 1.5 miles N.W. from SBM in 60 ft. depth.

RESTRICTIONS: Heavy swell and tornadoes.

MAX. SIZE: Draft only factor, max. 44 ft.

HEALTH: When advising ETA include in message whether any sickness on board. In case of emergency vessels should call before or after loading at Port Gentil for medical attendance or for crew changes. For this purpose send separate message to Marine Gamba and to Agency.

RADIO: Established contact with Gamba Radio (call sign TRP 8) soon as possible. ETA should be sent at least 4 days before arrival in Gamba to Marine Gamba via Gamba Radio. Thereafter keep close contact on telephone with Gamba Radio MF (2182) and VHF Channel 16.

Gamba Radio (TRP 8) Service:

Telegraphy A1	2 kW
13070 kH	TFC list at 0900. LSN on 12 mHz band from 0900 to 0930 and on 16 mHz band from 0930 to 1000. Range about 3,000 miles.
6510 kH	TFC list at 1300. LSN on 6 mHz band from 1300 to 1330 and on 8 mHz band from 1330 to 1400. Range about 1,000 miles.
Telephony A3	2 kW
VHF 6 3	Watch on 2182 kHz on request from 0800 to 0900 and from 1400 to 1500. Working frequencies 1877 kHz-2678 kHz. Range about 300 miles depending on atmospherics.
VHF F 3	50 W Watch on Channel 16. Working on Channel 16. Range about 50 miles.
Marine Gamba Service	
VHF F 3	50 W Watch on Channel 16 (office hours). Range about 35 miles.
Pilot Launch Service	20 W Watch on Channel 16 (when at sea). Range about 20 miles.
Terminal Gamba	20 W Watch on Channel 16. Working on Channel 11. Range about 20 miles, used only for loading operations.

Radio Beacon: Continuous airplane radio beacon call sign GZ, frequency 359 kHz. Position: Lat. 02° 46′ 8 S. Long. 10° 02′ 3 E.

N.B. All hours in GMT.

TUGS: No tugs available in Gamba and not necessary for berthing. For berthing, 1 or 2 Pilot boats according to circumstances.

MOORING: Recommended that vessel should be trimmed max. 8 ft. by the stern on arrival.

Vessels moor with two 12 in. nylon ropes from SBM secured on board ship by two 2.25 in. chain cables plus two 3.25 in. wires which provided by terminal. Berthing Master will advise in detail mooring procedure. Two mooring lines at least (nylon if any) are to be available on forecastle head. Depth at berth 59 ft.

HOSES: One hose of 16 in. diameter is connected on the port side. This operation is performed by ship's personnel under the direction of the Mooring Master and the terminal foreman. Total weight of the lift is about 2 tons.

A derrick should be rigged in preparation on the port side for loading mooring equipment and hose lifting. Loading rates are between 2,000 to 2,200 long tons per hour.

Shore Line System: SBM – 1×28 in. submarine pipe-line. SBM connected to 1×16 in. floating line reduced to 12 in. for connection to ship's manifold (total length of floating hoses: 660 ft.).

DENSITY: 1025.

FRESH WATER/FUEL: None available.

BALLAST: There are no facilities for discharge ballast ashore. Vessels must arrive at the loading terminal with clean ballast only, apart from contents of the slop tank.

GANGWAY/DECK WATCHMEN: Not required.

CUSTOMS ALLOWANCES: No restrictions on Tobacco/Wine.

IDENTIFICATION CARDS: Not required.

CONSULS: None, French consul in Port Gentil.

REPATRIATION: Facilities available only in emergency.

AIRPORT: Gamba airport is local airstrip and is connected to Port Gentil by daily service. Port Gentil airport is connected to Libreville International airport by daily services. Mail reaches any European country within five days.

TIME: GMT plus 1 hour throughout the year.

GENERAL: The use of Channel VHF 9 is forbidden.

SHORE LEAVE: Not allowed.

AUTHORITY: Shell Gabon Marine Superintendent, Port Gentil (Gabon).

AGENT: See "Port Gentil".

LIBREVILLE: 00.23 N. 09.26 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" and (subject to C/P terms) laytime will commence is 2 miles off shore at Libreville harbour.

DOCUMENTS: See Port Gentil.

PILOTAGE: None available.

ANCHORAGES: Bottom of roads in Libreville slopes very gently down towards open sea. The greater the vessel's draft, the further out it must moor. E.g., ship of 7 to 8 m. draft will be moored approx. 1,500 m. from Harbour Pier. Ship 5-6 m. draft will be able to approach the Harbour Pier as near as 500 to 600 m. For reasons of safety, forbidden to come nearer, particularly during tornado season – February to May and September to December.

RESTRICTIONS: No restriction imposed on entering or leaving the Estuary. Channel marked by 5 buoys provided with radar reflectors and flashing lights. Sixth buoy, called a "landing buoy" moored in roads, where vessels moor.

HEALTH: If there is sickness on board, Health Service warned by Consignor of vessels. Health Service can go on board to check state of crew's health. Immigration Service can also board to check crew list and condition of passengers, if any.

RADIO: *Libreville Radio:* Radio-telephony from 0600 to 1800 hrs. GMT on 2.182 kc/s, Radio-telegraphy from 0600 to 1800 hrs. GMT on 500 kc/s, call sign TRA 22; from 0800 to 0830 hrs.on 13.101 kc/s, call sign TRA 8; from 1630 to 1700 hrs. GMT on 8,722 kc/s, call sign TRA 8.

TUGS: Tugs intended only for towing lighters, horse power 150 to 250, unsuitable for any harbour towing.

BERTHING: Only for lighters and small coasters with a draft of less than 3 m. Crews working unloading or loading of vessels in roads supplied by Consignor of the ship. Harbour Services have no radio apparatus. Shipping companies all have radio-telephone extensions, which allows them to be in permanent contact with vessel moored in roads. Unloading or loading operations of goods carried out by lighters which, towed by small tugs, ensure rotation between vessel in operation and quay. All this equipment belongs to shipping companies dealing with consignment of vessels in the roads. Every vessel arriving in roads must have its consignor.

STEVEDORES: Available.

MEDICAL: Hospital available, and in case of necessity, patient or patients will be admitted.

FRESH WATER: Water supply real problem, as there is no tanker to transport it. Therefore strongly recommended that any ship touching Douala coming from the North or Pointe-Noire coming from South, should fill up at one of these ports.

FUEL: There are fuel-tankers belonging to shipping companies. The ship-tanker which provisions Libreville 2 or 3 times a week is brought alongside buoys in roads, at 1,650 m. (position: Lat. 0° 23' 51" North, Long. 9° 25' 71" East); fuel is transhipped by sea-line to tank on shore.

FIRE PRECAUTIONS: No special precautions.

GANGWAY/DECK WATCHMEN: Carried out by crew.

OPENING/CLOSING HATCHES: This is done with the tacit agreement of the ship's Officer and the Consignor.

CARGO GEAR: Ship's own gear used.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCKS: None.

REPATRIATION: No facilities.

AIRPORT: 9 km. from the harbour. Links with French-speaking Africa, Switzerland, and France, also Johannesburg.

TIME: GMT plus 1 hour.

HOLIDAYS: 17th August, Independence of Gabon; 1st May, Labour Day – these are the only holidays in force.

SERVICES: None.

SHORE LEAVE: Allowed.

DELAYS: First come, first served method.

AUTHORITY: Capitainerie du Port.

AGENTS: Socopao-Gabon, BP4, Libreville. Tel. 22140 and 22751. Telex 5212. Cables "Freight Libreville".

LUCINA MARINE TERMINAL: 03.40 S. 10.46 E.

SEA TERMINAL: S.B.M. in position 03.39.37 S. 10.46.12 E.

APPROACHES: Vessels should proceed as if making for Gamba Terminal, and establish early contact with Gamba Radio (see Gamba). Instructions concerning Pilot's boarding position will be given by VHF.

MAX. SIZE: Up to 120,000 d.w.t.

MOORING: Same procedure as for Gamba.

HOSES: A hose of 16 in. diameter is connected on the port side. *Line System:* SBM. Off-shore field about 7 miles off coast in deep water. Oil is stored in a tanker, supplying to the SBM through a 20 in. submerged pipe-line 1,000 m. in length.

LOADING RATE: About 3,500 t.p.h.

AUTHORITY: Shell Gabon, (see Gamba).

OVENDO: 00.17 N. 09.30 E. (See Plan)

SHIPMASTER'S REPORT

Vessel, length 156 m., breadth 22.0 m. Draft (at the time, 30 ft.).

APPROACHES: The channel buoys showed very well on radar on the 3 and 6 miles ranges, even during heavy rain, but the lights on the red buoys are poor and all buoys occasionally unlit.

ANCHORAGE: Depths in the channel and river were found to be as stated during low water with a depth of 33 ft. over all the anchorage. Maximum draft allowed at this time was 30 ft.

The holding ground is good, 4 shackles were used for a total ship weight of 19,000 tons plus a small coaster alongside.

The tides are regular with only a very short slack water period, and run at between 4 and 6 knots.

PILOTAGE: There are 2 French Pilots who may be contacted on VHF Channel 16 when in range, they are ordered by the Agent to berth vessels only, although they will pass on advice to vessels regarding anchoring.

TUGS: There is 1 tug of approximately 1,000 h.p. which assists in berthing, either towing or pushing.

BERTHING: Well fendered modern concrete quay, 450 m. in length, laid out as per plan in the Guide. The normal practice is for there to be 2 ships of around 150 m. and one smaller ship alongside at one time. The inshore side of this quay is for small craft only.

FRESH WATER: This is obtainable while alongside the quay but only in a dire emergency at the anchorage from the tug which can supply up to 8 tons.

REPAIRS: Only very small repairs are possible and it is suggested that a receipt is obtained for any parts sent ashore.

REPATRIATION: There are 2 planes a week from Libreville to Paris and approximately 12 planes weekly to Abidjan.

SHIPCHANDLER: There is no chandler for any form of stores, the only possibility being self-purchase at the local (Libreville) supermarket. All goods are imported and therefore very expensive.

HOLIDAYS: 12th March. Gabonese independence.

MARINE CLUB: There is a marine club about 1 km. from Ovendo in the Libreville direction (swimming pool, etc.).

PORT GENTIL: 00.43 S. 08.48 E.

On the coast of Lopez Island.

APPROACHES: Buoyed channel, lit at night. Min. depth 15 m.

DOCUMENTS:

Cargo Manifest.
Store List.
Crew's Personal Effects List.
Crew List.
List of Ports of Call (not compulsory).
Health Certificate.
Ship's Official Papers.

PILOTAGE: No Pilot necessary. However Port Authority will arrange Pilot if given 12 hours notice. Pilot boat is a tug. Pilot taken on board at bank buoy.

ROADS/ANCHORAGES: Ships having commercial operations carry them out at anchorage on a line with anchorage buoys (reserved for lighters and tugs) 1 mile S.E. of the Mole in depths 10 to 20 m. 1,500 acres (approx.) of safe shipping anchorage.

Anchorage for several ships of deep draft well sheltered from predominantly S.W. winds during months June, July, August and September. During season of tornadoes (January to end April) which blow from N.E. a fairly heavy sea quickly rises and vessels should anchor at least 600 m. from land.

Max. rise of tide 2 m. 2; average 1 m. 70; min. 0 m. 40.

RADIO: Libreville radio. R/T 2182 kc/s. – Harbour Master.

TUGS: Not required.

BERTHING: No berths. Loading and discharge at anchorage carried out by lighters and flat-bottomed boats. Boat Quay (Mole) has length of mooring quays (suitable only for flat-bottomed lighters and tugs) of 200 m. and depths of 2.50 m. at low tides. Total Mole area approx. 5 acres, comprises Customs Zone with warehouses, offices, wharves, etc.

MEDICAL: For attendance call Harbour Master R/T 2182 kc/s. Smallpox and yellow fever inoculations required.

TANKERS: To N.E. of Mole is petrol pipe-line unloading point for small tankers, tying up on buoys, max. length 70 m., 5 m. draft. Prince's Bay, loading point for unrefined petrol by sealine is available to North of Prince's Bay (see "Cape Lopez").

FRESH WATER: Delivery by lighters, capacity 200 tons. Loading time 2 hours.

FUEL: 3 days notice required. Fuel oil viscosity 1,500 and 3,500 seconds Redwood available. Delivery by 200-ton tankers, every 5 hours.

WATCHMEN: Not necessary.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No limitations on tobacco, wine or spirits.

CONSULS:

Switzerland	Tel. 20–19	France	BP. 511 Tel. 20.86
Holland	BP. 792 Tel. 28–09	Sweden	BP. 518 Tel. 21.71

REPAIRS/DRY DOCKS: Not available.

REPATRIATION: Obtainable on medical grounds. No facilities for crew changes.

AIRPORT: 4 km. distant. Regular services.

TIME: GMT plus 1 hour. No alterations.

HOLIDAYS: No work on Independence Day 17th August.

SHORE LEAVE: Permitted.

AUTHORITY: Capitainerie du Port.

AGENT: Socopao–Gabon, B.P. 560. Tel. 524–91. Telex 8223. Cables "Freight".

2 signed copies of Manifest.
Bills of Lading (may be sent in advance of vessel).

PILOTAGE: ETA and draft to be communicated to "Harbour Master Banjul" 48 hours before ETA and confirmed 12 hours before. Vessel arriving Monday ETA preferably not later than Saturday morning.

Pilot station situated in Harbour Master's office has VHF station, calling Channel 16 (156.80 mHz) working Channels 12 (156.60 mHz) and 14 (156.70 mHz). Continuous listening watch kept 0800 – 1500 hrs. Monday – Friday. 0800 – 1300 hrs. on Saturday. Listening watch at weekends if vessels are expected. Reception generally good within 100 nautical miles radius. Pilot boat has grey hull and buff superstructure, exhibiting usual signals.

Pilotage from any point inwards from Fairway Buoy by request, but compulsory from No. 5 Buoy inwards.

ANCHORAGES: Good and spacious anchorages to the East and Southeast of Government wharf in depths of 8 to 15 fathoms.

RESTRICTIONS: Vessels may enter and proceed to anchorage at all times and states of tides. Minimum depth in sea approach channel is 28 ft. LWOS. Average rise of spring tides 6 ft., neap tides 4 ft.

MAX. SIZE: Maximum length 600 ft. maximum draft 27 ft. (Banjul Wharf) 26 ft. 06 in. (Government Wharf). For vessels anchoring only, length unlimited.

HEALTH: Vessels exhibit the appropriate International Code signals. Port Health Officer usually boards the vessel at the harbour anchorage or alongside between 0800 and 1700 hrs. daily, at all times in case of emergency.

RADIO: Banjul Radio call sign C5G. Radio Telephone 2182 kHz (calling) 2756.4 kHz. 1100 – 1200 hrs., 1400 – 1500 hrs. (weekdays) Sundays – on demand.

RADAR/VHF: No port radar station. Port VHF. See "Pilotage".

TUGS: One tug of 325 h.p. Normally used as pilot boat. No tug for vessel movements.

BERTHING: Maximum permissible draft alongside; Banjul Wharf 27 ft. Government Wharf 26 ft. 06 in. Government Wharf berthing face 294 ft. with 1 dolphin in line 100 ft. from North end. Mooring bollards on foreshore. Banjul Wharf berthing face 400 ft. mooring dolphin each end, set back from wharf face. Inner berth of length 335 ft. suitable for small vessels up to 21 ft. draft. Public Jetty berthing face 196 ft. maximum draft 11 ft.

BRIDGES: No bridges.

STEVEDORES: Normally 48 hours notice addressed to Agent. If arriving Monday preferable agent notified requirements latest Friday. Normal working hours 0730 – 1900 hrs.

MEDICAL: Emergencies and cases requiring hospitalisation attended to at all times, giving as much advance notice and information as possible. Other cases attended to as convenient to ships after arrival. For certificates required see "Documents". Inoculation and vaccination yellow fever/smallpox given on request.

TANKERS: Tankers (discharging only) berth on Banjul Wharf. Maximum permissible draft 27 ft. Discharge of residue and bilge prohibited. Ballasting by permission of Harbour Master.

DENSITY: Normally salt water at Banjul, reducing to about 1020 ozs. per cu.ft. during River Gambia flood water period: August – February.

FRESH WATER: Fresh water available at both Government and Banjul wharves from hydrant. Notice of requirements should be sent with ETA. No water barge. D5.00 per 1,000 gallons.

FUEL: Bunkering facilities available at Banjul Wharf through pipe-line and road tankers for reasonable quantities. Also available at Public Jetty for small craft (12 ft. draft). Advance notification required for all bunkers.

FIRE PRECAUTIONS: For tankers and vessels carrying explosives Fire Brigade will be in attendance.

DEVELOPMENTS: This envisages the commencement of Phase II of the Banjul Port Project as trade develops and ultimate embarkation of Phase III.

GANGWAY/DECK WATCHMEN: Recommended. By arrangement with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES: Registry, Articles of Agreement, Load Line, Safety, Safety Equipment Radio Licence/Certificate.

CUSTOMS ALLOWANCE: Reasonable allowance of wine/spirits and tobacco/cigarettes out of bond, as per Master's request.

CARGO GEAR: In accordance with UK Factories Act. Ship's lifting gear for loading and discharging, also 4×6 ton and 1×30 ton mobile cranes available.

CREWS IDENTIFICATION CARDS: Needed.

CONSULS: In Banjul: Belgium, Denmark, France, Lebanon, Norway, Spain, Sweden. U.S.A. has resident charge d' Affairs and U.K. has High Commissioner. Senegal has resident Ambassador.

REPAIRS: Minor hull, deck and engine repairs and welding undertaken by G.P.A. dockyard.

DRYDOCK: A slipway of capacity of 500 tons displacement is included in the dockyard facilities.

REPATRIATION: Possible.

AIRPORT: Airport 14 miles from Banjul. Regular services.

TIME: GMT kept throughout the year.

HOLIDAYS: New Year's Day (1st January); Independence Day (18th February); Good Friday, Easter Monday, Christmas Day, Boxing Day, Islamic Festivals of Eid-El-Fitr (Ramadan) and Eld-El-Kabir. No cargo work on Islamic Holidays.

TELEPHONE: Telephones installed on board at ships/Agent's request.

GENERAL: The Ports Authority operates 3 lighters each of 9,900 cu.ft. capacity. Lighters may be hired for discharging ship at anchor and transhipments up river.

A private company operates a large fleet of lighters, mainly for transporting groundnut from river ports to Banjul. Ships stores: fresh vegetables, beef and fish, fruit (in season) and bonded stores are available.

Other Ports: River Ports: Kaur and Kuntaur at 118 and 150 miles upriver respectively from Banjul. River Pilots available at Banjul. Max. loaded draft 17 ft. 06 in.

SHORE LEAVE: No restriction on normal shore leave.

AUTHORITY: Gambia Ports Authority.

Ship's Certificates.

PILOTAGE: Compulsory. Contact by VHF Channel 16, working Channel 12. Pilot boards at Warnemunde light buoy. International code signals used.

ANCHORAGE: In Warnemunde Roads, off port entrance, in depths of 48 ft.

RESTRICTIONS: Entrance channel from Warnemunde light buoy to Overseas Port at mouth of River Warnow, depth 30 ft. LW.

MAX. SIZE: For Overseas Port: length 200 m., draft 33 ft. For City Docks: 140 m. length, 21 ft. draft. Also see "Tankers".

HEALTH: Pratique given on arrival. In case suspected disease or fever on board, radio details to Agent before arrival. Complete declaration of health required.

TUGS: Available. Use of at least 1 tug is compulsory for vessels berthing and unberthing.

Sufficient number of tugs available, ranging from 300 to 920 h.p. Tugs normally join vessel in front of the mole.

BERTHING: *Overseas Port:* Situated in Lower Warnow River about 3.8 miles from Warenmunde sea buoy.

Pier No. 1: 6 berths General goods depth 30 ft. to 33 ft.
Pier No. 2: 7 berths General goods depth 30 ft. to 33 ft.
Pier No. 3: 4 berths Bulk cargoes depth 30 ft. to 33 ft.
Oil Pier: 3 tanker berths depth 30 ft. to 33 ft.

City Docks: In Warnow River, about 6 miles from sea. Total quay length 1,600 m. depths alongside 21 ft. and 18 ft. Grain elevators shooting capacity 42 t.p.h., suction capacity 33 t.p.h.

Warnemunde: Port for passenger service. Quay length 180 m. Depth alongside 24 ft. 07 in.

Port Control to be contacted through VHF Channel 14.

Roll-on/roll-off terminal with facilities for 20 ft. and 40 ft. containers.

CRANES: *Overseas Port:* 64 cranes and crane-bridges with capacity from 3.2-20 tons. A self-propelled floating crane "Goliath", for heavy lifts not exceeding 100 tons is available.

City Docks: Crane capacities 2-10 tons.

BULK HANDLING FACILITIES: 3 berths, length of quay 720 m. Six bridges with 20 tons capacity and outreach of 40 m. Storage area 13,200 cu.m. for 90,000 tons of bulk cargo.

TANKERS: 3 berths available. Max. length 200 m., Max. draft 30 ft. The 3 berths can accomodate two tankers of 33,000 d.w.t. at one time. Storage capacity of 120,000 cu.m. Max. discharge rate 2,900 cu.m. per hour.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

FRESH WATER: Available ex-shore hydrants or water-boat.

FUEL: Available all grades fuel and gas oil by barge. Vessels calling for bunkers only, pay no harbour dues, and other fees are reduced.

REPAIRS: All repairs possible. Floating crane available. Neptun Shipyard and other repair shops situated at City Docks. Warnow Shipyard and floating dock situated in Overseas Port.

DEVELOPMENTS: Plans to build a floating island in depth of 21 m. off Rostock to accommodate tankers up to 100,000 tons. Estimated discharge rates up to 3,000 t.p.h. into smaller vessels for transfer to existing oil terminal.

REPATRIATION: Can be arranged if identification papers in order.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

AIRPORT: Barth Airport 70 km. from Rostock.

TELEPHONES: Ship-to-shore connections available.

POLICE/AMBULANCE/FIRE: Ambulance 336/3662; Police 366/3164; Fire 366/2222.

SHORE LEAVE: Crew members permitted ashore.

PILOTAGE: Compulsory. Contact Pilot by VHF Channel 12. Pilot stations are at Barhoeft and Ruden Island. Pilot boards vessel at Gellen (North-West entrance) and Landtief and Osttief (Eastern entrance).

Entry only possible from one hour before sunrise to one hour after sunset.

ANCHORAGE: In the roads clear of the fairway, depths 26 to 30 ft.

RESTRICTIONS: Northern entrance between breakwaters is 13 ft. depth used by smaller vessels only. Eastern entrance, depth 16 ft. 6 in. MLW.

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

TUGS: Available and compulsory for vessels berthing and unberthing.

MAX. SIZE: Vessels up to 17 ft. draft.

BERTHING: Depth alongside quays up to 17 ft. maximum. Length of quays 1,100 m.

CRANES:

2 cranes 10 tons capacity; reach 20 m.
2 ,, 2 tons capacity; reach 20 m.
1 ,, 5 tons capacity; reach 22 m.
1 mobile crane 5 tons capacity; reach 22 m.
2 Elevators capacity 25 t.p.h. each.

Also a conveyor system for handling of potash with a capacity of 60 t.p.h.

FRESH WATER: Available from shore ex pipe-line.

FUEL: Gas oil and lube oil available. By barge.

REPAIRS: All deck, hull and machinery repairs by local shipyards.

REPATRIATION: All facilities exist for changing crews.

AIRPORT: Barth Airport 25 km. from Stralsund.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

PILOTAGE: Compulsory from outer roads to harbour quays. Pilot boards at Wismar sea buoy. International code signals used. Contact by VHF Channel 12.

ANCHORAGE: In outer roads between Hannibal Shoal and Poel Island in depths of up to 40 ft. Protected anchorage in inner roads, depths up to 30 ft.

RESTRICTIONS: Entrance to the port is through a buoyed channel 14 miles long, depth 29 ft. LW. Vessels over 5,000 d.w.t. and over 24 ft. draft enter in daylight only, turning basin 250 m. diameter.

MAX. SIZE: Length up to 200 m. Max. draft 27 ft.

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

TUGS: Available and compulsory for berthing and unberthing.

2 tugs of 800 h.p. Tugs join vessel according to the Pilot's instruction.

BERTHING:

Grain Quay: Max. draft 27 ft., quay length 160 m., 2 grain elevators, grain silos for 20,000 tons.

Potash Port: Max. draft 27 ft., mechanical potash loading plant, quay length 360 m., 3 loaders.

Oil Port: Max. draft 27 ft., max. length 200 m.

Timber Port: Max. draft 22 ft., quay length 400 m., 2 gantry cranes of 3.2 tons, 1 mobile crane (30 tons).

Old Port: Max. draft 16 ft., quay length 140 m., no handling operations, fishing port, waiting berths.

Seaport, Northern Quay: Max. draft 27 ft., quay length 420 m., 5 gantry cranes with a capacity from 3.2 to 12 tons. One mobile crane of 30 tons capacity and one floating crane of 100 tons capacity.

Seaport, Southern Quay: Max. draft 27 ft., quay length 500 m., 3 semi-gantry cranes with a capacity from 3.2 to 10 tons.

FRESH WATER: Available from shore hydrants at all berths or by water boat.

FUEL: All grades fuel and gas oil obtainable. Vessels calling for bunkers only, pay no harbour dues, and are allowed a reduction in pilotage and clearance fees. 7 days notice required for bunkers.

REPAIRS: All repairs can be effected at Mathias-Thesen Shipyard. Floating crane available, capacity up to 100 tons.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. No alterations during the year.

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

AIRPORT: Barth Airport 100 km. from Wismar.

BRAKE: 53.20 N. 08.29 E. (See Plan)

PORT LIMITS: The government-owned piers are the commercial area of the port. A vessel is considered to be an "arrived ship" when she is moored alongside such piers, and the customs formalities are complete. Laytime will commence according to referring charter parties.

Port Authorities distribute the free berthing places in following the "Benutzungsordnung fur den Hafen Brake" which says briefly that a vessel will get a rank position in actual arriving times:

(a) for ships coming from sea: arrival "Weser lightvessel" plus 5 hours.
(b) for ships coming from Bremerhaven North Roads and Blexen Roads: departure plus 2 hours.
(c) for ships coming from Bremen: departure plus 3 hours.

DOCUMENTS:
2 Lists Ship's Stores.
2 Crew Lists.
2 Passenger Lists.
Health Certificate (forms obtainable from Pilot).
Ship's Register.

PILOTAGE: Carried out by Weser River Pilots. The river Pilots also act as docking Pilots. Also see Bremen and Bremerhaven.

ANCHORAGE: No anchorage in vicinity of Harbour. nchorage in "Blexen Roads". For further details see "Bremen".

RESTRICTIONS: Vessels proceeding to Brake with a draft in excess of 24 ft. will be restricted by the tide.

MAX. SIZE: Max. length 230 m. (755 ft.); no restriction on beam. Max. draft 35 ft. in fresh water.

PRATIQUE: Free pratique is given by health and immigration officer only. If a case of fever or disease is suspected on board radio the Agent with details before arrival.

RADIO: Cable Agent via Norddeich Radio (Call sign DAN) advising ETA and cash requirements.

RADAR/VHF: Stations from Weser lightvessel to Bremerhaven. Radar service between Bremerhaven and Bremen is planned. Radar stations have day and night service. If no fog every odd hour radar stations give on VHF or Pilot walkie-talkie report of visibility, defective buoys, anchoring ships, obstructions to navigation, and special occurrences. Brake plans a port radio VHF station.

TUGS: Available day and night in sufficient number. No extra charge for using tug's lines.

BERTHING: *Inner Harbour with tidal lock:* Length of dock 1,070 m. (3,500 ft.), width 110 m. (360 ft.), width of entrance 13.25 m. (43 ft. 5 in.); depth of water over sill at ordinary tides 19 ft. 6 in., depth of water over sill at highest Spring 21 ft. 6 in. (at lowest neap 17 ft. 6 in.). Length of canal 228 m. (750 ft.), width of canal 46 m. (150 ft.), length of quay in canal 228 m. (750 ft.).

Riverside Berth: Total length 1,430 m. (4,680 ft.), depth at pier 36 ft. at normal low water, tidal amplitude 11 ft. 6 in. Max. draft 35 ft. Max. length of ships not more than 230 m. (755 ft.).

This government-owned pier is divided into 2 areas. The Northern part is the crane-area with a length of 3,115 ft., the Southern part, 1,565 ft. long, is the grain-handling area.

Private Pier of the Fettraffinerie/Unimills has a length of 150 m. (492 ft.).

SPECIALISED CARGO HANDLING FACILITIES:
Inner Harbour: crane area

4 electric cranes to lift 1 to 5 tons.	Riverside Berth
2 bridge cranes, capacity 50 tons.	
2 bridge cranes, capacity 20 tons.	
1 bridge crane, capacity 15 tons.	
2 whipping cranes, capacity 25 tons.	
2 whipping cranes, capacity 15 tons.	

Grain handling area (Riverside Berth)

7 pneumatic grain elevators (capacity from 60 to 600 t.p.h.) with a total discharge capacity of 2,000 t.p.h.

Fettraffinerie Pier

Tank installations with pumping arrangements of a capacity of 700 t.p.h. to vessel and 1,300 t.p.h. from vessel.

The government-owned pier is not equipped for containers, roll-on/roll-off traffic. The berth does not handle liquid chemicals.

STEVEDORES: ETA has to be reported to the Agent to arrange gangs. Stevedores are working 3 shifts around the clock on working days (Monday to Saturday); on Sundays and holidays 4 shifts are worked around the clock.

MEDICAL: Two hospitals and several doctors available at Brake. Advance notice to Agent required if medical assistance necessary.

TANKERS: Fettraffinerie Pier: Max. draft 33 ft. Discharging lines: molasses 6 in., fuel oil 8 in., diesel 10 in. and vegetable oil from 4 to 8 in.

DENSITY: Brake Port, Freshwater: salinity = 1002–1004.

FRESH WATER: Available both at Riverside Berth and Inner Harbour. Pumping capacity from 18 to 20 t.p.h.

FUEL: All grades available by bunker barges.

FIRE PRECAUTIONS: No smoking on deck. For tankers at Fettraffinerie Pier smoking only in saloon and/or messroom.

CONSULS: No Consuls; consulates at Bremen.

REPAIRS: All normal ship and engine repairs can be carried out during laytime on board.

DRY DOCKS: One dry dock at Luehring Werft, Brake, for ships with a length not in excess of 85 m. (279 ft.), nor broader than 16 m. (52 ft. 6 in.), and a max. draft of 13 ft. 1 in.

SURVEYORS: Classification Socieities not represented but several surveyors available at Brake Port.

GANGWAY/DECK WATCHMEN: Crew's watchmen necessary – strong tides, current-speed 3 knots.

HATCHES: Depends on the different charter parties.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and 2 bottles of wine.

CARGO GEAR: Load/discharge normally effected by shore-gear.

REPATRIATION: Any necessary repatriation and/or crew changes can be effected by Agents at Brake.

AIRPORT: International airport served by regular airlines at Bremen. Brake to Bremen, distance 57 km. (35 stat. miles).

TIME: Local time is GMT plus 1 hour. No alterations to clocks during the year.

HOLIDAYS: New Year, Good Friday, Easter Sunday and Monday; May 1, Ascension Day; Whitsunday and Monday, Penitentiary Day, 2 Christmas Days. Cargo work can be arranged on those days, except on New Year, Easter Sunday (1st Easter day), 1st May, Whitsunday, 1st Christmas Day, and on the days before such days till 1200 and/or 1400 hours.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 4060; Fire 112.

TELEPHONES: No arrangements to place telephones on board.

SHORE LEAVE: Shore passes are required according to customs regulations.

IDENTIFICATION CARDS: Crew members to have valid identity cards.

DEVELOPMENTS: Weser fairway depth will be increased to 12 m. (39 ft. 6 in.).

SEAMAN'S HOSTEL: Weserstr. 1A, tel. 4490.

AUTHORITY: Niedersachsisches Hafenamt Brake.

BREMEN (Including Farge): 53.06 N. 08.46 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Provision and Store Lists incl. fuel oil.
Dangerous Cargo Lists.
Health Declaration.
Ship's Register.
No Customs Papers if vessel laying in Freeports at Bremen.

DEEP SEA PILOTAGES: See "Brixham" or "Cherbourg".

PILOTAGE: Not compulsory on the Weser, but a portion of pilotage dues is charged in any case. Most vessels take a Pilot.

Distance from Bremen lightvessel to Bremerhaven 36 miles. Distance from Bremerhaven to Bremen 32 miles.

At least 12 hours before arrival at Weser lightvessel, Masters should cable ETA messages to "Lotsenbruderschaft Weser zwei Bremerhaven" via Norddeich Radio. Message to include name and g.r.t. of vessel, place where Pilot required to board, day and hour of vessel's arrival, vessel's destination and fresh-water draft in metres. Sea Pilots board at Weser lightvessel to Bremerhaven. River Pilots board at Bremerhaven to pilot vessels as far as Bremen.

Pilot station near Weser lightvessel 53° 52′ 16″ N., 07° 50′ 00″ E., black-painted motor vessel, black-topped funnel, white lettering "Lotse" on hull. In rough weather, pilot boat may be found inside near Rotesand lighthouse/buoy "G". Pilots may be contacted by Norddeich Radio, 2182 or 2614 kHz. Alternatively by VHF Channel 16.

River Pilots boarding at Bremerhaven also act as harbour Pilots to all ports above Bremerhaven.

ANCHORAGE:
1. About 1 mile South-West of Weser lightvessel 53° 52′ 16″ N., 07° 50′ 00″ E.
2. Near Hoheweg lighthouse between buoys "F" and "N". Depth about 12 m.
3. Tegeler Plate between buoys 10 and 12.
4. Bremerhaven Northroads between buoys "Y" and "A". For ships with dangerous cargo inside the red sector of Imsum Lt. F. Depth about 12 m. Blexen Roads (South Roads) depth about 10 m.

RESTRICTIONS: Vessels proceeding to Bremen, with a draft in excess of 22 ft. will be restricted by the tide.

MAX. SIZE: Bremen: length 220 m., draft 32 ft. in fresh water. Longer ships with special permission.

Locks: At the entrance of the Industriehafen max. length 170.3 m., tidal docking up to 180 m., max. draft 29 ft. 06 in., max. breadth 23 m. according to tide.

HEALTH: Master has to fill and sign Maritime Declaration of Health which is handed to health officer on arrival at Bremerhaven and Bremen. In case suspected disease or fever on board radio details to Port Health Bremerhaven via Norddeich Radio before arrival.

RADIO: Cable Agent via Norddeich Radio, call sign DAN, advising ETA and cash requirements.

Bremen Port Radio VHF station on Channels 16, 3, 12 and 14 to be used for messages to all Port Authorities including Police and Fire Brigade and Port Health in case of emergency.

RADAR/VHF: Stations from Weser lightvessel to Bremerhaven. Radar service between Bremerhaven and Bremen is planned. Radar station has day and night service. If no fog, every odd hour radar station gives by VHF, or Pilot walkie-talkie, report of visibility, defective buoys, anchoring ships, obstructions to navigation and special occurrences.

TUGS: Tugs available at all stations according to ships request. Tugs lines used (only) without charge.

BERTHING: Berthing at Bremen: The following harbours can be reached:

Harbour name:	Max. draft subject to tide and berth ft.	in.	Safe draft in Harbours at any time up to ft.	in.	Length m.
Europahafen	31		23 06 – 29 00		2,760
Uberseehafen	32		27 06 – 32 00		3,240
Holz-und Fabrikenhafen	31		21 06 – 28 06		1,540
Getreidehafen	32		13 06 – 32 00		780
Neustadter Hafen	32		31 00 – 32 00		1,500
Kap Horn Hafen	32		28 06		400
Industriehafen	29	06	12 00 – 29 06		5,100

Max. draft is dependent on the prevailing winds

SPECIAL CARGO-HANDLING FACILITIES:

Container-Handling Facilities: The container terminal in the Neustadter Hafen is equipped with 2 container cranes, suitable for 40 ft. containers. Maximum lifting capacity: 45 tons. The terminal has 116 connections for reefer containers.

Roll-on/roll-off terminal: A new roll-on/roll-off terminal has been built at the head of the Europahafen for roll-on/roll-off ships, 1 berth. Maximum carrying capacity 60 tons, width 8 m. Max. draft 28 ft.

Lash Terminal: A lash terminal has been built at the head of the Uberseehafen. Further lash place: Lankenauer Hoft.

Bulk handling facilities (Industriehafen)

Bulk cargoes such as coal, coke, ore, phosphate, oil, logs, and potash are handled in the Industriehafen. To enter the industriehafen, vessels have to pass through a lock which is 171 m. long, 23 m. wide and allows a max. draft of 29 ft. 6 in. fresh water at normal high water.

Gebr. Rochling (Kohlenhafen)

At this facility coal, ore, phosphate, and logs are handled. There are no restrictions regarding the vessel's length, beam, height or draft other than those imposed by the lock to the Industriehafen. The quay has a length of 850 m. and is equipped with four 18-ton cranes, each having a capacity of 1,500/2,000 tons per shift. In addition there is 1 gantry crane lifting a 20-ton wagon and loading this quantity within 3 minutes, and 4 cranes (two of 8 tons and two of 5 tons) which are mainly used for handling logs.

Storage facilities amount to 75,000 m^2.

Anker-Schiffahrt (Kalihafen)

At this facitilty salt and potash cargoes are handled. The quay has a length of 400 m. and is equipped with 5 conveyerbelt loaders and 3 crane bridges each with a lifting capacity of 6 tons. It is possible to store about 150,000 tons of cargo. Restrictions as above.

Klocknerhutte (Huttenhafen)

This facility mainly handles coal, ore, scrab, stones and sand. Export of steel sheets pipes and coils of Klockner iron mill are handled via this quay.

Quay length:	550 m.
3 Gantry cranes:	12.5 tons, 10 tons, 40 tons.
Ore discharging capacity	8,000 tons per 24 hours.
Storage capacity	300,000 tons
Restrictions as above	

Kraftwerk-Hafen (Power Station) Kohlenhafen

At this berth only coal cargoes for use by the power station are handled. Discharging rate 2 cranes: 1,250 tons per shift.

Other bulk handling facilities:

Granary (Getreidehafen) *near the Uberseehafen*

No locks Max. draft 32 ft. Lighterage is possible.

Berth A 2 elevators with a capacity of 400 t.p.h. max. length 260 m. (853 ft.).

Berth B 6 elevators with a capacity of 170 t.p.h. max. length 176 m. (577 ft.).

Kraftwerk Farge (Power Station)

Location: 10 miles downstream from Bremen. Only coal cargoes for the power station are handled.

Max. draft	29 ft. 6 in.
Max. length	200 m. = 656 ft.
Max. beam	25 m. = 82 ft.

3 cranes, total discharging capacity 200 t.p.h.

Rolandmuhle: tidal basin Holz-und Fabrikenhafen. Grain facility with

Max. draft	21 ft. at low water.
Max. length	180 m. (591 ft.).
2 stationary elevators	3,000 tons per day
1 conveyer for loading bags only	

J.H. Bachmann/J. Muller/Karl Gross (Holz-und Fabrikenhafen)

Facility for grain and occasionally, general cargo handling.

Max. draft	up to 23 ft. at normal low water.
Quay length	710 m. (2,330 ft.).
Cranes	13 Grain/General cargo
Elevators	4–250 t.p.h. each

Car loading installations (Kap Horn) with two quays, one 320 m. long inside Industriehafen and the other 400 m. long (riverside). The storage area is 100,000 sq.m. and provides sufficient space for 7,000 cars. The loading of cars is done by ship's gear.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:

Regular period: 0630–1430 resp. 0600–1400
Free Port
1st shift: 0600–1400
2nd shift: 1500–2300
3rd shift: 2300–0600 (overtime)

on Sundays: (overtime)
1st shift: 0600–1200
2nd shift: 1200–1800
3rd shift: 1800–2400
4th shift: 2400–0600

Industrieh/Grain Pier
0630–1430
1430–2230 (overtime grain pier)
2230–0630 (overtime)

Industrieh/Grain Pier
0630–1230
1230–1830
1830–2430
0030–0630

On Saturdays:
Free Port
1st shift: 0600–1400
2nd shift: 1500–2100 (overtime)
3rd shift: 2100–0300 (overtime)

Industriehafen/Grain Pier
0630–1430
1430–2030 (overtime)
2030–0230 (overtime)

CRANES: All piers are fitted with cranes 3/7 tons. Floating cranes up to 250 tons available.

MEDICAL: All medical facilities available. Advance notice to Agent required if medical assistance necessary.

TANKERS: Draft in fresh water.

Holzhafen	one berth max. draft 28 ft. 10 in. at low water
Osterott I	one berth max. draft 33 ft. at low water
Osterott IV	one berth max. draft 36 ft. 09 in. at low water
Farge	two berths max. draft 31 ft. 06 in. at low water

For the following tanker berths see restrictions of the entrance lock Industriehafen

Oelhafen:	several berths max. draft 14 ft. to 23 ft.
Huttenhafen:	three berths max. draft 20 ft. to 24 ft.
Becken A	one berth max. 22 ft.
Kalihafen	one berth max. 29 ft. 06 in.

Fina Oil Einswarden. Max. draft 36 ft. 6 in. Discharging lines crude oil 12 in., fuel oil 10 in., diesel 8 in.

Frisia (Gulf Oil) Einswarden. Berth for tankers up to 250 m. length, max. draft 36 ft. fresh water.

DENSITY: Fresh water.

FRESH WATER: Available by hose and barge.

FUEL: All Grades available.

FIRE PRECAUTIONS: Smoking or use of open fire not allowed all over the Port area. No smoking on deck. Tankers, smoking in saloon or messroom only.

CONSULS: 31 countries represented.

REPAIRS: All repairs possible.

DRY DOCKS:

Vulkan-Gravity Dock	up to 240,000 d.w.t.
and one floating Dock	up to 22,000 d.w.t.
AG. "Weser" 2 Docks	up to 22,000 d.w.t.

SURVEYORS: Contact Schiffsbesichtiger or Port Authority.

GANGWAY/DECK WATCHMEN: Not considered necessary. But available when ordered.

HATCHES: Opening and closing normally by crew with stevedores assisting.

CUSTOMS ALLOWANCE: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days further same quantities. Wine not restricted. Freeports in Bremen only Europahafen, Uberseehafen and Neustadter Hafen.

CARGO GEAR: No additional requirements. Preventers necessary.

REPATRIATION: Any time.

AIRPORT: Regular national and international flights.

HOLIDAYS: New Year's Day (no work performed); Good Friday; Easter Sunday (no work performed); Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.

POLICE/AMBULANCE/FIRE: Police help 110; Fire, First aid 112. Pilot Station Bremerhaven: Sea Pilots 4–22–20; River Pilots 4–22–89.
Pilot Station Bremen: 38–52–08 or 38–13–26.
Port Administration Bremen: 38–92–1.
Waterway Police: 38–32–68.
Port Medical Services: 38–34–16.
Immigration: Call Water Police.
Foreign Calls: 0010.

TELEPHONES: It is possible to rent a telephone box from Mooring Company.

REGULATIONS: Usual Port Regulations. Special Regulations for dangerous goods and Tankers.

AUTHORITY: Hafenamt Bremen.

AGENT: Wm. H. Muller Co. (Bremen) GmbH. 1 Bremen, Birkenstrasse 37. Tel.: (0421) 314910. Telex: 244704. Cables: "Batavier".

BREMERHAVEN: 53.33 N. 08.35 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
3 Provision and Store List incl. fuel oil.
3 Dangerous Cargo List.
Health Certificate (forms obtainable from Pilots).
Ship's Register.
No Customs Papers if vessel laying in Freeport at Bremerhaven.

DEEP SEA PILOTAGE: See Brixham or Cherbourg.

PILOTAGE: See "Bremen".
Docking Pilots join vessels at Buoy "Z" if bound for Uberseehafen or near entrance of Geeste River if bound for Fischereihafen. Call sign is International Code flags PT with pennant below. Sound and flash signals are 3 long and 5 short.

ANCHORAGE: See "Bremen".

RESTRICTIONS: Vessels proceeding to Bremerhaven with draft in excess of 35 ft. 6 in. will be restricted by tide.

MAX. SIZE: Length 260 m., draft 41 ft. in fresh water. Draft 42 ft. 8 in. in fresh water, special permission required.

HEALTH: See "Bremen".

RADIO: See "Bremen".

RADAR/VHF: See "Bremen".

TUGS: Tugs join vessel with docking Pilots. Tug's lines used at no extra charge.

BERTHING: There are two harbour-groups, Uberseehafen North of Geeste River and Fischereihafen South of it.

Uberseehafen:

Along Weser River:	*Depth at LW*
Columbus Quay	36′
Stromkaje	46′
Dock basins:	*Depth*
Neuer Hafen	21′
Kaiserhafen I	28′
Kaiserhafen II	36′
Kaiserhafen III	36′
Verbindungshafen	36′
Nordhafen	46′
Osthafen	46′

The dock basins can be reached through 2 locks:
Kaiserschleuse: length 732 ft., gate width 88 ft. depth 23 ft. at LW.
Nordschleuse: length 1220 ft., gate width 148 ft. depth 36 ft. at LW. Max. size of vessel. length 265 m., beam 38 m. (124 ft. 07in.). Draft 42 ft. 08 in.

Fischereihafen:

Dock basins:	*Depth*
Fischereihafen I	24′
Fischereihafen II	24′
Handelshafen	22′

Locks:
Fischereihafen-Doppelschleuse
Small lock: length 349 ft., gate width 39 ft. depth 21 ft. at LW.
Large lock: length 328 ft., gate width 98 ft. depth 21 ft. at LW.

SPECIAL CARGO HANDLING FACILITIES: All sheds are equipped with electric cranes.
With special permission of the port authorities the following maximum FW drafts are allowed.
42′8″ = 13 m. – max. beam 40 m.
39′3″ = 12 m. – max. beam 41 m.
35′ = 10.7 m. – max. beam 42 m.
The port is equipped with modern bulk-, container-, roll-on/roll-off and general cargo facilities.
3 floating cranes have lifting capacities of 100, 250 and 500 tons respectively.
Weserport (Osthafen) Ore transhipment installation, quay length 330 m.. Depth 14.6 m. 2 unloaders. Max. outreach 22.5 m. Total discharge capacity 2,000 t.p.h. Average rate 750 t.p.h.
Columbus Quay Passenger and general cargo facilities.
Quay length 1,020 m. Depth 30 – 36 ft.
9 cranes – 4 to 8 tons.
Terminal ferry service to Harwich.
Car loading installations
The car loading installation at Bremerhaven is situated in the Nordhafen. Quay length 750 m. Storage area 40,000 sq. m. for about 3,500 cars. The loading is done by ships' gear.
Container Terminals
2 container terminals, 1 at Stromkaje and 1 in the Nordhafen, are equipped with 10 container cranes. 7 cranes at 54 tons, 2 cranes at 45 tons and 1 crane at 52 tons.
Depth alongside in river 46 ft. at LW. Depth at Nordhafen 38 ft.
Kaiserhafen/Verbindungshafen offers 4 basins for general cargo handling. Quay length: 4.130 m. Storage capacity in modern sheds: 79,716 sq. m. 40 cranes with capacities from 3–8 tons. Various cranes for heavy lifts up to 30 tons. Shed B in the Kaiserhafen III is equipped with 2 conveyor belt loaders for bagged cargo, especially fertilizers. The installation is weather protected. A banana discharging installation, with 5 elevators, has a capacity of over 300,000 tons per year.
Lash Carriers: Special facilities are available.

MEDICAL: Hospital facilities at all Weserports. No vaccination normally required.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:
1st shift: 0600–1400
2nd shift: 1400–2200
3rd shift: 2200–0500 (overtime)

on Saturdays:
1st shift: 0600–1400
2nd shift: 1400–2000 (overtime)
3rd shift: 2000–0200 (overtime)

on Sundays:
as Bremen Freeport.

TANKERS: *Esso Bremerhaven*, Columbus-Kaje. Max. draft 36 ft.
There are several tank-cleaning boats available to receive slops at Bremerhaven.

DENSITY: 1008 – 1010.

FRESH WATER: Available by pipe-line at all berths.

FUEL: All grades available.

FIRE PRECAUTIONS: No smoking on deck. Tankers smoking only saloon or messroom.

GANGWAY/DECK WATCHMEN: Not considered necessary.

OPENING/CLOSING HATCHES: Normally by crew with stevedores assistance.

CUSTOMS ALLOWANCE: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days, further same quantities. Wine not restricted. Freeports only at Bremen (Europa, and Uberseehafen), and at Bremerhaven (Kaiserhafen, Columbus Kaje and Weserport).

CARGO GEAR: No additional requirements. Preventers necessary.

IDENTIFICATION CARDS: Not required.

CONSULATES: At Bremen only.

REPAIRS: All repairs possible.

DRY DOCKS: There are 2 graving docks and 10 floating docks with max. capacity 75,000 tons.

REPATRIATION: Any time.

AIRPORT: About 4 miles from Bremen. Regular airlines.

HOLIDAYS: New Year's Day (no work performed); Good Friday, Easter Sunday (no work performed), Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.

TELEPHONE: Accidents, Police, help 110; Fire 112; Harbour Master 481212; Docking Pilots 481 230; Sea Pilots 42220; River Pilots 42289; Waterway Police 47011; Port medical service 40031.

DEVELOPMENTS: 2 container cranes under construction, expected to be operational mid-1977.

AUTHORITY: Hansestadt Bremisches Amt-Der Hafen kapitan.

AGENT: Wm. H. Muller Co. (Bremen) GmbH, Neue Fahrgastanlage 11, Kaiserhafen, Bremerhaven. Telegrams: "Batavier". Telex: 244704. Telephone: (0471) 46123.

BRUNSBUTTEL: 53.43 N. 09.09 E.

DOCUMENTS:
Health Certificate forms obtainable from river Pilot.
3 Crew lists.
3 Personal Effects Lists.
3 Stores Lists.
Bill of Lading.
Ship's Register.
For ships entering locks of Brunsbuttel for transit traffic through Kiel Canal, only ship's register required.

PILOTAGE: Canal Pilots compulsory. Vessels with more than 25,000 g.r.t. must take 2 river Elbe Pilots. Vessels requiring Elbe Pilot must order same at least 12 hours prior to arrival at Elbe 1 light vessel by cable to "Elblotse Brunsbuttelkoog" via Norddeich Radio (DAN) giving name of vessel, gross tons, ETA, date 2 figures, time 4 figures, draft. (For example: Tibetan 35824 ETA Elbe 1 05 0430 36 ft. 6 in.) Vessels requiring Canal or Harbour Pilot at Brunsbuttelkoog must order Pilot at least 6 hours prior arrival Brunsbuttelkoog roads by cable to "Kanallotse Brunsbuttelkoog" via Norddeich Radio (DAN) (for example: Brigitte 1249 ETA Brunsbuttelkoog 29 18.00 3.5 m.).

ANCHORAGES: In vicinity of lightvessel Elbe (54° 00′ N. 08° 10′E.); Neuwerk Roads (53° 58′ N. 08° 30′ E.); Freiburg Roads (53° 50′ 7″ N. 09° 20′ E.).
Vessels waiting entrance to the Canal may anchor in N.E. Anchorage, S. Anchorage, or Neufeld Anchorage, all with sufficient depth for vessels transitting Canal.

RESTRICTIONS: No restrictions imposed on night entry. If draft above 31 ft. 2 in. fresh water, vessels will be piloted to Brunsbuttelkoog with flood-tide.
Dimensions of lock: length 315 m., beam 40 m.
The Canal can be navigated by vessels up to 235 m. LOA and 32.5 m. beam and draft in accordance with table below.
Height above water-line transitting Canal must not exceed 40 m.
For Binnenhafen, as far as km. 3.75, vessels not requiring to transit Canal may enter with draft up to 10.40 m.

Length in (m.)	Beam in metres 20	21	22	23	24	25	26	27	28	29	30	31	32	32.50

MAX. SIZE:
Elbe Harbour: Max. draft 41 ft. 6 in. salt water ships to 250,000 d.w.t.

Oil Harbour: Max. draft 34 ft. 2 in. fresh-water max. length 235 m.

Ostermoor: Max. draft 31 ft. 2 in. fresh-water ships to 30,000 d.w.t.

Ships passing canal; See "Restrictions" above.

HEALTH: Pratique automatic for vessels entering harbour for loading or discharging, and ships passing through Canal if required. Health Certificate form does not show any infectious diseases.

RADIO: Cable Agents stating ETA, draft and requirements via Norddeich Radio (DAN).

RADAR/VHF: River Radar Service from Elbe 1 to Hamburg, but no special Port Radar Service for Brunsbuttelkoog. Radar Service can be contacted by VHF Channels 5 or 20.

River and Canal Pilots listen on Channels 9 and 13. Ships transitting canal directed by VHF Channels 2 or 3.

TUGS: 6 tugs available at Brunsbuttelkoog. Vessel's lines used. Tugs normally join vessels bound for the Elbe Harbour on river in vicinity of Canal locks.

From the approach limit up to entry into the lock, tug assistance is mandatory for vessels in Group 5 and over, and also such vessels which manoeuvre only with difficulty. Tugs assisting ships entering locks join vessels on canal-roads.

BERTHING: Ships lying at terminals situated on Canal bank in Inner Harbour should take into consideration that vessels must moor safely, as suction of passing ships may cause breaking of lines.

Elbehafen: Situated outside of locks. Quay length 1,100 m.

Binnenhafen: Comprises the area between lock entrance and km. 5.27.

Also see "Tankers" and "Fuel" below.

BRIDGES: Ships transitting canal must have bridge clearance of 40 m. Otherwise no impediments.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary.

MEDICAL: Port Medical Service by Harbour Doctors. Day and night service. Inoculations have to be ordered 24 hours prior arrival. Hospital available at Brunsbuttelkoog.

TANKERS: *Elbe Terminal:* Crude oil discharge berth situated outside of locks. One 30-in. pipe-line to DEA Tanker Storage. Two 12 in. hoses and 2×16 in. hoses available for discharge.

Oil Harbour. Situated on North side of Canal with entrance in location of km. 3.5. 5 berths suitable for tankers up to 10.40 m. (fresh water) draft. Hoses of 6 in., 8 in. and 10 in. for handling crude oil, diesel oil, gas oil, gasoline, tuluol, xylol and lube oil. No slop facilities available.

Ostermoor: 3 tanker jetties suitable for vessels able to navigate Canal. A mooring for discharge of K-3 cargoes (Flashpoint above 55°C).

Also see "Fuel" below.

DENSITY: Brackish at Elbe Harbour and inside locks. Average density 3% NaCL.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: All grades available. Vessels in Elbe Harbour supplied by barge.

Bunker stations on South side of Canal are:
Shell – 2 berths, no gas oil.
BP – 3 berths.
Elf (See Ostermoor) 4 berths.
and on the North side of Canal:
Norddeutsche Bunkergesellschaft – 1 berth no gas oil.
Brunsbuttel Bunker Service. – 3 berths.

FIRE PRECAUTIONS: No specific precautions except in Oil Harbour where anchors may not be used. Fire safety-lines must be ready fore and aft.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary but available day and night if required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ships entering canal and using terminals mentioned under "Max. Size" must have international ship's register. All other certificates should be valid but are normally not used.

CUSTOMS ALLOWANCES: Tobacco, each crew member 200 cigarettes or 50 cigars or 250 grams of tobacco. Surplus will be sealed up by customs. Wine and/or spirits 1 bottle of spirits and 1 bottle of wine permitted for each crew member. Beer unlimited. Ships transitting canal are not affected.

IDENTIFICATION CARDS: Normally not needed. If necessary in special cases identification Cards will be issued by Immigration.

CONSULS: All consulates available at Hamburg. Swedish Vice-Consul at Brunsbuttelkoog.

REPAIRS: Only minor repairs can be effected. Big yards and dry docks available at Hamburg.

REPATRIATION: Crew changes can be arranged in connection with local immigration Office.

AIRPORT: Nearest Airport Hamburg. 90 km. away.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: Cargo work can be arranged on every day.

POLICE/AMBULANCE/FIRE: Police 110 and 3041; Waterway Guard Police 8.71.60; Passport Control 87.262; Customs 8555; Hospital 2086; Fire 112.

TELEPHONES: No facilities for placing telephone on board.

AUTHORITY: Canal Authority – Kiel Holtenau, Port Captain Brunsbuttel, Lock.

BUTZFLETH: 53.39 N. 09.32 E.

DOCUMENTS:
3 Crew Lists.
3 Bonded Stores Lists.
3 Crew Manifests.
Maritime Health Declaration.
Ship's Register.
Discharge Books.
Passports of Crew.

Butzfleth is not a free-port. Customs, Immigration and River Police board on arrival at berth.

PILOTAGE: The pilot cutter is stationed off "ELBE 1" lightvessel. May be contacted on VHF Channels 13 and 16. River Pilots also act as docking Pilot.

ANCHORAGE: Neuwerk roads, near "ELBE 1" lightvessel.

TUGS: 4 tugs compulsory for mooring and unmooring. To be ordered from Hamburg and Brunsbuttel through Agent.

BERTHING: *Aluminium Oxid Stade GmbH. (AOS):* This bauxite/oxide plant, situated on the Westbank of the River Elbe, can be reached by vessels with max. drafts of 43 ft. F.W.

Quay length		*Depth at normal Low water*
Quay outside in total	325 m.	15 m. (49 ft.)
Within reach of crane	260 m.	
Quay inside	310 m.	5.2 m. (17 ft.)

When the depth of the River Elbe has been increased, it is expected that larger vessels will be handled at this installation.

The oxide produced at this plant, apart from being exported, is used for the mills of V.A.W. Elbewerk GmbH., Stade-Butzfleth and of Hamburger Aluminium Werk GmbH., Hamburg Finkenwerder.

Average discharging/loading rate
Caribbean bauxite ..... 350 t.p.h
Australian bauxite:
from Gove ..... 500 t.p.h.
from Weipa ..... 750 t.p.h.
Oxide ("Spout" loading) ..... 500 t.p.h.
Ship's telephone connection (4146-1453) at AOS pier.

Dow Chemicals GmbH: This industry, situated close to the AOS plant, offers 2 berths for gas and chemical tankers.

Restrictions	*Products Inflammable*	*Non inflammable*
Length at quay outside	149 m.	250 m.
Length at quay inside	125 m.	
Draft at quay outside	43 ft.	43 ft.
Draft at quay inside	26 ft. 3 in.	
Discharging rate liquid gas		approx 150 t.p.h.
Loading rate chemical products		200-650 t.p.h.

MEDICAL: Hospital and doctor available.

FRESH WATER: Available.

FUEL: Supplied by barge from Brunsbuttel or Hamburg.

REPAIRS: Minor repairs can be carried out.

AGENT: Sartori Berger, PO Box 1140, 2212 Brunsbuttel, tel. (code 4852) 8091 (5 lines), telex 28324.

CUXHAVEN: 53.52 N. 08.42 E. (See Plan)

DOCUMENTS:
Stores List.
Crew List.
Customs Manifest.
Derat. Certificate.
Amerikahafen is a Customs free port.

PILOTAGE: Pilot station situated in Old Harbour (Alten Hafen). To obtain Pilot call "Cuxhaven Post", VHF Channel 12. Pilot signal is flag "G" of International Code, or sound signal – 2 long and 2 short blasts.

ANCHORAGE: Available in Cuxhaven Outer Roads, 12 m. depth of water, and Inner Roads (Medem Reede) in 6 m. depth of water.

RESTRICTIONS: Vessels can enter by day or night. No tidal restrictions.
HEALTH: Quarantine clearance effected at Cuxhaven. Only vessels with suspected infectious disease on board are detained.
RADIO: for ETA, etc., use Norddeich Radio, call sign DAN. Closer to port Elbe–Weser Radio can be contacted by VHF Channel 16.
TUGS: Tugs available and used depending on ship size and weather conditions. Cost of tugs is Hamburg Tariff plus 20%.
RADAR: Available, can be contacted through VHF Channel 21, call radar station, Cuxhaven.
MEDICAL: Doctors and hospitals obtainable day and night.
FRESH WATER: Available from shore pipe-line up to 50 t.p.h. Small quantities up to 15 tons may be obtained in Roads from bunker barge. There are no water barges.
FUEL: Bunker and gas oil available. Small quantities, up to 150 tons, may be obtained anytime. Otherwise according to conditions of supplying oil company.
FIRE PRECAUTIONS: No special restrictions. Ships with explosive cargo and liquid cargoes of danger class K1 and K2 not allowed in Cuxhaven Harbour.
CARGO HANDLING: A harbour for overseas ferries up to 150 m. length with roll-on/roll-off and container equipment.
GANGWAY/DECK WATCHMEN: Not obligatory, at Master's discretion.
OPENING/CLOSING HATCHES: Normally performed by crew. Stevedores must be paid if required to do this work.
CUSTOMS ALLOWANCES: 40 cigarettes, 1 bottle spirits and 2 bottles wine.
IDENTIFICATION CARDS: If no passport, shore pass required.
CONSULS:
Iceland, tel. 36036/37.
Sweden, tel. 36011/12.
Others at Hamburg/Bremen.
REPAIRS: All deck and engine repairs possible.
DRY DOCKS: Floating dock for vessels up to 110 m. length, and slipway for vessels up to 75 m. long and 13 m. beam.
REPATRIATION: All facilities available.
AIRPORT: Hamburg-Fuhlsbuttel, 130 km. away; Bremen, 110 km. away.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: New Year's Day, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day. Loading/unloading can be arranged on these holidays.
POLICE/FIRE/AMBULANCE: Police, tel. 110; Harbour Police, tel. 22072; Ambulance, tel 23125; Fire, tel. 112.
TELEPHONES: At Steubenhoft and in the ferry harbour, telephones can be put on board.
SERVICES: Compass adjusting and radio overhaul.
SHORE LEAVE: Allowed.
DEVELOPMENTS: A new Ferry Terminal with roll-on/roll-off and load-on/load-off facilities under construction, completion expected 1977.
AUTHORITY: Niedersachsisches Hafenampt Cuxhaven.
AGENT: See "Hamburg".

ECKERNFORDE: 54.29 N. 09.51 E.

DOCUMENTS:
Stores List.
Customs Documents.
Cargo Documents.
Crew List.
PILOTAGE: No Pilot station. No tide. In East winds, water level can increase to 1.50 m. above normal.
ANCHORAGE: Good anchorage in the Roads between N.W. to N.W. by W. bearing from the port, distance 1 to 1.5 miles. Depths 18–21 m. Anchorage not allowed in harbour area.
CLEARANCE: Customs clearance at any time subject prior notice given. If suspected diseases on board inform Health Authorities.
MAX. SIZE. In outer harbour, up to 5 m. draft; in inner harbour up to 3 m. draft.
RADIO: Radio Kiel, call sign DAO, tel. 39011.
TUGS: No tugs.
BRIDGES: Outer and Inner Harbours separated by bascule bridge, opening to 12 m. width.
MEDICAL: Doctors and hospitals available.
FRESH WATER: Available.
FUEL: Diesel oil available. No coal.
WATCHMEN: Not available.
OPENING/CLOSING HATCHES: By ship's crew.
IDENTIFICATION CARDS: Required, if no passport.
REPAIRS: Available for fishing boats or coasters. Slipway for vessels up to 200 tons.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: Work allowed on Sundays and official holidays subject to Harbour Master's permission.
POLICE/FIRE/AMBULANCE: Police, tel. 110; Hospital, tel. 6041; Fire, tel. 112.
TELEPHONES: Public telephones in harbour area. No installation on board.
SERVICES: Other services available from Kiel.
SHORE LEAVE: Permitted.
AUTHORITY: Stadtische Betriebe Eckernforde GmbH.

ELSFLETH: 53.14 N. 08.28 E.

PORT LIMITS: The seaward boundary of the port is the entrance of River Hunte, vessels are considered to be arrived when alongside the berth or waiting berth, and customs formalities are completed.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
2 Provision and Store Lists.
1 Ship's Certificate.
PILOTAGE: Pilotage is carried out by Weser River Pilots, no harbour Pilot available.
ANCHORAGE: No anchorage in vicinity of the harbour, see Blexen Roads.
RESTRICTIONS: Max. draft in the entrance at low water is 3.20 m.
MAX. SIZE: Max. size in daytime, length 80 m. Max. size at night-time, length 60 m., draft depends on the tide.
PRATIQUE: Pratique is given on arrival by the health officer. If disease or fever is suspected on board it has to be reported to the Agent.
RADIO: Cable Norddeich (call sign DAN) advising ETA and cash requirements.
RADAR/VHF: No port radar service but river radar can be used for approaching port from Weser lightvessel to Bremerhaven. VHF Channel 6 from Bremerhaven to Elsfleth.
TUGS: Tugs have to be ordered from Bremen or Brake, they join the vessel at River Hunte estuary. If tug lines are used there are no extra charges.
BERTHING: 1 quay with a length of 260 m., depth alongside 150 m.=5 m., and 110 m.=4 m., 1 waiting berth for small vessel 2 m., 1 private berth (Omni-Pac).
SPECIALISED CARGO-HANDLING FACILITIES: 2 cranes with 5 tons and 1 crane with 3 tons. Bulk cargo can be handled with grabs, no other special facilities.
BRIDGES: No bridges to reach the port, but all ships bound for Oldenburg are waiting at Elsfleth for opening bridges.
STEVEDORES: ETA has to be cabled to the Agents to arrange gangs. Port works 3 shifts around the clock, including Sunday and holidays.
MEDICAL: Medical service is available day and night. Hospital is available at Brake.
TANKERS: No tanker berth.
DENSITY: Fresh water.
FRESH WATER: Delivered from the quay by hose.
FUEL: Fuel is delivered by bunker-barges stationed in port.
FIRE PRECAUTIONS: No fire precautions.
CONSUL: No Consuls.
REPAIRS: 1 dockyard, all ship and engine repairs can be carried out.
DRY DOCKS: 2 slipways can be used.
SURVEYORS: Classification Societies have to be ordered from Bremen, surveyors available at Elsfleth.
GANGWAY/DECK WATCHMEN: A crews' watchman is necessary because of strong tidal streams, 2—3 knots.
HATCHES: Hatch-opening/closing to be carried out by crew.
CUSTOMS ALLOWANCES: Quantity permitted for each crew member: 100 cigarettes, 1 bottle of spirits.
CARGO GEAR: Loading/discharging is carried out by shore cranes.
REPATRIATION: Any time. Inform agent.
AIRPORT: Airport at Bremen (50 km). Regular airlines.
TIME: Local time: GMT plus 1 hour.
HOLIDAYS: Cargo work can be arranged on those days.
POLICE/AMBULANCE/FIRE: Police: Station 2263, River 2377. Ambulance: Brake Hospital 04401–4060. Fire 2333.
TELEPHONES: No ship-to-shore communications.
SHORE LEAVE: Crew members are allowed ashore with valid passports.
IDENTIFICATION CARDS: No shore pass issued.
REGULATIONS: No unusual regulations for the port.
DEVELOPMENTS: A new private berth is under construction for the distillery "Pabst & Richards".
GENERAL: All ships bound for Oldenburg have to do clearance in port.
AUTHORITY: Niedersachsisches Hafenamt Brake.

EMDEN: 53.23 N. 07.13 E. **(See Plan)**

DOCUMENTS: Health Certificate: form obtainable from River Pilot and to be completed before arrival Emden locks, where it is collected by Port Health Authorities. Crew Lists. Ship's Register. Slop-chest List.
PILOTAGE: Compulsory. At least 12 hours prior arrival at Pilot station, vessel to radio "Emslotse Emden" indicating vessel's name, ETA, destination and draft. Contact pilot vessel on VHF

Channel 16 or MW 500 kHz or LW 2023 kHz (daytime) and 2182 kHz (night-time).

Pilot vessel located near Wester Ems Light Buoy in approx. position 53° 37′ N. 06° 24′ E.

ANCHORAGE: Vessels may anchor in vicinity of pilot vessel 9.5 fathoms depth. Sandy bottom.

RESTRICTIONS: Vessels drawing in excess of 26 ft. salt water have to wait for high tide to proceed to Emden proper. Tide rise about 10 ft.

MAX. SIZE: Under normal tide conditions, vessels drawing 36–37 ft. can enter Emden directly. Vessels up to 45 ft. can be discharged at the unloading berth on the Ems South of Borkum. Length and beam restrictions imposed by locks at Emden proper: 255 m. length, and 38 m. width. Vessels exceeding these dimensions require prior permission.

Vessels drawing up to 45 ft. salt water can be lightened in river inside Isle of Borkum, by floating cranes until appropriate draft achieved.

HEALTH: Pratique granted immediately on arrival at locks by Doctor or Health official.

RADIO: Cables should be despatched via Norddeich Radio (DAN).

RADAR: Radar service on the river "Ems" from approx. position 53° 37.5′ N. 06° 23′ E. (Westerems) or 53° 35′ N. 06° 23′ E. (Hubertgat) up to port entrance. The other range (Borkumradar) works on VHF Channel 18. Further information on this Channel.

TUGS: Sufficient tugs available, stationed at Emden locks, ranging from 790 to 3,900 h.p.

BERTHING: *Outer Harbour* quay length 110 m.

New Inner Harbour accessible through sea lock; South quay 930 m. length; North quay 480 m. length.

Inner Harbour includes Industry Harbour Quay. Length 300 m., depth 25 ft. alongside.

STEVEDORES: Since main commodities consist of bulk cargoes, such as iron-ore, coal, coke, bauxite, no specific requirements.

MEDICAL: Advance notice only required in urgent cases; hospital available.

BULK HANDLING FACILITIES: *Outer Harbour.* Facilities on northern part of quay include 3 stationary grain elevators with capacities of up to 250 t.p.h. and 2 floating elevators each of 250 t.p.h. capacity.

New grain silo, with 11,500 tons capacity equipped with 2 telescopic loading pipes. Handling capacity – 400 t.p.h. seawards, 100 t.p.h.

Inner Harbour. South Quay equipped with 10 transporters of about 15 tons lifting capacity each, and a conveyor belt system handling about 1,500 t.p.h., max 3,000 t.p.h.

North quay equipped with 4 transporters each of 15 tons lifting capacity and an ore conveyor belt system handling 1,000 t.p.h., max. 1,400 t.p.h.

TANKERS: Olhafen situated in Inner Harbour. Tankers up to 36 ft. draft discharge to Frisia Refinery.

Slops may only be discharged at the Tank Cleaning installation of Thyssen Nordseewerke GmbH.

The berth is equipped with two 12-in. Woodfield type loading arms used for receiving crudes and loading fuel oils. There is one 8-in. loading arm for bunkering. The average discharge rate is 3,000 t.p.h.

DENSITY: Average density in Port 1005–1010.

FRESH WATER: Available, supplied by barge, and alongside Outer Harbour Quay.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Neither compulsory nor necessary.

OPENING/CLOSING HATCHES: To be performed by crew.

CUSTOMS ALLOWANCE: In Freeport and Inner Harbour no restrictions on board vessel for up to 4 weeks. Seamen going ashore allowed to take only 20 cigarettes each.

IDENTIFICATION CARDS: Not required.

CONSULS: Swedish Consul, tel. 2 19 04, Dutch Consul, tel. 2 14 04.

REPAIRS: All kinds of repairs possible.

DRY DOCKS: Schulte & Bruns (floating dock) length 281 ft., width 52 ft. 6 in., lifting capacity 1,300 tons.

Rheinstahl Nordseewerke GmbH (floating dock) length 426 ft., width 51 ft. 8 in., lifting capacity 3,500 tons. (Floating dock) length 579 ft., width 88 ft. 7 in. lifting capacity 11,300 tons (Dry dock) length 715 ft., width 97 ft. 8 in.

C. Cassens Schiffswerft (floating dock) length 220 ft. width 33 ft. lifting capacity 1,000 tons. (Floating dock) length 308 ft. width 52 ft. 5 in., lifting capacity 1,780 tons.

AIRPORT: Nearest airports Bremen and Hamburg, about 2–3 hours drive from Emden. World-wide connections. Flight Emden to Bremen or Hamburg possible by air-taxi.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday (June 17th); Prayer Day; Christmas Day; Second Christmas Day (December 26th) No work on New Year's Day, Easter Sunday, Whit Sunday, May 1st and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 23 311; Fire 112.

TELEPHONES: Telephones can be placed on board if vessel berthed Northquay, Southquay or Rheinstahl Nordseewerke shipyard.

AUTHORITY: Wasser und Schiffahrtamt, Emden.

AGENTS: Fritzen Schiffsagentur und Bereederungs-GmbH, Neptunhaus, PO Box 109, Emden. Tel 04921 20011 (also after office hours). Telex 027821. Cables "Fritzenagent".

FLENSBURG: 54.48 N. 09.26 E.

PORT LIMITS: The seaward boundary is the line between a special boundary-stone on the Westside and the South corner of the Bluecher-Bridge on the Eastside of the port entrance.

DOCUMENTS: 2 crew lists, 2 passenger lists, 2 stores lists (bonded stores), EG cargo lists, bills of lading, general declaration, ship's certificates.

PILOTAGE: Pilot Station Flensburg, Schiffbrucke 12, D-2390 Flensburg, tel; (0461) 25150. Advance notice 5 hours before arriving Buoy 7 by Kiel Radio or agent (3 hours before leaving port). Pilot boards at Kalkgrund beacon near Buoy 7. Pilot will board in all weather if possible, otherwise pilot-boat will lead vessel to that position where pilot can board. Not necessary to anchor. Pilot-boat is a fishing-boat with "Lotse" written in white letters on both sides. Boat will show lights prescribed by international regulations and is fitted out with VHF Channel 6, 10, 16, 25, 26, 27.

ANCHORAGES: Just outside harbour entrance, N.E. of Mittelgrund and West of Kielseng leading lights. Depths of water between 12 and 19 m. muddy ground; same position for quarantine anchorage.

RESTRICTIONS: No specific restrictions; no tide, water-level variations depending only on the wind.

MAX. SIZE: Vessels up to 21 ft. draft can enter without hindrance, maximum draft 23 ft. Beam and length has to be in normal proportion to the draft of a seagoing vessel.

HEALTH: Generally free pratique for ships in the North Sea and Baltic Sea trade, ships coming from overseas ports pratique granted on arrival. Inform pilot if any suspected diseases on board. He will make necessary arrangements. A valid Deratting Exemption Certificate has to be on board.

RADIO: Kiel Radio, call sign DAO, tel. (0431) 39011, telex 02-0081.

VHF: None in Flensburg Port.

RADAR: There is no Port Radar Service.

TUGS: Harbour tugs are not available. If required, Flensburger Schiffsbau-Gesellschaft can supply one tug 470 hp, provided at least 3 hours notice given, ship's lines are used.

BERTHING: Powerstation-Quay length 170 m. depth of water 7.30 m. Harnis-Quay length 470 m. depth of water 6.50 m. Schiffbruck-Quay length 210 m. depth of water 6.50 m. Ballast-Quay length 140 m. depth of water 6.00 m. Depths of water refer to normal water-level.

CRANES: Powerstation-Quay 1 crane 5 tons and 1 crane 10 tons lifting capacity; Harnis-Quay 4 cranes 1 – 5 tons lifting capacity; all cranes are usable for general and bulk cargo.

BULK CARGO FACILITIES: No extra bulk cargo facilities available.

SPECIALISED CARGO-HANDLING FACILITIES: Not available.

BRIDGES: There are no bridges at Flensburg port.

STEVEDORES: Agents make all arrangements. Unloading rates depend on type of cargo. Bulk cargo discharge up to 120 t.p.h. per gang.

MEDICAL: Doctors, hospitals, ambulances available day and night.

TANKERS: 3 berths for tankers up to 1000 GRT with depths of water 5.70 m. and 5.00 m.; diameter of discharge lines are NW 200 and NW 80; average discharge of fuel and gasoil 300 cu. m. per hour.

DENSITY: Winter-time 1015; Summer-time 1012.

FRESH WATER: Available at all berths, delivery rate about 20 cbm/h from shore hydrants.

FUEL: Diesel available in any quantity. Fuel oil subject to 5 hours advance notice from 2 bunker stations and tank lorries.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Denmark, Nordergraben 19; others at Hamburg.

REPAIRS: Flensburger Schiffsbau-Gesellschaft carry out all ship repairs; outfit section equipped with one crane of 42 tons lifting capacity.

DRY DOCKS: One floating dock with 1,500 tons lifting capacity.

SURVEYORS: All main Classification Societies are present at Hamburg.

GANGWAY/DECK WATCHMEN: No watchman service available.

HATCHES: Opening/closing normally done by crew. Stevedores will perform this for additional payment.

CUSTOMS ALLOWANCES: For consumption on board merchant vessels for each crew member and per day 40 cigarettes or 20 whiffs or 10 cigars or 50 grams tobacco *and* 0.25 litre spirits *and* 3 litres wine are duty-free. If the ship stays for 3 days or longer it is usual to allow three-fold of the mentioned quantity. For shore leave 20 cigarettes are permitted for each person only. If a crew member leaves the ship for at least 3 days the regulations for tourists are applicable.

CARGO GEAR: All loading and discharging done by shore cranes, except elevator-work.

REPATRIATION: Possible at any time without difficulties.

AIRPORT: Hamburg-Fuhlsbuttel, 175 km. distant; 2.5 hours by train.

TIME: GMT plus 1 hour, permanent.

HOLIDAYS: See "Hamburg". No work on official holidays.

POLICE/AMBULANCE/FIRE: Police tel. 110, Fire/Ambulance tel. 112.

TELEPHONES: No installation on board ships.

SERVICES: No tank cleaning and slop disposal services. Compass adjusting possible, advance notice necessary.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

REGULATIONS: No particular or unusual regulations.

DELAYS: Normally no delays.

DEVELOPMENTS: One dredger is at work from time to time.

AUTHORITY: Stadtwerke Flensburg.

HAMBURG: 53.33 N. 09.59 E. (including Altona, Harburg and Wilhelmsburg) (See Plan)

DOCUMENTS:
6 Crew Lists
6 Passenger Lists.
3 Provisions and Stores Lists including Fuel Oil.
3 Dangerous Cargo Lists.
Health Certificates (forms obtainable from Pilot).
General Cargo Declaration.
Ship's Register.

DEEP SEA PILOTAGE: See Brixham or Cherbourg.

PILOTAGE: Pilot vessel *Elbe I* stationed Lat. 54° 0′ N., Long. 8° 10′ 7″ E. black painted, 2-masted vessel, with yellow funnel and "Lotse" in white letters on hull.

In bad weather, pilot boat shifts to East of Elbe II light vessel.

Pilotage district divided into 3 areas: (1) Elbe I to Brunsbuttelkoog. (2) Brunsbuttelkoog to Hamburg. (3) Harbour Pilotage. Change of Pilots takes place at Brunsbuttel and Seemannshaft. Pilotage is not compulsory, but advisable to use Pilots in approaches and port. River pilotage is charged. Inward and outward harbour pilotage free for vessels loading and/or unloading at Hamburg.

Pilots can be called by international code, flag, sound, or morse signals, radio call-signs DBBW, DBCQ, DBBY, or DAAO.

ANCHORAGE: Vessels awaiting Pilot may wait in vincinity of Elbe I lightvessel.

Other anchorages in Neuwerk Roads, approx. position 53° 58′ N., 8° 30′ E., and Freiburg Roads, approx. position 53° 50.7′ N., 9° 20′ E. Depths up to 13 m. available at Neuwerk and Freiburg Roads. Up to 14 m. at Brunsbuttel.

RESTRICTIONS: No restrictions on night entry. Vessels over 30 ft. draft are piloted to Hamburg with the tide in order to reach Finkenwerder Pilot station 1 hour before high water.

Depth of Channel, 12 m. at MLW, 14.50 at MHW at Hamburg.

MAX. SIZE: Draft 43 ft. (13.10 m.) in fresh water.

The following Harbours can be reached:

Harbour Name	*Max. draft subject to tide and berth*	*At any time up to*
Dradenau Hafen	33′–43′	33′
Petroleum Hafen	23′–37′	23′
Griesenwerder Hafen	27′–35′	27′
Kohlenschiffhafen	23′–33′	26′
Waltershofer Hafen	36′–43′	30′–36′
Kuhwerder Hafen	29′–36′	29′
Obere Hafen	28′–37′	27′
Rethe Neuhof HGL	33′–43′	30′
Rethe Gaswerke	33′–43′	33′
Kattwyk Hafen	33′–43′	33′
Neuhofer Hafen	33′–40′	33′
Rethe Hansamatex	33′–43′	33′
Rethe Speicher	32′–40′	32′
Schluisgrove Hafen	32′–38′	32′
Harburg 4	26′–35′	26′
Harburg 3	26′–35′	26′
Harburg 2	30′–40′	30′
Harburg 1	26′–30′	26′
Kraftwerk Wedel	32′–42′ 6″	32′
Rethe-Kruse	33′–40′	33′
Blumensandhafen	33′–43′	33′

The maximum draft is dependent on the prevailing Easterly or Westerly winds.

ETA: Master's telegrams via Norddeich Radio, call sign DAN, are passed on to Agent 24 hrs. a day, week-ends and holidays inclusive. For this reason it is advisable that Masters communicate with Agent via Norddeich Radio.

In order to avoid delay and extra charges Masters should cable their ETA at least 12 hrs. prior to arrival at Pilot station Elbe I to "Elbelotse Brunsbuttelkoog" via Norddeich Radio, stating the following details:

1. Name of vessel.
2. Gross register tons.
3. Date (2 figures).
4. Time (4 figures).
5. Place where Pilot is required.
6. Place of destination.
7. Draft in metres (4 figures).

For example:

Eta	Fjordaas	41079	12	1600	Elbeone	Hamburg	1214
(1)		(2)	(3)	(4)	(5)	(6)	(7)

1 hour before arrival at Elbe I lightvessel Masters are advised to contact the pilot cutter by VHF Channel 13 or 16.

BRIDGES: To be passed by vessels bound for basins South of Kohlbrand.

	Situated	*Max. breadth*	*Height above normal H.T.*	*Depth at normal H.T.*
Kohlbrand Brucke (a high-bridge)	across the Kohlbrand near Neuhof	558′	175′ 6″	48′
Kattwyk Brucke (a drawbridge)	across the Suder Elbe, before Harburg	328′	168′	43′ 8″
Retthe Brucke (a drawbridge)	across the Rethe, near Reiherstieg	164′	130′ 4″	41′

HEALTH: Master required complete health certificate when Pilot boards. Only vessels with infectious diseases are subject to detention.

RADIO: All messages to Agent, etc., through Norddeich Radio call sign DAN. Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting stations are on permanent duty at *Cuxhaven* (VHF Channel 12, safety and calling Channel 16), *Brunsbuttel* (VHF Channel 14, safety and calling Channel 16), *Stadersand* (VHF Channel 11, safety and calling Channel 16), *Hamburg* (VHF Channel 12, safety and calling Channel 16).

A continuous chain of radar stations is established from Elbe I to Hamburg (port area included) and can be contacted through radar stations *Neuwerk Radar* Radio 1 VHF Channel 18, *Neuwerk Radar* Radio 2, VHF Channel 5. *Cuxhaven Radar* Radio, VHF Channel 21. *Belum Radar* Radio, VHF Channel 3. *Brunsbuttel Radar* Radio 1, VHF Channel 20. *Brunsbuttel Radar* Radio 2, VHF Channel 5. *Steindeich Radar* Radio 1, VHF Channel 22. *Steindeich Radar* Radio 2, VHF Channel 18. *Hetlingen Radar* Radio, VHF Channel 21. *Hamburg Radar* Radio, VHF Channels 22, 18 and 20, and *Hamburg Port* Radio, VHF Channels 14 and 16. All stations are on duty 24 hrs. River Pilots at Elbe I VHF Channel 13. Harbour Pilots Hamburg VHF Channel 9.

TUGS: Normally join incoming vessels at Harbour Pilot station at Finkenwerder. Vessels' lines usually used. If tugs lines required, an extra charge is made.

STEVEDORES: Ordered by Agents, no additional ETA's required.

Working hours

Monday to Friday	First shift 0700 to 1500 hrs.
	Second shift 1500 to 2300 hrs.
	Third shift 2300 to 0700 hrs.
Saturdays, Sundays and holidays	First shift 0700 to 1300 hrs.
	Second shift 1300 to 1900 hrs.
	Third shift 1900 to 0100 hrs.
	Fourth shift 0100 to 0700 hrs.

Work performed after 1500 hrs. Monday to Friday, on Saturdays after 1300 hrs., on Sundays and holidays is at overtime rates.

BULK HANDLING FACILITIES:

DENSITY: Fresh water.

FRESH WATER: Available from shore at most berths. Also supplied by barge.

FUEL: All grades available from oil berths, or supplied by barge.

DEVELOPMENTS: Silo capacity for bulk cargo handled by pneumatic elevators is increased up to 500,000 tons at deep water.

Capacity of further 500,000 tons is available. Maximum depth for bulk cargo vessels 46 ft.

Dredging of the Lower Elbe by a further 1.5 m. to 16 m. at mean high tide is underway. This depth will be sufficient for fully loaded 100/120,000 d.w.t. vessels, completion expected 1977.

Port Extension Area. An industrial port area of 4,600 ha. with access for large sea-going vessels up to 120,000 d.w.t. is under development.

Hansaport: The new ore/coal terminal at Sandauhafen (operational from 1977) has a capacity of 15 millions tons p.a. Length of the two berths: 560 m; depth of water: 16 m. (MLT). Vessels up to 160,000 d.w.t. (partially lightened) will be able to berth.

WATCHMEN: Can be hired for all purposes. Normally arranged by Agent.

OPENING/CLOSING HATCHES: Normally by crew with the assistance of stevedores; otherwise, according to charter party.

CUSTOMS ALLOWANCES: No restrictions in the freeport area on board a ship. While not on board the ship in the freeport area or outside the freeport during shore leave or temporary leaving the ship up to 3 days, each Crew member allowed 20 cigarettes, 5 cigars and 50 grams tobacco. These quantities change when paying off.

CONSULS: All Maritime countries are represented by Consuls in Hamburg.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyards at Hamburg. Underwater repairs and cleaning can be effected by divers with special equipment.

DRY DOCKS: *Blohm and Voss,* tel. 3061: 5 floating docks with lifting capacities up to 29,000 tons. Graving dock, capacity up to 320,000 d.w.t.

Howaldtswerke Deutsche Werft, tel. 7411: 9 floating docks, with lifting capacities up to 53,000 tons.

Norderweft, tel. 311471: 2 docks, for vessels up to 4,000 tons d.w.t. and slipway for vessels up to 60 m. length.

There are other slipyards providing floating docks with lifting capacities of up to 5,000 tons.

TIME: GMT plus 1 hour all year round.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Day (June 17th); Prayer Day; Christmas Day; Boxing Day. No work on New Year's Day, Easter Sunday, May 1st, Whit Sunday and Christmas Day.

POLICE/FIRE/AMBULANCE: Police 110; Fire 112; Ambulance 110; Port Medical Service 321021.

AUTHORITY: Hafendirektion.

AGENT: Wm. H. Muller & Co., Schiffahrts-Agentur G.m.b.H., Monckebergstrasse 31, Hamburg 1. Tel. (040) 33.54.76. Telegrams "Batavier". Telex 2162926.

HOLTENAU, Kiel Canal: 54.22 N. 10.09 E.

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

KIEL: 54.19 N. 10.10 E. (See Plan)

DOCUMENTS:
Stores List.
Bills of Lading.
Manifest.
Crew List.
Health Declaration.
Derat. Certificate.
If loading/unloading cargo, following also required:
Ship's Stores List.
Crew Possessions List.
Cargo Manifest.
Bills of Lading.
Customs Declaration.

Local Agents will advise Master on board regarding these Clearance Documents.

PILOTAGE: Not compulsory for Kiel Harbour. For Kiel Canal, vessels over 50 g.r.t. must take a Pilot, and vessels over 2,500 g.r.t. must employ a steersman. Pilot station, tel. 331135. ETA required in advance. Pilot boat can be found near Kiel Lighthouse and also off the entrance to Kiel Canal. Pilot boats are yellow with "Lotse" painted on both sides. Signal for Pilot is flag "G" over numeral pennant 1. Pilots for Kiel Harbour also available and recommended if port is not familiar.

ANCHORAGE: Safe anchorages at Kanalreede in 13 m. depth, and at Heikendorferbucht in 11 m. depth.

RESTRICTIONS: Non gas-free tankers must give advance notice of arrival and will require chemist's certificate before entering harbour area.

Speed limit 10 knots South of line Bulk/Ehrenmal Laboe.

MAX. SIZE: For Nordhafen and ships passing Canal, 315 m. length, 40 m. beam, 9.50 m. draft; fresh water. Depth at harbour quays: Binnenhafen, 10 m.; Scheerhafen, 10.50 m. A bulk carrier of 35,000 d.w.t., draft 35 ft. has discharged at Scheerhafen.

HEALTH: If suspected infectious disease on board, inform harbour authorities by radio in advance.

RADIO: Kiel Radio, call sign DAO. Tel. 39011.

TUGS: If required tugs normally join vessel just off berth. Can be ordered by Kiel Radio or through Agents.

BERTHING: No particular restrictions except for vessels in distress, or carrying explosives or tankers not gas-free. In these cases special permission of Harbour Authorities required for berthing.

Binnenhafen: Length of quay 2,500 m. Depths up to 10 m. 6 cranes with capacity up to 24 tons, also 2 mobile cranes.

There is a mobile roll-on/roll-off bridge, 18 m. wide. Max. axle pressure 70 tons.

At Sartori-Kai there is a silo with a capacity of 16,000 tons, and at mouth of the River Schwentine another with capacity of 17,000 tons and discharge rate of 80 t.p.h.

Oslo-Kai: The terminal is for the exclusive use of passenger and car ferries. Depth of water 7.5 m.

Scheerhafen: Length of quay 300 m. Depth 10.3 m. There are 2 modern high capacity cranes capable of lifting up to 10 tons. There is also a privately owned tanker unloading facility with storage capacity of about 70,000 cu. m. and facilities for receiving dirty ballast.

Nordhafen: Situated in the Kiel Canal. Length of quay 2,000 m. depth 11 m. Facilities available include a floating roll-on/roll-off bridge with permissible axle pressure of 60 tons, 6 cranes with capacities up to 25 tons, a 40,000 ton silo with drying capacity of 70 t.p.h. and 2 elevators with capacity 125 t.p.h.

MEDICAL: Doctors, hospitals, ambulances available. Advance notice to Agents recommended if medical assistance required. Vessels coming from European ports need Derat. Cert. Vessels from other ports need in addition International Vaccination Certificates.

For all cases of poisoning needing special and urgent treatment telephone 597 3268, Medical University Clinic, Schittenhelmstrasse.

TANKERS: Unloading/Loading/Bunkering berths operated by private companies; slop discharge facilities available.

FRESH WATER: Available at all quays.

FUEL: All grades available. Preferable to order in advance through Agents.

FIRE PRECAUTIONS: Tankers should be prepared to leave port at any time. To be berthed with bow heading seaward. A valid Gas-free Certificate given by chemist in Kiel district is required before entering harbour area.

GANGWAY/DECK WATCHMEN: Not required.

OPEN/CLOSE HATCHES: Normally by ship's crew. Can be arranged by stevedores if required.

CUSTOMS ALLOWANCES: 20 cigarettes per man per day. No alcohol.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium tel. 532579	Norway tel. 731631
Chile tel. 54457	Sweden tel. 3017/235

REPAIRS: All types of repairs possible.

DRY DOCKS: *Floating Docks.* No. 1, 1,500 tons; No. 2, 22,500 tons; No. 3, 3,500 tons; No. 4, 6,000 tons; No. 20, 1,700 tons. *Dry Docks:* No.. 5, 794 ft. long, 95 ft. wide; No. 6, 661 ft. long, 95 ft. wide; No. 7, 1,018 ft. long, 164 ft. wide; No. 8, 951 ft. long, 144 ft. wide. No. 8A, 1,395 ft. long, 292 ft. wide.

REPATRIATION: No restrictions. Can also be arranged in the locks of Kiel Canal by local Agents. Valid passports required.

AIRPORT: At Kiel, local flights to Hamburg. Nearest international airport at Hamburg, about 100 km. away.

TIME: GMT plus 1 hour. Permanent.

HOLIDAYS: New Year's Day, Good Friday, Easter (2 days), Ascension Day, Whitsun (2 days), 17th June, Atonement Day, Christmas (2 days). Work can be arranged on above holidays except Good Friday and Christmas Eve.

POLICE/FIRE/AMBULANCE: Police, tel. 110, alternatively 51171; Ambulance, tel. 44112, alternatively 61036; Fire, tel. 112.

TELEPHONES: Installed on wharves and Oslo quay (ferries to Scandinavia). Public phones near quays.

SERVICES: All services available.

SHORE LEAVE: Allowed.

AUTHORITY: Hafenkapitan, Hafenamt der Stadt Kiel, tel. 9012024; Hafen unt Verkehrsbetriebe der Stadt Kiel, tel. 9012011/2.

KIEL CANAL: (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

LUBECK (including Travemunde): 53.52 N. 10.40 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
1 Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
1 Ship's Particulars form.
Crew Manifest.
Bills of Lading.
Customs Declaration.
Derat. Certificate.

PILOTAGE: Compulsory for vessels over 300 g.r.t. Pilot station situated at Travemunde, near foot of Nordermole. Pilots board vessels in anchorage area. International signals used by Pilots and by vessels requiring a Pilot. Contact by VHF Channel 13 and 20.

RESTRICTIONS: Channel from Lubeck "A" buoy to Stadthafen is well lit and navigable by vessels fitted with radar in all weathers.
Depths: from "A" buoy to Travemunde (Nordermole) 10.5 m.; from Nordermole to Siechenbucht, 10 m.; channel to NWK power station, 9.5 m.; channel to Stadthafen 8.5 m. The river Trave narrows from 130 m. at seaward end to 90 m. at Stadthafen.
MAX. SIZE: Dependent on berth depth and approaches. Vessels up to 14,000 d.w.t. can reach Stadthafen. Also see "Restrictions".
HEALTH: Radio pratique possible. Pilot will ask Master to complete Health Declaration.
RADIO: Lubeck Radio, VHF Channel 27. Harbour Radio service used by Pilots, tugs, and other vessels.
TUGS: Available and compulsory for vessels navigating river above Herrenbrucke: 2,000 up to 2,500 g.r.t., 1 tug required; over 2,500 g.r.t. or 6 m. draft, 2 tugs required.
BRIDGE: Herrenbrucke is 60 m. wide and 22 m. above water level. Can be opened for vessels requiring higher clearance.
MEDICAL: All facilities available. Hospital near docks at Travemunde, and at Lubeck.
BERTHING:
Travemunde: Passenger ferry harbour. North side river berths I and II, 10 m. depth; Kaiserbrucke, 100 m. length, 10 m. depth; Ostpreussen, 190 m. length, 8 m. depth; Prival (South side), 180 m. length, 5 m. depth. 6 berths for roll-on/roll-off and passenger traffic each 140–220 m. length, 7 m.–9.5 m. depth.
6 berths with railway connection.
Industriehafen: depth alongside, 7.8 m.
N.W.K. Power Station: depth alongside, 9.5 m.
Stadthafen: 27 km. from sea. Total length of quays 7.6 km. The harbour depth is 6 m.–8.5 m.
Elbe Lubeck Canal: navigable by barges up to 1,000 tons.
CRANES: 1 – 40 ton, 1 – 25 ton, 1 – 12 ton, also 3 ton cranes.
TANKERS: Two berths, length 150 m. Max. draft 8 m.
FRESH WATER: Available by barge at any location.
FUEL: All grades of bunker oil and coal available.
CONSULS: Denmark, Norway, Austria, Sweden, Iceland and Finland.
REPAIRS: Several shipyards available for deck and engine repairs.
DRY DOCKS: Floating docks for vessels up to 7,500 tons.
SURVEYORS: German Lloyd, others at Hamburg.
OPENING/CLOSING HATCHES: By crew.
REPATRIATION: All facilities available.
AIRPORT: Hamburg, 1.5 hours by bus or train.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day.
POLICE: Lubeck River Police, tel. 3 34 40; Travemunde River Police, tel. 5025.
TELEPHONES: Ship telephone connections at ro/ro berths.
SHORE LEAVE: Allowed.
AUTHORITY: Port Capt. Lubeck.

NORDENHAM: 53.29 N. 08.29 E. (see also Bremen and Bremerhaven)

DOCUMENTS:
Cargo Papers & Ship's Certificate.
3 Stores Lists.
3 Crew Lists.
2 Personal Manifests.
Derat Certificate.
PILOTAGE: Pilot boards off the Weser Light Vessel. Docking Pilot will board off Bremerhaven.
ANCHORAGE: Sea anchorage off Weser lightvessel or the Hoheweg Light. Max. draft 30 ft. River anchorage for vessels with a draft of 20 ft. off Blexen, 1 mile above Bremerhaven.
RESTRICTIONS: No restriction on night entry except vessels with a draft exceeding 38 ft. Vessels with a draft exceeding 32 ft. will be controlled by tidal conditions. Controlling depth in channel 11 m. MLW. In the port 9 m. to 12 m. at MLW (Midgard Pier).
MAX. SIZE: *Midgard Pier: (a)* Bulk cargo berth, total length 1,068 ft. max. beam 120 ft., max. draft 42 ft.
(b) Oil berth No. 1 (combined with Southern part of *'a'*), max. length 850 ft., beam 120 ft., draft 40 ft.
(c) Oil berth No. 2, max. draft 32 ft.
(d) Granary, max. length 690 ft., beam 80 ft., draft 38 ft.
Guanowerk, max. length 550 ft., max. draft 29 ft. 6 in. (approx.).
Preussag, max. length 550 ft., draft 27 ft.
Asbestos wharf: Max. length 820 ft. (250 m.) up to a draft of 40 ft. at MLW.
Also see "Tankers".
HEALTH: Pratique granted immediately on arrival in port by Health Official.
RADIO: Norddeich Radio Dan or Elbe Weser Radio (VHF Channel 16).
RADAR: No port radar available. Radar for entrance see Bremerhaven.
TUGS: Ample available from Bremerhaven. Tug's lines used.
BERTHING: The following industrial works and companies within the port area of Nordenham possess a berth each for sea-going vessels which serve only their private supplies and requirements. These berths are situated North of Midgard Pier.
1. Norddeutsche Seekabelwerke Aktiengesekkschaft, (production of cables).
2. Felten & Guilleaume Schsltanlagen GmbH (production of electric appliances, motors, etc.).
3. Preussag Aktiengesellschaft (s.a.) (production of lead, zinc). Length of quay 230 m., depth of water 32 ft. 10 in. (approx.) 2 cranes of 5 and 3 tons. Capacity 80 and 50 t.p.h. respectively. Storage capacity, 50,000 tons (coal or ore). 10,000 tons (Metal blocks), 5,000 cu.m. (Sulphuric acid).
4. Guano-Werke Aktiengesellschaft (s.a.) (production of fertilisers). Length of quay 100.0 m. One gantry crane.
5. Erdolwerke Frisia Aktiengesellschaft (tanks for the storage of mineral oils).
6. Vereinigte Flugtechnische Werke GmbH (production of airplanes).
7. Asbestos Corporation GmbH (production of asbestos).
8. Weser Tanklager Gesellschaft mbH (storage of mineral oils, bunker oil station of BP).

Connections: Gas oil 2×8", fuel 1×8".
9. Titangesellschaft mbH (production of titandioxide).

Asbestos Wharf: Length 210 m. Extra mooring dolphins North and South of wharf 50 m. from each end of wharf. Depth alongside 12.5 m. at MLW. 1 grab crane for discharge of asbestos minerals into conveyor system of factory.
SPECIAL CARGO HANDLING FACILITIES:
Midgard Pier:
No. 1. Bulk cargo berth for discharging and loading, 5 bridges with a lifting capacity of 22 tons each. Max. outreach 24.5 m. Total capacity of ore per shift 10,000 tons.
No. 2. Oil berth. 3 pipe-lines 10 to 12 in. diameter for fuel oil, diesel oil and gas oil. No shore steam or facilities for dirty ballast available.
No. 3. Granary. 2 elevators with a total capacity of 700 t.p.h. Storage capacity of 46,000 tons.

STEVEDORES: 24 hours' notice required. Notice required Friday morning for week-end work.
1st shift: 0600–1400 hrs.
2nd shift: 1400–2200 hrs.
3rd shift: 2200–0600 hrs. (overtime).
on Saturdays: (grain and other bulk cargoes).
1st shift: 0600–1400 hrs.
2nd shift: 1400–2200 hrs. (overtime).
3rd shift: 2200–0600 hrs. (overtime).
MEDICAL: Hospital available; advance notice only required if urgent cases.
TANKERS: Diameter of lines 8 in.
Shell Berth: Max. size 34 ft.
Weser Tankerlager: Max. size 200 m., length 32 ft. draft at L.W. T-shaped mooring lines attached to pontoons fore and aft, middle lines are attached to the shore. Length of lines 100 m.
DENSITY: Average density of water 1005–1012.
FRESH WATER: Fresh water available at a rate of 15 t.p.h. per hose price 2 DM. per ton.
FUEL: All grades available; delivery by barge; 2 days' notice required.
FIRE PRECAUTIONS: Special regulations for vessels loading or discharging explosives.
CONSULS: See "Bremerhaven".
REPAIRS: Minor repairs can be carried out. Ample facilities for major repairs at Bremerhaven.
DRY DOCKS SURVEYORS: See "Bremerhaven" or "Bremen".
WATCHMEN: Not necessary but available if required by Master.
OPENING/CLOSING HATCHES: Normally by crew but if by stevedores extra charges will apply.
CUSTOMS ALLOWANCE: Each crew member 200 cigarettes or 30 cigars or 30 grammes of tobacco and 1 bottle of spirits for a running period of 3 days.
CARGO GEAR: In most cases loading and discharging is effected with shore gear. Special equipment can be ordered from Bremerhaven.
REPATRIATION: Possible by air via Bremen or Hamburg.
AIRPORT: Bremen, distance 70 km., 1 hour by car. Hamburg, 200 km., 3 hours by car.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 2052; Fire 112.
TELEPHONES: Available on request.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Are not issued.
REGULATIONS: Port regulations for the Midgard Pier including special regulations for handling of explosives.
DELAYS: None except waiting for high tide (see restrictions).
AUTHORITIES: Asbestos Corporation, GmbH., Nordenham
"Midgard" Deutsche Seeverkehrs-Aktiengesellschaft, Nordenham.
And others.

STADERSAND: 53.37 N. 09.32 E.

Oil Terminal in Elbe River operated by Hamburger Mineralolwerke.
DOCUMENTS:
3 Crew Lists.
3 Personal Effects Lists.
3 Stores Lists.
Cargo Documents.
Ship's Register.
PILOTAGE: As for Hamburg.
RESTRICTIONS: Draft calculated by adding 31 ft. to height of tide and allowing 3 ft. keel clearance.
MAX. SIZE: Length up to 600 ft.
RADIO: Norddeich Radio call sign DAN.

HEALTH: Health Certificate brought on board by River Pilot for Master to complete.
TUGS: Available. Meets vessel off the berth.
BERTHING: 1 tanker berth at T-head jetty.
DENSITY: Brackish.
FRESH WATER: Only obtainable by barge from Hamburg. Minimum quantity supplied is 200 tons.
FUEL: Only obtainable by barge.
CUSTOMS ALLOWANCES: 100 cigarettes and 1 bottle wine/spirits per man.
CONSULS AND GENERAL INFORMATION: Refer to "Hamburg".
AGENT: See "Hamburg".

WILHELMSHAVEN: 53.31 N. 08.10 E. (See Plan)

DOCUMENTS:

Oil Port	2 Crew Lists.
	1 Health Declaration (Form supplied by Pilot).
	Derat Exemption Certificate.
	Passports/Seamen's Books.
	Vaccination List.
Harbour Docks	2 Crew Lists.
	1 Health Declaration.
	2 Cargo Manifests.
	2 Stores Lists.

PILOTAGE: Jade pilot boats are 2-masted and have yellow funnels with black tops; the black hull has white inscription "Lotse" on both sides. By day flag "H" of international code is flown; by night, the lights prescribed by international regulations.

Pilot vessel stationed at mouth of Weser. To call Pilot for Jade, in addition to International Code signals the signal "J" is hoisted by day or flashed by Morse lamp at night. The same signal can be made on whistle in bad visibility. In bad weather pilot vessel may retire to Roten Sand (Weser River), near the light-buoy "G".

ETA required 24 hours prior arrival at Pilot station. Pilot vessel transmits and receives on VHF Channel 16.

Pilotage compulsory. Vessels up to 70,000 d.w.t. take 1 Pilot at "Weser" lightvessel. Vessels exceeding 70,000 d.w.t. take 2 Pilots at "Deutsche Bucht" lightvessel.

Helicopter pilot service is available for vessels above 50,000 g.r.t. at "Deutsche Bucht" lightvessel.

ANCHORAGE: A deep-water mooring for large tankers lies South of the lightvessel "Deutsche Bucht". Ships which are waiting for a Pilot may anchor for a short while by the "Weser" lightship.

2 further anchorages for large and deep-draft vessels, the "North" and "South roads", have been made available to the North-east and the South-east of the "Weser" lightship.

Quarantine anchorage, and tanker lightening at Schillig Roads. Vessels waiting for a berth and with max. draft not exceeding 41 ft., may anchor at Wilhelmshaven North Roads. Vessels with draft exceeding 41 ft. must anchor near the tanker anchorage Schillig where the depth is at least 45 ft.

Vessels must report at the beginning of the area-way Jade River to radio station "Jade Area Radio" on Channel 18 VHF. The area station will give information about movements.

RESTRICTIONS: No restrictions on night entry. Vessels draft exceeding 55 ft., will be controlled by tidal conditions.

The lock opening times for No. 4 dock are announced in daily maritime bulletins.

Dock No. 4, dimensions of lock: 390 m. long, 57 m. wide and depth of 11.47 m. MLW. However, only smaller vessels use dock harbour as bollards for mooring larger ships not yet available.

MAX. SIZE: Max. LOA, 1,150 ft. Max. draft 65.5 ft. Keel clearance of 10% of draft required. Also see "Tankers".

HEALTH: Radio pratique possible. Sea Pilot will hand Health Declaration to Master. If one of the questions is answered "Yes", Pilot will advise Port Health Officer. A valid derat. exemption must be produced.

RADIO: Norddeich Radio, call sign DAN. Elbe-Weser Radio can be contacted by VHF Channel 16.

TUGS: Compulsory. Tankers normally require 4 tugs of minimum 1,500 h.p. for berthing. Tugs meet tankers at anchorage near buoy "U". Only tug lines are used, charge inclusive. Tugs join vessels at buoy "Q" when proceeding to Mobil Oil Terminal.

TANKERS: *Nord-West Oelleitung Terminal:* Position 53° 33′ N, 08° 08′ E. Distance from Weser lightvessel, 24 miles. Type of Berth, Finger Pier "T" head. Density 1025. Current velocity, 3-4 knots. Mean tidal range, 11 ft. 09 in. Nature of bottom, sand and mud. Vessels may berth and unberth day or night. Vessels exceeding 55 ft. draft enter only on rising tide. Fresh water available, Diesel and Fuel "C" available. When discharging, full capacity of ship's pumps required. Normal residues and sediments are acceptable without any water. Shore gangway available. Vessels berth Port or Starboard side alongside. No limit on length or beam. Max. draft, Berth No. 1 and No. 2 – 61 ft. Berth No. 3 – 51 ft. and Berth No. 4 – 66 ft.

	LPG	1×8″	2000 m	400	1× 6″

Niedersachsenbrucke: (Lower Saxony Bridge) The "Niedersachsen Bridge" which belongs to the state of Lower Saxony is equipped with a fuel oil discharge unit for supplying a large nearby plant. The land-side berth of the loading pontoon running parallel to the Ufer is about 12 im. depth, so that loaded tankers up to a size of 35,000 d.w.t. can come alongside this pontoon. Furthermore, on this pontoon a loading installation for caustic soda is available. A bulk discharger unit with a hourly capacity of 1,200 tons serves coal to a large nearby plant. Vessels of 80,000 d.w.t. and a draft up to 13.5 m. can be accommodated.

Drinking water in adequate quantities is available at all shipment pontoons in the Jade.

Bunker and diesel oil is available in adequate quantities from Nord-West Ollleitung and Mobil Oil A.G. At the "Niedersachsen Bridge" it is necessary to order a bunker vessel in advance.

BRIDGES: 3 swing bridges affect entering dock harbour; these are opened to coincide with lock opening times.

STEVEDORES: 24 hours notice required. Bulk cargo discharge rate about 150 t.p.h.

MEDICAL: All medical facilities available.

FRESH WATER: Available by pipe-line.

FUEL: All grades available. 2 days notice required.

GANGWAY/DECK WATCHMEN: Shore watchman recommended to attend telephone.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: Oil port is Customs free port. In dock harbour each man allowed 5 cigars or 40 cigarettes, or 50 grams tobacco and 50 pieces of cgarette paper; 1 unopened bottle wine/spirits.

DEVELOPMENTS: *Liquid gas berth:* To the North of Mobil Oil A.G. a liquid gas terminal is to be installed. This will take gas tankers up to a capacity of 200,000 cu.m.

"Lower Saxony Bridge" (Niedersachsen Bridge): In connection with planned installation of a large tanker berth for crude oil and crude oil products, the "Niedersachsen Bridge" is to be extended. It is planned to provide facilities for the loading and discharge of large vessels up to 250,000 d.w.t. with dry and liquid bulk cargoes.

IDENTIFICATION CARDS: Required in oil port.

CONSULS: Denmark tel. 41061. Sweden tel. 26266. Finland tel. 7701.

REPAIRS: Facilities available for all deck and engine repairs. Repairs affecting main engine or steering gear intended to be carried out at the berths or at Wilhelmshaven anchorage, must be authorised by NWO and Port Authorities, when sufficient security tugs will be ordered to stand by. No charge for tugs if ordered before arrival. Permission for repairs depends on prevailing weather conditions and should be requested before arrival.
DRY DOCKS: Floating docks for vessels of 8,000 and 1,000 tons respectively. 1 small dry dock 50 m. by 10 m. by 2.8 m.
REPATRIATION: All facilities available.
AIRPORT: Nearest international airport at Bremen, distance 102 km.
TIME: GMT plus 1 hour. Permanent.
HOLIDAYS: Not observed in oil port. 1st January; Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whit Sunday; Whit Monday; 17th June; Atonement Day; Christmas Day; Boxing Day. Work may be arranged on Easter Monday, Ascension Day, Whit Monday and Boxing Day.
POLICE/AMBULANCE/FIRE:
Police: 43031.
NWO Oil Port: Fire/ Ambulance 621.
Mobil Oil AG.: Fire/Ambulance 551328
Niedersachsen Bridge: Fire/Ambulance 62008 or 26121.
Dock Harbour: 112 or 2621.
TELEPHONES: May be placed on board all tankers in oil port. At some locations in dock harbour, installation by Post Office, who require 2 days notice.
SERVICES: All services available including tank-cleaning, diving, compass adjusting, etc.
SHORE LEAVE: Allowed.
AUTHORITY: Wasser und Schiffahrtsamt Wilhelmshaven.

Ghana

TAKORADI: 04.53 N. 01.45 W. (See Plan)

DOCUMENTS:
2 Stores Lists.
2 Lists Crew Personal Effects.
1 Bill of Health.
6 Crew Lists with dates smallpox and yellow fever inoculations.
6 Passenger Lists or "Negative".
6 Vessel's Itinerary Lists.
1 Freighted Cargo Manifest.
1 Unfreighted Cargo Manifest.
1 set Bills of Lading.
Clearance from Last port.

PILOTAGE: Compulsory for berthing alongside. Pilot boards at port limits. International code signals used.

ANCHORAGE: Vessels may anchor outside the harbour without Pilot. Depth at moorings 22 ft. to 35 ft.

RESTRICTIONS: Depth at harbour entrance 35 ft. MLW.

MAX. SIZE: Up to 28 ft. draft for berthing alongside. Up to 33 ft. at buoys.

HEALTH: All crew require valid certificates of vaccination against smallpox and yellow fever, which are inspected on arrival when vessel boarded by Port Health Inspector. In case of suspected disease or fever on board, Agent should be notified details in advance by radio.

TUGS: Tug assistance is compulsory, to be ordered through Signal Station. 3 tugs available, 2 of 1,350 h.p., and 1 of 850 h.p.

BERTHING: Additional coir springs from shore required at all berths.

Berth	*Max. length vessel*	*Max. draft*
Manganese Wharf	520 ft.	28 ft.
No. 2 Wharf	550 ft.	26 ft.
No. 3 Wharf	500 ft.	28 ft. 6 in.
No. 4 Wharf	600 ft.	28 ft.
No. 5 Wharf	270 ft.	28 ft.
No. 6 Wharf	500 ft.	29 ft.
Bauxite Wharf	505 ft.	32 ft.
Coal Wharf	250 ft.	14 ft.

In addition, there are 9 buoy moorings in depths of 22 to 35 ft. of water.

TANKERS: Oil tankers moor on the North side of Lee breakwater. 1 berth suitable for ships of 600 ft. length, draft 29 ft.

STEVEDORES: Normal working hours: weekdays 0700 hrs. to 1200 hrs. and 1400 hrs. to 1700 hrs. Saturdays 0700 hrs. to 1200 hrs.

Gangs required for Sunday work should be ordered before 1130 hrs. previous day. For weekday work, gangs should be ordered before 1500 hrs. previous day.

GANGWAY/DECK WATCHMEN: Available, to be utilised on all ships by compulsion for security reasons.

SHORE LEAVE: Shore pass required from Immigration. Bathing in harbour is prohibited.

FRESH WATER: Good quality water available at all berths and from two 200-ton water barges.

FUEL: Diesel oil and fuel available at 4 main wharf berths and at the oil berth.

REPAIRS: Minor repairs can be effected, slipway for vessels up to 500 tons. Small drydock for vessels up to 100 ft. length.

AIRPORT: Situated 2 miles from the port.

TIME: GMT, no alterations during the year.

AUTHORITY: Ghana Railway and Ports Administration.

AGENT: Scanship (Ghana) Ltd., PO Box 329, Takoradi. Tel. 35.31. Cables "Scanship Takoradi", Telex 2181 Accra.

6 copies of Passenger List (or "nil" pass. list).
Valid certificates for smallpox, cholera and yellow fever vaccinations.
6 lists of Ports of Call.
2 Freighted Cargo Manifest.
7 Unfreighted Cargo Manifest.
1 B/L's set.
Port clearance from Last Port.
Departure – Port clearance visaed by customs.

PILOTAGE: For Main Harbour pilotage compulsory for all vessels of more than 100 net tonnage, when arriving or leaving harbour, or shifting berth, but for both Fishing Harbours obtainable on request.

Time of pilotage as follows: for Main Harbour:
(a) Dry cargo vessels: arrivals 0600–1800 (on special request up to 2000 hrs.), departure 0600–2300 hrs.
(b) Tankers: arrivals daylight only; sailings 0600 to 2200 hrs.
(c) Valco-carriers: all handling, during daylight only.
For fishing harbours: during daylight only.

Vessels arriving or wishing to enter harbour must await Pilot between E. and S.W. off Fairway light-buoy, up to 1.5 miles distance. Ships embarked by Pilots from 0600 hrs., according to time of arrival Quarantine Anchorage.

ANCHORAGES: Good anchorage, three-quarters to two miles from E.N.E. to S.W. off main entrance with depth 30 to 60 ft., with good holding ground. Eastern area of anchorage is more comfortable, without additional swell reflected from main breakwater.

TIDES: Maximal tides rise 6 ft. 2 in., minimal tides rise 3 ft.

PREVAILING WINDS: Light to fresh breeze from W. and S.W. during all year, except December to February when N.E. Harmathan is dominating with poor visibility. Dangerous winds are tornados from East, May to July, but occasionally isolated tornados are to be expected from January to December. There is a swell in harbour, especially after tornados, when lying alongside the berths.

HARBOUR: Harbour consists of 3 basins:
(a) The large basin of Main Harbour, formed by Main Breakwater 6,250 ft. long, and Lee Breakwater, 3,650 ft. long.
(b) Outer Fishing Harbour, East of Lee Breakwater.
(c) Inner Fishing Harbour on Northern side of former one.

Entrance to Main Harbour 800 ft. wide and together with the approaches has minimal depth of 35 ft. (Admiralty Chart Datum to which all depths refer). Ships entering Harbour 2–3 cables before entrance roll heavily, up to 4–8° during some seasons. Ship's deeper than 30 ft. enter only during high tide with maximum possible draft limit 32 ft. during neap tide. Bottom of harbour consists of sand and mud, with frequent hard rocky ground. Depth increases in direction of Main Breakwater. Two pairs of mooring buoys in depth of 34–36 ft. Inside harbour, alongside Lee Breakwater is an Oil Wharf for tankers with depth of 34 ft.

TUGS: Use of 1 tug compulsory for all ships over 2,000 g.r.t. and 2 tugs over 5,000 g.r.t. (but at Pilot's option), and 2 tugs compulsory for tankers and Valco-carriers. 2 Diesel Tugs 1,300 h.p. and 2 Steam Tugs 850 h.p. in service. 2 tugs available for duty between 0600 and 2100 hrs., otherwise 1 tug. Tug's wires to be used.

Berths	*Length*	*Max. Draft*
1	600 ft.	31 ft. 6 in.
2	600 ft.	28 ft. 6 in.
3	485 ft.	24 ft. 6 in.
4	600 ft.	25 ft. 9 in.
5	600 ft.	25 ft. 6 in.
6	600 ft.	24 ft. 6 in.
7	600 ft.	26 ft. 0 in.
8	600 ft.	24 ft. 9 in.
9	600 ft.	25 ft. 0 in.
10	600 ft.	24 ft. 6 in.
11	600 ft.	24 ft. 6 in.
12	600 ft.	25 ft. 6 in.
Oil Berth	Ships up to 650 ft.	32 ft. 0 in.
Valco Berth	Ships up to 600 ft.	31 ft. 6 in.

Berths No. 6 and 7 for loading cocoa-beans, equipped with 4 high-speed conveyers, transporting bags directly to ship's hold, from 4 cocoa sheds (totalling 2,400,000 cu. ft.) situated at Westerly corner of harbour.

Usually ships moor starboard side to berths No. 1, 2, 6–9 and portside to berths No. 3, 4, 5, 10–12.

SPECIALISED CARGO HANDLING FACILITIES: 3 special berths for bulk cargoes only: Berth No. 10 for grain only. It is equipped with 1 elevator for sucking/discharging.

Valco Berth for handling bulk cargoes such as alumina, pitch/coke and aluminium fluoride. It is also equipped with 2 elevators for sucking/discharging.

Berth No. 8 is partly meant for pumping/discharging of liquid/bulk chemicals such as tallow and alicane.

Cranes, Outloaders:

Quay No. 1	10 Portal Cranes	Cap.	(2) 5 ton	(2) 7.5 ton	(6) 3 ton
Quay No. 2	8 ,, ,,	,,	(3) 5 ton		(5) 3 ton
	4 Mobile Cranes	,,	(1) 5 ton		(1) 3 ton
			(1) 19.5 ton		(1) 45 ton

Cocoa Conveyor System: 4 Outloaders, each 30-35 t.p.h.
or : 2 Outloaders on high speed =70 t.p.h.

STEVEDORES: Available. Dry cargo is handled from 0730 hrs. to 1230 hrs. and from 1400 hrs. to 1700 hrs. on normal working hours, and overtime after 1700 hrs. to 2000 hrs. (for finishing ships 2030 hrs.) and on Saturdays p.m., Sundays and holidays. Oil Wharf and Valco Berth are working around the clock.

TANKERS: Tankers always moored starboard side to dolphins, and ropes to breakwater and bow-buoys. Crude oil pumped to refinery, by ships pumps, a distance of 18,000 ft.

North of Oil Wharf about 2 cables on same breakwater isValco Berth for discharging of bulk materials for "Valco" aluminium smelter (mostly alumina). Narrow channel 250 ft. wide leads to berth with depth 33 ft. 6 in.

FRESH WATER: Water pipes alongside all wharves, and under State's sanitary control. Rate of supply 50 t.p.h.

FUEL: Fuel and diesel-oils available by tanker-trucks only. No coal-bunkers available.

REPAIRS: Good marine-workshop.

DRY DOCKS: Dry dock 350 ft. long, 44 ft. wide on the gate, and with depth of 16 ft. 9 in. Also there is one slip with capacity 160 tons, and one 20 tons. Diving pontoon fully equipped, and with 3 divers and crane 10 tons. Graving dock 910 ft. long with necessary facilities.

GENERAL: Recommended to send ETA message at least 24 hours in advance. Essential that ETA message reaches Agent's office before 1430 hrs. Monday-Thursday or before 1000 hrs. Friday for weekends because of booking of gangs. Ships from Abidjan should also send 48 hours ETA message.

SHIPMASTER'S REPORT: January, 1976:

Good W/T. D.F. signals are obtained from Accra and Lome and with this vessel's equipment Marconi Type 758E will give a reliable position to within 2 miles. The 100 fathom contour line was accurate to within 1 mile where we crossed it. Within 20 miles the land definition is excellent on Radar. There is now an Oil Rig 137° 3.2 miles from the eastern end of the main breakwater. This is an

excellent seamark and is well lit at night. Native fishing craft are met with from about 10 miles offshore and show lights when fishing at night but reliability regarding these lights is doubtful.

VHF contact with the port Signal Station is good, although there was very heavy traffic during our stay outside waiting to berth 5.5 days, but I was allowed to use the main transmitter when berthed to inform Owners that we were alongside, at anchor no restrictions are placed on vessels using their wireless transmitters.

The pilotage is efficient although the tug was late in attending us when berthing this caused no difficulty.

The entrance to the Harbour is good, plenty of water all about if you have to wait for the Pilot, which we did. (He was moving a fishing vessel, and we had to cruise for about twenty minutes, after having come to the entrance on instructions that he would board there).

There were never less than 18 ships waiting for berthing.

W/T. contact with Portishead was good.

AUTHORITY: See Takoradi.

AGENT: Scanship (Ghana) Ltd., PO Box 64 Tema. Tel. 26.51 and 26.79. Cables "Scanship Tema". Telex 2181 Accra.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Gibraltar

GIBRALTAR: 36.08 N. 05.22 W.

DOCUMENTS:
3 Crew Lists.
4 Passenger Lists.
Arrival Report, to be completed when receiving Pratique.
International Maritime Declaration of Health.
Ship's Register.
Load Line Certificate.
Deratisation Certificate.
Ship's Articles.
Certificate of insurance in respect of Civil Liability for Oil Pollution Damage.

PILOTAGE: Pilotage compulsory for all navigation (except direct *departure* from anchorage). Give notice of arrival through Agents 24 hours in advance furnishing maximum draft. Ships approach off Rosia Bay where Pilot (available day and night) boards vessel. Pilot boat painted black and flies international Pilot flag. To call Pilot: sound, and fly flag "G" or call Gibraltar Port on VHF Channel 16 and pass message on Channel 12.

ANCHORAGES: In open bay, good safe anchorage, depths vary from 5 to 40 fathoms. Vessels normally anchor in area West of Harbour Moles.

RESTRICTIONS: *Note:* British waters in the Bay of Gibraltar extend to the Median Line drawn in accordance with the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone (see Admiralty Chart D 1448). However, part of those waters, lying North of 3 Qk. fl. buoys, are considered by the Spanish authorities to be within the limits of the Port of Algeciras/La Linea (Spanish Notice to Mariners 49/1563/67 of 9 December 1967), and the Spanish authorities have claimed Spanish port dues in respect of vessels anchoring between the Median Line and the line of buoys.

The waters in dispute form only a small part of the anchorages available to shipping calling at Gibraltar.

MAX. SIZE: If anchoring in bay, any size. Max. draft alongside, 31 ft. 6 in.

HEALTH: Vessels are usually boarded by Port Authorities off the Southern end of the detached Mole: if everything found satisfactory Pratique is granted immediately. Masters should advise Agents by radio before arrival of any illness on board so that Port Doctor may board vessel with Port Authorities.

RADIO: Gibraltar Radio, call sign ZDK.

VHF. Communicate with Port Authorities by VHF international calling Channel 16, pass message on Channel 12 (24 hour service).

TUGS: When required for berthing alongside, tugs meet vessels off Mole. Ship's ropes used.

BERTHING: Berths alongside are normally limited to 31 ft. 6 in. Deeper drafts may be accommodated for short durations of stay on a half-tide basis. Masters required to advise ship's draft when giving ETA. Cruise ships are only charged 50% of normal berthing charge.

Ships calling for bunkers and/or fresh water and not conducting operations involving passengers or cargo are only required to pay 20% of the normal berthing charges providing the stay alongside does not exceed 8 hours in addition to the bunkering/water period.

CARGO HANDLING: Port is able to accept containers that can be discharged by ship's equipment. 1 berth, for use by ships up to 28 ft. draft, has a fixed concrete stern landing ramp. Height of ramp above water level varies from 9 to 13 ft. according to tide. This is available for use in conjunction with ship's own stern ramp for roll-on/roll-off traffic.

STEVEDORES: Agents automatically advise stevedoring company on receipt of ETA from ship.

MEDICAL: Masters should advise Agents when giving ETA if medical attention is required on board. Adequate hospital treatment available.

TANKERS: Max. draft at discharging berths 31 ft. Diameter of discharging lines 14 in. fuel oil, 10 in. diesel oil and gas oil.

DENSITY: 1025.

FRESH WATER: Available at Mole from pipe-lines, delivery rate 60/80 t.p.h. Water can also be delivered at anchorage from barge, delivery rate 40/50 t.p.h.

FUEL: Fuel available any time day or night. All grades available.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: Normally effected by stevedores.

CUSTOMS ALLOWANCES: No restriction whilst on board. Crew members may bring ashore small quantity for their immediate personal use.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	Tel. 3288	Netherlands	Tel. 5968
Denmark	,, 2151	Norway	,, 4352
France	,, 4830	Portugal	,, 5330
Greece	,, 2956	Sweden	,, 2151
Italy	,, 3053	Venezuela	,, 3509
Israel	,, 5955	Finland	,, 3113
Liberia	,, 4312		

REPAIRS: Deck and engine repairs possible. Underwater operations including repairs and cleaning of vessel's hull.

DRY DOCKS: 4 dry docks (Admiralty) available subject Naval requirements. Largest 871 ft.×125 ft., smallest 260 ft.×46 ft.

REPATRIATION: Facilities exist for repatriating Crew members.

AIRPORT: Daily regular flights to London. Distance to airport about half mile.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Commonwealth Day (24th May); Spring Bank Holiday; Summer Bank Holiday; Queen's Birthday; Christmas Day; Boxing Day. Cargo work can be effected at overtime rates on these holidays except on Good Friday and Christmas Day when no cargo work is carried out. Bunkering is effected on any of these holidays without any extra charge except on Good Friday and Christmas Day when a surcharge is made.

POLICE/AMBULANCE/FIRE: Police and Ambulance 3434; Fire 2000.

TELEPHONES: No arrangements exist for placing telephones on board at normal berths. Telephones can be placed on vessels under repair at the Detached Mole, through Admiralty Telephone Exchange, cost about £10.

GENERAL: Advisable that vessels calling for bunkers and only stopping in port for few hours should radio their requirements prior to arrival to ensure avoiding delay.

AUTHORITY: Captain of the Port.

AGENT: Lambert Brothers (Gibraltar) Ltd., 47 Irish Place. Tel. address "Lambert-Gibraltar". Tel. 4373, 3288; Telex 222. Ship's Agents, Insurance Agents, Travel Agents.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Gilbert & Ellice Islands

TARAWA: 01.21 N. 172.55 E.

Tarawa is the main port of entry for the Gilbert & Ellice Islands Colony. Other entry ports are Ocean Island, Christmas Island, and Funafuti.

The Atoll is roughly triangular in shape, being 19 miles in length North and South and 16 miles broad along the southern side. A number of islets, separated by shallow passages, dry at low water, from the southern and eastern sides of the Atoll.

Causeways link up the islets along the southern sides and part of the eastern side. On the western side there is a barrier reef, most of which is sunken, enclosing a large lagoon navigable by vessels drawing 26 ft. at LWOST and 30 ft. at HW.

The Governor and Main Government Offices are at Bairiki Islet which is connected by causeway to the Colony Central Hospital and Government Schools at Bikenibeu.

PILOTAGE: Not compulsory, but advisable as sometimes especially after strong winds, some of the navigation marks may be out of position.

APPROACHES: The ship passage into the lagoon is 3.25 north of Betio and is usually well marked by buoys, as depicted on chart B.A. 3269. An occulting white light with a range of 8 miles, exhibited from a 105 ft. tower at the western end of Betio Islet marks the southwestern corner of the Atoll.

ANCHORAGE: Inside the lagoon, safe in all weather although in strong winds it may not be possible to work craft in the lagoon.

RESTRICTIONS: At present navigation and pilotage of the lagoon is restricted to daylight and vessels arriving at night should stand off the southwest of Betio light. A vessel approaching in daylight and having to wait for high tide or other reasons may anchor anywhere on the western reef in 8–10 fathoms. Bottom, coral and sand.

RADIO: Tarawa Marine Radio maintains continuous watch on 500 k/cs., 2182 and 6204 k/cs.

TUGS: Available.

CARGO HANDLING FACILITIES: Tugs and lighters capable of working cargo up to 29 t.p.h. A 20-ton crane on Betio Wharf is capable of working containers from the lighters.

MEDICAL: Attendance can be obtained.

FRESH WATER: Available in limited quantities in an emergency.

FUEL: Stocks of light diesel fuel, petrol and kerosene available.

REPAIRS: Boat repairs and most minor ship repairs can be undertaken at Betio, where the Development Authority employs engineers, electricians, boilermaker and a shipwright. Radio and Radar repairs can be undertaken by the Posts and Telegraph Department. Aqualung and skin divers available.

AIRPORT: Bonriki International Airport.

AUTHORITY: Gilbert & Ellice Islands Development Authority.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Greece

AGHIOS NIKOLAOS (St. Nikolo-St. Nicholas)
Crete: 35.12 N. 25.43 E.

DOCUMENTS:
4 Crew Lists.
2 Passenger Lists.
1 Cargo Manifest.
1 Spares List.
1 Stores List.
1 List Crew Personal Effects.
Maritime Health Declaration.
1 Provisions List.

PILOTAGE: Not compulsory. No Pilot station. Private Pilot who can be used if needed. However, not always available. Area of Pilot's boarding is N.E. or S.E. of Aghioi Pandes Islet, depending weather conditions. Anchorage waiting place in same area. Call Pilot with signal "G". Small fishing vessels (length 13.0 m.) fitted with VHF can indicate position of anchorage if advised by Agent.

ANCHORAGE: (a) Harbour of St. Nikolaos, depth 3 – 5 fathoms. (b) Usual anchorage for vessels over 500 tons gross, S or SE of Nikolo Islet (Admiralty Chart No. 2536 B) and at a distance of 0.5 – 1.0 m. from the mainland, depth 10 – 40 fathoms respectively. (c) Poros Bay for small and large vessels, only when N and NW fresh gales, depth 16 – 27 fathoms.

RESTRICTIONS: Care to be taken off North entrance to port owing to rocky shoals, depth 5 m. Entrance from the S.W. is free of obstructions.

MAX. SIZE: Vessels of up to 100 m. length and 9.0 m. draft can enter the port. At oil bunkering installation outside the port, vessels of any size can be accommodated.

HEALTH: If from another Greek port free pratique is automatic and access to and from vessel granted on permission of Port Authorities. Port doctor visits all other vessels.

RADIO: No local radio station. Cables to Agent or Port Authority through "Athinai Radio", "Heraklion Radio" or Rhodes Radio".

TUGS: None.

BERTHING: Berthing position designated by Port Authority.

STEVEDORES: 10 permanent port stevedores available, but further 5 men can be engaged. Cargo worked by vessel's own gear.

MEDICAL: No advance notice of medical attendance required. Medical attention by town doctors available. Government hospital with all facilities.

TANKERS: No tanker berths. Vessels moor to buoys. Oil line 6 in. diameter.

DENSITY: 1025.

FRESH WATER: At new pier 3 hydrants, hose dia. 25 ins. for supplying water. At the bunkering installation at Katsini Bay there is water storage tank capacity 500 cu. m. for supply to deep-sea vessels. Loading rate about 49 t.p.h. Delivery by flexible hose connection from the mooring buoys. Fresh water not available at the present time at the bunkering installation as they have ceased operating.

FUEL: Unlimited supply of bunker fuel but from 1974 the bunkering installations have ceased operating due to the tourist area. Operations are to be moved to another part of Crete.

Small quantities transported by tank truck are available from the pier.

DEVELOPMENTS: During next 5 years *(a)* deepening of Port Basin, *(b)* Provision of 1 shore crane, *(c)* construction of breakwater — length 200 m.

HATCHES: Opened/closed by stevedores.

CUSTOMS ALLOWANCES: 2 packets cigarettes per crew member per day.

CARGO GEAR: No shore facilities. All cargo worked with ship's own gear.

CONSULS: None.

REPAIRS: Only minor repairs.

REPATRIATION: Crew replacement and repatriation available.

AIRPORT: At Iraklion distance 66 km. 2 or 3 flights per day to Athens.

TIME: GMT plus 2 hours, permanent.

HOLIDAYS: In addition to standard Greek holidays, local holidays are Ascension Day (date not fixed), and St. Nicholas Day (6th December).

POLICE/AMBULANCE/FIRE: St. Nicholas Police tel. 100. State Hospital, 22369. Fire — none. Port Police 22312. Area code for St. Nicholas 0841.

TELEPHONES: None.

SERVICES: Tank cleaning and hold cleaning.

SHORE LEAVE: Permitted with Port Authority pass.

REGULATIONS: *(A)* Vessels are not allowed to approach Aghioi Pandes (goat reserve). *(b)* No refuse or other waste matter of any description allowed to be thrown overboard from vessel. *(c)* No visitors permitted without Port Authority permission.

AUTHORITY: Port Authority of Aghios Nikolaos.

AGIOI THEODOROI: 37.55 N. 23.05 E.

DOCUMENTS:
7 copies Crew Lists (European and Asian).
2 copies Dates of Vaccinations/Inoculations.
1 copy Cargo Manifest.
2 copies List of Provisions and Stores (these are supplied on forms issued by Agent printed in Greek/English).
2 copies Officers'/Crews' personal declaration, on forms supplied by Agent in Greek/English, covering all high duty items, radios cameras, etc.
1 copy declaration of ships' cash on board, form supplied by Agent in Greek but made out in front of Master.
2 copies of Masters' declaration that all high duty goods have not been put under seal, and that he is responsible for any loss or landing of same without proper authority.
All passports and/or Seamen's books to be produced *if* requested by Immigration.
On completion of loading, documentation takes about 2 hours.

PILOTAGE: Compulsory. Pilot boards S.S.E. of port, about 1 mile off the outer jetty. No pilot boat as such; uses either a tug or mooring boat. Pilot is arranged by Agents who are based in Piraeus (1 hour by car). No means of radio contact between vessel and Pilot station.

ANCHORAGE: A reasonably safe anchorage can be obtained in position 0.5 mile off the outer jetty in a depth of 20 to 25 fathoms with a sandy bottom.

TUGS: 2 tugs used for berthing, and 1 on sailing.

BERTHS: There are 3 main berths with 2 smaller berths for coastal vessels. The largest and outermost berth can accommodate vessels of 250,000 tons fully loaded, a max. discharge/loading rate at this berth being 5,000 t.p.h. The other berths can accommodate vessels of up to 50,000 tons fully loaded with a max. discharge/loading rate of 3,000 t.p.h. All berths are equipped with four 10 in. Chicksans. They are situated in an open position for winds from the South and West but provided ample moorings are put out, there should be no cause for concern.

Vessels can berth at any time day or night.

MOORINGS: Standard moorings on to dolphins which are well fended and hold the vessel about 4 feet clear of the manifold complex. Vessels require their gangway but no derricks are required. 1 or 2 anchors are used depending on the berth used.

FRESH WATER: Fresh water for other than drinking purposes is available from the jetty, but drinking water has to come by barge from Piraeus for which 2 days' notice is required.

FUEL: Bunkers can be obtained from one of the coastal tankers based here, capacity approx. 5,000 tons.

CUSTOMS: Bonded locker is sealed. Allowance 200 cigarettes or equivalent in tobacco or cigars per man (7 days) and a part bottle of wine and spirits is permitted per man (7 days). All Tobacco/cigars/cigarettes placed under seal. Crew excess must be declared on provision list in separate column for same.

SHORE LEAVE: Shore leave is allowed, passes being issued on arrival which must be handed in prior to sailing.

REPAIRS: No facilities. Nearest port for repairs is Piraeus.

ALEXANDROUPOULIS: 40.51 N. 25.54 E.

DOCUMENTS:
Port Authority
2 Crew Lists.
1 Passenger List (if any).
If from abroad Maritime Declaration of Health. If Greek flag, articles and log book, and declaration of foreign exchange.
Customs:
3 Lists of Stores and Provisions.
1 Crew List.
Master's personal declaration that all stores not held in bond will remain on board.

PILOTAGE: No pilot service. If Master requires pilotage assistance an experienced local boatman is available, but Agent must be advised of ETA in advance order to arrange for this Pilot to await vessel about 1 mile outside port.

ANCHORAGES: Depth inside port 6.5 m., mud bottom. Depth increases outside port to about 10 m. at distance of 1 nautical mile.

Area around port subject to strong S.E./S. winds especially during Winter. During strong winds vessels can seek shelter off Samothraki Island. In strong winds port is considered safe but because of occasional large waves loading is stopped. Winds from other directions do not affect port work.

MAX. SIZE: Vessels with draft not exceeding 6.5 m. can enter safely.

HEALTH: Vessels from foreign countries can enter harbour and obtain free pratique during the period from sunrise until 2200 hrs. Vessels having suspected contagious disease on board should remain outside harbour until visit of medical officer, and await further instructions.

TUGS: None.

BERTHING: At least 24 hours notice of ETA to be passed to Agent in order to obtain allocation of berth from Port Authority.

STEVEDORES: Prior notice to be passed to Agent order arrange gangs. Rate of cargo working: General cargo about 120 tons per gang every 8 hours. Bagged cargo about 120 tons per gang every 8 hours. Coal about 80 tons per gang every 8 hours. Timber about 120 cu.m. per gang every 8 hours. Vessels must use own gear for loading/discharging.

MEDICAL: No advance notice required. 1 Government General Hospital, 2 clinics. Doctors' services readily available.

TANKERS: No facilities.

FRESH WATER: Hydrants on West side of breakwater. Delivery rate about 5 t.p.h. (each), but delivery rate reduced when 2 or more hydrants in use.

FUEL: No bunker C fuel available. Supplies of diesel oil available from 2 barges, each with capacity of 900,000 litres.

FIRE PRECAUTIONS: No port fire brigade. In emergency fire brigades must be called from Alexandroupolis.

DEVELOPMENTS:
(a) The Main Pier is finished, total length 450 m.
(b) The pier East of Main Pier is finished, total length 231 m.
(c) The Western Breakwater has recently been finished. It extends for 108 m. Study in progress for 97 m. more.
(d) Study in progress to increase depth of the port area to 10.5 m. and to dredge a channel of 3.2 km. by 97 m.
WATCHMEN: Not available, and if required must be supplied by vessel.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 1 packet of cigarettes allowed out of bond for each crew member, for each day in port. Wine/beer no restrictions. Spirits, Master allowed one bottle.
CARGO GEAR: Load/discharge by ship's own gear.
IDENTIFICATION CARDS: Shore pass issued against crew list and seamen's book. Passes obtainable from Port Authorities.
CONSUL: Consul-Agent of France. Tel. 26–720.
REPAIRS: Only minor repairs available.
REPATRIATION: Facilities for crew changes and repatriation.
AIRPORT: 5 km. distant. Daily flights to Athens. Flights to Thessaloniki Monday, Wednesday and Saturday.
TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.
HOLIDAYS: 1st January; 6th January; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; 14th May (local); 15th August; 28th October; 6th December; 25th December; 26th December, and all Sundays. Cargo work can be arranged on these days, subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Police station. Tel. 26352; Security Police, 28020; Ambulance 26471; Fire 26222.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: Permitted.
AUTHORITY: Port Authority of Alexandroupolis.

ARGOSTOLI, Cephalonia: 38.12 N. 20.29 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Customs Clearance.
2 Cargo Manifests.
Bills of Lading (copy)
4 Ship's Stores List.
4 Lists of Crew's Personal Effects.
Ship's Papers.
Crew Vaccination List.
PILOTAGE: No Pilot station.
ANCHORAGE: Vessels anchor in roads 0.5 miles N.N.W. from Entrance light. Max. channel draft 19 ft.
MAX. SIZE: Up to 19 ft. draft.
HEALTH: Free pratique given by Port Health doctor.
RADIO: Patras Radio. No VHF.
TUGS: None available.
MEDICAL: Advance notice not required except in urgent cases. For vessels arriving from foreign countries crew require vaccination certificates.
TANKERS: Small tankers discharge at DEH Power Terminal.
FRESH WATER: Can be supplied from the pier using ship's hoses.
FUEL: Small quantities available, but only for yachts.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCE: 50 cigarettes allowed for each crew member.
CONSULS: No local representation.
REPAIRS: Only minor machinery repairs can be carried out.
REPATRIATION: By air to Athens (once daily) or by ferry-boat.
TIME: GMT plus 2 hours, Summertime may be kept.
HOLIDAYS: Local holidays are 21st May, 16th August and 20th October, in addition to national holidays. Work may be arranged at double rates.
POLICE/FIRE/AMBULANCE: Police tel. 22200; Ambulance 22515; Fire service will be organised in 1976.
TELEPHONES: Can be connected on board vessels without charge.
SHORE LEAVE: Allowed
AUTHORITY: Cephalonia Harbour Office.

CHALKIS: 38.27 N. 23.36 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores and Spares Lists.
2 Crew Personal Effects Lists.
Health Certificate.
PILOTAGE: Pilotage is compulsory.
Application for Pilot to be made by radio through Agent to Chalkis Port Authority. ETA required at least 8 hours before arrival.
Apply for Pilot through VHF Channel 12, or through radio/telephone on 2364 kc/s calling Harbour Master, Chalkis.
Pilot boards from black motor-boat with white horizontal stripes, about 10 m. length, in a position about 1-1.5 miles North of the light buoys of the Northern Port.
The pilotage area extends from 1 mile North of red and green light buoys, North of Evripos Bridge, and to the South of Euboea, 2.5 miles from Bourtzi Point.
The anchorage for vessels coming from the North of Euboea and awaiting Pilot is at the centre of the Euboean coast off Lighthouse Kakokefali, North of the 2 light buoys and outside the bearing 020/200° which is the axis of vessels passing in and out of Evripos Strait.
Safe anchorage for vessels coming from South of Euboea and awaiting Pilot is 1 nautical mile South of Bourtzi Point.
ANCHORAGES: *(a)* In the basin of South Port clear of vessels passing in the Straits. Depths over 21 ft.
(b) In North Port between the light buoys and Kakokefalis lighthouse and outside the axis of course 020/200°. In depths of 10–15 fathoms.
(c) Anchorage mentioned in "Pilotage" above, depths of 10 fathoms.
RESTRICTIONS: Entry restricted only by depth. Max. draft 21 ft. For vessels intending to pass Evripos Strait having draft 19 ft., passage possible only at slack tide or with following tide. Full details in Evripos Straits Operations Regulations.
There is also a restriction in Steno Straits where there is an overhead cable 38 m. above sea-level.
MAX. SIZE: Max. draft 21 ft. in daytime and 19 ft. at night for vessels entering port. For vessels navigating Evripos Strait max. length 110 m., max. draft 19 ft., breadth 20 m. and subject to local regulations.
HEALTH: Pratique not required if coming from another Greek port. Otherwise international pratique regulations are applied.
RADIO: No local radio, all messages should be passed through Athinai Radio.
TUGS: 1 tug available, joins vessel off the berth. Ship's tow lines used. Tug is compulsory for vessels over 1,000 g.r.t. Tug used only for berthing and unberthing.
BERTHING: Berthing in both the North Port and the South Port can only be effected at slack water subject to available tide.
BRIDGES: Passage above Evripos Bridge can only be effected at slack water or with following tide.
STEVEDORES: Loading, discharging, carried out with ships gear. Notice must be given by Agent to stevedores not less than 6 hours before vessel's arrival.
Cargo working rates: General cargo 80–100 tons every 8 hours. Bagged cargo 100–150 tons every 8 hours. Timber 70 cu. m–90 cu. m. every 8 hours.
MEDICAL: Agent should be advised beforehand if medical assistance required on arrival. Clinic facilities available. Vaccination certificates required.
DENSITY: Average 1025.
FRESH WATER: Drinking water can only be supplied in small quantities by tanker lorry.
FUEL: Can be supplied in small quantities by tanker lorry.
DEVELOPMENT: A pier 240 m. is under construction at Vourkos in the South Port; depth alongside 26 ft.
WATCHMEN: Not required.
HATCHES: Opening and closing hatches can be effected by ships crew or by workers if requested.
CUSTOMS ALLOWANCES: Crew members each allowed 1 packet of cigarettes per day. Only the master is allowed 1 or 2 bottles of alcohol while vessel in port.
IDENTIFICATION CARDS: Shore passes are issued by port authorities.
CONSUL: France, tel. 2574.
REPAIRS: Only minor repairs can be effected by technicians from Piraeus.
REPATRIATION: No difficulties as there are excellent communications with Piraeus.
AIRPORT: Nearest is Athens International Airport.
TIME: GMT plus 2 hours all the year round.
HOLIDAYS: 1st January; 6th January; 25th March; 21st April; Good Friday; Easter Monday; Easter Sunday; 21st May; 15th August; 28th October; 6th December; 25th and 26th December. Local holiday 26th July.
POLICE/FIRE/AMBULANCE: Port police, tel. 22580; Fire 23333; Ambulance 22282.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Allowed.
DELAYS: Only waiting for suitable tides.
AUTHORITY: Chalkis Port Authority.

CORFU (Kerkyra): 39.37 N. 19.56 E.
(Including Kalifoka and Kefalomandouko)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Maritime Declaration of Health.
3 Stores Lists.
3 Spares Lists.
PILOTAGE: At least 24 hours before arrival ETA should be passed to Port Authority on 2182 kc/s, answering on 2830 kc/s. Vessels requiring Pilot during daytime should hoist letter "G" of international code, and sound letter "G" in the morse code on ships whistle at intervals. Whistle signal may also be used at night. Vessels should await Pilot in position 39° 38' N., 19° 57' E. nearest to the coast of Ptychia Island (Vido) and Corfu, depending on weather conditions.
ANCHORAGE: Safe anchorages in the area between Ptychia Island and coasts of Corfu, depth about 30 m. During strong N.W. winds there is safe anchorage in the roadstead at Goritsa Bay or at Kastrades at a distance of half mile from the shore where depth in excess of 20 m.

RESTRICTIONS: Only during unfavourable weather conditions or lack of berthing space.
MAX. SIZE: Draft 7.5 m.
HEALTH: Port Health Officer boards vessel on arrival and examines health declaration. In cases of suspected disease or fever on board the health officer will examine entire crew and passengers.
RADIO: Radio Kerkyra. 2182 and 2830 kc/s.
TUGS: None.
BERTHING: Vessels should prepare fenders prior going alongside berth.
STEVEDORES: At least 24 hours advance notice of ETA required order arrange gangs. There are 3 silos for the discharge of bulk grain at Kalifoka (Mandoukion). Discharge rate about 60 t.p.h.
MEDICAL: Agent should be advised in advance of any medical requirements. Medical clinics available.
DENSITY: 1025. Max. height of tide 0.6 m.
FRESH WATER: Available through 2 in. hoses. Cost 25 drachmas per ton (approx.).
FUEL: For yachts in the new harbour there is a diesel-oil tank, capacity 10 tons. Also available from road tanker for all vessels alongside. At Kefalomandouko there is a permanently anchored oil barge capacity 24 tons. There are plans to provide permanent shore facilities.
FIRE PRECAUTIONS: Loading/discharging of inflammable liquids and explosives generally forbidden at night. The anchorage for vessels carrying inflammable liquids or explosives is between Lazaretos Islet and N.W. of breakwater point.
WATCHMEN: Not required.
HATCHES: Opened and closed by stevedores. Hold cleaning service available.
CUSTOMS ALLOWANCES: Crew of Greek vessels are not allowed more than immediate requirements out of bond. Seamen signing off and passengers leaving the vessel are allowed 200 cigarettes.
IDENTIFICATION CARDS: Required.
CONSULS:
France: Botis George, 1, Romanou St. Tel. 30067.
W. Germany: Aspiotis Gerasimos, Isermeti St. Tel. 31755.
Denmark: Damaskinou, 33 A.G. Spiridonos St. Tel. 29481.
Italy: Pitsino Juzepina, 10 Alexandras Avenue. Tel. 22351.
Netherlands: Aris Bogdanos, Skondrou-Pyrgi-Ypsos. Tel. 23870–29642.
U. Kingdom: Tsatsopoulou-Brouks, 1 Zambeai St. Tel. 30055.
Spain: Spiridon Pogiagos, Eygeniou Voulgareos St. Tel. 29969.
Norway: K. Kondis, 5 Donzelot St. Tel. 32423.
Belgium: Arsenios Androutselis, 11 Kapodistriou St. Tel. 29988.
Brasil: K. Palatianos, 124 Kapodistriou St. Tel. 30767.
Sweden: Adam Bogdanos, 5 Donzelot St. Tel. 29469.
REPAIRS: Facilities for minor repairs only.
DRY DOCK: Largest dry dock 20 m. length 2 m. depth.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: 2 km. from port. During winter 1 flight daily to Athens. During summer frequent daily flights to Athens.
TIME: GMT plus 2 hours permanent.
HOLIDAYS: Local holidays are 21st May, 11th August and 12th December. In addition Corfu observes standard Greek holidays.
POLICE/AMBULANCE/FIRE: Police, tel. 23661; Ambulance, tel. 30062; Fire, tel. 29255.
TELEPHONES: No facilities for placing on board.
GENERAL: Prevailing wind is from the N.W. Anchorage in the new harbour unsatisfactory due to mud bottom.
SHORE LEAVE: Allowed.
REGULATIONS: Forbidden to approach Lazaretos Islet.
AUTHORITY: Port Authority of Corfu.

ELEUSIS (including Skaramanga): 38.02 N. 23.33 E.

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Bill of Lading.
2 Lists of Stores and Provisions.
PILOTAGE: Piraeus Pilot station regulations are operative.
ANCHORAGE: Port offers safe anchorage. Bottom mud and sand.
RESTRICTIONS: After sunset and for vessels intending to enter Eleusis port through Salamis channel, it is imperative to give 6 hours notice of expected time of arrival to Port Authorities of Eleusis, in order to obtain special permission from the naval yard of Salamis.
MAX. SIZE: No limitations to length and breadth at the installations or at the main port. Max. permissible draft of vessel entering Eleusis Bay is 36 ft. Max. draft at berths is 33 ft. Also see "Tankers".
HEALTH: For vessels arriving from other Greek ports, pratique is automatic. Vessels arriving from foreign ports boarded by Health Officer who grants free pratique.
RADIO: Athinai, 2182 kc/s.
TUGS: Join vessel outside Piraeus Harbour and formalities much same as Piraeus.
BERTHING: Overall length of jetties and quay at Eleusis 715 m. Max. depth over 80 m. of jetty length is 33 ft. with depths of 26 ft. elsewhere.
SPECIALISED CARGO HANDLING: Loading/discharging of iron ore is carried out by *(a)* Holivourgiki Co., which owns a pier of 180 m. long and from 26 ft. to 36 ft. depth, equipped with 4 cranes, and *(b)* by Metallia Voxitou Elefsinos Co., which offer a special anchorage with buoys. Loading is effected by means of silo.

Loading/discharging of fluid chemicals or liquid gas are carried out by Petrogas Co. to their private pier of 35 m. long and 15 ft. depth.
MEDICAL: Advance notice not required. Clinic available in town of Eleusis if required.
TANKERS: Operating companies supply reducing pieces. No facilities for residue discharge. *(a)* Esso Pappas: length 160 m.; breadth 30 m.; depth at pier 30 ft. *(b)* Greek refineries: length 93 m.; breadth 12.70 m.; depth 7 m. *(c)* Texaco: length 80 m.; breadth 6 m.; draft 4.50 m. *(d)* Mamidakis: length 40 m.; breadth 5 m.; draft 27 ft.
FRESH WATER: Barge delivery available.
FUEL: Available ex-wharf at tanker installations subject advance notice. Can be supplied by barge at other locations.
FIRE PRECAUTIONS: The usual precautions applicable to oil installations. During operations of white liquid (petrol, spirits, etc.) regulations require a tug to be standing by.
HATCHES: Usually opened and closed by crew and subject additional payment by stevedores.
DEVELOPMENTS: Hellenic shipyards, Skaramanga, plans to build a new graving dock for 300,000 d.w.t.

Eleusis Shipyards have built a third floating dock which takes vessels up to 115,000 d.w.t. At the building dock, a crane of 400 tons lifting capacity has been constructed.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed per Crew member out of bond.
CONSULS: None.
REPAIRS: All grades of repairs can be carried out at Eleusis shipyard, and also at Skaramanga (see "Dry Docks").
DRY DOCKS: Skaramanga shipyard situated on the coast between the Port of Piraeus and Eleusis Bay. Shipyard is 8 miles by road from Athens and 7 miles from Piraeus; driving time 25 and 20 minutes respectively.

Mailing address: Hellenic Shipyards Co., PO Box, 480, Athens, Greece. Cables: Shipyard, Athens. Telex: 215293 HSYS GR, 215396 HSYS GR, 215567 HSYS GR. Telephones 8073.471, 8073.351, 8073.610. Office hours at Skaramanga: 0815 hrs. to 1715 hrs. (weekdays), 0815 hrs. to 1345 hrs. (Saturdays).

Floating Docks

Main Particulars	*Dock No. 1*	*Dock No. 2*	*Dock No. 3*
Lifting capacity	30,000 tons	22,000 tons	25,500 tons
Docking capacity (d.w.t.)	72,000 ,,	37,000 ,,	60,000 ,,
Length overall	826 ft.	673 ft.	760 ft.
Length on keel blocks	760 ,,	605 ,,	693 ,,
Breadth inside banks	121 ,,	105 ,,	111 ,,
Breadth outside banks	147 ,,	129 ,,	136 ,,
Ht. of WL above keel blocks	28 ,,	28 ,,	28 ,,
Pumping time	120 min.	80 min.	100 min.

Skaramanga Yard's three floating docks have been designed in such a way as to eliminate delays of any kind in the raising of large vessels and to ensure that the work is carried out in minimum time and with the least possible inconvenience to the crew living on board.

The basic equipment of the docks is the following; Two 5-ton cranes, 2 fire extinguishing pumps 120 cu.m. per hour at 90 m. WC, DC current supply to ships 1200 A 220 V, AC current supply to ships 600 A 440 V 60 cycles, multipoint welding rectifier 2500 A, 2 oil pumps for supply of fuel oil from the dock to the vessel 60 cu.m. per hour at 50 m., 2 compressors 17 cu.m. per minute at 7 atu, emergency diesel generator set 200 KVA, foam fire extinguishing system, steam boiler and water distilling plants.

Graving Dock

The Graving Dock is 327 m. (1,100 ft.) long, 53.6 m. (176 ft.) wide and 9.25 m. (30 ft.) deep at the entrance. It can take ships in the 240,000 ton range.

Ships are manoeuvred at the dock entrance with the assistance of two 5-ton capstans situated on each side of the entrance gate. They are then shifted inside the docks by two 15-ton auto-tensioning winches and hauling-in trolleys (mules) running on tracks on each side along the dock subway.

The dock floor is fitted with specially designed keel blocks for easy fitting and removal and with electrically, operated side blocks.

The Graving Dock is served by two 100-ton cranes, one 50-ton crane and a small 5-ton crane.

A fleet of 5 powerful tugs is on hand at Skaramanga Yard to assist docking and undocking operations of all vessels calling at the yard.

Eleusis Shipyards S.A. is located 27 km. outside Athens. The site was chosen on account of the several advantages it presents. The bay is well protected from strong winds, sources of raw materials are available in the vicinity of the ward, and adequate transportation, power, and telecommunication facilities can service the needs of yard.

Athens Office: 67 Athinas Street, Athens 112. Tel. 349 053. Cables "Helnafel Athinia". Telex 215215 ESC GR.

Yard: Eleusinia, Eleusis. Tel. 55351. Cables "Helfafel Eleusis". Telex 215684 YARD GR and 215690 YARD DR.

Floating Docks: Two floating docks are available with the following specifications:

	No. 1	*No. 2*	*No. 3*
Length	162 m.	227.5 m.	252 m.
Breadth at entrance	23 m.	33 m.	41 m.
Draft over keel blocks	6.30 m.	8 m.	9.40 m.
Lifting capacity	11,500 m. tons	20,000 m. tons	30,000 m. tons
Cranage	5 t at 15 m.	12 t at 20.6 m.	12 t at 20 m.

Quay Wall; The 640 m. long quay wall is equipped with 40 and 15 ton cranes; range 30 m. power 220 volts DC 100 amp. – 42 volts DC 25 amp. – 280 volts AC 630 amp. Floating crane, 50 tons capacity.
Tugs: Available for manoeuvring purposes at all times.
AIRPORT: Athens Airport. Regular international flights.
HOLIDAYS: Cargo operations can be effected during usual Greek

holidays, following submission of application to Harbour Workers' Union and subject cost increase of 75% above normal.
POLICE/AMBULANCE/FIRE: Eleusis Police Station 46674; Ambulance 46503; Fire Brigade 0199.
SPECIAL PRECAUTIONS: See "Piraeus".
AUTHORITY: Eleusis Port Authority.

IRAKLION (Heraklion), Crete: 35.20 N. 25.10 E.

DOCUMENTS:
4 Cargo Manifests.
4 Crew Lists.
4 Passenger Lists.
Declaration of Crew's Personal Effects.
List of Stores and Provisions.
Maritime Declaration of Health.
Vaccination Certificates.

PILOTAGE: Pilotage area extends 0.5 to 1 mile N.E. of breakwater. Advance notice of ETA should be passed to Agents order arrange Pilot. Contact may be made with Pilot station on VHF Channel 12 during daylight, also when within distance of 3–12 miles, and subject prior agreement of calling time, communication can be effected by radio–telephone via Radio Iraklion – Pilot station telephone 286133. International pilotage signals apply. Pilot boat is wooden boat 12 m. length, hull colour black, with white deckhouse, carrying black board with word "Pilot" in white letters. In bad weather vessels should proceed close to entrance of port for Pilots boarding.

A cement pillar has been installed on the end of the extension of the N. breakwater. Fl. Gr. every 3 seconds, visible 9 miles. The pilot boat is equipped with VHF. range 50 miles.

ANCHORAGE: Anchorage East of port entrance is forbidden owing to numerous underwater cables. In good weather conditions anchorage to be found 0.75 mile Northwards of N. breakwater with Enetic Castle bearing 180°. In bad weather conditions, best anchorage is at a distance of about 5 nautical miles to the W. of the North breakwater and at a distance of 3 miles from the coast (Ellinoperamaton Haven); depth of water requires a big scope of anchor chain.

MAX. SIZE: Max. length 250 m., draft 29 ft.–29ft. 6 in. Usual rise and fall of tide 1 ft. but increasing with South winds and decreasing with North winds.

HEALTH: International regulations apply for obtaining free pratique. In the event of suspected disease vessel will remain under quarantine until cleared. Pratique is automatic if arriving from another Greek port.

RADIO: Radio Iraklion – SUH 2128 kc/s.

TUGS: Port authority has 1 tug of 1,000 h.p. and periodically (during the tourist season), 1 tug of 650 h.p. When tugs required they await vessel at port entrance. Ship's lines used.

BERTHING: Pilot will advise Master of berthing position.

STEVEDORES: Port authority owns 3 cranes but they are seldom used. Cargo operations usually conducted by use of ship's own gear. Discharge rates per gang in 8 hours: bulk cargo 100 tons, bagged cargo 140 tons, liquid cargo subject ship's equipment – transportation by barges, timber 100 cu. m.

MEDICAL: Advance notice should be passed to Agents if requiring medical attention. Clinics and medical treatment available.

TANKERS: Only very small tankers discharge in Iraklion Port and Ellinoperamaton Haven. At Iraklion, tankers discharging liquid fuel are required to berth at East breakwater (fuel pier). Attendance of fire brigade and 1 tug standing by is compulsory.

DENSITY: 1020.

FRESH WATER: Available ex-berth or ex-barge. Rate of delivery ex-berth about 500 tons per 24 hours.

HATCHES: Opened and closed by crew.

CUSTOMS: 2 packets of cigarettes per day per crew member allowed out of bond, and one 500 gr. bottle wine/spirits for whole time of vessel's stay in port.

IDENTIFICATION CARDS: Shore passes issued by Port Authorities.

CONSULS:

Finland	tel. 284860 and 283860
Norway	tel. 282667

PILOTAGE: There are 11 Pilots for the Corinth Canal. Telegraphic address of Canal is "Corinth Canal", tel. 0741-24452. Master of vessel must give at least 4 hours notice of ETA in order to avoid delay. For Pilot signals, etc., see article 7 of the New Company of the Corinth Canal "Regulation of Navigation and Tonnage".
ANCHORAGES: Open anchorage in Isthmia Bay.
RESTRICTIONS: Corinth Canal closed every Tuesday from 0600 hrs. to 2000 hrs. in order for maintenance work to be effected.
MAX. SIZE: The max. draft of ships negotiating the Canal, in relation to their width, is defined as below, assuming normal water level and normal weather conditions.

Width	*Maximum draft*
16.0 to 16.5 m.	6.2 m.
15.5 to 16.0 m.	6.2 m.
15.0 to 15.5 m.	6.6 m.
14.5 to 15.0 m.	6.8 m.
14.0 to 14.5 m.	7.0 m.

The max. draft for vessels of less than 14.0 m. width is 7.2 m. The max. width must not anyhow exceed 18.3 m. (60 ft.).

Special instances will be examined by the Master and the Canal Service in collaboration.
HEALTH: Pratique effected by health department of the Port Authority assisted by temporarily engaged doctor. In cases of suspected contagious disease vessel will be held under quarantine and if necessary fumigation will be conducted at Piraeus.
VHF: Will be installed during 1976 in the Corinth Canal.
TUGS: Join vessel near Canal entrance at Isthmia and Possidonia. Ship's lines always used.
BERTHING: In Sousakion at private factory pier. No berths at Isthmia.
MEDICAL: Agent should be advised in advance of number of crew needing medical assistance, also information of any vaccination required.
FRESH WATER: Not available either at Sousakion or in the Canal.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes out bond and 1 bottle wine/spirits.
CARGO GEAR: Loading/discharging by ship's gear.
AIRPORT: 100 km. distance.
TIME: GMT plus 2 hours, permanent.
POLICE/FIRE/AMBULANCE: Police, tel. 22129.
DELAYS: Possible delay up to 1.5 hours in transitting Canal if another vessel already transitting canal from opposite direction.
AUTHORITY: Port Authority of Isthmia.

ITEA: 38.26 N. 22.25 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Cargo Manifest.
Bills of Lading.
List of Ship's Stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: Vessel should advise ETA at least 24 hours before arrival through the telegraphic office of Itea. Pilots are called by international code flag "G" or sound signal 2 long and 1 short blast.

Pilot boards 1 mile S.E. jetty lighthouse. Pilot boat painted black with white deckhouse, the word "Pilot" is painted in white letters on both sides. On the bow is painted "PY21".

In bad weather vessel should enter harbour without Pilot and anchor using both anchors.
ANCHORAGE: Available inside the harbour and in Aggolis Gulf. Safe anchorage in the vicinity of the jetty head in depths of 8–10 m.
RESTRICTIONS: Vessel may enter harbour day or night. Harbour anchorage suitable for vessels up to 60 ft. draft.
HEALTH: Pratique is given on arrival by the port medical officer.
TUGS: None available.
STEVEDORES: Gangs should be ordered in advance by Agents on basis of Masters ETA. Loading and discharging is effected by ship's gear.
MEDICAL: 24 hours notice preferred if any medical requirements. Hospital facilities available. Vaccination can be arranged within 24 hours.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
DEVELOPMENTS: Extension and widening of the existing breakwater and the construction of a second breakwater.
HATCHES: Hatches are opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of alcohol is allowed each man.

IDENTIFICATION CARDS: Needed for crew men going ashore.
CONSULS: No local representation.
REPAIRS: No facilities for repairs.
REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours all through the year.
HOLIDAYS: Cargo work can be effected on all holidays on payment of overtime.
POLICE: Tel. 222.
AUTHORITY: Port Authority of Itea.

KALAMATA: 37.02 N. 22.07 E.

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived vessel" and (subject to Charter-Party Terms) laytime commences to count are 0.5 mile from the breakwater red light, where Pilot boards.
DOCUMENTS:
5 Crew Lists (Greek flag vessels).
3 Crew Lists (foreign flag vessels).
2 Passenger Lists.
Customs documents.
Bill of Health.
Bill of Lading.
All ship's papers.
PILOTAGE: Notice of ETA required 48 hours before arrival. No VHF. Call Pilot by international code signals on arrival. Pilot boards by motor boat about 0.5 mile from the breakwater red light, weather permitting.
ANCHORAGE: Vessels waiting Pilot may anchor half-a-mile East of the breakwater red light.
MAX. SIZE: Vessels up to 29 ft. draft may enter harbour. For berthing alongside the West mole, max. length 382 m., max. draft 24 ft.
For berthing alongside the North mole, max. length 158 m., max. draft 13 ft.
For berthing alongside the East mole, max. length 170 m., max. draft 29 ft.
For berthing alongside the North-east mole, max., length 161 m., max. draft 29 ft.
A new dock under Construction max. length 145 m., max. draft 29 ft.
HEALTH: Port Health doctor boards vessel on arrival or alongside the berth. Master required to produce Fumigation Certificate and Declaration of Health. Health visit not necessary for vessels coming from a Greek port.
RADIO: Athens Radio, call sign SVA.
TUGS: No tugs available.
BERTHING: Agents require details of vessel's draft in advance to get berthing permission from Harbour Authorities. West Mole, length 430 m.
SPECIALISED CARGO HANDLING FACILITIES: There is a silo for grain. The other special cargoes discharging equipped by ship's gear. No facilities for containers or roll-on/roll-off traffic. For liquid chemical carriers there are 2 pumps with electric system. There are 2 cranes on vehicle, 3 and 40 tons capacity. Also there is 1 lifting machine. No other facilities.
STEVEDORES: Number of gangs required to be advised Agent in good time.
MEDICAL: Doctors and medical assistance available.
FRESH WATER: Can be supplied from the berth at about 15 t.p.h.
FUEL: Can only be supplied by road tankers – subject to advance notice.
DEVELOPMENTS: New berths under construction to accommodate vessels up to 30 ft. draft.
It is planned to build a shipyard at Kalamata. During the first phase the yard is likely to concentrate on the building of bulk carriers and tankers up to 75,000 tons d.w.t.
WATCHMEN: If required watchmen available from shore.
HATCHES: Can be opened and closed either by crew or by stevedores subject to regulation payments for this work.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
CONSULS:

Sweden	tel. 22479
Netherlands	tel. 22881

REPAIRS: Minor repairs can be effected in shore machine shops. No dry docks.
REPATRIATION: Can be arranged.
AIRPORT: Situated 6 miles away. Flights to Athens 2 times a day.
TIME: GMT plus 2 hours all the year round.
HOLIDAYS: Additional local holidays are Ascension Day and St. Dionysio's Day.
POLICE/FIRE/AMBULANCE: Police tel. 22622; Fire tel. 28273; Ambulance tel. 25555.
SHORE LEAVE: Allowed. Shore passes issued by Harbour Authorities.
AUTHORITY: Kalamata Harbour Master's Office.

KALI LIMENES, Crete: 34.56 N. 24.50 E.

DOCUMENTS: Vessels may arrive for bunkering without obtaining free pratique. However, if pratique is effected, vessels should have ship's papers ready for inspection, also 4 Crew Lists, 4 Passenger Lists, Cargo Manifest and a List of Stores and Provisions.
PILOTAGE: 1 private Pilot employed by the bunkering company SEKA who undertakes pilotage for vessels calling for bunkers. Pilot boat is a small boat equipped with signal lamp. Pilot boards about 5 miles East of Aghios Pavlos (St. Paul) Islet. Vessels awaiting Pilot may anchor 15 miles East of Aghios Pavlos Islet.
ANCHORAGES: (See "Pilotage") Vessels may anchor in area between Aghios Pavlos Islet and Mavronissi, which is a safe anchorage.
MAX. SIZE: Vessels in ballast of up to 80,000 d.w.t. and max. draft 14 m. can enter port.
HEALTH: Vessels arriving from foreign ports wishing to obtain free pratique should cable Agents to arrange for boarding of Health Inspector. Free pratique automatic if arriving from another Greek port.
TUGS: There is 1 tug, but it is seldom used.
MEDICAL: Agent should be advised well in advance if medical assistance required. There are no hospitals or other local facilities and doctor has to be called from nearest town.
TANKERS: 3 berths North of Aghios Pavlos Islet, max. draft 14 m.
FRESH WATER: Unlimited supplies available.
FUEL: Unlimited supplies available subject adequate advance notice. Supplied by Mobil only.
FIRE PRECAUTIONS: Portable foam-fire extinguishers.
CUSTOMS ALLOWANCES: 200 cigarettes permitted to each crew member to be held out of bond, and 1 bottle of wine/spirits.
CONSULS: None.
REPAIRS: None.
AIRPORT: At Iraklion, 75 km. distant.
TIME: GMT plus 2 hours, permanent.
SHORE LEAVE: Permitted if free pratique requested and granted.
AUTHORITY: Port Authority Station.

KATAKOLON: 37.39 N. 21.20 E.

DOCUMENTS:
Maritime Health Declaration.
Usual Ship's Certificates.
3 Crew Lists.
3 Passenger Lists.
2 Lists of Stores and Provisions.
2 Lists of Crew's Personal Effects.
PILOTAGE: Not compulsory. Port has 1 private Pilot whom vessel may use provided sufficient advance notice passed through Agent.
ANCHORAGES: Vessels can anchor at a distance of 2 cables from the head of the breakwater (bearing 300°). Safe anchorage for vessels of up to 30 ft. draft between positions 37.40 N. 21.19 E. and 37.40 N. 21.20 E.
MAX. SIZE: Max. safe draft 24 ft. Depth inside port 8 m. Length of pier 204 m.
STEVEDORES: No advance notice required. No shore facilities. Vessels load/discharge with own gear.
MEDICAL: No medical assistance in Katakolon, but facilities exist at the town of Pyrgos 13 kms. distant.
FUEL: Not available ex-berth, but can be delivered by tank truck from Patras or Kalamata.
FRESH WATER: Available. Capacity 20 cu. m. per hour.
HATCHES: Usually opened and closed by crew but this work can be carried out by stevedores subject consent of Port Authority. Cost as agreed between Master and stevedores.
IDENTIFICATION CARDS: Passes issued by Port Authority.
CONSULS: None.
REPAIRS: Not available in Katakolon. Small quantities of engine spares available in Pyrgos.
AIRPORT: Andravis Airport 26 kms. distant. Flights to Athens twice weekly.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: Usual Greek holidays plus local holidays of 6th December and 17th December.
POLICE/AMBULANCE/FIRE: Police and Immigration, tel. 41202; Fire brigade (Pyrgos), tel. 22633; Ambulance (Pyrgos), tel. 22344.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Permitted.
AUTHORITY: Port Authority of Katakolon.

KAVALLA: 40.55 N. 24.25 E.

DOCUMENTS:
5 Crew Lists.
2 Lists of Foreign Exchange.
4 Passenger Lists.
2 Cargo Manifests.
2 Lists of Crew Personal Effects.
Copies of Bills of Lading and usual Ship's Certificates.
PILOTAGE: 24 hours notice of ETA to be passed to Agents or direct to Port Authorities. Vessels requiring Pilot should indicate with light and sound signals code letter "G" on arrival 5 miles from Kavalla lighthouse. Pilot boat is a tug 9 m. length. Pilot usually boards about 0.5 mile from breakwater light. In event bad weather, Pilot does not board, and vessel may take refuge N.W. of Cape Prinos at the head of Thasos Island. If strong South or S.W. winds prevailing, vessels recommended take refuge Eleftheron Bay. Vessels awaiting a Pilot may anchor 0.5 mile South of Kavalla lighthouse.
ANCHORAGE: 0.5 to 2 miles South of Kavalla lighthouse, depth 30 to 40 m. Bottom sand and mud.
MAX. SIZE: Max. length 150 m. with proportionate breadth. Max. draft 27 ft. Tidal range 2 ft.

HEALTH: Doctor boards vessel with Port Officer. Maritime Declaration of Health and Deratisation Certificate required. In case suspected disease or fever on board, Master should radio Port Authorities in advance. Pratique is automatic if arriving from another Greek port.
RADIO: No local radio station. Cables may be routed through Athinai Radio.
MEDICAL: Advance notice of medical requirements necessary. General hospital in Kavalla and numerous private clinics.
DENSITY: 1025.
FRESH WATER: Available at berth.
FUEL: None.
HATCHES: Opened and closed by crew.
CARGO GEAR: Vessel should have cargo gear ready on arrival in order to avoid delay.
CONSULS:

France	Tel. 3163	Netherlands	Tel. 3255
Finland	Tel. 3467	Sweden	Tel. 3669

REPAIRS: Minor repairs available.
AIRPORT: Distance 7 km. One flight daily to Athens.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: Standard Greek holidays. Local holiday 29th June.
POLICE/AMBULANCE/FIRE: Police, Tel. 3291; Fire, Tel. 1999.
AUTHORITY: Kavalla Port Authority.

LAVRION: 37.42 N. 24.04 E.

DOCUMENTS:
Maritime Declaration of Health with Crew's Vaccination Cards.
Cargo Manifests.
4 Crew Lists.
PILOTAGE: Address of Pilot station, Port Authority of Lavrion. Pilot boat is a motor launch 8 m. long, black hull with white stripe flying code flag "H". Vessels requiring Pilot should flash or sound letter "G". Pilot boards about half a mile from Green Light (AK. Ergastiria). In event of bad weather, boarding position is inside the buoy. Vessels awaiting Pilot should anchor close to the Green Light depending on vessel's size.
ANCHORAGE: See "Pilotage".
MAX. SIZE: Max. length about 130 m., max. draft 21 ft.
HEALTH: Health Officer and Port Officer board vessel on arrival. Maritime Declaration of Health should be submitted to Health Officer who examines any sick crew. Free pratique is not automatic.
BERTHING: Harbour open to S.E. winds, but otherwise sheltered and safe. There are two quays: one 330 ft. length, depth alongside 20 ft., and one of 260 ft. length, depth alongside 13 ft.
Mining company owns bridge elevator with capacity of 700 tons per day.
STEVEDORES: Advance notice required in order to arrange gangs. No shore cargo equipment, and cargo operations effected by ship's gear.
MEDICAL: Medical assistance available.
FRESH WATER: Can be supplied to vessels alongside berth from tanker trucks.
FUEL: Only small quantities available as existing fuel tank only 10 tons capacity. Can be supplied by tank trucks from Piraeus.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes per crew member allowed out of bond.
REPAIRS: Minor repairs only.
AIRPORT: Athens Airport, distance 45 km.
TIME: GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police, tel. 25218; Ambulance, tel. 25340; Fire, tel. 25249.
HOLIDAYS: Local holiday 26th July.
AUTHORITY: Port Authority of Lavrion.

MEGARA: 38.00 N. 23.20 E. **(See Plan)**

Pier owned by Hellenic Refinery. Berth depth 42 ft. 6 in. at S.W. end, 44 ft. at N.E. end. 46–50 ft. available 1 m. from the berth. With suitable fendering berth can accommodate vessels up to 85,000 d.w.t. 3 tugs required for berthing/unberthing. Tide about 1 ft. plus or minus depending wind direction.
also see "Piraeus".
SHIPMASTER'S REPORT: Vessel 255,090 d.w.t. Discharged part cargo of approximately 115,000 tons. (See Shipmaster's Plan).
Pilot boarded from a tug in position 1 mile South of Pakhi Island. Forward moorings consisted of 2 "first line ashore" 9 in. nylons in a long drift to the shore. This distance was estimated at about 300 m. 3×10 in. synthetic hawsers to buoys (2 to 1st buoy and 1 to 2nd buoy) with drifts of only 100 to 150 ft., the Pilot did not appear to have a lot of faith in the holding ability of the buoys. 3 × 5 in. wires led to the concrete jetty, and the 2 which were true backsprings, were very good with normal drift, but the wire from the after end of the foc's'le head to the stem of the jetty was very long and required a tug boat to carry it out as the boatmen could not handle it at the length. The starboard anchor, which was used for berthing was left out at 4 shackles.
Aft, the mooring consisted of 2 "first line ashore" 9 in. nylons in a long drift, exactly the same as forward. Then 2 × 10 in. synthetics to a buoy just clear of the quarter and 4 × 5 in. wires to the jetty. The 3 shown to the stem of the jetty all had to be carried out by a tug boat as forward.
My distrust of this berth is because of the lack of any wire breast lines and the main reliance being placed on the 4 nylons (two each end) which can stretch considerably if the breeze were to blow strongly offshore. There was only about 44 ft. of water alongside giving us a high freeboard.
At this berth it is necessary to use ship's gear to hold discharge hoses, 3 × 8 in. hoses being used.
According to the Pilot, it is preferable to use only ropes for mooring as they can be easily doubled up for length. His suggestion was that we should carry about 14 mooring ropes, with which I disagreed. He also advised that large tankers always berthed port side to, and I presume this is for V.L.C.C.'s as the next ship on berth came in starboard side alongside. She was about 50,000 tons.
With this ship there were 7 tugs in attendance berthing and 8 unberthing; at the most, 3 of them have sufficient power, the others were very weak when assisting us.

MILOS ISLAND: (Adamas, Voudia Bay) **(See Plan)**

DOCUMENTS:
4 Crew Lists.
3 Passenger Lists.
2 Provisions Lists.
2 Personal Effects Lists.
Vaccination Certificates.
Deratisation Certificate.
Manifest (in duplicate)
Certificate of Registry.
Load-line Certificate.
Safety Equipment Certificate.
Radio-telegraphy Certificate.
Certificate of Measurement.
PILOTAGE: No Pilot station. Vessels requiring a Pilot should sound 3 blasts on ship's siren. Pilot boards from small motor-boat. Agents may contact Pilot in advance of requirement by telephone.
ANCHORAGE: Safe anchorage in all parts of Milos Bay, where Adamas port is situated. Main anchorage in Milos Bay is on East side of Bombardos Cape, which has a lighthouse showing a fixed green light.
MAX. SIZE: Any size vessel may enter Adamas Port but berthing alongside is restricted to vessels of 16 ft. draft.
Ore loading berth at Voudia Bay, and at Kanaba. No facilities for tankers.
HEALTH: Authorities require 24 hours notice of arrival in order to grant free pratique to vessels arriving from a non-infectious country. Free pratique cannot be granted at Milos to vessels having disease on board nor to those arriving from an infected area. Such vessels are required to proceed to a main Greek port (Piraeus, Syros, etc.) to obtain health clearance.
RADIO: Athens Radio and Heraklion Radio.
TUGS: Not available.
STEVEDORES: Loading/discharging at Adamas is by means of ship's gear. Bagged cargo loading rate is 250 t.p.h. At Voudia Bay and Kanaba bulk ore is loaded at a rate of 500 to 800 t.p.h. (Conveyor Belt).
MEDICAL: No hospitals, nor private clinics available. There are 3 doctors and 1 dentist resident on the Island. Cholera, smallpox and yellow fever vaccinations are required.
FRESH WATER: Available to vessels alongside using ship's hoses. Delivery alongside up to 30 cu. m. in 12 hours.
FUEL: Small quantities lubricants available.
DEVELOPMENTS: Intentions to (1) extend existing wharf up to 70 m. with depth increases up to 30 ft. This development has been delayed for economic reasons.
OPENING/CLOSING HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and one opened bottle of spirits per person.
REPAIRS: Minor oxy-acetylene repairs available.
TIME: GMT plus 2 hours.
HOLIDAYS: Sundays and customary holidays. Cargo work can be arranged on these days at 75% increase on tariff rates.
TELEPHONES: Police 21204; Port Authority 41607.
SHORE LEAVE: Permitted.
DELAYS: Strong Southerly winds may delay berthing, or force vessel to leave loading berth at Voudia Bay.
SHIPMASTERS REPORT No. 1: *Voudia Bay:* Fresh water is available using vessels own hoses. Limited quantity of provisions are available. Hire of polypropylene ropes of 150 m. length is possible.
It is advisable to close ventilators before loading due to excessive dust.
Pilot remains on board during loading.
Cargo: Perlite.
Loading rate for bulk: 250 t.p.h.
Loading rate for bags: 18–20 t.p.h.
SHIPMASTERS REPORT No. 2: *Voudia Bay and Milos Island:* Situated on the N.E. corner of the island of Milos. When approaching from the S.E. the most prominent features are the scarred terrain, the factory building and the silo which is situated just above the berth. The loading gantry has both fixed red and white lights on it and is conspicuous.
Anchorage: The vessel anchored in a position with the loader bearing 302° T. distance 7.5 cables in 48.5 m. of water using 5 shackles of cable, the holding appeared to be good. The recommended anchorage is in a position with the loader bearing 328° distance 5 cables where holding is reported to be good. There was another vessel in that position at the time.

Caution: This anchorage is not recommended in strong South to S.E. winds due to the seas that build up in the Bay. Vessels are recommended to go to the North of Pilonisi Island and anchor in a position N.W. of the North West point, a distance of not less than 3 cables. This island is now joined to the main island by rubble from the factory, this is not shown on the Chart (1832).

Method of Berthing: (See Plans). Approach to the berth is made heading in a N.W.'ly direction, keeping the Northern most buoy (A) close to the starboard side and when the bow is passed about a third of the ship's length, the starboard anchor is let go and let run until about 4 shackles on deck, then it is checked, in the meantime a boat will take a breastrope from for'd, run from the port shoulder lead (1). Once this is ashore and the vessel begins to cant to starboard, the bow is worked into position by heaving on the breastrope and slacking the cable until there is about 6 shackles on the latter. Meanwhile, a line is run from the starbcard quarter (2) to buoy (B). A word of caution here, the berth is designed to take vessels up to 23,000 tons, so for a small vessel it will be necessary to have 2 ropes joined together for moorings (2), (4) and (5). The next line sent away is one from the Port Quarter to ashore as a breastrope (3), the stern is then brought into position in a similar manner to the bow. As the prevailing wind is from ahead usually, the next rope sent away is the head line (4) and finally the stern line (5). The latter two are used for shifting the vessel under the loader. Directly under the loading gantry, there is a dolphin arrangement to keep the vessel off the cliff, but on completion of mooring, the vessel should end up about 6 to 10 ft. off this.

Caution: In strong South to S.E. winds, the berth becomes dangerous and vessels have to leave and go to anchor and it is often necessary to leave the ropes on the buoys etc. as it is not possible to let them go. It is also advisable to retain some ballast on board for berthing.

There are 2 Pilots, both speaking English, the younger, an ex-Chief Officer has the better command of English and was the source of a lot of this information.

On leaving the berth, the last rope to be let go is (2) and with a smaller vessel, this can safely let go while weighing anchor. Vessel will then proceed to another anchorage close to, to secure, obtain clearance and clean up.

Loading Procedure: Loading is done by a chute and at an approximate rate of 300 tonnes per hour. The cargo is very dusty and everything should be securely battened down and it is strongly advisable to wear goggles and protective masks on deck as the dust is choking and if it gets in the eyes, they should not be rubbed as it is abrasive and can cause permanent damage. Eyes should be washed out. The ship will advise what weight she can take, and as the weighing procedure ashore is liable to break down after the first 500 tonnes, vessel is loaded according to draft, which has to be carefully checked, as when stipulating amounts required per hatch, they will not necessarily keep to this unless told. A boat is available for checking the draft, one blast on the whistle will summon it. Only method of getting ashore is by boat, so it is necessary to have the starboard gangway down. Both foreman and boatman have a fair knowledge of English, but foreman does not come aboard but stays on the loader, so it is necessary to shout instructions etc. The foreman will advise on shifting for position required, this is done with the aid of frequent blasts on a pocket whistle. Only one man comes aboard and that is to tend the chute.

There appears to be a continual short swell which makes draft reading a little difficult.

Entry and Clearance: Agent, Doctor, Customs and Harbour Master boarded the vessel at anchor and entered her there. Forms on board were not acceptable, but they transferred them to their own. I understand that the only acceptable forms are the standard IMCO ones, and if there are any of these on board they should be used.

Forms required:
2 Crew Declarations.
3 Crew Lists.
2 Bonded Stores List.
2 Stores Lists.
1 Vaccination list (Including Cholera).

There are various other forms to sign, but these are prepared by the Agent. The Health Declaration is made out by the doctor in his book. The Agent, who is from the Mining Company, spoke very good English.

Weather: Northerly winds predominate during the Summer and can become quite strong during September, mainly from midnight to noon.

AUTHORITY: Port Authority of Milos.

MITYLENE (incl. Geras Bay and Pamfyllon): 39.06 N. 26.35 E.

DOCUMENTS:
4 Crew Lists.
2 Cargo Manifests.
2 Passenger Lists.
2 Stores Lists.

PILOTAGE: No official Pilot, but if required the services of 2 experienced Mercantile Marine officers having knowledge of the port may be used.

ANCHORAGE: Before town of Mitylene, in depths of about 18 m., extreme East of Kastro Peninsula or Fokiotrypa light, bearing due North.

MAX. SIZE: Length 120 m. draft 17 ft. at Inner Port. Length 160 m., draft 28 ft. at Outer Port.

HEALTH: On arrival from foreign port, Port Officer, Customs Officer and Medical Officer board vessel for pratique. Pratique automatic if arriving from another Greek port.

BERTHING: At least 24 hours notice of ETA required for berthing allocation.

STEVEDORES: At least 8 hours notice of number of stevedores required to be given.

MEDICAL: In event of illness on board, Master should cable details prior arrival. Medical clinics and hospital available.

TANKERS: Geras Bay (Mamidakis) and Pamfila (Purfina).

FRESH WATER: Available. Supply rate 40/50 tons per vessel every 24 hours.

FUEL: Available at Purfina and Mamidakis installations. Supplies to Mitylene port by tanker trucks only, and advance notice required.

DEVELOPMENTS: A pier to be constructed in the Outer port, with depth of 15 ft. alongside.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member out of bond.

CONSULS:

Sweden	Tel. 28494	Belgium	Tel. 28494
Netherlands ,,	28760	France ,,	28151

REPAIRS: Two local machine shops undertake very minor repairs.

AIRPORT: 8 km/s from the port. 2 daily flights to Athens.

TIME: GMT plus 2 hours, permanent. From 15th April until 10th October there is Summertime.

HOLIDAYS: In addition to usual Greek holidays, local holiday on 6th December. Cargo work can be arranged subject additional charge.

POLICE/AMBULANCE/FIRE: Police, Tel. 100 and 22021; Fire Brigade, Tel. 199; Hospital, Tel.28412 and 22005.

AUTHORITY: Mitylene Port Authority.

MYKONOS: 37.27 N. 25.20 E.

Vessels in excess of 22,000 d.w.t. have been accommodated. Loading of Barytes ore at rates up to 5,000 tons per day. In Winter when North winds prevail conditions are satisfactory for loading: however, loading position considered unsafe when S.W. or West winds prevailing. When sufficient cargo is available vessels can load in 2 days.

PATRAS (including Rio): 38.14 N. 21.45 E. **(See Plan)**

DOCUMENTS: Port Authorities: 2 Crew Lists, Customs: Declaration of Cargo and Passengers.

PILOTAGES: Advance notice of ETA to be passed to Agents who arrange Pilot. Vessels without Agents should advise authority of ETA through Athens Radio, or on arrival outside harbour make International Code sounds and signals for vessels requiring a Pilot. Pilot boat is small boat carrying pilot flag. Pilot usually boards less than 1 mile outside harbour entrance. VHF contact possible with Port Authority and Pilot on Channel 12.

ANCHORAGES: Port is not a natural harbour and does not offer safe anchorage when winds from W. and S.W. Depending weather conditions vessels can be protected at the Nafpaktos-Psathopyrgos and Deke (Aghios Vassilios) Bays.

RESTRICTIONS: Port entrance has depth of 34 ft. At main harbour vessels having draft in excess of 28 ft. cannot berth. The limit at the new berth is 34 ft. draft. There are 2 red light buoys in position of the intended line of extension to Northern part of breakwater (extension of 250 m.) where work is in progress. Buoys are about 500 m. from permanent lights marking North entrance to the harbour, and indicate shallow water.

MAX. SIZE: Vessels of less than 34 ft. draft. No restrictions on length or breadth. Height of tide, max. 0.55 m., does not affect size of vessel.

HEALTH: Pratique in accordance with International Regulations.

RADIO: Athens Radio.

TUGS: One tug 1,000 h.p. Use of tug compulsory for all vessels over 1,000 tons gross. Joins vessel at entrance to harbour. Ship's lines used.

BERTHING: In accordance with allocation given by Port Authority.

STEVEDORES: Advance notice of ETA required in order to arrange berth and order number of gangs to commence work immediately. General cargo rate about 80–100 t.p.h./gang, and bulk cargoes 75–90 tons. 7 shore cranes, capacity up to 25 tons available.

TANKERS: No facilities at Patras, but Texaco-Restis berth at Rio for vessels up to 18 ft. and 2,500 tons alongside. No residue discharge facilities.

FRESH WATER: Supply line connected to all berths.

FUEL: Deliveries by tank trucks at Patras. Available at Texaco-Restis berth at Rio.

FIRE PRECAUTIONS: Vessels refuelling or discharging explosives or inflammable materials must apply to Port Fire Brigade to stand by.

DEVELOPMENTS: *(a)* Outer breakwater to be extended 500 m. in total.

(b) 4 m. is the depth along the newly constructed quay between Custom's House and fish steps.

(c) St. Nicolas pier – length: 200 m. – is now available for berthing ships on both sides. Depths alongside are equal to those in North and South basins.

(d) Astingos pier is reconstructed now having a 160 m. length on

the South side and a 180 m. length on the North side. Depths alongside are same as in the basins.
WATCHMEN: Advisable to employ night-watchmen on large vessels.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed out of bond for each Crew member.
IDENTIFICATION CARDS: Crew are supplied with passes by Port Authority.
CONSULS:

Belgium	Sweden
Germany	Finland
Denmark	France
Italy	Switzerland
Netherlands	

REPAIRS: Very minor repairs only.
REPATRIATION: All facilities for crew changes and repatriation.
AIRPORT: None.
TIME: Summertime – GMT plus 3 hours – from April 10 to end of September.
HOLIDAYS: In addition to general Greek holidays and Sundays, local holidays are 8th September, 30th November; 30th January. Work can be arranged on these days subject to payment of additional charges.
POLICE/AMBULANCE/FIRE: Port Police, tel. 277–622; Patras Police Station, tel. 277–261; Ambulance, tel. 274–444; Fire Brigade, tel. 199.
TELEPHONES: Facilities for connecting on board.
SHORE LEAVE: Permitted.
AUTHORITY: Central Port Authority of Patras.

PIRAEUS: 37.56 N. 23.40 E. (See Plan)

Incl. AGHIOS GEORGIOS 37.57 N. 23.36 E.; KERATSINI: DRAPETZONA 37.56.30 N. 23.37 E.; and PERAMA 37.58 N. 23.35 E.)

DOCUMENTS: All usual certificates including Registry, Measurement, Inspection, Load-line, Fumigation, Passenger Safety, Cargo Gear, and Radio.
5 Crew Lists.
2 Vaccination Certificates.
Cargo Manifest.
List of Provisions and Stores.
List of Spares.
Maritime Declaration of Health.
Crew Passports, or Seamen's Books.
Passenger Passports.
PILOTAGE: Cable Agent well in advance advising ETA. Agent informs pilot office of vessel's arrival time.

Pilots can be contacted on VHF Channel 16 for calling, Channels 7 and 12 for communication. Pilot boat is a wooden vessel about 10 m. length with black-painted hull, word "Pilot" painted in white.

Vessels requiring Pilot should signal letter "G" by morse light or by ships whistle. Pilot boards vessel about 1.5 miles off entrance to harbour, except when very strong South winds prevailing, in which case vessel advised by VHF or by signal light that conditions impossible for Pilot boarding, and whether vessel permitted enter harbour at Master's risk.

If awaiting Pilot, anchorage is possible inside pilotage area of Piraeus – Aghios Kosmos – Piraeus Anchorage – Perama Anchorage – Megara Anchorage (Pachi).
ANCHORAGES: As above. Depths between 9 and 35 fathoms.
RESTRICTIONS: No restrictions for Aghios Georgios Harbour or Drapetzona excepting draft. Harbours open throughout 24 hours for entry and departure subject prevailing weather conditions. No tidal restrictions.
MAX. SIZE: (also see "Tankers") Aghios Georgios max. draft 32 ft. Drapetzona max. draft 25 ft. Piraeus max. draft 32 ft. 6 in.
RADIO: Athinai Radio – SVA.
TUGS: Usually join vessel outside harbour, always using ship's lines. Over 30 tugs available. 10 of less than 1,000 h.p. and remainder over 1,000 h.p.
BERTHING: Agent must advise Piraeus Harbour Authorities in order to secure berth allocation.
CRANES: One gantry crane lifting capacity 10 tons, used for coal and bulk cargoes installed at Hercules Port. Hourly output of 160 tons.

39 electric wharf cranes with capacities of 2 to 15 tons installed along the wharf of the main port and at the dry and floating docks.
67 mobile cranes with capacities of 3 to 40 tons.
3 Straddle-carriers for containers, capacity 30 tons each.
1 container gantry with capacity 250 tons. The Port Authority have an additional gantry crane, capacity 41 tons on order.
3 floating cranes with capacities of 15, 30 and 100 tons.
BULK HANDLING FACILITIES: Silo suction-duct installations capable of moving grain at up to 150 t.p.h. and storage facility for 40,800 tons, as well as 2 mobile suction-duct units for bulk grain-cargoes.
STEVEDORES: Agent must submit letter of application to Piraeus Port Authorities for number of gangs required also time required to commence cargo work. Discharge usually effected with ship's own gear.

Normal work on loading/discharge of goods in the port is carried out by 2 regular shifts, the morning shift (0730 hrs. to 1430 hrs.) and the afternoon shift (1430 hrs. to 2130 hrs.). Likewise, upon application of the interested parties (ship-owners, Agents, consignees, shippers, etc.), and provided approval of the competent P.P.A. Service is obtained, a third, night shift can be assigned to the job if the necessary workers and operators are available. This shift is again of 7-hour duration, from 2030 hrs. to 0330 hrs. or can be extended to the morning hours if necessary. Exceptionally in the case of work on refrigerator vessels, on which work during the Summer period is limited to the afternoon hours, the Service can assign workers and operators of loading/discharge machinery, starting from 1630 hrs., for a 7-hour period which can be extended, if conditions warrant, to the morning of the next day. Loading/discharge work may also be undertaken on Sundays and other non-working days (holidays) such work being considered as totally extra, being burdened with extra charges accordingly.
MEDICAL: All medical and hospital facilities available. No advance notice required except in special cases.
TANKERS: Discharging effected at private installations.

Shell	max. draft 32 ft.	Petrolles	max. draft 29 ft.
B.P.	max. draft 36 ft.	Purfina	max. draft 28 ft.
Elvyn	max. draft 26 ft.	Mobil	max. draft 48 ft.

D.E.H. max. draft 36 ft. (outside steam generator factory, no facilities for going alongside).
DENSITY: 1025.
FRESH WATER: Available alongside berths. For vessels at anchor, water can be delivered by barges belonging to Piraeus Harbour authority at 50% additional cost.
FUEL: Gas oil, fuel oil and mixtures of both to a certain viscosity available. Advance notice of requirements should be sent to Agent order complete customer's requirements.
WATCHMEN: Required.
HATCHES: Opened and closed by stevedores.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per crew member allowed out of bond. Wine/spirits, one bottle.
CARGO GEAR: Before commencement of loading or discharge, cargo gear is examined by Piraeus Harbour Authorities.
IDENTIFICATION CARDS: Passes required for seamen going ashore.
CONSULS: The following countries maintain Consuls at Piraeus:

Denmark	Italy	Netherlands
Finland	Norway	Sweden

Other countries maintain Consulates resident in Athens.
REPAIRS: Facilities available for all kinds of deck and engine repairs.
DRY DOCKS: Two floating docks at Perama. *(a)* Length 202 m., depth 40 m., capacity 15,000 tons. *(b)* Length 113.6 m., depth 27.4 m., capacity 3,000 tons. Also see Eleusis and Syros.
REPATRIATION: All facilities for crew changes and repatriation.
AIRPORT: Athens Airport 10 km. distant from main harbour. Regular international flights.
TIME: GMT plus 2 hours. Permanent.
HOLIDAYS: In addition to Sundays, local holidays are: 1st January; Epiphany; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; Holy Trinity; 15th August; 28th October; 12th December; 25th December; Boxing Day.

Cargo work can be arranged on these days subject extra payment of 75%.
POLICE/AMBULANCE/FIRE: In emergency telephone Harbour office 188 or 451–311. Subsidiary Harbour Department tel. 462–876. Harbour Guard Aghios Georgios tel. 462–876 or 451–311/139. Harbour Guard Drapetzona tel. 451–311/140. Police tel. 100. Fire service tel. 199.
TELEPHONES: Telephone connection on board can be made.
SERVICES: Compass adjusting, tank cleaning. No facilities for discharge of tank residues.
SHORE LEAVE: Permitted.
SPECIAL PRECAUTIONS: *Ship's Speed in Port:* Incoming or outgoing vessels must keep speed steady, provided weather conditions and vessel's manoeuvrability allow to do so, but never to exceed 5 knots.

Pollution in the Harbour: Throwing overboard of ballast, objects of any kind, oil, food rejects, and dirt in general is strictly prohibited. All such rejects can be jettisoned after ship's exit from the harbour and at a distance not less than 16 miles from the nearest coast. Alternatively, all such rubbish can be thrown in a special rubbish-collecting vessel in the port.

Sea Pollution by bunker oil or sediments: The jettisoning of oil products generally in any port or roadsteads less than 50 miles from the coast is strictly prohibited. Similarly prohibited is the pollution of the sea by jettisoning of oil-sediments during dry-docking or repairs of vessels.

Pollution of the Air: Strictly forbidden is the de-sooting of boilers of all vessels at Greek ports. Similarly prohibited is the exit of gases in the form of smoke, which poisons the atmosphere and endangers public health.

Overloading: If upon arrival or sailing the port authorities ascertain overloading of the vessel, heavy fines are imposed.
AUTHORITY: Central Piraeus Harbour Office, Second Harbour Department.

PYLOS: 36.55 N. 21.42 E.

(Including Sfaktiria and Navarino Bay)
DOCUMENTS:
For Port Authorities.
1. For ships under the Greek flag and foreign flag vessels of Greek ownership.
Inspection of all Ship's Papers.
7 Crew Lists with full details of crew members' home addresses.
For passenger vessels – 6 Passenger Lists including passport details, that is, number, date of issue and nationality.

2. Foreign Flag Vessels.
Inspection of all Ship's Papers.
3 Crew Lists.

For Customs
Crew Personal Effects List.
1 Crew List.
Passenger List.
Lists of goods or effects to be sent ashore.
3 Lists of Stores and Spares.
Bills of Lading.
Cargo Manifest.

PILOTAGE: No Pilot station. There is a private Pilot employed by the bunkering company named G. Mamidakis Limited. Agent and/or bunkering company should be advised in advance of vessel's ETA order arrange Pilot to meet vessel at entrance of Navarino Bay and take vessel to oil installations at Sfaktiria Bay. ETA should be passed by radio telephone at least 48 hours before arrival and thereafter confirming ETA within 24 hours of arrival. If ETA has not been passed by radio, vessel should wait at entrance to Navarino Bay, and request Pilot by signalling letter "G" by flashing light or ship's whistle.
ANCHORAGES: Safe anchorage may be made in all areas of Navarino Bay except within red sector of Helonaki Islet light.
MAX. SIZE: Any size vessel can enter and anchor in Navarino Bay. The small harbour of Pylos is only suitable for small vessels.
HEALTH: Doctor visits vessels that require free pratique, and those coming from infected ports. Master and Health Officer together sign Maritime Declaration of Health. Free pratique continues when vessel arrives from another Greek port. A vessel in transit must have free pratique if remaining in port more than 24 hours. Infected vessels or suspected vessels remain under quarantine in accordance with existing health regulations.
RADIO: Athinai Radio – OTE.
TUGS: No tugs available.
STEVEDORES: Labour requirements passed by radio at least 24 hours prior arrival. No shore loading/discharging facilities and this work effected by ship's gear. Average rate load/discharge 100 tons per gang every 8 hours.
MEDICAL: Agent should be advised by cable prior arrival of medical and medicant requirements. There are two chemists and a Red Cross hospital. Yellow-fever, cholera and smallpox vaccination certificates required.
TANKERS: Sfaktiria Island Installation (ESAPP. G. Mamidakis Limited). 2 flexible hoses diameter 6 in. and 1 gas oil hose diameter 2.5 in. No facilities for residue discharge. At Pylos small harbour there is jetty 100 m. length, the head of which is reserved for small tankers carrying wine and spirits, which moor stern to quay. At head of pier, depth of water about 4 m., but within short distance from pier, depth increases to 10 m. Only 1 vessel of 12 ft. to 15 ft., draft can moor stern to quay at any time. Loading/discharging is effected through flexible and portable pipe-lines belonging to Gialovi Wine Factory at Pylos, and cargo is transported by special tank trucks.
DENSITY: 1023 in harbour basin and whole of Navarino Bay.
FRESH WATER: Master or Agent must apply in writing to Customs Authority, and application is to include notice from water supplier giving quantity to be supplied and cost of supply. Water barge capacity 200 tons. Rate of supply 160 t.p.h. by canvas hoses. Barge belongs to Maritime Agency I. Vrettakos, Pylos. Water also available alongside Pylos harbour quay.
FUEL: Mamidakis Fuel Installations at Sfaktiria Island. Vessels should give 48 hours notice to Mamidakis (Athens Office, address: Eleftheriou Venizelou 56; Tel. 622543 Tel. 284) Pylos Tel. 22282.
FIRE PRECAUTIONS: No unusual fire precautions at Sfaktiria Installations, but at main port of Pylos authorities do not allow loading/discharging of 2 vessels at same time, as the only 2 berths available are very close to each other.
DEVELOPMENTS: Work in progress to extend existing Pylos harbour pier to 215 m. length, 20 m. width, and 15 m. depth at head of pier. Depth inside pier to be 10 m.
WATCHMEN: Usually not necessary to employ watchmen, but if required, available.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 2 packets of cigarettes per crew member/day allowed out of bond according to duration in port and this quantity to be declared on Stores List. Store orders for supply of additional quantities are allowed on the basis of the number of crew and the length of voyage, basis 2 packets per day per crew member. 1 opened bottle wine/spirits allowed out of bond.
IDENTIFICATION CARDS: Shore passes issued against submission of seamen's books.
REPAIRS: 3 workshops for minor repairs.
REPATRIATION: Crew changes and repatriation facilities available.
AIRPORT: Kalamata Airport, 40 km. from Pylos. Kalamata/Athens flights every day at 17.50 hrs. Athens/Kalamata every day flights at 19.10 hrs.
TIME: GMT plus 2 hours permanent.
HOLIDAYS: *(a)* Standard Government Holidays; *(b)* Local holidays: 9th May (St. Nicholas) holiday for port workers; 24th September; 20th October (Anniversary of Battle of Navarino). During these holidays, cargo work can be arranged subject overtime payment.
POLICE/AMBULANCE/FIRE: Police (Pylos) 223-16; Greek Red Cross Hospital Pylos 223-15; Kalamata Fire Brigade 28373.
TELEPHONES: No facilities for placing on board.
GENERAL: Very severe fines imposed on oil pollution.
SHORE LEAVE: Allowed.
AUTHORITY: Port Authority of Pylos.

RHODES (including Akantias): 36.25 N. 28.17 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Cargo Manifest.
1 Stores and Provisions List.
Usual Ship's Documents.
PILOTAGE: 24 hours notice required by Rhodes Port Authority. Pilot boards 1 mile from port.
ANCHORAGE: Suitable anchorage up to a distance of 300 m. from the port East of the pier extension.
RESTRICTIONS: Port entry can be difficult and sometimes impossible with strong North or N.E. winds.
MAX. SIZE: Up to 24 ft. draft.
RADIO: Rodos Radio, 2182 kc/s.
BERTHING: Pilot will advise Master of berthing place in accordance with Port Authority instructions.
2 diesel motor-driven cranes capacity 2 and 3 tons available for discharging. No facilities for containers.
STEVEDORES: 24 hours advance notice required in order to arrange gangs.
MEDICAL: General hospital and private clinics available.
FRESH WATER: Available – supplied by canvas hoses.
FUEL: Deliveries only by tank trucks.
DEVELOPMENTS: Extension of the Merchant Port Pier by 110 m. to North and 140 m. to S.E. Also an extension of the new harbour (Akantias) pier, to the East of the Marine Harbour. Length to be 480 m. with a depth of 6.5 m. alongside.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 60 cigarettes per day per crew member and 1 bottle wine/spirits per Crew member allowed out of bond.
CONSULS:

Germany	Tel. 7479	France	Tel. 2318
Italy	,, 7432	Turkey	,, 3362

REPAIRS: Minor repairs only.
AIRPORT: Distance 15 km/s. During Winter, flights twice daily to Athens, and during Summer, flights 5 times daily.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: 1st January, 6th January, 7th March, 25th March, Good Friday, Easter Monday, 21st May, 15th August, 28th October, 8th November, Christmas Day, Boxing Day.
POLICE/AMBULANCE/FIRE: Police, tel. 7690 or 2220; Ambulance, tel. 2555; Fire Brigade, tel. 3333.
DELAYS: Sometimes necessary to remain outside harbour up to 3 hours to allow coastal passenger vessels to berth if other berths are full.
AUTHORITY: Central Port Authority of Rhodes.

SUDA BAY, Crete: 35.29 N. 24.09 E.

PILOTAGE: Compulsory. Naval Pilot boards West of N. Soudha Island.
TANKERS: Marathe POL Depot has wooden-faced concrete jetty. 10 in. discharge lines. No bunkers. No slop discharge facilities.
FRESH WATER: Available by barge.
ANCHORAGE: Good anchorage for any size vessels.
GENERAL: Cargo pier depth up to 32 ft. alongside, also grain silo with similar depth alongside.

SYROS: 37.26 N. 24.56 E.

DOCUMENTS: *Ships under the Greek flag* – documents required are:
Ship's Register.
Seaworthiness Certificate.
Log Books and Ship's Papers.
Load-line Certificate.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
2 Passenger Lists.
Ships under foreign flag, Greek owned – documents required are:
Ship's Articles.
Load-line Certificate.
Seaworthiness Certificate.
Ship's Papers.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
1 Passenger List.
Ships under foreign flag – documents required are:
Seaworthiness Certificate.
Fumigation Certificate.
Load-line Certificate.
Radio Station Licence.
2 Crew Lists.
1 Passenger List.
PILOTAGE: Pilot to be ordered by ship's Agent at least 24 hours before arrival notifying approximate ETA. Pilot boards from private motor launch, about 0.5 miles off the port, weather permitting. In bad weather Pilot boards in harbour entrance.
ANCHORAGE: Vessels awaiting Pilot anchor outside the harbour South of a line between the green breakwater light and the North end of Gaidaros Island. Anchorage in the Southern part of the harbour in depths of 20–30 m.

MAX. SIZE: Length 200 m. Vessels of small draft may go alongside the Neorion Pier or moor stern to the pier. Deeper-draft vessels remain at anchor in the harbour.
HEALTH: Free pratique is given when ship's declaration of health has been endorsed by a Health Officer.
RADIO: Loutsa Radio.
TUGS: 2 tugs available. Tugs usually join vessel 1 mile from harbour entrance. Payment for use of tug-line is obligatory.
STEVEDORES: At least 1 day's notice required to arrange gangs.
MEDICAL: No advance notice required if medical assistance needed. Hospital and general clinic available.
TANKERS: Discharge alongside terminal of A. E. Seica at Lazareta, near the entrance to the harbour.
DENSITY: 1026.
FRESH WATER: Limited quantity can be supplied by private company. Delivered by barge.
FUEL: Can be supplied by A. E. Seica, by barge or pipe-line.
WATCHMEN: Not required.
HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCE: Each man allowed 40 cigarettes per day for period not exceeding 5 days. Each man allowed 1 opened bottle of spirits. No restrictions for wine.
IDENTIFICATION CARDS: Shore passes are issued on production of seamens books or passports.
CONSULS: France – tel. 3–62. Netherlands – tel. 7–20.
REPAIRS: Neorion Syros Shipyards can undertake any kind of engine and hull repairs and alterations. Holds LTC licence for piston reconditioning.
DRY DOCKS: Two floating docks, one for ships up to 20,000 d.w.t., and one for vessels up to 75,000 d.w.t.

Dimensions of larger dock; 210 m. length over keel blocks; 36.20 m. inner width; 17.40 m. moulded depth.
DEVELOPMENTS: Port being dredged to permit entry of larger vessels. Shipyard installing facilities for building vessels up to 15,000 tons.
REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours all the year round.
REGULATIONS: Port Captain should be contacted for any queries not covered by lists of regulations provided on arrival.
HOLIDAYS: Work may be arranged on all holidays on payment of 75% additional to tariff.
POLICE/FIRE/AMBULANCE: Police tel. 6–10; Fire 3–33; Ambulance 5–55.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew may go ashore after pratique is given, carrying shore leave passes issued by Port Authority.
AUTHORITY: The Harbour Office of Syros.

THESSALONIKI (Salonica); 40.38 N. 22.56 E. (See Plan)

PORT LIMITS: A vessel is considered as an "arrived vessel" when she has passed the line connecting the Small Kara Point and Paliomanna light buoy.
DOCUMENTS: For Greek flag and Greek-owned vessels:
List of Foreign Exchange.
Crew list (additional for Port Authority).
All vessels:
4 Crew Lists (Port Authority, Customs, Immigration and Health).
1 List of Stores.
1 List of Personal Effects.
Copies of Bills of Lading and Cargo Manifest.
PILOTAGE: Apply for Pilot through VHF Channel 12 or by international code signals. Pilot meets vessel about 1,000 m. S.E. of breakwater light (white). Pilot boat is small motor-boat carrying pilot flag.
ANCHORAGES: Area from 500 to 1,000 m. S.E. of port offers safe anchorage.
MAX. SIZE: Average safe depth of water 10 m. 2 berths of 35 ft. depth. Also see "Tankers".
HEALTH: Health Officer boards vessels from foreign ports to grant free pratique.
RADIO: Radio Thessalonika. 24 hours notice of ETA required to obtain berth and stevedores.
VHF: Operative throughout 24 hours on Channel 12, Central Port Authority.
TUGS: 6 tugs available. Meet vessel about 1,000 m. from port. Tug's lines used for berthing at no extra charge. Ship's lines used unberthing.
MEDICAL: Advance notice not required – all facilities available.
SPECIALISED CARGO HANDLING FACILITIES: The port has silos of capacity 20,000 tons.

AGET Installation: 1 berth for discharging cement in bulk by special constructed ships equipped with automatic discharging gear. Max. draft 30 ft.
CRANES: 35 cranes of 3–27 tons capacity. 21 mobile cranes of 9–30 tons capacity. 1 floating crane of 70 tons capacity.
TANKERS: 1. *Esso-Pappas installation. (a)* Sea Island berth capable of accommodating 2 vessels of 24,000 tons and 14,000 tons respectively. Max. draft 32 ft. 8 lines, diameter 16 in. (1). 10 in. (3), 4 in. (3), 6 in. (1). *(b)* 7 buoy mooring for vessel of up to 80,000 tons. Max. Draft 44 ft. Submarine 34 in. pipe-line for crude oil discharge. 2 flexible discharge lines 10 in. diameter.

2. *Mamidakis' Installation.* Stern discharge berth. Max. draft 32 ft. 2 submarine lines enable 2 grades of cargo to be discharged through 8 in. line at 200 t.p.h. and 6 in. line at 160 t.p.h.

3. *Ethyl Oil Berth,* length 320 m., depth alongside 10m.
DIRTY BALLAST: 2 tanks of 600 tons each and 1 of 6,000 tons are available for the reception of dirty ballast at Esso-Pappas installation.

The discharge overboard of any oil or oil contaminated water is strictly forbidden and every precaution must be taken to avoid pollution.
DENSITY: 1025.
FRESH WATER: Unlimited supplies available.
FUEL: Unlimited quantities available. Usual notices required. Suppliers B.P., Shell, Esso-Pappas, Mamidakis.
FIRE PRECAUTIONS: Safety tug in position at tanker installations.
DEVELOPMENTS: *(a)* Channel. Dredging in progress to enable any size vessel to enter port. *(b)* Construction of sixth jetty, length 1,000 m., width 600 m. Will be used as a container terminal. Expected to be completed in 1978.
WATCHMEN: If required, cost by private negotiation.
HATCHES: Opened/closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed out of bond for each Crew member.
CARGO GEAR: Adequate shore gear available.
IDENTIFICATION CARDS: Passes issued to Crew members of foreign vessels.
CONSULS:

U.S.A.	Austria	Belgium
France	Germany	Yugoslavia
Denmark	Switzerland	Japan
Italy	U.K.	Norway
S. Africa	Netherlands	Sweden
Turkey	Finland	

REPAIRS: Only minor repairs.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: Distant 12 km/s. S.E. of town. 6 flights daily to Athens.
TIME: GMT plus 2 hours. Permanent.
HOLIDAYS: (National): 1st January, 6th January, 25th March, Good Friday, Easter Monday, 21st April, 1st May, 15th August, 28th October, Christmas Day, Boxing Day. (Local): 26th October. Work may be arranged on holidays at double costs.
POLICE/AMBULANCE/FIRE: Port Police, tel. 531-502; Ambulance, tel. 531-531; Fire, tel. 199.
TELEPHONES: Facilities available for placing on board.
SHORE LEAVE: Permitted without restriction. For tankers, the Master should arrange transport with Agent for seamen to the landing pier in Thessaloniki Harbour. Seamen will not be permitted to pass through refinery area.
AUTHORITY: Port Authority of Thessaloniki.

VOLOS: 39.21 N. 22.56 E.

DOCUMENTS: See "Piraeus."
PILOTAGE: Pilot boards about 1 mile outside port. Pilot boat is small launch coloured grey and black.
ANCHORAGE: Suitable anchorage situated 1–2 miles outside harbour in depths of 14 to 20 m.
RESTRICTIONS: Vessels in excess of 10,000 tons unable enter at night.
MAX. SIZE: Max. draft 36 ft., no limitation on length or breadth.
HEALTH: Port Officer acts as Health Officer and pratique effected on doctor's advice. If arriving from another Greek port, pratique automatic.
TUGS: Join vessel at entrance to harbour.
STEVEDORES: Advance notice required order arrange gangs. No shore gear and all cargo operations handled with ship's gear.
MEDICAL: Advance notice of required medical attention is necessary. Hospital and medical facilities available.
TANKERS: One berth; depth alongside 27 ft.
FRESH WATER: Only available at main pier and silos pier.
DEVELOPMENTS: A new pier is under construction.
HATCHES: Usually opened and closed by crew, but if by stevedores, additional costs apply.
CUSTOMS ALLOWANCES: 1 to 2 packets cigarettes allowed per crew member per day. 1 bottle wine/spirits allowed out of bond.
CONSULS: Germany, tel. 25379, France, tel. 25870, Sweden, tel. 27662.
REPAIRS: Minor repairs can be effected.
AIRPORT: Situated at Anchialou. 2 weekly flights to Athens.
TIME: GMT plus 2 hours, permanent.
HOLIDAYS: Usual Greek holidays. Local holiday 6th December; cargo work can be arranged subject to additional cost with the exception of 6th December.
POLICE/AMBULANCE/FIRE: Police, tel. 24500; Ambulance, tel. 27531; Fire, tel. 5000.
AUTHORITY: Port Authority of Volos.

YALI ISLAND: 36.38 N. 27.07 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Cargo Manifest.
Bills of Lading.
List of Ship's stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: A Mooring Master is available from Piraeus. Mooring Master boards at the anchorage.
ANCHORAGE: Safe anchorage in the roads except in strong Southerly winds.
MAX. SIZE: Length 250 m., draft 33 ft.
HEALTH: Port authorities will board by launch from Nissyros to arrange free pratique. Any sick crew members will be disembarked to Nissyros by the same launch.
TUGS: Not available.
BERTHING: The vessel is moored at loading berth on 8 buoys in addition to port anchor. During loading operations the vessels have to be shifted from hatch to hatch.

The facilities of loading consist of a cement pylon holding a horizontal chute-conveyor belt of about 50 ft. length. This chute-conveyor belt is fed from ashore by rotating buckets of 1.3 tons each. The vessel has to be at a distance of about 40 to 50 ft. from the cement pylon in order to load the holds.
STEVEDORES: Workers are employed by private loading company.
MEDICAL: Nearest medical and hospital facilities are at the island of Kos, 7 miles north of Yali.
FRESH WATER: None available.
FUEL: Not available.
HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of spirits are allowed each man.
CONSULS: No local representation.
REPAIRS: No facilities exist.
AIRPORT: Nearest at Kos with daily flights to Athens during the Summer. 4 flights a week during the Winter.
HOLIDAYS: Do not affect vessels loading.
SHORE LEAVE: Allowed.
AUTHORITY: Clerk of Mandraki, Port of Nissyros. Yali Quarry Manager.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Greenland

GENERAL

CUSTOMS: The Master is not allowed to distribute tax-free cigarettes or other tax-free tobacco in a Greenland port.

DOCUMENTS: Following documents must be on board:
Speed Certificate.
Crew List.
Radio Station Certificate.
Safety Equipment Certificate.
Clearance Certificate.
Health Declaration.
Tonnnage Certificate.
Certificate of Registry.
Deratisation Certificate.
Sailing Orders.

RESTRICTIONS: Foreign-flag vessels do not normally have access to Greenland ports unless they have special permission. If such vessels have this permission, the crew may go ashore subject approval of Port Authorities and following presentation of Health Certificate or a medical check on board.

ICE INFORMATION: Ice Centre Narssarssuaq is transmitting daily at 1200 hrs. GMT and 2200 hrs. GMT the latest information of the ice in Southern Greenland Waters. Information is transmitted in Faximile (Mufax) on frequency 2780 and 6970 kc/s drum speed 120. Ships can, free of charge, request telegraphic ice information from following coastal radio stations:
OZL—Angmagssalik
OZN—Prins Christian Sound
OXF—Julianehab
OZA—Frederikshab.

WATCHMEN: Ship is required to appoint a crew member as ship's guard on board.

TIME: GMT minus 3 hours. Permanent.

HOLIDAYS: As applicable to Denmark.

CONSULS: None.

WORKING HOURS: Normally from 0600 hrs. to 1800 hrs. with 2 meal breaks.

RADIO: In ports where there is a local radio station, vessels are prohibited from using ship's station for sending messages.

HEALTH: Before commencing voyage to Greenland, at the port of departure, Master is required to obtain a Health Certificate from an authorised medical practitioner, stating that there are no dangerous or contagious diseases on board, such as pest, cholera, yellow-fever, smallpox, or typhus. The crew list is to be included in this certificate stating that there are no venereal or other contagious diseases amongst the crew members. The Health Certificate is only valid if it has the stamp and signature of the Royal Danish Consul or Vice-Consul of the district in which the port of departure is situated. On arrival at the first Greenlandic port, the Master is to present the Health Certificate to the Port Authorities. Health Certificate may also be issued by a doctor in the first Greenlandic port of call.

REPORT: Immediately upon arrival of a vessel in Greenland, the Master must report to the Port Authorities.

WASTE DISPOSAL: It is forbidden to throw waste material of any description overboard into port waters.

EGEDESMINDE: 68.43 N. 52.53 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Roadstead, Inner Port (inside Bay), Anchorage, Boat Port, and Atlantic quay.

DAYLIGHT: Polar darkness from 2nd December to 11th January, and midnight sun from 22nd May to 23rd July.

CONDITIONS: *(a)* Current: flows Eastwards between the islands at Egedesminde from 3 hours before, to 3 hours after high water, following which, current flows Westwards for 6 hours. *(b)* Ice: Winter ice normally occurs from mid-December to early May, but can occur earlier, in November. New ice in the port can be up to 60 cm thick; 1st January covering ice up to 30 cm and by 1st February about 45 cm. Icebergs sometimes enter port area and stop all shipping movement. *(c)* Tide: high tide height 2.6 m. (max. 3.1 m.). Low tide height 1.5 m. Direct West wind causes 0.3 m. rise above tidal height, and South or S.E. wind about 0.5 m. below.

PILOTAGE: No official port Pilot, but assistance arriving and sailing may be obtained from a local seafarer having good knowledge of the area. This local assistance should be ordered if required in ETA cable to Port Authority at least 24 hours prior arrival. The Port Manager usually acts as local expert as part of his normal duties.

There is VHF radio installation in office of Port Authority and it is usually possible to obtain VHF contact within 30 miles of Egedesminde.

Local area expert will board vessel from port boat at meeting place usually arranged just outside entrance to port.

No special pilotage regulations and no Outer Anchorage where Pilot may be taken on board. However, in waters North and N.E. of port entrance vessels may stop or proceed at very slow speed in order to embark local expert.

ANCHORAGES: No special anchorages, and vessel is only allowed to anchor for a short period at the entrance to port subject permission of Port Authority.

MAX. SIZE: Largest vessel to berth alongside Atlantic quay was length 102 m., breadth 40 m., draft 6.2 m.

ENTRY: Day or night.

TUGS: None. 2 port boats to take lines and assist mooring.

RADIO: Godhavn Radio. RDF station beacon East of the town. Radio link between Egedesminde and Transitoen, and between Transitoen and Roeveo.

BERTHING: Atlantic quay. Length 70m., depth alongside 8.1 m., at medium low tide and 10.7 m., at medium high tide. Height of quay at medium tide about 1.5 m., above w/l. One 5-ton mobile crane and some fork-lift trucks used in discharging.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available at Atlantic quay and at tank-station.

FUEL: Only gas-oil available for local fishing vessels from the tank-station.

AIRPORT: Heliport.

SALVAGE: Salvage-station in the area.

REPAIRS: Radar and radio technicians available.

AUTHORITY: Director of Commerce.

FAERINGEHAVN: 63.41 N. 51.34 W.

(Also see "General Information" at beginning of Greenland Section).

DOCUMENTS: Bill of Health: Doctor's certificate mentioning each member of crew by name to be free of contagious diseases. This document to be signed by Consulate in the port of delivery to be prepared by competent authority, passengers excluded. One Manifest with Bill of Lading. Ordinary Ship's Papers.

PILOTAGE: As a rule Pilot can be ordered in the months May–October, notice 12 hours before arrival is required.

ANCHORAGE: Inside fjord area.

RESTRICTIONS: None.

MAX. SIZE: Oil-carriers about 26,000 d.w.t., draft 40 ft. Ordinary cargo-ships 20 ft.

HEALTH: Captain to apply with documents at harbour office for free pratique.

RADIO: Faeringehavn Radio: OYU, or Godthab Radio: OXI, connected Faeringehavn by Telex and Telephone.

VHF: Oil company and fishing company are listening on VHF during working hours.

TUGS: Salvage tug stationed on West coast of Greenland. Stationed at Faeringehavn May–October, no fixed rates.

STEVEDORES: None, but fishing and service company "Nordafar" may act as stevedores.

MEDICAL: Local sick room and nurse available in Summer. For medical service, apply Godthab.

TANKERS: Load/discharge lines 6 and 8 in. Smaller diameters for bunkering when necessary.

FRESH WATER: Only available May to November.

FUEL: Available. Light fuel, gas oil, aviation turbine fuel A1, gas oil, oct. 97.

GANGWAY/DECK WATCHMEN: Not required (ship's crew).

OPENING/CLOSING HATCHES: Must be carried out by ship's crew.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Small repairs only. Workshop available May to November.

REPATRIATION: Available, via Godthab by air to Copenhagen.

AIRPORT: Nearest airport is Godthab, distance 35 miles regular airlines.

TIME: GMT minus 3 hours.

HOLIDAYS: Danish holidays.

POLICE/AMBULANCE/FIRE: Police tel. Faeringehavn 34; Ambulance Faeringehavn 25.

TELEPHONES: Not available on board.

GENERAL: Bunker station open all year; during Winter-time sometimes difficulties caused by ice.

SHORE LEAVE: Allowed.

DELAYS: Bunker station closes for arrivals between 2200 hrs. and 0600 hrs. local time.

AUTHORITY: Kontrolloren, (Harbour Master).

AGENT: Nordafar A/S, 3908 Faeringehavn, Greenland.

FREDERIKSHAB: 61.59.7 N. 49.40.8 W.

(Also see "General Information" at beginning of Greenland Section)

LOCATION: The port is in the inner part of a small bay.

DESCRIPTION: Atlantic quay; fishing quay; anchorage.

CONDITIONS: *(a)* Current: none. *(b)* Ice: big ice reaches to the North of the port; smaller ice reaches the port especially to the North, but South of the port it is usually ice-free. The best period of finding the port ice-free is between March and April, and from the end of August. *(c)* Tide: height of average high water is 3.8 m., low water 2.0 m. (max. 2.4 m).

PILOTAGE: Pilot should be requested in ETA cable via Frederikshab radio. Pilot will meet vessel at Satuarssugssuaq (Fyroen).

ANCHORAGE: S.E. of Skarvo. Holding ground is not good and anchoring should be carried out at very slow speed.

MAX. SIZE: Length 100 m., draft about 6 m.

ENTRY: Day or night.

TUGS: None. Port boats assist in mooring.

RADIO: Local radio station. RDF station beacon East of the town.

BERTHING: Atlantic quay. Length 60 m., depth alongside at average low tide, 7 m., depth in harbour about 10 m. Cranes up to 5 tons capacity and fork-lifts trucks used in discharging.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available alongside Atlantic quay.
FUEL: Refuelling quay, depth about 5 m., Gas-oil and diesel oil available.
AIRPORT: Heliport.
REPAIRS: Workshop available.
GENERAL: Police Station, Fire Brigade, radar and radio technicians, and service for IFD rubber dinghies. Cable address "Fladeservice FRH".
AUTHORITY: Director of Commerce.

GODHAVN: 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port consists of a mooring inside a bay.
DAYLIGHT: Polar darkness from 25th November to 15th January, and midnight sun between 19th May and 26th July.
CONDITIONS: Ice: Winter ice is fast from November–December until end May or beginning of June. Thickest observed Winter ice is about 100 cm.
ENTRY: Day or night. Port is open from May to November. Between mid-April until May the port can only be used by specialised tonnage.
PILOTAGE: Boarding point arranged with Port Authority in ETA advices.
ANCHORAGE: Good anchorage in the bay – outer port.
MAX. SIZE: Largest vessel to date length 100 m., draft 6.5 m.
TUGS: None. Port boats assist with mooring.
RADIO: Local radio station. RDF Station beacon.
BERTHING: No alongside berths. Vessel moors to 2 anchors and stern-lines to the shore. Mobile cranes on shore capacity up to 5 tons. Depths in bay about 6.82 m.
MEDICAL: Hospital. Doctors and dentist available.
GENERAL: Arctic Scientific Station, Fire Brigade, Cable Office.
AUTHORITY: Director of Commerce.

GODTHAB: 64.10 N. 51.44 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Narrow entry to port, but well protected, with good modern berths and anchorages.
CONDITIONS: *(a)* Current: sometimes strong between anchorage and the berths. *(b)* Ice: only very occasional large quantities of ice reach the port and into the fjord. If ice in area South of Godthab, S.W. storms force drift ice into the fjord. In recent years the port has begun to freeze over in Winter, and small vessels have at times become icebound. *(c)* Wind: S. and S.W. storms spring up suddenly but only last for brief periods. *(d)* Tide: height of high water 4.4 m. (max. 5.1 m.); low water 2.1 m.
ENTRY: Port open day and night all year round.
DAYLIGHT: Godthab situated South of the border for midnight sun and Polar darkness.
PILOTAGE: Port Manager normally acts as Pilot for ships, but is not an authorised Pilot. Pilotage may be arranged by VHF contact with Authority during normal working hours.
ANCHORAGES: Good anchorages available inside fjord. Larger vessels should anchor close to Rypeo and in Malene Bugt.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 135 m., breadth 17 m., and draft 7 m.
TUGS: None. 2 port boats to take lines and assist mooring.
RADIO: 24 hours notice of ETA should be passed to Authority, cable address "Handel Godtham". Radio beacon at Kookoerne.
BERTHING: Larger vessels should contact Port Authority before approaching port at night-time. Atlantic quay, length 170 m., has a depth alongside 7 m., approx. for the most Northerly 120 m., and between 4.5 – 5 m. at MLWS for the most Southerly 50 m.

Vessels normally berth starboard side alongside, unless fitted with bow thrusters, when a port side berthing is feasible. Mobile cranes capacity 5 tons.

Skonnertkej Quay is 52 m. long, with a depth of 4.7 m., approx. Vessels normally berth bow Westward.

On the Kyst passerkej length 30 m., depth 5.4 m., vessels usually berth with bow to the North.

There are several other small quays for the use of trawlers, and cutters, and a sand discharging berth length 30 m., depth 5 m.
TANKERS: Tankers can anchor and stern moor out from the gas installations, using an oil pipe-line connection. A mooring arrangement is being established for tankers of 25,000 – 30,000 d.w.t. below the tank and gas farm on the hillside.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Available at Atlantic quay.
FUEL: Small quantities gas-oil available at Atlantic quay.
REPAIRS: Repair workshop available.
AIRPORT: Heliport.
GENERAL: Police, Fire Brigade, radar and radio technicians, radio station post, and cable office.
AUTHORITY: Director of Commerce who also acts as Port Manager.

HOLSTEINSBORG: 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour is situated on Northern side of Tommermandsoen.
CONDITIONS: *(a)* Tide: average height of high tide 3.5 m. (max. 4.4 m). low tide 2 m. *(b)* Ice: Winter ice up to 1 m. thick. Ice normally occurs from December to March or April.
ENTRY: Port open day and night, and normally all year round.
PILOTAGE: Arrange with Authority through Holsteinsborg's radio, cable address "Director of Commerce Holsteinsborg". Pilot meets vessel at Jakobs Skaer, 2 miles S.W. of Mollersoe.
ANCHORAGE: Large vessels can anchor outside port and discharge into barges.
MAX. SIZE: Largest vessel that can berth alongside Atlantic quay, length 102 m., breadth 14 m., draft 6.2 m.
TUGS: None. Port boats take lines and assist mooring.
RADIO: Local radio station. VHF connection in Port Director's office. Radio technicians available, cable address "Polar Radio".
BERTHING: Atlantic quay, length 60 m., depth alongside 6 m., at average low water. Height of quay 2 m., above w/l. If berth occupied, loading/discharging of larger vessels at anchorage with barges. At Atlantic quay there is a mobile crane with capacity of 3 tons and fork-lift trucks. Belt conveyor for coal.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable at Atlantic quay.
AIRPORT: Heliport.
GENERAL: Post and cable offices. Telephones not normally available for connection on board, but vessels at anchor can call Port Director's office on VHF during daytime.
AUTHORITY: Director of Commerce who acts as Port Master and Harbour Master.

IVIGTUT: 61.12 N. 48.10 W.

(Also see "General Information" at beginning of Greenland Section)
OPERATORS: A/S Kryolitselskabet Oresund.
CONDITIONS: *(a)* Current: strongest about 3 hours before and 3 hours after high water, and vessels arriving and sailing should take this into consideration. *(b)* Tide: height of average high tide 3 m. (max. 3.4 m.), low tide 1.6 m. *(c)* Wind: calm for about half the year otherwise winds are usually from South or S.E. The dangerous winds for moored ships are the infrequent storms from North or N.E.; these storms seldom occur but if they do occur they do so in the Autumn. *(d)* Ice: Winter ice usually occurs from December onwards in the fjord outside Ivigtut and disappears in the beginning of April. Outside Ivigtut Winter ice always occurs, sometimes reaching a thickness of about 1 m. Information concerning ice conditions always obtainable on telegraphic request to GLK.
ENTRY: Day and night and usually all year round.
PILOTAGE: No official Pilot but an acting Pilot can be arranged through connection with Port Authority, cable address "Manager Ivigtut", at least 24 hours prior arrival.
MAX. SIZE: Largest vessel to have berthed at Kryolit pier was length 102 m., breadth 14 m., draft 6.2 m.
TUGS: None. Motor-boat will assist mooring.
BERTHING: Kryolit quay, depth alongside about 7 m. height of pier about 2 m. above w/l. Berthing during daylight only. Kryolit not exported from mid-December to end March. Crane capacity 3 tons.
RADIO: The radio station at Ivigtut is closed but telephone connection to radio station at Gronnedal.
FRESH WATER: Available.
FUEL: Deliveries of small quantities of gas-oil.
REPAIRS: Machine tool workshop. Diver assistance obtainable.
MEDICAL: Hospital in Ivigtut, but doctors and dentists are in Gronnedal.
AUTHORITY: Ivigtut Cryolite Mines.

JAKOBSHAVN: 69.13 N. 51.06 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is a narrow open bay, entrance to the N.W., having outer port and inner port. In outer port is Atlantic quay and bunkering station, and inner port has another quay and a fishing harbour.
CONDITIONS: *(a)* Tide: height of average high tide 2.8 m. (max. 3.3 m.) low tide 1.6 m. *(b)* Wind: usually East to N.E. In Autumn winds are strong especially in the morning. *(c)* Ice: impression can be gained when approaching port that port is closed due to icebergs. On closer approach channels between icebergs will be found but if these openings appear too narrow a wider passage should always be found to the North. *(d)* "Kanele": a natural phenomenon that occurs at this port causing regular and heavy swell, height up to 2 m. Wave characteristic, long and flat, frequency about 6 minutes. Pilot should be consulted for full information.
ENTRY: Port usually open day and night, from mid May to end November.
DAYLIGHT: Polar darkness between 1st December and 12th January and midnight sun between 21st May and 24th July.
PILOTAGE: A Pilot should always be used by larger vessels and request made to Port Authority in ETA cable. Pilot boarding place to be agreed with Authority.

MAX. SIZE: Largest vessel to berth at Atlantic quay was length 86 m., draft 6.8 m.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Outer port depth 6.5/7 m., inner port 5.5/6 m. Atlantic quay length 40 m. Depth alongside Atlantic quay 7 m. at average low tide. Height of quay about 1.1 m. above w/l. Permission to enter port should be obtained prior arrival from Port Authority. Mobile crane capacity 5 tons, also fork-lift trucks.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable alongside Atlantic quay.
AIRPORT: Heliport.
REPAIRS: Machine workshop.
GENERAL: Police, Fire Brigade, Port and cable office.
AUTHORITY: Director of Commerce who acts as Port Manager.

JULIANEHAB: 60.43 N. 46.02 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is an open bay, facing South with Atlantic quay.
CONDITIONS: *(a)* Current: flows N.W., but in Southern part of port from little current effect. *(b)* Tide: average height of high tide 2.8 m. (max. 3.2 m.); low tide 1.4 m. *(c)* Ice: drift ice between January and July occasionally fills whole port. *(d)* Wind: the most frequent wind is from East or N.E., normally occurring as storms during Winter months and as strong winds in Summer. Winds can be violent and cause rapid rise in temperature. Very secure moorings are advisable.
PILOTAGE: Port office is equipped with VHF which should always be used to contact Port Authorities before arrival, and to arrange Pilot's boarding position.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 100 m. and draft 6 m.
ENTRY: Port open day and night normally throughout year, but from 1st January to 1st August, only available to specially constructed tonnage.
TUGS: None. Port boats take lines and assist mooring.
RADIO: Local radio station. Radio beacon station at Simiutaq about 10 miles West of entrance to Julianehab Fjord.
BERTHING: Atlantic quay – length 60 m., depth alongside between 7/9 m. on average high tide. Height of quay is 1.3 m. above w/l. Mobile cranes, lifting capacity up to 5 tons.
MEDICAL: Hospital, doctor and dentist available.
FRESH WATER: Available from Atlantic pier during Summer months.
FUEL: Gas-oil available at Atlantic pier.
REPAIRS: At repair quay there is a stationary crane lifting capacity 35 tons.
AIRPORT: Heliport.
AUTHORITY: Director of Commerce – acting as Port Manager.

MARMORILIK: 71.07 N. 51.17 W. (See Plan)

DOCUMENTS:
International Load Line Certificate.
Safety Raid Certificate.
PILOTAGE: Optional for coastal vessels entering Davis Strait. Agents are to make arrangements if Pilot required.
GENERAL DESCRIPTION: The berth is located at the North end of the West side of Agfardlikavsa Fjord.

Agfardlikavsa Fjord, West Greenland, (entrance approximately 51° 18′ W. and 71° 08′ N.) is located at the end of the larger Qaumarujuk Fjord.

Qaumarujuk Fjord, the Northeastern arm of Ingnerit, has its entrance between Qegertanguit and the Western extremity of Akuliarusikavsak, a mainland projection about 2.5 nautical miles S.E. Ingnerit is one of the largest of the branch fjords and flows into Umanak Fjord. It is entered between Tuperssuatsiait, the S.E. extremity of the Alfred Wegener Peninsula, and Akuliaruseq, a point about 4 miles S.S.E. The waters of the Umanak Fjord flow into the Nordost Bay.

The Agfardlikavsa Fjord is separated from the Qaumarujuk Fjord by a shallow, narrow bar. Depth at the centre of the sill is approximately 30 m.

There is a considerable surface water run-off along the Fjord walls including occasional rock slides. The bottom of the Fjord is filled with 6 to 8ft. of fine silty materal.

Marmorilik (71° 08′ N., 51° 18′ W.) lies on the S.E. side of the Qaumarujuk Fjord at the Western entrance point of the Agfardlikavsa Fjord.

The larger fjords and Nordost Bay are encumbered with islets and rocks requiring extreme care in navigation. In particular, a shoal is known to exist some 350 m. N.W. of Marmorilik Point and extra care is required in this vicinity.
ANCHORAGE: There is an anchorage at Agfordlikowsa in depths of 20 to 35 m. Tankers can anchor near the berth in depths of 24 to 50 m., but must be aware of an unmarked 6m. shoal about 300°True, and 375 m. (approx.) from the discharge point.
MAX. SIZE: Max. d.w.t. 36,500. Min. depth alongside ore terminal is 12.5 m. at LW.
RADIO: Ship-to-shore communications will be maintained using the following frequencies: 2182 kHz, 2210 kHz and 2738 kHz.

Information on ice conditions in the fjord can be obtained from shore personnel. During loading operations, Greenex will supply the vessel with 2 portable radio transceivers for communications between the carrier and the loading control station.
TUGS: 1 tug available, 720 h.p. The tug will assist with berthing and unberthing if required, and will break up any thin ice in the vicinity of the berth and entrance to the fjord.
BERTHING: The Marine Terminal is used for loading ore carriers up to 36,500 d.w.t. The berth consists of 4 breasting dolphins with bollards for springs and breast-lines. On the shore are 7 bollards for head and stern lines spread over a distance of 366 m. The min. depth of water alongside is 12.5 m. at LW.

Vessels normally berth port-side alongside and use the starboard anchor to assist in berthing. No. 1 hatch is lined up under the loader as it is the first hatch to be loaded.

Initially the headlines go to the Northernmost dolphin and stern lines to the Southernmost bollard on the shore.

Loading: Zinc and lead are loaded with a luffing and slewing ship-loader. The ship-loader is fitted with a 20 ft. conveyor to distribute the cargo in the hold. Communication is maintained between the vessel and control room by portable radios. The average loading rate is 500 metric t.p.h.

Notice of readiness will not be accepted at time of arrival at the dock unless the vessel is in all respects ready to load.

General Cargo: Unloaded into barges with vessel's gear and towed ashore to a separate lightering dock located about 500 m. N.E. of the ore terminal.
MEDICAL: Emergency medical and dental treatment can be arranged and should, when possible, be requested by the vessel's Master in his ETA message to the mine site office.
TANKERS: Diesel fuel oil and turbo-fuel are stored in a tank farm located on-shore about 500 m. West of the point at Marmorilik on Qaumarujuk Fjord, at an elevation of 50 m.

Vessels usually berth using both anchors, 5 shackles on the port anchor, and about 4.5 shackles on the starboard anchor, using a heavy chain from the stern to the S.E. point of the oil installation. The chain is available from the shore. Tankers can also moor to the N.N.W. of the oil installation, but must remain outside the 6 m. line.

The tanker hoses are connected to an 8-inch flange connection for diesel oil or a 4-inch hose adaptor with dust-cap for turbo-fuel. The static head on the lines is about 70 m when the tanks are full. An anti-static cable is provided.

On the shore, there are two 50-ton bollards and one 20-ton stock. No breasting or mooring dolphins are provided.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: No facilities.
TIME: Standard time is GMT minus 3 hours.
GENERAL: *Repairs:* While alongside the dock, no repairs are to be undertaken that will prevent the main propulsion machinery from being activated at very short notice.

Vessel's Whistle: The vessel's whistle shall be operational during operations. One long blast on the whistle means "Emergency – stop operations".
AUTHORITY: Greenex A/S.

NARSSARSSUAQ (Isrecognosceringsstation): 61.08 N. 45.26 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Ice outlook station, with quay.
CONDITIONS: *(a)* Current: occasional strong N.W. current. *(b)* Tide: average height of high water 3 m. (max. 3.6 m.) low water 1.6 m. *(c)* Wind: S.E. wind sometimes reaches typhoon strength. *(d)* Ice: in Winter ice thickness sometimes reaches 1 m. Ice breaker not available.
PILOTAGE: Not available. Base representative should be advised of ETA well in advance of arrival.
TUGS: None. Port boats assist mooring.
MAX. SIZE: Largest vessel to berth at quay was length 130 m., draft 8 m.
ENTRY: Open season from mid-May to mid-October. During season, port open day and night.
BERTHING: Quay length 140 m., depth alongside (West) 6–11 m. (East) 5–8 m. Height of pier 2 m. above w/l. 2 vessels may berth, 1 on either side of quay. Heavy mooring equipment on the quay, and should be used by larger vessels. Mobile cranes capacity up to 4 tons, and fork-lift trucks.
WATER: Obtainable at quay, about 80 tons per single off-take.
AIRPORT: Landing-strip for aircraft. Ice station usually uses DC.4 aircraft and S61 Helicopter.
RADIO: Local radio station supplying ice information.
AUTHORITY: Representative of Ministry for Greenland.

NORTH STAR BUGT (Thule Air Force Base): 76.36 N. 68.52 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Supply port for the Thule Air Force Base. Port is operated by and belongs to the U.S. Air Force.
DAYLIGHT: Polar darkness from 1st November to 10th February and midnight sun from 23rd April to 20th August.
CONDITIONS: *(a)* Ice: port is frozen over from end October to beginning July. From beginning of November, large areas of compact ice appear, and these can sometimes be up to 20 miles

wide. During May, compact ice areas commence breaking up; however, large quantities of drift ice remain along the coast until end July. Winter ice is normally about 180 cm. thick. *(b)* Temperature: in January and February average temperature is 29° below zero. In July, June and August, average temperature is usually above freezing-point, but for the rest of the year it is below freezing. *(c)* Tide: mean Spring tide is 3 m. (max. 3.4 m.). Mean neaptide 1.7 m.
ENTRY: Normally, port is open early July depending upon ice situation.
PILOTAGE: No authorised Pilot, but American Port Authority assists in mooring and should be advised of ETA well in advance.
TUGS: None. Port boats assist mooring.
ANCHORAGE: Good holding ground in depth between 20 and 40 m., but anchoring should only be carried out following advice of Port Authority.
MAX. SIZE: Largest vessel to berth alongside quay was length 130 m., and draft 7 m.
BERTHING: 2 vessels may berth at the quay. Depth alongside about 7 m. Height of pier about 2 m. above MHW. Mobile cranes and fork-lift trucks; however, equipment varies from year to year and Port Authorities should be contacted well in advance. 3 amphibious craft for vessels discharging in the roadstead.
FRESH WATER: Available alongside quay.
AIRPORT: Two rescue helicopters stationed at this base.
REGULATIONS: The area is a Military Defence area and special permission is necessary to enter the port. Shore leave is prohibited.
MEDICAL: Hospital, doctor and dentist available.
AUTHORITY: U.S. Air Force.

SONDRE STROMFJORD (Camp Lloyd): 66.00 N. 53.35 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is used for the supply of an American base, transit port for passenger carriage, and for air communication to Copenhagen. Port has a quay and a sea terminal for tankers.
DAYLIGHT: Camp Lloyd is situated South of the border for polar darkness but has a midnight sun from 15th June to 1st July.
CONDITIONS: *(a)* Current: the current at entrance and at the West of Sondre Stromfjord is N.E. at flood tide, and S.W. at ebb tide, and can reach a speed of 7 knots. *(b)* Tide: high water at Camp Lloyd is about 3 hours later than at the entrance of Sondre Stromfjord. Height of average high tide 3 m. (max. 3.6 m.). Low tide 1.6 m. *(c)* Ice: Sondre Stromfjord is frozen during winter throughout whole of inner harbour, but about 55 miles from Camp Lloyd, ice thickness varies from 5 cm to 90 cm. *(d)* Winds: strong winds can occur from East and S.E.
ENTRY: On account of ice, the fjord is closed from beginning of January to end-June, but can be used day or night from beginning of July to end-October.
PILOTAGE: No authorised Pilot, but Harbour Master will assist berthing.
ANCHORAGES: Good anchorages about 2 miles S.E. of Emmons Pynt in depth of about 40 m. Great care should be taken in anchoring, since sea bottom is shelving.
BERTHING: *(a)* A quay which is located North of Emmons Pynt, depth alongside only 3 m. *(b)* Tanker sea terminal about 700 m. S.S.E. of Emmons Pynt where there is mooring with discharge lines. Depth of water 24–26 m. on the South side of the mooring position; 15 m. at the mooring, and 10 m. on Northern side of mooring with rapid shelving to the North.
The Port Authorities should be contacted before mooring at the sea terminal. There are mobile cranes with lifting capacity up to 5 tons, and fork-lift trucks.
RADIO: ETA should be given well in advance of arrival to the Royal Greenlandic Commercial Representative and also to the Port Authority. The arrival should be reported at least 24 hours in advance through GLK. The Harbour Master can be contacted on 2716 kc/s. and this contact should be established at least 1 hour before vessels arrival.
MEDICAL: Hospital, doctor and dentist available.
REGULATIONS: Camp Lloyd is an American Defence Area and is restricted. American supply ships have preference in mooring at all installations.
AIRPORT: Heliport.
AUTHORITY: The Royal Greenlandic Commercial Representative – Harbour Master.

SUKKERTOPPEN: 65.25 N. 52.54 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour situated on S.E. side of Manitsoq island, and has Atlantic quay.
CONDITIONS: *(a)* Tide: height of average high water 4.2 m. (max. 4.8 m.), low water 2 m. *(b)* Ice: Winter ice occurs from December to April. *(c)* Wind: advisable not to enter harbour area if winds are strong. Most obstructive winds are storms from South or S.W.
ENTRY: Port open day and night, normally all year round.
PILOTAGE: Pilot is arranged by cable to Sukkertoppen radio when giving ETA, which should be sent well in advance. Pilot will meet vessel as arranged outside the harbour, or at Faltings Skoer.
TUGS: None. Port motor-boats assist mooring.
MAX. SIZE: Largest vessel that can berth at Atlantic quay is length 100 m., draft 6 m. Vessels up to 4,000 tons have used the port.
BERTHING: Depth in harbour is about 27 m. and alongside Atlantic quay about 6.2 m. Height of quay is about 2 m. above w/l. Cranes up to 5 tons capacity and fork-lift trucks.
WATER: Available at quay.
REPAIRS: Repair workshop for minor repairs.
MEDICAL: Hospitals, doctors and dentist available.
AIRPORT: Heliport.
GENERAL: Telex, telephones, Police, Fire Brigade.
AUTHORITY: Director of Commerce.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Guatemala

CHAMPERICO: 91.55 W. 14.17 N.

DOCUMENTS:
Clearance from Last Port.
Travel Memorandum (original and 4 copies).
Declaration of Maritime Health.
Exemption Certificate of Deratisation.
5 Crew Lists.
5 Passenger Lists or "no passengers" Declaration.
5 Provision Lists.
5 Dangerous Cargo, inflammable or explosives, declaration,
5 Mail Lists or "no Mail" Declaration.
Manifests of Cargo from each port (original and 11 copies).
Bills of Lading from each port.
Vaccination Certificates for whole crew.
12 Ballast Manifests, if no cargo on board.

PILOTAGE: None.
ANCHORAGES: Without limit but recommended *not to anchor* less than 1 km. from beach.
MAX. SIZE: Vessels work cargo at anchorage in depth consistent with vessel's draft.
HEALTH: Give notice of any suspicious illness or fever on board when the doctor comes for official visit.
RADIO: ETA cables through Cristobal CZ.
TUGS: No tugs required.
STEVEDORES: No advance notice necessary. Possible to arrange gangs within an hour.
MEDICAL: Adequate advance notice required depending on gravity of case. Hospital half an hour away and possible to arrange transport for patient, also to arrange for doctor on board. Crew must have current International Vaccination Certificates.
TANKERS: No facilities for tankers.
DENSITY: Changes from 1.0226 gr./cu.cm. in October to 1.0270 gr./cu.cm. in April. Percentage of salt: Changes from 30.5 parts per thousand in October to 36.4 parts per thousand in April. Temperatures: an annual average of 28.5° C.
FRESH WATER: Free within port limits.
FUEL: No facilities.
DEVELOPMENTS: Project to build a modern port with an entrance channel, artificial bay and capacity for 8 merchant vessels and facilities for fishing ships and tourist ships.
GANGWAY/DECK WATCHMEN: When requested cost 5 dollars per person per day.
OPENING/CLOSING HATCHES: Either by crew or by stevedores.
CUSTOMS ALLOWANCES: Without limit on board. Prohibited to take tobacco, wine or spirits ashore.
CARGO GEAR: Ship's gear used for loading/discharging.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Minor repairs only.
REPATRIATION: All facilities available.
AIRPORT: International airport 3 hours distant with regular airlines all over world.
TIME: GMT minus 6 hours. No alterations to clock during year.
HOLIDAYS: No work on 1st January, Maundy Thursday and Good Friday, 1st May and 25th December. The rest of the year work day and night.
POLICE/AMBULANCE/FIRE: All available.
TELEPHONES: Cannot be placed on the vessels.
GENERAL: Possible to supply provisions, especially vegetables and shell-fish at good prices.
SHORE LEAVE: No restrictions.
DELAYS: Some days in April and October the surge is very strong and work has to be suspended.
AUTHORITY: Capitan del Puerto.

PUERTO BARRIOS: 15.44 N. 88.36 W.

DOCUMENTS:
Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List 1 legalised and 7 copies or negatives.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List 3 copies.
Voyage Memorandum 4 copies.
Bills of Lading, 2 sets.
Declaration of Health.

PILOTAGE: Pilot boards 2 miles off Puerto Barrios, from small unmarked launch. If awaiting Pilot, vessel may anchor about three miles North of Puerto Barrios, keeping port entrance clear. No VHF.
ANCHORAGE: In Santo Tomas Bay, depths up to 6 fathoms.
MAX. SIZE: length 600 ft., draft 30 ft.
HEALTH: Advise Agent in advance if any fever or contagious disease suspected on board. Otherwise pratique granted on arrival. Officials board only between 0600 hrs. and 1800 hrs.
RADIO: Coastal radio in Costa Rica, call sign TIM operating on 8485 kc/s.
TUGS: No tugs available.
BERTHING: One pier owned by International Railway used to discharge fuel oil. 1,000 ft. berthing length on each side. A flag is shown on the pier to indicate where vessel will berth. Berthing recommended during daylight hours only. Tankers discharge on South side of the pier.
See Shipmasters Report for Santo Tomao de Castilla
FRESH WATER: Available at the pier.
FUEL: Not available.
MEDICAL: Doctor available. All crew require International Vaccination Certificates.
CUSTOMS ALLOWANCES: Normal daily consumption on board. No tobacco, wine or spirits to be taken ashore.
IDENTIFICATION CARDS: Required.
TIME: GMT minus 6 hours; no alterations during the year.
SHORE LEAVE: Allowed.
AUTHORITY: Commandante del Puerto.

SAN JOSE: 13.55 N. 90.50 W.

DOCUMENTS:
Clearance from Last Port.
Crew List, 1 legalised and 4 copies.
Passenger List, 1 legalised and 7 copies.
Passengers in Transit List, 4 copies.
Cargo manifest, 1 legalised and 19 copies.
Stores/Provisions List, 3 copies.
Voyage Memorandum, 4 copies.
Cargo Check Lists, 18 copies.
Mail List, 7 copies.
Bills of Lading, 2 sets.
Baggage Declaration, per passenger, 4 copies.
Declaration of Health.

PILOTAGE: Not required and no resident Pilots available, except for Tankers where services of a Pilot could be made available upon request.
ANCHORAGE: San Jose is a lighter port (open roadstead). Vessels anchor about 0.25 mile from pierhead in 8–9 fathoms of water.
RESTRICTIONS: Normally no pratique granted after 1900 hrs., although in some instances and if prior arrangements made, vessels could be received by Port Authorities up to 2300 hrs. Tankers moor in daylight only.
MAX. SIZE: Size immaterial since no docking facilities. Cargo transported from vessel to pier and vice-versa by means of steel lighters or barges of 35 tons capacity each. This applies to dry cargo only. Bulk, liquid cargo at respective terminals (oil and oil by-products, imports, and molasses export), where vessels proceed after pratique.
HEALTH: Pratique automatic (0700 hrs. to 1900 hrs.), irrespective of previous port of call. Master's obligation to notify Authorities on arrival of any suspected disease and/or fever on board, in order that adequate precautions taken.
RADIO: Messages should be routed via Guatel.
TUGS: None available or required for manoeuvring vessels.
STEVEDORES: No gangs available after 2100 hrs., unless another vessel is working in port. Rate of discharge/loading: dry cargo: 15–20 tons per gang hour. Max. gangs available: 3. Bulk cargo handled ten times faster.
MEDICAL: Hospital available. No vaccination/fever certificates required.
TANKERS: 2 buoy berths for tankers. Discharging: 8 in. diameter lines. ESSO Terminal: Mooring Master assists berthing. IRCA Terminal: Stern discharge.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None required or necessary.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCES: On board, no restrictions, but no crew member allowed to bring ashore more than amount required for personal use.
CARGO GEAR: Ship's gear used for loading and discharging dry cargo. Vessels must bring own lines to tie lighters alongside.
IDENTIFICATION CARDS: Necessary for those on shore leave.
CONSULS: All Consulates located in Guatemala City, where vessels' Agents, when and if required, have special documents legalised. Normally, however, Agents can take care of regular certifications required, through port officials, who are authorised to certify documents in absence of a consul of a particular nation.
REPAIRS: No facilities available.
REPATRIATION: Possible. Usually arranged by Agents in cooperation with vessel's Agent in Guatemala City.
AIRPORT: Nearest airport Guatemala City, 108 km. due North of San Jose. Daily flights to and from all parts of world.
TIME: Central Standard Time, GMT minus 6 hours. No changes during year.
HOLIDAYS: January 1st; Holy Thursday; Good Friday; Easter Saturday; March 19th; May 1st; June 30th; July 25th; September 15th; October 20th; November 1st; December 24th; December 25th; December 31st.
POLICE/AMBULANCE/FIRE: These can be contacted through Agent at San Jose and/or Guatemala City.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed.
DELAYS: Only 2 dry-cargo vessels can work simultaneously. A third vessel must await departure of 1 of the first 2. Only 1 tanker can work at each bulk liquid cargo terminal.
AGENT: Agencia Maritima, SA, Port Operators, San Jose, Guatemala. Main office: PO Box 385, Guatemala City, CA. Cable address: "Agmar, Guatemala City". Telex not available.

SANTO TOMAS DE CASTILLA: 15.42 N. 88.37 W.

DOCUMENTS:
Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List, 1 legalised and 7 copies.
Passengers in Transit List, 4 copies.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List, 3 copies.
Voyage Memorandum, 4 copies.
Cargo Check List, 18 copies.
Mail List, 7 copies.
Bills of Lading, 2 sets.
Baggage Declaration, per passenger 4 copies.
Declaration of Health.

PILOTAGE: Pilot can be taken on board at 2 stations on ship's request, 1 at Manabique Point and the other 1 mile distant from the Villedo lighthouse.

The pilot station and the Control Office of Maritime Traffic of the Navy maintains listening on R.T. frequencies 2738 k/cs., and 156.8 mHz.

ANCHORAGE: Outside of access channel to Santo Tomas de Castilla the whole N.W. side, approximately area of 2 miles with depth between 4 and 5.5 fathoms.

MAX. SIZE: Max. length 600 ft. Currently the port entrance channel is dredged to enable passage of vessel up to a max. draft of 32 ft.

HEALTH: In case of any contagious illness or fever on board the Sanitary Authority will be informed through respective Agent and vessel will moor to be examined by doctor in charge whether to subject vessel to quarantine or not. No automatic pratique.

RADIO: ETA cables to Agent and Receiver made through Coastal Station in Costa Rica; Signal: TIM on 8485 kc/s. or 8/12 mc/s.

TUGS: Tugs' service not compulsory. Use of tug lines, charge is included in tug service.

BERTHING: Possible to arrive at any time. Vessels work cargo alongside quay 2980 ft. berthing length available.

STEVEDORES: Arrangements made between Agent and ship owner. Agent requests services.

MEDICAL: No advance notice necessary. Hospital facilities available. International vaccination certificate required.

TANKERS: Diameter of pipe-lines 16 in. and load/discharge lines 14 in. No slop discharge facilities. Only 1 mooring berth for tankers and max. draft permitted 30 ft. Also see "Shipmasters Report".

DENSITY: 1015.

FRESH WATER: Pipe-lines alongside quay. Delivered by hoses belonging to port, Rate 15 t.p.h.

FUEL: Available, no advance notice required. (Bunker: 60°, and diesel: 38°).

FIRE PRECAUTIONS: No specific precautions for tankers. Hydrants available to combat fires, besides tug's services and Coast Guard ships of Navy.

GANGWAY/DECK WATCHMEN: Not essential. If necessary provided free by port.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No definite quantity and usually regulated by Captain.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Italy	Germany	Honduras
Holland	Mexico	El Salvador
Sweden		

REPAIRS: Only minor deck and engine repairs.

REPATRIATION: Possible.

AIRPORT: 10 km. distance. Aviateca has daily flights to the capital and to Flores Peten.

TIME: GMT minus 6 hours.

HOLIDAYS: 1st January; 7th March; Maundy Thursday and Good Friday; 1st May; 30th June; 15th September; 1st November; 25th December.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Possible.

SHIPMASTERS REPORT: October 1976

Approaches: No difficulty once position is ascertained approaching the Gulf of Honduras. The Pilot boarded 3 miles North of the Villedo Shoal Beacon. Pilots have VHF Channel 16 call Porto Barrios Pilots. Only 1 pilot speaks English so if he is on duty there is no difficulty in communications.

The lights on the approach beacons are said to be unreliable but all were found to be good radar targets.

At the present time a dredger is working on a new approach channel to give a 32 ft. buoyed channel past Puerto Barrios up to Santo Tomas de Castilla.

General: There is no tug supplied by the Port Authorities but there is a tug working with the dredger which can be hired on request through the Port Authorities. The Pilot advised that this vessel have the tug for berthing as the ship has a 220 degree turn to make in a restricted turning basin off the berth. The same case applied at unberthing where the Pilot considered it necessary to have the tug to swing the vessel out into the departure channel.

The area is still recovering from the severe earthquake some 8 months ago in which the finger pier at Puerto Barrios was destroyed. This now constitutes a submerged hazard while in the channel on the approaches to Santo Tomas de Castilla. The channel is poorly marked and at present there are numerous survey buoys which can be confusing.

The berth is stern to at the Eastern end of the cargo jetty at Santo Tomas using 2 anchors and backing up to 10 ft. off the jetty from where the hose is passed up to the stern line by a mobile crane. The connection is made by the ship's crew. There is a 1 × 8 in. hose for all grades into a 10 in. shore line which is approximately 5 km. long. The requested back pressure of 8.5 kg. was easily maintained using 2 pumps.

AUTHORITY: Port Commander.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Guinea, Republic of

CONAKRY: 09.30 N. 13.44 W.

DOCUMENTS:
7 Crew Lists – Crew list with vaccination date for health service.
5 Passenger Lists.
5 Lists Port of Call (the last ports).
3 Stores Lists.
3 Lists Crew Declaration (personal effects).
5 Manifests of Cargo (if any).
2 Copies of Bills of Lading.

PILOTAGE: Telegraphic address Pilot station: "Harbour Master's Office, Conakry". Pilot meets vessels N.E. of sea buoy Tonnelier.
ANCHORAGE: Safe deep anchorage.
RESTRICTIONS: No entry at night. Channel depth 8 m. MLW.
MAX. SIZE: 600 ft. long. Max. draft for tankers 31–32 ft. high water.
HEALTH: Valid yellow fever and smallpox inoculation Certificates.
RADIO: Conakry Radio 2182-2586 kc/s.
TUGS: Tugs normally connect to starboard side. Ship's lines used.
BERTHING: All tankers berth according to high water. No berthing at night. Berthing 0700 hrs. to 1900 hrs. 10 berths, max. depth 11.5 m.
STEVEDORES: ETA to "Navalguinee" in order arrange gangs.
MEDICAL: Advance notice required for medical service, hospital facilities available.
TANKERS: Pipe-line 5,280 ft. long, 10 in. diameter. 2 tanker berths, 31/32 ft. high-water max. draft at these berths.
DENSITY: 1016 in the port with particular relation to state of tide.
FRESH WATER: Available by connection from pier. Rate of delivery with good pressure 30 t.p.h.
FUEL: Not available.
FIRE PRECAUTIONS: Special fire service for tankers.
GANGWAY/DECK WATCHMEN: Compulsory, particularly for tankers.
OPENING/CLOSING HATCHES: Normally by crew. Stevedores if requested by Master.
CERTIFICATES: Certificate of Deratisation; Log Book.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes out of bond. Wine and/or Spirit, 1 litre of spirit and 1 litre of wine per day out of bond.
IDENTIFICATION CARDS: Necessary.
CONSULS: All major maritime nations.
REPAIRS: None available.
REPATRIATION: All facilities exist for effecting crew changes and arranging repatriation to Europe.
AIRPORT: International airport distant 15 km. served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day (1st January); Women's National Day (9th February); Labour Day (1st May); 1958 Referendum Day (28th September); Independence Day (2nd October); All Saint's Day and Guinea Army's Day (1st November); Anniversary of the Basic Law of 8th November 1964 (8th November); Assumption (15th August); Anniversary of Youth's Creation (J.R.D.A.) (26th March); Christmas (25th December).

Varying holidays which depend on the position of moon: Ramadan – End of fasting; Tabaski – Pilgrimage day at Mecca; Mahouloud – Day after Prophet Mahomet's Birthday.

Work available during holidays, except Labour Day, Independence Day, Ramadan and Tabaski.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 16; Fire 18.
TELEPHONES: Not possible to place telephones on board.
SERVICES: None.
SHORE LEAVE: Crew allowed ashore.
SHIPMASTER'S REPORT *(JULY 1974):*

There are no shore or harbour lights in operation. The Tonnelier Buoy is off station together with all channel buoys other than Nos. 3, 6 and 9 all of which are unlit. There is no plan to replace or re-light these navigation marks.

Only 1 tug is available.

Fresh water can only be obtained by Fire Brigade Tanker truck of 4 tonnes capacity at a cost of £1.60 per tonne. This water if received needs chlorination and boiling before use.

Consuls – There is no British Consular Officer resident in this port. The nearest is located at Dakar in Senegal.

Repatriation of crew members by air is possible but difficult. Procedure is as follows;

Air ticket must be purchased outside Guinea. Airline then advises their office at Conakry that purchase has been made. Airline office at Conakry in turn advise ship's agents when ticket and flight are available. Only then can Immigration formalities be commenced. Entry and exit visas are required and the overall operation may take up to one week.

Time – GMT is kept.

In the rainy season vessels should be prepared for the African Tornado. This usually occurs at night and produces winds reaching 90/100 knots from calm in a matter of minutes. It is as quickly over. The best indication of approach of this weather is a steep rise in the barometer, the highest winds usually Northerly being experienced during the rise.

Vessels berthed at the banana berth should be well fendered as they are subject to considerable movement due to invisible ground swell. A slight starboard list when alongside is an advantage.

SHIPMASTER'S REPORT (MARCH 1975):

Radio: Conakry Radio not working on radio telephony as stated, although same information given in List of Coast Stations. (Freetown Radio helped me with the relaying of my messages to Conakry and Europe).

Fresh Water: Only available by truck loads and after written application to Harbour Master, stating exact amount required. (Water is very expensive).

Identification Cards: Seamen's Books or passports used. (No landing permits issued).

Time: GMT.

AUTHORITY: Harbour Master.

PORT KAMSAR: 10.39 N. 14.37 W. **(See Plan)**

DOCUMENTS:
1 Vaccination List.
5 Crew Lists.
5 Passenger Lists.
1 Crew Declaration (Personal effects) List.
1 Stores List.
5 Last Ports of Call Lists.
7 Manifests of Cargo.
5 Copies Bills of Lading.

To ensure the best possible turn-round for general cargo vessels complete sets of the required cargo documents should be made available to the authorities by hand of the Master. Delays have been occasioned by the late arrival of documents sent by post. It would be of help for the Master to send hatch distribution and the amount of refrigerated cargo, if any, at the same time as ETA.

Quarantine, Immigration and Customs: Representatives of the departments board after the vessel has been made fast alongside. The normal "Q" flag should be flown by arriving vessels.

ARRIVAL ADVICE: Masters are required to send ships ETA, addressed to Shipping Superintendent C.B.G., through Port Kamsar Radio Station, 7 days, 5 days, 3 days and 1 day before arrival at Port Kamsar.

APPROACHES:

Approaches to Rio Nunez: Port Kamsar formerly known as Kakande is located on the East bank of the Rio Nunez river and is approximately 17 km. from the sea.

Vessels bound for Port Kamsar will find there are few natural features to aid a landfall. The most prominent feature is Cape Verga situated to the eastward of the Rio Nunez entrance. This cape can be observed by radar at a distance of approximately thirty miles. At present the light on Cape Verga is extinguished.

To the westward of the Rio Nunez entrance are the Compony shoals and Conflict reef. These are screened by a series of light buoys and vessels approaching from the West should keep them well on the port hand.

Another prominent feature is Gonzales Rock on the starboard side close to the entrance to Rio Nunez. During daylight the hull and superstructure of a wreck stranded six cables North East of the old Gonzales light structure is visible and may be picked up by radar at a distance of between ten and fifteen miles. A light buoy is positioned screening the rocks and is identified as buoy No. VII.

Vessels proceeding to Port Kamsar should anchor and await the arrival of the Pilot in the area bounded by latitudes 10° 26″ N and 10° 28′ N. and longitudes 14° 44′ W. and 14° 46′ W.

Vessels must not proceed beyond 10°28′ N.

Kamsar Buoyage System: Approaches to Rio Nunez Sea-Buoys

VIII	Red cylindrical	10° 29.5′	14° 43.9′	FL. 10 secs	5

Charts of the area are as follows:
British Admiralty:
600 Cacheo River to Iles de los.
1562 Rio Nunez and Riviere Compony.
United States Naval Oceanic Office:
51580 Ponta Caid to Cap Verga.
Service Hydrographique de la Marine (These charts are recommended by the Port Captain):
6148 Embouchure du Rio Nunez.
6228 Acces au Rio Nunez.
6288 Abords du Port Kakande.

Rio Nunez Transit: The channel from the mouth of Rio Nunez to the bauxite loading wharf at Port Kamsar is 17 km. in length and 120 m. wide and is well marked by 21 light buoys. The channel is subdivided into an inner and outer channel. The bottom of which consists of mud and sand.

The inner channel extends from the bauxite wharf to point "F" and is dredged to between 8.25 and 8.50 m. below Reference Datum Level (R.D.L.) which is defined at +0.15 m. above the lowest water registered (British Admiralty Tide Tables L.L.W.S. = 0.00).

The outer channel extending from point "F" seaward is dredged to a depth of 9.00 m. below R.D.L. increasing to a depth of – 12.00 m. from km. 15.3 to the sea.

The turning, waiting basin for inbound vessels is dredged to –7.75 m. below R.D.L. the bottom of which is mainly mud and it is good holding ground.

PILOTAGE: Pilotage service is compulsory for all vessels over 150 ft. OAL. Vessels under 150 ft. OAL will also be required to have a

pilot aboard on their first calls, but may be exempt thereafter by consent of the Harbour Master and approval of the Port Director.

Pilots are supplied from the Director's Office. Pilots board vessels in the designated waiting area, the pilot will pass instructions by VHF radio, aldis lamp or loud hailer from the pilot boat, and when conditions are too unfavourable for a pilot to board the vessel at the designated area the vessel will follow the pilot boat in until conditions are suitable for boarding.

Pilot boats are fitted with VHF radio can be contacted on Channel 16 or 12.

ANCHORAGE: See "Approaches".

MAX. SIZE: Max. LOA 225 m. Shipmaster reported max. draft at LW 42 ft. 8 in.

HEALTH: Authorities board when vessel is alongside the berth. Smallpox, yellow fever and Cholera vaccination certificates required.

RADIO: The Port Radio Station is operated by the Post, Telegraph and Telecommunications Department. The equipment includes a 5 kW. transmitter (both voice and telegraph) with the following frequencies.

A.	*Frequency*	*Power*	*Mode*	*Call Letters*
	6383 kHz	5,000 Watts	A 1	3X0 27
	8702 kHz	5,000 Watts	A 3	3X0 28
	12885 kHz	5,000 Watts	A 3	3X0 29
	484 kHz	1,000 Watts	A 1	3X0 30
	500 kHz	1,000 Watts	A 1	3X0

NOTE: *Watchhours are at the GMT times shown below:*

0800 – 0850	500 kc/s.
0850 – 0950	6383 kc/s.
0950 – 1100	500 kc/s.
1100 – 1200	6383 kc/s.
1600 – 1700	500 kc/s.
1700 – 1800	6383 kc/s.
2000 – 2100	500 kc/s.
2100 – 2200	6383 kc/s.

B. *Port Operations:* VHF Channel 16 and 12. Watchkeeping hours: 0800–1200; 1400–1700 and as required.

C. A further means of communication is through Port Kamsar Post Office through which international connections may be made.

Telegraphic address: BCTR KAMSAR.
Telex : 817 Kamsar.

TUGS: One 825 h.p. tug is on station and will assist vessels in docking and undocking. It is anticipated that a further more powerful tug will eventually be stationed at Port Kamsar.

BERTHING: Located 17 km. from the channel entrance is the bauxite wharf.

The area alongside the wharf has been dredged to a depth of 13.5 m. below R.D.L. Fendering is separate from the wharf proper, and consists of 12 flexible steel dolphins spaced 21.6 m. apart and protruding 4 m. from the face of the wharf.

A vessel proceeding to the bauxite wharf will normally swing off the berth and make fast port side to, heading seaward, during the flood tide. If the berth is occupied the vessel will be anchored in the turning basin to await the berth.

There is a single loading berth at the wharf. The longest vessel berthed had a LOA of 225 m., which is considered to be the maximum length permissible.

The mobile shiploader has a travel of 165 m., and an outreach of 21 m. from the outside face of the fendering. It is rated at about 4,000 tonnes/hour.

A vessel's air draft, i.e. distance from the waterline to the top of the hatch coaming, must not exceed 11.28 m. at Highest High Water.

Weight of bauxite loaded is determined by a formula using deadweight survey and weightometer. The weightometer is used for loading runs.

Stowage factor of the dried bauxite is 28.

Bauxite vessels sail from Port Kamsar during the flood tide. Maximum departure draft is regulated according to tidal conditions.

Facilities for the discharge of petroleum products are also available on the bauxite wharf. Attached to the shiploader is a chicksan arm with an eight inch connection. This feeds 2 main lines, one 16 in. line for Bunker "C", and one 8 in. line for Diesel. Discharge rates average about 450 tonnes/hour at 100 lbs. per sq. in. back pressure at the ships pumps.

Storage facilities are three 10,000 tonnes Bunker "C" tanks, and two 3,000 tonnes diesel tanks.

There are 2 small general cargo wharves located at the entrance to the Dougoufissa Creek, where vessels of up to 100 m. LOA with a maximum draft of 6 m., may berth. As there is only 3.5 m. at Lowest Low Water, these vessels will be aground at low water periods.

One of these wharves is equipped with a heavy lift crane – derrick with a maximum S.W.L. of 110 tonnes. Safe Working Loads are as follows:–

Radius of derrick (metres)	*Lifting capacity (tonnes)*	*Height under hook (metres)*
16.5	110	29
26	75	23
32 (max.)	45	11

The derrick is also equipped with a secondary hook with a capacity of 20 tonnes.

At the same wharf there is a 4 inch line for the discharge of petrol (gasoline) by coastal tankers. Discharge rates average 50,000 litres/hour. The storage capacity is 850,000 litres.

Two 400 tonnes and two 200 tonnes barges are available for loading and discharging midstream.

WIND/WEATHER/TIDE: In the Rio Nunez approach area waves up to 4 m. can be encountered. At the entrance to the fairway or channel they are generally less than 1 m. high during the rainy season, and less than 0.5 m. high in the dry season. Waves and swell in the inner channel and harbour area are generally very moderate.

The tide, in the the proximity of the buoyed channel, runs N.N.E. and S.S.W. at 2.5 knots under normal conditions, but can reach 6 knots during spring tides in the rainy season.

The flood tide runs parallel with the line of the bauxite loading wharf at a speed of up to 4 knots. The ebb tide, augmented by water coming out of the Dougoufissa Creek, runs through the bauxite wharf at an angle of approximately 20° at a speed of up to 6 knots on spring tides in the rainy season, tending to set the vessel off the wharf. It is therefore absolutely essential to tend moorings continuously, particularly on the stern of a loading vessel.

The salinity of the Rio Nunez at the bauxite loading wharf varies between 1013 (rainy season) and 1028 (dry season) at high water.

Port Kamsar has a typical tropical climate, which is characterised by two separate seasons.

Rainy season from June to October

Maximum rainfall	is during July and August mainly at night.
Relative humidity	is 70 to 80% during the day and 90 to 95% at night.
Temperatures	range from 17 to 38° C, with an average of between 22 to 28° C.
Wind conditions	Variable from between South and West, Force 3 to 6 Beaufort Scale. Possible tornados from between North and N.E. with wind reaching force 10 Beaufort Scale for short periods.

Dry season from November to May

Little rainfall.	
Relative humidity	is 30 to 50% during the day, and 80 to 90% at night. There is often coastal fog in the mornings.
Temperatures	range from 15 to 42° C, with an average of between 20 to 35° C.
Wind conditions	Light breezes from the Southwest to West, force 1 to 3 Beaufort Scale.

MEDICAL: Hospital facilities at Port Kamsar are available only on an emergency basis.

TANKERS: See "Berthings".

TIME: GMT.

HOLIDAYS: New Year's Day (1st January); Labour Day (1st May); Anniversary P.D.C. (14th May); Independence Day (2nd October); Victory Day (22nd November); Christmas Day (25th December); Tabaski (Variable date); Ramadan (Id il Fitri) (Variable date).

All Sundays are also declared Public Holidays. The President may also, at his discretion, declare any other day to be a Public Holiday.

The loading of bauxite is generally continued without stoppage for Public Holidays.

General cargo will not, except in special circumstances, be worked on Victory Day, Tabaski and Ramadan (Id il Fitri). All other Public Holidays are normally worked.

SHORE LEAVE: Crew members are not granted shore leave at present.

GENERAL: *Stores:* Provisions are scarce and therefore not available to calling vessels.

Gangways: Vessels must provide and attend their own gangways. A vessel berthing at the bauxite wharf should have its gangway swung out and ready to lower.

Normal practice of the port is for the foot of the gangway to be heaved out and landed on the wharf after the vessel is fast alongside.

Port Directors Office: The office of the Port Director is solely responsible for the operation of Port Kamsar, which includes the provision of Pilotage, tugs and launches.

The Office acts as sole agent for all vessels calling at Port Kamsar, including the normal ships business functions performed by ships agents.

SHIPMASTER'S REPORT: (1974)

Density: Varies from 1013–1028 according to season.

Fresh Water: Available, rate 20 t.p.h. Not recommended as drinking water.

Repairs: Small repairs can be carried out in an emergency.

Airport: Nearest airport is Conakry which is 8 hours away by car.

AUTHORITY: Port Captain.

Guinea Bissau, Republic of

BISSAU: 11.51 N. 15.34 W.

DOCUMENTS:
Entrance Declaration.
Clearance from the last Port of Call.
List of all Passengers on Board, either in transit or disembarking in Bissau.
Provisions List.
List of the Crew Members Effects.
2 Lists of Passengers Baggage.
List of Cargo to disembark in Bissau, Baldeade (Bolama) or otherwise in transit to be disembarked in another port.
List of Cargo (inside sealed envelope).

PILOTAGE: Pilot's base and radio beacon located at Caio Point, (small island at the entrance of Geba's channel). To call the Pilots and/or the radio beacon, send telegram to Servicosmarguine, informing of the ETA at Caio; pilotage is compulsory.

ANCHORAGE: Between Bissau and the Ilheu do Rei.

MAX. SIZE: Draft, 24 ft.

HEALTH: Visit of port doctor compulsory if ship has no doctor, or if permission for exemption has not been required; permission can be requested by radio. When needed, the health services in Bissau can be used by passengers or crew members. Yellow fever and smallpox vaccinations required.

RADIO: Station call sign CQF weekdays on at 0900, 1300, 1600, 1800 hrs. GMT. Sundays 0900 and 1100 hrs. GMT. Frequency 500 kHz, CW.

TUGS: 1 tug of 320 h.p. and 1 of 800 h.p. available.

BERTHING: Ponte, Cais de Bissau, length 131 m., width 25 m., depth 8 m. 1 lifting crane with a max. lifting capacity of 25 metric tons. 1 lifting crane with a max. lifting capacity of 15 metric tons. 7 lifting cranes with a max. lifting capacity of 1.5 metric tons.

STEVEDORES: 1,500 stevedores available for loading and unloading cargo.

FRESH WATER: Available; pumping rate, 10 t.p.h.

FUEL: Diesel available; pumping rate, 6 t.p.h.

CONSULS: Belgium, tel. 3737; France, tel. 2470; Lebanon, tel. 2737.

REPAIRS: Small repairing work can be done on machinery or ship's hull.

AIRPORT: 7 kms. from Bissau; 3 flights to Lisbon per week.

TIME: GMT minus 1 hour all year round.

HOLIDAYS: 1st January; 10th June; 5th October; 1st November; 1st, 8th and 25th of December.

POLICE/AMBULANCE/FIRE: Police, tel. 3925; Ambulance and Fire, tel. 2222.

TELEPHONES: Line connection land-ship, if requested to the Post Office authorities.

AUTHORITY: Port Director.

AGENT: Guinemar Sociedade de Agencias e Transportes da Guine, Lda. Rua Dr. Oliveira Salazar, 4, Bissau. Tel. 2675-3022/3. After office hours 3658. Cables: Guinemar Bissau.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Guyana

ESSEQUIBO RIVER (Bartica): 06.24 N. 58.37 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

Essequibo light (steel framework tower with red and white horizontal bands) marks seaward end of Essequibo main ship channel. Vessels in vicinity of Demerara Pilot station should listen for pilot boat on VHF Channel 16.
RESTRICTIONS: The Essequibo Bar is composed of hard mud and sand. The least depth of water is 3 ft. less than for Demerara Bar. Vessels should not attempt to cross the Essequibo Bar drawing more than 3 ft. less than that predicted for the Demerara Bar.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s. 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
MEDICAL: Hospital at Georgetown and Bartica. All crew members need valid smallpox vaccination certificates.
DENSITY: 1000, fresh water.
FRESH WATER: Not available.
FUEL: Not available.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS: At Georgetown.
REPAIRS: Government dry dock situated at Mazaruni, approximately 40 miles up river at junction of Essequibo and Mazaruni rivers. Extreme dimensions; 160 ft. by 35 ft.
AUTHORITY: Transport and Harbours Department.

GEORGETOWN: 06.49 N. 58.10 W.

PORT LIMITS: Seaward by an arc of a circle with radius 1 nautical mile, with the Georgetown lighthouse as centre.
DOCUMENTS:
Certificate of Registry.
8 Crew Lists.
8 Provisions and Stores Lists.
4 Passenger Lists.
Customs Documents:
2 Reports of Ships Stores (Form C1).
2 Lists of Crew Personal Effects (Form C2).
1 List of Unmanifested Cargo (Form C3).
12 Health Declaration Forms (W.H.O.2)
Health Documents for Crew (1 copy for each Crew member).
5 Cargo Manifests.
5 Bills of Lading
PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at Pilot station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in North-Western quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 50 ft. in length.
ANCHORAGE: There are 5 with a least depth of approximately 20 ft. MLW named A to D from North to South. Vessels are safely anchored at any of the above anchorages 1.5 to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.
RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.
MAX. SIZE: Draft 21 ft. 6 in.
HEALTH: Radio Pratique is not given, and pratique is only given at Georgetown. This does not normally involve a visit from the Health Authorities if the vessel is clear. Pilot may grant pratique if vessel has just arrived from a British port, and if vessel has not been to a Central or South American Spanish-speaking port or French-speaking port (West Indian or otherwise) or any of the ports of New Orleans, Mobile or Tampa within 4 weeks of its arrival at the Pilot station. If a vessel is "suspect" or "infected" Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Beacon as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.
RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kc/s., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF on Channel 16, HF 2738 and SSB 8281.21 kHz.
TUGS: At present, vessels dock stem on to the tide without aid of tugs.
BERTHING: There are 14 main wharves all privately owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 to 20 ft. at low water springs, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.
BULK HANDLING FACILITIES: The sugar berth is 416 ft. in length with least depth alongside of 18 ft. MLWS and can accommodate vessels up to 530 ft. in length. Loading rate is 500 t.p.h. using 2 chutes. Vessels should not be more than 63 ft. beam.
STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 1600 and 1900 and they earn time-and-a-half or double time on public holidays according to which one of the 12 public holidays they work.
MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available. All crew members need to have valid smallpox vaccinations certificates on entry.
TANKERS: There are no residue discharge facilities at this port. There are 5 tanker berths in the Georgetown area.
Rome Terminal (Shell) – depth alongside is 15 ft.
Ramsburg Terminal (Esso) – depth alongside 16 ft.
Timehri Terminal – depth alongside 16 ft.
DENSITY: Average density in port is 1015, though during the rainy season (March-May; October-December) density of water may be as low as 1000 at low water in the harbour.
FRESH WATER: Fresh water is available, and is delivered alongside. The ship is required to pay for labour, overtime, etc., involved in the delivery.
FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before high water and leave not later than 1 hour after high water at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.
CONSULS:

Belgium	France	China (People's Republic)
Brazil	India	Sweden
Canada	Italy	Trinidad and Tobago
Columbia	Mexico	United Kingdom
Costa Rica	Netherlands	U.S.A.
Denmark	Norway	Venezuela
Eire	Panama	

FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload.
DEVELOPMENTS: Proposals are in hand for the dredging of the Demerara Bar and the Georgetown Harbour to permit entry of ships up to 27 ft. at high water.
GANGWAY/DECK WATCHMEN: Services of watchmen are necessary and can be obtained through a watchman's pool by ships' Agent.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of half-a-pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*
IDENTIFICATION CARDS: Not required.
REPAIRS: Every type of deck or engine repair is undertaken at Sprostons dry dock. Above waterline and engine-room repairs of any type are undertaken on vessels exceeding the dimensions mentioned below while vessel is anchored in the stream.
DRY DOCKS: Sprostons Dry dock: A graving dock 210 ft. × 37 ft. 9 in. at entrance situated South of Sprostons No. 2 Wharf, which is privately owned and operated on normal commercial lines. 198 ft. length of dry dock is on blocks. Breadth: top 46 ft. 4 in., bottom 40 ft. 9 in., depth on sill at HWOST 92 ft.

Government Dry dock: Situated at Mazaruni approx. 40 miles upriver at junction of Essequibo and Mazaruni rivers is a graving dock and has extreme dimensions of approx. 160 ft.×35 ft.
REPATRIATION: Can be arranged.
AIRPORT: Timehri International Airport is situated approx. 30 miles South of Georgetown with highway connection and is served by many intercontinental airlines.
TIME: 3 hours 45 minutes behind GMT. No alterations made to clocks during the year.
HOLIDAYS: New Year (January 1st); *Eid-ul-Ahza; *Phagwah; Republic Day (Feb. 23rd); Good Friday (April 12th); Easter Monday (April 15th); Labour Day (May 1st); *Youman Naubi; Commonwealth Day (First Monday in August); *Deepavali; Christmas Day (December 25th); Boxing Day (December 26th). *Religious holidays are variable.
POLICE/AMBULANCE/FIRE: Tel. 3211, Emergency 999; Ambulance 2411, Emergency 999; There are Police/Ambulance/Fire Stations on the waterfront.
TELEPHONES: Only connected to naval vessels.
SHORE LEAVE: Allowed.
AUTHORITY: Transport and Harbours Department.

LINDEN: 06.00 N. 58.17 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 12 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.
From Georgetown to Linden, Pilot not compulsory, but advisable to use Sprostons Pilot.
RESTRICTIONS: Governed by depth of water at Demerara River Bar. Entrance normally at high-water.
ANCHORAGE: Vessels proceeding to Linden in ballast and drawing less than 15 ft. may anchor at Southern limit of Georgetown in depth of 20 ft. MLWS.
MAX. SIZE: Draft 21 ft. 6 in.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s., 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: There are 2 bauxite berths accommodating vessels of up to 570 ft. One loader for metal grades has an airdraft of 29 ft. 8 in. and a loading rate of 800 t.p.h. The second loader for calcined bauxite has an airdraft of 34 ft. and a loading rate of 350 t.p.h.
The Alumina berth has a travelling tower with an airdraft of 64 ft. and a loading rate of 400 t.p.h.
MEDICAL: Hospital at Georgetown, 59 miles distant. All crew members need valid smallpox vaccination certificates.
DENSITY: 1000, fresh water.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS/REPAIRS: At Georgetown.
AUTHORITY: Transport and Harbours Department.

NEW AMSTERDAM (Everton, Berbice): 06.14 N. 57.31 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to Pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light. Pilots may also board ships bound for New Amsterdam within 5 cables Westward of Berbice Light. This beacon marks the seaward end of the channel and is to be passed on the port hand when entering.
RESTRICTIONS: The Berbice Bar is composed of fairly hard mud. Vessels may cross the Berbice Bar on even keel loaded to 3 ft. less than the Demerara Bar predictions.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kc/s. Georgetown Lighthouse operates VHF on Channel 16 and HF on 2738 kc/s., 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
BERTHING: The Bauxite berth is about 1,500 ft. long, and has a fixed loading arm with an average loading rate of 500 t.p.h. The airdraft is 36 ft. Vessels berth starboard side alongside.
There is a strong ebb current of about 4–5 knots, although the flood runs at about 1 knot.
MEDICAL: Hospital at Georgetown. All crew members need valid smallpox vaccination certificates.
DENSITY: 1000, freshwater.
FRESH WATER: Can be supplied.
FUEL: Can be supplied.
DEVELOPMENTS: Proposals in hand for dredging Berbice Bar.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS/REPAIRS: At Georgetown.
AUTHORITY: Transport and Harbours Department.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Haiti

CAP HAITIEN: 19.46 N. 72.12 W.

GENERAL: For all general information refer to "Port-au-Prince".
APPROACHES: The current is about 3 knots in the entrance to the port when the river is in flood.
ANCHORAGE: Vessels which are unable to moor alongside because of deeper draft are anchored off the wharf.
BERTHING: The wharf at Cap Haitien was constructed by the Compania Industrial Maritima. The construction is in reinforced concrete. It extends for a length of 900 ft. in an Easterly direction and comprises 3 sections. The most important section is 600 ft. long and has berths for deep sea vessels on the South side in depths of 30 ft. The Western section, nearest the shore, is 300 ft. long with variable depths of 7 to 9 ft. alongside, with berths for motor vessels of small tonnage and sailing ships. The central section accommodates the customs offices. 2 metal warehouses border the East and West ends of the wharf. Between the warehouses is 1 fixed crane of 30 tons capacity.
FRESH WATER: Fresh water is available at Cap Haitien.
FUEL: Available, only in drums.

MIRAGOANE: 18.25 N. 73.04 W.

GENERAL: For all general information refer to "Port-au-Prince".
BERTHING: The facilities at Miragoane are 1 small jetty for loading and discharging general cargo with a depth alongside of 18 ft. max.

There is a wharf for loading bauxite, belonging to the Reynolds Company, with a depth alongside of 34 ft. Total annual export about 350,000 tons.

PORT-AU-PRINCE: 18.33 N. 72.21 W.

APPROACHES: The port of Port-au-Prince is situated at the extreme S.E. of the bay. It can be approached from the North and from the South by 2 channels.

One may approach from the N.E. by the Saint-Marc channel or from the West by the Gonave channel, between Trou-Forban Point and the village of Ca-Ira. The bay extends between Trou-Forban Point in the North and the village of Ca-Ira about 20 miles to the South. The position of Ca-Ira is 18° 32′ N. 72° 39′ W. From Ca-Ira the South coast of the bay extends about 2 miles N.E. and about 12 miles East to Pointe Lamentin.
PILOTAGE: Pilotage is compulsory for all movements of ships in the port. The Pilot boards to the West of the fairway buoy and is accompanied by port officials, i.e. Port Doctor and Representatives of Immigration, Police and Customs. These officials insist on using the accommodation ladder to board the vessel. Masters must arrange with their respective Agents the time which they will require a Pilot to leave the port. If they are ready to depart before the hour arranged they may call the Pilot by 3 blasts of the ship's whistle.
ANCHORAGE: Vessels must anchor to the West of the large red buoy number 29 or at the quarantine buoy, situated about 0.5 mile N.N.W. of buoy number 29. A bottom of sand over coral is to be found all over this region in depths of 10 to 18 fathoms.

Vessels may anchor or depart at any hour of the day or night.

In order to facilitate the rapid movement of vessels, these are normally anchored in order of arrival.
WEATHER: The bay of Port-au-Prince is nearly always calm except at certain times of the year; for example, during the months from May to November, occasional strong winds may interrupt normal loading and discharging movements.

A light breeze from the East or N.E. blows after dawn, but in the afternoon a breeze 3 times stronger blows in the opposite direction.

The height of the tide is only 1.5 ft. Currents in the port are almost negligible, except that, when mooring or unmooring a vessel, one should pay attention to a Northerly current of about a quarter of a knot.
RADIO: All deep-sea vessels which enter the territorial waters of Haiti are obliged to advise the Port Radio Station.

The radio station is situated at the Bureau de Port. It is in operation 24 hours a day.

Visual light signalling may also be carried out as far as it is possible to do this.

The following apparatus is used at the radio station:

1. VHF Channels 11, 12, 13, 14 and 16, power 50 watts, range 40 miles.
2. Medium frequency "Pearce-Simpson" amplitude moderation, frequencies 2,182 kc/s., 2,738 kc/s., power 85 watts, range about 200 miles.

In addition to the VHF Channels, the Pilots may use radio-telephone on the following frequencies:

2,182 kc/s., 2,638 kc/s., 2,738 kc/s., 2,770 kc/s., and 2,806 kc/s.

All messages addressed to the Port Authorities and messages concerning pilotage must be handled at this radio station.

Masters are particularly required to give the radio station, as soon as they arrive, the following information:

Vessel's draft and net tonnage, amount of cargo for discharge, number of gangs required.

The telephone number of the radio station is 23235.
TUGS: The port has at present 1 small tug. At all times 2 wooden mooring launches, each 32 ft. long, are available for Pilot's use.
BERTHING: For passenger cruise liners there is a concrete finger pier, length 888 ft., with berths on both sides, with depth alongside of 30 ft.

The commercial quay is a construction of reinforced concrete supported by wooden piles, encased in concrete, with traverse wooden fendering.

The quay is orientated in an East-West direction and is constructed in 3 sections.

Quay No. 1 – South side – length 453 ft. with depth alongside of 12–17 ft.
Quay No. 2 – central sections – length 540 ft. with depth alongside 17–23 ft.
Quay No. 3 – Seaward section – length 640 ft. with depth alongside 23–28 ft.

There is an angular portion of 100 ft. between Quays No. 1 and 2 which may not be used for mooring, but which the bow of the ship may overhang. Vessels must be secured by at least 2 mooring cables at the bow and at the stern.

The Port Authorities require for vessels manoeuvring in the port a minimum of 2 ft. of water under the keel. This regulation may be modified by special authorisation of the Chef de Port.

In addition to the public pier, there are 5 jetties belonging to private companies used for handling products in bulk. These jetties belong to the following companies:

A. La Hasco, sugar refinery established at Port-au-Prince.
B. La Minoterie, flour mill situated at Laffiteau.
C. Le Ciment d'Haiti SA, cement factory situated at Fonds Mombin.
D. Jean Ackmed, fuel installation situated at Simonette.

The above jetties are established on the North side of the bay.

E. Installations of Shell Company and Tropigas on the South side of the bay, equipped with their own mooring buoys for tankers.

CARGO HANDLING: For vessels loading and discharging at the public pier, cargo is transported on railway trucks of 25 tons max. capacity.

1 quay is equipped for container ships. 1 quay is equipped to handle roll-on/roll-off traffic.
STEVEDORES: Loading and discharging of ships is carried out by gangs of private workers who are engaged by the ship's Agents under the supervision of a chief stevedore. The working gangs use the ship's own equipment for loading and discharge.

Handling rates are normally about 15 t.p.h. for general cargo, or about 25 t.p.h. for heavy articles, such as drums, planks, bundles of steel rods, etc.

Normal working hours in the port are from 0700 to 1900 from Monday through Saturday. Overtime is payable for work required at other than these hours and also for work required on Sundays and holidays.
FRESH WATER: Drinking water is available in the port; however, the ship must provide its own connections. Rate of loading varies from 4 to 10 t.p.h.
FUEL: There is no service for coal bunkers. Fuel oil may be supplied by barge.
REPAIRS: There are no proper facilities for ship's repairs although minor repairs may be effected by small private workshops ashore. There is a small dry dock at Bizoton about 1 mile from the port, with a capacity of about 1,000 tons and able to receive vessels up to 175 ft. in length. This yard is managed by the Haitian Army Coast Guard.
MEDICAL: There are adequate medical facilities, pharmacies and hospitals.
AIRPORT: An international airport for jet planes connects Haiti with Principle U.S. and Carribean points. A local air service connects Port-au-Prince with principal towns of the Republic.
FIRE-FIGHTING EQUIPMENT: The Port Authority does not own any equipment for fire-fighting or assisting vessels in need. However, there is a town fire service organised by the Army.
HOLIDAYS: *Legal Holidays:*

Independence Day (1st and 2nd January); Labour Day (1st May); Flag Day (18th May); Ascension Day; Assumption (15th August); All Saints (1st November); Commemoration Day (13th November); Discovery of Haiti (5th December).

Authorised Holidays:

Lundi-Gras (half-day); Mardi-Gras; Good Thursday; Good Friday; Pan-American Day (14th April); President's Day (22nd June); Dessaline's Anniversary (17th October); United Nations Day (24th October); Fete des Morts (2nd November).
SERVICES: Fresh provisions are obtainable locally.

There are no facilities for refuse collection, but nevertheless it is forbidden to throw refuse, cinders or any other polluting material overboard.

Launches used for the transport of tourists are available at Port-au-Prince and these are operated by private companies. The Port Authority does not take an active part in the traffic of tourist passengers. Those who disembark on the wharf from cargo vessels or cruising liners must make their way on foot to the taxi station to take part in excursion tours. However, the majority of tourists coming on passenger liners anchored in the roads disembark by launches belonging to the Department of Tourism. They disembark at the Quai Colomb, which is under the authority of the Department of Tourism.
DEVELOPMENTS: New port facilities are presently under construction, located 800 ft. North of and parallel to the existing pier. Initial usable facilities are to be available in November 1977

with final completion in May 1978. Prime features of the new facilities are:
Length of berthing space 1,400 ft.
Width of apron 93 ft.
Container crane on rails on the apron with 30 ton capacity.
Depth alongside, 32 ft.
One additional ro/ro platform. Two metal and concrete, clear-span, transit sheds, each 60,000 sq. ft. Paved open storage area and roadways approximately 25 acres.

SHIPMASTERS REPORT: (December 1975)
Documents:
Clearance from last port.
4 Crew Lists.
4 Passenger Lists
2 Cargo Manifests
18 Cargo Check lists
International Declaration of Health
Vaccination/Inoculation List (1) with valid dates.
International Vaccination Cards, these may be examined by Port Health.

Pilotage: Compulsory, 24 hour service arriving/departing. Require ETA to Agent 24 hours in advance. May be contacted on voice radio 2738 kHz. Pilots board at quarantine anchorage buoy. Pilot boat has black hull, with yellow superstructure. 2 ft. freeboard. "Pilot" clearly painted on hull.
Anchorages: The harbour affords good anchorage in depths of 5 to 14 fathoms, clear of the entrance ranges southward. The Quarantine Anchorage is located about 2.5 miles East-northeastward of Pointe Lamintin.
Restrictions: See Sailing Directions for Prohibited Anchorages.
Max. Size: This ship is 495 ft. in length, with 69 ft. beam, we were accommodated easily. Passengers ships of 620 ft. in length are regular callers at the port. Maximum depths at the pier is 30 ft. Mean High Water Interval at the port is 08H 23M. Spring tides rise 1.5 ft. Currents in the approach set East in the Canal de la Gonave, and Northwest in the Canal de Saint Marc. All buoys, lights, and navigation aids are unreliable.
Health: Pratique is now granted at the dock. Ship displays "Q" flag until cleared.
Radio: ETAs to Agents/receivers are best sent through WNU (Tropical Radio) at New Orleans, Louisiana or ITT station at Lantana, Florida, these stations then telex direct. Port Pilots will relay messages to Agents on voice radio 2738 kHz. Short range reception on voice radio has been experienced.
Tugs: None available at this time.
Berthing: Main pier, has 1,700 ft. of berthing space on its Southern side with depths of 18 to 29.5 ft. Ship's always berth port side to, using the starboard anchor to assist in docking and undocking. A T-head pier with a pipe-line is located 2 miles Westward of the city. Mooring buoys lie off the end of this pier. It has been reported, (unverified) that this pier accommodated a tanker 560 ft. long, with a draft of 31.5 ft. in 1957.
Stevedores: Advise Agent tons per hatch at least 24 hours prior to arrival. Maximum amount of labour is available. Rate of discharging/loading is approximately 18 to 30 tons per gang hour on sacks, bales, cases, general cargo. Work after midnight is overtime with charges quite high.
Medical: Give Agent prior notice for any required medical attention. 3 hospitals available. Minor dental work can be accomplished. International Certificates with Cholera and Smallpox are required.
Density: 1025 as per this ship's test.
Fresh Water: None available at this time.
Fuel: None available at this time.
Developments: A 25 million dollar port expansion and construction project commenced October 1975 and should be completed October 1978. This new area is located 800 ft. North of the general cargo pier. From the shore in a Westerly direction the new pier shall extend 1,685 ft. in length, 469 ft. in width, with a working apron on the South side 81 ft. from the end of the ship's side. The pier will contain 2 warehouses; one 207 by 1,101 ft., and the other 180 by 447 ft. The Eastern end shall have 2 separate roll-on/roll-off sections. A container crane on rails shall traverse the entire South side working apron, capable of loads not to exceed 30 long tons. Dredging and filling has commenced and they are working towards a 30 ft. maximum depth at completion.
Gangway/Deck Watchmen: Cost unknown, supplied by Agent. Gangway watchman is recommended. If transit cargo is pilferable, I recommend using crew members for cargo hold security.
Hatches: (Automatic hatches) opening/closing normally carried out by stevedores with crew member supervision.
Customs Allowances: Bonded stores were not sealed, store lists were not required. Ship allowed each crew member 200 cigarettes. Local Customs Officials make no special requirements.
Cargo Gear: All loading/discharging by ship's gear. Fork lifts are available. There is a shortage of pallets and railroad flat cars which are used to accept cargo direct from the ship's gear on the dock. Warehouse space is limited.
Identification Cards: Shore passes not required, none issued by local authorities.
Consuls: United States of America; Panama; Lebanon; Republic of China, France.
Repairs: No facilities available.
Dry Docks: None available.
Repatriation: Possible.
Airport: 1 major airport. Located 40 minutes from the port area. Daily flights to North America. (Miami and New York)
Time: GMT plus 5 hours. No alterations to clocks during the year.
Holidays: December 5th Columbus Exploration Day; Christmas, New Year's Eve, New Year's Day. Cargo work can be arranged on most holidays at overtime rates.
Police/Ambulance/Fire: Utilise Agent for emergencies of this type, or have watchman make use of telephone from dock. "Fire". There are no international hose fittings on the dock, and limited means of handling shipboard fires from ashore.
Telephones: None available for placement on board the ship.
Services: Special services non-existent.
Shore Leave: Crew members are allowed ashore. No curfews, no passes required.
Port Regulations: Nothing unusual or out of the ordinary.
Delays: Possible berthing delays exist due to ship congestion. Delays in discharging may occur due to lack of warehouse space, pallets, or rail cars.
Agents: Agents and most officials including watchmen and stevedore supervisors speak English. All official documents and ship's clearance papers are written in French. The language spoken is predominately French (patois) with inflections that are easy on the ears, but difficult to utilise operationally.
AUTHORITY: Administration Portuaire de Port-au-Prince.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Honduras

AMAPALA: 13.18 N. 87.39 W.

DOCUMENTS:

Maritime Declaration of Health.
Crew List, 3 legalised and 7 copies.
Provisions List, 3 legalised and 7 copies.
Passengers Disembarking List, 3 legalised and 7 copies.
Passengers in Transit List, 3 legalised and 7 copies.
Voyage Memorandum, 6 copies.
Cargo Manifest, 2 legalised and 14 copies.
Cargo Tally Books, 15 copies.
Mail List, 4 copies.

Documents are legalised at loading port by Honduran Consul or consul of friendly nation. If no consul, then by the Port Captain. 2 copies of Cargo Manifest, Freight List, Bills of Lading, and Stowage Plan should be airmailed to Agent in advance.

If documents legalised by the Port Captain, 1 copy of each manifest should be sent by airmail to "Secretaria Economia y Hacienda Tegucigalpa", and "Custom House, Amapala".

Shipmaster's report: Papers required for entering as follows:

10 Spanish Crew Lists with I.D. Nos.
10 Passenger Lists.
10 Store Lists.
3 Memorandum of Voyage.
1 Maritime Declaration of Health.
5 Mail Reports (only if carrying mail).

I.D. books asked for and checked with crew list. Bond not sealed. Shop not sealed.

PILOTAGE: Pilot available, to be ordered by Agent in advance.
ANCHORAGE: Open anchorage area in depths up to 32 ft.
RESTRICTIONS: Vessels enter and leave at high water only, max. recommended draft 28 ft.
MAX. SIZE: Vessels up to 10,000 g.r.t. have entered, with 30 ft. draft.
HEALTH: Vessels are cleared by Health Inspector on arrival. International Health regulations apply.
RADIO: Contact via "Tropical Radio".
TUGS: None available.
STEVEDORES: Arranged by Agent. Working hours 0700–1200 and 1300–0700.
MEDICAL: No hospital facilities. Only minor cases can be dealt with locally.
FRESH WATER: Not available.
FUEL: Not available.
IDENTIFICATION CARDS: Not required.
CONSULS: San Salvador, Nicaragua, and Peru represented locally.
REPAIRS: Not possible.
TIME: GMT minus 6 hours, no alterations during year.
SHORE LEAVE: Allowed, no restrictions.
SHIPMASTER'S REPORT:

(1) I found that the safest approach is through the passage between Isla Conchaguita and Isla Jeanguera. It is also the best place to anchor and wait for a Pilot.

(2) The Charts covering this port do not appear accurate, and no further approach towards Amapala should be made without the guidance of a Pilot or a boat.

(3) There are no buoys, and the light on Isla Caracolita is extinguished.

(4) The passage from anchorage towards Amapala along the West Coast of Isla Del Tigre is very narrow and water depth recorded by ship's soundings gave only 24 ft. in places, with a maximum of 30 ft. There is room only to swing the ship on her axis.

(5) Pilot is available, or otherwise there is a boat guiding vessel into Amapala.

(6) Cargo operations are performed at anchorage about 3 cables from Amapala. Cargo is discharged into barges. Stevedores are not very professional and cargo damage may be expected. Many stevedores work in bare feet and thus accidents on board may be expected.

AUTHORITY: Port Commander.
AGENT: Servicios Portuarios S.A. de C.V. Cables "Seposa Amapala."

PUERTO CORTES: 15.50 N. 87.55 W.

DOCUMENTS:

Health Declaration. 2 copies.
Zarpe or Clearance Permit from the Last Port.
General Cargo Manifest (in ballast if that is the case) of all the cargo to be discharged in Puerto Cortes, and 14 copies.
Crew List and 10 copies.
Passengers in transit, or no passenger declaration and 10 copies.
Deratisation Certificate, only in first call.
Stores List and 8 copies.
Mail Sacks declaration (negative or positive).
Bills of Ladings (if some cargo is coming) 3 complete sets.
Hatch list and 5 copies.

All the original documents must be signed and stamped by the Honduran Consul at the port before calling Honduras and should be made in Spanish.

If no consul of Honduras available, documents to be legalised by consul of a friendly nation or by the Chamber of Commerce, stating the facts.

PILOTAGE: Compulsory for vessels over 300 g.r.t. ETA to the Agent, 72, 48 and 24 hours ahead of arrival required. Pilot on VHF Channels 16 and 6.
ANCHORAGES: Once the ship enters the bay, *if no berth space has been notified to the Master*, she should anchor at a distance beyond 0.5 miles from the nearest pier, and wait for the boarding of the official party to be granted free pratique.
ENTRY RESTRICTIONS: Vessels may enter the port day or night but not visited by Port Authorities between 2000 hrs. to 0600 hrs., only in special cases.
MAX. SIZE: Dry cargo vessels up to 30 ft. draft. Tankers up to 43 ft. draft.
HEALTH: Pratique granted after Port Authorities (including doctor) board vessel between 0600–2000 hrs. Pratique granted if no contagious illnesses aboard, otherwise quarantine restrictions imposed. No automatic free pratique when arriving from another port of Honduras.
RADIO: Lantana Radio WOE. New Orleans Radio WNU. Limon R. TIM. Balboa Radio NBA. Miami Radio WAX. Messages routed via Tropical Radio.

Port Authority operates a VHF station HQSU, monitoring on 2738 kHz, but by appointment can reply in any other position. Telegrams to be routed via Tropical Radio. Lanatana WOE. New Orleans WNU. Limon TIM. Balbao BNA. Miami WAX.

Ship's radio not to be used in port except for communication with the port authority. Vessel is fined if there is a violation. Also see VHF.
VHF: Puerto Cortes Radio: Call sign "Cortes Radio". Channel 16.

Hours: Weekdays 0600–2200; Saturdays 0800–1200 and Sundays Nil.

BERTHING: The Agent to supply information as to berth, and time of docking. Pilot will board the vessel and berth it, assisted by a launch to hold ropes. Departure should be effected when the despatch documents are on board and operations finished.

Pier No. 1 (Texaco Pier), for tankers or ships loading diesel or lub-oil; depth 45 ft.
Pier No. 2 (Banana Pier) length is 810 ft.
Pier No. 3 630 ft.
Pier No. 4 1,020 ft.

STEVEDORES: Vessels must give accurate ETA at least 24 hours in advance to enable Agents order necessary gangs. Gangs ordered 0700 and 2100 hrs. working 12 hours (daytime) and 9 hours (night-time) excluding the meal hours (0600–0700; 1200–1300; 1700–1800 and 2300–2330). No work on Holy Friday, May 1st (Labour Day), other holidays work is possible with double payment.
MEDICAL: No advance notice necessary for medical attention, except in very urgent cases. At San Pedro Sula (35 miles by road) you can obtain very good medical service but several medical clinics are serving this Port. No inoculations required but Master should possess International Health Cards for each member of crew.
TANKERS: Discharge at Texaco Oil Refinery, cable address "Reftexa".
DENSITY: 1028/1030.
FRESH WATER: Water available at wharf face at 100 ft. intervals. Rate, approx. 8–10 t.p.h.
FUEL: All grades available. 24 hours notice is required for good service.
GANGWAY/DECK WATCHMEN: Shore watchmen not usually required and this service left to discretion of the Master.
OPENING/CLOSING HATCHES: On liners normally by crew with assistance stevedores, otherwise according Charter Party.
CERTIFICATES: On first call, Registered Tonnage Certificate; thereafter not required unless gross/net tonnage be changed.
CUSTOMS ALLOWANCE: No restrictions, free use on board. Customs officials check no sales shore without special permit.
IDENTIFICATION CARDS: New port regulations includes identification card must be shown to gate watchman when crew members come back aboard.
CONSULS: None in the port. American Consulate at Tegucigalpa, 200 miles by road.
REPAIRS: Local marine repair companies can undertake limited repairs of general nature; pre-advice recommended.
REPATRIATION: All facilities available for effecting crew change and repatriation by sea or air.
AIRPORT: International Airport Ramon Villeda Morales served by regular airlines. 35 miles by road.
TIME: GMT less 6 hours, no changes during year.
HOLIDAYS: January 1st; April 14th; May 1st; Thursday, Friday and Saturday in Easter week; August 15th; September 15th; October 3rd, 12th and 21st; and December 25th. Cargo work can be arranged on those days, except on Good Friday, and May 1st (Labour Day).
TELEPHONES: Not customary except in United Fruit Co. pier (Tela Railroad Company, concessionary of banana pier) where telephones connected on board. Overseas calls may be arranged by Agent.
SHORE LEAVE: Permitted without restrictions.
AGENTS: Agencia Guzman Co. S.de R.L. Cable address "Guzco Puerto Cortes".

Ship Agents, Forwarding Agents, Lloyd's Agents at Honduras. Puerto Cortes, Honduras Central America.

TELA: 15.47 N. 87.30 W.

DOCUMENTS:

1 original Health Certificate.
1 ,, 16 copies Manifest.
1 ,, 11 ,, Cargo Book.
1 ,, 6 ,, Store List.
1 ,, 6 ,, Crew List.
1 ,, 6 ,, Passenger List.
1 ,, 6 ,, Baggage.
1 ,, 4 ,, Voyage Memorandum.

All documents must be in Spanish; Cargo Book should be in alphabetical order.

PILOTAGE: Pilot available if requested. There is a small boat that assists docking by handling mooring lines from vessel to wharf. 48 hours advance notice of ETA required.

ANCHORAGES: 1 mile out from wharf, 100 ft. or more; no boundaries.

MAX. SIZE: Max. permissible length 485 ft., breadth no restrictions, draft 30 ft.

HEALTH: Agents arrange pratique; in case there is a suspicion of disease or fever aboard, the vessel will be placed in quarantine for a minimum of 5 days.

RADIO: WNU New Orleans and TIM Puerto Limon via Tropical Radio.

TUG: No tug available.

BERTHING: Time for berthing is from 0600 to 2000 hrs.

General Cargo Berth: East side of pier, starboard side alongside.

Banana Berth: West side of pier, port or starboard side alongside, depending on which side elevator space is required. 4 elevators available, type camel back. Rate per elevator 3,500 boxes per hour.

STEVEDORES: ETA advice should be given 48 hours prior to arrival in order to arrange gangs. Labour rates are subject to surcharge of 25%, 50%, 75% and 100% to cover overtime, depending on hour or day worked.

Gangs: For bananas: 180 men, 3 gangs. General cargo: No restrictions.

MEDICAL: Hospital facilities available, also inoculation, vaccination and certificates.

TANKERS: Discharging lines only, crude 12 in., diesel 6 in., spray oil 6 in. Berth available for 1 tanker, max. permitted draft 30 ft.

DENSITY: Average density in port is 1029.

FRESH WATER: Delivered by hoses at rate of 100 gallons per minute.

FUEL: Available, rate 250 t.p.h.

FIRE PRECAUTIONS: Extinguishers and water hoses available.

GANGWAY/DECK WATCHMEN: Watchmen can be obtained at day-time rates plus 25%, 50%, 75% and 100% to cover overtime, depending on the hour or day worked.

OPENING/CLOSING HATCHES: Work done by stevedores.

CERTIFICATES: Health and deratisation certificates needed.

CUSTOMS ALLOWANCES: 1 carton cigarettes and 1 bottle wine or spirits for each man.

CARGO GEAR: Must have current valid certificate.

IDENTIFICATION CARDS: Cards needed.

CONSULS: None.

REPAIRS: Only minor repairs.

REPATRIATION: Repatriation can be made on request by Master.

AIRPORT: Distance from wharf to airport is about 80 km. served by regular airlines; 4 flights per day which connect with Panamerican every day.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st, work impossible; April 3rd, work possible; April 4th, work impossible; April 5th, work possible; April 14th, work possible; May 1st, work impossible; September 15th, work impossible; October 3rd, work possible; October 12th, work possible; October 21st, work possible; December 25th, work impossible.

POLICE/AMBULANCE/FIRE: Contact telephone operator.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Ships must have Honduran flag on board.

SHORE LEAVE: Crew members allowed ashore, providing they do not have any diseases.

DELAYS: Delays can be expected any time there are 2 ships docked.

AUTHORITY: Port Commandant.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Hong Kong

HONG KONG: 22.18 N. 114.10 E. (See Plan)

PORT LIMITS (Approximately): Western Entrance – the N.S. line between S.E. extremity of Tsing Yi Rock and the flashing light at S.W. corner of Green Island. Eastern Entrance – the N.E./S.W. line between the on-shore FL.W and the FL.R lights either side of the Lei Yue Mun Pass.

DOCUMENTS:

Marine Department (arrival)
- Marine Department Shipping Report (Form MO. 144).
- Certificate of Registry.
- Passenger ship: Safety Certificate.
- Passenger or cargo ship: Load Line Certificate.
- Cargo ship: Radio Certificate.
- Cargo ship: Safety Equipment Certificate.
- Cargo ship: Safety Construction Certificate.
- Ship's Articles of Agreement with the crew (if the ship is British, or is a foreign ship belonging to a nation not represented by a consul in Hong Kong).
- Derating Certificate or Derating Exemption Certificate.
- 1 copy of the ship's Passenger List (if specifically requested).
- Clearance Certificate from the Last Port.
- 1 copy of the Import Cargo Manifest (if specifically requested).
- 3 copies of the Dangerous Goods Manifest (if applicable).
- Compulsory Insurance Certificate (Tankers).

Note: All the above documents/forms must be submitted to the Port Control Division of the Marine Department within 24 hours of a ship's arrival with the exception of the Dangerous Goods Manifest which should be submitted at least 48 hours prior to the vessel's arrival.

Marine Department (departure)
- Application for Port Clearance (Form MO. 7).
- 3 copies of the ship's export Dangerous Goods Manifest (if specifically requested).
- 1 copy of the ship's Export Cargo Manifest (if specifically requested).

Port Health Officer (arrival only)
- Maritime Declaration of Health.
- 1 copy of the ship's Passenger List.
- 1 copy of the Crew List.
- Derating Certificate or Derating Exemption Certificate (whichever is applicable).
- International Vaccination Certificate against smallpox for each passenger and Crew member on board.

Note: The above documents/forms must be produced for the inspection of the Port Health Officer on boarding at the quarantine anchorage.

Department of Commerce and Industry (arrival and departure)
- 2 copies of the ship's Import/Export Cargo Manifest.
- 2 copies of Import/Export Statement in respect of dutiable goods (Forms C. and I. 309 and C. and I. 309A).
- 2 copies of the declaration in respect of dutiable stores required during a vessel's stay in port (Form C. and I. 303).

Immigration Officer (arrival)
- 2 Transit-Passenger Lists.
- 2 Landing-Passenger Lists.
- 3 Crew Lists.

Note: The above forms must be produced for the inspection of the Immigration Officer on boarding after the ship has been 'cleared' by the Port Health Officer.

(departure)
- 2 Lists Passengers boarding.
- 2 Lists Transit Passengers.
- 2 Crew Lists.

Post Office (arrival only)
- 1 copy of the Ship's Mail Manifest.

Hong Kong Police
- 1 copy of The List of Arms and Ammunition on board (Nil return required) to be handed in at the Entry and Clearance Office with Marine Department papers.

ARRIVAL ADVICE: On entering Hong Kong waters shipmasters should contact MARDEP on VHF Channel 12, and report their position, ETA at Pilot station, final berth, and intended route inwards, East or West. If entering from the East then the vessels mast height above the water should also be reported. (This is needed for information to the airport where the runway extends close North of the Hung Hom fairway). Shipmasters are also asked to report any other relevant information such as dangerous goods on board. If the vessel is taking a Pilot, reference should be made to the 'Sailing Directions' in the China Sea Pilot Vol. I, with regard to the positions of the Pilot stations, and Pilots should only be embarked or disembarked at these points. Additional radio reports to MARDEP during the vessels inward or outward passage aid in the safe movement of all vessels in the port and approaches.

APPROACHES: A. (Dry-cargo vessels): The approaches are reasonably free from hazards and are well marked by day and night. Vessels working at buoys with drafts up to 29 ft. are requested to enter port via the Western Entrance. Other vessels with drafts up to 36 ft. by Lei Yue Mun entrance.

B. (Tankers): The tankers which berth at the Esso Company installation at Tsing Yi, and at the Mobil installation, also at Tsing Yi enter the harbour, but with the exception of the approaches to the Esso Terminal which was specially dredged for the purposes of accommodating vessels at 42 ft. draft, there is no limitation on depth save that at the individual berth.

C. Buoyage. The system of buoyage used in Hong Kong harbour conforms to the uniform system of maritime buoyage adopted by the lighthouse authorities in Britain. The main stream of flood tide within the harbour limits is from East to West and buoyage is laid accordingly. Several terrestrial navigational beacons within the waters of Hong Kong are also painted to conform with the uniform system of maritime buoyage.

Compulsory traffic separation lanes are in force for both the East and West approaches. Up-to-date Admiralty charts should be consulted for details.

PILOTAGE: Although pilotage is not compulsory in the port, Pilots licensed by the Pilotage Board are available to board ships at either entrance on request. The Hong Kong Pilotage Association, provide pilotage services. Pilots generally board in-bound ships using the Eastern entrance in the vicinity of the Lei Yue Mun turning buoy (Lat. 22° 16.4′ N. Long. 114° 16.3′ E.) and disembark at the same point from outward-bound ships. At the Western entrance, Pilots embark and disembark to the West of Green Island. It is a contravention of regulation 3(1) of the Merchant Shipping (Control of Ports) Regulations, for any vessel to pick up or discharge a Pilot within a distance of 7.5 cables from the centre of either the Lei Yue Mun Pass or Sulphur Channel. Maximum speed inside harbour, 8 knots.

ANCHORAGES: Examination anchorages (quarantine and immigration) for clearance inwards are situated within the harbour limits to cover the entry of shipping from East and West. The principal dangerous goods anchorages are situated at the Western end of the harbour and at Pun Shan Sek (tankers), whilst there are others at Junk Bay, Tsuen Wan and Rocky Harbour.

An anchorage for the discharge of logs has been designated. This was necessary because logs, which were being discharged and stored within harbour limits were endangering small craft, waterside installations and navigation.

The Western examination anchorage works 24 hours a day whereas the Eastern examination anchorage works from 0700–1900 hrs.

See also "Shipmaster's Report".

MAX. SIZE: Largest vessels calling regularly have been, dry-cargo: container vessels, length 965 ft., with drafts up to 40 ft.; tankers length 776 ft., draft 42 ft. Maximum size governed by draft of vessel. No limit as to length and beam. Draft in harbour: "A" class buoys 25 ft. to 44 ft. "B" class buoys 18 ft. to 27 ft.

PRATIQUE: The following conditions must be fulfilled before radio pratique can be granted: The ship must not have called at an infected port within 14 days prior to arrival at Hong Kong. There must be not more than 24 passengers on board at the time of arrival, provided that a vessel carrying more than 24 passengers may, at the discretion of the Chief Port Health Officer, be granted radio pratique if there is a ship's doctor on board.

The Master must furnish the following information to the Port Health Office not more than 20 hours and not less than 8 hours before his expected time of arrival at Hong Kong:

1. ports of call during the 14 days prior to arrival;
2. number of passengers on board;
3. a statement that all persons on board are healthy and in possession of valid international certificates of vaccination against smallpox;
4. a statement indicating whether any case of infectious disease has occurred on board during the voyage;
5. whether any person on board is sick;
6. the date of issue of the derating or derating exemption certificates.

Note 1: Shipping companies or Agents must send their applications for radio pratique in writing and, if granted, will be responsible for notifying the Master concerned.

Note 2: Maritime declarations of health and passenger and crew lists must be collected by the shipping companies or Agents and forwarded to the Port Health Office within 24 hours of the ship's arrival.

Note 3: Ships granted radio pratique will be required to display the following signal on arrival in the quarantine anchorage: Day: International code flag "TO". Night: 3 white lights in a vertical line 6 feet apart.

Note 4: The Master of the ship concerned will be held responsible for the accuracy of the statements contained in his cablegram requesting radio pratique.

Port Health. The hours of duty of Port Health Officers in the examination anchorages are similar to those of the Immigration Department. The Port Health launch exhibits the international code flag "Q" by day and a red light over a white light at night. The appropriate quarantine signal should be flown by a vessel until the Port Health Officer has completed his inspection.

IMMIGRATION: Immigration formalities take place at the Eastern or Western examination anchorages after clearance by the Port Health Authorities. Immigration launches are on duty 24 hours a day in the Western anchorage and from 0630 to 1800 hrs. in the Eastern anchorage throughout the year.

RADIO: Cable Agent via Radio Hong Kong call sign "VPS".

Signal Stations. 4 signal stations operated by the Marine Department are situated in the Eastern and Western approaches to, or within, the harbour limits as follows:

Eastern approaches: Waglan Island, (Lat. 22° 11′ N., Long. 114°

18.1′ E.). Western approaches: Green Island (Lat. 22° 17.1′ N., Long. 114° 06.5′ E.).

Marine Department Port Communications Centre, Lat. 22° 17.4′ N. Long. 114° 11.8′ E. North Point Signal Station, Lat. 22° 17.7′ N., Long. 114° 11.8′ E.

These stations are manned 24 hours a day throughout the year and contact can be made by means of international code flags or by signal lamp. In addition, the Marine Department Headquarters Signals Station can be contacted by VHF radio-telephone on Hague Plan Channel 12. Communication between the stations is provided by radio, land-line telephone and a teleprinter circuit.

It is mandatory for the Master of every ship arriving within signalling distance of any of the above signal stations to hoist the national colours and (if one shall exist) the house flag and the signal letters of the ship, and to identify the vessel to the signal station by visual signals if requested. On recognition of a ship in the approaches to Hong Kong, the name is immediately relayed to the Port Control Office of the Marine Department, and the ship's owners or Agents can be notified on request.

Wireless Telegraphy: Radio communication apparatus on board a merchant vessel is not permitted to be used while the vessel is within Hong Kong territorial waters except in the following circumstances:

When a vessel is proceeding through Hong Kong territorial waters such apparatus may be used to communicate on minimum power with the nearest coast station or, if communication with the nearest coast station is impracticable and the safe navigation of the vessel so requires, with a more distant coast station or another vessel;

For the purpose of summoning assistance on an occasion of danger to the life of any person or to the vessel;

For the purpose of carrying out experimental tests for which permission in writing must first be obtained.

Broadcasting arrangements – Typhoon Warnings: After the hoisting of local storm signal No. 8 or above, Radio Hong Kong and Commercial Radio will extend their hours of operation and simultaneously broadcast typhoon warnings in English and Chinese at 2 minutes to the hour and half past the hour precisely, throughout the day and night. Warnings in English will be broadcast by an announcer at each station; warnings in Chinese will be broadcast by a Chinese announcer from the Radio Hong Kong booth at the Royal Observatory. On certain occasions these arrangements will come into force should local storm signal No. 3 remain hoisted at the time when the radio stations normally close. The foregoing arrangements continue until the signal drops below No. 8 once again.

Frequencies: Radio Hong Kong (English Service) 545 kHz., 91 kHz.; (Chinese Service) 640 kHz., 94 kHz. Commercial Radio (English Service) 1530 kHz., 196 kHz.; (Chinese Service No. 1) 1050 kHz.; 1170 kHz.

VHF: Control Station, Hong Kong Port Radio call sign "Mardep" Channel 12. 24 hours listening watch. Range up to 35 miles.

Maritime VHF Radio-telephone Service (Hague Plan): This service operates in Hong Kong on 2 international channels, Nos. 16 and 26. Channel 16 (156.8 mc/s) is the simplex distress and calling frequency on which contact is made between shore and ship before changing over to the public correspondence channel, No. 26. The latter is a duplex channel and Hong Kong transmits on 161.9 mc/s and receives from ships on 157.3 mc/s.

Local connection to the service is *via* the Hong Kong Telephone Company and is made in the same way as for overseas radio-telephone calls by dialling "100". The local operator should then be informed that a telephone call is required on "the Maritime VHF Hague Plan Service". The operator will ask for details of the call, such as the name of the ship and the person required, and will then connect the call *via* Cable Wireless. Calls can also be sent from ship to shore. The range is about 50 miles and the service is available at all times of the day and night.

Harbour phones: Cable Wireless Ltd., on behalf of the Hong Kong Telephone Company, will install and maintain VHF radio-telephones on ships at buoys in the harbour for the duration of a ship's stay in port. Calls may be made between any 2 ships so equipped, and between a ship and any telephone number on the Hong Kong or Kowloon exchanges.

Shipmaster's Report: VHF Channel 8 is used for search and rescue.

TUGS: Available for berthing and unberthing. Advance booking is required. See Table B.

WHARVES: *China Merchants S.N. Co. Limited* – berths suitable for coastal shipping:

		Length (ft.)	Depth (ft.)
West Point	Berth No. (1) E.	320	35
	Berth No. (2) W.	320	35
H. K. and Kowloon Wharf Co.			
	Ocean Terminal	1,250	35
	Pier No. (3) S.	600	32
	Pier No. (3) N.	600	34
	Pier No. (4) S.	700	32
	Pier No. (4) N.	700	33
	Pier No. (5) S.	800	34
	Pier No. (5) N.	800	36
North Point Wharves			
	No. (1) E.	700	30
	No. (2) W.	530	30
Kwai Chung Container Terminal			
	6 berths	1,000	40
Whampoa Terminal Ltd.		600	30

BERTHING: Berthing of dry-cargo vessels alongside wharf can be performed any time during day and night. Berthing at tanker wharf not permissible after sunset. Ships carrying explosives must obtain permission from the Marine Department before berthing is allotted.

When berthing at Kowloon Wharf signals will be exhibited on the signal station on top of the Kowloon Star Ferry pier. Code flag Y by day and 1 green light over red light at night indicates anchor and await instructions. Crossed bamboo poles on which are displayed code flags N and B, when sited at the end of a pier denotes that the vessel is required to berth stern to the praya wall.

Boatmen. Labour to handle ships' moorings lines when berthing and unberthing at any of the wharves in Hong Kong waters is supplied by the owners of the wharf concerned, the cost being included in the berthing fee. For berthing at a Marine Department mooring buoy it is usual for the ship's Agent to arrange for boatmen to handle the ship's slip wire and anchor cable, unless the ship's crew undertake this task. The services of boatmen are generally obtained through the Hong Kong Pilotage Association. For night berthing 2 boats are normally required – one to handle the wire and cable and the other to provide a lighted marker for the mooring buoy.

Mooring Buoys. See "Max. size" All ships are required to secure to Marine Department mooring buoys by their chain cable. The maximum length of a ship permitted to berth at an "A" class mooring is 600 ft., the swing circle encompassing each buoy having a radius of 700 ft. The maximum length of a ship permitted to berth at a "B" class mooring is 450 ft., the radius of swing circle around such buoys being 550 ft. It is therefore within the limits of safety for a vessel, when secured to a Marine Department mooring, to slack out to "1 shackle on the windlass" and still clear ships berthed at adjacent buoys, except in exceptional circumstances. As all Marine Department moorings are of the 1-legged type, it is permissible, should circumstances make it necessary, for a ship, when attempting to secure to a mooring, to drop an anchor at not less than 50 feet from the buoy without fouling the mooring chain. It should be noted, however, that moorings sited within the man-of-war anchorage and the Hongkong and Whampoa Dock Company's private mooring H.W.D. No. 1 in Hung Hom Bay are either of the 2 or 3-legged type, and it is therefore not permissible to use an anchor when berthing.

44 "A" class mooring buoys and 29 "B" class mooring buoys for ocean going vessels. Additionally 2 "B" class mooring buoys available at Yam O Bay, Lantan Island, for vessels with cargoes of logs.

STEVEDORES: The following table shows the average handling rates per gang hour:

Cargo	*Place*	*Loads tons per gang hour*	*Discharge tons per gang hour*
General	Wharf	12	15
General	Stream	10	12
Bale or bag	Wharf	20	25
Bale or bag	Stream	15	20

Stevedores work 24 hours per day except Mid-Autumn Festival and Chinese New Year Holidays.

TANKERS: Any leaking of oil to water will be subjected to heavy fines. If not gas-freed, not allowed through harbour. Max. draft for berthing 42 ft. See Table A.

DENSITY: 1017.

FRESH WATER: Available but the supply is sometimes limited, depending on the storage levels in Hong Kong's reservoirs. The supply to ships is made at commercial wharves and from water boats. See Table C.

FUEL: Excellent facilities exist for bunkering vessels with fuel oil and coal. Fuel oil can be obtained either at the wharves adjacent to the oil installation, or from harbour oilers owned and operated by the oil companies. Fuel oil from these vessels can be pumped on board without impeding cargo operations. Adequate stocks of good quality bunker coal suitable for coal-fired marine boilers are maintained in the port. Fuel oil available with viscosity up to 1,000 sec. Redwood. 24 hours notice for supply is required. Also gas oil and marine diesel available. See Table D.

FIRE PRECAUTIONS: The Fire Services Department operates fire floats. One of these, the "Alexander Grantham" is one of the largest and most powerful in the world, being equipped with machinery capable of pumping 10,500 gallons a minute at a pressure of 90 lb. per square inch through a battery of monitors. This vessel is equipped to deal with any type of fire on any size vessel, and is designed to operate both in the port and at sea.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: Following certificates to be presented to the Marine Office before clearance could be granted:

Ship's Register and/or Tonnage Certificate.
Load Line Certificate.
Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Derating Certificate or Derat Exempt Certificate.
Last Port Clearance.

CARGO GEAR: Normal routine gear, wire and rope slings, nets, grabs, boardtrays and floating cranes up to 100 tons available.

Vessel's cargo gear must be used for working cargo at all alongside berths.

IDENTIFICATION CARDS: No identification card is required for crew or passengers going ashore except when vessel has exceeded a limit of stay of 14 days, after this period all Crew members must deliver to the Immigration Office through the Agents a signed copy of the Immigration Disembarkation Card.

Table A. OIL INSTALLATIONS

Company	Location	Length of berth	Depth alongside (Chart Datum)	Grade of oil	Capacity (water tons)	Delivery rate	Hose connection
(i) Shell Co. (H.K.) Ltd.	Kwun Tong	670′	34′	Boiler fuel	4,500	120	6″

CONSULS: The following countries maintain consular offices in Hong Kong:

Argentina	Great Britain	Norway
Australia	Greece	Pakistan
Austria	Guatemala	Panama
Belgium	Honduras	Peru
Bolivia	India	Philippines
Brazil	Indonesia	Portugal
Burma	Irish Republic	Singapore
Canada	Israel	South Africa
Colombia	Italy	Spain
Costa Rica	Japan	Sweden
Cuba	Khmer Republic	Switzerland
Denmark	Korea	Thailand
Dominican Republic	Lebanon	United Arab Republic
Ecuador	Mexico	U.S.A.
El Salvador	Netherlands	Uruguay
Finland	New Zealand	Venezuela
France	Nicaragua	Vietnam
Germany		

REPAIRS: In addition to ship and engine maintenance and repair work, the dockyards have facilities for many miscellaneous services such as are provided by modern dockyards. These include physical tests on materials such as anchors and cables, for which test certificates can be supplied, chemical analysis, drawing office requirements, chemical cleaning of engines and boilers, shot and sand blasting, zinc spraying to name but a few.

DRY DOCKS:

Hong Kong United Drydocks Ltd. (Taikoo Yard): Dry dock at Quarry Bay; length 787 ft. min., width 88 ft. 6 in. Floating dock for vessels up to 25,000 tons.

Hong Kong United Dockyards Ltd. (Kowloon Yard): 10 dry docks of which the largest is length 700 ft., min., width 88 ft.

Island Navigation Corporation – have a 100,000 tons capacity floating dock at the S.W. side of Tsing Yi Island.

REPATRIATION: All formalities connected with engagement and discharge on board British ships, and on foreign ships whose flag is not represented by a consular officer resident in Hong Kong, are required by law to be conducted at the Mercantile Marine Office. Hong Kong continues to be one of the main recruitment centres of Asian seamen and a Seamen's Registry Office, which is an adjunct to the Mercantile Marine Office, maintains records of all Hong Kong seamen. The Seamen's Recruiting Office controls the recruitment, selection and supply of Chinese seamen to ships requiring them, and is situated at the Rumsey Street Reclamation, adjacent to the Marine Department.

Seamen's Travel Documents. The Hong Kong Government Seaman's Discharge Book is issued by the Marine Department and is a record of employment. The Hong Kong Government Seaman's Identity Book is issued by the Immigration Department and enables the holder to return to Hong Kong without a visa during the validity of the book (initially 3 years, with 3-year renewals), and also within 12 months after the expiry of the validity of the book.

A Seaman's Certificate of Nationality and Identity is issued at the Immigration Department only to seamen of British nationality, whereas the Seaman's Discharge Book and the Seaman's Identity Book may also be issued to alien seamen. It is the equivalent of a British passport and no visa is required for return to Hong Kong.

All Crew members signing-off for repatriation must first obtain permission from the Director of Immigration. All crew arriving to join vessel must produce a guarantee letter through the Agents responsible for all maintenances and other eventual expenses.

AIRPORT: Regular International flights. Airstrip capable of any size of jet planes. Transportation from port to airport terminal about 40 minutes bus drive.

TELEPHONES: Are available at all alongside berths for connection on board ship.

TIME: Standard time kept in the colony is 8 hours in advance of GMT. Summer Time, which is 1 hour in advance of Standard Time, is kept from 0330 hrs. on the first Sunday after 15th April to 0330 hrs. on the first Sunday after 15th October, each year.

HOLIDAYS: Public holidays in Hong Kong occur mainly on festivals whose date is governed by the lunar calendar.

Every Sunday; First week-day in January; Chinese New Year's Day; Second day of Chinese New Year; Third day of Chinese New Year; General holiday in lieu of that for the Ching Ming Festival; Good Friday; Day following Good Friday (Ching Ming Festival); Easter Monday; Birthday of Her Majesty the Queen; Tuen Ng Festival; First week-day in July; First Monday in August; Last Monday in August, which shall be Liberation Day; Day following Chinese Mid-Autumn Festival Day; Day following Chung Yeung Festival: Christmas Day; First week-day after Christmas Day.

POLICE/AMBULANCE/FIRE: When the services of the fire brigade, immigration, port health or police are required, appropriate signals should be made in accordance with the list of "Hong Kong Port Signals". The Marine Division of the Police is responsible for internal port security. Its fleet of launches maintain constant patrols in Hong Kong's territorial waters.

GENERAL: No waste to be disposed into harbour. A free refuse disposal service is available for domestic refuse. Ships agents can arrange this through Marine Department. Chain required for mooring to buoy. Unnecessary use of ship's sirens prohibited.

SERVICES: Services available including tank cleaning, painting, washing, compass adjusting, calibration of direction finder, radar repairs, 24 hours service laundry, supply of stores and provisions, motor-boats service between ship and shore.

SHORE LEAVE: Crew members are usually allowed ashore.

CLASSIFICATION SOCIETIES: The following Classification Societies with British technical committees are represented by their own exclusive officers in Hong Kong: Lloyds Register of Shipping, P&O Building, Hong Kong; The American Bureau of Shipping 1209, New Sincere Building, Hong Kong; Bureau Veritas, 2107, International Building, Hong Kong; Det Norske Veritas (Oslo), China Emporium Building, Hong Kong; Germanischer Lloyd, c/o Jebsen & Co., Prince's Building, Upper Ground Floor, Hong Kong.

WEATHER: 1st June to 31st October usually considered as typhoon season. No operation of cargo when typhoon signal No. 3 or upward is hoisted. Also see "Radio".

DEVELOPMENT: The central fairway is being dredged to – 36 ft. Reclamation continues in various areas within the harbour. Additional 'Public Cargo Working Areas' are near completition and others planned.

AUTHORITY: Director of Marine.

AGENT: Shipping & Transport Services Ltd., Room 7 G/F, Printing House, 6 Duddell Street, Hong Kong. Telephone: 5.232358. Cables: Mainstay HX. Telex: 83173 Mstay HX.

Iceland

ISAFJORD: 66.05 N. 23.06 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: TFZ Isafjord Radio 2182 kc/s. To call Pilot use morse lamps or whistle "G".
ANCHORAGE: In Fjord, depth of 6 fathoms.
MAX. SIZE: Dry cargo vessels up to 4,000 g.r.t. Tankers up to 30 ft. draft.
HEALTH: Inform Agent.
RADIO: TFZ 2182 kc/s.
TUGS: Not required.
MEDICAL: Inform Agent 1 hour in advance. Hospital available.
FRESH WATER: Always available through hose-pipes.
FUEL: All grades available advance notice required is 2 hours.
GANGWAY/DECK WATCHMEN: Necessary. Carried out by crew.
OPENING/CLOSING HATCHES: Performed by crew.
CERTIFICATES: All relevant certificates required.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes each crew member, 600 for Master; Wine/Spirits; 2 bottles for each crew member, 6 bottles for Master.
IDENTIFICATION CARDS: Not required.
CONSULS: British, German, Norwegian, Swedish, Danish.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 small dry dock available.
REPATRIATION: No facilities exist.
AIRPORT: Distance from port 2 miles, regular flights.
TIME: GMT. No change.
HOLIDAYS: Work carried out every day.
POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, tel. 3258.
TELEPHONES: None available.
SERVICES: Compass adjusting, radar, echomaster, specialists.
SHORE LEAVE: Allowed.
AUTHORITY: Captain of the Port.

KEFLAVIK-NJAROVIK: 64.00 N. 22.33 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilotage is compulsory for vessels over 100 tons net. Pilot is available for all vessels 24 hours per day and is reached via Reykjavik Radio. Pilot boards vessel 1 mile outside Vatnsnes.
ANCHORAGE: Outside the harbour in depths of 27 m. with good holding ground.
TUGS: Use of tug is not necessary.
BERTHING: Port has concrete pier which will be extended for a length of 110 m., and a wooden quay 45 m. in length. Depth of water in harbour and alongside wharves is 20 to 45 ft. Entrance is easy for access.
STEVEDORES: Working hours: 8 hours per day 0800 to 1700 hrs.
FRESH WATER: Available through hose connection on the quay.
FUEL: Available.
REPAIRS: 2 shipyards available.
AIRPORT: Keflavik International Airport is only 4 km. away.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All Tel. 2222.
TELEPHONES: None available on board.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

NESKAUPSTADUR, Nordfjordur: 65.09 N. 13.41 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Provision List.
Manifests and Ship's Papers.
PILOTAGE: No Pilots. Road clear, keep in middle of fjord.
ANCHORAGES: Depending wind. With North or N.W. winds anchor towards South coast and well in the fjord. When N.E. off town towards North coast, but keep clear of small boat moorings.
MAX. SIZE: Length/breadth no restriction. Main quay is 70 m. long and it is built right out to the steep bank at the coast. Depth close to jetty 7 m. but increases quickly.
HEALTH: Free pratique automatic from Customs Officer. Radio for doctor if illness on board.
RADIO: Neskaupstadur Radio 2182 kc/s. (TFM) 24 hour watch. VHF, Channels 16 and 26. Range approximately 40 miles.
TUGS: No tugs but large motor-boats are normally obtainable if necessary.
BERTHING: No specific requirements unless over 7 m. draft, when fendering required.
STEVEDORES: If possible 24 hours ETA. Preferably before 1600 hrs. for commencing next morning. Load or discharge rates according to goods.
MEDICAL: Always send advance notice of required medical attention. Hospital available, also 3 doctors and dentist.
TANKERS: Diameters of lines 4 in. and 6 in. Oil companies BP and Shell have their own small quays. The third company Esso uses BP jetty.
DENSITY: Normal.
FRESH WATER: Shore line on jetty. No barge.
FUEL: Diesel oil only.
DEVELOPMENTS: No expected draft increases. New berths are under construction but will take unforeseen time.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCE: 200 cigarettes a week while in Iceland. Only 1 allowance of spirit, i.e. on arrival 1 to 3 bottles according to occupation.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark tel. 199 or 330. France tel. 14 and 19.
REPAIRS: Limited repairs to engines, hull and deck. Good repairs to radars, sounders, tiller pilots, etc.
DRY DOCKS: None. 1 slipway, 450 tons.
REPATRIATION: Winter flights twice a week or more. Summer every day.
AIRPORT: Distance 3 km.
TIME: GMT, no alterations.
HOLIDAYS: Last Thursday April; 17th June; 1st May; 25th and 26th Dec.; New Year, etc. If work is carried out 31st Dec., 24th Dec., Saturday before Easter and Whitsun double pay is claimed.
POLICE/AMBULANCE/FIRE: Telephone office at shore end jetty.
TELEPHONES: No arrangement to place telephones on board.
SERVICES: No tank-cleaning equipment. No discharge of tank-washings. Compass adjusting available.
SHORE LEAVE: Allowed.
DELAYS: None except if berth not available.
AGENT: Gudmundur H. Sigfusson, Thiljuvellir 6, Cable address "Sigfus". Tel. 14 and 19. No Telex. Aviation, Shipping and Trawler Agent.

PATREKSFJORDUR: 65.35 N. 23.59 W.

DOCUMENTS: 8 Crew Lists, Passenger Lists, Custom Documents, Health Documents, Manifests, Bills of Lading, Ship's Papers.
PILOTAGE: Pilotage not compulsory, but if needed then contact Radio Patreksfjordur on 2182 M.F.
ANCHORAGE: Anchorage is sheltered by the peninsula.
MAX. SIZE: See "Berthing".
RADIO: Radio Patreksfjordur on 2182 M.F.
TUGS: Available.
BERTHING: The entrance has a depth of 4.7 m. to 4.9 m. (15.5 to 16 ft.) at LLWST. The harbour has a depth of 6.4 m. (21 ft.) at LW, and 10 m. (33 ft.) at HW. 320 m. of quayage with depths from 5.5 m. to 5.8 m. (18 to 19 ft.) alongside. The harbour can be entered by day and night.
STEVEDORES: Working hours 0800 to 1900 hrs.
MEDICAL: Hospital available, contact through radio.
FRESH WATER: Available. No notice required.
FUEL: Available. No advance notice required.
REPAIRS: Machine-shop. General repairs can be effected. Diver obtainable.
AIRPORT: About 26 km. distance from harbour. Regular service, by airlines.
TIME: GMT. No change.
SHORE LEAVE: Allowed.
AUTHORITY: Patrekshofn, Patreksfiroi.

REYKJAVIK: 64.09 N. 21.50 W. **(See Plan)**

DOCUMENTS:
For the Immigration Office
1 Crew List.
1 Passenger List.
For Customs Authority
Master's Report on vessel's arrival from abroad.
Master's Certificate with Manifests of all goods.
Master's Certificate with Manifests of goods to each port of discharge.
Health Declaration.
List of Provisions and other Stores in ship.
Ordinary procedure at least 5 copies of each manifest (3 for customs).
PILOTAGE: Pilotage compulsory. Telegraphic address: Harbour Master, Harbour Office, Reykjavik. Desirable advance notice of ETA 24 hours and again notice 3 hours before expected time of arrival. VHF working Channel 12 at Pilot station and pilot boats. All day round watch.
Pilot boat: Grey hull with red and white deckhouse. International signals used if necessary. Pilot boat leaves harbour on request and meets vessel up to 1 naut. mile off Grotta (East of buoy 6): Most frequent boarding place is buoy 7 Kollafjordur.
ANCHORAGE: Good anchorage at Kollafjordur in 30 to 35 m. water 1.5 miles North of Engey lighthouse. Anchorage prohibited in neighbourhood of harbour entrance.
RESTRICTIONS: All day service. Draft in old harbour restricted at MLWST to 18 ft. In Sundahofn to 26 ft. No other restriction.
MAX. SIZE: Longest straight quay 244 m. (800 ft.). Breadth unrestricted. Depth 26 ft. at MLWST (29 ft. at MLWNT). At present 3 installations for oil carriers to discharge through submerged pipe-lines. Moorings for ab. 20,000 d.w.t. ships and draft restriction to 21 ft. in the approach to one of these installations.
HEALTH: Pratique obtained through customs authorities. In case of suspected disease notify port office or Agent in advance.
RADIO: Reykjavik Radio TFA.

RADAR/VHF: No harbour radar. Pilot office can be contacted by VHF Channel 16. Working Channels 12 and 14.
TUGS: Tugs meet vessels on roadstead. Ship's lines used.
BERTHING: Bigger vessels preferably handled at high water.
STEVEDORES: Stevedoring must be arranged in advance preferably by Agent.
MEDICAL: Medical attention available without notice. For hospital stay or surgical operation advance notice desirable, either through Agent or port office.
TANKERS: Pipe-lines diameter for discharging is 8 in.
DENSITY: Salinity varies from 33.6% to 35.0% giving sea water density about 1027 in average.
FRESH WATER: Water delivered from taps at quay at rate of 20–30 t.p.h, on the roadstead delivered by tug with 50 cu. m.water-tank.
FUEL: Grade of fuel oil 200–400 per second. Supplied by oil-pipe or by barge. If supplied by barge then 1 day's notice required.
FIRE PRECAUTIONS: Ordinary precautions for handling of dangerous goods applied.
DEVELOPMENTS: In a new harbour area – Sundahofn – quay construction, dredging and reclamation just finished. Length of quay 380 m. and about 50 acre storage area under development. Discussion is taking place on new oil landing facilities to accommodate up to 70,000 t. tankers.
GANGWAY/DECK WATCHMEN: Ship's gangway to be used. Watchmen services from ashore not necessary but can be arranged if asked for.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CERTIFICATES:

1. Certificate of Nationality.
2. International Tonnage Certificate.
3. Certificate of Seaworthiness.
4. Cargo Ship Safety Construction Certificate.
5. Cargo Ship Safety Equipment Certificate.
6. Cargo Ship Safety Radiotelegraphy Certificate or Cargo Ship Safety Radiotelephony Certificate.
7. International Load Line Certificate.

Passenger ships must have certificates No. 1, 2, 3, 7 and in addition Passenger Ship Safety Certificate.
CUSTOMS ALLOWANCES: 200 cigarettes or equivalent. 0.75 litre beverage, 24 bottles beer.
IDENTIFICATION CARDS: Identification card must be carried.

REPAIRS: All kinds of ship repair possible.
DRY DOCKS: Only slipways available up to 2,000 metric tons weight. Dimensions: Length 85 m., breadth 13.6 m.
REPATRIATION: Can be arranged.
AIRPORTS: Reykjavik Airport within 10 minutes drive. Mostly for local routes. Keflavik Airport 50 km. distance. Served regularly by airlines both to Europe and America.
TIME: Icelandic summertime used all year round and is same as GMT.
HOLIDAYS: January 1 (New Year's Day); Maundy Thursday; Good Friday; Easter Monday; May 1; Ascension Day; Whit Monday; June 17 (National Day); First Monday in August (Bank Holiday); Christmas Day and Second Christmas Day. On Christmas Eve and New Year's Eve work stops at noon. Dock work goes on on Bank Holiday and by Labour Union permission work may be carried out on Saturday against overtime payment and exceptionally at night until 2200 hrs.
POLICE/AMBULANCE/FIRE: Police 11166; Ambulance 11100; Fire 11100.
TELEPHONES: Telephone connection can be arranged at some berths in the old harbour and in Sundahofn telephone connections will be at the quay.
GENERAL: Engines may not be run while ship is berthed.
SERVICES: Compass adjusting carried out by private firm as well as tank cleaning.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Normally no delay is to be expected beyond that caused by normal customs clearance.
AUTHORITY: Reykjavik Port Authority.

SIGULUFJORD: 66.10 N. 18.50 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Compulsory. Pilot meets vessel about 200 m. from harbour entrance.
ANCHORAGE: East of harbour in depths according to draft 25 m. to 30 m. good holding ground. Gales from North set heavy sea, vessels then seek anchorage in small bay S.W. of Siglunes.
RADIO: Siglufjordur Radio TFX.
TUGS: None available.
BERTHING: There are several piers and wharves inside the North Mole, 3 quays used by larger vessels have depths up to 23 ft. at LW.
Quays: Hafnagardur, on the South side of North Mole, has a length of about 125 m., with a depth of 6.5 m. (21.3 ft.) alongside. Londunarbryggja has a length of 100 m., with a depth of 7 m. (23 ft.) alongside. Baejarbryggjan (Town Quay) has a length of about 100 m. with a depth of 6 m. (19.7 ft.) alongside.
STEVEDORES: Available. Working hours 0700 to 1200 hrs. and 1300 to 1700 hrs; overtime can be arranged.
MEDICAL: All facilities available.
FRESH WATER: Available.
FUEL: Available in general grades only.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Stevedores normally perform this work.
CARGO GEAR: Ship's own used (no cranes).
IDENTIFICATION CARDS: Not required.
CONSULS:

Denmark Tel. 71232	Norway Tel. 71160
Finland ,, 71569	Sweden ,, 71421

REPAIRS: For moderate size vessels can be obtained. Diver available.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All tel. 71170.
SHORE LEAVE: Allowed.
AUTHORITY: Captain of the Port.

SKAGASTROND: 65.50 N. 20.20 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilots are available. When approaching port, order Pilot through Agent if required.
MAX. SIZE: Draft max. 19 ft.
MEDICAL: Doctor available but located in Blonduos 20 km. away.
FRESH WATER: Available from June 15th to October 15th but other months uncertain.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPAIRS: Small repairs available.
AIRPORT: Nearest 100 km. away at Sauoarkrokur.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: Telephone in village police station 20 km. away.
TELEPHONES: None available.
SHORE LEAVE: Allowed.
AUTHORITY: Captain of the Port.

VESTMANNAEYJAR: 63.30 N. 20.15 W.

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Manifest.
Ship's Register.
PILOTAGE: Ship to advise over Vestmannaeyjar Radio ETA. Pilot always available but 1 hour's advance ETA is required. Pilot is taken on board at 1 of the 2 anchorages.
ANCHORAGE: There are 2 anchorages with depths from 28 m. to 51 m., good holding ground:
1. About 0.5 miles East of entrance to harbour in depth of 51 m.; this anchorage is exposed to the prevailing winds (from East and S.E.). On North side of this anchorage is an overhead power cable and submarine electrical cable and submarine water-pipe.
2. About 0.5 miles North of harbour and on North side of peninsula in depths of 28 m. to 34 m.; this anchorage is exposed to winds between West and North.

RESTRICTIONS: No restrictions except for largest vessels. They must enter at high tide.
MAX. SIZE: 5,000 g.r.t.
RADIO: Vestmannaeyjar Radio. VHF available.
TUGS: Normally join in-coming vessels at anchorage. The use of tug is optional.
STEVEDORES: Available. Ordered by Agent.
MEDICAL: Not necessary to receive advance notice. Hospital facilities exist.
TANKERS: Discharge lines, 7 in.
FRESH WATER: Shore installations on every berth.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCES: For each crew member; 100 cigarettes or 20 cigars or 100 grm. tobacco, and 1 bottle spirits.

IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Germany, Great Britain, Norway, Sweden. To be called through Vestmannaeyjar Radio.
REPAIRS: All repairs possible.
AIRPORT: Local airport. Daily connection to Reykjavik.
TIME: Local time GMT.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1 May); Ascension Day; Whit Monday; National Festival Day (17 June); Prayer Day; Christmas Day (25 December). No work on New Year's Day, Good Friday, Easter Sunday, Whit Sunday, 17 June, Christmas Day.
POLICE/AMBULANCE/FIRE: All tel. 2121.
SERVICES: Compass adjusting, etc.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides (Services) Ltd.

India

COURTESY FLAG: Correct flag to be flown by foreign ships visiting Indian ports is Indian Merchant Navy Ensign (a red flag with a length of one and one half times the width and with National Flag of India superimposed in top quarter next to staff) and not Indian National flag.

SHIP'S OFFICER'S REPORT: Apart from the various forms and Crew Lists, etc., the Customs Boarding Officer also requires a List of Private Property in the possession of the Master, officers and crew on Form No. IV in duplicate and the local Agents need 2 more copies of the same for clearing the vessel inward. This procedure is followed when a vessel arrives from abroad or even when she is arriving from an Indian Port. It is common in both the cases.

ALLEPPEY: 09.29 N. 76.23 E.

PORT LIMITS: On the North by a line drawn from the North boundary pillar (white masonry structure) to 7 fathoms of water. On the South by a line drawn from the South boundary pillar, S. W. to 5 fathoms of water and thereon West to 7 fathoms of water. On the West by a line running North to South joining the Northern and Southern boundary lines. On the East by the beach road from the North boundary pillar to a stone on the beach road 220 ft. East of South boundary pillar.
DOCUMENTS:
(a) For Port Office:
Last port clearance (original for verification and return). Ships' Registry (original for verification and return). Load Line Certificate (for perusal and return). Safety Radio Telegraphy Certificate (for perusal and return). Safety Equipment Certificate (for perusal and return). Passenger List (1). Crew List (1). Deck Cargo Certificate (1).
(b) For Customs:
Application for entry inwards. Last Port clearance. Port Office Entry Certificate. Arrival report. Particulars required by customs in approved form. Favour Parcel Certificate. Gift Parcel Certificate. Health Report. Opium Certificate. Arms and Ammunition Certificate. Import manifest. Passengers list. Storelist, crew list, and private property declaration. Ship's currency declaration. ILH receipt.
PILOTAGE: None. Open roadstead port.
ANCHORAGES: Approach to port free from navigational dangers. Anchorage provides good holding ground.
MAX. SIZE: Being open roadstead, vessels of any size can anchor according to draft.
HEALTH: Port Health Officer may be contacted by telegram addressed CYCLONE ALLEPPEY for issue of pratique certificate. Procedure to be followed in Indian Port Health Rules.
RADIO: Morse system of signalling by light and signalling by International Code flags alone are available. Steamers code can be used as call sign.
TUGS: 2 tugs owned by Port Department render services per requisitions from Agents. Tugs usually approach vessels after anchoring.
BERTHING: No Berths.
MEDICAL: Government hospitals available.
DENSITY: 1025.
FRESH WATER: Only available in very small quantities.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By stevedores.
IDENTIFICATION CARDS: Necessary only when crew land ashore.
CONSULS: Nil.
REPAIRS/DRY DOCKS: None.
REPATRIATION: Crew changes are effected subject undertaking by Owners through Agents.
AIRPORT: Cochin, 62 km. North of Alleppey.
TIME: GMT plus 5.5 hours.
HOLIDAYS: For work on approved closed port holidays and national holidays labourers have to be paid extra in addition to wages.
POLICE/AMBULANCE/FIRE: Emergency (Fire and Police) 100 Alleppey Exchange.
SHORE LEAVE: Crew allowed to land. Foreigners required obtain prior permission of Police authority through Agents.
AUTHORITY: Senior Port Conservator.

BEDI BUNDER: 22.31 N. 70.02 E.

DOCUMENTS:
1 Maritime Declaration of Health.
1 Last Port Clearance.
6 Crew Lists.
6 Passengers' Lists.
4 Stores Lists.
4 Private Property List of crew and officers.
4 Certificates of Currency, Arms and Ammunition and Deck Cargo.
1 Same Bottom cargo list.
1 Hazardous Cargo List with categories.
PILOTAGE: Vessels anchor at roads as pilotage not compulsory; however, if requested in advance by Master to PORTAL BEDI, ship may be piloted from Pirotan Lighthouse to Rozi Anchorage about 7 miles from port by local Pilot Guide. Pilot boards vessel off Pirotan Island Light (Lat. 22° 36′ N. Long. 69° 57′ E.).
ANCHORAGE: Lighterage port. Steamers anchor at Rozi anchorage about 7 miles from port, where good anchorage up to 7 fathoms at low water.
HEALTH: Pratique granted on delivering Maritime Declaration of Health to Customs officer on boarding. Vessels having touched yellow fever area prior to arrival granted free pratique by Mosquito Party to be deputed from Kandla, which can only be arranged by prior notice failing which vessel has to proceed either Kandla or Bombay for Free Pratique.
RADIO: Call sign VUK5. Working hours:
0930–1130 hrs. 1730–1930 hrs.
1330–1530 hrs. 2130–2330 hrs.
Frequency 600 m. or 500 kc/s., working at 429 m. and calling at 500 m.
TUGS: Port tug available for use at anchorage.
BERTHING: No berths.
STEVEDORES: Agents and stevedores require advance ETA of 24 hours for preparing labour gangs. Daily loading is 400/500 tons for bagged cargo.
MEDICAL: 24 hours notice required for medical service. Government hospital at Jamnagar where vaccination/fever injection services available.
DENSITY: 1025.
FRESH WATER: Supplies by barge capacity 50 tons. Possible supply about 50 tons every alternate tide subject adequate supply of water in port area.
FUEL: None.
GANGWAY/DECK WATCHMEN: The services of watchmen are recommended.
OPENING/CLOSING HATCHES: By ship's crew.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat. Exemption Certificate.
Gear Certificate.
CONSULS: None.
REPAIRS: No facilities for repairs to ships.
DRY DOCKS: None.
AIRPORT: Jamnagar – 7 miles from city. Daily flight Jamnagar-Bombay.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Non-working days and work not permitted even on payment of overtime charges: Indian Republic Day; Bakri-Id; Holi; Muharram; Gokulastami; Dasehra; Diwali; Ramzan-Id.
POLICE/AMBULANCE/FIRE: District Superintendent of Police 100 and 3795; Ambulance/Casualty Department 4444; Fire 101.
GENERAL: Tidal port and barges loaded and sent out to ship during tide time only. Loading of barges carried out manually.
SHORE LEAVE: Crew members allowed ashore in emergency or for medical treatment. Necessary police permits take 48 hours.
REGULATIONS: No launch services available for crew. Only 5 ships allowed to work at time at anchorage. Further arrivals wait turn.
DELAYS: Delay expected for loading and discharging in monsoon due to limited number of barges available.
DEVELOPMENTS: The scheme of creating additional facilities, road connection, transit godowns, electrification and water supply and cranes, etc. near mouth of creek. This newly developed area is completed and connected by good all weather road with city of Jamnagar.
AUTHORITY: Port Officer.

BELEKERI: 14.43 N. 74.15 E. **(See Plan)**

PORT LIMITS: *North.* A line drawn due West from Kawada Guda peak into the sea up to 7 fathoms of water starting from a point 50 yards above high-water mark of the shore.
East. Seashore of Belekeri Bay 50 yards above high-water mark from North Boundary Mark to rocky promontory in Lat. 14° 40′ N. including the Belekeri creek and all branches thereof, as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including Islands. All patta lands and other private sites excluded.
South. A line drawn due West from a point 50 yards above high-water mark of rocky promontory in Lat. 14° 40′ N. into the sea up to 7 fathoms of water.
West. A line joining the two 7 fathoms points in the sea.
DOCUMENTS:
8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists.
4 Import Manifests.
Last Port Clearance.
PILOTAGE: Not necessary. Vessels anchor in stream and in open sea. Ships can be manoeuvred under guidance of Port Officer.
ANCHORAGE: The anchorage for shallow draft steamers in open roadstead is with Kukra Island bearing 080° (T) distance about 1.5 miles in depth of 27 to 29 ft. Anchorage for deep drafted vessels is with Kukra Island bearing 080° (T) distance about 2.5 miles in depth 34 to 37 ft.

HEALTH: Medical Officer, Ankola acts as Port Health Officer. Free pratique to incoming vessels granted by radio. All vessels calling from foreign destination must send radio message addressed "Medical Officer, Ankola", at least 48 hours before entering, giving last port of call, number of crew, health conditions, ETA and requesting pratique; same message must be repeated to Agents also, on which pratique granted on shore. Anchoring time is pratique time. For vessels from Indian ports pratique not required. Vessels which have taken on board passengers or crew from yellow fever areas within 30 days of departure from such ports will be under quarantine. Free pratique will not be granted until Mosquito Search Party, from nearest major port (i.e. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship fit for granting pratique. Master to inform Agent well in advance if arriving from yellow fever area to enable arrange Mosquito Search Party for quick pratique.
RADIO: Recommended to give ETA or pratique messages via Goa or Bombay Radio.
BERTHING: No berths.
STEVEDORES: ETA required at least 48 hours prior arrival order Agents advise Shippers and stevedores.
MEDICAL: No hospital but good medical aid given at Karwar, 20 miles distant. In case of inoculations and vaccination at least 2 days advance notice to be given for vaccines to be brought from Hubli or Belgaum distance 100 and 150 miles respectively.
DENSITY: 1025.
FRESH WATER: Can be supplied from Karwar by water barge.
FUEL: None.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Generally done by ship's crew.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derating Certificate.
Vaccination and Inoculation Certificates.
CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member. Wine and/or Spirit: 1 bottle of light spirit and 1 bottle of hard spirit per crew member.
CARGO GEAR: Valid International cargo gear certificate not more than 12 months old. Validity shall cover whole period of loading and discharging.
IDENTIFICATION CARDS: Not required.
CONSULS/REPAIRS/DRY DOCKS: None.
REPATRIATION: Arranged from Goa or Bombay.
AIRPORT: Nearest airports Goa or Belgaumi Bombay.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Port Authorities. Non-working days when work not permitted even on payment of overtime: Republic Day (26th Jan.) and Gandhi Jayanti (2nd October).
POLICE: Tel. 49.
SHORE LEAVE: Permission may be obtained (Chinese personnel not allowed to land on shore).
AUTHORITY: Port Officer, Karwar.

BHAVNAGAR: 21.47 N. 72.08 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Certificate.
Manifest on prescribed form (3 copies).
Declaration of private and personal property.
Crew List.
Customs circulation copy issued by Boarding Officer of last Indian Port of call.
Place and date of deratisation certificate.
PILOTAGE: Pilotage should be arranged in advance through ship's local Agent who may be contacted via the port radio, call-sign VUJ-9. An ETA should be sent at least 48 hours in advance in order to arrange Pilot. Pilotage is compulsory. Pilot boat does not have VHF, but may be contacted by light or flag signals. Pilot station is 4.5 miles N.N.E. of Piram Island Lighthouse and Pilot boat will only be on station when the vessel is scheduled to arrive. Vessels should arrive at Pilot station about 2 hours prior to time of high-water and are advised not to anchor awaiting a Pilot but to make a reciprocal course until arrival of the pilot boat.
ANCHORAGE: Vessels up to 31 ft. draft are advised at anchorage Eastward of perigee light vessel. Maximum limit of draft for vessels working at anchorage is 32 ft. at present. If, however, at future date it becomes necessary to find suitable anchorages for vessels more than 32 ft., this area is likely to be farther Eastward (about 3 to 4 miles) from present anchorage area and this is likely to raise fresh problem of operation of lighters due to increase in distance involved. At present the issue has not arisen as the maximum limit of draft of 32 ft. is fixed for vessels at anchorage. All vessels at anchorage are loaded and discharged by means of lighters.
MAX. SIZE: Up to 500 ft. length, and up to 65 ft. breadth may berth alongside.
Permissible draft for a particular tide is arrived at by subtracting 13 ft. from predicted height of high-water for that particular tide.
HEALTH: Healthy ships are granted pratique by the Pilot. International health regulations are applicable to vessels arriving from yellow-fever areas.
RADIO: Bhavnagar Port Radio, call sign VUJ-9 should be used for routing ETA messages, and is also used by Agents in cables to shipping.
TUGS: Tug assistance is available for berthing and unberthing vessels in inner harbour. Position where tugs join the vessel is dependent upon prevailing weather conditions. Usually ship's lines are used in connections to tug.
BERTHING: Berthings are as per tides and according to permissible drafts.
STEVEDORES: The stevedoring gangs are arranged directly by Agents through approved stevedores.
MEDICAL: Medical facilities can be arranged by Master through Agent. Hospital facilities available in city of Bhavnagar which is 13 km. from port.
TANKERS: No facility for oil tankers.
DENSITY: 1025.
FRESH WATER: Fresh water supplied alongside jetty as well as at anchorage.
Shipmasters Report: Water is often in short supply, and ships may be unable to obtain any at all at the anchorage. Ships should not rely upon an evaporator to make water at the anchorage, due to the high mud content of the sea water.
FUEL: Oil bunkering available in limited quantity.
FIRE PRECAUTIONS: Alongside jetty fire-fighting facilities available. At anchorage fire-fighting facility is provided by the tug.
Usual fire precautions applicable.
DEVELOPMENTS: Intensified dredging operations are proposed to be undertaken for increase in drafts of the steamers berthing.
GANGWAY/DECK WATCHMAN: Gangway and deck watchman are recommended.
OPENING/CLOSING HATCHES: As arranged between the Master and stevedores.
SHIP'S CERTIFICATES: Registration; Safety equipment; Safety Radio and Telegraphy; International Load Line.
CUSTOMS ALLOWANCES: As per Customs regulations in force from time to time at Indian ports.
CARGO GEAR: Ships should possess valid Cargo Gear Certificate.
CREW IDENTIFICATION CARD: Valid international passport or identification card necessary.
CONSULS: No consulates at port. Nearest consulates are at Bombay.
REPAIRS: No repair facilities exist for the ship except repairs of minor nature which could be undertaken by private repair firms.
DRY DOCKS: Small dry dock available for repairs of vessel of up to 200 ft. length.
REPATRIATION: Possible.
AIRPORT: Bhavnagar city is served by an airport situated about 7 km. from the Port. Regular flights to Bombay are available daily.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Holidays in all 8 in a year declared by Port Authorities on which working of the ship can be attended at the option of the port.
POLICE/AMBULANCE/FIRE: Police force and ambulance and fire facility available from Bhavnagar city. Limited fire-fighting facility available at port.
TELEPHONES: No facility is available for providing telephones on board the ships.
GENERAL: Port equipped with 3 berths having 6 cranes with 3-ton capacity. Cranes available for loading or discharging ship's cargo.
SHORE LEAVE: Citizens of communist China and Pakistan not allowed ashore. All other nationals are allowed to go to Bhavnagar city which is 13 km. from port for which shore passes are issued by Customs Dept.
REGULATIONS: Photography in port prohibited. No crew member allowed to take liquor ashore.
DELAYS: Delays in berthing depend upon number of ships working on berth and awaiting if any. At anchorage generally not more than 2 ships are worked at a time.
AUTHORITY: Port Officer.

BOMBAY: 18.56 N. 72.49 E. **(See Plan)**

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked and/or when vessel is required to anchor outside pilotage area awaiting a suitable tide, as in the case of large tankers.
DOCUMENTS: See "Calcutta".
PILOTAGE: Motor pilot vessel "*Venu*" stationed 18° 51′ N. 72° 49.5′ E. White, buff-coloured funnel, "Pilot" painted black capitals, exhibiting International Signals by day/night. Call sign "ATDZ".
Minimum advance notice 24 hours to Agents and Harbour Master through Bombay Radio (VWB) and 12 hours to pilot vessel on WT. Pilot vessel contacted VHF Channels 12, 14 and 16. In case pilot vessel not on station, vessels advised anchor at Pilot station, draft permitting, and wait instructions.
ANCHORAGES: More than 60 anchorage berths radius 1,000 ft. with depths from 38 ft. to 14 ft.; of these two 38 ft.; 30 between 30 ft. and 35 ft.; 22 between 20 and 30 ft.; remainder below 20 ft. All anchorages safe.
RESTRICTIONS: According to state of tide and draft.
MAX. SIZE: For Butcher Island Marine Oil Terminal: Normally max. length 700 ft. However, tankers 800 ft. length can be berthed provided adjacent berth occupied by medium-size tanker. Draft restrictions as follows: (depth of water at low tide.)

No. 1 BI	37 ft.-09 in.	Subject variation.
No. 2 BI	36 ft.-06 in.	
No. 3 BI	38 ft.-05 in.	

Pir Pau Oil Berth: max. length 525 ft. Depth at low tide 28 ft. (subject variation). Buoy fixed for berthing 560 ft. tankers.

Docks	*Max. length*	*Max. width*	*Max. draft (subject to tide)*
Indira	666 ft.	95 ft.	34 ft.
Victoria	460 ft. by day and 400 ft. by night	77 ft.	23 ft.
Prince's	500 ft.	61 ft. 3 in.	22 ft.

PRATIQUE: The Master of every vessel calling Bombay from a foreign port must send the following particulars by cable to "Quarantine Bombay" 24 hours prior to arrival and request for radio pratique:

AAA ports of loading BBB last port of call CCC date of departure DDD ETA discharging port EEE vessel's maritime Declaration of Health is negative and total number of crew on board all healthy FFF vessel has not called at any port in East Africa between northernmost point of Eritrea and southernmost point of Tanganyika including Zanzibar or any other yellow fever infected area within last 30 days GGG no unusual mortality of rats on board HHH no monkeys III no persons embarked at Aden or Djibouti.

If the vessel is coming from a yellow fever area, then the Port Health Officer boards the vessel for inspection before granting free pratique.

RADIO: Bombay Coastal Station, call sign VWB.

Information regarding weather will be broadcast at 0630 and 1030 hrs. local time on 2000 m.

RADAR/VHF: No port radar service. Shipmaster contacts pilot vessel by ship's radio or VHF on international frequencies. Channels No. 12 and 14 also available on VHF.

TUGS: Tugs join vessel when close dock entrance and assist undocking. Ship's and tug's lines used.

BERTHING: *Indira Dock:* 21 berths, able to handle cargo vessels up to 20,000 d.w.t. Average length of berth 150 m. Most berths are equipped with one 6-ton crane and four 3-ton cranes.

Victoria Dock: 15 berths, able to handle vessels up to 5,000 d.w.t. Average length of berth 110 m. Most berths are equipped with 1.75 ton and 1.5 ton cranes.

Prince's Dock: Length 1,560 m. of which 1,200 m. is available for handling cargo. There are 8 berths able to handle vessels up to 5,000 d.w.t.

Ballard Pier: Length 244 m., width 110 m., when converted will handle passenger vessels up to 30,000 g.r.t. and cargo vessels up to 22,000 d.w.t.

The extension at Ballard Pier will be the new passenger terminal and will receive passenger vessels up to 30,000 g.r.t. at any stage of the tide.

CRANES: *Quay side:* Electric and Hydraulic cranes available at Indira, Prince's and Victoria Docks.

Mobile Cranes: 56 mobile cranes with capacities up to 43 tons available.

Heavy lift: Electric crane of 60 tons and steam crane of 20 ton capacity.

Floating cranes: 2 available, 60 ton and 125 ton capacity.

STEVEDORES: Supplied by Dock Labour Board. Port Trust supplies shore labour for handling cargo including stacking in sheds.

MEDICAL: Hospital facilities available. Notice in sufficient time, depending on seriousness of case, to arrange for transport, hospitalisation, etc.

TANKERS: Reducing pipe connections available at jetty. Dirty ballast tank available at Marine Oil Terminal. 3 berths at Butcher Island and 1 berth at Pir Pau exclusive to tankers. For draft details see "Max. size".

Pir Pau can handle tankers up to 16,000 d.w.t. and the Marine Oil Terminal at Butcher Island can handle tankers up to 54,000 d.w.t. at 2 berths and 36,000 d.w.t. at the other berth.

DENSITY: The Port of Bombay is essentially a salt water port and major fluctuations in the density occur on account of tide. Density varies mostly in monsoon period June to September.

FRESH WATER: Available all berths. By water-boat in stream, by water-mains in docks.

Ship Officer's Report: Vessel berthed at Ballard Pier, east side. Fresh water availability on pier dependent on capacity of storage tank at the time of call. The water was not available continuously and we had to wait for the tank to be refilled.

FUEL: Arranged by oil companies through Agents. Facilities at berths in docks and Butcher Island berths. No bunker facilities for vessels at anchor.

FIRE PRECAUTIONS: All regulations of Petroleum Rules (chapter 1/50 of BPT Port Rules). Port maintains fire stations, 24 hours per day, both at docks and at Butcher Island Oil Terminal. Special precautions taken for tankers at Marine Oil Terminal at Butcher Island.

DEVELOPMENTS: Satellite port in Nhava/Shewa area proposed also new harbour near Sassoon dock for trawlers drawing 5.5 m.

GANGWAY/DECK WATCHMEN: No deck watchman supplied. BPT gangways generally available all berths except Butcher Island and Pir Pau.

CERTIFICATES:

International Safety Equipment Certificate.
International Safety Radio Telegraphy Certificate.
International Safety Radio Telephony Certificate.
International Exemption Certificate (Deratisation).
International Load Line Certificate.

CARGO GEAR: Compliance BPT Port Rules and Docks By-laws essential. Hydraulic Quay Cranes, Electric and Heavy Lift Cranes, Floating, Mobile and Crawler Cranes all available.

IDENTIFICATION CARDS: Necessary for Police/Customs authorities.

REPAIRS: All repairs possible.

DRY DOCKS: Two: "Merewether" 525 ft. long, 65 ft. 6 in. wide. "Hughes" 1,000 ft. long, 100 ft. wide.

REPATRIATION: Can be arranged, also crew changes.

AIRPORT: International Airport Santacruz, 15 miles from Bombay Harbour.

TIME: Indian standard time ahead of GMT by 5 hours and 30 minutes. No alterations to clocks are made any time.

HOLIDAYS: Holidays for the docks (when cargo handling is closed) are fixed every year. Republic Day (January); Bakri-Id (February); Holi (2nd day) (March); Muharram (March); Maharashtra Day (May Day); Buddha Jayanti (follows May Day); Independence Day (August); Ganesh Chaturthi (September); Mahatma Gandhi Jayanti (October); Dasara (October); Diwali (November); Ramzan-Id (December); Christmas Day.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Arrangements for placing a telephone on board ship exist at all transit sheds in Docks.

SERVICES: Tank cleaning equipment is not available. Dirty ballast accepted in tank at jetty at Marine Oil Terminal.

REGULATIONS: Stringent Port Rules and Docks By-laws detailed in "Bombay Port Rules".

AUTHORITY: The Chairman, Bombay Port Trust.

CALCUTTA: 22.32 N. 88.22 E.

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Deratisation Certificate.
Port Clearance from Last Port.
Indian Coast Light Dues Receipt (if any).
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Through Cargo Manifest.
4 copies of Stores List.
1 copy of Cargo Manifest with B/Lading for the same.
4 copies of Opium and Dangerous Drugs Certificate.
Cargo Plan.
Cargo on Deck declaration.
4 copies of Certificate of Foreign Currency.
4 copies of Certificate of Arms and Ammunition.
Letter to Assistant Collector of Customs regarding Local Agency.
Letter to Assistant Collector of Customs regarding duty on ships stores.
Application to the Inspector of Police.
3 copies of Arrival Report.
4 copies of Watches and Clock List possessed by each member of the crew.

PILOTAGE: Telegraphic address of Pilot station: VWST "Pilots Sandshead". Radio message should be sent 48 hours prior arrival giving (a) ETA Eastern Channel Lt. Vs.; (b) from . . . to . . . (either Haldia, Budge Budge, or Calcutta); (c) deepest *fresh* water draft; (d) length overall; (e) g.r.t.; (f) whether VHF is or is not on board.

Pilot boards vessel Sandheads from pilot vessel fitted with W/T, DF, radar, echo sounder and other navigational equipment, maintains continuous watch on 500 kc/s. (600 m.) and receives ETA messages of incoming vessels.

As an aid to navigation, navigable channel in river is marked with lights and channel buoys. There is a lighthouse at Saugor and downstream from this point, 3 attended Light vessels are stationed at the Western Channel and 2 unattended Light Vessels at Gabtola and Lower Long Sand at Sandheads. Navigable channel leading to port from sea is about 126 miles long. 14 bars are in different reaches of river, 11 of these are upstream of Diamond Harbour and remaining 3 in estuary below Diamond Harbour. Since these bars are subject to fluctuations and there are sharp bends in river, the navigation of ships between port and sea requires services of trained Pilots employed by Port Commissioners. River Pilots take charge of vessels at Sandheads, navigate to Garden Reach and then make over to harbour Pilots who manoeuvre vessels to riverside jetties, moorings or dock berths. Movement of ships inside docks guided by Berthing Masters.

ANCHORAGES: Anchorage in river Hooghly at Saugor Roads, Halida, Kalpi, Diamond Harbour, Royapur, Ulubaria and Garden Reach of which Royapur, Ulubaria and Garden Reach utilised only by ships on passage to and from the port in emergency. Depths of anchorages vary on day to day basis according to River Draft Forecast but on average 30 ft. deep.

RESTRICTIONS: Navigation on River Hooghly is carried out only with Pilot on board and according to tide. Speed of vessel important factor and must be declared to Pilot on board, preferably telegraphed 48 hours in advance to Pilot vessel.

MAX. SIZE: Maximum LOA 530 ft. with beam of 70 ft. for Nataji Subhas Docks and 515 ft. LOA with beam of 66 ft. 6 in. for Kidderpore Docks. Maximum LOA of tankers for tanker terminal at Budge Budge is 600 ft. No restriction of beam for vessels berthed in Budge Budge only, as no lock entrance. Deepest draft alongside dock berths in Nataji Subhas and Kidderpore Docks 30 ft. At Budge Budge deepest draft at any berth also 30 ft. Berthing of vessels, depends on prevailing draft of day published in Draft Forecast for month.

PRATIQUE: Procedure for obtaining pratique: To obtain Radio

Pratique incoming vessels communicate by wireless to Port Health Officer, Calcutta, Cable address: "Quarantine Calcutta":

(a) No sickness or death from sickness on board within last 15 days.
(b) No sand, earth, pig, poultry, crew or passenger taken aboard from E. Coast of Africa between Port Sudan and Durban, both ports included.
(c) Ship not touched within last 30 days any port in E. Africa between Northernmost point of Eritrea and Southernmost point of Tanganyika, including Island of Zanzibar or any other yellow fever infected area.
(d) No abnormal mortality of rats or mice on board.
(e) No monkey on board.

(Item (a) to be sent in code under usual standard quarantine messages required by ships; rest in plain language through local wireless station.)

In case of any suspected disease or fever on board, local agents may be contacted by cable who arrange for doctor to be sent or for removal of a patient if necessary. Vessels calling at another port in same country are exempted from obtaining pratique.

RADIO: Calcutta Radio, call sign VWC. R/T. and VHF.

Information regarding weather distributed at 1030 and 0630 hrs. local time on 2000 m.

TUGS: Tugs used for vessels after passing lock entrances at Nataji Subhas and Kidderpore Docks. Tugs used for deep draft vessels to turn (if tide strong). Vessels own lines.

BERTHING: Vessels brought in for berthing according to tide. Movements from one berth to another inside dock not dependent on tide, but according to convenience of port. Vessels berthed at riverside jetties or river moorings required to have starboard anchor unshackled in order that stbd chain could be tied to buoy. Vessels at river jetties and river moorings if left during Bore Tide are to comply with following:

Half an hour before low water:

(a) Gangway to be hoisted up.
(b) Pipe-lines disconnected and triced up (for vessels at Budge Budge Jetty).
(c) Heave tight on forward chains to keep vessel about 6 ft. off pontoon. Make sure weight is on bore springs and not on chains aft.
(d) Tighten all buoy ropes.
(e) When bores expected, all vessels in stream shall have steam on main engines, windlasses and winches and a sufficient number of officers and crew on board to tend vessel in case of emergency.

After bore made, and vessel stopped ranging, slack forward chains to old mark. Bore springs could be had through Agents from local suppliers.

Budge Budge (oil terminal) on banks of River Hooghly has river jetties, hence above instructions also apply to vessels berthed at Budge Budge Jetties.

BULK HANDLING FACILITIES: There is 1 semi-mechanical berth in Nataji Subhas Docks for handling iron-ore suitable for vessels up to 18,000 d.w.t. and up to 24 ft. 6 in. draft. See "Haldia".

BRIDGES: 2 bridges, 1 collapsible, 1 swing, situated inside Kidderpore Dock are open for navigation to suit convenience of port.

STEVEDORES: 48 hours notice of arrival at Pilot station required by Agent.

MEDICAL: Masters in need of medical services required cable agents. Hospital facilities. Ships leaving for foreign port or minor Indian port (where no Port Health Officer) required to ensure officers and crew have valid health certificates (for cholera, smallpox and yellow fever if proceeding to a yellow fever area).

TANKERS: Not permitted discharge residue into dock (at C berth Nataji Subhas Dock).

S.G.	A.P.I. of local types of oil
0.91 and 0.94	0.9430 varying to 0.9550.

Tanker terminal at Budge Budge 15 miles from Calcutta Port.

BB Jetty	No. 1	for accommodating vessels of	OAL	610 ft.
,,	No. 2	,,	,,	510 ft.
,,	No. 3	,,	,,	230 ft.
,,	No. 4	,,	,,	555 ft.
,,	No. 5	,,	,,	610 ft.
,,	No. 6	,,	,,	476 ft.
,,	No. 7	,,	,,	595 ft.
,,	No. 8	,,	,,	705 ft.

Deepest draft alongside jetty berths 30 ft., but vessels brought up according to prevailing draft as per forecast.

DENSITY: Average density in port is about 1000.

FRESH WATER: Fresh water on application from Masters or Agents and preferable if at least 48 hours notice given. Supplies through barges and direct from quayline.

FUEL: Redwood 600/700 sec. supplied at Calcutta and require at least week's notice for supplying vessels lying inside dock. Fuel also supplied at Budge Budge terminal, 3 days notice to suppliers and Port Authorities.

FIRE PRECAUTIONS: Usual non-smoking precautions and Master, Owners, Charterers or their Agents of vessels carrying import cargo or intending to load export cargo of hazardous or inflammable nature, furnish 6 copies of list of cargo involved to Traffic Manager in prescribed form, at least 10 days before vessels intend to land or ship cargo. Traffic Manager on receipt of list, categorise items enumerated in list and landing delivery and storage of such cargo be done strictly in accordance with instructions.

DEVELOPMENTS: Refer to "Haldia".

GANGWAY/DECK WATCHMEN: Necessary and recommended by Agents at rate of 3 watchmen per shift of 8 hours.

OPENING/CLOSING HATCHES: Normally undertaken by stevedores, unless specifically mentioned that same will be attended to by crew.

CUSTOMS ALLOWANCES: 0.25 lb. tobacco and 200 cigarettes. Wine and/or Spirit: 1 bottle of wine or spirit per head for consumption on board.

CONTRABAND: Regulations provide that a vessel shall be liable to confiscation which is or has been in Indian Customs' waters where constructed, adapted, altered or fitted in any manner for the purpose of concealing goods.

The act also provides for a fine in lieu of confiscation which could in theory be up to the value of the vessel.

Indian Customs Authorities regard vessels as subject to the regulations if they have any alterations to the normal structure of the vessel or its fittings which is not of operational value, e.g. holes cut in panelling (over bulkheads) which are frequently found concealed from view behind cabin furniture such as settees, bunks desks, wardrobes, etc. Customs invariably impose fines for such cavities even though empty of about Rs. 5,000/-for 1 or 2 cavities and increasing if more cavities are found. Fines would be substantially higher if cavities in fact contained contraband.

To minimise fines it is essential that Shipowners should instruct their Masters to organise periodic anti-smuggling searches of all accommodation and other places in the vessel by ship's officers with a view to locating any cavities or contraband and such searches, and results thereof, should be logged. Furthermore, the Customs Authorities invariably obtain a statement from the occupant of the cabin whether instructions had been issued by the Owners or Master for each officer crew member to search his own cabin for cavities or hiding places or other unusual or irregular tampering with the normal structure of the cabin and to report to the Master any such cavities, hiding-places or such other unusual tampering found at any time whilst serving on the vessel.

If no such instructions have been issued, the Customs generally regard the Owners/Master as failing to take proper anti-smuggling precautions and the risk of increased Customs fines arises.

It is suggested that appropriate instructions should accordingly be issued without delay by all Masters to their officers and crews and that each officer or crew member should acknowledge receipt in writing of such instructions. It is also emphasised that such instructions should also be notified to any officer or crew member who joins the vessel after first issue of the instructions to the existing officers and crew.

CARGO GEAR: Proof of cargo gear tested by a competent authority required.

IDENTIFICATION CARDS: Not necessary if holding seamen's books or passport.

CONSULS:

America	44–3611	Liberia	46–1164

REPAIRS: All types of deck and engine repairs undertaken.

DRY DOCKS: 5 dry docks owned by Port Commissioners available. 3 in Kidderpore Docks and 2 in Nataji Subhas Docks, dimensions as follows:

Dry Dock (Kidderpore) (1) 547 ft.×69 ft.×25 ft. (2) 497 ft.×69 ft.×27 ft. (3) 350 ft.×60 ft.×23 ft. (max. length of vessel 500 ft.).

Dry Dock (Nataji Subhas) (1) 581 ft.×80 ft.×32 ft. (2) 596 ft.×80 ft.×22 ft. (max. length of vessel 550 ft.).

Nataji Subhas Dry Docks arranged in tandem and used as one dock. Power supply, compressed air and fresh and unfiltered water supply, hydraulic capstans for propeller work and cranage service including heavy-lift available all dry docks. Each dock provided with automatic telephones for use on board ships.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORT: 12 miles; served by regular international airlines with minimum 1 flight per day.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed Holidays (when no work is permissible): Independence Day, Republic Day, Gandhi's Birthday, Vijaya Dashami and Kali Puja.

Holidays when double wages payable: Saraswathi Puja, Netaji's Birthday; Idul Fitr, Dholjatra, Muharram, Bengali New Year, May Day, Fateh Duaz Dahan, Durgapuja, Guru Nanak's Birthday, Id and Christmas Day.

POLICE/AMBULANCE/FIRE: Police (port) tel. 45–1701 and ask Port Police or dial 100; Ambulance dial 102 or 45–4163; Fire dial 101 or 45–1701 and ask Fire Fighting Service.

TELEPHONES: No arrangements for installing telephones on board, but use of telephones from Port Commissioner's/ Superintendent's Office on each dock.

GENERAL: *Important:* Masters of vessels in port should ensure that vessel's engines are not immobilised without prior permission of the Harbour Master.
SERVICES: Tank-cleaning equipment with minimum notice of at least 7 days. Discharge of tank-washings not permitted while vessels lying in dock. Compass and radar technicians available.
SHORE LEAVE: Seamen permitted to go ashore after cleared by Immigration Officer boarding vessel on arrival. In case of Chinese, special permission to be obtained from Immigration Authorities, through vessel's Agents.
REGULATIONS: Booklet "Dock and Jetty Handbook" supplied free by Port Commissioners to incoming vessels.
DELAYS: Delays occur during monsoon.
AUTHORITY: Commissioners for the port of Calcutta.

CALICUT: 11.15 N. 75.46 E.

DOCUMENTS:
Register.
Articles of agreement in the case of foreign-going vessels staying in port for more than 48 hours.
Nominal list of crew and passengers and the A & B Certificates.
Bill of Health in the case of a vessel arriving from an infected port.
Clearance from last port.
Port and Light dues receipts.
Vessel's manifest and any other document, which may be necessary.
PILOTAGE: No pilotage available.
ANCHORAGE: With Lighthouse bearing 074° in 5 to 5.5 fathoms. Mud – good holding ground. Small coasting steamers anchor close to lighted anchorage buoy.
HEALTH: In the case of all infected vessels Health Officer proceeds aboard, and in the case of all other vessels Health Officer may proceed on board and examine vessel. Master shall give every facility for examination of passengers, crew, personal effects, cargo, provisions, water-supply and any part of vessel Health Officer considers necessary to examine. Health Officer may require written declaration from medical officer (if any) of vessel or from Master (or from both) stating whether any death or sickness from an unknown or suspicious cause or any case of any disease occurred on board either during voyage or before departure, and whether any unusual mortality has been observed among rats on vessel. If Health Officer satisfied that such deaths or cases of sickness as may have occurred were not due to any of diseases specified he shall permit vessel to proceed to usual place of anchorage or berth in harbour and to discharge passengers and cargo without further restriction. Inspection by Health Officer not between sunset and sunrise except in unusual circumstances.
RADIO: Messages through Cochin Radio or Mangalore Radio.
SIGNALLING: The signal station is situated close North of the lighthouse. The station is manned 24 hours a day.
VHF is likely to be installed 1974.
TUGS: 2 motor tugs for towing lighters.
BERTHING: No berths.
STEVEDORES: Arranged through Agents and stevedore contractors.
MEDICAL: General Hospital and Medical College Hospital situated about 1 mile and 5 miles away respectively.
DENSITY: Sea water – 1025.
FRESH WATER: Available, water barge capacity 200 tons. 12 hours notice required.
FUEL: Available. Small quantity of 30 tons can be provided, 48 hours notice required.
DEVELOPMENTS: Dredging commenced at Beypore and expected to be completed within a year or two and then ships of 18 ft. draft can be berthed alongside.
CERTIFICATES:
Registry.
Radio Telegraphy.
Safety Equipment.
Load Line Certificate.
Certificates of Competency of Captain and other officers.
IDENTIFICATION CARDS: Necessary.
CONSULS: Nil.
REPAIRS: Minor repairs possible.
DRY DOCKS: Small slipway at Beypore.
AIRPORT: Construction of airport at Calicut is under consideration by the Government.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Holidays declared by the State Government are holidays for the port. Cargo work can be arranged on holidays.
FIRE/AMBULANCE/POLICE: Police 100; Ambulance 100; Fire 100.
GENERAL: Ship-to-shore signalling is normally by morse light.
SHORE LEAVE: Permitted.
AUTHORITY: Port Officer.

COCHIN: 09.58 N. 76.15 E.

DOCUMENTS:
7 Crew Lists.
7 Passenger Lists.
1 Last Port Clearance.
4 Store Lists, including List of arms and ammunition.
5 Passengers' and Crew Personal Effects Declarations.
4 Cargo Manifests.
3 Cargo Certificates.
3 Deck Cargo Certificates.
3 Opium Certificates.
3 Currency Declarations.
PILOTAGE: Berthing arrangements, booking of Pilot, etc., normally done by Agent. Advisable send ETA messages at least 48 hours in advance to Agent. Amendments to ETA messages must be sent at least 12 hours in advance. ETA messages may also be sent to Harbour Master, Cochin Port Trust. Messages should contain time and date of arrival at outer roads in IST and also draft fore and aft (in fresh water). On arrival, information must be sent to Signal Station by aldis and sharp watch maintained for further instructions.
No Pilot vessel on station in outer roads. A Pilot boat with red hull and white superstructure exhibiting the normal international Pilot signal comes out to outer roads for embarking and disembarking Pilots. No special light or sound signal need be made for Pilots. All ships awaiting Pilot in outer roads must have engines ready at all times to enter harbour (unless instructed otherwise). Masters should ensure that a good pilot ladder with 2 manropes is lowered about 2 ft. above water for embarking Pilots. Also while embarking Pilot, lifebuoy must be kept handy, and a good lee given. Pilots must be escorted from and to the bridge, to the embarkation deck. Also see "Restrictions".
ANCHORAGE: Cochin roads is open anchorage with good holding ground of oily mud. Masters are required to anchor vessels in Westerly area from North to South of fairway buoy within radius of 0.5 mile. Deep-drafted vessels may anchor in a Westerly direction from fairway buoy within a distance of 0.5 to 1 mile. To facilitate entry and departure of deep-drafted ships, Masters not to anchor in line with direction of main channel, Westward of fairway buoy.
RESTRICTIONS: Unless otherwise *specifically* instructed, vessels not to enter main channel at any time without Pilot on board. Pilotage compulsory for all vessels over 100 tons gross. No night entry for crude oil tankers.
MAX. SIZE: Maximum size of general cargo ships presently handled is 700 ft. length OA with max. draft 30 ft. *salt water.* Such ships taken in only during slack ebb. Tidal Conditions: In Cochin Port ebb and flood run 2 to 2.5 hours before, to 2 to 2.5 hours after high and low water times. During monsoons, freshets are encountered and there may not be any flood for several days.
PRATIQUE: If a vessel requires radio pratique the Master is to send a message to the Port Health Authorities, Cochin (telegraphic address "Quarantine Cochin") which should contain all items of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the above, he should send the following information in plain language:

1. My Maritime Declaration of Health has negative answers to health questions or my Maritime Declaration of Health has positive answers to health questions (indicated by details) as the case may be.
2. Called at or not called at any port in Ethiopia, Somalia, Kenya and Tanzania and any port from Northernmost point of Senegal to Southernmost point of Angola in West Coast of Africa within 30 days.
3. Have or have not monkeys on board.
4. Have or have not taken any person embarking at Aden or Djibouti.

The message to be sent not more than 12 hours and not less than 4 hours out from port. Masters must send the complete message without omitting any item, and should request specifically for radio pratique.
Ships arriving from yellow fever area within last 30 days, pratique is granted by the Port Health Officer only after inspection. Pilot officer boarding is authorised to grant free pratique on satisfactory completion of Maritime Declaration of Health by the Master of healthy ships only.
Port Health Officer usually inspects crew before vessel sails.
RADIO: Cochin Radio, VWN, operating 24 hours daily. VHF Station at Harbour Master's Office, contact Channel 16.
TUGS: Presently 3 tugs; 2 of 1,000 h.p. and one of 1,400 h.p. Normally, tugs join off Vypeen and tug's wire used as necessary.
BERTHING: If particular ship required arrive at certain time, Agent informed in advance.
CARGO HANDLING: Modern systems of cargo handling such as pre-slinging and palletisation are commonly used. The numbers of fork lift trucks, mobile cranes and tractor trailers have been augmented for the purpose. International containers are also handled at the conventional berths using ship's own gear for export of shrimps and import of machinery.
There are 8 general cargo wharf berths, 2 coal berths, 1 boat-train pier jetty, 2 tanker berths, 2 low wharves and 1 open berth. The open berth (555 ft. 6 in.) is being extended to 808 ft. and the work is nearing completion. It is proposed in the fifth plan (1974-79) to convert the open berth into a container berth in a flexible way. It is also proposed to have a mechanised fertiliser berth for bulk handling fertilisers, sulphur, rock phosphate, etc. Cargo is also handled at the 12 stream moorings. At present, containers also handled at the general cargo wharf berths using ship's derricks. No facility exists for roll-on/roll-off traffic. Liquid chemicals can be handled at the wharf berths.
STEVEDORES: Booking of gangs undertaken by Agent on receipt of ETA message.
MEDICAL: Medical attention easily available in Cochin. If medical attention required immediately on arrival, Agent to be informed when sending ETA. Valid inoculation and vaccination certificates against cholera, yellow fever and smallpox are essential.
TANKERS: Only 2 tanker berths at Cochin at present. Maximum permissible draft 30 ft. *salt water.*
Length limited to 700 ft. OA at North tanker berth and 560 ft. OA at South tanker berth.

Deep draft tankers berth only on ebb tide and during daylight hours. Ballasted or loaded tankers can sail any time.
DENSITY: Varies from 1000 to 1020 depending on tidal and weather conditions.
FRESH WATER: Available from alongside jetties and from barges at moorings. Advance notice to be given Agent regarding amount of water required. Cost Rs. 3.50 per 1,000 litres for supply through water barges and Rs. 3/-per 1,000 litres for supply at docks, quay and jetties.
FUEL: All grades fuel oils normally available. Essential give advance notice to Agent to make necessary arrangements.
FIRE PRECAUTIONS: Fire wire to be fast and ready on quarter facing channel.
DEVELOPMENTS: The revised Fourth Five-Year Plan (1969-70 to 1973-74) for port development includes the construction of an inshore oil dock for tankers of 80,000 d.w.t. and 1 fertiliser berth, both having a draft of 40 ft. While preliminary steps have been taken on the former, the latter scheme has been postponed to the Fifth Plan. The extension of the existing Open Berth Quay 9 from 505' 6" to 808 ft. has almost been completed. The plan also aims at the procurement of 3 new dredgers, 1 high-power tug, various cargo-handling equipments, etc., besides the improvement of the port's infra-structural facilities. A Fisheries Harbour Complex is being developed near the port to provide modern landing facilities for fish catches by deep-sea trawlers.

The Fifth Five-Year Plan for port development (1974-75 to 1978-79) aims at the completion of all the spill-over schemes of the Fourth Five-Year Plan, viz., inshore oil dock, procurement of dredgers, cargo-handling equipment and improvement of infra-structural facilities. Among the most important new schemes of the Fifth Plan, mention may be made of the provision for the purchase of a grab dredger, reclamation in the channels, construction of a new medium-sized dry dock, a fertiliser berth, etc. During the Fifth Plan, container-handling facilities will be provided at the extended Quay 9 berth.
GANGWAY/DECK WATCHMEN: Watchmen available at nominal cost. Recommended employ watchmen at gangway, on deck and in holds.
OPENING/CLOSING HATCHES: Opening hatches normally done by stevedores. Topping derricks and removing locking arrangements on hatches must be done by ship's personnel.
CARGO GEAR: All cargo gear must have valid test certificates and all other factory act requirements must be complied with.
IDENTIFICATION CARDS: Issued by Port Authorities.
CONSULS: Danish, Norwegian, Italian, French and consular agent of Switzerland.
REPAIRS: Minor repair facilities available.
DRY DOCKS: Port dry dock can handle ships of up to 217 ft. in length OA. However, not normally available for foreign craft.
REPATRIATION: Facilities for changing crew and repatriation available and can be arranged.
AIRPORT: Airport about 2 miles from harbour area. Cochin airport handles internal flights only.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Closed holidays: Republic Day (26th January); Independence Day (15th August); Gandhi Jayanti (2nd October); 1st May and 25th December.
FIRE/AMBULANCE/POLICE: 6555 Willingdon Island Fire Station; 6005 Willingdon Island Police.
TELEPHONES: Arrangements can be made for telephone connections on board ships on wharf berths only.
GENERAL: Floating crane 120 tons, fire float.
SHORE LEAVE: All nationalities except Chinese, Pakistanis and Portuguese allowed ashore.
AUTHORITY: Cochin Port Trust.

CUDDALORE: 11.43 N. 79.46 E.

DOCUMENTS:
8 Crew Lists.
8 Passengers Lists.
3 Forms of Import Manifest of Stores.
3 Lists of articles in slop chest.
3 Private Property declaration of Crew.
3 Manifests.
3 Bills of Lading.
PILOTAGE: No pilotage. Open roadstead port.
ANCHORAGE: Vessels anchor in 5 to 7 fathoms with Cuddalore Lighthouse bearing 295° to 315°, which is most convenient anchorage for communicating with shore at all seasons of year. Nature of bottom, sand.
RESTRICTIONS: No restrictions regarding entry of vessels during day or night.
MAX. SIZE: Any size of vessel handled.
HEALTH: On arrival, Master to signal Port Health Officer stating all crew well and requesting free pratique. In event of any crew member suffering from suspected infectious disease, Master to advise Agents sufficiently in advance to enable Port Health Officer to board vessel on arrrival. No free pratique necessary whenever vessels call from another Indian port.
RADIO: No radio station. Cables routed through Madras Radio (call sign VWM).
TUGS: None.
BERTHING: No berths.
STEVEDORES: ETA advice required 72 hours in advance to enable stevedores to make adequate arrangements for handling cargo. Average rate of discharging bagged fertiliser 750 tons, and for loading iron ore 2,000 tons per day, expected to increase to 3,000 tons per day.
MEDICAL: No advance notice required unless vessel arrives with crew member requiring immediate medical attention. Seamen can be treated at Municipal Dispensary at Old Town near port and also at Government headquarters hospital in charge of District Medical Officer at New Town about 6.5 km. from port.
DENSITY: Density of water 1024. State of tide does not affect density.
FRESH WATER: Boat with 16.5 tons capacity which goes alongside steamer and this quantity of water supplied. If one steamer at anchorage boat makes 2 trips a day and about 33 tons of water supplied.
FUEL: None.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended in interest of ship to avoid pilferage. 3 watchmen night and day per shift of 8 hours.
OPENING/CLOSING HATCHES: By stevedores.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Deratisation Certificate.
Last Port Bill of Health Authority.
Last Port Clearance.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each crew member to be held out of bond. Wine/Spirit, 1 open quart bottle per crew member permitted to be held out of bond.
CARGO GEAR: Register of cargo gear and machinery to be maintained up to date and to be attested by competent authority.
IDENTIFICATION CARDS: Needed.
CONSULS: None.
REPAIRS: Minor repair facilities available.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Nearest airport at Madras, distant 118 miles.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Cargo work arranged on all holidays except Republic Day, Gandhi's Birthday, Pongal Karinal, Masimagam, Pennayar Festival, Independence Day and Deepavali, on payment of overtime.
POLICE/AMBULANCE/FIRE: Tel. Police 24; Fire and Ambulance 99.
GENERAL: Private launches arranged for purposes of crew going ashore. Such launches ply between 0600 and 1700 hrs. Laundry, provisions, etc., can be arranged.
SERVICES: Cleaning of hatches after discharging cargo available.
SHORE LEAVE: Crew members permitted to go ashore within municipal limits.
DELAYS: No delay of anchoring of vessels. Cargo work carried out during day. No night work.
AUTHORITY: Port Officer, Cuddalore.

HALDIA: 22.00 N. 88.05 E.

Subsidiary port of Calcutta, situated on West bank of Hooghly River and 56 miles downstream of Calcutta.
DOCUMENTS, PRATIQUE: All general information; refer to "Calcutta".
MAX. SIZE: Possible for vessels with 40 ft. draft for about 70 days in year as dredging and other corrective works progress in estuary. Expected by 1974, vessels with 40 ft. draft to use Haldia almost through year, with 42 ft. for 209 days and drawing 44 ft. for about 70 days in year.
BERTHING: Project in its first phase is expected to be completed by 1973, envisages following.

1. An Oil Jetty – to provide berthing accommodation for super-tankers with LOA of approximately 875 ft. and draft up to 42 ft.
2. A Finger Jetty – equipped with grab-bridge cranes capable of transferring salt, rock phosphate and other bulk cargo from ship to barge, or vice versa at an average rate 5,000 tons per day.
3. A Coal Berth – capable of loading bulk carriers of the 60,000 d.w.t. class at rate 3,000 t.p.h.
4. An Ore Berth – rate of loading 6,000 t.p.h. and with provision for increasing to 8,000 t.p.h. Accommodation for carriers up to 80,000 d.w.t.
5. A Fertiliser Berth – for handling rock phosphate and sulphur from ships up to 50,000 d.w.t. class at a rate of 6,000–8,000 tons per day.
6. Two general Cargo Berths – each with a quay of 720 ft. and 120 ft. wide and back-up area of 18 acres. Both will have adequate cranage, latest in cargo handling machinery and direct rail-road facilities. One berth will have a modern 100,000 sq. ft. transit shed and a 30-ton payload Portainer Crane for handling containers.
7. Container Marshalling Yard – area 180,000 sq. ft. served by 2 rail–mounted Transtainer Cranes of 30-ton payload, capable of storing 1,500 containers at a time.

AUTHORITY: Calcutta Port Commissioners.

HONAVAR: 14.16 N. 74.27 E.

DOCUMENTS:
Crew Lists.
Passenger Lists.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's Papers.

PILOTAGE: Open roadstead port. No system of pilotage. Pilot is, however available, on requisition by Master or Agent.
ANCHORAGE: Distance off 3 miles, depth of 5.5 fathoms.
MAX. SIZE: No restrictions on length and breadth. Generally up to 34 ft. draft vessels can anchor within 2 to 3 miles from entrance.
HEALTH: Port Health Officer grants pratique as and when necessary, on requisition.
RADIO: Wireless station at Karwar.
BERTHING: No berthing facilities. Ships anchor on open roadstead.
MEDICAL: Proper hospital facilities available only at Karwar about 60 miles North. At least 24 hours advance notice ETA to be communicated to Agents.
DENSITY: Varies 1020/1025.
FRESH WATER: Very small quantities available. No arrangements for delivery to ships.
FUEL: None.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: All ship's papers such as Certificate of Registry, WT Certificate, Safety Equipment Load Line, etc., to be on board for verification.
CARGO GEAR: Cargo gear Test Certificates, etc., to be produced.
IDENTIFICATION CARDS: Needed, if going ashore.
CONSULS: Nil.
REPAIRS: Nearest workshops undertaking major repairs available at Mormugao. Minor repairs may be carried out at Karwar.
DRY DOCKS: None.
REPATRIATION: Facilities available.
AIRPORT: Belgaum, about 178 miles.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Charter Party Holidays observed. Cargo work can be arranged on holidays. Dates of holidays vary from year to year.
POLICE/AMBULANCE/FIRE: Police 48; Ambulance 32; Fire Kumta 20.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Generally no delays are expected.
AUTHORITY: Port Officer.

JAKHAU: 23.15 N. 68.37 E.

LOCATION: In Gulf of Kutch, on Godia Creek about 5 miles inside Aratian Sea. Port is about 7 miles West of Jakhau. Small sub-port exporting salt utilised by foreign-going and coastal traffic. Vessels calling Jakhau anchor in open roadstead about 6 miles off shore. Highest tidal range 14 ft. Current parallel to coast running about 4 knots.
AUTHORITY: Assistant Conservator Jakhau–Kutch.

KAKINADA: 16.56 N. 82.15 E.

DOCUMENTS: *(a)* To be supplied by Master on arrival:
Ship's Register.
Safety Equipment Certificate.
Safety Radiotelegraphy Certificate.
International Load Line Certificate.
Bill of Health, if coming from a foreign port direct.
Deratisation Certificate.
Last Port clearance.
ILH Dues Receipt, if coming from an Indian Port.
Crew List: 6 copies to Agents, 2 copies to Emigration Dept., 2 copies to Customs.
Customs Circulating Copy, if coming from another Indian Port.
Import Manifest of Stores (Store List).
Private Property Statement of crew and officers.
(b) Master to sign following certificates, in prescribed forms, presented by Agents, on arrival:
Port Entry.
Port Clearance.
Customs Entry.
Customs Clearance.
Departure.
Health.

PILOTAGE: No pilotage.
ANCHORAGE: *Allotment of Anchor Berths:*
Masters of vessels calling at the Port of Kakinada should cable the following information to the Port Officer directly, 24 hours before their arrival off the Port:—
(a) ETA (Indian Standard Time)
(b) Total cargo for loading/discharging at Kakinada and nature of cargo.
(c) Hatchwise distribution.
(d) Declaration of hazardous, inflammable and explosive cargo.
(e) Declaration of vessels winches in good working condition.
(f) Draft Fore and Aft.

A specimen cable covering the above is quoted below:
"Port Officer Kakinada STOP Vessel XXX ETA Kakinada 22/10 0900 Local Time quantity loading 9,500 tonnes rice bran extractions hatch one 1,000 hatch two 2,000 hatch three 3,000 hatch four 3,000 hatch five 500 no hazardous inflammable explosives STOP All winches derricks good working condition draft fore 8 m. aft 9 m."

The above cable sent to the Port Officer (in addition to the cable sent to their Agents as per normal practice) will facilitate proper anchoring instructions from Port authorities to the Masters and avoid difficulties in Port operations.

Masters should also keep watch on VHF Channel 16 to receive instructions from Port control and contact Port control on arrival at the approaches to the Port.

Specific instructions will be given by the Port Officer through Port control in respect of anchorage positions. When once anchored as above, Masters should not shift their position without specific reanchorage position given by the Port Officer, unless in case of emergency in regard to the safety of the vessel.

Masters of vessels calling at this port are advised to be in possession of the latest navigation chart corrected up to-date. The Indian edition available is 3009 "Approaches to Kakinada Port" with an inset of Kakinada Bay.

Main engines should not be immobilised without specific permission from Port authorities.

The Goadvari point (sand spit) is extending Northwestwards at a rate of about 170 ft. per annum and a port hand buoy (flashing red) 5 secs. is installed at the tip.

The holding ground anywhere in the anchorage is considered excellent (soft mud and sand).

MAX. SIZE: No restriction. Vessels any size can anchor.
HEALTH: Whether vessel coming from foreign port or port in same country, pratique is automatic, unless vessel is in quarantine. Master has to send message to Agents "All Well" by wireless or any other means. If vessel is in quarantine, Master to send advance cable to Agents to arrange health inspection, vaccination, etc., and then pratique.
RADIO: Radio stations are Visakhapatnam and Madras.
VHF: VHF radio station is in the Port Office (Port Control) on International frequency, Channels 16 and 12, communication from ship/Port control and vice versa. If ship requires communication on channel 12, it should be advised in advance to prepare machine accordingly.

The Port control VHF functions round the clock at the following specified times:–
0045 to 0100 hrs.
0345 to 0415 hrs.
0545 to 0615 hrs.
0745 to 0815 hrs.
1045 to 1115 hrs.
1245 to 1315 hrs.
1445 to 1515 hrs.
1745 to 1815 hrs.
1945 to 2015 hrs.
2245 to 2315 hrs.
all times Indian Standard Time.

TUGS: There are 5 small tugs for towing cargo lighters.
CARGO LIGHTERS: There are 77 sailing cargo boats with total capacity of 5300 d.w.t. tons. In addition 5 self-propelled mechanised barges each of 250 d.w.t. owned by the Port authorities will be ready by March 1977.
STEVEDORES: Gangs engaged by party doing stevedoring work. In case of liners, Agents attend. In case of chartered vessels, consignees/shippers attend. Master to give ETA with no. of hatches to be worked on arrival. Revised ETA to be sent whenever there is change.
MEDICAL: Government hospital available with specialists. Private nursing homes also available with efficient physicians and surgeons. Agents arrange medical aid on advance intimation. Being roadstead port, launches have to be arranged, hence advance intimation of 6 hours necessary through signal station while in port.
DENSITY: Ranging from 1010 to 1025.
FRESH WATER: Privately owned self propelled barge available for supply up to 100 tons. Prior arrangements to be made through Agents of vessels.
FUEL: No fuel suppliers. When essential small quantities of 10/15 tons can be arranged from Visakhapatnam, duty paid.
DEVELOPMENTS: Development programmes include: Dredging approach channel, canal protection, transport facilities, port equipment, navigational aids, water supply to the ships, power supply at loading/discharging points and stacking yards at shore, mechanisation of barges, transit sheds, etc.
GANGWAY/DECK WATCHMEN: Arranged by stevedores.
OPENING/CLOSING HATCHES: By ship's crew only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and Spirits: 16 oz. per head per week for those who are eligible for supply by ship.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: No facilities. Only minor repairs to winches, welding work, casting and repairing spare parts.
REPATRIATION: Can be arranged.
AIRPORT: Visakhapatnam 105 miles, Madras 350 miles.
TIME: GMT plus 5.5 hours = IST.
HOLIDAYS: Charter Party holidays are observed. Work is done day and night. Port and Customs also work on holidays and out of office hours on payment of overtime. No work even on overtime payment

on following days: Bhogi, Pongal, Kanumu. Optional holidays to labour on Chollangi Amavasya, in January.
POLICE/AMBULANCE/FIRE: Police 3052; Fire 101; Ambulance 3311.
SHORE LEAVE: Shore permits given by Port Registration Officer (Immigration).
SERVICES: Fresh and dry provisions available.
NOTARY: Available for noting protest.
AUTHORITY: Port Officer.

KANDLA: 23.00 N. 70.12 E.

DOCUMENTS: To be submitted by Masters on arrival:
Customs: Crew List (3 copies).
Crew Private Property List – this should indicate all items they possess (3 copies).
Ship's Stores List (3 copies).
All valid documents of ship in English for verification of customs boarding officer.
Port: Maritime declaration in duplicate.
Health: Valid crew health cards and Deratisation Certificate.
Agents: Stowage Plan, Cargo Manifest and Bills of Lading.
PILOTAGE: Pilot station situated 22° 49.5′ N.; 70° 07′ E. Loaded vessels can cross bar only during high water. Vessel to report at Pilot station 2.5 hours before high water. Masters to keep Agents closely advised of ETA and anchoring time. 12 hours advance notice to be given by Agents for Pilot. No pilot ship or telegraphic address for Pilot station (Outer Tuna buoy). Vessels can contact Kandla Tower through VHF Channel 16. Pilot station 16 miles away from port. During all weathers vessels have to anchor at above position and await Pilot.

Shipmaster's Report: On calling at Kandla, the Pilot advised that anchorage outside a 2-mile range from the Outer Tuna buoy and the Pilot having to board there, increases the pilotage dues by 100 per cent.
ANCHORAGE: Vessels can anchor 1 mile S.W. of above anchoring position. Inside harbour, anchorages allotted by Port Authorities, and Pilots anchor vessels at suitable positions.
RESTRICTIONS: Being a tidal port, entering and leaving of loading vessels depends on tide, and loaded vessels can cross bar at entrance of channel only during high water.

During hours of darkness max. length for tankers is 575 ft.

Ships having speed of less than 9 knots through the water will not be moved in and out of the port of Kandla during hours of darkness.

Berthing and unberthing of ships at the moorings will be restricted to daylight only. Daily draft forecast for crossing Kandla Bar published at intervals by the Kandla Port Trust.
MAX. SIZE: Max. overall length 740 ft. No breadth restrictions.

For oil tankers max. permissible overall length is 700 ft.

Draft according to water on the bar varies between 28 and 34 ft.

Shipmaster's Report: Max. draft, chart datum (=14 ft.)+rise of tide.
PRATIQUE: The Masters of all ships arriving at Kandla are required to send the Port Health Officer, Kandla (cable address "Sandgrodh") a wireless message embodying all applicable terms of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the International Code message, Masters are also required to give the following information in plain language:

(a) Whether there is any abnormal mortality of rats or mice.
(b) Whether there is any monkey on board.
(c) Whether touched or embarked at Aden or Djibouti any person.
(d) Names of all ports touched en-route within preceding 30 days, with dates of departure.
(e) Request for radio pratique.

Upon anchoring Pilot station, cable again Sandgrodh stating time anchored and requesting radio pratique.

In cases where the vessels have touched any yellow fever area within preceding 30 days it is necessary for Master, for good order sake, to certify that all officers and crew/passengers on board possess valid yellow-fever certificates.

The Pilot Officer boarding is authorised to grant free pratique on completion of the Maritime Declaration of Health signed by the Master in cases where vessels have failed to obtain radio pratique for any reason. If the Maritime Declaration is not in order, the Pilot refers the Master to the Port Health Officer who then boards the vessel and grants free pratique after his inspection of the vessel.
RADIO: Within a range of 35 hours off Kandla, vessels can contact Kandla Radio on call sign VWK. Before 35 hours off, Kandla can be contacted through Bombay Radio only.
TUGS: Port tugs join ships inside harbour off berth. Ship's wires used.
BERTHING: The cargo jetty provides 5 alongside-berths with total quayage of 3,825 ft. which can accommodate ships drawing up to 30 ft. loaded draft. The cargo jetty is served with 21 electric level luffing cranes, 16 of 3 tonnes, 4 of 6 tonnes and 1 of 10 tonnes capacity for handling cargo from ships.

3 mooring berths are available near the cargo jetty. In addition, there are separate moorings for *(a)* ships loading salt, *(b)* deep draft mooring for ships up to 37 ft. draft.

The Bunder basin has 3 wharves, two wharves with transit sheds. The South wharf is served with 4 quay electric level-luffing cranes of 3 to 10 tons capacity for handling cargo from lighters. The North Wharf is for country craft. The West wharf is provided with a 60 tons capacity electric gantry crane.
STEVEDORES: Minimum 24 hours notice required for arranging stevedoring labour and gangs. Bulk fertiliser and grain average 1,000 tons and 1,500 tons respectively. General cargo 250 tons per hook, subject congestion prevailing in sheds, wharves, warehouses and clearance, and on number of vessels working at particular period.
MEDICAL: Private Doctors' services available for vessels at berth. For vessels at Pilot station or inner anchorages minimum advance notice of 12 hours and 6 hours respectively required. Very limited facilities of private practitioners. No hospital facilities. Inoculation and vaccination carried out by Port Health Officer (a Government body) – minimum 48 hours notice required.
TANKERS: Tankers with max. over-all length of 700 ft., 35,000 tons displacement and 34 ft. draft permitted to berth. 3 main pipe-lines connected to tanks situated about 10 km. from berth, 2 generally used for white oils and one for black oil. White-oil pipe-lines diameter 12 in. and black-oil pipe-line diameter of 16 in. In addition, one 8 in. diameter pipe-line for soyabean oil, one 3 in. diameter pipe-line for acetone and one 4 in. diameter pipe-line for formaldehyde and one 12 in. diameter pipe-line for Phosphoric Acid imported by Indian Farmers Fertiliser Co-operative Ltd.

Shipmaster's Report: Tankers will sometimes be brought in to the port even though a berth may not be available at that time. Such vessel will then be moored to a mooring buoy close to the jetty, awaiting her berth at the tanker pier. Mooring to this buoy is effected by use of the vessel's starboard anchor chain, so that the anchor has to be disconnected from the chain before entering.

In securing alongside the oil-pier, tankers are required to utilise 1 insurance wire fore and aft as supplied from shore. In addition vessel is required to use all her available ropes and wires owing to strong currents – 4 head-ropes, 2 breast-ropes, 2 springs.
DENSITY: Varies from 1020–1030.
FRESH WATER: Can be supplied through shore pipe connection and barges.

Shipmaster's Report: Water is very scarce and should be ordered at least 3 days prior arrival.
FUEL: Furnace oil (heavy oil) and light diesel oil can be supplied. Usually 12 hours advance notice required for bunkering. In event of oil tanker discharging at berth, bunker supply can only be commenced 18 hours after completion of discharge by tanker. Quantities up to 500 tons supplied by tank trucks, above 500 supplied through pipe-lines if berth vacant. However, any quantity can be supplied by tank trucks.
FIRE PRECAUTIONS: 3 sea water fire fighting pumps installed at oil jetty. These pumps are under charge of fire brigade officers and have adequate fire fighting equipment. A tug fully manned with fire fighting arrangements also available at short notice.
DEVELOPMENTS: Berths and bar continuously under dredging and drafts will increase in future.

Ministry of Agriculture is installing a Marine Unloader with rated capacity of 500 tonnes per hour for discharging bulk fertiliser and its raw materials. Expected to be completed by end of 1976.
GANGWAY/DECK WATCHMEN: All ships engage 2 watchmen round the clock at gangway. To look after mooring lines, 8 mooring men (4 each at fore and aft) are engaged round the clock.
OPENING/CLOSING HATCHES: Unless specified in relative Charter Party to contrary, ship's crew to accomplish this work.
SHIP CERTIFICATES:
Registration.
Safety Equipment.
Safety Radio and Telegraphy.
International Load Line.
CUSTOMS ALLOWANCES: 200 cigarettes per week per person. Wine and/or Spirit: 2 pegs of spirit per person per day or 4 pints beer.

Shipmaster's Report: Very strict Customs supervision, particularly in regard to declaration of foreign currency.
CARGO GEAR: Ships should possess valid Cargo Gear Certificates.
IDENTIFICATION CARDS: Required. See "Shore Leave"
CONSULS: Nil.
REPAIRS: Minor repairs carried out. Chipping and painting work also carried out.
DRY DOCKS: A floating dry dock to accommodate small craft up to 70 m. (230 ft.) in length, 10.7 m. (35 ft.) beam and 3.1 m. (10 ft.) draft of max. weight 500 m./tons for repairs, available.
REPATRIATION: Though adequate facilities not available, this can be done in case of necessity.
AIRPORT: Situated about 15 km. from port.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Holidays for each year declared by Port Authorities, are Republic Day, Idu'l Zuha, Muharram, Holi (2nd day), Chetichand, Ramnavami, Good Friday, May Day, Independence Day, Janmashtami, Mahatma Gandhi's Birthday, Dussehra, Diwali (New Year Day), Idu'l Fitr, Guru Nank's Birthday, and Christmas.
TELEPHONES: Available on board, only for oil tankers.
GENERAL: Port equipped with 21 electric level luffing shore cranes of 3 to 10 ton capacity used for discharging all ships alongside cargo jetty. For discharging tankers with bulk grain port's vacuvators belonging to Food Corporation of India used.

Kandla port is a prohibited area where entry and exit are restricted to those persons having bona fide work only. Masters are requested to exercise a strict check at the gangway in order to ensure that only those persons with bona fide business to transact are allowed aboard. In the event that any unauthorised person is found to be aboard the vessel, the matter should be reported to port officials and the police on duty.

Masters are requested to advise their crew in advance of arrival at Kandla that photography within the port area is strictly prohibited, and it is suggested that all cameras should be left in the safe

custody of the Master in order that crew members may not violate this regulation inadvertently and become involved in legal proceedings.
SERVICES: Tank cleaning by shore labourers. Tank washings and residue not allowed to be discharged in port area.
REGULATIONS: Photography in port area prohibited. No Crew members allowed to take with them liquor of any kind ashore and not permitted to drink liquor outside port limit.
AUTHORITY: Kandla Port Trust.

KARWAR: 14.48 N. 74.06 E. (See Plan)

PORT LIMITS: *North.* A line drawn from Dayamada Point to Parker Rock.
East. Seashore of Karwar bay from Dayamada Point to Badchidar Point 50 yards above high-water mark including Baithkiol Cove, Kalinady and all branches thereof as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including all islands and thence to Mogera Guda Island (including Mogera Guda Island). All patta lands and other private sites excluded.
South West. A line drawn from Mogera Guda Island through Gudsav Sunv, Westernmost point of Mandal Island to Parker Rock.
DOCUMENTS:
8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists (if any).
4 Import Manifests.
1 Last Port Clearance.
PILOTAGE: The approach from Northward is between Oyster Rock Lighthouse and 2 front and rear leading lights on Simshigudda and Kurmagad Islands, respectively, in positions Lat. 14° 50′ 11″ N. Long. 74° 05′ 43″ E. and Lat. 14° 50′ 33″ N. Long. 74° 05′ 59″ E. Vessels approaching from Southward may enter between Oyster Rock Light and Karwar Head. Currents in bay are negligible. Ocean-going steamers are piloted by Departmental Port Officer who is a licensed Pilot. No pilotage charges at present.
ANCHORAGE: Anchorage for shallow draft steamers is with the Port Signal Station, bearing 120° (T), distance 1 to 2 miles, or Oyster Rock Lighthouse, bearing 278° (T), distance 2.5 miles in about 24 to 28 ft. of water. Anchorage for deep drafted ships is with the signal station, bearing 099° (T), distance 3 to 3.5 miles in depths of 38 to 42 ft.
RESTRICTIONS: No entry restrictions. Karwar Bay may be entered on either side of Sunghiri Island, according to draft and anchorage taken as required. A vessel can enter Karwar either by day or night after having made lighthouse on Devghad Island.
MAX. SIZE: Any size of vessel can be worked as loading and unloading operation done in open sea. Depth at Outer Roads over 7 fathoms increasing accordance distance from land.
HEALTH: District Civil Surgeon acts as Port Health Officer. Free pratique to incoming vessels from foreign ports granted by radio. All vessels calling from foreign destination must give radio message addressed "Civil Surgeon Karwar" at least 48 hours prior entering port giving last port of call, number of crew, health conditions, approximate time of arrival and requesting pratique, same message must be repeated to Agents who obtain pratique on shore. Anchoring time is pratique time. For vessels calling from an Indian port, pratique not required.
Vessels which have taken on board passengers or crew from yellow fever areas, within 30 days of departure from such ports will be under quarantine. Free pratique will not be granted until such time as a mosquito search party, from nearest major port (e.g. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship is fit for granting pratique.
Necessary for Owners or Masters to inform Agents well in advance in case of vessel arriving from yellow fever area to enable arrange mosquito search party and quick pratique.
RADIO: ETA and pratique messages should be sent via Goa or Bombay Radio as Karwar Radio has been shut down.
TUGS: No tugs necessary as vessels work in stream.
BERTHING: No berth, vessels work in open sea. Baithkol Cove is safe berthing place for lighters. Alongside wharves 10 to 12 smaller vessels can obtain safe berth with depth of 6 to 8 ft.
STEVEDORES: 48 hours notice ETA required order enable Agents advise shippers and stevedores to keep cargo and labourers ready. Main commodity export of ore. Mechanised barge loading operations in port. Ore loading rate up to 4,000 tons per day. General cargo 1,000/1,300 tons per day.
MEDICAL: Good hospital facilities exist. 2 hospitals about 1.5 miles from port. In case of inoculations and vaccination at least 2 days advance notice to be given enabling bring vaccine from nearby town (Hubli or Belgaum) distance 100 and 150 miles respectively.
TANKERS: No facilities for tankers.
DENSITY: 1025.
FRESH WATER: Dumb Water Barge for supply to steamers anchored in open Roadstead.
FUEL: No bunkering facilities for ocean-going vessels. Diesel and petrol storage depots within port for supply to small vessels.
DEVELOPMENTS: Proposed to develop port of Karwar into all-weather intermediate port, with 2 berths and 1 mechanical berth, an approach channel and turning basin. Intended arrangements include ability accommodate up to 60,000 d.w.t. ore carriers, loading up to 8 million tons ore and 1.25 million tons other cargo per year. Also intended develop fishing harbour with facilities accommodate large-scale deep-sea fishing industry for 1 million tons fish per year.
Provision of Channel Marks:
1 Fairway buoy.
10 channel marking buoys.
Provision of a mooring boat with equipment for maintenance of buoys.
Experimental dredging.
Dredging approach channel and turning basin.
Land acquisition for future expansion.
Diversion of present main road alongside port wharf.
Improvement of Binga/Karwar Road.
Provision of 2 berths and 1 mechanical berth for ocean-going steamers.
OPENING/CLOSING HATCHES: Generally carried out by ship's crew.
CERTIFICATES:
Ship's Register.
Cargo Gear Certificates.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derating Certificate.
Vaccination and Inoculation Certificates.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits.
CARGO GEAR: Before commencement of loading, Master to present shippers or their Agents with valid international cargo gear certificate, which shall not be more than 12 months old. Validity of said certificate to cover whole period for loading and discharging. Fourth five-year plan includes proposals for mechanical front-end loaders, tipping trucks, mobile cranes and forklift trucks.
A 10 ton mobile crane is available.
CONSULS: None.
REPAIRS: Moderate-sized workshop in town able carry out minor deck and engine repairs.
REPATRIATION: Shipping Master arranges crew changes and necessary repatriation. Crew signing off repatriated via Goa or Bombay.
AIRPORT: No airport, or rail connections. Nearest airports Goa or Belgaum, 60 and 150 miles distant respectively. 2 flights per day to Bombay from Goa.
TIME: GMT plus 5.5 hours. Permanent.
HOLIDAYS: Charter party holidays declared and published every year by Honorary Secretary of the Karnatak Chamber of Commerce and Industry, Jaya Chamaraj Nagar, Hubli-20.
Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).
POLICE/AMBULANCE/FIRE: Circle Police Inspector 116; City Police Station 33; District Superintendent of Police 7; Reserve Police Headquarters 18; Ambulance 19.
GENERAL: Port functions normally from 16th September to 15th May. Port closed from 16th May to 15th September due S.W. monsoon.
SHORE LEAVE: Crew members are allowed ashore provided not of Chinese nationality.
AUTHORITY: Office of the Port Officer.

MADRAS: 13.06 N. 80.18 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port:
To the North: A line "NP" running from a point in position "N" Lat. 13° 7.2′ N. Long. 80° 17.95′ E. to a position "P" in Lat. 13° 12′ N. Long. 80° 25′E.
To the South: A line "SQ" running from a point in position "S" Lat. 13° 4.1′ N. Long. 80° 17.25′ E. to a position "Q" in Lat. 13° 2′ N. Long. 80° 25′ E.
To the East: A line "PQ" connecting the Eastern extremities of the above described North and South boundaries, that is from point "P" in Lat. 13° 12′ N. Long. 80° 25′ E. to point "Q" Lat. 13° 2′ N. Long. 80° 25′ E.
DOCUMENTS:
3 Private Property Lists.
3 Stores Lists (Bonded Stores).
3 Crew Lists.
1 Last Port Clearance.
1 Valid Derat Exemption Certificate.
1 Bill of Health (only if vessel has touched yellow fever areas).
3 Slop Chest Declarations.
3 Currency Declaration.
Passenger List (if applicable).
Ship's Papers.
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Ship's articles (if vessel is Indian or Commonwealth flag).
Ship's papers to be handed over to Agent's Representative for final entry of vessel in Customs House. Same returned to Master.
PILOTAGE: Pilotage compulsory, both inward and outward, also for purpose of shifting inside harbour. Master required to advise ETA at least 48 hours before arrival, when local Agents contact Harbour Authorities for arranging berthing. If any berthing delay vessel has to anchor at Outer Anchorage – anchoring point below 10 fathoms line from breakwater light. Vessels requiring Pilot fly

"G" flag by day and 1 white light exhibited on a conspicuous point on ship by night.

ANCHORAGE: Good anchorage found with breakwater light bearing between 240° and 300° – distance 1 to 3 miles.

RESTRICTIONS: No restrictions of entry. Both day and night navigation. In "Jawahar docks" restriction of movement (sailing/shifting) during night time from 2200 hrs. to 0600 hrs. Tankers of 50,000 d.w.t. and over are berthed during daylight only. Tankers of 30,000 d.w.t. are berthed and unberthed at Bharathi Dock from 0600 hrs.–2200 hrs.

MAX. SIZE: Max. length South Quay III is 519 ft. Max. length Jawahar Dock is 750 ft. and breadth 100 ft. Max. length of 850 ft. for oil tankers using the "Bharathi Dock" is in force for the outer oil dock jetty during the fair weather season from January to October. During the period from October to January in the North-East monsoon period maximum size of vessel is restricted to 750 ft. with suitable draft restrictions.

Draft in the enclosed harbour varies from 26 ft. to 35 ft. Draft at the outer oil berth during fair weather season is 46 ft.

Details may be obtained from the Deputy Port Conservator, Madras Port Trust, Madras – 600001.

Outer Harbour: Vessels up to 42 ft. draft.

HEALTH: All vessels arriving from foreign ports have to apply for pratique through their radio – not earlier than 12 hours and not later than 4 hours before arrival. Pratique message to be addressed "Quarantine Madras" and worded as required by Port Authorities on receipt of which Port Health Officer cables ship granting pratique. In case of any infectious disease on board, Port Health Officer boards vessel and after due inspection grants pratique.

Telegram should take the following form: Name of vessel. ETA, in hours and date. No abnormal mortality of rats. No monkeys on board. Ship has not touched at any port on East Coast of Africa, Southernmost Tanzania or any yellow-fever infected area for last 30 days. Request radio pratique.

Port health require to sight derat and vaccination certificates when vessel due to leave before issuing clearance for Pilot and Customs who then issue port clearance.

RADIO: Coast Station Madras Radio, call sign VWM. Information regarding weather distributed twice daily. VHF communication available on Channel 16. Pilot station on Channels 10, 12 and 14, open round the clock to transmit and receive berthing and other operational messages.

Radar is likely to be installed at the signal station.

RADAR/VHF: VHF communication available, see "Radio".

TUGS: Join vessel just inside breakwater. Vessels use own lines and no tugs' lines used/supplied. Tugs' lines are also used if required by Pilot.

BERTHING: Vessels berth at all times except in "Jawahar Docks" where there is no night navigation between 2200 hrs. to 0600 hrs.

There are in all 18 general cargo/bulk cargo berths and 3 moorings. Drafts of these berths/moorings vary from 26 ft. to 35 ft.

There is an exclusive oil berth in the Outer Harbour with a draft of 42 ft. capable of being deepened up to 49 ft.

An iron ore berth with modern mechanical loading facilities is under construction and is expected to be completed by early 1975.

The Outer Harbour has the potential for accommodating 3 more berths 1 of which can be converted into a container berth.

Outer Harbour present draft is 42 ft. and it is likely to be increased to 49 ft. at a later stage.

BRIDGES: There are 2 bridges for pedestrian traffic only. 1 swing bridge at the entrance of Jawahar Dock and another Bascule bridge at the entrance of boat basin.

CRANES: Heavy duty floating crane capacity 120 tons available.

STEVEDORES: A copy of Manifest for stevedores' on board required.

Working hours: 1st shift, 0630–1530 (Recess 1130–1230); 2nd shift, 1530–2230 (Recess 1930–2000); 3rd shift, 2230–0530 (Recess 0200–0230).

MEDICAL: Advance notice for medical aid useful if vessel anchored/anchoring outside and not coming alongside, as it takes time to arrange for launch, etc. Medical assistance arranged easily if vessel alongside. Various hospitals and private nursing homes with modern equipment available. All crew members to be in possession of valid health cards in respect of inoculations/vaccinations against smallpox, cholera, etc. Facilities for renewal available.

TANKERS: There is an oil berth with 42 ft. draft at the Outer Harbour with 5 unloading/loading arms, 3 for unloading crude and 2 for handling refined products at a rated capacity of 1,500 tonnes per hour per arm. There are 2 moorings with 30 ft. draft in the inner harbour for non-dangerous petroleum products.

Manifold is equipped with 300 mm. Quick fixing cam lock coupling.

Facilities for deballasting the oil tanker are provided.

BULK HANDLING FACILITIES: There are 4 berths, 3 in the Jawahar Dock and 1 in South Quay, which can handle iron-ore semi-mechanical means. Loading capacity 3,000 tons/day at South Quay III and 12,000 tons/day at Jawahar Dock East.

RATE OF DISCHARGE/LOADING: Grains, by hooks/derricks:

Bulk: 300 tons per day per hook.
Bagged: 300 tons per day per hook.
By Vacs: 250 tons per Vac. per day.

Fertiliser. By hooks/derricks.

Bulk: 200 tons per day per hook.
Bagged: 300 tons per day per hook.
General Cargo: 150 tons per day per hook.
Liquid Cargo: About 150 t.p.h.

CRANES: Four 13-tonne cranes in use, 2 similar will be available shortly.

DENSITY: Varies from 1019 to 1025 according to season. No variation due to state of tide.

FRESH WATER: Available and can be supplied to vessels either through shore connections or by water barges. During Summer months due to scarcity of water, full requirements of vessel may not be possible.

FUEL: Bunkers available, but supply dependent on stock position. At least 48 hours advance notice required. Suppliers should receive nomination from their Head Office. Companies supplying bunkers are:

The Indian Oil Corporation Limited.
Caltex (India) Limited.
Esso Standard Eastern Inc.
Burmah-Shell Oil Storage and Distributing Company of India Ltd.

Usual rate of bunkering is about 40 to 80 t.p.h. Grades of fuel available:

Fuel oil, 700 Secs. Redwood No. 1 at 100° F.
L.D.O., 70 Secs. Redwood No. 1 at 100° F.
Gas oil, 30/30 Secs. Redwood No. 1 at 100° F.

GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and they can be engaged from Dock Labour Board.

OPENING/CLOSING OF HATCHES: Work of opening/closing of hatches usually depends on what Charter Party says and also type of hatches of vessel. Liner Term Vessels:-"McGregor Type" – These types of hatches are opened/closed by the crew; but, if Owners/Master desires, rigging gangs may be hired for this work at Owner's expense. Ordinary – Beams & Hatch Boards or Pontoon Type-Opening/closing of this type of hatches is done by stevedores.

CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes and half-ounce tobacco per week can be held by each crew member. Wine/Spirit. 1 open bottle of spirit or wine per week can be held by each crew member.

CARGO GEAR: Vessel should be in possession of valid cargo gear certificate issued by competent authority. Port Dock Safety Inspector may inspect cargo gear before or during loading/discharging in spite of vessel being in possession of a valid certificate.

IDENTIFICATION CARDS: All crew members should be in possession of their respective CDC's/Z. Cards/Passports.

CONSULS:

U.S.A.	Tel.	83041	Japan	Tel.	88677
Australia	,,	811393	Netherlands	,,	86411
Britain	,,	86311	France	,,	444203

Denmark	,,	22088	U.S.S.R.	,,	73077
Germany	,,	82125	Ceylon	,,	85316

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

DRY DOCKS: None.

REPATRIATION: All facilities for effecting crew changes and arranging repatriation exist.

AIRPORT: The Madras Airport (Meenambakkam) about 15 miles from harbour and served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Declared by authorities are observed, but work completely closed on: Pongul, Republic Day, May Day, Independence Day, Mahatma Gandhi's Birthday and Deepavli.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 101; Fire 101.

TELEPHONES: Can be placed on board, but only on vessels at certain berths. All berths on West Quay, i.e. WQ 1, WQ 2, Centre Berth, WQ 3 and WQ 4, North Quay berth and berths on Jawahar docks (West) only, i.e. JD 1, JD 3 and JD 5.

SERVICES: All special services available.

SHORE LEAVE: Crew members allowed ashore after securing shore passes issued by port security officer. However, they must restrict themselves to city limits.

PORT REGULATIONS: Normal Port Regulations. No photography allowed in harbour except with Chairman of Port Trust's permission.

DELAYS: When there is heavy arrival of bulk grain and fertiliser, vessels may expect a delay of about a week or so. General cargo vessels may expect a delay of about 2/3 days during congestion.

AUTHORITY: Madras Port Trust.

MANDVI: 22.49 N. 69.21 E.

DOCUMENTS: Arrival: Arrival Report with ship's details, Voyage Memorandum, Crew Lists, Stores Lists.

Departure: Departure Report with ship's details, Export General Manifest, Certificate of Cargo Tonnage Loaded.

PILOTAGE: None. All vessels anchor in stream.

RESTRICTIONS: Vessels anchor in open roadstead in 3–5 fathoms, 2–2.5 miles from shore. Vessels of 9 ft. draft can reach wharves at high water and vessels drawing 12 ft. can reach Albert Edward breakwater. Vessels having 60–70 tons cargo only can enter port during high tide. Highest tidal range 14 ft., average range 10 ft. Current 2 knots during fair season.

HEALTH: Government Medical Officer attends as health officer.

RADIO: No radio. All messages delivered through Kandla.

TUGS: Services optional 3 tugs and 1 launch. Charges basis time and BHP.

STEVEDORING: Arranged by Agent with Port Authority.

MEDICAL: 24 hours notice required of any medical requirements.

FIRE PRECAUTIONS: Fire extinguishers are available at the port. Fire fighter is available at the Port workshops. Smoking strictly prohibited in port area.
WATCHMEN: Arranged through Agents.
HATCHES: Opened and closed by crew.
CERTIFICATES: Non-carriage of dangerous cargo, Cargo Gear Certificates, Statement that no passengers carried.
CUSTOMS ALLOWANCES: No restrictions for crew of coastal vessels. Stocks of tobacco, wine and spirits to be declared to Customs. Wines and spirits prohibited in Gujarat States but Master permitted daily quota by Customs Authorities.
REPATRIATION: No facilities.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Usually possible to arrange work on holidays.
POLICE/AMBULANCE/FIRE: Police 8; Ambulance 32; Fire 10.
GENERAL: Gulf of Kutch Ports, viz. Mandvi, Mundra, Jakhau and Koteswar administered by Director of Ports, Gujarat States, Ahmedabad. Mandvi located on Southern coast Gulf of Kutch at mouth of river Bukmavati, seasonable, tidal and intermediate ports.
SHORE LEAVE: Crew of coastal vessels only allowed ashore subject prior permission from Captain of the Port.
DELAYS: Delays to be expected in supply of cargo at times of lowest water.
AUTHORITY: Deputy Engineer & Port Officer.

MANGALORE (Minor Port): 12.55 N. 74.52 E.

PORT LIMITS:
North: A line drawn due West from the Northern boundary pillar on the seashore about 740 yards from Sultan's Battery to 9 fathoms of water.
South: The line drawn due West from the Southern boundary pillar to the seashore, about 1,000 yards below the marine yard to 9 fathoms of water.
West: The 9 fathom line between its intersections with the lines above defined as the Northern and Southern limits.

DOCUMENTS:
Crew Lists (6 copies).
Crew's declarations for Customs (4 copies).
Store Lists (4 copies).
Currency declaration (2 copies).
Import Manifest inclusive of Deck Cargo and bottom cargo (3 copies).
Bill of Lading (1 copy).
Ships particulars inclusive of service stand (2 copies).
Declaration of opium, dangerous drugs, gold, arms, ammunitions and explosives, monkeys on board, last and next port of call (2 copies).
Arrival report and Port and Light dues receipts (2 copies).

PILOTAGE: No pilotage. Open anchorage port. When shifting to nearest safe anchorage, free pilotage assistance rendered by Port Officer.
ANCHORAGES: Vessels anchor in depths of 4.5 to 6 fathoms with Mangalore Lighthouse (12° 50.8′ N., 74° 50.3′ E.) bearing between 250° and 270° (T).
HEALTH: Vessel arriving from foreign country sends radio message in code or otherwise to respective Agents who contact Port Health Officer accordingly. If vessel from yellow fever area Master should give prior notice to Agent to arrange for Mosquito Party from Cochin to come to Mangalore and board ship on arrival. If suspected or infected, vessel should anchor not less than half a mile from all other vessels and notify Port Authorities of situation either by radio or through signal station.
RADIO: Call sign VWL on 500 kc/s and 438 kc/s working frequency.
STEVEDORES: Stevedores available. Average loading/ discharging rates per day:
(a) Iron ore 400 tons per hook (weather permitting).
(b) Fertiliser or wheat bags 200 tons per hook (weather permitting).
(c) General cargo bagged 200 tons per hook (weather permitting).

TUGS: 1 Port Trust tug and two launches and 2 private tugs capable of towing over 600 tons each are available.
MEDICAL: 24 hours notice necessary to arrange for a doctor on board. Goverment Hospital and Nursing Homes available.
DENSITY: Density of 1022/3 throughout year except in September (immediately after Monsoon at beginning of shipping season) when density about 1016.
FRESH WATER: Supplied by water barge at rate of 110 tons per trip with 48 hours prior notice. Cost of supply inclusive of all charges except crew overtime on holidays. Minimum order 35 tons.
FUEL: Small quantities not exceeding 40 tons of diesel oil can be supplied by oil barge.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: As per terms and conditions of Charter-Party.
CERTIFICATES:
Ship's Registry.
Deratisation Certificate.
Articles of Agreement.
Dock Safety Register (cargo gear).
Radio Telegraphy Certificate.
Load Line Certificate.
Port Clearance from last port.
Bill of Health.
Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes per week. Wine and spirits, 1 open bottle of spirits per week.
CARGO GEAR: Derricks and boat devices to be hoisted in when not required to prevent contact with masts and sailyards of lighters alongside. Advisable that lifeboats be lowered only on non-working side.
IDENTIFICATION CARDS: Passport or identification cards to be carried by crew plus letter of permission from Master for shore leave.
CONSULS: None.
REPAIRS: Minor repairs to engines and gear carried out by auto-workshops.
DRY DOCKS: Small dry dock, maximum capacity 450 d.w.t. Dimensions, 110 ft.×30 ft. Depth on sill 8 ft. at MHWS. For repairs only.
REPATRIATION: Can be arranged by ship's agents or at shipping office.
AIRPORT: Airport situated 12 miles away. Daily flights to Bombay. Tuesday, Thursday, Saturday to Bangalore. Services by Indian Airlines Corporation.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Port Authorities. Work can be arranged on all holidays except principal Muslim festival days.
POLICE/AMBULANCE/FIRE: Port Police Station 5196. Fire service on lighter wharf only (no fire-floats available), tel. 3333.
TELEPHONE: No arrangement for placing telephone on board.
GENERAL: Port open only in fair season from 15th September to 15th May. However, ships may call at port and work between 15th May and 15th September (weather permitting) with prior permission of Port Officer.
SHORE LEAVE: Permitted, except for Pakistan and Communist-Chinese crew.
DELAYS: Adverse bar conditions necessitate stopping work for bad weather.
AUTHORITY: Mangalore Port Trust Board.

MORMUGAO: 15.25 N. 73.47 E. **(See Plan)**

PORT LIMITS: Roughly up to 10 fathom line running North and South from Cabo to Grand Island. Vessel is considered "arrived vessel" when she comes under direction of Signal Station.
DOCUMENTS:
10 Crew Lists.
10 Passenger Lists.
3 Copies of Manifest.
1 Last Port Clearance.
1 Bill of Lading in case of imports.
3 Stores Lists.
3 Personal Property Lists.
1 Letter of Authority to Agents addressed to Asst. Collector of Customs (prepared on arrival).
1 Arrival Report to Immigration Officer.
1 Customs Declaration.
1 Inward Clearance Certificate.
1 List of Particulars.
1 Deck Cargo Certificate.
1 Arrival Report.
Last 7 items to be signed by Master in port after arrival.
Ship's papers: Documents placed at disposal of port:
Ship's Registry.
Deratisation Classification.
Safety Equipment.
Load Line.
Radio Telegraphy.
Indian Light Dues.

PILOTAGE: Compulsory. ETA required at least 24 hours before arrival to order Pilot. Call Pilot by international code signals on arrival at signal station or contact by VHF Channel 16.
Pilot launch is white launch showing Pilot flag. In fair weather Pilots board West of fairway buoys. In bad weather, Pilots guide vessel from launch until boarding possible. Pilot launch leaves from inner harbour with Pilot and is not stationed at any particular position. International regulations for Pilots' ladders applicable. Vessels awaiting Pilot may anchor 2 miles West of fairway buoy 6.
RESTRICTIONS: Pilotage only during daylight hours. Draft restricted. Deep-laden vessels await high tide. Max. draft permissible 28 ft. to 30 ft. Draft particulars for incoming ships berth No. 3, 4, 5 and 6 – 27 ft., 28 ft., 28 ft. and 28 ft. Max. draft outgoing ships: berth No. 3, 4, 5, 6 and Anchor Buoys 1 and 2: 27 ft., 28 ft., 28 ft., 28 ft., 28 ft., and 28 ft. respectively. Masters of outgoing vessels wishing to load beyond allocated drafts required to obtain permission 24 hours before sailing/shifting and must sail at fixed time.
MAX. SIZE: Length 650 ft., also see "Entry Restrictions". Vessels loading West of breakwater in fair weather: no restrictions on size or draft. Tankers max. length 650 ft. Also see "Developments".
HEALTH: International Regulations apply. Pratique automatic when calling from another Indian port. Pratique granted by Pilot Officer who boards vessel on arrival. Telegraphic pratique can also be obtained from Port Health Officer cable address "Quarantine Mormugao".
Master should send quarantine message not less than 4 and not more than 12 hours prior arrival indicating:
(1) Name of ship.
(2) Expected date and time of arrival.

(3) My Maritime Declaration of Health has negative answers to all 6 Health Questions or ZT or My Maritime Declaration of Health has a positive answer to question (indicated by complements) or ZU (indicated by complements 1–6).
(4) List of ports of call with dates of departure during last 30 days.
(5) Have or have not monkey on board.
(6) Have or have not any person on board embarking at Aden or Djibouti.

Request radio pratique.

RADIO: Goa Radio, call sign VWG. Operating continuously on 500 kHz, 417 kHz, and 2182 kHz. Communication range 500 miles.

VHF radio telephone station at signal station headland, call sign Goa Port, calling Channel 16, working Channel 12.

Ships desiring to contact port on VHF should establish contact by means of *(a)* light signals, *(b)* hoisting "Z" flag, *(c)* blowing "Z" on whistle or siren.

Port VHF station attracts attention of desired ship by hoisting "Z" flag with call letters of ship or by light signalling.

VHF service restricted for port operation, ship's emergencies and movements. All messages to be addressed to Harbour Master. Third party communication not allowed.

TUGS: Tugs usually used inside breakwater. Normally push, but when towing, use ship's lines.

BERTHING: Deep loaded incoming vessels berthed 2 hours before high water. Vessel also use anchor and quarter line to mooring buoy to keep off berth.

BULK HANDLING FACILITIES: One berth equipped for mechanical handling of iron ore. Loading rate about 750 t.p.h. At present vessels of 30,000 d.w.t. and draft of 28 ft. can be accommodated.

The current development project includes provision of iron-ore berth capable of handling vessels of up to 60,000 d.w.t. initially, and 100,000 d.w.t. ultimately with ore-loading plant capacity 8,000 t.p.h.

STEVEDORES: Original ETA of 48 hours and a definite ETA of 24 hours required and Master should indicate stowage and gangs required before arrival, also how derrick booms must be arranged so as to enable stevedores to arrange same on arrival.

MEDICAL: No hospital facilities for any serious sickness but facilities available for first aid, which should be informed 24 hours in advance. Port Ambulance can be obtained during day-time only.

TANKERS: Discharge line 14 in. No loading facility. Berths No. 4 and 5, white oil, and berth No. 6 for black oil. Permissible draft 28 ft.

DENSITY: Salt water 1025 – slightly fresh during monsoon season.

FRESH WATER: Available alongside berths also from 180 tons capacity barge. Pumped by hose at 20 t.p.h. at berth, and 30 t.p.h. from barge. Sometimes restricted to 50 tons maximum if supply is limited.

FUEL:

Grades	*Viscosities*
High speed diesel oil	Less than 45 Redwood
Light diesel oil	41 ,,
Furnace oil (also known as light fuel oil)	of 623 ,,

48 hours advance notice required.

FIRE PRECAUTIONS: During discharge of oil tanker, great care taken that no naked lights are visible nearby. Movements of unauthorised persons at point of discharge strictly restricted. Ships alongside or up to a distance of 100 ft. are advised not to emit smoke through funnel. Round the clock standby duty carried out by Fire Service, around tanker, till completion of cargo.

DEVELOPMENTS: Under the port development scheme the following points are included:

Dredging harbour to 45 ft. with an alongside depth of 48 ft. at new berths to be provided.

Construction of new ore-handling complex for up to 100,000 d.w.t. vessels.

Construction of new oil berth.

GANGWAY/DECK WATCHMEN: Necessary to have watchmen in case of loading general cargo to protect goods. In case of loading iron ore no watchman required.

OPENING/CLOSING HATCHES: Usually by crew, unless contrary to Charter Party.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per crew member per week. Wine and/or Spirit: 4/5ths of bottle per week for each member of European crew. 2/5ths of bottle per week for each member of Asian crew.

CARGO GEAR: Certificates to be valid.

IDENTIFICATION CARDS: Not essential but according to Immigration Rule Police landing pass issued to each crew member going on shore.

REPAIRS: No major repairs. Minor repairs only and no underwater welding facilities.

DRY DOCKS: None.

REPATRIATION: Facilities exist for changing and repatriating crew.

AIRPORT: Approx. 7 kms. from harbour. One local flight daily to Bombay. No international flights from Goa and all outgoing foreign passengers have to be repatriated via Bombay.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Republic Day; Mahashivratri; Holi; Gudi Padva Muharam; Good Friday; Independence Day; Ganesh Chaturthi; Mahatma Gandhi's Birthday; Dussehra; Feast of St. Francis Xaviour; Idu'l Fitr; Goa Liberation Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 234 through Postal Exchange; Ambulance (Health Centre) 215 through Postal Exchange; Fire 105 through Port Exchange.

TELEPHONES: No arrangements for installation of telephones on board.

SHORE LEAVE: Crew members allowed to go on shore with Police landing pass.

AUTHORITY: Mormugao Port Trust.

MUNDRA: 22.54 N. 69.42 E.

LOCATION: In Gulf of Kutch near Navimal Lighthouse, about 2 miles inside Bocha Creek. Port is about 6 miles West of Mundra town. Salt exporting port open for deep sea and coastal traffic. Vessels calling Mundra anchor in open roadstead 2 miles from shore. Vessels of 8 ft. draft can berth alongside jetty. Highest tidal range 17 ft. Current parallel to coastline running about 3 knots.

AUTHORITY: Assistant Conservator.

NAGAPATTINAM: 10.45 N. 79.50 E.

DOCUMENTS: To be completed by Masters of vessels on arrival:
8 Crew Lists.
8 Passenger Lists.
3 Form of Import Manifests of Stores.
3 Lists of articles in slop chest.
3 Private Property. Declaration of the Crew.
3 Manifests.
3 Bills of Lading.

To be handed to Agents:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.

PILOTAGE: No Pilot station, being open roadstead port. Vessels not piloted to anchorage.

ANCHORAGE: Vessels anchor according draft and prevailing weather conditions. In fine weather, good anchorage in depths of 3.75 to 6 fathoms with lighthouse bearing 281° to 255°. Holding ground, sand and mud, good. Agents, in consultation with Port Authorities, signal Master on arrival of vessel, anchorage position for guidance.

MAX. SIZE: No restrictions. Vessels choose anchorage according to draft.

HEALTH: On arrival Master to signal local signal station, addressed Port Health Officer stating vessel arrived and no sick person on board. Agents then obtain free pratique from Port Health Authorities. In event any person having chicken-pox or smallpox on board, advisable that Master informs Agents sufficiently in advance to enable them make necessary arrangements for Port Health Officer to board vessel on arrival and obtain free pratique after Port Health Officer is satisfied that isolation arrangement on board adequate.

RADIO: Madras Radio or Colombo Radio. No radio station locally.

TUGS: Two tugs will be available in the near future.

BERTHING: Open roadstead port. No berths.

STEVEDORES: Port usually handles fertiliser imported on Government of India account and rate of discharge per day about 750 to 1,200 tons. Advisable that ETA of vessel is passed to Agents at least 2 days in advance to enable them to advise receivers to arrange necessary gangs.

MEDICAL: No advance notice required unless sickness of serious nature when Medical Officer boards vessel on arrival. In case of sickness to officers or crew, Medical Officer boards vessel or if in condition to go ashore, necessary arrangements made to take sick crew to Doctor. District Headquarters Hospital with all medical facilities available. Special wards available for sick members of crew. Vaccination, inoculation against yellow fever, cholera, plague, etc., can be arranged.

DENSITY: 1025.

FRESH WATER: Available in limited quantities and dependent upon port getting continuous supply from municipality. 2 tanks of 14.5 tons capacity placed in lighter are sent alongside vessel and a petrol-driven pump is used to pump up water from tanks into vessel.

FUEL: Diesel oil available in a limited quantity.

GANGWAY/DECK WATCHMEN: In the interest of vessel, 2 gangway and deck watchmen daytime and at night to be employed to avoid pilferage.

OPENING/CLOSING HATCHES: Opening and closing of hatches on arrival of vessel before commencement of discharge and on completion carried out by stevedores. Time used for opening and closing of hatches not counted.

CUSTOMS ALLOWANCES: Tobacco, 1 carton per week per crew member. Wine and Spirit, Whisky or brandy 1 quart each member for a week. No restriction for beer as the issue is based on weather, etc. This rule relaxed if necessary.

IDENTIFICATION CARDS: Needed.

CONSULS: None.

REPAIRS: Minor repairs in engine room and on deck can be effected. Chipping and painting can also be arranged.

DRY DOCKS: None.

REPATRIATION: Facilities available for effecting crew changes and arrangements can be made for repatriation.

AIRPORT: Nearest airport Madras, served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Authorities. Vessels work on Charter Party and Government holidays but time not counted. No

closed holidays but overtime charged for any work done on Government holidays and on Sundays.
POLICE/AMBULANCE/FIRE: Police 267; Ambulance 299; Fire 299.
GENERAL: No regular launch service between ship and shore. Agents hire out private launch and obtain permission from port office to ply launch between ship and shore, to facilitate officers and crew to go ashore and for Doctor, Agent and Port Health Officer. Port Authorities do not permit plying of launch after 1800 hrs. 3 trips arranged for launch to go to vessel and back from 0600 to 1800 hrs. every day weather permitting.
SERVICES: Hatch cleaning after discharge of cargo can be carried out.
SHORE LEAVE: Officers and members of crew allowed to go ashore and necessary passes obtained by Agents.
DELAYS: Usually no delay in anchoring vessels and generally all formalities including survey carried out on vessel's arrival. If vessel arrives between 0600 and 1400 hrs., she commences discharge same day.
AUTHORITY: Port Officer.

NAVLAKHI: 22.57 N. 70.27 E.

DOCUMENTS: Arrival:
Last Port Clearance.
Bill of Health/Maritime Declaration of Health.
Customs Arrival Report.
Port Arrival Report.
Agent's Arrival Report.
List of Same Bottom Cargo.
Crew List (6 copies).
Import General Manifest.
Lighthouse Dues Receipt (in case the last port of call being Indian port).
Store List & Private Property List (8 copies each).
Misc. Declaration.
Departure:
Port Clearance (handed over by Customs).
Bill of Health.
Port Departure Report.
Agent's Departure Report.
Income Tax Clearance Certificate (in case of export cargo).
PILOTAGE: Not compulsory. If required an experienced local guide provided by Port Authorities. In such cases Pilot meets vessel at Tuna Buoy Pilot station about 19.5 miles from port.
ANCHORAGE: Open roadstead port. Vessels work in stream. 2 vessels can be brought to inner anchorage and work conveniently. In case a third vessel arrives, it has to anchor at Buoy No. 5 until 1 of the vessels sails from inner anchorage. During non-monsoon times vessels can be moored at Buoy (Navlakhi) No. 5. Chart of the approaches is No. 2017.
RESTRICTIONS: Night navigation risky. Generally vessels' movements during daytime high water period. Vessels should arrive Tuna Buoy 3 hours before high water in daytime.
HEALTH: No Port Health Officer available. Customary for Port Health Officer Kandla to board vessel at Tuna buoy and grant free pratique (in case vessel within 30 days called any other restricted ports). Otherwise Customs Officer grants free pratique after vessel's arrival in port limits.
RADIO: Radio messages intended for this port should be addressed either through Kandla or Bombay Radio Stations.
TUGS: Two tugs available, 191 h.p. and 370 h.p.
CARGO HANDLING: Ships lie at anchor in the stream about 2.5 km. from shore and cargo is shipped/landed through lighters. There are 12 barges of 100 tons capacity and a further addition of 2 more of 100 tons are expected soon. There are godowns of 234,000 sq. ft. floor area to store the cargo passing through ports. There are four 3 tonnes capacity cranes and two of 5 tonnes capacity.
STEVEDORES: At least 24 hours notice to arrange gangs. Rate of loading and discharging for grain and fertiliser about 900 tons a day if 1 ship working; in case 2 vessels working simultaneously, average of about 600 tons can be maintained in fair weather days.
MEDICAL: No facilities available. Small dispensary under control of Medical Practitioner who undertakes emergency cases. Good medical facilities available at Morvi which is 30 miles away, or Rajkot about 60 miles. Generally doctor called from Morvi to attend vessels.
DENSITY: 1025.
FRESH WATER: Supplied only in small quantities. 1 barge with carrying capacity of about 50 tons a trip. Due to very low pressure pipe-lines, minimum 12 hours to fill barge.
FUEL: None available.
DEVELOPMENTS: A new lighter-wharf in Sui-Side creek is under consideration so as to work lighters all round the clock.
GANGWAY/DECK WATCHMEN: Necessary to appoint watchmen on board to avoid possible thefts.
OPENING/CLOSING HATCHES: Depends upon terms of working. Local stevedores generally attend to this operation but charge to vessel (Owners) in case these operations are vessel's account.
CERTIFICATES:
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Ship's Register.
Derating Certificate.
IDENTIFICATION CARDS: Customs examine and issue pass to land. But if crew go to suburbs (beyond Morvi which is 30 miles away), identity cards should be carried.
CONSULS: None.
REPAIRS: Workshop for repairs to port equipment and urgent repairs of minor nature can be carried out.
DRY DOCKS: None.
REPATRIATION: Crew being repatriated from this port would be sent to Kandla (after Customs examination) where facilities are available.
AIRPORT: Navlakhi not connected by air. In case of emergency, Kandla or Rajkot nearest airports.
TIME: GMT plus 5.5 hours.
HOLIDAYS: The port holidays are taken as Charter Party Holidays. Except for some restricted holidays, work will be carried out on payment of overtime.
POLICE/AMBULANCE/FIRE: Checkpost Police Station without telephone.
TELEPHONES: Few important offices are connected with telephones, and no telephone service can be provided on board vessel.
SHORE LEAVE: The crew members are allowed ashore. See "Identification Cards".
AUTHORITY: Port Officer.

NEW MANGALORE: (Panambur) **(See Plan)**

Situated at Panambur. 9 kms. North of Mangalore.

Facilities will consist of 3 alongside berths, 1 for general cargo, 1 for iron and manganese ore exports and 1 for import of raw materials required by the Mangalore chemical and fertiliser factory.

A shallow draft berth for the export of finished fertilisers will be provided. The port will also have a mooring berth for general cargo and an oil jetty for handling naphtha and petroleum products.

In the second stage of development the harbour will be expanded to cater for 60,000 d.w.t. bulk carriers of 12.20 m. draft. An additional alongside mechanised berth able to handle 4,000 tonnes of iron ore per hour is expected to be provided.

The port has been created by carving out of the mainland a 260-acre lagoon 10.1 m. deep. The lagoon is connected to the sea by an approach channel, 3,200 m. long protected by 2 breakwaters each 340 m. long, constructed one on either side of the channel.

The oil jetty has been located in the S.W. portion of the lagoon very near to the approach channel. The dredged depth at the oil jetty site during the first phase of construction will be R.L.-9.75 m. During high tide, the depth will be R.L.-10.65 m. affording berthing facilities for 30,000 d.w.t. tankers.

When opened ships of 30 ft. draft will be able to berth alongside the 3 new berths. Pilotage will be compulsory. Masters are to anchor in the vicinity of the fairway buoy (yet to be laid). Maximum tide range 5 ft. No locks or gates. No cranes available at present. Ship's gear to be used. Fresh water available at berths and in the stream. Bunkers not available except very small quantity of LDO or HSD from private trade. Minor repair facility available.

Vessels are advised to anchor in a depth of 10 m. (33 ft.) in a position with Surathkal lighthouse, flashing 10 seconds, bearing 011° (T) distance from lighthouse 4.3 miles. Entry into the channel with Pilot is made with 2 transit towers.

OKHA: 22.27 N. 69.05 E.

DOCUMENTS: 5 copies each of Import Manifest, Crew List. Passenger List, Ship's Stores Manifest, Crew Property List.
PILOTAGE: Compulsory. Pilot station Lat. 22° 30.5' N.; Long. 69° 04.36' E.; 1.35 miles N.W. of Samiani Light Tower.
ANCHORAGE: Roadstead anchorage near Pilot station.
MAX. SIZE: 525 ft. LOA during N.E. monsoon and 540 ft. LOA during S.W. monsoon with comparable breadth. Max. draft 26 ft.
PRATIQUE: The Master should cable the Port Health Officer (Quarantine Okha) in International Health Code, requesting free pratique. If radio pratique is not effected, then Masters should present Maritime Declaration to the Customs Boarding Officer who is authorised to grant free pratique. If the vessel is arriving from yellow-fever area, the mosquito control team is arranged from Kandla, where the cable address of the Port Health Officer is "Sangrodh Kandla".
RADIO: Post and Telegraph Department Wireless station call sign VWO can be contacted from 0800 to 2000 hrs. I.S.T. for communication to and from Local Agents.
TUGS: Port-owned tugs join vessel while entering port channel and/or vacating it at time of berthing and/or unberthing.
BERTHING: Only daylight hours. Vessels should be ready in all respects to move to berth 1.5 hours before high water at Pilot station.
Sayaji Pier – East side 26/25 ft. draft; West side 20 ft. draft.
Dry cargo berth – 23 ft. draft.
BRIDGES: None.
STEVEDORES: Firm ETA including requirements order avoid delay.
(a) Exports: Mainly cement, bauxite and chemicals and general

merchandise, rate 100/125 tons per shift per hook. *(b) Imports:* Mineral oils average rate about 200 to 300 t.p.h. according to ship's pumping capacity; general cargo same rate as export.
MEDICAL: Port Health Officer always available. Well-equipped hospital at Mithapur under Tata Chemicals at a distance of about 7 miles from port. Medical aid available throughout day and night.
TANKERS: All dry cargo vessels regulations apply for tankers, particularly size, etc. 1 berth, draft 26 ft. No slop facilities.
DENSITY: 1025.
FRESH WATER: Limited. Port supplying water by barge and shore pipe-line. In normal cases 25 tons water supplied per day. In cases of emergency 40 tons water can be supplied per day.
FUEL: Available but arrangement should be made through oil companies head offices at Bombay.
FIRE PRECAUTIONS: Port Department maintains a small fire station.
DEVELOPMENTS: In addition to existing concrete jetty a new concrete jetty has been constructed, presently accepting vessels up to 350 ft. length, 23 ft. draft.
GANGWAY/DECK WATCHMEN: Vessel to provide own gangway watchmen. Shore-watchman available for employment on shift basis (8 hour shifts).
OPENING/CLOSING HATCHES: To be attended to by ship's crew if not contracted with stevedores which may cost extra.
CERTIFICATES: Ship's Register, Load Line Certificate, Safety Equipment, Safety Gear, Radio.
CUSTOMS ALLOWANCES: At Customs Preventive Squad's discretion.
CARGO GEAR: Normal gear supplied by stevedores for hire.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS: Only minor repairs.
DRY DOCKS: None.
REPATRIATION: Necessary formalities to be completed at District Headquarters situated at Jamnagar, a distance of about 110 miles: such as Police, Health, (whereas Customs formality can be completed locally).
AIRPORT: Nearest airport Jamnagar about 110 miles connected with Okha by rail and road. Only local service to Bombay daily operated.
TIME: GMT plus 5.5 hours.
HOLIDAYS: As declared by Port Authorities, cargo work can be arranged by paying usual scheduled overtime but labour's observed holidays (about 5 to 6 days in a year) completely closed.
TELEPHONES: Only for tankers by respective oil installation.
GENERAL: Port governed by Gujarat State and all rules and regulations laid down by them in addition to Central Government rules applicable to this port. Port connected with hinterland by rail, motor transport, 300 miles by sea from Bombay, 2 tides in 24 hours, mean high water spring rise about 11.5 ft. and mean low water neap rise 9.5 ft.; current in neap tide is 2 to 3.5 knots. Wind force/direction during April/September S.W. 3/5 and in October/March N.W. to N.E. from 2/4.
SERVICE: Tank cleaning by manual labour.
SHORE LEAVE: Crew allowed ashore after vessel cleared by immigration officer who boards vessel on arrival.
DELAYS: Delay only encountered if berth or moorings are occupied.
AUTHORITY: Port Officer, and Superintendent of Customs, Okha (Ahmedabad Collectorate).

PARADIP: 20.14 N. 86.42 E.

DOCUMENTS:
"No opium" Certificate.
Deck Cargo Certificate.
Arrival and departure reports.
Anchorage Certificate.
6 copies of Crew Lists.
Required certificates to be produced for signature of Master by Agents on arrival.
PILOTAGE: Pilotage during daytime only. Last pilotage 1630 hrs. Give ETA to Agents at least 24 hours in advance. Agents book Pilot and arrange for inward pilotage after arrival. Vessel can anchor depending on draft, 4 cables from Fairway Buoy, positioned Lat. 20° 14.51′ N. and Long. 86° 42.19′ E. After vessel anchored, Pilot boards during daytime with help of Pilot launch. For safety, Masters to arrive with maximum ballast on board for entering.
ANCHORAGE: See "Pilotage". Anchorage particulars given in chart published as "Paradip Anchorage".
RESTRICTIONS: Vessels not berthed/sailed during night-time after 1630 hrs. Vessels to have maximum ballast for entering.
MAX. SIZE: LOA 850 ft. and max. draft 39 ft.
Subject to weather conditions larger vessels may be berthed. A vessel of 772 ft. has been berthed, also vessels with 39 ft. draft.
HEALTH: Send usual quarantine message to "Quarantine Paradipport" 24 hours before arrival for radio pratique. Pilot gives free pratique on boarding vessel subject to no sick person on board. In case of suspected disease or fever on board, Port Medical Officer visits ship at anchorage/berth and cases of contagious disease are isolated and sent to nursing home.
RADIO: VHF radio installed at signal station in the Harbour Office. Calling Channel 16. Working Channel 9.
Working Hours: every even hour for 10 minutes from 0600 hrs. to 2200 hrs. and when ships are making or leaving the port.
Vessels are requested to establish contact with the control station when within VHF range (approx. 40 to 60 miles) and before entering, moving in or sailing from the port.
When within VHF range, ships are requested to give the following information:
(1) Name of ship.
(2) Ports of departure, call and destination.
(3) ETA.
(4) Vessels gross tonnage, length, breadth, draft and speed.
(5) Number of cases of dangerous contagious diseases on board.
(6) Type and quantity of cargo.
(7) Name of Agents and requirements.
TUGS: Tugs join vessel just inside approach channel. Ship's lines only used.
BERTHING: 1 iron ore berth, 1 general cargo berth and 1 mooring berth.
BULK HANDLING FACILITIES: 1 iron ore berth with mechanical loading plants of capacity 2,500 t.p.h. Suitable for vessels up to 60,000 d.w.t. with max. draft up to 39 ft.
STEVEDORES: On account of mechanical loading, stevedores not required for iron ore loading. Stevedores, required for loading/unloading at general cargo berth and mooring berth.
MEDICAL: After arrival Doctor can board vessel to attend to any urgent case. No hospital facilities. Sick crew sent to Cuttack/Bhubaneshwar about 90/120 km. from Paradip.
DENSITY: Varies from 1018 to 1024 with average of 1021.
FRESH WATER: Water supplied both at iron ore berth, Quay berth and also at moorings but not at roads. There is only 1 barge with total capacity of 50 tons and another barge of 150 tons. Water supplied at an average of 100 tons per day.
FUEL: HSD and furnace oil can only be procured from Cuttack on duty paid oils only. Arrangements will have to be made well in advance and the port will only provide the oil barge for taking the supplies from the tankers into the barge for subsequent supply on board.
FIRE PRECAUTIONS: No special precautions.
DEVELOPMENTS: Turning basin enlarged to 520 m.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Undertaken by crew only.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Last Port of Clearance.
Deratisation Certificate.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or Spirit: 1 bottle of 24 ounces per head per week.
CARGO GEAR: Valid cargo gear certificate required.
IDENTIFICATION CARDS: Authorities issue landing pass.
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None. A slipway under construction.
REPATRIATION: Repatriation of foreign personnel is strictly not allowed as Paradip has not been declared a port of embarkation and disembarkation. Only emergency cases provided sufficient time is given, special permission can be obtained from the Home Secretary of local Government from Bhubaneshwar and other immigration authorities.
AIRPORT: Nearest airport Bhubaneshwar 120 km. Only local flights available. Flight timings to Visakhapatnam 1100 hrs. and Calcutta at 1500 hrs. and 1925 hrs. daily.
TIME: Local time GMT plus 5.5 hours.
HOLIDAYS: Charter Party holidays. Normally work carried out on all days.
POLICE/AMBULANCE/FIRE: Police 227; Ambulance 241. No fire service station.
TELEPHONE: No facilities for telephones on board.
GENERAL: Masters to arrive with maximum ballast during monsoon period.
SERVICES: None available.
SHORE LEAVE: Port Immigration issue shore passes to all foreign nationals excepting Chinese and Pakistanis and with shore passes crew allowed ashore.
DELAYS: Vessels generally get berth on "First Come First Served" basis.
SHIPMASTERS REPORT No. 1: (August 1975). Suggest vessels follow the normal procedure for Calcutta re-arrival documents.
Customs officials require the personal attention of the Purser to a greater extent than in any other Indian port.
Stores: Fresh stores about average quality for Indian ports. One is not advised to try to buy meat or fish as these commodites come from Cuttack, a good distance away, and frozen imported meat is not available.
SHIPMASTERS REPORT No. 2: (March 1976).
Berths: Apart from 1 iron ore berth and 1 mooring berth there is now a general cargo berth in commission. The long arm has a length of 290.65 m. and a short arm 118.40 m. The depth alongside is 36 ft. 2 ships are normally berthed at the long arm but the ship at the Southern end normally has part of her jutting out (when 2 average size ships are berthed). This makes it difficult to send sternlines especially when port side to. When starboard side alongside 2 anchors are used to hold the bow as well as springs.
Stevedores: There are a number of stevedores available at the port. No notice is required.
Services: Fresh provisions are available but 24 hours notice is required for most items. Laundry can also be arranged by Agent.
AUTHORITY: Chairman, Paradip Port Trust.

PONDICHERRY: 11.56 N. 79.50 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Store List with Private Property Declaration in Triplicate.
Crew List (8 copies).
Light Dues Receipt.
Manifest (Import or Export).
Bill of Lading.

PILOTAGE: Not necessary as open roadstead anchorage.
ANCHORAGES: Proper anchorage in line with New Pier. 2 chimneys in line (276°) will provide good transit in day time and at night green/red light in transit with red pier light can be taken.
MAX. SIZE: Anchorage is 7 fathoms within 1 mile from New Pier.
HEALTH: Free pratique obtained on arrival and Master expected to address message to Port Health Officer, advising that all are well on board. Free pratique automatic for vessels calling from any Indian ports.
RADIO: Cables routed through Madras Radio (call sign VWM).
TUGS: Tug kept ready at New Pier for towing barges.
BERTHING: No berths.
STEVEDORES: 48 hours notice prior to arrival. Rate of discharge of bagged cargo 800 to 1,000 tons per day.
MEDICAL: No advance notice necessary. General Hospital and Jipmer Hospital available.
TANKERS: Transfer operations are carried out at anchorage 1.5–2.5 miles off shore.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Not available.
DEVELOPMENT: Proposals finalised for construction of new lighthouse near New Pier.
GANGWAY/DECK WATCHMEN: Services not compulsory, but recommended to avoid pilferage. 3 watchmen day/night.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each Crew member to be held out of bond. Wine and/or Spirit, 1 open quart bottle per Crew member permitted to be held out of bond.
IDENTIFICATION CARDS: Not needed if furnished with Crew List.
CONSULS: only French Consulate General. Tel. 58.
REPAIRS: Deck and Engine repairs not attended. Special arrangements can be made from Madras. Minor repairs carried out privately.
DRY DOCKS: None.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.
AIRPORT: Nearest airport is Meenambakam Airport, Madras, distant 160 km.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Authorities but cargo work arranged on all holidays on payment of overtime, except on Republic day, Gandhi's Birthday, May Day and Independence Day.
POLICE/AMBULANCE/FIRE: Police 110; Fire 101; Ambulance arranged through hospital doctor on duty, tel. 198.
TELEPHONES: No facilities to place on board.
GENERAL: For purposes of crew going ashore, launches arranged between 0600 hrs. and 1800 hrs. weather permitting, hired from private parties. Laundry facilities, supply of fresh vegetables and provisions arranged.
SERVICES: None.
SHORE LEAVE: Crew members permitted ashore but have to remain within town limit.
DELAYS: Delays occur only under unavoidable circumstances such as Surf Declaration, Cyclone, etc. Vessels arriving at night, commence discharge operations next morning.
AUTHORITY: Port Officer.

PORBANDAR: 21.38 N. 69.36 E.

DOCUMENTS:
Crew Lists (6 copies).
Passenger Lists (6 copies).
Customs Documents to be prepared by Agents and signed by Master (4 copies).
Arms and Ammunition Certificate 4 copies duly signed by Master.
Health Documents; all yellow fever, cholera and smallpox books should be valid on arrival as well as on departure, if they are not valid on departure Port Health Officer should visit ship and give required injection to persons for completing health books before obtaining Bill of Health.
Same Bottom Cargo List (4 copies).
Port Clearance: Port Clearance of last port to be submitted to Boarding Officer of Customs.
Private Property List (6 copies duly signed by Master).
Store List (4 copies duly prepared by ship's officer).
Currency Declaration (4 copies).
Bills of Lading: Bills of Lading for export cargo generally to be prepared and signed by Agents.

PILOTAGE: Not necessary as anchorage is in stream in open sea.
ANCHORAGE: Anchor in stream about 1.5 miles off shore. 6 fathoms at low water, with good holding ground.

Outer anchorage is with Rajah's Old Palace, about 1.5 miles South-eastward of lighthouse, bearing 85° and lighthouse bearing 26°, 4.5 to 5 fathoms sand and rock (or further out as required).
MAX. SIZE: Any size vessel.
HEALTH: If arriving from yellow fever area within 30 days a grant of free pratique is necessary. Mosquito Party to be deputed from Kandla, which can only be arranged by prior intimation, failing which vessel would have to proceed to either Kandla or Bombay for free pratique.
RADIO: Via Bombay Radio.
TUGS: Not necessary as vessel anchors without Pilot in stream.
BERTHING: No berths.
STEVEDORES: 24 hours notice of ETA to Agents order arrange gangs.

Rate of loading and discharging: 3 ships work simultaneously. During 1 ship's stay average rate about 800/900 tons per day, during 2 ships' stay average rate about 600/700 tons, during 3 ships' stay average rate about 500/550 tons.
MEDICAL: Hospital facilities available.
TANKERS: No facility for discharging oil.
FRESH WATER: As the water barge is not in commission it is not possible to supply fresh water at this port.
FUEL: Nil.
DEVELOPMENTS: Work started to convert port into all-weather port. Breakwater wall under construction, expected completed 5-6 years.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Charter Party terms.
CERTIFICATES: *(a)* Load Line Certificate. *(b)* Safety Equipment Certificate. *(c)* Safety Radio Certificate, all certificates must be valid before departure of vessel.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew from bonded stores of ship. Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores.
CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.
IDENTIFICATION CARDS: Necessary.
CONSULS/REPAIRS/DRY DOCKS: None.
REPATRIATION: Can be arranged.
AIRPORT: 3 miles from town, daily flight to Bombay.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on Indian Republic Day, Holi (2nd Day), Ramnavami, Muhurram, Gokulashthami, Dussera, Diwali (New Year) and Ramzan-Id not possible.
POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 101.
SHORE LEAVE: Police, port and Customs permission required before landing.
AUTHORITY: Port Officer.

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS: Arrival:
Maritime Declaration of Health Form (in duplicate).
Port Clearance from last port of call.
Ship's Stores List (in triplicate).
Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
Crew Lists (6 copies).
Ship's Currency List (in triplicate).
Arms and Ammunition Declaration.
Passenger List – if any.
Through Cargo Manifests.
Departure:
Medical Inspection or Examination Certificate (Bill of Health).
Port Clearance.
Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Bombay Radio to Port Officer, Redi, Cable Address: Port Officer Venguria, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.
ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44′ N. Long. 73° 39′ E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about three-quarters of a mile S.S.W. and about half a mile Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not

proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).

MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.

HEALTH: On arrival, Customs Authorities board and grant free pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for radio pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants pratique after boarding vessel with mosquito party deputed from Bombay at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Bombay and/or Mormugao for free pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging pratique. Vessels transitting through above infected areas for bunkers or water only do not require mosquito party for obtaining pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.

RADIO: Bombay Radio.

BERTHING: No berths. Open roadstead port.

LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOBT terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increase fleet and improvement of shore loading facilities.

MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations and smallpox vaccination done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.

DENSITY: Average 1025.

FRESH WATER/FUEL: None.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.

CERTIFICATES: All certificates, particularly Cargo-gear Certificate to be in order and valid.

CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.

IDENTIFICATION CARDS: Necessary.

CONSULS: None.

REPAIRS/DRY DOCKS: None.

REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.

AIRPORT: Belgaum and/or Vascodagama 90 miles distant.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.

GENERAL: Regular Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.

SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, crew list and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.

REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.

DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.

AUTHORITY: Port Officer.

TUTICORIN: 08.48 N. 78.10 E.

DOCUMENTS: Required on arrival:
- 4 Manifests.
- 2 Bills of Lading.
- 5 Crew Lists.
- 5 Passenger Lists.
- 4 Crew Personal Property Declaration.
- 4 Crew Currency Declaration.
- 4 Import Manifest of Store List.
- 2 Health Report Form.

PILOTAGE: Pilotage compulsory within Port Limits. However, there is no night pilotage.

ANCHORAGE: Anchorage in roadstead with Pandyan Tivu Lighthouse, bearing between 260° and 292°, distant 2 to 2.5 miles, in depths 27 to 33 ft. (8.2 m. to 10 m.); holding ground good, mainly sand, mud and shingle.

In N.E. monsoon, vessels should have a good length of cable and second anchor always ready, as sea breeze blows on reef Eastward of Pandyan Tivu. In S.W. monsoon, middle May to middle August, wind though violent, is invariably off shore, West to S.W., and water fairly smooth.

HEALTH: Free pratique granted to vessels carrying food grains or fertilisers on Government of India a/c. Master required wireless Port Health Officer, Tuticorin, requesting grant of free pratique. On receipt of message Port Health Officer grants pratique and message passed by radio to steamer. This applicable only in cases where steamers have no infection, epidemic or disease. Otherwise Port Health Officer boards vessel on arrival and grants pratique after inspection.

RADIO: When vessels within 24 hours distance Tuticorin Radio could be used and call sign VWT. Otherwise according to route followed, steamers use Madras or Bombay Radio.

VHF service available between ship and shore.

TUGS: Tugs available but if services required special arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.

BERTHING: See "Developments".

STEVEDORES: Agents require 48 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.

MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired arrangements made for re-vaccination/re-inoculation and renewal of certificates.

TANKERS: No facilities.

FRESH WATER: Available. Barge-capacity 100 tons. Delivery in units of 100 tons only. During summer, usually shortage of water. In other seasons water available but as only 1 barge, delivery of water arranged by turn depending upon number of steamers in port. Fresh water also available at Berth No. 1.

FUEL: None.

DEVELOPMENTS: The New Major Port has been declared a Major Port under Indian Ports Act with effect from 1974. All four berths are open for traffic. The 4 berths have a draft of 27 ft. at all stages and approximately 30 ft. on high tides. Two cranes of 3 tons and one crane of 5 tons are available for cargo handling at all times.

GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.

OPENING/CLOSING OF HATCHES: By ship's crew. If done by stevedores charges extra.

CERTIFICATES:
- Ship's Register.
- Safety Construction Certificate.
- Load Line Certificate.
- Safety Equipment Certificate.
- Safety Radio & Telegraphy Certificate.
- Deratisation Certificate.
- Cargo-gear Stability Certificate.

IDENTIFICATION CARDS: Identification cards or seamen's passbook required to be presented to Police and immigration authorities while coming on shore.

CONSUL: None.

REPAIRS: No maritime workshops. Only minor repairs.

DRY DOCKS: A dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of departmental vessels. It is spared to other Departments and Owners of sailing vessels for docking their vessels whenever required.

REPATRIATION: Could be arranged via Madras.

AIRPORT: Nearest airport is Madurai, distant 100 miles, which could connect Madras.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by authorities but boatmen do not work on following holidays as these are days of obligation and festivals: New Year's Day, Republic Day, Maundy Thursday, Good Friday, Tamil New Year Day, May Day, Ascension Day, Corpus Christi, Our Lady of Snows Feast, Assumption Day and Christmas.

POLICE/AMBULANCE/FIRE: As steamers are in open roads about 5/6 miles from shore all emergency to be passed to Port Authorities through signal station and to respective Agents.

SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.

REGULATIONS: Usual regulations. All crew members coming into shore and returning to ship must report to Customs and Port Police on every trip.

AUTHORITY: Port Conservator, Tuticorin Port Authority.

VERAVAL: 20.54 N. 70.22 E.

DOCUMENTS:
Last Port Clearance.
Ship's Stores Manifest (3 copies).
Crew List (5 copies).
Private Property List of Crew (3 copies).
Same Bottom Cargo (3 copies).
Ship and Crew Currency List (3 copies).
Indian Coast Light Dues Receipt (if vessel arriving from Indian port).
Maritime Declaration of Health.
Customs Arrival Report.
Customs Declaration for arms ammunition, etc.
Port Arrival Report.

PILOTAGE: Not required. Vessels anchor midstream.

ANCHORAGES: Veraval light exhibited on coast near Political Residency (occ. 15 sec. 110 ft.). Known as New Lighthouse. Breakwater near harbour under 3 fathoms (5.5 metres). No perceptible tide streams in roadstead. During night/neap tide with low water ships suffer cargo feeding for about 5 hours, 4 to 5 days in month.

Anchorage depth 48 to 60 ft. opposite Phiriya Temple. Good anchorage obtained with Veraval Lighthouse Bearing 317°, breakwater end. True Bearing 336.5°, Bhiria Beacon 27°.

RESTRICTIONS: None, day or night anchorage possible.

MAX. SIZE: No restriction.

HEALTH: Vessels having called yellow fever area and taken on board passengers or crew (other than bunkers or water) granted free pratique by mosquito party deputed from Kandla Port which only arranged by prior notice, failing which vessel would have to proceed either Kandla or Bombay for free pratique. Vessels other than above are granted pratique by Boarding Officer of Customs upon presenting Maritime Declaration of Health. Radio pratique not available.

RADIO: Messages via Bombay Radio. No VHF.

TUGS: Not required.

BERTHING: No berths.

STEVEDORING: Particulars of ETA and labour gangs required well in advance. Average loading/discharging:

Loading bagged cargo oilcake, etc.	225/250 Ts. per hook per day
Loading GN oil in drums	150/175 Ts. per hook per day
Discharging fertiliser (bagged)	150/200 Ts. per hook per day
General cargo loading/discharging	150/200 Ts. per hook per day

MEDICAL: Qualified doctors and hospital facilities.

TANKERS: No tanker berths.

FRESH WATER: No guarantee of supply as this is a scarcity area.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Not necessary unless required. Can be arranged through Agents.

OPENING/CLOSING HATCHES: Carried out by stevedores. Ships' derricks worked by crew.

CERTIFICATES:
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-Telegraphy Certificate.
Deratisation Certificate.
Ship's Registration Certificate.

CONSULS/REPAIRS: None.

REPATRIATION: Can be arranged.

AIRPORT: Nearest airport Keshod, 30 miles from Veraval, but motor transport not easily available and advance arrangements have to be made.

TIME: Local Time GMT plus 5.5 hours.

HOLIDAYS: On which work not allowed for loading/discharging: Indian Republic Day, Holi (Second Day), Ramnavami. Mohurram (Ashura or 10th day), Gokulashtami, Dussera, Diwali (New Year's Day), Ramzan-Id (Id-ul-Fitr).

POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.

TELEPHONES: No arrangements for placing telephones on board the ship.

GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.

SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.

DELAYS: 3 ships can work and fourth vessel arriving waits turn. Therefore some delays possible.

AUTHORITY: Port Officer.

VISAKHAPATNAM: 17.41 N. 83.20 E. **(See Plan)**

PORT LIMITS: 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel". It is proposed that 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary.

DOCUMENTS:
12 copies of Crew List.
3 copies of Store List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of watch lists, giving details of make and value, etc.
The vessel must possess following valid certificates:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy Certificate.
Cargo Gear Test Certificate.
Deratisation Certificate.
Last Port Clearance.

Pilot on boarding vessel before bringing her in gives a copy of Maritime Declaration form which should be filled in and signed by Master.

PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.

ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 miles.

RESTRICTIONS: *Inner Harbour:* Round-the-clock pilotage, subject to following restrictions.

Ore carriers of 640 ft. length overall and 100 ft. beam can enter the port between 0600 and 1800 hrs. Ore carriers of 640 ft. length, 100 ft. beam, and 33 ft. 6 in. draft can sail on high water on a minimum rising tide of 3 ft. 6 in.

Vessels of 630 ft. overall length, 33 ft. draft and 100 ft. beam can enter the port between 0600 and 1800 hrs. on high water on a minimum rising tide of 3 ft. Such vessel can sail from the port at any time, draft being less than 31 ft., between 31 ft. and 33 ft. subject to height of tide of 3 ft. for 33 ft. draft.

Vessels of 575 ft. length overall or less and draft 30 ft. or less can enter and sail from the port at all hours.

Outer Harbour: No tidal restrictions.

MAX. SIZE: *Inner Harbour:* Max. permissible length 640 ft. overall. Max. permissible breadth 100 ft. Max. permissible draft 33 ft.
Outer Harbour: L.O.A. 885 ft. 10 in. (270 m.)
Beam 137 ft. 10 in. (42 m.)
Draft 50 ft. 03 in. (15.3 m.)

PRATIQUE: A separate radio free pratique message addressed "Quarantine Visakhapatnam" must be transmitted by all vessels arriving from foreign port not less than 4 hours and not more than 12 hours prior ETA. On information furnished therein Port Health Officer grants free pratique. Pilot boarding ship for taking her in has superseding power to cancel radio free pratique already granted. However, based on information contained in maritime declaration Pilot also grants free pratique. In case of doubt or in case of inspection if necessary quarantine officer boards ship for granting clearance. No necessity for any vessel to obtain free pratique when she arrives directly from any Indian port.

RADIO: Radio station call sign VWV. Working round clock. Range about 600 miles during daytime and 1,000 miles during night. Better to use Madras Radio Station for all communications in respect of vessels arriving from Madras side. Vessels coming from Calcutta side, use Calcutta Radio. Generally Visakhapatnam Radio station used for vessels anchored at roadstead. VHF Channel 16.

TUGS: For ships entering the port, the tugs wait in the lee of the breakwater. Ship's lines and/or tug's lines are used, depending upon the mode of making fast.

SPECIALISED CARGO HANDLING FACILITIES: Inner Harbour: *WOB-1 and WOB-2 Berths:* For the export of iron ore through a mechanical ore-handling plant capable of loading at the rate of 3,200 t.p.h.

Fertiliser Berth: For the import of fertiliser raw materials, viz., sulphur and rock phosphate, by grab unloading on to a conveyor belt.

OR-1 and OR-2 Berths: For the import and export of P.O.L.

Q-1 and Q-2 Berths: For the export of manganese ore and other ores by semi-mechanical means. Portable flat belt conveyor system for handling bulk cargoes.

Use of grabs for unloading bulk cargoes.

Poclain hydraulic excavator for handling bulk cargoes.

A large number of electric cranes, mobile cranes, forklifts, dumpers, trailers etc.

Outer Harbour: *OB-1 and OB-2 Berths:* For the export of iron ore through a mechanical ore handling plant capable of loading at the rate of 8,000 t.p.h.

Also see "Tankers" and "Developments".

BERTHING: No specific requirements of arrival times for berthing.

STEVEDORES: Agents must give proper notice of vessel's arrival to the stevedores not less than 48 hours to make necessary arrangements for working vessel and also to order sufficient gangs, etc.

MEDICAL: All crew and officers must possess individual international vaccination certificates against smallpox and cholera before leaving this port for any foreign port. Smallpox vaccination and cholera inoculation facilities available within 24 hours notice. Well-equipped hospital facilities available round the clock.

TANKERS: There are two berths OR-1 and OR-2 for discharging and loading oil. The max. permissible draft at these berths is 33 ft. at High Water. The depth alongside OR-1 and OR-2 is 32 ft. In the Outer Harbour, an oil mooring berth is available to accommodate tankers of up to 100,000 d.w.t. with a draft of not exceeding 47 ft.

DENSITY: Fluctuates from day to day between 1020 and 1023.

FRESH WATER: Normal quantities available and delivery made by Port Trust both from shore and barges.

FUEL: Esso, Indian Oil Corporation and Caltex, Bombay, to be contacted for particulars of stocks, etc., as local offices controlled by them.

DEVELOPMENTS:

Outer Harbour Project:

1 The Outer Harbour will have a set of breakwaters to form a protected basin. The Southern part of the basin will permit entry and berthing of 100,000 d.w.t. ships fully loaded, initially. This would ultimately be developed to take 200,000 d.w.t. vessels or even more. The Northern part of the basin will be suitable for use as a large fishing harbour.

2 It will have a finger-type berth for iron-ore loading, designed to handle 200,000 d.w.t. vessels ultimately, providing facility for berthing of 2 vessels on either side of the jetty at the same time. There will also be room for 3 additional general cargo/container berths for 60,000 d.w.t. ships which could be brought into commission in future by reclaiming the area between the fishing harbour basin and outer harbour basins.

3 The ore loaded at the outer harbour berth will be conveyed through a conveyor system and necessary steps will be taken to eliminate the dust nuisance to the utmost extent.

4 The outer harbour project has been designed to load 100,000 d.w.t. vessels at 8,000 tonnes per hour initially. This can be increased to 12,000 tonnes per hour and 16,000 tonnes per hour to load 150,000 and 200,000 d.w.t. vessels respectively when such a demand builds up. A stockpile capacity of 30 days supply on the basis of the levels of shipment will be provided. The receiving system including the 2 existing dumpers and additional railways and shunting locos can handle about 10 million tonnes of iron ore per year from the mines. With a third dumper, the capacity could be increased to 15 million tonnes.

5 Provision will be made to the installation of a screening and/or calibrating plant and pallet plant, in future.

6 The project includes navigation aids, harbour craft, as well as other ancillary facilities required for operation of the outer harbour.

The construction of outer harbour project is almost complete. The trial loading of iron ore in the outer harbour is on and formal commissioning is expected during the third quarter of 1976. The outer harbour project will be the deepest harbour in the country with a depth of 16.5 m. (54 ft.), alongside the berth. An oil mooring berth in the outer harbour was constructed and commissioned to accommodate tankers of 100,000 d.w.t for transhipment of oil from mother tankers to daughter tankers. Max. draft allowed at the oil mooring is 47 ft.

Break-waters under construction:

In connection with the Outer Harbour Project, the 3 breakwaters under construction are in the following positions:

	Latitude	*Longitude*
(1) South Breakwater:		
Western end:	17° 40′ 41.10″ N.	83° 18′ 00.30″ E.
Eastern end:	17° 41′ 01.43″ N.	83° 18′ 49.12″ E.
(2) East Breakwater:		
Southern end:	17° 41′ 14.93″ N.	83° 18′ 29.30″ E.
Northern end:	17° 41′ 47.29″ N.	83° 18′ 34.72″ E.
(3) North Breakwater:		
Northern end:	17° 42′ 02.00″ N.	83° 18′ 24.00″ E.
Southern end:	17° 41′ 47.77″ N.	83° 18′ 27.23″ E.

Spoil ground: A new spoil ground has been established in the following position:

Latitude	*Longitude*
17° 39′ 35″ N.	83° 19′ 19″ E.
17° 40′ 01″ N.	83° 19′ 40″ E.
17° 40′ 40″ N.	83° 20′ 37″ E.
17° 38′ 59″ N.	83° 19′ 45″ E.
17° 39′ 26″ N.	83° 20′ 04″ E.
17° 40′ 06″ N.	83° 21′ 01″ E.

GANGWAY/DECK WATCHMEN: Necessary according to demands of local labour unions.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or spirit: Asian Crew 2/5 units per 3 days. Non-Asian crew 4/5 units per 3 days. Bottle of liquor equals unit.

CARGO GEAR: Valid cargo gear test certificate must be on board all vessels using ships' gear for loading or discharging.

IDENTIFICATION CARDS: Not needed if have valid seaman's books.

CONSULS: None.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 2. 1 owned by Hindustan Shipyard Limited, 800 ft.×125 ft.×26.5 ft. (maximum length of vessel 780 ft.). Second owned by Port Trust – 450 ft.×60 ft.×18.5 ft. (maximum length of vessel 400 ft.).

REPATRIATION: Facilities exist to foreign countries via Madras, Calcutta or Bombay. About 3 days delay to obtain travel permit.

AIRPORT: Distant 6.5 miles. Regular daily flights to Calcutta and Hyderabad by Indian Airlines Corporation.

TIME: Indian Standard Time is local time, and no alterations made to clocks during the year. GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by authorities but port's closed holidays are: Pongal, Kanumu, Mukkanumu, Republic Day, Kotha-Amavasya, May Day, Independence Day, Gandhi's Birthday and Nagulachaviti, when work not possible even on payment of overtime.

POLICE/AMBULANCE/FIRE: Police Station 2140; Fire Station 4841 – Ext 239; Ambulance 4841 – Ext 213 (Port Hospital).

TELEPHONES: No arrangements exist for placing telephone on board.

SERVICES: Tank cleaning facilities available at Caltex berths.

SHORE LEAVE: Crew members allowed ashore after receiving immigration permits.

GENERAL: *Priority:* Vessels arriving at this port for berthing at various berths on priority if they so desire can register their priority at "Roads" and move to other ports. But the vessel should be back within Visakhapatnam Port limits when the barth (for which registration was made) falls vacant. If the vessel is not ready at Roads, the vessel would lose its priority and take its turn along with other waiting vessels including vessels which have registered with the port for the priority berthing.

DELAYS: Normal delays such as waiting for Pilot, waiting for tugs, etc., since this port can handle only one movement at a time. Other delays such as no power to shore cranes, bad weather, shed congestion, etc., expected.

SHIPMASTERS REPORT:

Port Limits: Appear to be accepted upon the basis of VHF information to local port control that one has in fact anchored, rather than being in a particular area.

Anchorage: Harbour Master and Pilots prefer that ships anchor South of a line running East/West from the entrance, depth chosen to suit individual requirements.

Special Cargo Handling Facilities: The "Q" berths are now No. 1 for manganese, Nos. 2 and 3 for grain and the remainder for general cargo. All are in difficulties with Customs over shed and wharf clearances and this has created long delays both in getting alongside and working. The grain is bagged in the holds and discharged via snotters on ship's gear. Total rate roughly 1,000 tons per day per ship.

Fresh Water: There have been no useful rains for several years and water is at a premium. When a ship advises the local authorities that she is out of water, a layup berth or buoys is allocated and a minimum amount is supplied by barge. This is repeated throughout the ship's stay. No question of filling tanks, and supply may be 30 tons every 2 or 3 days.

Fuel: Diesel oil here is not suitable by choice for most merchant ships. 2 grades, heavy diesel of some 225° Redwood at 100° and light diesel which is 57° Redwood at 100°.

Repatriation: Allow 5 days for travel permits.

Delays: Tankers berth more or less on arrival. Ore loaders wait 1 or 2 days as the terminal becomes vacant – 2 loading arms at around 1,000 t.p.h. Grain and cargo boats can expect to wait up to a month for a berth and will be 2 or 3 weeks alongside.

AUTHORITY: Visakhapatnam Port Trust.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Indonesia

AMBON: 03.41 S. 128.10 E.

DOCUMENTS:
14 Passenger Lists.
7 Crew Lists.
2 Customs Documents.
2 Health Documents.
7 Cargo Manifests.
7 Bills of Lading.
5 Ship's Papers.
Sailing Permit.

PILOTAGE: No Pilot station. Apply for pilot boat by calling Ambon Coast Station (Ambon Radio) or fly "G" Flag. Pilot boat located at Ambon Bay. Entrance in all seasons and weathers. All parts of Ambon Bay suitable for anchorage to await Pilot.
ANCHORAGE: Areas of anchorage can take all sizes of vessel.
RESTRICTIONS: Open 24 hours. Tides do not affect entry. But when entering at night ship must anchor and await orders.
MAX. SIZE: Joos Soedarso Pier: length 187 m., breadth 35 m., draft 12 m. Wainitu Pier: length 100 m., breadth 20 m., draft 8 m.
HEALTH: Port Health officer boards vessel together with Pilot.
RADIO: Ambon Coast Radio, call sign PKE. Operating 24 hours. Frequencies 500–470 kc/s., 8472 and 8799 kc/s. VHF all Channels used.
TUGS: Normally tugs do not join vessel but when necessary to use tugs call PT "Dock Waijame".
STEVEDORES: Agent arranges. 3 stevedore companies: PT. "Gotong Rojong", PT. "Mastra" and PN. "Varuna Tirta Prakarsa".
MEDICAL: Hospital facilities available. No advance notice required.
TANKERS: Berth at Wainitu Pier. Type of pipe, 6 in. and 8 in. Discharging capacity, 125 t.p.h.
FRESH WATER: Available only at Joos Soedarso Pier. Loaded by pipe-line with 25 tons/hour capacity.
FUEL: Only diesel and marine fuel.
DEVELOPMENTS: Plans for future developments dependent on Government expenditure.
GANGWAY/DECK WATCHMEN: Deck watchmen needed, particularly for tankers.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: Cannot be held out of bond.
IDENTIFICATION CARDS: Needed by Immigration (landing permit).
CONSULS: No consuls available locally.
REPAIRS: Deck and engine repairs available. Floating dock, lifting capacity for 2,000 d.w.t.
REPATRIATION: Possible. Dealt with by Immigration through Djakarta.
AIRPORT: Distance from airport about 7 miles. Regular airline "Garuda Indonesian Airways" (GIA). 4 flights per week from Ambon to Djakarta.
TIME: Local time GMT plus 10 hours.
HOLIDAYS: Port open for 24 hours even in holidays.
POLICE/AMBULANCE/FIRE: Police and Port Health at Port. But when necessary to use fire brigade call by connecting to "Burgomaster".
SHORE LEAVE: All crew members allowed ashore with permission of Immigration.
AUTHORITY: Ambon Port Administration.

ARDJUNA: 05.54 S. 107.57 E. **(See Plan)**

LOCATION: Ardjuna Marine Terminal is an open, unsheltered mooring in the Java Sea, about 18.5 miles from the nearest point on the North Coast of Java.

The Terminal is approximately North 72° East distant 59 nautical miles from Jakarta.

There are 4 Single Buoy Moorings situated as follows:

1. Storage Barge "Wampum" SBM (Buoy No. 1)
   Latitude 5° 54′ 15″ South.
   Longitude 107° 44′ 22″ East.
2. Export SBM for loading from "Wampum" (Buoy No. 2)
   Latitude 5° 53′ 19″ South.
   Longitude 107° 45′ 18″ East.
3. Storage Barge "Arco Ardjuna" SBM (Buoy No. 3)
   Latitude 5° 54′ 11″ South.
   Longitude 107° 43′ 45″ East.
4. Export SBM for loading from "Arco Ardjuna" (Buoy No. 4)
   Latitude 5° 53′ 29″ South.
   Longitude 107° 43′ 20″ East.

DOCUMENTS: The Harbour Master submits a Harbour Report Form for the Master to complete. The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Life Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate or Cargo Gear Certificate, Derating Certificate or Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and light dues receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian port clearance for Panamanian flag vessels is not required at Ardjuna.

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Article and the passports of the crew. When these documents are found to be in order, and arrival clearance will be marked on the Crew List.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Prior to the vessel's departure the Immigration Official requires 6 copies of the Crew List to be marked for "Departure Immigration Clearance" and duly signed, it will be distributed as follows: 1 copy each for Master, Harbour Master, Customs and Agent. 2 copies for immigration.

Crude Oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Ardjuna Marine Terminal. When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest if any should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only and is not authorized to accept such letters.

Customs will issue the 5-B form which serves as Customs departure clearance.

PILOTAGE: Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the Terminal using the International Marine Calling & Safety Channel 16, Freq. 156.800 mHz for Terminal instructions.

The Mooring Master will act on behalf of the company to sign acknowledgement of tankers' Notice Of Readiness. Such notice will not be accepted for a time earlier than:

(a) the Master has received the Mooring Master onboard or
(b) the tanker shall have dropped anchor within the recommended anchorage area, and advised the Terminal the time of anchoring.

Exception to (a) and (b) will be if the tanker is within the anchorage area awaiting arrival of the Mooring Master and has been requested by the Terminal not to anchor.

In this case N.O.R. will be accepted from the time the Terminal requested the ship not to anchor.

The company reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the berth may be open to other tankers.

The Mooring Master will advise the ship's Master on approaches to the berth, mooring, unmooring, and all operations within the anchorage or mooring area. All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the ship being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of his vessel. The ship's Master, or one of his designated and qualified deck officers, must be on the navigating bridge at all times while the vessel is being manoeuvred. Ships are requested to have a pilot ladder safely and securely rigged for immediate use, and long enough to reach the mooring launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Mooring Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for the Mooring Master both when boarding and leaving. During the vessel's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern. These wires shall be secured on the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 feet above the water.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area northward from the Single Buoy Moorings enclosed by a line drawn through the following positions.

"A" 5° 51′ 35″ S Latitude 107° 43′ 30″ E Longitude
"B" 5° 50′ 05″ S Latitude 107° 43′ 30″ E Longitude
"C" 5° 50′ 05″ S Latitude 107° 45′ 30″ E Longitude
"D" 5° 51′ 35″ S Latitude 107° 45′ 30″ E Longitude

Prior to their arrival Masters of tankers should contact the Terminal for instructions concerning anchorage positions.

Under no circumstances should the export tanker enter the restricted area around the structures without a Mooring Master aboard.

The attention of Masters is drawn to the existence of underwater pipe-lines in the restricted area.

NAVIGATION AIDS: Navigational aids are located on the following facilities and structures:

Export Single Buoy Moorings (Buoy No. 2 and No. 4): A white light flashing every second is mounted on the rotating deck of each SBM. Buoy No. 4 is fitted with a radar reflector. Approach information can be obtained by radio. See the section on communications.

Storage Barges "Arco Ardjuna" and "Wampun": By day, the black ball as required by the Regulations for Preventing Collisions at sea. The 2 storage barges at night display the lights for tankers at anchor as required by the Regulations for Preventing Collisions at

sea and are equipped with automatic fog signals at the bow and at the stern.

Each barge has a bell Forward as required by the Collision Regulations and an instrument to produce a "Whoop" aft, under the same rules. When visibility is restricted the Fog Signals are continuously sounded. The SBM to which the "Arco Ardjuna" is moored, is fitted with a radar reflector and a white light flashing every second visibility 5 miles. The "Wampum's" SBM shows a white light flashing every second visibility 5 miles.

Production Platform: There are 5 Production Platforms, 14 Well Platforms and 1 Junction Platform within the Ardjuna Marine Terminal area.

"B" (Bravo) Flow Station, with the specific significance as the "Centre" of the Flow Stations as well as the Storage Barges with respect to the production activities in the Ardjuna Marine Terminal. Indicated as platform BB.

"E" (Echo) Flow Station, situated 12 nautical miles Eastward of Bravo. Indicated as platform EA.

"K" (Kilo) Flow Station, located 8 nautical miles S.S.W. of Bravo. Indicated as platform KA.

"L" (Lima) Flow Station, situated 15 nautical miles West of Bravo. Indicated as platform LA.

"U" (Uniform) Flow Station, located 13 nautical miles S.S.E. of Bravo. Indicated as platform UB.

In addition to the above specified obstructions and navigational aids, all platforms display interrupted quick flashing white lights. The Storage Barges and Flow Stations will brightly illuminate the areas about them at night through the use of lights for normal working purposes.

MAX. SIZE: SBM No. 2 up to 100,000 d.w.t. SBM No. 4 up to 200,000 d.w.t. Depth of water, approximately 132 ft. below mean sea level.

RADIO: *Advice of arrival by cable or telex:* It is most important that incoming tankers advise Ardjuna Terminal 72 hours before estimated time of arrival, giving the best estimate of ship's arrival at the Terminal, via:

Cable address: ARDJAK, Jakarta

Telex number: 011–4379, Jakarta.

Time to be used for ETA is "GOLF" Time Zone of GMT +07 hours throughout the year.

The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time.
4. Maximum loading rate.
5. Arrival draft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation or smallpox vaccination required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Ardjuna Marine Terminal via above cable address and Telex Number when the tanker is 24 hours and 12 hours distant from the Terminal and any other time if any appreciable change occurs in the original ETA or those subsequent thereto.

Masters are reminded to use the International VHF/FM Radio Telephone Channel 16 Frequency 156.800 mHz when tankers are arriving within radio range of the Ardjuna Marine Terminal and maintain this contact until arrival at the Terminal.

RADIO COMMUNICATIONS:

(1) VHF/FM Radio Telephone: (International Marine Calling & Safety Channel 16, Freq. 156.800 mHz).

Masters are recommended to use this system when they arrive within radio range of the Ardjuna Marine Terminal, particularly when approaching the port. If poor visibility exists the tanker's approach may not be observed from the storage barges, attention to VHF communications may be the means of avoiding delay in berthing.

During berthing the ship's radio will be under the sole control of the Master, and the storage barge radios will be under the sole control of the Terminal Marine Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain constant listening watch on VHF Channel 16 to receive Terminal instructions.

Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

The Ardjuna Marine Terminal is equipped with VHF/FM Radio Telephone Sets and continuous watch is maintained on Channel 16 (Freq. 156.800 mHz) and Frequency 157.725 mHz. Tankers approaching the Terminal should make initial contact on Channel 16.

For subsequent inter-ship communications within the Terminal a "Handie Talkie" Radio Freq. 157.725 mHz will be used by the Mooring Master.

This frequency will not be used for general purpose, unless clearance is obtained by the Terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the Terminal of the radio failures. Upon hearing this signal from a loading tanker the storage barges will immediately stop loading to the Export Tanker until communications have again been established.

(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is inter-connected to the Ardjuna Marine Terminal via local communications system and maintain a continuous watch on HF Frequency 7320 kHz (Upper Side Band A3J Mode, 100 Watts, Vertical Whip Antenna, Call Sign 8 G J 9).

(3) *Pertamina Control Radio Stations — HF/SSB:* In the event incoming tankers are not able to contact the Ardjuna Marine Terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, Call Sign PKI 2 may be contacted on HF/SSB per following frequencies and during the following service hours:

FREQUENCY/kHz	HOURS/GMT	KEEP WATCH/kHz
452*	H24	500
8626	0200–0300, 0400–0500, 0700–0800, 1030–1200, 1400–1500, 1800–2000, 2200–2300 GMT.	8356–8374
12890	0000–0200, 0300–0400, 0500–0700, 0800–1030, 1200–1400, 1500–1800, 2000–2200, 2300–2400, GMT.	12534–12561
VHF CH. 9/16/19	0000–1500 GMT.	CH. 16

*Call/Reply

Pertamina Merak Radio, Call Sign PKQ may be contacted on HF/SSB per following frequencies and during the following service hours:

FREQUENCY/kHz	HOURS/GMT	KEEP WATCH/kHz
452*	0000–0400, 0800–1000, 1200–1400 GMT	500
8626	0100–0200, 0900–1030, 1500–1600, 2300–2400 GMT	8356–8374
4361.6	0000–0100, 0200–0300,	2182, 4066, 4063, A3J A3H
6518.6	0300–0400, 1200–1400 GMT	2182, 6204 A3J/A3H
VHF CH. 16/19/24/26	0000–2400	CH. 16

*Call/Reply

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta by telephone numbers:
73204, 777121, 777122, 777123, 777124, 777125, 777126, 777359 or by Pertamina Internal Telex System number 18 which is the designated number of Atlantic Richfield Indonesia Inc., Jakarta.

HEALTH: In accordance with practice in Indonesian ports, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Ardjuna. These signals shall be displayed continuously until clearance is granted. The signals are as follows: Sunrise to sunset: quarantine flag "Q". Sunset to sunrise: signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Harbour Master officials will board the vessel after it is all secured to grant clearance.

Each tanker entering the port of Ardjuna must have requested and been granted Flag Dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities. Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each Crew member should be in possession of an International Vaccination Card.

After the tanker is all secured, the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo onboard the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Ardjuna is granted.

MOORING: The following mooring Launches will be available for running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker.

Name and description	*Length*	*Rated HP*
(1) *Arco Ardjuna III*	40ft	260
(2) *Arco Ardjuna IV*	40ft	260

LOADING: Ardjuna crude oil of approximately 37.0 degrees API at 60°F. is available at the storage barge.

After a vessel has berthed and pratique has been granted, a Terminal official will board to discuss loading arrangements. Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted. The vessel's cargo tanks are inspected by Ardjuna officials and, if suitable for loading crude oil a signed notation to this effect will be made on the ullage certificate.

It is absolutely essential that extremely careful supervision be exercised by officers of vessels while loading operations are in progress.

A responsible ship's officer is required to be on duty continuously at a point near to the tanks being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended. Ardjuna personnel will constantly check a vessel's moorings and at any time may direct the lines to be heaved tighter or slackened off under the supervision of a responsible ship's officer, as circumstances warrant.

Raising, lowering, connecting, tending and disconnecting of oil loading hoses as well as other labours and duties on shipboard

connected with loading of cargo or maintaining mooring lines in a correct manner will be performed by the ship's crew directed by a responsible officer as required by the Mooring Master. Loading of export tankers is through two 12 in. I.D. hoses with No. 150 ASA flange rating. The weight of each hose is approximately 2.5 tons. All ships using Ardjuna Marine Terminal must be able to connect their manifold to the 12 in. hoses. Masters are reminded it is the ship's responsibility to provide such reducers as may be required to make the connection.

The Mooring Master will report unsatisfactory conditions to the Company Marine Superintendent who may, in turn, reject the ship until corrections are fully made. All costs accruing therefore will be for the ship's account.

The service of the Mooring Master are provided upon the express understanding and conditions that when any Mooring Master provided goes on board a vessel for the purpose of assisting such vessel, he becomes for such purpose the servant of the Owners of the vessel and the Company shall not be liable for any danger, or injury, resulting from any advice, or assistance, or actions given, or made, by such Mooring Master while on, or in the vicinity, of the assisted vessel.

The Company Marine Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Ardjuna. All of these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Ardjuna Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used laytime when compiling vessel's turnaround time.

Request for the Terminal to stop the flow of oil cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error and that in case of vessel being overloaded the excess cargo cannot be pumped back to the storage barge. Ship's Master will also be held responsible for any oil spills caused by this request.

Typical Ardjuna crude specifications:

Gravity at 60°F.	36.0	—	38.0 API
Reid vapour pressure	6.0	—	12.0 PSIG
Sulphur, wt. %	0.060	—	0.100 wt. %
Kinematic viscosity at 100° F.	1.20	—	4.00 CS
Pour point, °F.	90+		
Carbon residue	0.50	—	1.45 at. %
BS & W	0.10	Vol. %	
Flash (TCC), °F.	Below room temperature		

TUGS: 1 tug to assist berthing and unberthing. A mooring launch will be available to pass line to the storage tanker on berthing.

BERTHING: *Storage Barge "Arco Ardjuna"* The Company Marine Administrative Offices, storage and a laboratory for testing Crude Oil stock are located on board a 137,673 d.w.t. Storage Barge of Liberian Registry designated "Arco Ardjuna". Overall length of the barge is 467 ft. 10 in. Total Crude Oil capacity is 1,022,000 gross barrels.

Loading of Crude Oil from the Storage Barge to the Tankers will be through A.O. Smith Positive Displacement Meters, of which there are 4, each having a maximum capacity of 12,500 b.p.h.

Storage Barge "Wampum": The second crude oil Storage Barge is of Liberian Registry designated "Wampum". Overall length of the barge is 616 ft and 6 in. d.w.t. 74,500 and the Crude Oil capacity is 565,149 gross barrels.

Export SBM No. 2 is designed, during reasonable weather conditions, to handle tankers up to 100,000 d.w.t. and is equipped with dual 150 ft., 12 in. circumference, Floating Braidline Mooring ropes with 22 ft. long anti-chafe chains fitted, so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy. The other Export SBM, No. 4 is designed to handle up to 200,000 d.w.t. tankers, weather permitting, and equipped with dual 150 ft., 15 in. circumference, Floated Synthetic Fibre Mooring ropes together with the anti-chafe chains length 22 ft.

The crude oil loading hoses are connected to the ship's manifold from the port side of the Export Tanker. Tankers arriving are requested to have derrick on the port side raised and rigged, ready to lift aboard Terminal equipment.

Tankers are loaded through 2 strings of 16 in. I.D. floating hoses extending from each of the Export SBM's No. 2 and No. 4, connected to the tanker's manifold at the ends by means of the rail hoses of 12 in. I.D. All tankers not having 12 in. hose connections should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On SBM No. 2 the length of the hose strings is 755 ft. while on SBM No. 4 the length of the strings is 795 ft.

For tankers intending to load in the Ardjuna Marine Terminal the distance from the bow to the loading manifold should not exceed 450 ft.

The minimum loading rate in the Ardjuna Marine Terminal is 15,000 b.p.h. Any tanker arriving unable to receive Crude Oil at the above rate may be rejected.

Tankers loading Crude Oil on the SBM No. 2 can accomplish a maximum loading rate of approximately 30,000 b.p.h. and on the SBM No. 4 maximum loading rate is approximately 35,000 b.p.h.

In order to save time as well as to make the berth available for others, it is requested that ships receive Crude Oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons it is advisable to have the ship half loaded as quickly as possible.

Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of Crude Flow is almost immediate.

EQUIPMENT: Tankers are required to have ready: on the port side, a derrick of least 5 tons safe working load, rigged and ready to pick up the mooring and hose connecting gear from the Mooring Master's launch.

This derrick subsequently will be used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.

On the forecastle, at least 6 good ship's mooring lines shall be required. 2 of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM. The 4 remaining ship's lines will be laid out 2 and 2 on either side of the foc'sle deck, eyes about 3.5 metres distant from the fairleads as advised by the Mooring Master. When the Terminal mooring lines have been hove up and antichafe chains have been hove about halfway inboard through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain, so arranged that in the final position of mooring, the tanker is tied to the SBM using the Terminal mooring lines/chains and made fast to the ship's bollards by means of the ship's own lines. This will be backed up by 2 lengths of wire strops each 30 ft in length and 2 in. dia. These wires will be provided by the Terminal to be used as preventer wires. These 2 wire strops will not be used as the permanent mooring system.

Their purpose is to hold the ship safely moored in the event 1 or more of the ships lines part until the crew can replace such lines.

In certain weather conditions such as calm sea, light air and/or slack water tide, an additional ship's line may be required to be sent to the SBM and to be hove up from the tanker as required by the Mooring Master to avoid the vessel overriding the buoy.

A ship may be rejected if, upon inspection, it is not properly equipped, or if it is not suitably manned, or if it has dirty ballast, or tanks unsuitable for the cargo.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in a sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships, or partially inoperative ships, will be rejected. Should it become inoperative while at the Export SBM it will be removed at the vessel's expense.

No repairs are to be made while mooring or unmooring, or at the Export SBM without the express permission of the Marine Superintendent or his alternate.

The export tanker must lift the export hoses from the water by means of its own derricks and using its own crew.

A vessel must have both bower anchors in good working condition and in such sizes and amounts as to meet either "Lloyd's" or "A.B.S." standards although they may be, in fact, classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all Manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good working order and able to heave on the 12 in. and 15 in. braid lines from the Export SBM. Such winches must have sufficient power to heave the ship to the position required by the Terminal Mooring Master. Power supply to deck machinery must be maintained throughout the period ship is secured to the SBM. Failure to comply with this requirement may result in cessation of loading and delay so caused will be for ship's account.

To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

BALLAST: No facilities are available for disposal of dirty ballast. It is the responsibility of the Ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

As soon as practical after arrival, all tankers will be inspected by an Ardjuna Marine Terminal official for dirty ballast. During discharge of ballast similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the Terminal with a minimum ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the company Marine Superintendent.

Most responsible ship Owners have adopted a system of tank

cleaning using circulatory methods of transfer of tank washings on shipboard and treating these washings with chemicals. The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of lifting companies, the Terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately, and not be resumed until the oil is cleaned up and removed from the decks of the vessel, and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Ardjuna Cargo Supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer — in charge of loading.

All spillages of oil must be reported immediately to the Ardjuna Marine Superintendent, or his alternate, and, subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

If the ship's tanks are found to be leaking, it will not be accepted for loading unless satisfactory evidence of repair certified by Lloyd's or A.B.S. surveyors, or other recognised surveyors is submitted.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his notice of readiness and will lose any priority of position for loading. Tankers with dirty ballast will be rejected and will have to tender a new notice of readiness upon second arrival.

Owners and Masters are responsible to observe international convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

MEDICAL: No clinic is available.

CONSULS: There are no consulates available at Ardjuna Terminal. However, there are many embassies and consulates represented in Djakarta about 59 miles S.W. of the Terminal.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs' seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars.

Special allowances are made for the Master under special circumstances.

REPATRIATION: No crew changes. If emergency conditions prevail, for humanitarian reasons exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: Ardjuna time is GMT plus 7 hours throughout the year.

SHORE LEAVE: Not allowed.

FIRE-FIGHTING EQUIPMENT: Fire-fighting equipment such as salt water hoses, fire hoses, or a reel and fire extinguishers will be available on the storage barge.

REGULATIONS: The ship's Master is responsible to ensure that no communications by radio is allowed within the terminal area. Unauthorised radio communications will be cause for cessation of all operations, except clearing of the berth, and vessel's Notice of Readiness will be immediately nullified. No repairs are to be made while berthing or unberthing, or alongside the storage barge. The Indonesian Flag must be flown throughout the the vessel's stay in port.

The laws of Indonesia govern this Terminal and all personnel are urged to abide by them.

Only authorised personnel or visitors are permitted on the storage barge and/or export tanker.

GENERAL: The crude oil testing laboratory is equipped to perform the following tests: API gravity, BS&W and pour point. Any additional tests that may be required will be performed in Djakarta.

For convenience, mail for personnel on incoming tankers may be sent to the Djakarta office of the Company for transmittal to the tanker when it arrives at Ardjuna Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

No stores available.

AUTHORITY: P. M. Pertamina, Djalan Perwira Nos. 2–6, Djakarta, Indonesia. P. N. Pertamina, the Indonesian State Oil Company, handles all agency matters for tankers.

(**TERMINAL OPERATOR:** Atlantic Richfield Indonesia, Inc., Gedung Veteran R.I. Jalan Jenderal Soedirman, P.O. Box 63/DKT, Jakarta, Indonesia.

AGENT: *Procedure for appointing Agent:* Owners should Telex or Cable:

Pertamina Shipping Directorate
32–34, Jalan Yos Sudarso
P.O. Box 327
Jakarta – Indonesia
Cable address: Pertaminaship Jakarta
Telex number: 2885
Telephone: 290312 (11 lines) Ext. 217 Agency Section.

The Telex or Cable should appoint Pertaminaship as General Agent to attend the vessel at Ardjuna and should be sent 2–4 weeks prior to vessel's arrival.

Also, the following information should be given in the Telex or Cable to enable the General Agent to obtain Flag Dispensation for the vessel:

1. Name of vessel
2. Flag
3. Port of Registry
4. Certificate of Registration Number
5. Name of Master
6. Number of Crew
7. Last Port of Call
8. ETA Ardjuna
9. Indonesian Ports of Call.

BALIKPAPAN: 01.13 S. 117.00 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Loading Line Certificate.
Safety Certificate (passengers ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 Crew Lists and Passenger's Lists.
Ship's Articles.
2 Stores Lists.

PILOTAGE: Compulsory pilotage. Application for Pilots can be made via Radio Station or the Signal Station on Tokong Hill. Vessels arriving by night should anchor off the outer buoy and give their call sign to the Signal Station. Pilot boards in position 1° 19′ 30″ S. 116° 54′ 30″ E. Vessels leaving should order a Pilot at least 6 hours prior to departure and when leaving between 0600–1200 hrs. application should be made before 2000 hrs. the preceding day. If vessel's draft exceeds 70 dm. same should be mentioned in the pilot's cable application.

APPROACH: The surrounding land is in general low with few conspicuous hill rows as background. Only the high spit on which Balikpapan is built can be used as a landmark with the regular cone-shaped hill Tokong.

RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only.

MAX. SIZE: Tankers: Shell normally permit max. LOA of 750 ft. Drafts are restricted by the bar where the depth below chart datum is 25 ft. 3 in. Minimum keel clearance required is 1 ft. 3 in. Sailing drafts depending on rise of tide up to a max. of 33 ft. salt water.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

TUGS: One small tug is available.

BERTHING: Dry-cargo jetty 1: berth length: 240 m. with depths alongside 75 dm. at LWS. Combination dry cargo and oil: berth length: 300m. depth 75 dm. at LWS.

TANKERS: Jetties 3, 4, 5, 6, 7 and 8 are oil berths. When alongside vessels should keep 2 wires ready over the water-side so that vessels can be towed away in case of emergency.

STEVEDORES: Working hours: 0700–2000 Monday–Friday. 0700–1500 Saturdays. 0700–1500 overtime if required.

FRESH WATER: Available in limited quantity.

FUEL: Available at the berth 200 t.p.h. Coal not available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore-pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50. – (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents with the local prevailing Customs with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AUTHORITY: Department of Sea Communications.

BANYUWANGI: 08.13 S. 114.23 E.

OLD PORT NOW PRACTICALLY CLOSED FOR SHIPS. (OPENED FOR BOATS AND FISHING BOATS ONLY).

DOCUMENTS: Customs and Harbour Master requires:

Crew List.
Passenger List.
Customs Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Derat. Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.

PILOTAGE: Not necessary because anchorage open.
ANCHORAGE: Position: Lat. 8° 12′ S. Long. 114° 23′ 16″ E. Depth 25–30 m.
MAX. SIZE: No restrictions, vessels must be anchored outside harbour.
HEALTH: All vessels boarded by Harbour Quarantine on arrival.
RADIO: None, moved to Meneng Port.
TUGS: 2 tug boats belong to P.T. Jakarta Lloyd Banyuwangi Branch.
BERTHING: Distance 500 to 750 m. from lighthouse. Anchorage berths only.
STEVEDORES: 6 gangs available. P.T. Jakarta Lloyd Banyuwangi Branch. 1 gang consists of 13 labourers, 1 gang boss, 1 tallyman, 2 winch drivers, 1 commander.
MEDICAL: Arranged by Department of Health.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None available from shore.
OPENING/CLOSING HATCHES: Arranged by stevedores.
CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wine and/or spirits: Enough for own use, if more required must pay import duties.
CARGO GEAR: Ship's gear used. Cargo loading on board by lighter.
IDENTIFICATION CARDS: Required.
CONSULS: No local representation.
REPAIRS: No facilities.
REPATRIATION: Not possible.
TIME: GMT plus 7 hours.
HOLIDAYS: On Sundays and holidays no work available, but if necessary, work can be arranged. No work when raining.
POLICE/FIRE/AMBULANCE: Police and ambulance available. Fire brigades belong to District and Paper Mill. Phone Nos. 352, 653, 353 and 503.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed.
DELAYS: Possible. During loading if it rains.
AUTHORITY: Kepala Pelabuhan (Port Administration).
AGENT: P. T. Jakarta Lloyd. Jln. Pelabuhan 32, P.O.B. 7. Port Banyuwangi.

BANYUWANGI (Port Meneng): 08.07 S. 114.23 E.

NEW PORT FOR LARGE VESSELS.

DOCUMENTS: Customs and Harbour Master require:
Crew List.
Passenger List.
Custom Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Deratisation Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.
PILOTAGE: Compulsory pilotage for vessels over 5,000 gross tons. Pilots must be ordered by respective Agent at least 48 hours in advance of the time their service is required.
MAX. SIZE: Draft alongside quay max. 40 ft. Present quay permits max. LOA of 500 ft. Bar 200 m. East of quay, depth below chart datum is 24 ft.
RESTRICTION: Mooring and unmooring is restricted to daylight hours only.
HEALTH: All vessels boarded by Harbour Quarantine on arrival.
RADIO: Name: Department of Sea Communication. Call sign: 8 AD 22 with freq. 8110 kc/s., receiver SSB 5316 kc/s. Shore radio station only used for district contact (used by Department of Sea Communication).
VHF: Call sign: Meneng Radio, freq. Channel 16, 14, 13, 12, used shore to ship and can be contacted about 25 miles before arriving at Meneng Port.
TUGS: 2 small tugboats are available. Both of 80 h.p., owned by P. T. Jakarta Lloyd.
BERTHING: Present berth length 110 m., to be lengthened to 200 m. in 1977/78. Depth alongside 40 ft.
STEVEDORES: 12 gangs available P. T. Jakarta Lloyd, Banyuwangi Branch and P. T. Pelni Banyuwangi Sub. Branch.
One gang consists of 1 gang boss, 2 winch drivers, 1 Pilot and 13 labourers.
GODOWN: One transit godown 20×50 sq. m. owned by Port Administrator and one transit godown 20×50 sq. m. is being built.
Two 2nd line godowns capacity 10,000 tons owned by P. T. Jakarta Lloyd Banyuwangi Branch. Open storage 10,000 sq. m., 6 godown 2nd line owned by National Logistic Board capacity ±20,000 ton specially for rice.
Equipment: One forklift capacity 2.5 tons owned by Port Administrator. Five lorries at 1 ton owned by P T. Jakarta Lloyd. Crane 15 tons can be supplied if necessary.
MEDICAL: Arranged by Department of Health.
FRESH WATER: Available. Handled by Harbour Board, with a loading capacity of about 300 tons per day.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Normally by stevedores.
CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wines and/or spirits enough for own use. If more required must pay import duties.
CARGO GEAR: Ship's gear used.
IDENTIFICATION CARDS: Required.
CONSULS: No local representation.
REPAIRS: No facilities.
REPATRIATION: Not possible.
TIME: GMT plus 7 hours.
HOLIDAYS: On Sunday and holidays no workers available, but if necessary work can be arranged, except Independence Day (17th August) and 1st Sjawal (Idhul Firti/Moslem Holiday).
POLICE/FIRE/AMBULANCE: Police and Ambulance available. Fire Brigade owned by District and Paper Mills, telephone Nos. 352, 653, 353 and 503..
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Allowed, shore pass required.
DELAYS: Possible. During loading if it rains.
AUTHORITY: Kepala Pelabuhan. (Port Administration).
AGENT: P. T. Jakarta Lloyd Banyuwangi Branch. Tel. 363, 386, 432. Post Box 7 Banyuwangi.

BEKAPI TERMINAL: 01.00 S. 117.30 E. **(See Plan)**

SHIPMASTER'S REPORT:
DOCUMENTS:
3 Crew Lists.
1 Personnel Manifest.
1 Ship's Stores List.
3 Passenger Lists.
1 Transit Cargo Manifest.
Clearance from last port.
Smallpox certificates.
Valid documents, all crew.
Indonesian Immigration, Customs and port officials board to give clearance.
PILOTAGE: Compulsory. Mooring Master boards at anchorage. 72, 48 and 24 hours notice of arrival required.
ANCHORAGE: Position 00° 59′ S. 117° 27′ E. Depth 100 ft.
RESTRICTIONS: Vessels berth in daylight only as Oil storage barge "Waipiti" is moored to SBM production source. Vessels may berth at any stage of tide and may leave berth daytime or night-time.
MAX. SIZE: 60,000 d.w.t. 700 ft. LOA. Size of vessel limited by size of storage barge.
RADIO: Jakarta, Merak and Balikpapan.
VHF: Storage barge equipped with Channel 16 and others, also equipped with telex with direct relay to Jakarta office.
TUGS: None available.
MEDICAL: Not available.
TANKERS: Vessel anchors on arrival, N.W. of Oil storage barge "Waipiti" (ex "Massachusettes Getty"). Vessel berths during daylight to the starboard side of the "Waipiti". The barge supplies one 12 in. hose. Product handled, crude oil API 40.7. Loading temperature 96° F. Depth of water as berth 32 m. Barge equipped with 4 large "Yokohama" type fenders. Accommodation ladder not required. Vessel used port derrick, max. lift 3 tons.
DENSITY: 1025.
FRESH WATER, FUEL, OTHER SERVICES: Not available.

BELAWAN: 03.48 N. 98.43 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.
Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
2 Stores Lists.
RESTRICTIONS: Bar is excessively silting and continuous dredging is necessary to keep the shallowest part at 8 m. at LWS. Narrowest part of channel is 50 m. wide.
Outer roads about 600 m. square marked by light buoy. No pilot light vessel. This roadstead is approx. 600 m. wide, the centre of which is the range-line of the swept channel. This channel is provided with buoys and beacons.
PILOTAGE: Compulsory pilotage for vessels over 500 M3 gross, consisting of sea and harbour (docking) pilotage; working hours

0600–1700 W.I.T. Pilots must be ordered by the respective Agents at least 6 hours in advance of the time their service is required. Vessels will not be taken alongside wharf unless the vessel can be berthed before 1600 hrs. Incoming sea Pilot embarking at anchorage when berth has been allotted. Harbour Pilot boarding on passing harbour limits. Outward harbour and sea Pilot will board vessel alongside wharf, while harbour Pilots will disembark at harbour limits and sea Pilot at the anchorage in outer roads.
TUGS: 2 tug-boats, *Laut Timor* and *Asta*, both of 650 h.p., owned and operated by P.N. Tunda Bara (State owned), assist in mooring and unmooring, towing of lighters, supply steam, etc. The "Brahmayuda" of 350 h.p. is owned and operated by the Harbour Board and used in cases of emergency only.
RADIO: Coastal Radio Station: Call sign PKT; Class A1, Frequency 8714, A2, Frequency 8754.4.
BERTHING: *Ocean Quay*: Depth alongside 8 to 8.5 m. *Old Belawan*: Depth alongside 6 m.

Mooring buoys: There are 2 sets of moorings laid in the river i.e. in Old Belawan, but mooring is subject to the following conditions: approval of Harbour Master who views each case separately from the point of vessel's draft and the tide in the river.

If granted, the following ropes must be used both fore and aft: 2 good manilla ropes, 1 strong steel wire with shackle complete, 1 slip wire.
STEVEDORES: Working hours: Monday–Thursday 0800–1200 hrs., 1300–1600 hrs. Friday 0800–1100 hrs., 1300–1600 hrs. Saturday 0800–1200 hrs., 1300–1500 hrs. Overtime to be applied with authorities concerned is usually granted: on working-days during meal-hours, from 1600–2000 hrs. and occasionally till 2200 hrs.; on Sundays and holidays, except Independence Day, 1st Ramadhan, Christmas and 1st January.
FRESH WATER: Handled by the Harbour Board. Artesian wells all along the Ocean quay with a loading capacity of about 10 t.p.h. The water is regularly laboratory checked and declared drinkable but boiling before use remains recommended.
FUEL: Coal not available. Oil, at 5 points on the quay alongside go down 18 and 19 for Stanvac diesel and marine fuel oil, applications for which must be made 2 weeks in advance. Pumping capacity about 60 t.p.h.
REPAIRS: Slipways available for small craft only. Machine-shops available for minor repairs. Radio repairs available, viz. the Post Telegraph and Telephone Office. Electronic repairs not available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50.– (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents with the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
SHIPMASTERS REPORT: February 1976, I would inform you that all vessels are now berthed or unberthed on a round-the-clock basis, within the draft limits imposed by the dredged channel, which at present is 8 m. LWS with a tidal range of about 2 m. The chief Pilot stated that they would berth vessels up to 10 m. draft at high water.

The pilot station is now equipped with VHF and work on Channel 12: they pass berthing information on this channel to vessels at anchor. They seem to use 12 as a calling-up and working channel.
AUTHORITY: Departmeen Perjubungan, Direktorat Djendral Perhubungan Laut.

AGENT: P. N. Djakarta Lloyd, Medan Branch Office, Djl. Kesenian No. 4, Port Medan/Belawan.

BIMA: 08.25 S. 118.42 E.

DOCUMENTS:
6 Crew Lists.
6 Vaccination Lists.
6 Stores Lists.
6 Passenger Lists.
PILOTAGE: None available.
ANCHORAGE: 300 m. off the quay in depths of 16 m.
RESTRICTIONS: None, vessel may enter harbour day or night.
MAX. SIZE: Not limited at anchorage.
RADIO: Coastal Radio Station, cable address Pelni Bima by Post Office.
TUGS: No tug-boat available.
BERTHING: Entering and sailing allowed after dark. No berthing facilities except for very small ships.
STEVEDORES: Ordered by Agent. No work allowed on Muslim holidays, New Year and 17th August.
MEDICAL: 1 government hospital available.
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None available, police and Customs officers posted on board.
OPENING/CLOSING HATCHES: Carried out by stevedores.
AIRPORT: Flights from Bima to Sumbawa, Ampenan, Bali. By AOA Zamrud (Dakota) every Sunday, Tuesday, Thursday and Saturday. Aviation Corporation.
TIME: GMT plus 8 hours.
HOLIDAYS: Muslim holidays, New Year, 17th August.
TELEPHONES: No phone connections between ship and shore available.
SHORE LEAVE: Crew members are allowed to go ashore and arranged by Agents.
DELAYS: 1 motor-boat, 4 lighters each of 15 tons and 1 lighter of 25 tons. Loading general cargo live buffaloes and fodder. For heavy cargo max. 7 tons each lift can be handled through lighters.
AGENT: Pelni Bima. Nusatenggara Barat Indonesia. Cable address: Pelni Bima. Tel. Office No. 46. Residence: No. 7.

BITUNG: 01.26 N. 125.12 E.

PORT LIMITS: The area between limits:
125° 10′ E. 125° 13.5′ E.
01° 25′ N. 125° 10′ E. to coastline of Lembeh Island.
01° 27′ N. 125° 13.5′ E. to coastline of Sulawesi.
Coastline of Lembeh Island between Lat. 01° 25′ N. 125° 13.5′ E.
Coastline of Sulawesi between 125° 10′ E. and Lat. 01° 27′ N.
DOCUMENTS:
4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
3 Cargo Lists.
3 Provisions Lists.
1 List of Articles new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Ship's Register.
International Vaccination Certificate for Crew and Passengers. (Especially for International Travellers.)
Health Book/Maritime Declaration of Health.
Derating Exemption Certificate.
PILOTAGE: Contact Coastal Radio Station Bitung (call sign PKM), telegram address: Port Administration Bitung; advance notice of ETA 24 hours. Pilot boat: motor launch, light grey. Requiring a Pilot: flag, sound and Morse Signal: "G" anchorage for vessel awaiting a Pilot: the area between: 01° 26.3′ N., 125° 10′ E.; 01° 25′ N. 125° 10.8′ E. and 01° 24.1′ N., 125° 07.1′ E.; 01° 24.1′ N., 125° 09.9′ E.
ANCHORAGE: The area between coast of Lembeh Island and coast of Sulawesi: 01° 27′ N., 125° 12.3′ E.; 01° 26.2′ N., 125° 13.5′ E. and 01° 26.3′ N., 125° 10′ E.; 01° 25′ N., 125° 10.8′ E. Depths: 42 ft. to 114 ft.
RESTRICTIONS: No restrictions on night entry.
Shipmaster's Report: Numerous fishing boats at the port entrance especially at night time, also fishing sticks, and small fishermen's houses on bamboo sticks built at sea, without lights, dangerous to navigation. Approaching or sailing from port at night time, should not be attempted.
MAX. SIZE: Draft alongside pier, max. 32 ft.
HEALTH: Vessels coming direct from other countries or coming from infected port: "Q" flag to be flown. Pratique procedure and action necessary to obtain pratique according to the Int. Sanitary Regulations.
RADIO: Bitung Radio/PKM for vessels to route ETA cables to Agents, receivers, etc.
TUGS: None available.
BERTHING: Depth alongside pier 18 to 34 ft. dependent location.
STEVEDORES: Arranged by handling Agent.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required aboard. Vaccination/fever certificates required, 3 copies.
TANKERS: 1 oil jetty for domestic tankers.
DENSITY: About 1030.
FRESH WATER: Available from hose connections on the pier, at a rate of 100 t.p.h., or by barge.
FUEL: Not all grades fuel available. Diesel and marine lubricants can be supplied. 48 hours notice required.
DEVELOPMENTS: Extension of pier to total length of 1,821 ft. to be completed 1976.
REPAIRS: Some deck and minor engine repairs are possible at Bitung dockyard. Radar and electronic repair available, but not for big repairs.
GANGWAY/DECK WATCHMEN: Not needed.
OPENING/CLOSING HATCHES: Normally by crew/stevedores, otherwise according charter party.
SHIP CERTIFICATES: Registered Tonnage Certificate and all certificates normally required to be on board.
CUSTOMS ALLOWANCE: 100 cigarettes or 20 cigars or 100 gram. tobacco each crew member; 1 bottle wine or spirits for each crew member.

Passengers: Commodity to be worth US$25 per person or US$100 per family.
CARGO GEAR: Loading and discharging by ship's own derricks. Shore cranes capacity 15 and 35 tons.
IDENTIFICATION CARDS: Shore pass issued by the Immigration Office for crew members at Agent's request.
CONSULS: Philippines only.
REPATRIATION: Facilities available.
AIRPORT: About 50 km. from port of Bitung. Regular airlines: "Garuda" 7 flights a week, "Mandala" 2 flights a week and "Zamrud" 3 flights a week.
TIME: Local time GMT plus 8 hours, permanent.
HOLIDAYS: New Year's Day; Idul Adha; 1st Muharam; Ascension Day; Birthday of Prophet Mohammad; Good Friday; Proclamation Day (August 17); Ascension Day of Prophet Mohammad; Idul Fitri and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 107; Ambulance 24; Fire 111.
SHORE LEAVE: Crew members are allowed ashore with a shore pass issued by the Immigration Office.
AUTHORITY: Port Administrator.

CINTA TERMINAL: 5.30 S. 106.14 E. (See Plan)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:
Maritime International Declaration of Health.
Valid Deratisation or Exemption Certificate.
6 copies of Crew Lists.
Passenger List, if any.
Smallpox Vaccination Certificates for all crew members or passengers within three years.
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seaman's Certificates for all crew members or passengers.
Notice of Readiness.
Indonesian Consular Clearance.
1 Crew Declaration of Personal Belongings.
1 Ship's Stores Inventory.
6 copies of Cargo Manifest for Cinta Terminal loading.
1 Copy of Cargo Manifest for Transit Cargo with a Summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyds" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all Manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is 5° 25′ 25″ S., 106° 12′ 10″ E. with a radius of one mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The hold area is South of the SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.

MAX. SIZE: Minimum size tanker acceptable: The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. size tanker acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 55,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to IIAPCO for any delays.

NAVIGATION AIDS: The SBM is fitted with a 5 nautical mile white flashing light; flashing at a rate of 60 flashes per minute. The SBM is located Lat. 5° 25′ 21″ S. and Long. 106° 14′ 10″ E. and bears 318° True, approximately 51 nautical miles from the Port of Jakarta.

A large 602 ft. long barge Cinta Natomas is used for storage of crude oil and for accommodation and headquarters of Cinta Terminal personnel. It lies permanently anchored to an SBM 5° 26′ 40″ S. and 106° 14′ 42″ E. on a line bearing approximately N. 88° W. and 8,500 ft. from the location of the SBM. The barge shows lights and shapes as prescribed in the International Regulations for preventing collisions at sea for vessels engaged in underwater operation, see Rules 4 (c) and 11 (b) (c) (d). The barge is also equipped with a foghorn with 5 seconds on and 55 seconds off sequences forward and 5 seconds on and 55 seconds off abaft, 10 seconds apart.

Four permanently fixed oil producing structures are located in the Terminal area:

Cinta platform "A" rises approximately 65 ft. above water and is located approximately 7,100 ft. from the barge at 5° 26′ 23″ S. by 106° 15′ 50″ E.

Cinta platform "B" is an identical structure to platform "A" and is located at 5° 27′ 01″ S. and 106° 15′ 22″ E. and 4,500 ft. from the barge.

Cinta platform "A" and "B" have heliports.

Cinta platform "C" rises approximately 54 ft. from minimum low water and is connected by a 110 ft. long bridge to Cinta platform "B" on East side.

Kitty platform "A" is located about 33,000 ft. from the barge at 5° 30′ 57″ S. and 106° 11′ 59.5″ E. This platform rises approximately 54 ft. from minimum low water.

RADIO:

Cable address: "Iiapco Jakarta".
Telex: 4221.

Operating Schedules and frequencies: Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2-4-8 and 12 mHz bands and by International Marine VHF Channel 16. (156.80 mHz).

Cinta Terminal (call sign: 6ZFT) particulars are as follows: operated by: Independent Indonesian American Petroleum Company (IIAPCO). Position: Lat. 5° 26′ 40″ S. Long. 106° 14′ 42″ E. Hours of operation: 24.

Frequencies	*Class*	*Power*	*Mode*
2182 kHz	A3, A3H, A3J	150 W	AM
2398 kHz	A3, A3H, A3J	150 W	AM
2638 kHz	A3, A3H, A3J	150 W	AM
2738 kHz	A3, A3H, A3J	150 W	AM
4078.0 kHz	A3, A3H, A3J	150 W	AM
4456.0 kHz	A3, A3H, A3J	150 W	AM
8281.2 kHz	A3, A3H, A3J	150 W	AM
8223.6 kHz	A3, A3H, A3J	150 W	AM
12421.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 — 156.30 mHz	Simplex		
12 — 156.60 mHz	Simplex		
13 — 156.65 mHz	Simplex		
14 — 156.70 mHz	Simplex		
16 — 156.80 mHz	Simplex		
20 — 157.00 mHz	Receive	161.60 mHz	Duplex
26 — 157.30 mHz	Receive	161.90 mHz	Duplex
28 — 157.40 mHz	Receive	162.00 mHz	Duplex

Notes: 6ZFT keeps continuous watch on 2182, 4456 and 8281.2 kHz. 6ZFT keeps continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will be way of this station except should a vessel be unable to contact 6ZFT, she should send messages through: Singapore Radio/9VG or Pertamina Radio/PKI-2.

Initial Communications: It is most important that ships establish communications with the Centa Terminal (6ZFT) not less than 72 hours prior to arrival at the Terminal, giving estimated time of arrival. Further ETA information should be sent when the vessel is 48 hours, 24 hours, 12 hours and 4 hours distance or any time a change of one hour in original ETA occurs. These messages should specifically state whether ETA is given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) will transmit a message to her giving preliminary requirements and details as to Terminal. Masters are urged to comply with this in all details in order to facilitate vessel turn-around and Government formalities.

Communications within 4 hours of terminal: Once ships are within the 4 hours distance of Cinta Terminal (6ZFT) communication, valid radio-telephone communications on International marine VHF may be established on Channel 16 (156.80 mHz). This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation will be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distance from the Terminal.

Communication in Terminal: The Mooring Master will be in direct control of all ship communications while in the Terminal Area. Any unauthorised communications will be cause for cessation of all operations excepting clearing the berth, and the vessel's Notice of Readiness will be nullified immediately.

PRATIQUE: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Cinta Terminal area. These signals shall be displayed continuously until pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port. The boarding officials will attend the incoming vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and when the tanker is in every respect ready to load, the Master may tender his Notice of Readiness. Notice of Readiness will not be accepted during periods when the Terminal is closed. The Terminal is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the Terminal will rest with the Terminal Superintendent. Tenders by vessels to load crude oil cargo will be normally accepted and berth assigned to vessels in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast (if any), and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These are under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administrative Offices are located on board the 143,000 d.w.t. crude storage barge *Cinta Natomas* permanently moored approximately 8,500 ft. on a line bearing North 88° W. from the SBM. The nearest port with facilities is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 11 m. in diameter, and designed to handle tankers in the 55,000 d.w.t. class, or larger, during reasonable weather. The buoy is equipped with dual 12-inch floating hose with ASA 150 pound flanged connections. Both strings must be taken aboard. Loading rates will be from 13,000 to 40,000 barrel per hour range. The SBM is also provided with two permanently attached 12-inch circumference synthetic fibre floating mooring lines. These lines should be held under tension by the vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle head the following:

(a) Messenger lines on the forecastle head for bringing 2 mooring lines aboard from the SBM (min. 6-in. circumference).

(b) Mooring winches on forecastle head for handling two 12-in. circumference synthetic fibre floating mooring lines from the SBM.

(c) Adequate chafing gear to prevent damage to mooring lines.

(d) Derrick rigged and ready to pick up from launch, mooring shackles, nylon stops and hose connection gear on the port side midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon stop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons min. hoist size required.) Vessel's loading manifolds should be prepared for two 12-in. ASA 150-lb. flanged hose connections prior to vessel's arrival at Terminal. Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8-in. hose connections to be removed; also, if necessary, "Y" pieces removed so that max. flow through the 12-in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 40,000 b.p.h. (5,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyds or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging ballast at night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Djakarta. All expenses will be charged to the ship owner.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed one litre of beer or half litre of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The

ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AUTHORITY: Independent Indonesian American Petroleum Company, Djakarta.

DJAKARTA (Tandjong Priok): 06.10 S. 106.50 E. (See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's arrival and departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Ship's Certificate: The Ship's Certificate should be delivered to the Harbour Master through the Agent. This certificate will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the N Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the N Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Compulsory. Pilots will board the vessel at the Outer Anchorage, from 0800–1800 hrs.

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of M.27 is used for communication between the pilot boats and the Pilot station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater.

RESTRICTIONS: Max. draft is approximately 10 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	150	7
2nd	170	8
3rd	170	10
Oil	170	10
Coaster	60	4

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose captain has declared that a quarantinable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantinable disease (QL/QQ).

The concerned vessel is free from quarantine measures when free pratique has been obtained. The free pratique becomes invalid when a vessel is in quarantine as stated above or a quarantinable disease occurs during the validity of free pratique.

The Port of Tunjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "provisional pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "provisional pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "free pratique".

Accordingly vessels enjoying "provisional pratique" are still required to hoist the quarantine flag.

Vaccination/Immunization: Vaccination and Immunization against smallpox and cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

Harbour Master	Channel 16
Pilot	Channel 12–14
Tugboat Operations	Channel 12
Port Operations	Channel 14
Public Service	Channel 16

TUGS: Tugs are operated by the State-owned P.N. Tunda Bara, Cable address: "Coaltug", which also handle the mooring facilities. Vessels over 80 m. in length have to use at least 1 tug. 10 tugs available from 135 h.p. to 1,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth* (m.)
Coaster Harbour	663	3–4
1st Inner Harbour	1,855	5–8
2nd Inner Harbour	1,900

STEVEDORES:

Working hours: The usual working hours at the harbour are:

Monday–Thursday	0800–1200 hrs.
	1300–1600 hrs.
Friday	0800–1100 hrs.
	1330–1600 hrs.
Saturday	0800–1200 hrs.
	1300–1400 hrs.

Overtime is allowed on request.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipe-line or barge, rate 50/60 t.p.h. Barge capacity 60–350 tons.

FUEL: Available by pipe-line or barge, supplier is Pertamina.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CUSTOMS ALLOWANCES: Tobacco: Each crew member is allowed to carry 200 cigarettes or 50 cigars or 100 grams of tobacco ashore without paying import duty. Alcohol: There is no allowance for alcoholic drinks. Other commodities: Maximum value of US $100. Each crew member is allowed to bring personal goods in use up to maximum value of US $100.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

AIRPORT: Kemayoran International Airport is approximately 8 km

from Tanjung Priok, and Halim International Airport is approximately 25 km. Kemayoran Airport phone: 47031.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire 291399; Security 291691/291459; Ambulance 291045/290097.

CREW IDENTIFICATION CARD: Crew members having no passport are required to carry a Seamen Identification Card (S.I.C.).

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

AUTHORITY: Port Administrator.

AGENT: Head Office: P.N. Djakarta Lloyd, Djl. Hadji Agus Salim 28, Djakarta.

P.N. Djakarta Lloyd, Tandjung Priok Branch Office, Djl. Ambon 1, Port Tandjung Priok.

DUMAI: 01.41 N. 101.27 E. (See Plan)

DOCUMENTS:

Maritime International Declaration of Health.
Valid Deratisation or Deratisation Exemption Certificate.
12 Crew Lists.
12 Passenger Lists (if passengers carried).
Smallpox Vaccination Certificates for all crew members and passengers.
Certificates of inoculation against any communicable diseases.
Valid Passports and/or Seamen's Certificates for all crew members and passengers.
Quarantine Certificates if expired, can be renewed.
Harbour report/last port clearance.
Load Line, Ship's Registry, Safety Radio, Construction and Equipment Certificates.
For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copies Stores List.

APPROACHES: The Dumai Port installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessels must make a turn of approximately 180 degrees to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait fairways have been wire-dragged clear to a depth of 24 m. and 18.3 m. LWS respectively.

PILOTAGE: Harbour pilotage is performed by Government Pilots. The Harbour Pilot will board a vessel at anchorage for berthing or immediately on arrival at Buoy No. 18 when berth is available.

Sea piloting for the Rupat and Bengkalis Straits is provided by the Department of Sea Communication.

Sea piloting for the Rupat Strait is compulsory. According to the Dumai Port Authority's letter dated June 25, 1974, there are 2 piloting areas for Sea Pilot.

Bengkalis Strait and Rupat Strait from fairway buoy or Eastern part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.).

Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area. Subject to pilotage compulsory for the vessel capacity more than 300 cu.m. gross.

For arriving, vessel should call 6 hours prior CPI's Radio Telephone (VHF) on Channel 12 and 16 at fairway buoy as "request for Pilot" or hoist International Code Flag, painted white, to call "Pilot".

According to the Dumai Port Authority's memo dated May, 1972, effective on 1st June, 1972, all vessels proceeding to Dumai should hoist the International code flag H or PT when passing buoy No. 17 as "requesting for Pilot" and call CPI's Radio Telephone (VHF) on Channel 12. You will be informed whether or not Pilots are available, if not you may then proceed directly to Dumai Harbour anchorage area.

The practice of berthing and unberthing vessels utilising CPI mooring masters has been discontinued.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instructed by the Dumai Port Control Radio to berth on arrival, it is suggested that they proceed to the recommended anchorage area.

MAX. SIZE: Length 1,263 ft., draft 57 ft.

ETA ADVICES:

1. Proceeding direct from ports other than Palembang and not stopping at Singapore en route:
   - *(a)* Radio 96 hour ETA to "Calpaking Dumai" (include operational data).
   - *(b)* If any time this estimated arrival time changes by 2 hours, send an amended ETA message immediately.
   - *(c)* 24 hours before arrival, *confirm* or *amend* the ETA message regardless of any change from the last advice.
2. Proceeding from Singapore:
   - *(a)* Prior to arrival at Singapore, radio 96 hour ETA Dumai include words "From Singapore" to "Calpaking Dumai" predicted on estimated time of stay at Singapore.
   - *(b)* At Singapore, when departure time from Singapore is known confirm or amend the ETA to "Calpaking Dumai" through your Singapore ship's Agent.
   - *(c)* Immediately upon departure from Singapore, and when able to use the vessel's radio legally, again *confirm* or *amend* the ETA to "Calpaking Dumai".
3. Proceeding from Palembang:
   - *(a)* When departing Dumai on voyages to Palembang and return, give the Dumai Agent a verbal estimate of arrival back at Dumai in each instance.
   - *(b)* Whether or not *(a)* is applicable, when time of departure from Palembang is known, cable an ETA message to "Calpaking Dumai" through your Palembang Agent.
   - *(c)* Immediately on departing Palembang, and when able to use the vessel's radio legally, *confirm* or *amend* this ETA to "Calpaking Dumai".

RESTRICTIONS: All vessels inbound to Dumai from the time abreast Raleigh Bank light buoy until anchoraged off Dumai Terminal must display the following recognition signals.

By day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.

By night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian naval patrol crafts. The foregoing is subject to change.

For some years, the Rupat-Bengkalis Strait area has been designated a restricted Maritime Zone by decree of the Government of Indonesia. A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this zone has been granted by the Indonesian Navy to tank-vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable.

RADIO: There is a Government coastal station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name: Dumai Radio.
Call Letters: "PKP"

Time (GMT)	*Transmits*	*Listens on*
0000–0030	448 kc/s.	500 kc/s.
0400–0500	448 kc/s.	500 kc/s.
0800–0900	448 kc/s.	500 kc/s.
1200–1300	448 kc/s.	500 kc/s.
1300–1400	8726/AL kc/s.	8726 kc/s.
0030–0130	8726/AL kc/s.	8726 kc/s.
0230–0330	13101 kc/s.	13101 kc/s.
0630–0730	17184 kc/s.	17184 kc/s.
0130–0200	2182 kc/s.	3195 kc/s.

If contact cannot be made with Dumai Radio, then you should immediately contact Singapore Radio, Call Sign 9VG and forward your ETA message to "Amoseas Singapore RS-21349".

A C.P.I.-operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities. Channel 12 is utilised. Frequencies: 156.6.

Channel 16 is also utilised. Frequencies: 156.8.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not free pratique).

TUGS: Mooring and unmooring assistance is provided by three 3,000 h.p. diesel electric tugs which are stationed in the immediate vicinity of the wharves. While rendering assistance the tug-boats are under order of the Pilot on duty.

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 6 wharves. 1 wharf is a Government-owned and operated cargo wharf which can also handle discharge of petroleum products. Another wharf is Pertamina, owned and operated for the sole use of its refinery. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading of crude oil and can handle refinery product and caustic soda resin.

- *(a)* Oil Wharf No. 1, located in approx. position 01° 41′ 14″ N. 101° 28′ 07″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,008 ft., and a draft of 57 ft. Orientation of the wharf parallels the current flow.
- *(b)* Oil Wharf No. 2, located in approx. position 01° 41′ 14″ N. 101° 27′ 52″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,465 ft. 8 in. Least depth at face of wharf 58 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,263 ft., and a draft of 55 ft. Orientation of the wharf parallels the current flow.

(c) Oil Wharf No. 3, located in approx. position 01° 41′ 14″ N. 101° 27′ 42″ E. Design capacity 84,000 d.w.t. Length between outer dolphins 1,170 ft. Under favourable weather conditions capable of receiving vessels of 100,000 d.w.t. Least depth at wharf face 57 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 940 ft. and a draft of 54 ft. Orientation of the wharf parallels the current flow at 095–275 true.

(d) Oil Wharf No. 4, the former T-2 wharf, located between the Cargo Wharf and Oil Wharf No. 3. Wharf used mostly for handling domestic tankers. Basic design is for 55,000 d.w.t. In terms of vessel's size and design this would be an LOA of approx. 680 ft. and a draft of approx. 46 ft. Least depth of water at face is 51 ft. (MLWS). Overall length between mooring dolphins is 680 ft. Orientation of the wharf parallels the current flow.

(e) Government Cargo Wharf located in approx. position 01° 41′ 14″ N. 101° 27′ 04″ E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (MLWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of five (5) tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

(f) Pertamina Refinery Wharf, located in approximate position 01° 41′ 12″ N. 101° 28′ 16″ E. Design capacities, Outer Berth 100,000 d.w.t., Inner Berth 10,000 d.w.t.

BALLAST: There are no shore facilities at Dumai for disposal of dirty ballast water. Vessels should arrive with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. All ballast water must be pumped overboard after arrival at berth, and prior to loading, unless "load on top" procedures apply. If, after arriving alongside, a vessel is found to have oily ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. A new Notice of Readiness to load must then be tendered.

Effective First Quarter of 1977 (approx.) there will be shore facilities for the disposal of dirty ballast water.

Minimum draft schedules recommended for various tonnage tankers are as follows:

D.w.t. *(deadweight tons)*	*Minimum draft* *forward – aft*
(a) 12,000–22,000	12 ft. – 20 ft.
(b) 22,000–32,000	16 ft. – 24 ft.
(c) 32,000–45,000	18 ft. – 26 ft.
(d) 45,000–60,000	19 ft. – 27 ft.
(e) 60,000 and over	22 ft. – 28 ft.

CARGO: There are 2 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API Gravity=35° approximate Pour Point ±100°F Solid Point ±95°F.
2. Duri Crude with API Gravity=22.0° approximate Pour Point ±40°F Solid Point ±35°F.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

Wharf	*Size of arms*	*Number of arms*	*Size of flanges*	*Capacity b.p.h.*
Oil Wharf No. 1	12″	4	12″	60,000
Oil Wharf No. 2	16″–12″	3	12″	90,000
Oil Wharf No. 3	12″	4	12″	60,000
Oil Wharf No. 4	12″	2	12″	40,000

Oil Wharves 1, 2 and 3 use U.S. standard flanges, faced and drilled. These wharves have Chicksan loading arms while Oil Wharf No. 4 operates with hoses swung on board by the wharves' derricks.

Wharf crews and launch crews are on duty to handle loading arms and/or oil hoses and mooring lines on the wharf. Mooring lines on the vessel will not be handled by C.P.I. personnel. Rat-guards must be fitted on all mooring lines.

The required reducers to fit vessel's manifold must be connected and disconnected by ship's personnel.

Upon completion of loading, the vessel will be required to leave the berth immediately after disconnecting hoses and await clearance at the anchorage.

Notice must be given by the vessel to the Piermaster one half hour before the vessel completes deballasting.

Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradualllly be increased until the desired rate has been reached.

The vessel must give 30 minutes notice to the wharf before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the Piermaster may reduce to 1 pump.

Ship's valves shall not be closed against loading pump pressure.

On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: The port health doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the port health doctor might refer such cases to CPI hospital facilities. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessel's main propulsion machinery shall be in readiness for instantaneous use on short notice. No repair facilities ashore.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs officials on arrival and will remain sealed until the vessels leave Indonesian waters.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated.

TIME: GMT plus 7 hours all year round.

REPATRIATION: Due to stringent Indonesia Government regulations, normally no passengers and/or crew members from any vessel are allowed to disembark for repatriation purposes.

SHORE LEAVE: Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by harbour authorities, and open for 24 hours. Recreational facilities are not available for seagoing personnel at present and few facilities exist in the village of Dumai. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the CPI compound is out of bounds with the exception of the road from the wharves to the village road.

PROVISIONS: No facilities for supplying provisions, nor for handling ship's laundry.

CONSULS: At Dumai the Indonesian Government Port Authorities are located in the Government Building situated close to the Government Cargo Wharf.

There are no Consuls or other foreign Government Representatives located at Dumai, or in the immediate vicinity.

TELEPHONE: As soon as the vessel is berthed a ship-shore telephone connection will be provided.

Ships berthed at No. 1 oil wharf tel. 351; No. 2: 352; No. 3: 353; and No. 4: 354.

The loading master will provide a list of important numbers in Dumai.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.W. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 and 0200 hrs.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70 to 90 per cent).

GENERAL: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

AUTHORITY: Caltex Pacific Indonesia (C.P.I.).

AGENTS: C.P.I. will act as ship's Agents for vessels loading at C.P.I. facilities Dumai except for certain interinsular vessels. As mail service to and from Sumatra is relatively slow and subject to some frequent delays, ample time should be allowed in dispatching mail to vessel calling at ports in this area. The mail and cable addresses for C.P.I. are as follows:

Mail: P.T. Caltex Pacific Indonesia (for Dumai), Kebon Sirih 52, Djakarta, Indonesia (via mail).

Cable: Calpaking Dumai (via Radio Station "PKP").

Another Agent is Pertamina, a State enterprise, who usually handles matters pertaining to Pertamina owned or chartered tankers.

KIDJANG: 00.53 N. 104.37 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbourmaster.

Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and

Documents, which will remain in the Harbourmaster's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Stores List.

RESTRICTIONS: Vessels with destination Kidjang should call at Tg. Pinang first for a Pilot or at Tg. Tilli at about 00° 48′ 12″ North and 104° 35′ 30″ East, slightly South of Tg. Pinang Roads. Fairway East of Tg. Tilli 5.6 m. and Kelong Strait 7.4 m. at LWS.

PILOTAGE: Compulsory Pilotage. Pilot stations are in Tg. Pinang Roads or off Tg Tilli. Vessels should arrive at Tg. Pinang preferably between 0600 and 1200 hrs. Application should be made 48 hours prior to ship's arrival via radio station addressed to the Agency, mentioning ship's ETA, Pilot station and draft.

MAX. SIZE: Vessel: Length max. 160 m. and draft max. 32 ft.

RADIO: Coastal Radio Station: Refer to Tg. Uban Radio, cables for TG. Pinang can be sent via Tg. Uban Radio call sign PKI.

HEALTH: A 3rd Class port and can only be called at after obtaining a free pratique at one of the 1st Class Ports.

Vessels arriving from abroad have to fly the "Q" Flag (Yellow Flag) until boarded and released by the Quarantine Officer. Masters have to fill in the Quarantine Form and signed by him and the Ship's Surgeon, if any, and produce the following:
Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

TUGS: Tug assistance not available.

BERTHING: Vessels are moored alongside 2 jetties on dolphins, with 4 good manilla fore and 4 aft. At Springtide a Hercules wire is available. Shifting only during slack tide.

STEVEDORES: Working hours: Loading to be effected with customary quick dispatch on clear working days, whereby Sundays, Holidays, governmental, local holidays and Saturdays between 1200 and 2400 hrs. and Mondays between 0000 and 0800 hrs. are always excepted.

Overtime. At Master's request, work on Sunday, holidays, governmental, local holidays and Saturday between 1200 and 2400 hrs. and Mondays between 2400 and 0800 hrs. can usually be arranged.

Working capacity: Loading capacity by conveyor belt, 200–350 t.p.h.

FRESH WATER: Not available.

FUEL: Not available.

SHORE LEAVE: Crew members are not allowed to leave Kidjang and have to report back aboard at 2300 hrs. Identification cards must be carried along. It is prohibited to lower the boats with the purpose of visiting the other islands, fishing, etc.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp. 50 (50 Rupiahs only) ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AUTHORITY: Dept. of Sea Communications.

LABUANTRING BAY: 08.44 S. 116.04 E.
AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:
Health Certificate.
1 Vaccinations List (Smallpox and Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Store Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: Normally not provided. When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar enter Labuantring Bay, normally calling Ampenan awaiting particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

BERTHING: Length of quay at Labuantring Bay approx. 40 m. Vessels with a length of less than 100 m. and a draft of less than 6 m. may berth safely. Berthing at Ampenan (anchorage) for all sizes of vessel.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: 1 tugboat of 125 h.p. 2 motor launches only, for cargo handling purposes.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kc/s. and 430 kc/s. Qtu: 0000z–0100, 0500z–0600: except Friday and Saturday: 0000z–0100z, 0900–1000z. Sunday and holiday closed.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Some specialised surgery is not. Smallpox vaccination and Yellow Fever Certificates inspected on arrival.

TANKERS: Berthing at Ampenan.

FRESH WATER: Not available.

FUEL: Not available.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Deratisation Certificate, Clearance from previous port, all to be shown on arrival.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

OPENING/CLOSING HATCHES: Normally carried out by stevedores; ship's crew may if required by vessel to do so.

CUSTOMS ALLOWANCES: No restrictions. Custom's Officer supervises opening and resealing of bond.

CONSULS: None available locally.

AIRPORT: Served by regular airlines to Bali and Java.

TIME: GMT plus 8 hours.

HOLIDAYS: 1st January; Independence Day (17th August); Christian, Islamic and Balinese holidays as appointed by the Indonesian Government.

GENERAL: Vessels should not use ship's radio station. Harbour Police and Customs' guards on board during ship's stay in harbour.

SHORE LEAVE: Crew allowed ashore; passports required whilst ashore.

DELAYS: Normally minimal.

AGENTS: P.N. "Pelajaran Nasional Indonesia" (PELNI), 192 Djalan Pabean, Ampenan, Nusa Tenggara Barat, Indonesia. Tel. Ampenan 94-101-160. Cable: Pelni Ampenan.

MACASSAR: 5.05 S. 119.24 E.

DOCUMENTS:
Certificate of Registry.
Crew List.
Log Book.
Certificate of Seaworthiness.
Certificate of Plimsoll Mark.
Radio Certificate.
Health Certificate.
Equipment Certificate.
Shipping documents as follows:
Manifest of Cargo.
Bills of Loading.
Charter Party (if necessary).

PILOTAGE: Compulsory for all vessels, who have to use Port Administration's tug-boat. To order Pilot contact Macassar Radio, call sign PKF. Besides, Agent contacts the Harbour Master (Inspektur Keselamatan Pelajaran). Pilot boards vessel at anchorage, about 1 mile off shore. Exact area where vessel waits for Pilot or anchorage is between Lae-Lae Island and Samalona Island. Depth of anchorage is 3 fathoms.

RESTRICTIONS: Every ship needs permission from Dit. Dken. Perhubungan Laut (General Directorate of Sea Communication) to enter Macassar Harbour. When ship has no permission, Agent must apply to Port Authority and give details of ship, i.e. name of vessel, nationality, name of shipping enterprise, ETA, ETD, last port of call, next port of call, loading or discharging and aim of entry. No entry after 1800 hrs.

MAX. SIZE: No limit on length or breadth. The port consists of 2 bases; (1) Soekarno Base 1,360 m. long. (2) Hatta Base, 550 m. long. Draft at Soekarno Base 8 m. Draft at Hatta Base 9 m. Besides these bases there is a special pier for oil carriers outside main port area not far from Soekarno base.
HEALTH: Every vessel must have a certificate of health on board. When vessel enters a member of Port Health Authority boards. If there is any disease on board the vessel must go to quarantine area.
RADIO: Macassar Radio with call sign PKF.
TUGS: 1 tug *Anggada VII.* Used for vessels of 5,000 d.w.t. or over, and 4 tugs of smaller size.
STEVEDORES: Stevedoring by shipping enterprise or shipping enterprise agent. Capacity for discharging about 20 tons every gang/hour. No heavy cranes.
MEDICAL: Doctor and clinic available.
FRESH WATER: Ground-pipe with 10 t.p.h capacity. Barge with machinery pump 25 t.p.h. capacity.
FUEL: Fuel capacity in a day 400 tons.
DEVELOPMENTS: In near future, Macassar to have bonded warehouse.
GANGWAY/DECK WATCHMEN: There are no special deck watchmen services but can be arranged through Agent.
OPENING/CLOSING HATCHES: Work carried out by stevedores.
CUSTOMS ALLOWANCES: Tobacco – only sufficient for personal use. Wine and/or spirits – none permitted out of bond.
CARGO GEAR: Local regulations comply with Bureau of Classification with which vessel registered.
IDENTIFICATION CARDS: Identification cards needed by Immigration Office.
CONSULS: None available locally.
REPAIRS: Minor deck or engine repairs possible.
AIRPORT: Macassar Airport, called "Mandai Airport". Distance from town about 23 km. Services (1) Macassar – Kendari and (2) Djakarta – Surabaja – Macassar – Manado 3 times a week.
TIME: Middle Indonesian Time. GMT plus 8 hours.
HOLIDAYS: Every Sunday; New Year (1st January); Idul Adha (27th February); 1st Muharam 1389 H. (19th March); Isa Almasih (15th May); Maulud Muhammad (29th May); Sancta Maria (15th August); Proclamation Day (17th August); Mikradj Muhammad (9th October); Idul Firit (11th and 12th December); Christmas Day (25th December). Work can be arranged at overtime rate.
POLICE/FIRE/AMBULANCE: Police, Fire 4306; Ambulance 7227.
TELEPHONES: No arrangements exist for placing telephones on board.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Caused by rain; no mechanical equipment for cargo handling.
AUTHORITY: Departemen Perhubungan, Direktorat Djenderal Perhubungan Laut, Port Administrator Macassar.
AGENT: P. N. Djakarta Lloyd, Djl. Pankalan Bung Karno, Port Makassar.

MUNTOK: 02.04 S. 105.10 E.

AGENT: P. N. Djakarta Lloyd, Muntok Branch. Port Muntok.

PALEMBANG: 02.59 S. 104.45 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.
Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 copies Crew List.
6 copies Passenger List.
2 copies Ship's Articles.
2 copies Store List.
Manifests.
Bills of Lading.
Maritime declaration to be completed by Master upon arrival, obtainable from boarding Quarantine officer, or via Agency.
ARRIVAL: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services.
Agent/Owners to advise Port Administration (Pilot Division) of vessels arrived 24 hours in advance.
PILOTAGE: Compulsory, consisting of Outer (River) and Harbour Pilot. Applications should be cabled to pilot vessel via Palembang Radio Station. Pilot vessel located at station position 02° 11′ 08″ S. 104° 57.03″ E.
The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).
Vessels arriving in afternoon and unwilling to navigate the river in darkness should not hoist the Pilot signal. The signal station is at the aforementioned pilot vessel, which answers the pilot signal as follows:
By night:
A flare-up light slightly over the railing, or waving with a white light means: Pilot will soon board the vessel. 1 red light vertical over a white light means: No Pilot available, vessel allowed to proceed until Pilot is met.
By day:
1. The international flag signal KYS from the International Code of Signal meaning: Pilot unable to attend due to motor defect or heavy seas. The Pilot can be picked up by ship's motor-boat.
2. The flag signal KKO meaning: No Pilot available, vessel allowed to proceed until Pilot is met.
Use of Harbour Pilot in Palembang is compulsory.
ANCHORAGE: *Musi Bar:* anchorage position 2° 08′ 30″ S. 104° 58′ 30″ E., in depth of 9 fathoms, used for topping up ocean tankers from river craft.
RESTRICTIONS: Palembang is 54 miles upstream. The main entrance is the river arm between Tg. Tjarat and Tg. Gedeh.
Depths from sea to Palembang:

Outer Bar	45 DM	at mean level
For incoming vessels Channel East of Pajung	42 DM	,, ,, ,,
For outgoing vessels Channel West of Pajung	45 DM	,, ,, ,,
Channel South of the light-buoy South of Pajung	48 DM	,, ,, ,,

CRANES: *Palembang:* (Mobile cranes). 1 at 7 tons, capacity, 1 at 10 tons, 3 at 15 tons, 2 at 18 tons, 1 at 25 tons and 1 at 30 tons.

There are 17 fork-lift trucks available, capacity 2-15 tons.

Pusai: 2 mobile cranes, Capacity 5 & 7.5 tons 3 shore cranes, capacity 25,40 and 100 tons.

Plaju and Sungai Gerong: 3 Mobile cranes, capacity 15, 30 and 45 tons. 3 shore cranes, 1 at 15 tons and 2 at 5 tons.
MEDICAL: Hospital and First Aid available.
TANKERS: Pladju Terminal (Right Bank): Downstream of Harbour Board quay operated by P. N. Pertamina Unit II (Pladju) (ex-Shell).

Sungai Gerong Terminal (Right Bank): Downstream of Harbour Board quay, operated by P. N. Pertamina Unit II Sungai Gerong (ex-Stanvac).
DENSITY: 1000.
STEVEDORES: According to the requirements of the vessel concerned, labourers are requested from the U.K.A. (Port Labour Pool).

The usual working hours at the harbour are:

Monday – Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1300 – 1600 hrs.
Saturday	0800 – 1200
	1300 – 1400 hrs.

Overtime is allowed on request.
FRESH WATER: Piped water supply is at 15/20 t.p.h., and through water barges is at 50/60 t.p.h. Water barge capacity 100 tons.
FUEL: Obtainable from Pertamina provided payment is arranged in advance through their Head Office in Djakarta. Delivery by pipe-line or barge.
REPAIRS: Facilities available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 100 grams of tobacco. There is no alcohol allowance.
TIME: The Port is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 104° 46′ 36″ East Longitude.
AIRPORT: Talang Betutu Airport is approximately 12 km. from the port.
POLICE/FIRE/AMBULANCE: Security – 22386, Fire 20451/22386, Ambulance 22531.
IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.). A re-entry into country if there is no S.I.C.
REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.
CUSTOMS/NAVY REG.: Upon vessels arrival/departure, boarding team will come on board consisting of:

2 Navy Officers.
2 Customs Officers.
2 Health Officers (in case vessels coming from infected ports or abroad).
2 Immigration Officers (in case vessels coming from abroad only).
3 Clerks from Agents.

Nobody allowed on board until this team declares the vessel cleared.
AUTHORITY: Port Administrator.
AGENT: P. N. Djakarta Lloyd, Palembang Branch Office, Djalan Pasar No. 158, 16 Ilir, Palembang.

PILOTAGE: Nil.
ANCHORAGE: With bearings: Patjaron Hill, 275°; white light, 128°; red light, 187°. This anchorage leaves ship 300 m. from 20 m. line and over 500 m. from 7.5 m. patch.
RESTRICTIONS: No restrictions, vessel may enter and leave port at any time.
MAX. SIZE: In anchorage position draft permissible up to 15 m.
HEALTH: Pratique will be arranged by Sourabaya Agent and especially if the ship is just coming from a country suspected of special disease or fever, otherwise pratique is automatic and a quarantine doctor from Sourabaya boards. When vessel coming from domestic port, pratique is not necessary.
RADIO: *(a)* Coastal station: Call sign, PKD 2; medium wave, 500 kc/s.; WF, 474 kc/s.; working hours GMT, 2400–0100 hrs., 0400–0500 hrs. *(b)* Fixed station: Call sign, 8 AD 3; short wave, 8 Mc/s.; working hours GMT, 0100–0400 hrs., 0500–0600 hrs.
TUGS: Tugs join vessel at anchorage position. Vessel can use tug's lines and the Agent will arrange. Usual charge for use of tug's lines.
BERTHING: There are no berths alongside quays.
STEVEDORES: 24 hours before ETA advice needed to arrange gangs.
MEDICAL: Hospital facilities available, vaccination/fever Certificates for crew can be issued by authority.
FRESH WATER: No facilities.
FUEL: No facilities.
GANGWAY/DECK WATCHMEN: Available, consist of security team of P.N./Djakarta Lloyd Panarukan Branch.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: No restriction as long as goods remain on board ship.
CARGO GEAR: All gear supplied by stevedores except rain tent.
IDENTIFICATION CARDS: Needed if crew going ashore.
CONSULS: No local representation.
REPAIRS: No facilities.
TIME: GMT plus 7 hours.
HOLIDAYS: Sundays, 1st January; 17th February; 9th March; 7th May; 18th May; 15th August; 17th August; 28th September; 30th November; 1st December; 25th December. Work cannot be arranged on 30th November and 17th August but on other holidays cargo work can be arranged.
SHORE LEAVE: Can be arranged.
AGENT: P.N. Djakarta Lloyd, Tjabang Panarukan, Port Panarukan, Java, Indonesia. Tel. Panarukan 8-10-15; after office hours, Situbondo 29-47-159. Telegraphic address: Djakarta Lloyd, Panarukan.

PANDJANG (Teluk Betung): 05.27 S. 105.19 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Ships Stores Lists.

PILOTAGE: Pilots are in Government Service. Pilot signals according the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agents.

Harbour Pilots available (2) from 0800 to 1400 hrs. daily, and till 1700 hrs. upon request. Rules are that incoming vessels are served first.
RESTRICTIONS: *Shipmaster's Report:* Approaching Pandjang

there are numerous small fishermen's houses built on bamboo sticks at sea, without lights, therefore approaching or sailing from Pandjang at night time should not be attempted.
HEALTH: A 3rd Class port and can only be called at after obtaining a free pratique at one of the 1st Class Ports.
Vessels arriving from aboard have to fly the "Q" Flag (Yellow flag) until boarded and released by the Quarantine Officer.
Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:
Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.
During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.
RADIO: Coastal Radio Station, Pandjang Radio, call sign PKC 4, operating 24 hours. Radio telegraphy service.
VHF radio service operating on Channels 9 and/or 16, from Monday to Thursday, 0800 hrs. to 1330 hrs., local time. Friday, 0800 to 1100 hrs. local time. Saturday, 0800 to 1200 hrs. local time.
TUGS: There are 2 tug-boats. 1 owned by PT. Trikore Lloyd and the other owned by PN. KA. Both can be hired.
BERTHING: Quay on the South side with a length of 160 m. and a min. depth of 7.9 m. LW alongside.
Quay on the East side with a length of 110 m., and a min. depth of 6 m. LW alongside. This quay is used by PN. KA vessels that serve the Pandjang to Merak route as ferry-boat service.
Quay on the West side with a length of 75 m., and min. depth of 4.5 m. LW alongside.
Nagah Berlian Quay on the East side with a length of 20 m., and a min. depth of 3 m. LW.
Ocean vessels can be berthed at 3 buoys in the Inner Harbour.
LIGHTERAGE: 3 lighters of 100 tons capacity owned by the P.N. DKA can be hired.
STEVEDORES: 0800–1200 hrs. (1300 hrs. on Saturdays), 1300–1600 hrs. Overtime possible after granted by the Authorities concerned. *Gang's capacity* average 20 t.p.h.
FRESH WATER: Not available.
FUEL: Not available.
MEDICAL: There is a port doctor.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50. – (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agent about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
AGENT: P. N. Djakarta Lloyd, Panjan Branch Office, Djl. Jos Sudarso Pelabuhan, Port Pandjang.

PANGKALAN SUSU: 04.07 N. 98.13 E.

PILOTAGE: Pilot obtainable.
TUGS: 2 tugs available, each of 400 h.p.
ANCHORAGE: Suitable anchorage for vessels up to 40,000 d.w.t. at outer bar.
BERTHING: Alongside wharf max. draft 5 m., overall length 95 m. Depth at low water spring 3 m.
TANKERS: Pertamina/Japanese Terminal: A single buoy mooring situated 17 km. offshore in 15 m. depth of water. Mooring designed for vessels up to 150,000 tons. Loading rate 3,000 t.p.h.

PANGKALBALAM: 02.06 S. 106.08 E.

DOCUMENTS:
Register Book.
Load Line Certificate.
Deratisation Certificate.
Harbour Report.
Radio Certificate.
Nationality Certificate.
Safety Equipment Certificate.
Port of Call List.
Last Port Clearance.
Light dues payment.
Health Book.
6 copies Crew List.
3 copies Store List.
6 copies Passenger List (if any).
Navy Book.
Next Port Manifest from every port.
All loading Custom paper from every port.
Vaccination Certificate.
PILOTAGE: Not available.
ANCHORAGE: Safe anchorage at green buoy, 10 m.
RESTRICTION: No night entry. No anchoring at Eliot (red buoy).
MAX. SIZE: Length 140 m., breadth 30 m. Only steamers drafted 8 ft. allowed to discharge alongside the quays.
RADIO: Port radio station. Working times 0800–1300 hrs. except Sunday. Call sign PKC7.
TUGS: 1 tugboat available owned by P.N. Djakarta Lloyd for communication between shore and ships. Capacity 120 h.p.
BERTHING: Near green buoy, and as near as possible to shore. Sounding 10 m. Only small vessels 8 ft. draft alongside quays.
STEVEDORES: Ordered by Agent.
MEDICAL: Facilities available.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle per man.
IDENTIFICATION CARDS: Not necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: None.
REPATRIATION: Not available.
AIRPORT: Airport service by regular airlines 6 times per week.
HOLIDAYS: On Moslem holidays, no cargo work.
POLICE/AMBULANCE/FIRE: Police 386 SM; Ambulance 444 Otm; Fire 39 LB.
SHORE LEAVE: After permission by Chief of Immigration.
REGULATION: Every ship on arrival must be passed by; Customs, Harbour Master, Police Maritime, Health service and Chief Immigration.
DELAYS: Due shortage of lighter space.
AGENT: P.N. Djakarta Lloyd, Pangkalpinang Branch.

PULAU SAMBU: 01.09 N. 103.54 E.

DOCUMENTS: Upon arrival ships have to fill in the following forms:
Harbour Report (obtainable from the boarding Pilot).
Pilot Certificate.
Also required from the Masters are:
6 copies of Crew List.
1 copy Stores List.
1 copy Personal Effects List.
PILOTAGE: Pilots are in Government Service. Pilot signals according the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agent. Pilot boards in position 1° 10′ 38″ N., 103° 52′ 12″ E.
RADIO: Vessels calling at Pulau Sambu for bunkers should communicate with PKC 2 Pladju Radio or Tunasix Singapore, or direct with Sambu Radio PKJ 51 (A3 Radio Telephone) and VHF Channel 19.
HEALTH: Vessels arriving from abroad have to fly the "Q" Flag (yellow flag) until boarded and released by the Quarantine Officer. Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:
Health Book or Bill of Health.
Deratisation (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.
During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.
TUGS: Available.
BERTHING: Pulau Sambu has an excellent location 8 miles South of Singapore and approximately 3 miles from the International waterway. It has 2 deep water jetties with a max. depth of 36 ft., a max. length of 440 ft., and the length of the navigable channel is 1,500 ft.
FUEL: Ideally, it is necessary to advise suppliers of bunkers required at least 15 days before the ETA of the vessel. The authorities at Pulau Sambu also require the vessel to contact them 24 hours prior to their ETA.
Bunkers available: Fuel Oil, 1000 seconds, and MDO.
CUSTOMS: Masters have to declare all local currency on board. It is strictly prohibited to take local currency ashore. No limitation for foreign currency.
Master should consult the Agent about prevailing Customs regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and fines.
AUTHORITY: Department of Sea Communications.

SABANG: 05.50 N. 95.20 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Health Book or Bill of Health and vaccination certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists with vaccination dates.
Ship's Articles.
Stores List.
Passport or seaman's card remain in Immigration office until cleared and the crew to use shore pass to go on shore, issued by the Immigration.
PILOTAGE: *Approach:*
Vessel should steer on the light of Klah Island and keep at least 1 mile offshore, especially of Ujung Masam owing to an inward drift,

until the bay is well open. When entering the bay, the light-buoy South of Ujung Lho Me should be kept on port side.

The Signal Station at Peunimpun reports day and night the arrival of ships, by night an unofficial white light, showing all around is shown, visible at a distance of 12 miles.

Signals by day with flags according the International Code of Signals and by night by signal lamp.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the Port. The provisional free pratique is only valid for this Port, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.

RADIO: Sabang Radio. Call sign: PKA. Frequency: 500 kc/s./438 kc/s. Time: 0100–0200, 0400–0500, 0900–1000 GMT. 8473 kc/s./8686 kc/s. Time: 0200–0230, 1000–1030 GMT. 17184.5 kc/s. Time: 0230–0300, 1030–1100 GMT. VHF – Available. Power – 1 KW.

TUGS: A small tug available for mooring assistance, subject advance notice.

BERTHING: The usual anchorage in the inner roads is the North side of the bay, vessels can approach shore until in 32 and 29 m. depth. There is good holding ground. During S.W. or S.S.W. squalls in the West monsoon vessels have to be kept free from the quays by means of the mooring buoys moored off the berths.

Western coal wharf, usable berth length 140 m. with depths alongside of 7 m. at LWS.

Eastern coal wharf: usable berth length 150 m. depths 6.8 m. at LWS.

Commercial wharf, usable berth length 150 m. depths 8.0 m. at LWS (length: 220).

At the head of the oil jetty there is a depth of 10 m. at LWS.

FRESH WATER: Available, rate 30 t.p.h. with one hose. Usual to use 3 hoses. Water can be pumped faster if additional water pump used.

FUEL: Available from Pertamina, Jakarta if permit obtained.

REPAIRS: Minor repairs can be carried out at the West end of the Coal Wharf at the repair shop and electrical power station.

CUSTOMS: It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: Two flights a week, 5 minutes drive from the Harbour.

AUTHORITY: Department of Sea Communication.

SANTAN TERMINAL (Attaka): 00.07 S. 117.32 E.

SHIPMASTER'S REPORT **(See Plan)**

Situated about 80 miles North of Balikpapan on the East coast of Borneo, in 00.07 S. 117.28 E., the only chart available BA2636 is of too small a scale to advise safe first time entry in darkness. So, after a number of unsuccessful attempts to contact Santan Terminal for instructions – only the latter portion of his transmissions were being received, and very underpowered, it was decided to await daylight, cruising on 118.00 Meridian.

At 0600 hrs. vessel was again in the vicinity of Attaka Buoy, and Pilot contacted by VHF 16. He instructed us to proceed 270° T and he would meet us, East of SBM. The SBM is located about 4.5 miles offshore, marked by a QK.FL.W. light, vis. 6 miles, and is impossible to distinguish from Attaka Buoy, SBM is in 00.07° S., 117° 32.5′ E.

The best approach is to reach a point 4 miles North of Attaka Buoy which has a Ra.Refl. and was identified at just under 12 miles. From thence, subject to the Master's assessment of the situation, and assuming possession of a copy of the Chartlet, to proceed inward on 257° T, which will take him along the Approach Channel. But he should be prepared for quite strong set to North or South – this being my experience, both inward and outward. Pilot states that up to 125,000 d.w.t. can be handled. Originally, the channel had 4 buoys, marking the South side of the channel, but the outer 2 have been withdrawn. Channel has been swept and min. depth shown is 50 m. Each buoy has a Ra.Refl. and with 3.5 mile spacing, are easy to track on radar and visually, once their existence is known, from the Chartlet.

An anchorage area exists between 0.5 and 2 miles East of the SBM, bounded by 3 buoys to West side and 1 to South. These mark Coral Shoals. The Pilot said it was acceptable to come straight in from Attaka Buoy, in ballast, but loaded vessels must stay in Swept Channel, as the possibility of isolated Coral Heads exists, and the area South of the channel has not been fully swept.

A mooring/hose party boards with the Pilot, and takes care of these duties, the vessel only being required to provide an officer and 2 winchmen on the foc's'le and an officer and winchman for connecting the hoses (2×16 in.). A ship's mooring line is lowered to the launch to pick up the port SBM polypropylene line, this finally brings up a chain (approx. 8 in. dia. link). A special very flexible wire, provided by shore, is secured round both Port and Starboard forward bitts on foc's'le head, with an eye at each end projecting forward. The mooring chain is then shackled to this. A stout messenger is acceptable for picking up the starboard mooring, but it is advisable to have a second mooring line available on deck in our opinion. The chain is then shackled to the South eye of the shore wire, which is around the bitts. There is no provision for quick release gear, so letting go in an emergency, e.g. wind, would not be easy.

Hoses are 16 in., but fitted with 12 in. flanges (not reducers) and are bolted to manifold, again no quick release provided. Pilots' estimate of weight of each hose is 7.5 tons. Hoses are hung off on chains passed round manifold supports, instead of cruciform bollards – apparently because of the length of chain used. Hose/mooring party work well and safely.

EDP is not available, and vessel had to lie awaiting papers after leaving SBM for about 40 minutes, after which passage outward along the channel was without problem, with adequate water depths all the way.

Radio messages are sent via Balikpapan PNK2 to Petroleum Balikpapan, but appears to be on only 2 hours a day. But Pilot said they had not received our ETA's, but said this was quite normal. Agents were Pertaminaship DJAKARTA. No relief facilities, stores, water or bunkers available, and mail both in and out not advised, due uncertain delivery.

SEMARANG: 07.01 S. 110.27 E.

DOCUMENTS:

Crew Lists.
Passenger Lists (if any passengers to be disembarked).
Customs Documents.
Health Clearance from last port of call.
Harbour Report forms supplied by Harbour Master.

PILOTAGE: Ships with deadweight of more than 900 tons and with draft of more than 3.5 m. must anchor in roads. To enter the Harbour, Pilot required. Pilot can be applied for by raising "G" flag while ship is anchoring/arriving.

ANCHORAGE: Anchorage 3 nautical miles from coast, where depth 9 m. For smaller ships safe anchorages 1,900 m. from pier, where depth 5–7 m.

HEALTH: Vessels arriving must hoist "Q" flag. Work can only begin after inspection of security team boarding vessel upon arrival during working hours.

RADIO: Name, Semarang Radio. Call sign, PKR.

TUGS: Normally tugs join vessel in roads.

BERTHING: Ships anchoring in roads can anchor any time of day. For berthing alongside quays ships with a draft max. 3.6 m. require Pilot. Entering port guided by a pilot vessel.

STEVEDORES: Necessary to inform Agent exact time of arrival. Labour gangs to be arranged 1 day before. Also details of cargo to be discharged needed to arrange stevedoring materials, especially for ships anchoring in roads.

MEDICAL: Medical assistance can be given upon ship's arrival. First aid can be given by harbour doctor in harbour area. Serious cases taken to hospitals in town. 4 hospitals available. Port Health Officer can issue vaccination/fever Certificates if required.

FRESH WATER: Can be supplied by 100 ton barge once every 2 days. Suggest take on water in Djakarta or Sourabaja.

GANGWAY/DECK WATCHMEN: No gangway/deck watchmen needed.

OPENING/CLOSING HATCHES: Opening and closing hatches done by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent in tobacco permitted for each crew member to hold out of bond. Wine and/or spirits, maximum value of U.S. $10.

IDENTIFICATION CARDS: Needed.

CONSULS: No local representation.

REPAIRS: Minor repairs only. Small dock only for repairing vessels no longer than 36 m.

REPATRIATION: Repatriation of crew members arranged by Agents by contacting Immigration Officer for permits concerned.

AIRPORT: 5 mins. drive from harbour. Domestic flights only.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year. (1st January); Independence Day (17th August); Id el Fitr; Christmas Day (25th December).

POLICE/AMBULANCE: Semarang 245 or 726.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Normally the speed of loading of bulk cargo is 20–25 tons 1 gang/hours. Delays by bad weather during December, January and February, where it is impossible to come out of the inner port to ships anchoring on the roads.

AUTHORITY: Administrator Pelabuhan Semarang.

AGENT: P. N. Djakarta Lloyd, Djl. Mpu Tantular No. 23, Port Semarang.

SORONG (Kasim Terminal): 01.18 S. 131.01 E.

(See Plan)

SHIPMASTER'S REPORT:

LOCATION: The terminal is located on the Island of Jef.

DOCUMENTS:

Certificate of Register.
Load Line Certificate.
Safety Equipment.
Safety Construction Certificate.
Radio Certificate.
Derating Certificate.
6 Crew Lists.
6 Vaccination Lists.
2 Crew Declaration.
2 Stores Lists.

PILOTAGE: Not compulsory. Pilot boards in-bound vessels in position 00° 53′ S. 131° 10′ E. Vessels berth and unberth at any stage of the tide during the day.

Accommodation ladder not required; pilot ladder is sufficient. Also see "Anchorage".

ANCHORAGES: Recommended anchorage area is 4.5 miles West of Sorong in position 00° 53′ S. 131° 10′ E. Under no circumstances should the vessel enter the restricted area around the structure without the Mooring Master aboard.

Any vessel arriving in the anchorage area after 1600 hours local time may have to wait in the anchorage area until first light the next morning to transit the Sele Strait to the terminal.

On arrival at anchorage contact "Sorong Control" on VHF Channel 16.

RESTRICTIONS:

	Controlling depth (MLW)	*Mean tidal range*	*Velocity of current*	*Nature of bottom*
Entrance:	51 ft.	Approx. 5ft.	Max. 5 kt.	Sand, mud
Channel:	51 ft.	,,	,,	Sand, rock, coral
Anchorage:	120 ft.	,,	,,	Rock, sand
Berth:	60 ft.	,,	,,	Sand, rock, coral

MAX. SIZE: The channel is swept to a depth of 57 ft. Vessels max. draft is 51 ft. Also see "Berthing".

PRATIQUE: Available night and day Customs and Immigration board on arrival.

RADIO: *Advice for arrival:* 72 hours prior to arrival at Sorong vessels should advise the Company of their estimated time of arrival by cable sent via "Pertaminas Coastal Radio" Station at Jakarta or Government Radio Station at Sorong. They should also confirm or amend them when they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, Unit 5, Sorong.
Cable address: Pertaminas – Jakarta.
Name of the station: Jakarta Radio. Call signal: PKI-2.

8755 kc/s.	AM	0000–0100
8730 kc/s.	AM	0200–0300

The following information should be included in the cable:

(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.

TUGS: Depending on conditions up to 4 tugs of various h.p.

BERTHING: Berthing is restricted to daylight hours until light-buoys arrive. It is not unusual to undock with a strong stern tide running.

Kasim terminal is owned by Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 51 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksen loading arms and vessels with non-standard manifolds must provide their own reducers.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is situated ashore level with mooring dolphin No. 2. A Mooring Master remains on board throughout the vessels stay and is in radio contact with the tank farm, pump station and Marine Office.

MEDICAL: Doctor available.

FRESH WATER: Available. Limited quantity in emergency.

FUEL: Not available.

REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

REPATRIATION: Possible in an emergency.

TIME: GMT plus 9 hours.

SHORE LEAVE: No shore leave.

GENERAL: Before sailing it is necessary that Sorong Harbour Master is aboard. No stores but clinic available.

During daylight hours Indonesian flag must be flown.

AGENT: 2 to 4 weeks before arrival, vessels must appoint as general Agent Pertaminaship, Jakarta 3234 Yos-Sudarso, P.O. Box 327, Tanjung Priok, Jakarta, Indonesia.

Telex JKT 2885, Answerback: Pertamina. Tel. 290 312 Ext. 217.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E. (See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles. 2 Stores Lists.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 24 hours before arrival and 6 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position 06° 55′ 43″ S. 112° 43′ 46″ E. Application for Pilots can be cabled via above radio station and must be received at least 24 hours prior to the ship's arrival at the boarding area, by the Harbour Master of Tg. Perak. Upon arrival at the Pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green light over a white light means: Pilot will board your vessel by row-boat as no motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at the entrance by means of a pilot barge dispatched from Tg. Perak Pilot station at the Harbour Master's office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbour Pilot takes over.

ANCHORAGE: Waiting anchorage for Pilot within: 06° 51′ S. 112° 45′ E.; 06° 51′ S. 112° 47′ E.; 06° 52′S. 112° 47′ E.; 06° 52.5′ S. 112° 45′ E. Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Eastern Channels.

Western Channel: Used for deep-drawing vessels with depth of 9.0 m. at LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depths through this channel is 4.0 m. at LWS. Distance to Tg. Perak is about 16 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Inner Roads (anchorage).

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

RADIO: Coastal Radio Station call sign PKD. Classes: A1 Frequency 430, 550, 8730, A2 Frequency 430, 500, A3 Frequency 8754, 4.

Pilot station Karang Djamuang is also reachable through radio call sign PKW: frequency 500 kHz. This station can also be contacted by VHF Channels 12, 16.

TUGS: For poor steering vessels and those with deep drafts, tugs assistance is indispensable from light buoy No. 5 till light buoy No. 4 is passed.

Tug-boat assistance is handled by Port Administrator's tugs, consisting of 2 tugs of 800 h.p. each.

Tugs equipped with VHF Channels 12, 14 and 16.

BERTHING: The total length of effective quay in Tanjung Perak Port is 4620 m.

Quay	*Length*	*Depth at LWS*
Jamrud Utara	900 m.	8.6 m.
Jamrud Selatan	800 m.	7.9 m.
Jamrud Barat	210 m.	8.2 m.
Berlian Barat	750 m.	7.3 m.
Berlian Timur	780 m.	8.4 m.
Berlian Utara	140 m.	7.5 m.
Nilam Timur	900 m.	8.2 m.
Perak	140 m.	8.2 m.

Tanker Terminal:
Government Petroleum Pier Depth alongside at LWS is 90 dm.
Semampir East ,, 120 dm.
Semampir West ,, 100 dm.
Coal Wharf: Situated at the Southern end of Tambatan Nilam, equipped with 1 transporter and 2 bunker barges with steam operated grippers, owned by P.N. Tunda Bara.
CRANES: 1 floating crane, capacity 50 tons. 5 electric cranes of 3 tons capacity and 3 electric cranes of 5 tons capacity. 2 mobile cranes of 3 tons capacity. One gantry crane of 5 ton capacity, 2 tractor cranes of 2 tons capacity.
STEVEDORES: Working hours: Monday–Thursday 0700–1200; 1300–1500 hrs. Friday 0700–1100; 1300–1500 hrs. Saturday 0700–1200 hrs. Overtime: Monday–Friday 1500–1700 hrs. Sundays, holidays 0700–1200; 1300–1500 hrs. Night work allowed after permission from the Port Authority.
Average for bulk cargo 20 t.p.h. per gang
Average for bagged cargo 27 t.p.h. per gang
Average for general cargo 20 t.p.h. per gang
Average for machinery/iron 8 t.p.h. per gang
MEDICAL: Hospital and Port Health Centre.
FRESH WATER: Supply is handled by the Harbour Board to the berths and by 3 water barges. Present capacity about 875 tons per day for the whole harbour. Priority is for Passengers vessels and application required 48 hours prior to ship's arrival.
FUEL: Fuel can be obtained via pipe-lines to all berths.
REPAIRS: Dry-docking and all sorts of repairs are carried out by the State-owned P.N. Dock. There are floating docks, capable of lifting 15,500, 3,500 and 4,000 tons. There are several slipways for coasters.
Electronic Repair Shop: All sorts of electronic repairs such as radar, echo-sounder, etc., can be repaired by private contractors.
CONSULS: U.S.A., U.S.S.R., Japan, Great Britain, Belgium. Australia, India, Pakistan, Philippines, France and Netherlands.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.– (fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
AUTHORITY: Port Administration.
AGENT: P. T. Jakarta Lloyd, Sourabaja Branch Office, Djl. Pahlawan 26-28, Port Sourabaja.

TANDJONG LEPEE: 04.14 S. 121.32 E.

SHIPMASTER'S REPORT:
Tandjong Lepee is only an anchorage port, being a convenient outlet for the shipping of Nickel Ore in bulk, the operation being based on Pomalaa, about 5 miles away, where the Mining Company plant etc. is situated.
CHARTS: B.A. Chart No. 3616 is quite inadequate for approaching either Pomalaa or TG. Lepee, Japanese Chart No. 903 is better, while Netherlands Chart No. 152 is the best.
DOCUMENTS:
6 Crew Lists.
4 Vaccination Lists.
2 Customs Declaration of Crew Effects.
2 Bonded Stores Lists.
1 List of Favour Parcels (including a Nil declaration).
Last Port Clearance and Derat. Certificate to be produced together with usual Safety, Loadline Certificates, etc. Port Health Doctor brings Health Declaration Form on arrival. 'Q' Flag must be flown until pratique granted.
PILOTAGE: No Pilots available, a small tug meets the vessel in a position about 1.5 miles West of Tandjong Pakar, in approx. Lat 4° 14.5′ S., Long. 121° 30′ E. The Agent and officials board from the tug (accommodation ladder only) and the tug then leads the vessel into the anchorage.
From the above rendezvous position, a course of 055° for 1.5 miles will lead between 2 beacons marking reefs N.W. of Tg. Pakar. Right ahead on this course will be sighted another beacon to the North of Tg. Pakar, when this beacon is about 9 cables off, course should be altered to 090°, and about 8 cables from here should then bring the vessel to the anchorage position, half-way between 2 beacons approximately 6 cables apart.
Beacons are only thin posts about 2 m. high with small top marks similar in appearance to a 10 litre paint-can painted white, they are quite difficult to pick up under the best of conditions. Would not recommend making an approach at early morning if sun is shining, once the sun is well up the reefs themselves show fairly well, especially at Low Water. There are no navigational lights in this area, beacons do show up on radar at short range, but due to the possibility of local fishing boats being present, too much reliance should not be placed on radar detection of beacons for night navigation.
RADIO: Macasser Radio (Unjung Pandang). The Mining Company have telex link with Djakarta. No VHF communication here.
TUGS: One tug of 1,800 h.p. mainly used for towing barges, can be used to push vessel round to head out on sailing if necessary. A second similar sized tug could be made available by prior arrangement, and if not already engaged on other work up the coast.
MEDICAL: There is a hospital at Pomalaa, which is reputed to be well equipped.
STEVEDORING: Mining Company supply competent crane drivers to operate ships' cranes and grabs, to load Nickel ore in bulk from barges. There are 12× 80 ton barges, 1× 200 ton flat top barge and 1× 300 ton coaster available, this 'fleet' is divided according to requirements between a vessel working at Pomalaa and one working at Tandjong Lepee. At Tg. Lepee there is a barge loading conveyor capable of handling 4,500 tonnes per 24 hours. A similar loader exists at Pomalaa, and if there is no ship at Pomalaa, this is also used to feed cargo to Tandjong Lepee.
Stowage Factor of the Ore is declared as 0.7 cu.m./tonne (approx. 25 cu.ft./ton) but during a dry spell stowed at about 30 cu.ft./ton with an angle of repose over 45° and became very compacted, even reluctant to fall out of a wide open grab. The ore has mainly the appearance of coarse soil with a few stones and small rocks mixed in.
FRESH WATER: Can be supplied by barge in 40 ton tanks, but ship must provide pumping facility.
COMMUNICATIONS: 2 flights daily by Mining Company aircraft between Pomalaa and Macasser. Repatriation can be arranged in emergency.
SHORE LEAVE: Permitted, official shore passes provided, which must be returned prior to departure.
AGENTS: P.T. Aneka Tambang Unit Pertambangan Nickel. Cables:— Nickel Unjungpandang (Macasser) or:— Aneka Tambang Jakarta.

TANDJUNG UBAN: 01.03 N. 104.13 E.

P.T. Stanvac Indonesia Oil Terminal.
DOCUMENTS:
11 Crew Lists.
Harbour Report (form to be supplied by the Agent).
Maritime Declaration.
Vaccination List.
2 Stores Lists.
2 Bonded Stores Lists.
2 Personal Effects Lists.
PILOTAGE: Agent requests Pilot upon arrival of vessel, 72 hours advance notice of ETA required. Pilot boards vessel in harbour area.
ANCHORAGES: 0.5–0.75 miles opposite oil jetties.

MAX SIZE:	Dock No. 2	No. 4	No. 5
Length	800 ft.	650 ft.	650 ft.
Breadth	any	any	any
Draft	34 ft.	33 ft.	32 ft.

HEALTH: Health Officer will board vessel after berthing. No pratique granted, even for vessel after calling at another port in same country.
RADIO: Tandjung Uban Radio – call sign PKJ.
TUGS: No tugs available.
BERTHING: Agent arranges berthing vessel. Dimension of oil hoses used: 6 in. and 8 in. Very limited slop facilities, depending on available ullage.
MEDICAL: Very limited facilities. Only a clinic with experienced wound dresser available. Valid smallpox and cholera certificates for crew members required.
DENSITY: 10254.
FRESH WATER: Available ex-pipe-line – 5 t.p.h.
FUEL: Medium fuel oil, viscosity Redwood 1, 600–900 seconds; heavy fuel oil, viscosity SSF, 30–40. Prior approval from PT Stanvac Indonesia, Djakarta, required for obtaining bunker fuels.
GANGWAY/DECK WATCHMEN: Port authority provides 1 safety guard during vessel's stay in port.
CUSTOMS ALLOWANCES: Reasonable quantity allowed to be used during vessel's stay in port.
IDENTIFICATION CARDS: Possession of a valid Seaman's Book sufficient.
REPATRIATION: No facilities available.
AIRPORT: Distance to airport, 60 miles. Served by Garuda Indonesian Airline 3 times a week (Mondays, Thursdays and Saturdays) to Djakarta only.
TIME: GMT plus 7 hours.
POLICE/AMBULANCE/FIRE: Police, tel. 55; Clinic, 37 and 58; Fire, 44 and 13.
TELEPHONES: Agents place telephone on board at no cost.
AUTHORITY: Penguasa Pelabuhan (Port Authority).

TARAKAN: 03.20 N. 117.45 E.

DOCUMENTS: See "Djakarta".
PILOTAGE: Compulsory pilotage consisting of sea and harbour pilots. Ships requiring pilot service should notify the Harbour Master at least 24 hours before arriving at outer buoy. Tide: semi diurnal.
Pilots do not normally work at night. The approach buoys and leading lights are frequently extinguished and vessels arriving at night are recommended to anchor at No. 1. Buoy and await a Pilot in daylight.
HEALTH: Vessels arriving from abroad direct in one of the 2nd Class Ports have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free

pratique will be issued, unless the vessel sails directly abroad from the 2nd Class Port concerned.
RADIO: Call sign: PKO Class A1. This station also has VHF Maritime Bands working on the same hours as the Short Wave Transmissions.
TUGS: Nil.
BERTHING: The anchorage will hold many ships but very little cargo is worked from the anchorage as most vessels calling are timber ships waiting to load. The very occasional ocean cargo ship usually unloads on to a barge but very occasionally goes alongside the Commercial Jetty.

The Commercial Jetty has a least depth of 4 m. and a length of about 150 m. There is a crane capable of lifting 2 tons on the inside berth. This jetty is very old and delapidated and normally handles only small craft of local inter-island character.
STEVEDORES: Working hours: 7 hours on normal working days. Overtime can be arranged.
TANKERS: The Pertamina jetty has a least depth of 8 m. and is about 180 m. in length. This pier is solely for the export of petroleum products in small tankers.

Off the Pertamina pier is a 6-buoy sea berth to which tankers of 35,000 tons d.w.t. are secured to load oil for export. The loading rate is about 1,000 t.p.h., through two 10 in. hoses. The berth requires a tanker with a derrick capable of lifting 3 tons.
GENERAL: Port doctor available.

Carrying a camera ashore or even on deck of a ship for photography is strictly prohibited.

There is a small hospital. No stores, water, or fuel oil are available. There are no repair facilities at all. Pertamina operates a small hospital and a clinic. There is air communication to other parts of Indonesia through Balikpapan.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
AGENT: P. N. Djakarta Lloyd, Tarakan Branch Office, Djl. Djendral Sudirman 1/16, Port Tarakan.

TEGAL, Java: 06.55 S. 109.10 E.

DOCUMENTS: Upon arrival, vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificates.
Seaworthiness Certificate.
Tonnage Certificate.
Deratisation (Exemption) Certificate.
International Loadline.
Safety Equipment Certificate.
Safety Constructions Certificate.
Safety Radio-telegraphy Certificate.
Vaccination List.
5 Crew Lists.
2 Stores Lists.
2 Crew Baggage's Declaration.
Last Port Clearance.
Health Book.
Custom Clearance and Custom Documents.
Cargo Manifest and Bills of Lading.

When vessels arrive direct from foreign port, Customs and Harbour Police officials board for search.
PILOTAGE: None.
ANCHORAGES: Tegal roads. Safe anchorages: Lat. 06° 49′ 00″ S. Long. 109° 08′ 07″ E. Lighthouse 210°. Distance 2.5 miles off.
RESTRICTIONS: No restriction night entry, but work is done next day (after 0800 hrs.).
MAX. SIZE: Length and breadth no restriction. If draft above 25 ft. will be 2.5 or 3 miles off shore (anchorage on roads).
HEALTH: Maritime Declaration of Health needed from Master, if vessels coming direct from abroad. If vessel comes from other Indonesian ports, automatic free pratique.
RADIO:
I. Fixed Station:
Call sign 8AC on freq. 5315 kc/s. at 0100–0130 GMT, 0230–0300
freq. 5165 kc/s. at 0430–0500 GMT, 1000–1015
II. Coast Station:
Call sign PKD 21 on freq. 2182/2690 kc/s. at 0030–0100 GMT, 0400–0430
Channel 16 – VHF 156.80 mc/s. 0100–0500 GMT
III. Open every day except on holidays.
TUGS: Only used for towing lighters to vessels on the roads.
BERTHING: None. Anchorage only.
STEVEDORES: Ordered by Agent. If possible before arrival of vessel, some information mainly concerned with requirements of the Shipmaster advises Agents to arrange gangs and available space for Tegal cargo.
MEDICAL: Normally medical attention for crew to be arranged by Agent at order of Master.
FRESH WATER: Nil.
FUEL: Nil.
GANGWAY/DECK WATCHMEN: Services of watchmen if necessary to be ordered by Master.
OPENING/CLOSING HATCHES: Is carried out by crew – sometimes by stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits not allowed to be taken ashore.
IDENTIFICATION CARDS: Necessary.
CONSULS: None available locally.
REPAIRS: None.
REPATRIATION: Agents arrange necessary repatriation of crew.
TIME: Indonesian Western Time = GMT plus 7 hours.
HOLIDAYS: Only Moslem holidays: Id el Fitr. For 2 days no cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Accident, Police, tel. 10; First Aid for Ambulance (Texin Hospital), tel. 387; Fire Departments (Texin), tel. 17.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore from 0800 up to 2100 hrs. every day. Not allowed to spend night on shore.
REGULATIONS: Crew members not allowed to bring cameras, foreign money, on shore leave.
AUTHORITY: Sjahbander, Djl.
AGENT: P. T. Jakarta Lloyd Tegal Branch Office. Office address: Djl. Laksamana R.E. Martadinata No. 5, Tegal, Indonesia. Telegraphic address: "Jakartalloyd Tegal". Telephone Office: Branch Director: Tegal 86. Terminal Manager: Utara 850. Shipping Manager: Tegal 539.

TELUK BAYUR (PADANG): 00.58 S. 100.20 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and Wharfage if any.
Crew Lists and Passenger's Lists.
Ships' Articles.
Other Certificates and Documents as required.

Immigration: Vessels arriving from abroad with passengers must hoist the 'N' flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: (a) disembarking (b) transhipping (c) through passengers.

No persons are allowed on board until the vessel has been examined and the 'N' flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.
PILOTAGE: Compulsory harbour pilotage. Ships have to wait for Pilot inside the roads limits, anchoring as near the breakwater as possible. Pilot is available each day from 0600–1800 hrs. ETA required 6 hours before arrival. ETD required 3 hours before departure.
HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port. The provisional free pratique is only valid for the port and the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.
RADIO: Coastal station: Call sign PKP2. *Type of equipment:* Transmitter, JRC 250 watt, Transmitter, JRC 125 watt, Receiver, JRC –.

Frequency: 500 kc/s. 0000–0100 hrs., 0400–0500 hrs., 0800–0900 hrs. Frequency: 6355 kc/s. 0130–0200 hrs., 0530–0600 hrs.
TUGS: 1 Tug-boat (SKMP 8) of 250 h.p. is stationed at Teluk Bayur, the use of which is compulsory for incoming and outgoing ocean-going ships. 1 additional tug 180 h.p.
BERTHING:

Quay/Used by	*Length (m.)*	*Depth Below LWS Actual (m.)*	*(ft.)*	*Remarks*

Note: 1. High water Spring 1.65 m. (duration).
2. Maximum length of vessels 165 m. (540 ft.).
3. Gate: 7.1 m. (23.3 ft.).

CRANES: 1 electric crane, capacity 6 tons, 2 mobile cranes, capacity 3 and 5 tons.
STEVEDORES: *Working Hours:*
Monday to Thursday: 0800–1200; 1300–1600.
Friday: 0800–1100; 1330–1600.
Saturday: 0800–1200; 1300–1400.
Overtime until 2400 hrs. in normal time, round the clock special permit.
Cargo Handling Speeds:
1. General cargo: 15 to 20 tons per gang/hour.
2. Bulk cargo/cement: 20 to 25 tons per gang/hour.

FRESH WATER: Available at wharf, officially at a rate of 8 cu.m. per hour, unlimited quantity during the wet season (September-April). During the dry season with a maximum of 150 cu.m. and a capacity of 4–6 cu.m. per hour. Water should be boiled or chemically treated before consumption.
FUEL: Very limited (Diesel oil only).
REPAIRS: Dry dock available for ships up to 150 tons. Machine-workshops for minor repairs available.
MEDICAL: Teluk Bayur has harbour clinic for emergency cases. Hospitals at Padang.
AIRPORT: At Tabing, distance 15 km.
AUTHORITY: Department of Sea Communications.

TJILITJAP (CILACAP): 07.41 S. 109.05 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Deratisation (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
Ship's Stores List.
RESTRICTIONS: Least depths at the bar and in the channel are 70 dm at LWS.
Current: semi-diurnal. By the influence of the Donan River, especially during the rainy season, the duration of the outgoing current is longer than that of the ingoing. In the rainy season the outgoing current can reach 5 knots.
PILOTAGE: Compulsory. The Pilot station is in Tjilitjap. Outbound vessels, application for Pilots must be made 2 hours before departure, provided that ships sailing before 0800 hrs., must apply before 1800 hrs. of the preceding day. Ships arriving by night must hoist the pilot signals at daybreak. Pilot signals as in the International Code of Signals until the Pilot boards the vessel or till a central signal is made at the signal yard of the Coastal Light "Gunung Tjimiring", where Tjilitjap will be phoned about approaching ships. The Lighthouse-keeper can make the following contra signals:
(a) The Indonesian Flag at the signal yard meaning the Pilot is coming out.
(b) 1 black ball over 2 black cones pointing upwards meaning wait for the next message.
(c) Double cones meaning no Pilot available permission granted to enter without.
(d) Black ball over a black cone pointing upwards meaning Pilot is not coming out, permission to enter without Pilot until you meet one.

Pilotage by night is not available except in very extraordinary cases. It takes the Pilot 1 hour from Tjilitjap to sea. If a ship can't enter on the same day 2 black cones pointing upwards will be shown with a black ball in between.
HEALTH: Vessels arriving from aboard direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional free pratique, as said pratique has to be cabled to the port concerned. The provisional free pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional free pratique will be issued, unless the vessel sails directly abroad.
TUGS: Not available.
VHF: Pilot on Channels 16 and 20.
BERTHING: Outer roads while waiting for the Pilot during the West monsoon a safe anchorage in 12 m. water. During the S.E. monsoon not a safe anchorage.
Inner roads, under all circumstances a safe Anchorage in 9 m. water in the vicinity of Nusa Kambangan opposite the quays for small crafts and East of Tg. Sodong. Vessels over 80 m. length have to moor due to limited swinging space, current and winds.
Berth length:
Berth I 120.0 m. depth alongside 70 dm at LWS.
Berth II 146.0 m. depth alongside 70 dm at LWS.
Berth III 142.5 m. depth alongside 70 dm at LWS.
Berth IV 130.0 m. depth alongside 70 dm at LWS.
TANKERS: Shell Tanker Terminal: Petroleum jetty with dolphins where tankers of 85 m. length can berth.
STEVEDORES: Working hours Monday–Thursday 0730–1200 hrs. and 1300–1530 hrs. and Saturday. Overtime Friday 0730–1130 hrs. and 1300–1530 hrs.; Sunday–holidays 0730–1200 hrs. and 1300–1530 hrs.; Night shift 1700–2300 hrs. Gang's capacity: Loading manganese ore average 15 t.p.h.; loading scrap iron average 6 t.p.h.; loading copra cake average 10 t.p.h.
FRESH WATER: Water is supplied through pipe-lines to the wharves, capacity 7 t.p.h.
FUEL: Not available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. Crew members are not allowed to take more than Rp.50.–(fifty Rupiahs only) ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
Ship's Inspection Team: Consisting of members of the Port Authority. This team will search the vessel, after the ship is cleared by the Port Medical Officer. Prior to mentioned search no Cargo handling is allowed. This Team will search the Store Rooms and Cargo hatches, and subsequently seals the Bonded Stores and Radio Transmitter. Careful attention should be given in making up the Store Lists, as any difference found in the items declared and discovered during the search may lead to difficulties.
SHORE LEAVE: Leaving and entering the Custom's Area the crew is checked on the basis of the Crew's List and Identification cards and searched.
AGENT: See "Semarang."

TJIREBON: 06.41 S. 108.33 E.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Not compulsory. Applications made through Agent or to Port Administrator via coast station Tjirebon radio.
ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35′ 30″ E. and the parallels of 06° 42′ 15″ S. and 06° 43′ 40″ S.
A light buoy on the position of 06° 42′ 10″ S. and 108° 36′ 20″ E. is placed on the guidance line to the entrance of the harbour.
RESTRICTIONS: Tjirebon roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong light buoy at port hand. Only ships with 4 m. max. draft can enter Inner Harbour and moor alongside wharves.
All other ships anchor at outer roads. The harbour is open for 24 hours. For vessels entering the harbour, a signal is given from signal station.
HEALTH: Usual international procedures.
TUGS: Tug services available. Order through Agents.
RADIO: Call sign PKZ2. Working freq. 6491.5 kc/s. and 8799.5 kc/s., watching freq. 6265–6285 kc/s. and 8204–8249 kc/s. Working time 0030–0130 hrs. and 0600–0700 hrs. GMT.
STEVEDORES: Arranged by Agent.
MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.
TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.
DENSITY: 1025.
FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.
FUEL: None available.
DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.
GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.
OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.
CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.
CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.
IDENTIFICATION CARDS: Preferably passports, seamens ID cards (issued by maritime authorities; vessel's country).
CONSULS: At Djakarta, 280 km. from Tjirebon.
REPAIRS: Light repairs only by local dockyard.
DRY DOCK: Graving dock of 600 d.w.t. capacity.
REPATRIATION: Can be arranged by Agents.
AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.
TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.
HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August);

Maulud, Mir'adj and Idul Fitri determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitri (2 days) not guaranteed due to labour shortage.

POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.

SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.

DELAYS: Bad weather (mostly rain).

AUTHORITY: Port Administrator.

AGENT: P. N. Djakarta Lloyd, Djl. Pasuketan No. 5, PO Box 44, Port Tjirebon.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Iran

ABADAN: 30.20 N. 48.16 E.

Port of Abadan situated on right bank of the Arvandrud, about 47 miles up river from Rooka Buoy.
OPERATORS: National Iranian Oil Company, Abadan Refinery.
DOCUMENTS/PILOTAGE: See "Khorramshahr".
ANCHORAGES: On arrival of pilot boat vessel can anchor with no depth restriction. On entering the Arvandrud the following are the recognized anchorages: Kasba Anchorage position about 2 miles above Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchorage position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water. Vessels which are too deep to pass out of the river on one tide will be required to anchor at Kasba.
RESTRICTIONS: The Port is open for day and night navigation with arrival and sailing being controlled by the tide. Vessels normally enter the Bar at 4 hours before high water at the Bar or at 2 hours after high water at the Bar. Those entering 4 hours before, arrive at Bawarda anchorage generally during flood tide, so must anchor for 6 hours awaiting ebb. Those entering 2 hours after high water, arrive Bawarda during ebb tide and berth on arrival, providing berth available, weather conditions permit and outward movements do not delay. Vessels always berth starboard side to stem the ebb tide and without using tugs and leaving Abadan 4 to 6 hours before high water at Bar.
MAX. SIZE: Max. draft at jetties 31 ft. fresh. Max. length 600 ft.
HEALTH: Inward clearance is affected on board after receiving free pratique. Also see "Khorramshahr" – "Documents".
RADIO: The National Iranian Oil Company Coastal Radio Station call sign EQZ. The station listens for various calls on the normal International Marine Calling frequencies. When close to may be contacted on 500 kHz transferring to 428 kHz for exchange of traffic. Traffic list sent at 5 minutes past odd hours.
TUGS: Not available.
BERTHING: While no changes have actually occurred in the production capacity of the Abadan Refinery, the number of jetties on the Abadan riverside have been reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintained and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be kept taut at all times to prevent surging on the jetties thereby breaking lines and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of taking bunkers are:

Jetty No. 3	Draft alongside		31 ft.
Jetty No. 9	,,	,,	28 ft.
Jetty No. 22	,,	,,	25 ft.
Jetty No. 16	,,	,,	25 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo are:

Jetty No. 7A, Jetty No. 7B, Jetty No. 7C — Draft alongside between 28 ft.–31 ft.

MEDICAL: Emergency cases: an ambulance will be dispatched on demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arrange transportation of patients, and advise Masters regarding necessary medical attention forms. If patient does not speak English he should be accompanied by an interpreter. Only in exceptional cases will a medical officer visit a patient on board.
TANKERS: Deliveries of the refined oil products of Abadan Refinery are effected to ocean-going tankers at Bandar Mahshahr since the inauguration of the products terminal of the National Iranian Oil Company at that port, therefore such shipments are not taking place from Abadan any more.
DENSITY: Fresh water.
FRESH WATER: Available at all jetties.
FUEL: Ships' bunkers are available; however not all types are available at all jetties, therefore, ship's Master should advise by radio the exact quantity and kind of bunkers required. Bunkers are delivered concurrent with loading unless otherwise requested by Master. Due to heavy bunkering commitments it is mandatory that vessels take their bunkers when convenient for the terminal, any delay incurred by a vessel taking bunkers after loading is the responsibility of the Master.
DEVELOPMENTS: A new berth "7D" under construction adjacent to berths A, B and C.
GENERAL: All other items, see "Khorramshahr."
AUTHORITY: National Iranian Oil Co. Abadan Refinery.
AGENT: See "Khorramshahr."

BANDAR ABBAS: 27.15 N. 56.19 E.

DOCUMENTS:
Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Abbas. Agents as far in advance of vessel's arrival as possible:
Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on Manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.
PILOTAGE: Application for Pilot to be made well in advance through Bandar Abbas Port Radio EQI. Agents may also arrange pilotage but should be advised of ETA well in advance.
ANCHORAGE: Approx. position 27° 04′ N. 56° 04′ E. Depth 36 ft. The distance from the outer anchorage at buoy No. 1 to the port entrance is about 2 miles.
RESTRICTIONS: Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.
MAX. SIZE: Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.
RADIO: Bandar Abbas Port Radio EQI – 500 kc/s.

Port telecommunications working from 0600 hrs. to 2400 hrs every day.
VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio".
TUGS: 2 tugs 550 h.p. each, for harbour services, as well as for towage, in case of necessity.
BERTHING: Berthing after sunset is not permitted, and if a vessel arrives after sunset berthing will not take place until the following morning. Unberthing after sunset is permitted subject to overtime payments being made to Pilots and tug workers, but this arrangement is not official and is subject to mutual agreements.

Quay is 1,050 m. in length, 35 m. width and capable of accommodating 6 vessels each of 175 m. LOA.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Grain discharged at rate of 700 to 800 tons per day. No silos.
STEVEDORES: Bagged cargo can be discharged at the rate of 800/900 tons per day, working 5 hooks.

Working hours at the New Port are, 0730 to 1200 hrs., 1300 to 1800 hrs., and 1900 to 2300 hrs., making a total of 3 shifts.

The employer or Agent has to pay a gross tax of 13 per cent as social insurance premium to Workers Social Insurance Organization for the hands employed in addition to 5 per cent collected from the labourers making a total of 18 per cent as WSIO premium.
CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment available ashore is as follows: 2 mobile cranes with lifting capacity of 18/20 tons; 2 mobile cranes with lifting capacity of 7 tons each; 2 mobile cranes with lifting capacity of 5 tons each; 3 forklifts with capacity of 3 tons; 7 forklifts with capacity of 2 tons; 2 tractors for towing trailers; 8 small trailers; 4 big trailers.
FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.
MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.
FRESH WATER: Fresh water is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fresh water (and bunkers) before or after loading as there is no connection at the ore loading berth. Fresh water also available ex-barge at the anchorage. Cost about US $15.00 per ton.
FUEL: Fuel is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.
CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.
IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.
REPAIRS: Minor repairs available at private workshops.
WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in winter, and seldom exceeds 40 degrees centigrade in Summer.
AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.
TIME: GMT plus 3.5 hours.
TELEPHONES: May be placed on board.
SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged by BASCO Limited. Contact through Agent.
SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.
DEVELOPMENTS: An additional port area is under construction and is expected to be completed 1978/79. The new facilities will include the following:—

10 Jetties to be used for general cargoes. Length of jetties is to be 1,920 m., and there will be 162,000 sq.m. of covered sheds with an open area of 100,000 sq.m. Vessels of up to 30,000 d.w.t. will be accommodated alongside these jetties.

4 Jetties to be used for special cargoes. Length of jetties to be 720 m. with an open area of 60,000 sq.m. and suitable for vessels of up to 30,000 d.w.t.

4 Jetties for container cargoes. Length of jetties to be 960 m. with warehouses of 12,000 sq.m. and open area of 430,000 sq.m. suitable for vessels of up to 45,000 d.w.t.

1 special Jetty for cereal cargoes. Length of jetty to be 375 m. with a transit silo of 135,000 tons capacity and suitable for vessels of up to 100,000 d.w.t.

5 Jetties to be used for import/export of bulk ore cargoes. Length of jetties to be 1,140 m. with an open area of 220,000 sq.m. and suitable for vessels of up to 60,000 d.w.t.

5 Lash-Terminals with warehouses of 9,000 sq.m. and open area of 50,000 sq.m. suitable for barges of up to 500 d.w.t.

A special Ro-Ro Terminal which will accommodate vessels of up to 45,000 d.w.t.

A Bunkering Jetty, length 300 m. and to accommodate vessels of up to 30,000 d.w.t.

GENERAL: *Hotels.* The Gameron is a modern hotel equipped with air-conditioning and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about 4 in number are also available.

Provisions. There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.

Transport. Distance between port and the town of Bandar Abbas is about 10 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.

Laundry. Subject to time available, can be arranged by ship's Agent.
AUTHORITY: Port Director.
AGENT: Gulf Agency Co. (Iran) Ltd., PO Box 761 Bandar Abbas Iran, Cables: "CONFIDENCE" Bandar Abbas. Telex: Tehran 212507, 212856, 213043 and 213044 (stating for Bandar Abbas). Tel.: 4168, 4169.

BANDAR MAHSHAHR: 30.27 N. 49.20 E.

Refined Products Loading Terminal of the National Iranian Oil Company.
Iranian Flag: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.
DOCUMENTS:
8 Crew Lists.
2 Bonded Store Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.
GENERAL: Khor Musa is deep tidal inlet at head of Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 1,000 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position 29° 36′ 32″ N. 49° 34′ 47″ E. At end of approaches channel, near buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Shahpour, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.
TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.
KHOR MUSA APPROACHES:
Navigational Dangers. Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in 29° 42′ 30″ N., 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel. Approaching vessels should steer for Khor Musa light float, in position 29° 36′ 32″ N., 49° 34′ 47″ E., and from there a course should be set along marked channel for buoy No. 12 in position 29° 56′ 03″ N., 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.
PILOTAGE: Compulsory. Service operated by Bandar Shahpour Port Authorities up to Bandar Shahpour, and by Oil Company between Bandar Shahpour and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Shahpour is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot station. If for any reason a vessel is required to wait at any time at Bandar Shahpour, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Shahpour, will arrange for Berthing Master to board vessel at Bandar Shahpour anchorage and allocate jetty berth at Bandar Mahshahr.
BANDAR MAHSHAHR APPROACHES:
Navigational Dangers. Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar. 29° 59′ N., 49° 04′ E. and inner Khor Musa Bar 30° 02′ N., 49° 01′ E., where restricted channel widths and depths exist and min. depth 30 ft. Buoyed channel over bar is 600 ft. wide, but declared min. depth of 30 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan. A rocky shoal, in 30° 12′ N., 48° 58′ E. approximately 10 miles North of inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18. Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar. Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel. After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Government Bandar Shahpour.

Bandar Shahpour. All inward bound ships required to anchor on arrival off Bandar Shahpour, where Pilot disembarks and a Government Medical Officer comes on board to grant pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Bandar Mahshahr Roadstead. Shortly after leaving Bandar Shahpour, channel to Bandar Mahshahr entered between 2 beacons: port hand, No. 2, flashing red and starboard hand, No. 1, flashing white. Channel well marked by light beacons to entrance of Bandar Mahshahr, at beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Shahpour Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.
ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa channel, West of Bandar Shahpour, and await arrival of Oil Company Berthing Master.
WIND AND TIDE:
Khor Musa Bar. Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, Mean Higher High Water has rise of 11.6 ft. and Mean Lower High Water has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.

Khor Musa. Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near inner Khor Musa beacon No. 18.

At ports of Shahpur and Mahshahr. Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. Mean Higher High Water has rise of 17.0 ft., and Mean Lower High Water rise of 14.6 ft. above Mahshahr chart datum.

Mahshahr Terminal. N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E., and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.
MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at berth No. 4 up to 43.5 ft. at berth No. 6.
HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members. Medical officer boards at Shahpour Anchorage. Subject no infectious diseases reported on board during voyage, Mecical Officer will grant pratique.

RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.

Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot vessel station.

Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10-in. loading arms, 6-in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosines	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

LPG LOADING: Propane and butane gas is loaded at No. 6 jetty at a rate of 1,500 t.p.h. Propane and butane cannot be loaded simultaneously.

As 16-in. fixed Chicksan liquid and vapour return arms are used for loading, certain ships are limited to one-side berthing only. To avoid delay of vessels, it is advisable to have vapour return connections on both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adapters.

Loading temperature of propane is about minus 48° F., and butane is about minus 23° F.

BALLAST: Tankers may discharge ballast ashore at Jetties No. 1, 2, 5 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at rate of 200 t.p.h.

MEDICAL: No medical facilities at terminal. Agents may arrange medical attention through Oil Company clinic in Abadan. In event hospital treatment required, patient would be taken to Abadan.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10-in. loading arms connected to 6-in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.

FIRE PRECAUTIONS: On arrival Shahpour Anchorage Master is given 6 copies of Fire and Safety Regulations. Fire Station and Emergency tel. 4111.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Shahpour. In emergency, the Oil Company may be able to undertake minor repairs. No main engine repairs whilst alongside loading jetties without permission from Terminal Superintendent.

TIME: GMT plus 3.5 hours.

TELEPHONES: Available at each jetty. If requested, telephone may be placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation centre opposite No. 2 jetty.

CURRENCY: The unit of currency is the Iranian Rial. It is illegal to use any other than Iranian currency ashore and heavy fines have been imposed for infringement of this regulation. Masters are requested to bring this matter to the individual notice of their officers and crew. Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.

AGENT: Gulf Agency Co. (Iran) Ltd., Bandar Mahshahr. Cables "Confidence". Iranian Head-office: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2280, 4755; Cables "Confidence", Khorramshahr. Telex: 654033, 654000 and 654051. (answer back: "GAC IR").

Due difficulty reaching Khorramshahr with international telex messages, communicate via Tehran office, telex No. 212507, 212856, 213043 and 213044. Tehran, (answer back: "GAC IR"), stating "For Khorramshahr".

Ships' mail and spare parts for vessels calling at Bandar Mahshahr to be routed by flights arriving directly to Abadan Airport without transhipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

Cables from vessels should be sent via Khorramshahr Port Radio to "Confidence", Khorramshahr, as well as to "Confidence" Bandar Mahshahr.

BANDAR SHAHPOUR: 30.27 N. 49.05 E.

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer
Crew List (2 copies).
Stores List (2 copies).

Port Authority
Crew List (1 copy).

Agents
Crew List (2 copies).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Shahpour Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

The names of consignees must be inserted on the manifest at the port of origin. This is due to the fact that names have not been inserted as per Iranian Customs authorities requirements.

In view of the above, Owners are kindly requested to make sure that manifests for Bandar Shahpour are properly made out at loading port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Shahpour Port Radio – EQN – 500 kc/s. If Agents required to arrange Pilot they should be informed well in advance.

Pilotage operated by Shahpour Authorities up to Shahpour. Pilot vessel approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Approach within 2.5 cables of pilot vessel. During adverse weather pilot vessel may proceed above Bar, in such cases, do not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with lightbeacons and buoys and present no navigational difficulties in clear weather.

Small unlit tide guage platform located on edge of the shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

MAX. SIZE: Vessels of 29 ft. draft may enter port at any time. Higher drafts depending on state of tide. Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Shahpour. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Bandar Shahpour Port Radio EQN 500 kc/s.

Continuous watch on 500 kc/s. is to be maintained at all times while navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. Twentyfour hours service.

TUGS: Normally not required, but available if necessary due to bad weather.

BERTHING: Berth No. 1 – 31 ft. depth alongside.
Berth No. 2 – 29 ft. depth alongside.
Berth No. 3 – 29 ft. depth alongside.
Berth No. 4 – 33 ft. depth alongside.
Berth No. 5 – 34 ft. depth alongside.
Berth No. 6 – 34 ft. depth alongside.

BULK HANDLING FACILITIES: Iron Ore Installation, loading capacity about 2,000 tons per day. The loading installation consists of 2 powerful moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-shaped containers with a capacity of 30 tons each and a 600 m. long conveyor belt with a capacity of 175 t.p.h.

Sulphur: The shiploader travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loader maximum clearance. Radio aerials, and fore and back stays to be removed.

Due to high temperatures, every precaution must be taken to combat risk of fire.

Grain: All berths are available for grain discharge. Grain is bagged in holds and discharged in slings using ship's gear. At only one berth is discharge possible by vacuvators. All discharges into railway wagons and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepared to handle discharge with own gear.

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply on every jetty, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the inner anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside.

FUEL: Not available. In case of absolute need can be arranged at Bandar Mahshahr but jetty fees extremely high.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: See "Khorramshahr".

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At B. Shahpour minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

DEVELOPMENTS:

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	1978
Extension of the 10-berth jetty	5	1,051.5	1977
Extension of the 10-berth general cargo jetty	5	911.2	1978
Construction of the 14-berth jetty	14	2,552	1979
Construction of the Lighter harbour	20	880	1976
Construction of the grain terminal	2	480	1976
Construction of the ore-loading facilities	1	220	1976

SHIPMASTER'S REPORT:

Congestion; In the event of the port being congested vessels anchor initially in the vicinity of No. 12 buoy. Masters should then cable "Harbourmaster Bandar Shahpour" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Assadeh" keeps watch on 2182 k/cs and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Shahpour jetties to await turn. (At time of writing delay approx. two months.)

No water or stores can be obtained at outer anchorage.

At inner anchorage water and stores can be obtained by launch but with some difficulty.

AUTHORITY: Port Director.

AGENT: See "Khorramshahr".

BUSHIRE: 29.00 N. 50.45 E. (See Plan)

DOCUMENTS:

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).

Stores List (2 copies).

Port Authority

Crew List (1 copy).

Agents

Crew List (2 copies).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bushire Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).

Freight Manifest (2 copies).

B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Compulsory. Application for Pilot to be made well in advance through Bushire Port Radio EQM, 500 kc/s. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: In outer port in (approx.) position 28° 58′ 30″ N., 50° 44′ 50″ E.

RESTRICTIONS: Entry and departure day or night. Depth in outer channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 35 ft. at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.

MAX. SIZE: LOA 600 ft. Max. draft see "Berthing".

RADIO: Bushire Port Radio EQM, 500 kc/s.

VHF: VHF radio, operating on International VHF Marine Channels 13, 16 and 25. MF call sign EQM available at following zone times: 0500 to 0800 hrs. and 1200 to 1500 hrs.

TUGS: Normally not used. In event of bad weather tug will assist berthing. 2 small and 1 large tug available.

BERTHING: Jetty 360 m. long.

Max. draft No. 1 Jetty – 28 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.

MEDICAL: 24 hours advance notice of medical requirements to be passed to Agents. Doctor available for vaccinations and inoculations.

FRESH WATER: Available at berths ex-pipe-line.

FUEL: Not available.

HATCHES: To be opened and closed by shore labour.

CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

CARGO GEAR: Discharge by ship's gear. Heavy-lift crane capacity 15 tons available. There are also some private cranes available, but these cranes are stationed in Bushire for limited periods only. The lifting capacity of these cranes varies from 35 to 100 tons.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs possible by local workshops.

AIRPORT: 7 km. from port. Regular flights.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be connected on board.

SHORE LEAVE: Permitted.

DELAYS: Occasional delays awaiting berth turn.

SHIPMASTER'S REPORT:

Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 and 20 tons capacity) at an approximate cost of 200 rials per ton. Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.

Identification Cards; Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

Fuel: Bunker fuels and lubricating oils not available.

Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.

AUTHORITY: Port Director.

AGENT: See "Khorramshahr".

CHAR-BAHAR: 25.17 N. 60.37 E.

Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

CYRUS TERMINAL: 29.01 N. 49.28 E. (See Plan)

Oil loading terminal of the Iran Pan American Oil Company.

LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N., Long. 49° 28′ 51″ E. Storage barge (*Pazargad*). Lat. 29° 01′ 57″ N., Long. 49° 29′ 30″ E.

APPROACHES:

Obstructions. In addition to submarine export mooring and storage vessel *Pazargad*, various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows:

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38.7″ N.	49° 27′ 23.1″ E.
C–4	29° 00′ 15″ N.	49° 32′ 00″ E.
C–5	29° 02′ 52″ N.	49° 31′ 34″ E.
C–6	29° 03′ 57″ N.	49° 29′ 57″ E.
C–7	29° 03′ 31.2″ N.	49° 29′ 05.6″ E.
C–8	29° 03′ 31.2″ N.	49° 30′ 48″ E.
C–9	29° 02′ 15″ N.	49° 29′ 57″ E.
C–10	29° 03′ 33″ N.	49° 27′ 22.5″ E.
C–11	29° 04′ 51″ N.	49° 26′ 31″ E.
C–12	29° 03′ 33″ N.	49° 23′ 56.5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39.5″ E.

Safest and most desirable direction of approach to Cyrus Terminal is from S.E. Due to numerous obstructions noted above any approach should be made with extreme caution.

Navigational Aids. All structures located within Cyrus Terminal area display interrupted quick flashing white lights and sound a fog horn. The storage barge *Pazargad* displays, as required, those day and night signals as prescribed by articles 4 (b) and 11 (c) of International Rules. The 6 mooring buoys for the Cyrus Terminal are not lighted.

DOCUMENTS:

Bill of Health.
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consulate. If vessel is in ballast, no legalisation dues).
Clearance (from last port).
Register.
5 Crew Lists.
Passenger Manifest (if any passengers are on board).
5 Store Lists.
Bonded Store List.

PILOTAGE: Vessels will be boarded by Mooring Master of IPAC within 2 miles, approximately 180° true from *Pazargad*. Mooring Master will advise Master on approaches to berth, mooring and unmooring, connecting and disconnecting submarine hose and all other operations within berthing area. All manoeuvring within loading berth area shall be done only in accordance with advice of an IPAC Mooring Master, subject to understanding that Master shall remain solely responsible for safety and proper manoeuvring. Master or qualified deck officer must be on bridge at all times while ship manoeuvring.

Vessels requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. If at night, adequate lighting must be rigged overside for Mooring Master to approach side of ship and climb ladder safely. Adequate searchlights should also be rigged on both wings of bridge when mooring at night, to assist in running lines to buoys.

ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. between meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms.

Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and East of Long. 49° 31′ 00″ as there are numerous flow lines on sea bed connecting various structures, storage tanker and submarine terminal. During Winter months, November through March, severe South-easterly storms often encountered with little or no indication of impending storm. Vessels at anchor, and loading in submarine terminal, must have engines ready with full power for immediate use. Masters cautioned to use adequate scope of chain while anchored awaiting berth.

RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

MAX. SIZE: Ship loaded by means of submarine pipe-line and 1 hose at 1 loading berth, located in approximately 140 ft. of water. Mooring buoys numbered 1, 2, 3, 4, 5 and 6. Starting with No. 1 East of mooring and numbered consecutively in clockwise direction. Max. capacity 70,000 d.w.t., max. length 950 ft.

HEALTH: The rules governing quarantine are the same as found in other ports of the world. Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: *Advice of Arrival:* Incoming tankers must send incoming ETA at least 3 days before arrival. The OSCO main radio station at Abadan will handle IPAC's radio traffic, pre-arrival messages, etc., for vessels calling Cyrus Terminal. The station call sign is EQZ. Messages for IPAC should be prefixed "Cyrusiran IPAC" with copy to Agent. Further ETA messages should be sent when vessel 24 and 12 hours distant from Cyrus Terminal and at any other time any appreciable change occurs in original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Radio Watches: While at the anchorage off Cyrus Terminal, vessels should maintain normal listening watches on both HF and WT.

VHF: Cyrus Terminal base (*Pazargad*) is equipped with VHF radio telephone and maintains a radio watch. Vessels arriving at Cyrus Terminal may communicate with the *Pazargad* on Channel 6.

TUGS: A charge for each tug movement will be made in accordance with rates established by IPAC. When tug/tugs are standing-by vessel mooring/unmooring, for use if required, the full fee will be charged. IPAC maintains launches to assist in mooring and unmooring.

BERTHING: (Also see "Max. Size"). Tankers to have ready: *(a)* Windlass and deck winches fore and aft. *(b)* 12 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5.5 tons. *(d)* 1 bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. *(e)* Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of 6 steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a 2 heading basis, using 12 mooring ropes (4 bow, 4 beam, and 4 quarter).

LOADING: Maximum crude oil loading rates for a tanker using one 12-in. deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p.h. Requested that ships receive oil as fast as it can be delivered, with due regard for safety, also that any fittings on manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into the ships, be removed before arrival at terminal. Preferable that connections be provided so that a 12-in. deck hose can be used.

BALLAST: It is the ship Master's responsibility to see that no oil (crude, bunker, diesel or bilge water) is pumped or spilled overboard from the ship. Drip pans, etc. should be used at all times, especially when disconnecting hoses in order to prevent any loss of oil overboard. The waters in and adjacent to the Cyrus Terminal must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged inside of a circle 50 miles radius around the Cyrus installations.

Discharge of oil mixture from tankers while enroute is prohibited except when the following conditions are all satisfied.

1. The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.
2. The total quantity of oil discharged on ballast voyage does not exceed 1/15,000 of the total cargo carrying capacity.
3. The tanker is more than 50 miles from the nearest point on the Iranian coast.

Masters are warned that when disposing of dirty ballast or bilge waters (50 miles or more off Cyrus), all pipe-lines, sea suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

A vessel must have sufficient ballast for safe manoeuvring. However, by a careful watch of the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast, thereby lessening any possibility of infringement of the pollution restrictions of the area.

As soon as practicable, after arrival all vessels' tanks will be inspected for evidence of oil in ballast, and during discharge of ballast similar inspection will be continued. In order to ensure the cleanliness of the ballast during or after the berthing of tankers, a sample of the said ballast will be tested before discharging. Ballast water so tested should prove that the oil content of the discharge is less than 30 parts per million of the mixture. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 50 miles from the Cyrus installations and there, completely discharge all oily or dirty ballast.

The above rules also apply to bilge water discharged from the vessels.

Any vessel required to return to a position at least 50 miles off Cyrus, for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time, loses any priority held for loading.

Upon return from the sea, the vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

The contamination with oil, when discharged at Cyrus Terminal or at anchorage must be such that even on a clear sunny day no oil could be traced on the surface of water.

If, during the first inspection or during progress of loading, it is revealed that a ship's tanks are not oil-tight, the ship will be rejected, or refused further loading. Ship will not be accepted for loading later, unless satisfactory evidence, duly certified by Lloyds or American Bureau of Shipping Surveyors, or any other recognized survey agency, of effective repairs is submitted.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship, to the satisfaction of the Mooring Master, in order to readily detect any oil on the surface of the sea and take appropriate

action. Vessels unable to illuminate the sea satisfactorily, may not discharge ballast during darkness. Vessels should provide suitable flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval of both Terminal Superintendent and Petroleum Inspector is secured.

MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.

DENSITY: Salinity approximately 20% more than normal sea water.

TIDE/CURRENT: Tidal range between 6 and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.

FRESH WATER: No fresh water available.

FUEL: No bunkers or lubricants available.

FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

REPATRIATION: No facilities.

TIME: GMT plus 3.5 hours.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS:

Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

Classification agencies: Lloyds Register of Shipping (maintain office with Surveyor in Khorramshahr). American Bureau of Shipping (to be arranged from Bahrain where nearest ABS office available, with at least 5 days advance notice. A Surveyor available in Tehran and Khorramshahr). Bureau Veritas (Agents and Surveyor in Khorramshahr). Norske Veritas (Agents in Khorramshahr). German Lloyd (Agents and Surveyor in Khorramshahr).

GOVERNMENT OFFICIALS: Iranian officials, such as the Customs Officers, Immigration Officer and Quarantine Officer, are available on the barge *Pazargad*. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials. All vessels calling at Cyrus Terminal must provide an accommodation ladder, rigged for Iranian officials.

AUTHORITY: Iran Pan American Oil Co.

AGENT: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2278, 2280, 4755/58. Cable "Confidence", Khorramshahr. Telex 654033 654000 and 654051. (answer back: "GAC IR").

Due difficulty reaching Khorramshahr with international telex, communicate via Tehran office, telex no. 212507, 212856, 213043 and 213044. Tehran (answer back "GAC IR"), stating "For Khorramshahr".

Ships' mail for vessels calling Cyrus Terminal to be addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHARG ISLAND: 29.14 N. 50.19 E. (See Plan)

A. DARIUS TERMINAL. Oil-loading terminal of the Iran Pan American Oil Company.

B. KHARG TERMINAL. Oil-loading terminal of the Iranian Oil Exploration and Producing Company. Including Sea Island Terminal.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate at port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).
Clearance (from last port).
Register.
Crew List.
Passenger Manifest (if any passengers are on board).
Store List.
Bonded Store List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Khargu Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall. 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, 1 or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers. Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about 0.25 mile seawards along whole coast line. To S.W. of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon. 29° 12′ 46″ N., 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 160° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon. 20° 15′ 02″ N., 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon. 29° 20′ 20″ N., 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Kharg Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon, 29° 35′ 20″ N., 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles N.W. of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, 1 flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-east Buoy. 29° 12′ 22″ N., 50° 20′ 02″ E. Red can buoy, white light, 1 flash every 2 seconds. Near edge of reef, S.E. Kharg Island in 54 ft. of water.

North-east Buoy. 29° 14′ 54″ N., 50° 20′ 18″ E. Red conical buoy, white light, 1 flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy. 29° 16′ 42″ N., 50° 20′ 30″ E. Red conical buoy, white light, 1 flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts. At South end of Kharg Island a high radio mast painted red and white positioned at 29° 12′ 47″ N., 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at 29° 14′ 10″ N., 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb. On highest point of Kharg Island, 29° 14′ 57″ N., 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb. On N.E. part of Kharg Island at 29° 15′ 10″ N., 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees. On Khargu Island, at 29° 18′ 45″ N., 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards. On North, S.E. coast and S.W. of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area. The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of Terminals, and await arrival of Berthing/Mooring Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages. 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines. Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms. Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.' *(c)* Port Area. Area within 1.5 to 1.75 miles offshore from East coast of Kharg Island generally, has been proclaimed a Port Area. Anchorage within Port Area prohibited.

Cautions. (a) Unlit mooring buoys at S.E. of Kharg Island (see

Darius Terminal). *(b)* Oil Platforms to S.W. of Kharg Island. *(c)* Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

RADIO: OSCO main radio station at Abadan will handle radio traffic. Call sign EQZ. Vessels bound for Kharg Terminal should prefix messages with "Khargiran", and vessels bound Darius terminal should prefix with "Khargiran IPAC", in both cases with copy to Agents.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on station EQZ on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

Schedule of watch (GMT) (Hours)	*Listening watch frequencies* kHz	*Transmitting frequencies* kHz	*Receiving frequencies* kHz	*Remarks*
Continuous	500	500	500	Distress: Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405–535	Traffic list every 2 hours from 0105 to 2305 hrs. GMT.
0400–0700	8356–8374	8471	8374–8460	
0700–0900	12534–12561	13069.5	12561–12689	*Traffic lists every 2 hours from 0405 hrs. GMT.
1000–1300	12534–12561	13069.5	12561–12689	
1400–1700	8356–8374	8471	8374–8460	
1700–1830	4178–4187	4294	4187–4231	

*During scheduled watches on HF while station/EQZ is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according their schedules of watch.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 mc/s. Other channels, available after contact has been established are: No. 12, 11 and 10. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

HEALTH: Tankers calling at Kharg Island and requiring radio pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against smallpox or cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights		*Tidal streams*		
L.A.T.	=+0.4 ft.	Slack water	10.75 hrs. before	HHW
MLLW	=+1.8 ft.	Ebb (full)	7.75 hrs. before	HHW
MHLW	=+3.6 ft.	Slack water	4.50 hrs. before	HHW
MSL	=+4.1 ft.	Flood (full)	1.50 hrs. before	HHW
LLHW	=+4.7 ft.	Slack water	1.00 hr. after	HHW
MHHW	=+6.5 ft.	Ebb (max.)	3.75 hrs. after	HHW
H.A.T.	=+8.2 ft.	Slack water	6.50 hrs. after	HHW
		Flood (max.)	9.50 hrs. after	HHW
Heights in feet above Chart Datum		*Times are approximate only*		

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

LAUNDRY: No laundry services available.

IDENTIFICATION CARDS: Each seaman will be issued with a pass which will be punched when crossing the jetty limits going out and in, and may be used once only. In addition to this pass, seamen should carry an Identification Card or Vaccination Certificate, bearing the owner's photograph.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives, for most nations, maintain offices in Teheran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

REPATRIATION: The following is part of a letter from Oil Services Company of Iran to all shipping agencies Kharg Island.

"You are well acquainted with the fact that under normal operating circumstances only a very limited amount of sleeping accommodation is available at the Kharg United Seamen's Services Centre, which is the only, repeat, only available premises at Kharg for overnight lodgings. At present the United Seamen's Services Centre is undergoing modification, and when this is completed there will be only 18 beds available. It is not O.S.C.O. policy to permit building of any additional sleeping accommodation.

"Due to the above limitation it will now be our policy to limit the number of people sleeping overnight in the United Seamen's Services Centre to 18 and no other Crew members will be accepted for overnight accommodation.

"It will be the responsibility of agencies to co-ordinate crew changes so that no overload is imposed on U.S.S. Centre.

"In order to ensure this, all crews arriving from abroad will have to travel via Abadan where ample overnight accommodation is available and where they can be retained until required at Kharg. Ship's crew leaving their ships should be retained aboard until a suitable commercial or charter flight is arranged.

"Any Crew members arriving on Kharg direct from Teheran will not be allowed to land at Kharg unless

1. The vessel they are joining is at Kharg, or will be at Kharg before 0100 hrs. next day.
2. The Agent has a written agreement from the manager of the U.S.S. that sleeping accommodation is available.

"If neither provisos 1 or 2 are complied with the Crew members will be oncarried and accommodated in Abadan at the Agent's expense.

"To summarise: no sleeping accommodation is available at U.S.S. Centre unless the Agent obtains written agreement to that effect from U.S.S. Centre manager. Agents not having written agreement for sleeping accommodation will either have to return Crew members to their respective ships or arrange commercial or charter flights for them to stay in Abadan.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3.5 hours.

A. DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Island 29° 12′ 40″ N. 50° 20′ 40″ E.

LANDMARKS: *OSCO (Iranian Oil Services Company) Jetty:* Approximately half a mile North of the mooring is a "T" shaped wharf for the berthing of Supertankers.

Khemco Jetty: Approximately quarter mile West of the terminal is a dolphin type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuous gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg South Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous gas flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435 ft.

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flares burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distances. However, on occasions, 1 or more or all of the flares may not be burning.

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio contact with IPAC when 3 days distant from Kharg Island and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hour ETA message to IPAC, giving the best estimate of ship's arrival time at the Terminal. This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to IPAC when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time when an appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival, and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Ship-to-shore communication: Kharg Terminal (IPAC & OSCO) is equipped with VHF radio-telephone, using international frequencies. A continuous watch is kept on the international calling and emergency Channel No. 16, frequency 156.80 mc/s. Other

Channels which are available after contact has been established are:

Channel	*Frequency in mc/secs.*	*Call sign*
IPAC 14	156,700	IPAC Marine
IPAC 6	156,300	IPAC Marine
OSCO 12	156,600	Kharg Pilot
OSCO 20	157,000	Kharg Pilot

Masters are recommended to use this facility when within range, particularly when approaching the port. In poor visibility, when a vessel's approach may not be observed from the shore, VHF communication may be the means of avoiding delay in mooring. While a ship is in mooring, communication will be by portable VHF radiotelephone units. The Mooring Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units becoming inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches with station EQZ on W/T and Kharg Terminal on VHF.

MOORING: Vessel requested to have Pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Mooring Master will board 2 miles seaward of the Terminal sea-buoy. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by IPAC line handling crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Starting with No. 1. East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, each with not less than 120 fathoms of chain. *(b)* 9 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hoses at 1 loading berth, located approximately 1 mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12-in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 t.p.h.

Order save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12-in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (. – –) on blinker light. To attract immediate attention, the same signal "W" (. – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at OSCO main jetty having obtained nomination through Iranian Oil participants in London. Tankers loading crude oil at OSCO "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details)

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22.0 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	*Least Depth water (in feet)*	*Maximum capacity D.W.T.**	*Loading and bunker arms†*	*Height limits ship's manifold in feet above chart datum*
1	64	200,000	3×16 in. 2×12 in.	11 to 73
2	65	38,000	4×12 in.	11 to 62
3	66	200,000	3×16 in. 2×12 in.	11 to 73
4	66	65,000	5×12 in.	11 to 62
5	70	200,000	3×16 in. 2×12 in.	16 to 78
6	67	85,000	3×16 in. 2×12 in.	11 to 73
7	62	200,000	5×12 in.	11 to 73
8	63	45,000	5×12 in.	11 to 62
9	57	200,000	3×16 in. 2×12 in.	11 to 73
10	58	76,000	5×12 in.	11 to 62

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

† 12 in. Bunker arms at all berths. All Chiksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berths Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 2 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in 29° 13′ 29″ N., 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	*Least depth water (in feet)*	*Maximum capacity D.W.T.*	*Loading and bunker arms*	*Height limits ship's manifold in feet above chart datum*
11	106	500,000	4×24 in. 2×16 in.	22 to 110
12	97	300,000	4×16 in. 2×12 in.	22 to 93

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chiksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System. Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations. Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position. No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chiksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chiksan loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of sand, by gravity flow through four 48-in. diameter pipe-lines. Loading rates of up to 11,500 t.p.h. to one berth can be achieved at Kharg Terminal. Up to 45,000 t.p.h. can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. 2 grades available, marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 t.p.h., and bunkering will normally commence before loading cargo. Only fuel oil available at Sea Island berths.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. 5 additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SHORE LEAVE: Fully air-conditioned Recreation Centre operated by United Seamen's Services, situated close to shore end of the trestle to the Oil Loading Jetty. Facilities include: cinema, film exchange, restaurant, dining-room and bar, library and waiting-room, PX gift shop, 2 billiards and snooker tables, 2 table tennis tables, darts, chess, etc., official money exchange.

Note: Shore leave restricted to grounds and buildings of Recreation Centre only.

C. KHEMCO TERMINAL: (Additional requirements and details)

OPERATOR: Kharg Chemical Company, Ltd. (Khemco), The Pahlavi Foundation Building 178 Pahlavi Avenue, Tehran, Iran. Cable Address: "Chemkharg" Tehran. Telex: 2402 Khemco Tn.

LOCATION: Khemco Terminal dolphin jetty is located at the S.E. corner of Kharg Island 29° 12′ 45″ N. 50° 20′ 05″ E.

APPROACHES: Vessels entering Kharg Island road must not approach or anchor West of Long. 50° 21′ 30″ E. (being approximately 1 mile East of Khemco Terminal), unless a company's Berthing Master is on board.

PILOTAGE: Company has own Berthing Masters, who will board vessels outside the port area and will pilot and berth the vessel alongside Khemco jetty. Berthing Masters will also carry out the duties of safety officer.

Vessels with the Berthing Master on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured on the leeside of the ship for the Berthing Master. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the Mooring Masters, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.

NOTICE OF READINESS: Notice of readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.

RESTRICTIONS: Vessels can be berthed day or night in 2 directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.

MAX. SIZE: Length of pier is 1180 ft. with maximum of 42 ft. water alongside at MLLW.

RADIO: The OSCO main radio station at Abadan will handle Khemco's radio traffic. The station call sign is EQZ. Messages for Khemco should be prefixed with "Khargiran Khemco", with copy to Agent.

Advice of Arrival: It is important that ships establish radio contact with Khemco, when 3 days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, Agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.

TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by the Company. Normally 2 tugs are used for berthing and 1 for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.

MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. 4 powerful mooring launches are provided by the Company and normally 1 is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during Winter periods, some additional 4 lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of 1 main and 8 smaller dolphins. 4 on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.

BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by a company's Berthing Master at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take 2 tugs (1 to the bow and 1 to the stern), alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide an efficient gangway with a net rigged underneath. During the hours of darkness, they shall install adequate safe lighting for the gangway. These lights are in addition to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hooks, fitted on all dolphins and under normal conditions 1 tug is used on the hook at the bow of the vessel in order to clear her off the berth. Usually the documents are signed before departure, unless the berth is needed for another ship.

BALLAST: A. Rules and Regulations. Vessels arriving at Kharg should maintain a reasonable draft fore and aft for safe manoeuvring and berthing. When conditions permit, the Berthing Master will advise the Master to commence discharging ballast. It is the Master's responsibility to see that dirty ballast, whatsoever, is not pumped or spilled overboard. Only clean ballast or bilge water may be discharged within 50 miles of the coast-line. In the event of contaminated ballast or bilge water, the vessel will be required to divert this material to a ship's slop tank. Otherwise, the vessel may be unberthed and returned to a point not less than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipe-lines, sea suctions, strainers and pumps. Ships will not be accepted for loading if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore to discharge dirty ballast, or for any similar reason, automatically nullifies any "Notice of Readiness" already tendered and loses any priority held for loading. The vessel will be entered for loading at the time of second arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitted to load cargo and discharge clean ballast at the same time provided all safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pier. Ships will be allowed to draw sea water ballast while alongside.

LOADING: A. Ship's Gear. Although the jetty is equipped with a boom to handle loading hoses, ships are requested to rig jetty side boom in a proper and safe manner for possible use. Masters will be responsible for ensuring that the ships gear or fittings are in good working order and will not in any way interfere with or hamper the working of the facilities.

B. Inspection. After the vessel has been berthed and all formalities carried out the vessel will be boarded by the loading Master. A joint inspection will be made by an authorised ship's officer and the loading Master after the exchange of information and documents. If the ship's tanks, piping or equipment are in such condition that a potential hazard exists, the ships will be refused permission to load until such hazards are corrected. In any case, the owners or charterers of the ship will be notified of any delay or refusal to load because of hazardous conditions and any expense due to such delay or refusal to load will be borne by owners.

If the ship does not arrive with tanks and/or piping sufficiently

cooled to permit loading, the time required to cool down shall not be counted as lay time. Any expenses, including LPG furnished by company, demurrage, etc., involved with the cool-down period and operation shall be borne by the owners or charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in its tanks, after purging from a previous cargo of ammonia or other gas to prevent contamination of shore lines and facilities, the inert gas should be vented if possible before ship is moored. If the ship's tanks to be loaded previously contained a product different from what is to be loaded, the Master shall verify that the tanks are clean and ready to receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loading will begin until the ship is safely moored with fibre mooring lines, gangway lowered and secured, the ship grounded and ground tested, ship's and shore emergency fire hose pressurised and ready for use, fire wire in place, and ship/shore communications tested and in good working order.

All loading personnel will wear fibreglass hard hats, leather-palmed gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks, and sandals or shoes that do not have spark-generating material, such as steel nails, cleats, toe or heel plates. Non-sparking tools will be used in making hose and ground connections. Silk clothing or headgear will not be permitted due to its affinity for collecting static electricity. Ship's grounds will be tested for continuity to shore before product or vapours pass through hoses.

Since the LPG may not contain an odorant, particular care shall be taken that the atmosphere does not become explosive. If there is no air movement, explosimeter readings will be taken hourly, and if an explosive atmosphere exists, loading shall stop until conditions change. Prior to loading the main cargo a small quantity of propane and/or butane will be loaded or circulated initially for cooling down purposes. The amount set aside for cooling down will depend on whether the cool down is for the ship's lines or ship's tanks. Generally, the ship's lines will be cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained in the bottoms of the ship's cargo tank during the trip to Kharg Island, the tank vapour space and tank walls are warmer. For a period of about an hour while low temperature circulation of the shore lines continues, a small amount of propane may be taken by the ship from cargo holds and sprayed into ship's tanks. This method cools the upper parts of the ship's tanks and vapour spaces. If propane is taken from shore lines, this is replaced from shore tankage as the circulating pump suction is "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkheads should be frequently monitored by ship's personnel for cargo leakage.

The measures for dealing with any leakage to prevent the temperature of the hull structure from falling below a safe level depends upon the ship's design. The Master shall have standing orders for dealing with any leakage observed on the ship and shall so inform the Loading Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses; propane 8 in. (with 8 in. ASA 150 flanges); butane 8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 psi at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (2 lines)	10,900 barrels per hour
Butane (2 lines)	7,800 ,, ,, ,,
Propane (1 line, pumping)	7,000 ,, ,, ,,
Butane (1 line gravitating)	3,900 ,, ,, ,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24-hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipe-lines/vent system and/or liquification system shall be manifolded so that only those pipe-lines connected to the ship's tank being loaded will be open. All other pipe-lines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Packaged goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while re-aligning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.
(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.
(c) The hose valves and ship's manifold valves must be shut.
(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.
(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.
(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the owners or charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contain residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 t.p.h. via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore communications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that 1 line could be used to pull a man out of a hatch. For each man working in the hold 1 man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower down-spout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimise this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24-hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty. However, 2 grades (marine fuel oil and marine diesel oil) are available at OSCO main jetty. This is supplied to vessels having made previous arrangements and obtained nomination.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-Summer are extremely warm and humid with the temperature reaching 117°F. (47°C.) and a relative humidity ranging from 10% to 98%. The Winter months, from November to March, are pleasant with a minimum temperature of about 39°F. (4°C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87°F.
Mean minimum temperature	66°F.
Extreme maximum temperature	117°F.
Extreme minimum temperature	39°F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the N.E. through S.E. The prevailing wind for most of the year is from the N.W., but during the Winter period strong S.E. storms occur with very little warning. The Khemco jetty is sheltered from the N.W. winds.

D. Tides. The tidal range is between 7 and 8 ft., with a maximum rate of about 1.5 knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63°F. to 97°F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all port's safety rules and regulations.

GENERAL: *(a)* Shore Leave. Shore leave at the terminal must be arranged between Master and ship's Agent. Sufficient personnel must be on board at all times for emergencies.

(b) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(c) Light Dues. A charge of half a Rial per g.r.t. is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East navigation. The company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(d) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(e) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(f) Repairs. No workshops or other facilities for repairs at Kharg Island.

(g) Customs. There are customs and other offical offices on the Island. Vessel will normally be boarded by a custom director, immigration officer and director of Ports and Shipping.

(h) Consulates. No consulates on Kharg Island. Nearest consulates or diplomatic representatives are at Khorramshahr.

(i) Marine Surveyor. No marine surveyor on the Island, but can be available at 48 hours notice through ship's Agent.

(j) Recreation Centre. Use of Seamen's Club will be cleared through NIOC and Consortium. If used, transportation to and from Club will be provided by the Agent.

(k) Supplies. No provision of any kind is available at Kharg Island. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(l) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

AGENTS: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2280, 2278, 4755/58. Cables: "Confidence", Khorramshahr. Telex. 654033, 65400, 654051 (answerback: "GAC IR").

Due to the difficulty in reaching Khorramshahr with international telex messages recommend you to communicate via our Tehran office, Telex No. 212507, 212856, 213043 and 213044. Tehran, (answerback: "GAC IR"), stating in your message "For Khorramshahr".

Recommend that all urgent communications be sent by Cable directly to Khorramshahr.

Ships' mail and spare-parts for vessels calling at Khemco Terminal are to be routed by flights arriving directly to Abadan Airport without transhipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHORRAMSHAHR: 30.26 N. 48.10 E.

Khorramshahr is in Province of Khuzistan. Town is the seat of a Governor and a base for Imperial Iranian Navy with an admiral permanently stationed in command.

Khorramshahr lies at confluence of Karoon and Shatt-el-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Imperial Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(a) Iraqi Quarantine Officer. Vessels arriving Outer Bar (Shatt-el-Arab Pilot station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of Crew List and crew vaccination certificates for presentation to Quarantine Officer.

(b) Iranian Quarantine Officer. Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires 1 copy Crew List, and all vaccination cards should be available for inspection.

(c) Customs Officer. Customs officer boards ship at anchorage or

alongside Khorramshahr jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).
Stores List (2 copies).
(d) Port Authorities.
Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled in and returned to the port Berthing Master.

(e) Agents.
Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions etc. (if any) be reported early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-el-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by River pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-el-Arab boarded by river Pilot from Pilot vessel situated in proximity of Rooka Buoy (29° 49′ N. and 48° 47′ E.), showing a white flash every 6 seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by River Pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-el-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-el-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a max. depth of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. max. draft for crossing Karun Bar and also at Khorramshahr (Failieth) anchorage is 29 ft., fresh water. Max. draft at Karun Bar in December 1976 was 26 ft. so it is advisable to check before vessel proceeds to the port. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos. 8 and 9 is 29 ft.

SPEED RESTRICTIONS: Engine speed must be reduced well in advance so that the vessel's speed when passing jetties at Khorramshahr and Abadan will not exceed 3.5 knots for vessels with more than 20 ft. draft, and 5 knots for all other vessels of over 100 g.r.t.

The same speed restrictions will apply in the Arbandud when passing ships at anchor with barges or other vessels moored alongside, tugs with barges or other vessels in tow, and vessels engaged in dredging or other salvage work.

SHIP'S REGISTRATION: Ships have to register upon arrival at outer bar by sending telegram to Port Director Khorramshahr via EQK Khorramshahr Port Radio. At present the vessel, after registering her turn should wait at outer bar. If vessel proceeds to another port for discharging, her registration will not be valid. Vessel after registration of berthing turn for Khorramshahr can however call at Abadan Port during waiting period without losing her turn.

HEALTH: See "Documents". Inward clearance is effected on board after receiving free pratique.

RADIO: Khorramshahr Port Radio, call sign EQK, 500 kHz, 1282 mHz.

Khorramshahr Harbour Master can be contacted on VHF Channels 13 and 16, 18 and 25.

Vessels destined for Khorramshahr should send a radio message to the Port Director Khorramshahr and to the ship's Agent 24 hours prior arrival at the Arvandrud Pilot Station (Outer Bar). Times should be quoted in GMT. Also see "Ship's Registration".

TUGS: The Port Organisation of Khorramshahr owns 2 tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment of tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive 9 ocean-going vessels at a time.

CARGO HANDLING: *(a) Jetty.* All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are no shore cranes and no floating cranes available for the purpose of discharging cargo. All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(b) Barges. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also employ watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees. Against these services Agents are presently collecting Rials 110 per ton of 1,000 kilos as a landing charge from the consignees. This rate has been agreed upon between the Agents and the Chamber of Commerce of Khorramshahr.

(c) Cranes. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

There is 1 electric crane permanently installed at Failieh Creek with lifting capacity said to be 100/120 tons. This crane can be used for discharging cargo from barges at Failieh barge jetty.

(d) Storage. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(e) Wagons/Trailers. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24-hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in Summer and of 9/11 hours in Winter is unavoidable.

(f) Delivery of cargo discharged at jetty. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily, under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to Port Authorities and an official Process-verbal will be drawn by respective warehouse-keeper corresponding to remarks noted at the time. This arrangement is to prevent any delay to operations of the vessel.

(g) Overtime Costs. Wages of port staff on board for official hours are borne by port Authorities but overtime and food allowance are paid by carriers.

(h) Port Working Hours (Ordinary). Summer 0600 to 1400 hrs.; 1700 to 0100 hrs.; Winter 0700 to 1500 hrs.; 1700 to 0100 hrs. (Overtime) 0100 to 0500 hrs.

24 hour discharging at jetty is compulsory. The only stoppages are for lunch and dinner, 1 hour each. In Summer season, however, due to heat, discharging at jetty is stopped from 1400 to 1700 hrs.

(i) Liquid Cargo. Due to non availability of tank barges as well as storage area at Bandar Shahpour, vessels carrying liquid cargo are bound to call at Khorramshahr, where consignees have their own tank-barges and storage tanks. This being the case, the Port Authorities do not divert vessels carrying liquid cargo, to Bandar Shahpour.

In the port of Khorramshahr, importers of vegetable oil and other liquid commodities, have arranged their own storage area outside Customs yard, and liquid consignments will be received directly ex-vessel into consignees' barges without any expenses to carrier. (Discharging performed at anchorage.)

Vessels carrying part-liquid cargo can discharge their cargo while awaiting a berth or alongside jetty, whilst unloading other cargo on the pier.

Further to above, whenever Port Authorities divert any vessel to Bandar Shahpour, in the diversion order they indicate "Subject no liquid cargo on board", as vessels with liquid cargo will have to be accepted in the port of Khorramshahr.

Notice of Readiness for vessels carrying liquid cargo, has to be

tendered after vessel has anchored at Khorramshahr anchorage (within Khorramshahr port limits). If, due to congestion, there is no space at Khorramshahr anchorage, vessels may have to remain at Arvandrud Pilot station for 1 or 2 days before entering the river.

(j) *Dangerous Cargo.* Dangerous cargoes are divided in two categories:

1. Acid and flammable cargoes.
2. Explosives such as dynamite, etc.

Vessels carrying acid and flammable cargoes are accepted alongside Khorramshahr berths to unload their general cargo plus dangerous cargo, and Port Authorities unload the dangerous cargo in a yard at Failieh, which yard is mainly used for storing iron joists, but a part is allocated for dangerous cargo.

Vessels carrying explosives are not allowed to berth at Khorramshahr. Recently the Port Authorities have stopped accepting any vessel with explosive cargo on board into the port of Khorramshahr, and those vessels have to proceed directly to Bandar Shahpour before calling Khorramshahr for discharging general cargo, if any. The main port for discharging explosive and special cargoes consigned to Iranian Army is Bandar Shahpour, where the Army have an agreement with the Port Authorities for 1 berth out of the 6 berths. Berth No. 3 is allocated for vessels carrying cargo consigned to Iranian Army, and whenever such vessel arrives at Bandar Shahpour it will be berthed immediately, even if the port is congested; in other words, vessels with Army cargo have priority for berthing.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent on gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: Private doctors and hospitals located in the town for medical and dental treatment and hospitalisation. Arrangements for patients' visits to the doctors, dentists and hospital will be made by Agents upon request. In case of emergency special medical attendance on board can also be arranged. X-Rays, radiographies, blood and urine tests can also be conducted by equipped hospitals existing in Khorramshahr and Abadan.

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pipe-lines and at anchorage by barges, capacity 100 tons.

FUEL: Bunkers are not available at Khorramshahr Jetty, and cannot be supplied by barge. All classes of bunkers are supplied at Abadan jetties only. Bunkers could be obtained from Abadan provided arrangement for supply has been made beforehand with Iranian Oil Participants, London (Iranop London).

DEVELOPMENT: Intention to extend use of trailers and tractors and to eliminate use of railway wagons.

CUSTOMS ALLOWANCES: After receipt of documents, the Customs Officer will seal the store room. All liquor and cigarette stocks will be sealed and reasonable ship's requirements while in port should be taken from store before sealing. This amount recommended to be assessed and be ready for removal from the stores prior to the vessel's arrival in port. During the stay at the port, and upon request and giving prior notice to the Agents' supervisor on board, arrangements may be made to have the Customs officials open the stores to issue further quantities of stores for crew consumption.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's Books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

CONSULS:

Denmark	Tel. 2203	Norway	Tel. 2616
France	Tel. 3656	Sweden	Tel. 2280
India	Tel. 3056	U.S.A.	Tel. 2196
Netherlands	Tel. 3628		

REPAIRS: Minor repairs can be carried out to a limited extent by private workshops existing at Khorramshahr. However due to lack of skilled workers the workshops in question do not undertake any responsibility or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc. as well as refrigerator and air condition service there are a few engineering groups at Khorramshahr as well as Abadan, and technicians of these groups will attend to the repairs on board both at Khorramshahr and Abadan jetties or at anchorage, upon request.

Ships moored to the jetty are not permitted to disable main power-plants for repairs without prior approval of Marine Department. A port tug will be assigned to stand by alongside ship with tow line attached during entire period while plant is disabled.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norsk Veritas; Bureau Veritas. Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

AIRPORT: Abadan International Airport about 10 minutes by car.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SHORE LEAVE: See "Identification Cards".

DELAYS: The port of Khorramshahr is generally congested, with a waiting time of about 2/5 days. Port Administration sometimes orders vessels to discharge their Khorramshahr manifested cargo in Bandar Shahpour to ease the congestion at Khorramshahr.

PROVISIONS: Fresh provisions in limited quantity can be obtained but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24-hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

DEVELOPMENTS: As additions to the existing 9 jetties, 4 new jetties are under construction suitable for vessels of up to 10,000 d.w.t. and are expected to be completed early 1977. Length of jetties will be 720 m., and construction will include sheds of 20,000 sq.m. and an open area of 31,500 sq.m.

In the Failieh Canal, where steel cargo is discharged from barges, the existing jetty has been extended 500 m. This jetty can accommodate 15 barges, and has an open area of 15,000 sq.m. Construction of the extension has been completed, and dredging is taking place to increase the depth available to the barges.

AUTHORITY: Ports and Shipping Organisation, Koutcheh Simorgh No. 24 Tehran, Iran.

Khorramshahr Port Doctor. Ministry of Finance – Ports and Shipping Organisation Port Administration of Khorramshahr.

AGENTS: Gulf Agency Co. (Iran) Ltd., serving: Khorramshahr, Abadan, Bandar Shahpour, Bandar Mahshahr, Ras Bahregan, Kharg Island (Kharg, Darius and Cyrus Terminals), Bushire, Lavan Island and Bandar Abbas. Freight Booking Office: Tehran.

Head Office: Khorramshahr: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Cables: "Confidence", Khorramshahr. Tel. 2280, 2278, 4755/58; after office hours: 2670, 2950, 3193. Telex: 654033, 654000, 654051 (answerback "GAC IR").

Due to the few available Telex lines to Khorramshahr we recommend messages from abroad to Khorramshahr to be sent to our Tehran office, Telex 212507, 212856, 213043 and 213044 (answerback: "GAC IR"). Thereby, please state: *"For Khorramshahr".*

Branch Offices: Abadan, Bandar Shahpour, Bandar Mahshahr, Kharg Island, Bushire, Lavan Island, Bandar Abbas and Ras Bahregan (SIRIP). Cable address to all Gulf Agency Company branches: "Confidence".

LAVAN ISLAND: 26.47 N. 53.20 E. (See Plan)

Terminal:

Lavan Island Loading Terminal. 26° 47′ 10″ N. 53° 20′ 30″ E. Operators: Lavan Petroleum Co. ("LAPCO").

LOCATION: Lavan Island (shown on some charts and pilot publications as Sheikh Shuaib) lies on the North side of the Gulf about 6 miles from the mainland with Lavan Island Loading Terminal in Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E., which is on the S.E. end of Lavan Island.

The island, roughly eliptical in shape, is about 13 miles in length, with a maximum width about 2 miles. It is light brown in colour and its Eastern and Western extremities are low but thence it rises to a number of hummocks having a maximum elevation of 180′ on the West part. Crude oil is delivered from Sassan Oil Field to the terminal by a 22 in. diameter submarine pipe-line which runs seaward from the island on a bearing 188° from a position in Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E. for a distance of 76 miles where it joins the Sassan Oil Field. The Company Flow Station and Pumping Station are located in position Lat. 25° 32′ 16″ N., Long. 53° 09′ 01″ E. in the close vicinity of which is a gas flare.

PORT LIMITS: Limits of port extend approximately 1 mile Westward from East coast of Lavan Island, from Terminal Sea Buoy to half a mile Westward from Sassan Submarine Pipe-line Buoy.

Vessels must not enter the Port Limits unless a LAPCO Mooring Master is on board.

DOCUMENTS:

5 Crew and Passenger Lists.
2 Stores Lists.
2 Bonded Stores Lists.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

In Iran, an additional copy of the Bill of Lading is required for all exports from the country. This must be signed by the Master and forwarded to the Customs Authorities, Lavan Island by the ship's Agent.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(a) Landfall. There are 5 gas flare towers and 1 ground flare. The most conspicuous flare is in position Lat. 26° 47′ 34″ N., Long. 53° 20′ 39″ E. situated in the vicinity of Port Area. This flare onshore, when burning, makes a conspicuous landfall for Lavan Island, but at night from a distance tends to obliterate the various navigational lights.

The other flares are in position,
Lat. 26° 47′ 41″ N., Long. 53° 20′ 19″ E.
Lat. 26° 48′ 25″ N., Long. 53° 20′ 03″ E.
(group of 3 flares).

All tanks in the LAPCO Terminal Tank Farm are painted white and numbered in black from 1 to 6. Tanks No. 1 and 2 have the word LAPCO painted in black on the South side. Tank No. 2 is in position Lat. 26° 47′ 57″ N., Long. 53° 20′ 24″ E. A 1,000,000 Bbl. tank has recently been constructed behind tank No. 6. At present the tank is not painted and is not connected to the pipe-line system.

(b) Navigational Dangers. South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

PILOTAGE: Pilotage compulsory for vessels berthing on, or departing from Oil Jetty, and when manoeuvring in restricted area. Cargo vessels and men-of-war do not require Pilots as they are accommodated in cargo anchorage. Vessels with LAPCO cargo will be moored at a buoy berth for which operation a LAPCO Berthing Master and tug are provided, without charge. Pilots provided automatically on arrival for tankers if berth available. If no berth available due to bad weather or other causes, vessels will be instructed accordingly. The normal international pilot signals are to be used.

Channel 16 VHF is to be used to call Radio Room. Pilots will normally board vessels 1 mile S.E. of Oil Loading Jetty. ETA is to be signalled 72 hours before arrival and confirmed, confirming ETA 48 hours before arrival.

Ships requested to have pilot ladder safely and securely rigged, and ready for immediate use, and long enough to reach Berthing Master's launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder, until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard Berthing Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for Berthing Master both when boarding and leaving.

NAVIGATIONAL AIDS: *Note:* Masters are cautioned to consult their latest Notices to Mariners and Light Lists for most recent information regarding navigation aids.

Lavan Island Terminal Beacon. Lat. 26° 48′ 04″ N., Long., 53° 21′ 20″ E. Located in front of the Main LAPCO Administration Building on the S.E. end of the Island, a rotating white light on a steel lattice tower, painted maroon, 201 ft. above MLWIS exhibiting 3 flashes every 12 seconds, with a visibility of 18 miles.

Pipe-line Lavan Island Rear Beacon. 26° 48′ 04″ N., 53° 20′ 12″ E. is located to West of Tank Farm on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seawards and centred along submarine pipe-line coming to Island from Sassan Oil Field. The light is 192 ft. above MLWIS, range 17 miles in clear weather.

Pipe-line Lavan Island Front Beacon. Lat. 26° 47′ 34″ N., Long. 53° 20′ 08″ E. and is located in a position 2,800 ft. bearing 176 degree from the rear beacon fixed on a steel lattice tower. This light displays a fixed red range light over a 10 degree sector beamed to seaward and centred along submarine pipe-line coming to Lavan Island from the Sassan Oil Field.

The light is 115 ft. above MLWIS and has a range of 17 miles in clear weather. The beacons when in transit from seaward, will indicate that the observer is over the submarine pipe-line and therefore should not anchor in the proximity of this line of bearing.

Sassan Oil Field Radio Beacon. Located in position 25° 32′ 16″ N., 53° 09′ E. Station indentification signal is LA transmitting on 397 kc/s sec., primarily meant as an aircraft beacon but can be received clearly by ships.

Terminal Radio Beacon. Located in position Lat. 26° 47′ 40″ N., Long. 53° 23′ 04″ E. Station identification signal is LD, transmitting 310 kc/s (kHz/sec) from a tower on the above location. This is primarily meant as an aircraft beacon, but can be received clearly by ships.

Light Float. This light float is on station with colour and characteristics as described.

Lat. 26° 47′ 00″ N., Long. 53° 23′ 14″ E. Located approximately 1.1 miles Southward of the Eastern extremity of Lavan Island. Painted red exhibiting a white group flashing light showing 2 flashes every 10 seconds.

Leading Lights – Oil Dock: Located in Lat. 26° 47′ 34.8″ N., Long. 53° 19′ 27.9″ E. Lat. 26° 47′ 30.8″ N., Long. 53° 19′ 35.0″ E. on a bearing of 302° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. W. 5 miles.

Leading Lights – Cargo mooring: Lat. 26° 47′ 39.0″ N., Long. 53° 22′ 32.3′ E. Lat. 26° 47′ 33.0″ N., Long. 53° 22′ 34.1″ E. on a bearing of 344° T.

Characteristics, Front, Qk., Fl. R. 5 miles. Rear, Qk., Fl. W. 5 miles.

Oil Loading Dock Lights. The N.W. and S.E. ends of the dock are marked by single fixed red navigation lights placed on Mooring dolphins Nos. 1 and 4, respectively.

Small Craft Harbour. There is a small craft harbour located in position Lat. 26° 47′ 33″ N., Long. 53° 23″ 13″ E. which has no navigational lights displayed.

Terminal Sea Buoy. Located in position Lat. 26° 46′ 30″ N., Long. 53° 22′ 07″ E. White can buoy with lattice tower, radar reflecting, characteristic 1 flash every 5 seconds (0.5 seconds on 4.6 seconds eclipse).

Sassan Submarine Trunk Pipe-line Buoy. Located in position Lat. 26° 46′ 48″ N., Long. 53° 20′ 00″ E. Red can buoy with lattice tower, radar reflecting characteristic 1 flash red every second (0.4 seconds on 0.6 seconds eclipse).

Iminoco Radio Tower. Immediately in front of the main Iminoco Administration Building there is a steel tower painted red, elevation above MLWIS is 408 ft. Location is Lat. 26° 48′ 15″ N., long. 53° 19′ 10″ E. A red light occulting every second is exhibited from the top of the tower.

Decca Navigator Station Tower. A lattice work tower painted in red and white bands 336 ft. high above MLWIS is located Eastward of the Terminal in position Lat. 26° 47′ 39″ N., Long. 53° 22′ 25″ E.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of Long. 53° 22′ 00″ E., and in suitable depths of water wait for LAPCO Berthing Master. The sea bottom is good holding ground. Depth about 40 m.

Prohibited Anchorages. Anchorage is prohibited in the vicinity of the Sassan and Rostam submarine pipe-lines and for a distance of 2,000 ft., on both East and West sides of pipe-lines and parallel to same. The Sassan 22 in. pipe-line runs 188 degrees seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 20′ 05″ E., and the Rostam 18 in. pipe-line runs 205 degrees seawards from a position Lat. 26° 47′ 32″ N., Long. 53° 19′ 58″ E.

To draw attention to the Prohibited Anchorage Area in the vicinity of the Sassan Oil Field to Lavan Island 22″ Submarine pipe-line 3 notice boards have been established. The notice boards are 3 m. high and 8 m. long, painted white, with the words "Prohibited Anchorage" painted in red in English and Farsi.

These notice boards are in the following positions:
Lat. 26° 47′ 33″ N., Long. 53° 19′ 41″ E.
Lat. 26° 47′ 33″ N., Long. 53° 20° 08″ E.
Lat. 26° 47′ 20″ N., Long. 53° 21′ 18″ E.

Terminal Port Area. Area bounded by a line joining positions:
Lat. 26° 47′ 31″ N., Long. 53° 22′ 00″ E.
Lat. 26° 46′ 21″ N., Long. 53° 22′ 00″ E.
Lat. 26° 47′ 26″ N., Long. 53° 19′ 22″ E.
Lat. 26° 46′ 49″ N., Long. 53° 19′ 22″ E.

Anchorage within Port Area prohibited. Port Area used by vessels manoeuvring to and from oil loading jetty, and no vessel permitted enter Port Area until Company Berthing Master on board.

Offshore Oil Platform. Anchorage prohibited in area of Sassan Oil Field, some 76 miles South of Lavan Island Marine Terminal, due to existence of numerous submarine oil pipe-lines connecting oil wells and production platform.

RESTRICTIONS: 24-hour service. No restrictions for vessels up to 200,000 d.w.t. Tankers in ballast required to have on board at least 33% of their d.w.t. in ballast (including permanent ballast). The state of the tide does not effect entry.

The max. draft allowed for tankers using Berth No. 2 is 43 ft. 6 in. (13.26 m.).

MAX. SIZE: Vessels of 200,000 tons d.w.t. and above are only accepted with prior approval from LAPCO, which is based on standard 13 point questionnaire, detailing dimensions, loaded and ballasted draft and ability to segregate or load concurrent with deballasting. Determining factor is maximum elevation of the loading arms above the water line. Cargo vessels bound for the LAPCO cargo buoy mooring are limited to 26 ft. (7.92 m.). No restriction on vessels using the anchorages.

CLEARANCE: *(Arrival)*: After Berthing Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. *(a)* Condition of use of Port of Lavan Island, *(b)* Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection form. After pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. 5 copies of the crew list and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.*

The Terminal operates an Early Sailing System covering all cargo documentation. The following documents will be prepared in advance, *except for cargo figures*, and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(a) B/L. (b) Certificate of Origin and Cargo Manifest. (c) Tanker Time and Loading Report. (d) Report of Cargo and Ships Ullages. (e) Master's receipt for documents.

Official cargo figures will be passed to the Master within 1 hour of his departure for insertion by the Master on the Bill of Lading and Certificate of Origin and Cargo Manifest.

In cases of disagreement over cargo figures the Terminal will accept the Masters "Note of protest" by telex, by the authorised ships Agent, or by written note handed to the Berthing Master.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at masthead; by night: red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

There are occasional outbreaks of cholera. International Certificates of Inoculation/Vaccination are essential.

See Radio, "Free Pratique".

RADIO: Call "LAPCO Lavan Island" on VHF Channels 16, 12, or 7.

Tugs keep constant watch on Channel 12 VHF and call at intervals on 2182 kc/s. when vessel believed to be approaching, or scheduled call at Lavan Island.

Khorramshahr Radio Station normally passes on a ship's ETA to the Agent resident on Lavan Island, through Abadan. There is a radio-telephone link from Abadan to Lavan Island.

Nomination and Loading Orders. Ship's Masters should signal their ETA Lavan Island Loading Terminal 72 hours before arrival, and confirm (correcting ETA if necessary) 48 hours before arrival. This message should include amount of cargo to be loaded by vessel, destination as per charter, hours required to de-ballast, number and size of ship's manifold connections, maximum loading rate and whether any sickness on board. This message should be addressed to LAPCO, Tehran Office, Cable address "LAPCO, Tehran", Telex address LAPCO, Tehran, Attention: Marine Supt. Lavan. No. 21-2420 LAPCO IR, and routed through nearest coastal radio station handling such messages.

Radio Station. There is no CW radio station on Lavan Island.

VHF Radio-Telephone. Lavan Island Loading Terminal equipped with International Maritime VHF/FM radio telephone service using standard international frequencies. Masters recommended use this facility when within range of Lavan Island Loading Terminal, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be means of avoiding delay in berthing. The following VHF Channels available on a continuous watch basis:

No. 16 (Safety and Calling Channel).
No. 12 (Port Operations, First Choice, Simplex).
No. 9 (Port Operations, Second Choice, Simplex).

Initial contact should be made on Channel No. 16 and then transfer to Channel No. 12 for Port Operations.

Radio Telephone Frequencies. LAPCO Tugs fitted with VHF radio telephones covering all international maritime VHF radio telephone frequencies (156-162 Mc/s.).

Radio Watches. LAPCO Radio Station on Lavan Island keeps a 24-hour watch.

Free Pratique: Tankers nominated to load at Lavan Island will be granted radio free or provisional pratique based upon the following advance information received from the Master.

(a) Itinerary for past 30 days or last port, if outside this limit.
(b) Number of crew/supernumeries.
(c) Number of crew with (1) expired smallpox, (2) expired cholera certificates.
(d) Any person seriously ill or died during past 30 days.
(e) Any cases of contagious/infectious diseases during past 30 days.
(f) Ship's name. Registration country. Master's name. ETA Lavan Island.

All the above items must be transmitted to: "Lapco Tehran Telex No. 2420. Attention: Marine Superintendent Lavan".

Radio messages should be sent through Bahrain or Khorramshahr Radio Stations 24 hours prior to arrival.

Masters should use item letters and digits to minimise cable length.

TUGS: 2 diesel powered tugs. Both tugs are twin screw, 3,120 b.h.p. Kort Nozzle types with a static bollard pull of 42 long tons. 2 tugs are used on every movement.

For each tug employed berthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master. For each tug employed unberthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Berthing Master.

The LAPCO tugs and launch assist in berthing and unberthing. These are under the direct supervision and control of the LAPCO Berthing Master. Service and facilities provided by the company including the services of the LAPCO Berthing Masters, tugs, mooring launch, or berthing equipment, are at the vessel's risk.

Note: On occasions when tugs are employed standing by vessels whilst in the berth for use, if required, the full tug charge will be charged.

BERTHING: The Oil Loading Dock is located on the South Coast approximately 2.5 miles from the East end of the Island. The loading platform is 2,030 ft. from the shore, located in position Lat. 26° 47′ 06″ N., Long. 53° 20′ 30″ E.

Deck level is 32 ft. above sea level Mean Low Water Indian Springs. Under normal conditions, 12 lines used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm periods, usual to use one each additional headline and breast line at each end, making a total of 16 mooring lines. Breast lines and springs of wire rope acceptable, and normally secured to jetty patent quick-release hooks. Three-inch circumference messenger lines, 240 ft. in length, available each berth for hauling lines from mooring launches up vertical face of jetty fendering and along jetty deck, with assistance of electrically operated capstans sited at intervals along jetty.

Berth No.	*Least depth water (in ft.) above chart datum MLWIS‡*	*Maximum capacity d.w.t.*	*Loading and bunker arms†*

†All Chicksan Loading Arms are fitted with series 150 flanges.

‡Chart Datum is Mean Low Water Indian Springs and maximum range of tide is 7 ft.

Tankers to have ready: Fore and aft winches ready for use, and minimum of 16 good mooring lines, 120 fathoms each.

The Terminal accepts tension wires or ropes, only with proper supervision on the brake. Derricks, winches and gear must be rigged on port and starboard sides, topped over the manifold.

Ship's crews perform all operations of mooring, and unmooring, on board ships.

LOADING: Tankers should arrive with 16 in. series 150 ASA flanges on all manifold connections to be used for loading.

Sassan Crude Oil of approximately 33.73° API gravity is available from the LAPCO 3,000,000 barrel Tank Farm. Delivery of oil to the loading dock is by gravity flow, through two 36-in. diameter pipe-lines.

Rostam Crude Oil of approximately 34.48° API gravity is available from the IMINOCO 1,500,000 barrel Tank Farm, immediately West of the LAPCO tanks. Delivery of oil to the loading dock is by gravity flow through two 36-in. diameter pipe-lines.

After the vessel has berthed, the Berthing Master, who acts as a Loading Master, will discuss arrangements, inspect tanks, sign the tanker dry certificate, and finally check cargo figures with ship's personnel. Before loading commences, all items on the "LAPCO Safety Check List" will be complied with, and an inspection made by the Chief Officer and the Berthing Master.

Loading rates of up to 50,000 bbls/hr. (6,700 t.p.h.) to Berth No. 1, and 30,000 bbls/hr. (4,000 t.p.h.) to Berth No. 2 can be achieved at Lavan Island.

Up to 40,000 bbls/hr. (5,300 t.p.h.) to Berth No. 1 and 25,000 bbls/hr. (3,300 t.p.h.) to Berth No. 2 can be achieved when loading 2 ships simultaneously.

Do not close valves against crude oil flow.

Emergency Flow Stop Signal if all communications fail will be a continuous sounding of the ship's whistle.

BALLAST:

(a) Masters are warned that no dirty ballast, or bilge water should be disposed of in sea within 50 miles of coast of Iran. When so disposing of ballast all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

(b) As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

(c) Should ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by "Lloyds" or "ABS" Surveyors, or other recognised surveyors of repair is submitted.

(d) Any vessel rejected because of dirty ballast or sea pollution will automatically nullify "Notice of Readiness" and will lose any priority of position for loading. On return from sea, Masters should tender new Notice of Readiness to LAPCO. If this accepted by LAPCO the vessel will be entered for loading as of new time of acceptance. Vessels will be rejected for dirty ballast at all times.

(e) Vessels equipped with separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the LAPCO Terminal Superintendent and provided NIOC Petroleum Inspector agrees.

(f) A vessel must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a Ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

DENSITY: The temperature of sea water alongside the Loading Dock varies from 71°F. in January to 93°F. in August. The density of sea water alongside the Loading Dock is approximately 1,022 oz./cu. ft. (1.022 grams/c.c.).

TIDE: The tide is mainly diurnal with a mean range of 3 ft. 0 in., and extreme range of 5 ft. 6 in., and an extreme height of 7 ft. 0 in. above chart datum, which is MLWIS.

The tidal stream varies according to the state of the tide, with a maximum rate of about 1 knot.

An automatic chart recording tide gauge is fitted on berth No. 2.

WEATHER: In Summer time from May to September temperature reaching 50°C (122°F.) and humidity ranging from 10% to 100%. The Winter (November to March) mild and pleasant with minimum temperature approximately 6°C. (43°F.). The wind for most of year from N.W., but sometimes particularly during Winter strong S.E. storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from N.W. winds, but exposed to winds from South.

During Winter storms, waves of 8 to 10 ft. often occur. A max. wave height of 15 ft. has been recorded at the Southern end of the Island.

STEVEDORES: For cargo vessels the Agent requires 4 days Notice of Arrival in order to transport labour from Bandar Abbas. Agent provides labour for working cargo "to the rail" and receiver provides lighterage and labour thereon.

MEDICAL: LAPCO maintains small clinic on Lavan for minor

medical treatment of LAPCO staff. No medical services available except in emergency and subject to availability of doctor.
FRESH WATER: None available.
FUEL: *Bunkers and Naphtha:* The National Iranian Oil Company (NIOC) owns and operates a topping plant on Lavan Island known as the Lavan Distribution Complex (L.D.C.).This plant is capable of delivering Gas Oil, Fuel Oil and Naphtha to tankers at the Lavan Crude Oil loading dock via 8 in., 12 in., and 16 in., lines respectively.
NIOC should be contacted for details of their available products.
CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.
FIRE PRECAUTIONS: Vessel receives full detailed instructions from Berthing Master. Vessels must have fire-wires and engines not to be immobilised.
CONSULS: No consular representation on Lavan Island. Nearest consulates at Khorramshahr near Abadan.
REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ship's main engines must be available at all times while alongside jetty.
MARINE SURVEYS: Lloyd's Surveyor based at Khorramshahr and can usually be called through vessel's Agent at 72 hours notice. A.B.S. surveyor also based at Khorramshahr.
AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.
TIME: Iranian Standard Time which is GMT plus 3.5 hours.
POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by LAPCO staff in case of tankers.
SHORE LEAVE: Ships' crew not allowed to go ashore.
CREW CHANGES: Not permitted.
REGULATIONS: (Miscellaneous): *Painting and scaling.* Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.
GENERAL: *Flag:* All vessels are required to fly the Iranian Flag (green uppermost) in Iranian territorial waters which extend 12 miles offshore.
Garbage: Dumping overside of garbage and refuse prohibited in Port Area.
Sanitation: Government Health Regulations require suitable covers to be fitted over all lavatory discharge outlets, etc., to prevent fouling of jetty or craft alongside.
Damage to Port Facilities: If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with LAPCO Berthing Master as to nature and extent of such damage, and this must be confirmed by LAPCO Marine Superintendent. LAPCO has standard liability forms which cover both ship and shore, and are issued on every occasion.
Rat-guards: All ships berthed alongside must provide Rat-guards for Ship's Moorings.
No visitors: No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Marine Superintendent. Only persons having authorised work will be given access to port limits, dock or vessels.
AUTHORITY: LAPCO Tehran. Terminal Office: Lavan Island.
AGENT: Gulf Agency Co., Lavan Island.
Head Office: Khorramshahr. Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Cables "Confidence", Khorramshahr. Tel. 2280, 2278, 4755–58. After office hours 2670, 2950, 3193. Telex 654033, 654000. 654051 (answer back "GAC IR").
Due to the few available Telex lines to Khorramshahr, messages from abroad to Khorramshahr to be sent to Tehran office, Telex 212507, 212856, 213043 and 213044. (answer back "GAC IR") stating: "For Khorramshahr".
Air-freighted spare parts and ships' mail should be addressed: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran, and sent to the Abadan International Airport marked "In Transit for M/S . . . ."
Air-freight consignments should be routed by flights arriving *directly* to Abadan Airport without trans-shipment at Tehran. Cable advise "Confidence", Abadan, of flight details and airway bill number.

RAS BAHREGAN (Norwuz Loading Terminal): 29.43 N. 50.10 E. **(See Plan)**

DOCUMENTS:
5 Crew and Passenger Lists.
4 Stores Lists.
4 Bonded Stores List.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.
PILOTAGE: Vessels to be moored at Bahregan Terminal will be boarded by a Mooring Master of the Company within 2 miles of the SBM. The Mooring Master will advise the ship's Master on approaches to the berth, mooring and unmooring, connecting and disconnecting the floating hose, and in all other operations within the berthing area.
Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side of the ship and climb the ladder safely. Adequate searchlights should also be rigged when mooring at night.
The Mooring Master will be in direct charge of the portable VHF ship-to-shore radio-telephone communications.
ANCHORAGE: The SBM is in the open sea with no surface obstructions in the vicinity. However, anchorage is prohibited in the following areas:
(a) Immediate vicinity of the SBM – within a 1.2 mile radius of the SBM.
(b) One mile on either side of 36-in. submarine pipe-line from SBM to Bahregan Oil Centre.
Suggested anchorage area is 2 miles S.W. of the SBM.
RESTRICTIONS: The Bahregan SBM Terminal operates 24 hours per day, 7 days a week. However, mooring or unmooring is only carried out if fair or moderate weather conditions are prevailing.
In the event that berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the terminal area on account of weather (terminal closed) should keep in contact with the terminal via radio in order to be available when weather moderates.
FLAG: All vessels are required to fly the Iranian flag on the foremast during daylight hours. Iranian territorial waters extend 12 miles seaward from the mainland and adjacent islands.
ADVICE OF ARRIVAL: It is important that ships establish radio contact with SIRIP when 3 days distant from Bahregan Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to SIRIP giving the best estimate of ship's arrival time at the Terminal.
Further ETA messages should be sent to SIRIP when the vessel is 24 and 12 hours distant from Bahregan Terminal and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12-hour ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring, as well as details of the flange size of the manifold.
MAX. SIZE: SBM terminal designed for tankers up to 250,000 d.w.t. Min. depth at the SBM is 24 m.
HEALTH: The rules governing quarantine of vessels is the same as found in other ports of the world.
RADIO: Bahregan Oil Centre Radio Telephone Station maintains a daily watch on the following frequencies at the times stated.
GMT: 0530–0630 on 2477 kc/s., 1130–1230 on 8230 kc/s.
In addition, once a tanker has advised its 72 hours ETA the Bahregan Oil Centre maintains a watch on VHF Channel 16. The call sign for Bahregan Oil Centre is "BOC". Contact can be made on other frequencies if requested.
Telegrams of ETA may be sent to Khorramshahr Port Radio Station addressed to SIRIP Liaison Office, Khorramshahr.
Communications during mooring and loading: Portable VHF radio-telephone units are brought on board by the Mooring Master.
NOTICE OF READINESS: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at time, carry clean ballast and are in all respects equipped and ready to moor.
Tankers to have ready:
(a) Windlass and deck winches forward, maindeck and aft.
(b) Ten good nylon or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line.
(c) On port side, opposite ship's manifold, equipment capable of lifting floating hose safely and expeditiously. Weight lift of 5.5 tons.
Ship's crew performs all operations on ship.
SBM: The single buoy mooring is 13.5 m. in diameter and 3.65 m. high at its highest point. It is equipped with the following navigational aids.
Signal light: White colour, flashing morse code "U" every 15 seconds. Range 5 miles.
Fog horn: Morse code "U"' every 45 seconds.
Radar reflector fitted. The whole SBM is painted a bright orange colour.
TUGS: Available and required.
SINGLE BUOY MOORING: The Monobuoy is situated about 15 kms. from the shore in position 29° 43′ 02″ N., 50° 09′ 46″ E. Depth of water in vicinity of buoy mooring is 30 to 31 m. Buoy is served by a 36-in. loading line with a capacity of 700 cu. m. per hour.
MOORING: The optimum approach to the single buoy mooring is into the wind and sea. Sometimes, however, this will not be possible because of tides at variance with strong wind conditions. Accordingly, it is incumbent upon the Master to exercise careful judgement when approaching the Terminal, particularly during the hours of darkness and in poor visibility. It should be noted that the incoming tides flow towards the N.W. (approx. 310°) and outgoing tides towards the S.E. (approx. 130°). The company Mooring Master will give all necessary advice to the ship's Master.
Particular attention must be paid to the location of two strings of floating loading hose. Normally the position of the floating hoses will be controlled by the tidal currents rather than by wind effect. During daylight hours the hose string is highly visible by virtue of their covering of orange plastic floats.
When approaching the SBM at night or during poor visibility the radar is an excellent means of ascertaining the exact distance to the Terminal. The floating hose strings normally stand out very clearly on the lower radar range scales.
Once the optimum approach route has been selected, the tanker should proceed towards the SBM at a suitable speed dependent upon conditions at that time. At approximately 3,000 ft. from the

SBM the tanker should have only sufficient way on for steerage. The floating hoses should be on the port side, and it is recommended that the tanker make the final approach with the SBM on the port bow, rather than dead ahead. This permits the Master on the bridge to observe the SBM at all times and in the event of any misjudgement of the approach speed there is no danger of over-running the Terminal. (The tanker should adjust her engines such that all way is off the vessel between 150–50 ft. from the SBM).

At a suitable distance from the SBM the service launch which will have maintained station during the approach, will take two lines from the ship and secure them to the mooring bitts on the SBM. The launch will then bring the 2 large SBM float ropes to the ship, which should have a messenger line ready to raise them. Once these float ropes (each of which has a breaking strain in excess of 305 tons) are secured the ship may, if so desired, recover its own lines which are used only to provide a safeguard during pick up of the SBM float lines.

In the event that the floatrope mooring lines provided by the Company are not used or not available, the ship is secured using 6 lines from the tanker all on port side.

HOSES: 2 flexible floating hoses connect the ship's manifold with the Terminal's cargo manifold, and separate hoses connect the underside of the SBM to the submarine pipe-line end manifold (PLEM) on the seabed. A submerged peripheral fender extending outward from the hull is provided to prevent damage to the floating hoses and SBM, should the tanker ride up against it.

After the vessel is securely moored the service launch will tow the end of the floating hoses to a point on the port side of the tanker immediately below the tanker's cargo manifolds. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons.

The hoses are fitted with 16-in. flanges, and the Company will provide reduction pieces to 14 in. or 12 in.; other sizes (as well as gaskets) as required to make connections to ship's manifold. The hose connection is normally performed by SIRIP's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

LOADING: The ship's officer responsible for loading should give SIRIP's Mooring Master at least half an hour's notice of readiness to commence loading. In any event, the ship should advise SIRIP during its last radio contact prior to arrival of the estimated time required to discharge ballast, so that an approximate time for commencement of loading can be established. It is also helpful if the ship advises the size and type of flange and also the distance of the manifold from the ship's side during radio connection.

The initial loading rate is normally about 1,500 long tons per hour while the recently coupled flanges are inspected for leakage and the Mooring Master and ship's officer satisfy themselves that all is in order with the SBM and the ship's facilities. As soon as this is done, the loading rate is increased to the max. of 6,000 long t.p.h.

Caution: The incoming oil stream is controlled from the shore and it is extremely dangerous to close a ship's valve against the pressure, which may damage hose, ship's piping, or shore facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

The ship's officer in charge of loading should advise the Mooring Master half an hour before he estimates loading will be completed.

On advice from the ship a min. of 3 minutes is required to stop the flow of crude oil, however, a reduction in loading rate before topping up the final tanks may be arranged on request to Mooring Master.

During loading or unloading the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

CARGO: Bahregan Sar Crude, API from 20 to 32, Temperature 85°F.

BALLAST: The waters of the Persian Gulf must not be polluted, and only clean, oil-free ballast (and/or bilge water) may be discharged.

As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil ballast and during discharge of ballast, similar inspection will continue. If evidence of oil appears at either of these inspections, the ship must leave mooring and proceed at once to a point not less than 50 miles from any coast or island and there completely discharge all oily or dirty ballast.

Vessels equipped with a separate system of ballast and cargo tanks will be allowed to discharge clean ballast and load oil simultaneously, providing approval is obtained.

Note: When loading is carried out under rough weather conditions the tanker should not be allowed to get into a light condition, and therefore deballasting should not be completed until a reasonable amount of the cargo has been loaded.

PETROLEUM INSPECTORS: Services of the Saybolt Agency available subject to at least 3 days advance notice.

MEDICAL: Depending on the availability of the Company doctor, medical assistance can be provided, although there is no hospital available. In cases of extreme emergency, SIRIP will arrange transport to Abadan at the ship's expense and responsibility.

CUSTOMS: A Customs Officer boards each vessel calling at the terminal.

DENSITY: Salinity is approximately 20% more than normal sea water.

BUNKERS: Not available.

WATER: Not available.

STORES: Not available.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the terminal is situated off-shore in the Persian Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

REPAIRS: Masters of vessels loading at Bahregan Terminal are advised that this port is considered an "open roadstead" and under no circumstances may engines be shut down for repairs while their ships are moored. There are no facilities at Bahregan Terminal for making vessel repairs.

CONSULS: There are no consulates at the Bahregan Terminal; however, consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities.

TERMINAL OPERATORS: Societe Irano Italiene des Petroles (SIRIP).

AGENTS: See "Khorramshahr". (Actual handling is effected by Oil Company SIRIP, but Khorramshahr Agents are in a position to handle ETA messages, etc., addressed to them via Khorramshahr Port Radio EQK, also to communicate messages to and from SIRIP Khorramshahr and shipowners. Agents can also pass arrival and sailing details to principals, and despatch copies of loading cargo documents as required by Owners. Forwarding ship's mail to Bahregan and despatching official and crew mail received from ship, can be arranged by Agents. Such services are not undertaken by the Oil Company, and it is advisable to appoint an Agent at Khorramshahr.)

NOTES

Please also advise Shipping Guides (Services) Ltd.

Iraq

ALBAKR TERMINAL: 29.41 N. 48.49 E. (See Plan)

LOCATION: The terminal is 31 miles S.E. of Fao in position 29° 40′ 36″ N. 48° 48′ 38″ E. Depth of water 29.30 m. at MLWOST.

PILOTAGE: Pilotage is compulsory for all inward and outward tankers using the Khor al Khafja buoyed channel when the draft is over 15.85 m.

NAVIGATIONAL AIDS: 8 lighted buoys define the deep water channel at the 69 ft. (21m.) depth contours in the immediate vicinity of Albakr Terminal. The buoys are battery powered with quick flash characteristics with visibility range of 1 mile. The perimeter of Albakr Terminal is outlined with flashing marine lanterns to define a hazard to marine navigation. The lanterns are battery powered, some are white lens flash with 5 mile range and others are red lens flash with 2 mile range.

The radio tower is equipped with an aviation hazard light (red). It is also equipped with a long range marine beacon (white) located below the red hazard light.

MAX. SIZE: Max. length, 366 m. Max. draft 21 m. Night berthing possible.

RADIO: Tankers are requested to contact Albakr Terminal through Basrah Control Radio (YIR) at least 72 hours, 48 hours and 24 hours prior to arrival giving ETA. Prior to docking the tanker must also provide the terminal operator with information required to prepare the "loading order" format, this information should include the type of crude to be loaded, loading rate in barrels, the Registry No. of vessel, nationality, name of Master. The Master will be informed of approach instructions such as location of berth, weather and sea conditions, and the communication channel to be used for vessel docking assistance.

Vessels bound for Iraqi territorial waters should also contact FAO Radio (YIS) at least 24 hours before entering territorial waters requesting free pratique from Medical Officer FAO. The request should indicate the state of health of the crew on board together with relevent information.

RADIO:

Name of Station: Khor al Khafja FC(10) Albakr Terminal FP
Call Sign : Albakr Radio
Service : 24 Hours

The following table shows the details for contacting the Iraqi port coast stations. The No. between brackets corresponds to the notes explained below.

Frequency	*Emission Channel*	*Class*	*Power*	*Service Nature*
156.375 mHz. (6) (8)	67	F^3	0.02	OT (2) (3)
156.550 mHz. (3) (5)	12	F^3	0.02	OT (2) (3)
156.80 mHz. (1) (3) (4) (7) (8) (11)	16	F^3	0.02	
161.80 mHz.	24	F^3	0.02	

FC Coast Station
FP Port Station
OT Station open exclusively to operational traffic of the service concerned
(1) Transmits urgent notices to mariners
(2) Transmits meteorological bulletins (North Arabian Gulf Weather Forecast)
(3) For Navigation and harbour control services
(4) Calling and Safety frequency
(5) First priority working frequency
(6) Second priority working frequency
(7) Weather bulletins at 0630, 1430 hrs. and on request
(8) Used for marine traffic control
(10) Station under the direction of Iraq administration
(11) Permanent watch

While in Iraqi Territorial waters, ships under way shall maintain watch on Channel 16 (156.80 mHz) and/or (461.5 kHz) to ensure immediate reception of the instructions issued by the controlling authorities.

(a) Khor Al-Khafja, Albakr Terminal Radio, maintains listening watch on Channel 16 (156.80 mHz).
(b) Pilot station (Al-Rasheed Radio YIBE maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
(d) Basrah control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

Instructions:

(a) Navigation warnings are transmitted on 500 kHz. by Basrah Control Radio (YIR).
(b) North Arabian Gulf weather forecast is transmitted by:
1 Basrah Control Radio on:
440 kHz. at 0530, 1330 GMT and on request.
6493.25 kHz. at 0530 GMT and on request.
8668 kHz. at 1330 GMT and on request.
2 Khor Al Khafja, Albakr Terminal Radio, on Channel 16 (156.80 mHz.) at 0530 GMT and on request.
(c) Traffic control signal on Channel 16 (156.80 mHz.) and on 500 kHz. by Basrah Control Radio (YIR).
(d) Traffic control signal Channel 16 (156.80 mHz.) and 500 kHz. by Fao Radio (YIS).
(e) Traffic control signal on Channel 16 (156.80 mHz.) by Albakr Terminal Radio.

Commercial and Public Correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz.) 500 kHz. 4, 6, 12 and 16 mHz. bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

TUGS: 3 available, 2 of 4,000 h.p. and 1 of 2,200 h.p.

BERTHING: The terminal consists of 2 loading platforms (A) and (B) each loading platform has 2 loading berths. Berths 1 and 2 of platform "A" and berth 4 of platform "B" can accommodate tankers ranging in size from 35,000 d.w.t. to 350,000 d.w.t., berth 3 of platform "B" can accommodate tankers ranging in size between 85,000 d.w.t. and 350,000 d.w.t., Total length of structure is 975.4 m. and 106.7 m. wide at centre.

LOADING: Storage and pumping facilities on shore are connected to Albakr Terminal by two 48 in. pipe-lines. The Terminal is capable of loading through either one of the pipe-lines at a time or both. Capacity of each line varies between 77,000 to 89,000 b.p.h. depending on type of crude (Basrah heavy or Basrah light type). With both lines in operation at the same time loading rate can be increased to max. 141,500 b.p.h. (19,000 M.T.H.). 2 tankers can load with different types of crude at the same time. Loading facilities can be remotely controlled from the Control Room.

Loading will be stopped if any regulations are not observed and in the case of oil spillage.

Loading may be stopped in still air conditions, during severe electrical storms and/or high wind and sea conditions.

Loading Arms: For each loading berth, 3 identical 24 in. by 80 ft. long Luceat DCMA loading arms, with hydraulically operated coupling fitted with adaptors to allow automatic and fast coupling to tanker manifold flanges ranging from 16 in. to 24 in. (spools for 10, 12 or 14 to 16 in. are available at the terminal if required).

Gangway: A power operated telescopic personnel gangway is provided at each berth. These gangways can withstand 500 lb. load at mid-span in the extended position.

Meters: 16 in. A. O. Smith positive displacement meters, 16 meters for each platform, capacity of each meter 12,500 b.p.h.

Meter Prover: One 24 in. triple "U" bi-directional mechanical displacement meter prover for each platform. The occurence of each prover is decided bi-yearly utilizing certified volume tanks.

Continuous Crude Oil Gravity Analyzer: There is a number of ARCCO Anulus Model 1-F10 50X liquid gravity analyzers on each loading platform capable of detecting API gravity from 45° to 15°, the output from these analyzers are displayed on the appropriate loading formats and is recorded on charts in the Control Room.

These gravity analyzer are to be checked constantly and re-calibrated bi-yearly according to the manufacturer's recommendations.

A responsible member of the crew must be in contact with the terminal officials at all times.

READINESS: Notice of readiness will be received by INOC representative provided the vessel is ready to load. Lay time will commence 6 hours after receipt of Notice of Readiness berth or no berth.

SAFETY PRECAUTIONS: On arrival at the terminal, INOC Representative will discuss with the Master the "Safety Requirements" letter addressed to him also the Safety Check List.

Attention is also drawn to the Tanker Safety Guide published by the International Chamber of Shipping and to the International Oil Tanker Terminal Safety Guide.

SHIP DOCKING ASSISTANCE SYSTEM: 1 unit for each berth, consisting of speed of approach measuring instrument with fixed wide and narrow beam R.F. heads, a data processor and visual display units when the vessel is within 2 miles of Albakr Terminal. The rotatable R.F. head which is nearest to the vessel shall be aimed to it, during the docking the system will display approaching vessel's velocity.

FRESH WATER: Can be made available by Ports Administration after 24 hours notice from tankers. Water supply is from barges or small water tankers. Notice to be through Agent.

FUEL: May be made available after 72 hours notice through Agent. Supply is direct from small bunker tanker or barges. Bunkering however, not allowed while tanker is on berth and it is allowed only when tanker is waiting for berth or after completion of loading and unberthing.

SHORE LEAVE: Not allowed.

LIGHT DUES: The Iraqi Ports Administration will collect any light dues payable including those due to the Middle East Navigation Aid Service.

REGULATIONS:

(a) Mooring.
"All vessels after arrival, having been moored to the satisfaction of the Harbour Master, shall tend their own anchor cables, ropes, lines and hawsers. It is important for tankers to tend their mooring frequently".
(b) Ship must be ready to move under its own power.
While in berth, ships must be ready to move under their own power in the event of their breaking adrift, catching fire or any other emergency. No repairs are to be carried out while in the berth, which would immobilise the ship or impair her firefighting efficiency.
(c) Cleaning of Boiler Tubes.
Cleaning of boiler tubes alongside the Island Terminal is forbidden.

POLLUTION: No dirty ballast. No oily water or other refuse to be discharged overboard.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master delivered to the representative of the terminal to this effect.

Ashes, oil, oily water or other refuse must not be discharged

overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

Vessels are subject to heavy fines and liabilities for claims arising.

AUTHORITY: All approaches to Albakr Terminal and Khor al Khafja are controlled by the Iraqi Ports Administration.

Cable MAWANI -BASRAH Telex 7008 Ports

Attention is drawn to port rules and bye laws 1942, Quarantine Regulation No. 28 of 1963 and schedules of dues and charges.

The terminal is the property of Iraq National Oil Company (INOC) and is administered and controlled by the said company to facilitate the loading of tankers with Crude Oil.

Cable Address	INOC (Basrah)	- PETROLNA BASRAH

Telex No.	IMTC (Basrah)	- 7009
	IMTC (Baghdad)	- 2207

BASRAH (Maqal and Umm Qasr): 30.31 N. 47.50 E.

DOCUMENTS: On arrival at Pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at Israel port, all Health Certificates of Crew must be valid against cholera and smallpox, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo and heavy lift list (if any).

PILOTAGE: Compulsory. Owners having vessels bound for Basrah should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir Basrah" to arrange Shatt-el-Arab Pilotage. Owners should also put Iraqi Maritime Transport in funds by remittance well in advance of vessel reaching Outer Bar of Shatt-el-Arab in order to cover port tonnage dues, pilotage and dredging dues, for sailing from Outer Bar to Basrah and return.

The pilot boat is located usually in position 29° 45′ 15″ N. 48° 50′ 45″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Maqal and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR on 500 kc/s for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kc/s from YIR or use VHF on Channels 14 and 12. On boarding the river Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. Master to hoist the Iraqi National Flag.

The pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

The Navigation of the Shatt-el-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. fresh water.

Bawarda Anchorage, position about 2 miles below Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 6 miles above Abadan with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 12 miles above Hartha Point with a max. depth of 29 ft. in fresh water.

Khora Anchorage, position about 3 miles from Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

Jubailah Anchorage, position at Basrah Silo about 0.5 below Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

The maximum length between perpendiculars permitted by the Iraqi Ports Administration for vessels in the Shatt-el-Arab River is 560 ft.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet of Tide Tables each year and the movements of vessels in and out of the Shatt-el-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The max. draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Umm Qasr. Although the draft obtainable alongside the wharves is 31 ft. the max. draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

MAX. SIZE: For vessels proceeding to Basrah the max. length between perpendiculars allowed by the Iraqi Ports Administration is 560 ft. There is no restriction on the breadth. The max. draft in fresh water for vessels to and from Basrah is 29 ft.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kc/s. call sign "YIS" requesting free pratique 24 hours before vessel's arrival at pilot station. All crew vaccination certificates should be valid and available for Medical Officer's arrival on board. He will also expect to find a valid Deratisation Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine. Special precautions are taken in case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the Pilot station. The Iraq Government is very sensitive about the spread of cholera and smallpox. Derat Certificate renewable at Basrah.

RADIO: When a vessel is 3 days away from Basrah, radio contact can be established with Basrah Radio, call sign YIR on HF 4, 6, 8, 12 and 16 kHz bands. When the vessel is within 3 days of arrival, Basrah Control Radio (YIR) can be used (transmitting on 500 kHz and receiving on 461.5 or 440 kHz).

List of Coast Stations (Iraq). Summary of Procedures:

1. Whilst inside Iraq territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.
   (a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).
   (b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
   (c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
   (d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.
   (e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.
   (f) Umm Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions:
   (a) Navigational Warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
   (b) North Gulf Weather Forecast is transmitted by:
      1. Basrah Control Radio on:
         440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs. GMT and on request. 8668 kHz at 1330 hrs. GMT and on request.
      2. Khor Al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.
   (c) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Basrah Control Radio (YIR).
   (d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
   (e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao Radio (YIS).
   (f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).
   (g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages. Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answer on*	*Traffic Lists*
H24	500	440 461.5	–
0400–0600	6265.5–6280.5	6493.25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986.5	1505
1600–1800	4177– 4187	4356.5	1705

TUGS: River and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Maqal Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:
(a) Maqal – Plus 12.5 ft. above zero port datum. Port datum is 3.96 ft. above mean zero level at Fao.
(b) Umm Qasr – 24.65 ft. above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:
(a) Maqal: A daily variation of 5 ft. between tides and max. of 8 ft.
(b) Umm Qasr: An average of 12 ft. between tides, and max. of 17 ft.

Maqai (Ma'gal). Wharves have continuous frontage of 2,000 m. depth alongside 9.15 m. Max. length of vessel, 171 m., berthing for 12 vessels.

Umm Qasr. The port is situated at the South end of the Khor Zubair, where it joins the Khor Abdullah. The sea approach to Umm Qasr is some 103 km. in length along the Khor Abdullah, commencing in deep waters of the Gulf near the mouth of the Shatt-el-Arab.

A navigation channel the lowest part of which is 9 m. at LLW and of ample width is well marked with beacons and light buoys from the Shatt-el-Arab entrance pilot vessel to Umm Qasr. Loaded vessels with a draft of 9.75 m. will be able to sail on 2 tides each day

to and from Umm Qasr. Pilot and Harbour Master services are compulsory.

The wharves are of reinforced concrete with a continuous frontage of 640 m. and depth of 9.75 m. at LLW. They are able to accommodate 3 cargo ships at one time. Each berth is 183 m. long. The wharves are provided with a total of 10 electric shore cranes from 3-15 tons capacity. In addition there is a 100 ton floating crane, 2 sea-going tugs and an ample number of mobile cranes, forklifts, eel trucks, tractors, trailers, etc. The Umm Qasr wharves are directly connected with roads and railway lines of the Iraqi Republican Railways.

There are also 2 mooring buoys 247 m. apart.

Fresh water available directly from mains on wharves.

A new project for building more berths is in hand. 5 of these berths are under construction.

3 new steel jetties at Abu Flus directly North of the Fertilizer jetty have been completed. These jetties are served by 6 electric shore cranes of 5 tons capacity. Vessels up to 171 m. long and 8.84 m. draft can lie alongside.

Grain Silo: Capacity 65,000 tons, loading capacity into ship's holds, 1,050 t.p.h. jetty 213 m. long, available for berthing ships up to 183 m. long with a draft of 8.84 m. for loading and unloading of grain.

Muftiyah Jetties: One wooden jetty with limited length owned by Port Authority for distribution of oil products and for the purpose of handling crude and refined oil for local consumption, also for exporting oil products outside Iraq. Also a further new concrete jetty available for berthing vessels 175 m.

Fertilizer Wharf: A modern concrete wharf situated on the banks of Shatt-el-Arab river at Abu Flus with a total length of 100 m., width 10 m., can accept vessels with length 182 m. and draft 8.84 m. It is allocated for the exportation of fertilizers by the State Co. for fertilizers.

Mooring Buoys: There are also 13 mooring buoys, 7 at Ashar, 4 at Sunger and 2 at Abu Al Khasib, 220 m. apart.

CRANES: The wharves are served with 60 electric shore cranes from 1.5 tons to 15 tons capacity and 1 electric shore crane of 60 tons capacity, in addition there are 2 floating cranes one of which is 100 tons capacity capable of lifting direct from ships to railway trucks on the wharves, and the other of 20 tons capacity capable of lifting cargo at a distance of 30 m. from the centre of the jib. Also about 200 pieces of various type of mechanical and electrical handling equipment.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 80 miles).

STEVEDORING: Information of the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio. The average rate of discharge of general cargo at Basrah (Maqal and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships' derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

Bulk Cargoes: Discharged by grab direct to the Dock at Umm Qasr and by suction to the silo at Basrah. The equipment at Basrah is rated at 2,500 L/tons per day discharge and 5,000 L/tons per day loading, but under favourable conditions discharge rate may exceed 3,000 L/tons per day.

VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

MEDICAL: For a vessel in to Basrah (Maqal and Umm Qasr) no advance notice is required, in order to obtain medical attention. Hospital facilities available at the new port hospital and other local hospitals.

For arrival at Basrah it is necessary to hold valid cholera and smallpox certificates.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Maqal and Umm Qasr but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker.

FUEL: Only 1 grade of fuel oil available from the Basrah Refinery, a fuel oil viscosity 200 to 210 Red. No. 1, SG 0.920. Diesel oils also available.

Fuelling is direct if taken alongside Muftiyah Refinery jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah.

(Wine and/or Spirit). Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-el-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

IDENTIFICATION CARDS: All crew members are required to carry with them some form of identification when going on shore.

CONSULS:

Belgium	Tel. 3666	Pakistan	Tel. 3598
Denmark	,, 3205	Sweden	,, 3511
Norway	,, 3511	U.S.A.	,, 4231
Saudi Arabia	,, 3219	India	,, 4824
United Kingdom	,, 4251	Portugal	,, 4469
Greece	,, 3601	U.S.S.R.	,, 5410
Kuwait	,, 2235		

REPAIRS: All types of repairs except major engine repairs can be carried out.

DRY DOCKS: Floating dock available, capacity 4,000 tons. Also slipway, capacity 700 tons.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Maqal Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with International flights.

TIME: Iraq time is 3 hours ahead of GMT and there are no alterations made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The other holidays are: 3 days Id-el-Fitr; 4 days Id-el-Adha; Al Hijaa; Ashura; Birth of the Prophet Mohammad; New Year 1st January; Army Day 6th January; 8th February; 21st March; 1st May Labour Day; 14th July; 17th July.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to the department required.

TELEPHONES: Telephone is placed on board a vessel as soon as secured alongside wharf.

GENERAL: The rain season in Basrah is between November and April and during the Summer months from May to October the temperature can be as high as 55°C. It is important that crew members keep the backs of their necks covered whilst working on deck during the heat of the Summer. The use of salt tablets are recommended during the heat of the Summer.

SPECIAL SERVICES: There is a laundry service available.

SHORE LEAVE: There is no restriction on crew members going on shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that no photography takes place from the ship whilst passing naval or military installations.

DELAYS: As the port of Basrah is considered very well equipped, cargo vessels usually receive a very quick despatch and it is very seldom that a vessel experiences waiting time for a berth for discharging, loading or bunkering. All discharge takes place at the wharves and all loading takes place in midstream at mooring buoys. Where a vessel can load whilst discharging, this is permitted.

AUTHORITY: President State Organisation of Iraqi Ports, Basrah.

AGENTS: The business of Shipping Agencies relating to all ships calling at Iraqi Ports is entrusted solely and exclusively to Iraqi Maritime Transport Co. Ltd. The addresses of Iraqi Maritime Transport Co. Ltd are the following:

Main Office: Iraqi Maritime Transport Co. Ltd., POB 3052, Baghdad/Iraq. Cable address: "Bawakhir", Baghdad.

Basrah Branch: Iraqi Maritime Transport Co. Ltd. POB No. 3, Basrah/Iraq. Cable address: "Bawakhir", Basrah.

FAO: 29.58 N. 48.29 E.

DOCUMENTS: On arrival at Pilot station, vessel requires the following:

Ship's Register.
Letter from Owner confirming that vessel has not called at Israeli Port.
Health Certificates of Crew must be valid against cholera and smallpox.
2 copies Crew List.
2 copies Provision List.
2 copies Manifest.
Dangerous Cargo List, if any.

PILOTAGE: The pilot boat is located in position 29° 46′ 45″ N., 49° 48′ 37″ E., and on arrival vessel should contact Pilot boat immediately for instruction. VHF Channels 14 and 12. Provided Master has given Agent 48 hours' notice of vessel's ETA, Pilot will board immediately. The Pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

ANCHORAGE: On arrival of the Pilot boat vessel can anchor with no depth restriction.

MAX. SIZE: *Tankers* – 675 ft. LOA. Vessels may load to a max. draft of 35 ft. (10.65 m.) depending on the tidal conditions at the time, otherwise to a draft suitable to cross the bar with safety.

HEALTH: Masters are requested to call the Port Medical Officer at Fao on 500 kc/s, call sign "YIS4", requesting free pratique between 8 and 12 hours before vessel's arrival. All crew vaccination certificates should be valid and available for the medical officer's arrival on board. He will also expect to find a valid Deratisation Exemption Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine.

Special precautions are taken in the case of a vessel arriving from an epidemic area and even if the crew are holding valid vaccination certificates the vessel may be delayed at the Pilot station. The Republic of Iraq is very sensitive about the spread of cholera and smallpox.

RADIO: Basrah Radio, call sign "YIR" on high frequencies 4, 6, 8, 12 and 16 bands. Fao Radio, call sign "YIS", traffic control signals on Channel 16, and 500 kHz. Also see Khor-al-Amaya.

Tankers should establish contact with Iraqi National Oil Co. 48 hours before arrival. Call sign RNT. Frequency 6493 kHz.

TUGS: Available on request.

BERTHING: There are 4 loading jetties with a depth of 10.95 m. alongside at LWST. Each jetty has one 60 cm. crude oil delivery line with four 25 cm. flexible hoses. Jetties are floodlit and fitted with fire monitors and four 3 ton SWL cranes. Lengths of berth, 205.75 m. each. Max. draft 10.65 m. Night berthing possible. Loading rates Nos. 2 and 4 jetties average 4,000 t.p.h.

FRESH WATER: Available, rate approximately 10 t.p.h.

REPAIRS: Minor repairs possible.

MEDICAL: No advance notice is required in order to obtain medical attention. Medical units are present at Fao, Umm Qasr and Maqal. A modern hospital containing all the essential units is found at Maqal. Crew in need of special attention or admission may be referred to it by the medical units.

TIME: 3 hours ahead of GMT.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

AGENT: Iraqi Maritime Transport Co. Cables: Bawakhir Fao.

KHOR-AL-AMAYA: 29.46.44 N. 48.48.36 E.

OPERATORS: Basrah Petroleum Company Limited.

LOCATION: Island Terminal about 17 miles out in the Gulf from the mouth of the Shatt-el-Arab River.

ADMINISTRATION: All waters of the Shatt-el-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: *(a) Lights.* One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles: candlepower 7,400.

Red lights are fitted at the 4 extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

The channel between the entrance to the Shatt-el-Arab and the Khor-al-Amaya Sea Island Oil Terminal is marked by buoys and the Shatt-el-Arab Light Vessel (refer to relevant notices issued by the Iraqi Ports Administration, M.E.N.A.S., and Admiralty Notices to Mariners).

(b) Tides. High water at the Terminal may be expected to occur about 20 minutes before high water at the Shatt-el-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed 0.75 knots.

DOCUMENTS:

Crew List (5 copies).

Store List (2 copies).

PILOTAGE: Compulsory. Masters of vessels bound for Khor-al-Amaya Terminal should contact the Pilot vessel which cruises in an area about 2 miles S.E. of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

(a) All vessels using Khor-al-Amaya buoyed channel are reminded that loaded tankers outward bound from Khor-al-Amaya Terminal have top priority in navigating the buoyed channel and all other vessels are to keep clear in all cases.

(b) All inward-bound vessels are to contact Khor-al-Amaya Harbour Master on VHF Channels 16 and 14 before entering Khor-al-Amaya channel for information regarding deeply laden tankers using the restricted channel, and for berthing and anchoring instructions.

(c) Pilotage is compulsory for all inward and outward bound tankers using the Khor-al-Amaya buoyed channel when the draft of the tanker is 15.85 m. (52 ft.) or over.

(d) Tankers arriving to load at Khor-al-Amaya with draft in excess of 15.85 m. (52 ft.) must give their ETA at Shatt-el-Arab Light-vessel at least 12 hours in advance by contacting the Pilot station or Khor-al-Amaya Terminal.

ANCHORAGES: Anchorage areas have been established bounded by lines joining the following positions:

(a) *Anchorage "A"*

(i) 29° 32′ 08″ N. 48° 58′ 59″ E. (iii) 29° 32′ 53″ N. 48° 56′ 56″ E.
(ii) 29° 31′ 24″ N. 48° 58′ 06″ E. (iv) 29° 33′ 14″ N. 48° 57′ 20″ E.

(b) *Anchorage "B"*

(i) 29° 44′ 03″ N. 48° 49′ 34″ E. (iii) 29° 42′ 08″ N. 48° 50′ 18″ E.
(ii) 29° 43′ 52″ N. 48° 49′ 12″ E. (iv) 29° 42′ 21″ N. 48° 50′ 45″ E.

(c) *Anchorage "C"*

(i) 29° 45′ 39″ N. 48° 48′ 41″ E. (iii) 29° 44′ 06″ N. 48° 49′ 31″ E.
(ii) 29° 44′ 28″ N. 48° 47′ 38″ E. (iv) 29° 43′ 35″ N. 48° 48′ 28″ E.

(d) *Temporary Lightering Anchorage*

(i) 29° 46′ 00″ N, 48° 48′ 28 ″ E. (iii) 29° 45′ 34″ N. 48° 46′ 35″ E.
(ii) 29° 45′ 40″ N. 48° 48′ 39 E. (iv) 29° 44′ 06″ N. 48° 47′ 18″ E.

Note:

(i) Anchorages "A" and "B" are for deep-draft vessels of 12.19 m. (40 ft.) and upwards.

(ii) Anchorage "C" is to be used by tankers (laden or in ballast) whose draft does not exceed 12.19 m. (40 ft.).

(iii) The temporary lightering anchorage is for the exclusive use of lighters. No other ships or vessels are to anchor within this area.

MAX. SIZE: 330,000 d.w.t. loading part cargo. Max. LOA: 1,200 ft. Max. draft, 68 ft.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N., Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,356–8,374 and work on 8,374–8,457.5 kHz. Periods 0400–0430 hrs. 0800–0830 hrs. 1200–1230 hrs. 1600–1630 hrs. All times GMT. Services: C.V. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156.80 mHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 mHz).

(b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 mHz) and 461.5 kHz.

(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

(f) Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 mHz) and 500 kHz.

II. Special Instructions.

(a) Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).

(b) North Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs., GMT and on request. 8668 kHz at 1330 hrs., GMT and on request. 2. Khor-al-Amaya Radio on Channel 16 (156.80 mHz) at 0530, 1330 hrs. GMT and on request.

(c) Traffic Control Signals on Channel 16 (156.80 mHz) and on 500 kHz by Basrah Control Radio (YIR).

(d) Traffic Control Signals on Channel 16 (156.80 mHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).

(e) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Fao radio (YIS).

(f) Traffic Control Signals on Channel 16 (156.80 mHz) and 500 kHz by Umm-Qasr Radio (YIU).

(g) Traffic Control Signals on Channel 16 (156.80 mHz) by Khor-al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156.80 mHz), 500 kHz, 4, 6, 8, 12 and 16 mHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Frequencies instruction to pass messages time table 1200–1400 hrs. listen on 8354–8374 answer on 8668 traffic lists 1305.

Note. All messages are changeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: 3 tugs of 4,000 b.h.p. are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 22 m. of water, having 1 tanker berth on one side and 2 berths on the other side with suitable mooring dolphins and platforms ahead and astern which are connected by cat-walks. The orientation is 320°/140°. The max. loading rate, with only 1 berth in use, is 9,000 t.p.h.; with 2 berths in use the max. loading rate at each is 4,500 t.p.h. Fire-fighting towers are provided, also a helicopter platform. Loading by "Woodfield" flow booms offering 4×16 in. and 2 or 4, 12-in. hoses. Vessels of the order of 120,000 d.w.t. can be accepted at berths 5 and 6 and 330,000 d.w.t. max. draft 21 m. at berth No. 7.

The S.G. and A.P.I. and temperature of the crude oil will be supplied to the Master on radio request.

Berthing of tankers: MENAS NOTICE No. 114/74.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth or unberth at the existing Wharf No. 7 in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at Wharf No. 7 and in the S.E. Direction.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth at the proposed Wharf No. 8 and in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at the proposed wharf No. 8 and in the S.E. Direction.

MEDICAL: An Iraqi Ports Administration Medical Dresser will always be available to attend to quarantine matters, deratisation certificates, etc. A doctor can be made available, through vessel's Agent, upon prior request, but necessary to give 24 hours notice to arrange.

FRESH WATER: Available with 24 hours notice.

FUEL: Not available ex-wharf.

CUSTOMS ALLOWANCES: During vessel's stay at Terminal, 1 carton of cigarettes only allowed to each crew member.

SAFETY REGULATIONS: Safety regulations and fire fighting procedures will be discussed with the Master on arrival.
GANGWAYS: Ships must supply their own gangways when alongside. Accommodation ladders and other ship side ladders are not suitable.
REPAIRS: Basrah Petroleum Company has no facilities to undertake ship repair work of any description.
AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.
AGENCY: All Agency work is carried out by the Iraqi State Maritime Transport Company. Cable address: Bawakhir Basrah, or Bawakhir Fao. Masters of tankers should contact the Agent through Basrah Radio Station prior to arrival. Agent's representatives are not housed on the island. Ship's documents for port clearance purposes are passed by them to the Agent for action. Stores and provisions will be sent out by the Agent, given sufficient prior notice.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Israel

ASHDOD (Inc. Ashkelon): 31.49 N. 34.39 E.

DOCUMENTS:
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.
Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 72 and 48 hours before arrival holds workable and gangs required also draft forward and aft on arrival.

PILOTAGE: ETA through Haifa Radio 4XO addressed to Agent at least 12 hours before arrival. Pilot station and boat equipped VHF Channel 14 and 16 contact station for instructions. Pilot boards about 0.5 mile off port entrance between W. to N.W. from breakwater head (green light).

In bad weather, when boarding impossible, vessel is guided into harbour by VHF or tugboat waiting at entrance, at Master's consent.

Pilot ladder as per Safety of Life at Sea. Vessel should head about 4 points into weather. Recommended 2 life lines running along ladder, 1 each side, ropes 2.5–3 in. cir.

ANCHORAGE: All area open sea, no recommended safe anchorage, but vessel should avoid anchorage near fairway and too close to oil installation buoys.

Masters are advised to keep the decks well lit in view of the strong lights ashore which may cause the anchor lights to be seen with difficulty by approaching vessels.

Vessels moored to the breakwaters shall have their anchor lights burning.

RESTRICTIONS: Pilotage available 24 hours. Enter according arrival time or berths available. Vessels at anchorage awaiting berth keep watch Channels 14 and 16.

MAX. SIZE: Draft limitations at Bulk Pier: Summer, 11 m. Winter, 10.5 m. Draft limitations other piers: 9.8 m. No. limits length or breadth. Tankers see below.

HEALTH: Free pratique is requested via Haifa, address, "Quarantine Haifa".

RADIO: Haifa Radio 4XO, also see "Haifa".

TUGS: 1 of 1,500 h.p., 2 of 1,000 h.p. Each charge included in pilotage charge for normal berthing attendance. Tugs await at port entrance and act on Pilot's instructions. Vessel's lines are requested.

TANKERS: Terminal situated at Ashkelon where tankers load crude oil by under-water pipe-lines. Size of vessel is unlimited due to the depth of water. The loading rate is about 30,000 tons in 12 hours. All services such as supply of bunkers, provisions, water, crew changes, must be carried out at Ashdod roadstead where health and immigration officials board. Vessels not requiring any services at Ashdod may call directly at Ashkelon, only paying light dues and anchorage dues.

FRESH WATER: Fresh water supplied by taps at 220 t.p.h. or by barge. Minimum supply is 30 tons.

FUEL: Supplied by trucks, or supplied by special barges. 24 hours advance notice required.

CONSULS: All Consulates in Tel-Aviv approx. 40 km. Available by telephone.

REPAIRS: No dock, but minor repairs effected.

GANGWAY/DECK WATCHMEN: Private companies supply gangway watchmen, obtainable through Agent.

OPENING/CLOSING HATCHES: Performed by stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of GMT.

AIRPORT: Lod, served by regular air lines, distance 35 km.

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; The 2 days of the Jewish New Year (Rosh Hashana); The Day of Atonement (Yom Kippur); The first and the last day of the Feast of Tabernacles (Sucot); The first and the last day of Passover (Pesah); Pentecost (Shvuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire Services, telephone 22222.

DEVELOPMENTS: A new container berth and terminal under construction, become operational 1974.

REGULATIONS:

Stand by for moving vessels: The Master or person for the time being having charge of a vessel shall ensure that adequate officers and crew are available and that the main propelling machinery of the vessel is maintained for moving the vessel at 1 hour's notice.

No vessel may drop steam, dismantle engine or otherwise interfere with the propelling power of the vessel, nor may the vessel be left unattended by responsible officers and crew unless permission to do so is first obtained in writing from the Harbour Master.

Photographing: Photographing in the Port Area is strictly forbidden without a written permit issued by the Security Officer of the Port.

Swimming: Swimming in Ashdod Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of ship's boats: The use of ship's boats is forbidden in Ashdod Port. Launch service is available for the convenience of ship's personnel.

Shore leave: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police.

All breakwaters are out of bounds to crews of merchant vessels.

AUTHORITY: Israel Ports Authority.

AGENT: M. Dizengoff and Co. Ltd., PO Box 4001, Ashdod, Israel. Tel. 2158/7. Telex 03–814, 03–836.

EILAT (Elath): 29.32 N. 34.57 E. **(See Plan)**

DOCUMENTS:
For Customs:
Customs Questionnaire, Crew Customs Declaration, Stores List, Crew List, Passengers List, Foreign Currency List, Narcotics List, Arms List, Import Cargo Manifest, Transit Cargo Manifest.
For Quarantine:
Maritime Declaration of Health, Valid Vaccination Certificate for smallpox all crew and passengers, Deratisation Exemption Certificate.
For Border Control:
1 Police Questionnaire, 2 Crew Lists, 2 Passenger Lists, Seamen's Books and travelling documents of passengers.

PILOTAGE: Compulsory, ordered through Agent. When unable to contact Agent, Pilot can be ordered by contacting Harbour Master by Eilat Radio, or by VHF Channel 14. Vessel due to berth awaits opposite oil installations located approximately 2.5 cables South of the main jetty. Vessels requesting Pilot for anchoring stop opposite the North end of the main jetty. Tankers waiting Pilot for oil installations to stop 0.5 mile South of oil installations. Pilot motor launch, red hull, grey superstructure amidships stationed at North end of main jetty. Pilot ladder complying with all safety regulations and properly lighted during dark hours is necessary. Vessels awaiting Pilot should anchor only in designated area.

ANCHORAGES: Boundaries of area marked by lines connecting following positions;

(A)	29° 32′ 51″ N.	34° 57′ 19″ E.
(B)	29° 32′ 26″ N.	34° 58′ 34″ E.
(C)	29° 31′ 40″ N.	34° 58′ 27″ E.
(D)	29° 32′ 31″ N.	34° 57′ 06″ E.

Average depth 25 fathoms. If arriving at port for first time, do not try anchoring anywhere outside anchoring area.

MAX. SIZE: For berthing alongside main cargo jetty, length 528 m., max. draft up to 39 ft.

Additional cargo jetty length 170 m., max. draft up to 19 ft.

North Oil Jetty accommodates tankers up to 125,000 d.w.t. with draft of 56 ft.

South Oil Jetty can accommodate tankers up to 500,000 d.w.t. Depth of water alongside 94 ft.

HEALTH: Free pratique may be requested by cable via Haifa or via Eilat Radio from Quarantine Authorities. If suspected disease or fever on board immediately advise Quarantine Eilat with all details.

RADIO: Call sign Eilat Radio 4XA. Full details working hours and frequencies found in Admiralty List Radio Signals and similar publications. Good radio connection with Eilat can be obtained also via Haifa Radio, call sign 4XO, operating continuously.

TUGS: Tugs meet vessel off quay. Lines not usually used as tugs usually push. When needed, ship's lines used. 1 tug 2,750 h.p., 1 tug 960 h.p., 1 fire-fighting tug 280 h.p. and 5 tugs 100–180 h.p.

BERTHING: No difficulty except at times of strong Southerly winds when small vessels may have to leave quay and proceed to anchorage or sea, due to strong swell.

Additional cargo quay 662 ft. in length with max. draft alongside of 22 ft. completed and brought into operation.

BULK HANDLING FACILITIES: Bulk elevator for bulk loading (Phosphate & Potash) capacity 800 m. t.p.h.

CRANES: 4 heavy cranes, 25 tons capacity. 2 cranes, 5-10 tons capacity. 1 crane, 15 ton capacity.

STEVEDORES: Booked by ship's Agent. All details of cargo distribution and storage to be cabled in advance to Agent.

MEDICAL: Hospital facilities available. Crew members or passengers must have valid international cert. for smallpox.

DENSITY: 1030.

FRESH WATER: Available in unlimited quantities and supplied at all jetties. No facilities for supplying fresh water at anchorage.

FUEL: All grades supplied in small quantities by road tanker.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Every crew member is permitted to keep 200 cigarettes or equivalent amount of other tobacco, out of bond. Every crew member is permitted to keep 1 bottle of spirits and 1 bottle of wine, out of bond.

IDENTIFICATION CARDS: Every crew member going ashore should have a shore leave pass. Shore leave passes will be received from the border control officer after the vessel is cleared.

CONSULS: There are no consulates in Eilat. All consulates are in Jerusalem or in Tel-Aviv.

REPAIRS: All afloat deck and engine repairs can be performed by local workshops.

DRY DOCKS: Syncrolift with lifting capacity of 1,200 tons.

REPATRIATION: There are all facilities for arranging repatriations or crew changes.

AIRPORT: Eilat Airport is used at present for internal traffic only. There are 8 flights daily from Eilat to Tel-Aviv except on Saturdays. From Tel-Aviv there is good transportation to Lod International Airport.

TIME: Local time is GMT plus 2 hours; no Summer time is kept.

HOLIDAYS: No cargo work is usually performed during official

holidays or Saturdays. The official holidays are: Passover (2 days during April); Independence Day (1 day end April/beginning May); First Harvest Day (1 day end May/beginning June); Jewish New Year (2 days, September); Day of Atonement (1 day end September); Feast of Tabernacles (2 days, October). No cargo work is usually performed during 1st of May although it is not an official holiday.

TELEPHONES: At present there are no facilities to arrange telephones on board ships.

SHORE LEAVE: Crew members are granted shore leave.

DELAYS: Normally vessels arriving after midnight are berthed only at daybreak, before the beginning of the morning shift.

AUTHORITY: Israel Port Authorities.

AGENT: M. Dizengoff and Co. Ltd., PO Box 11, Eilat. Tel. 2146–7. Telex No. 07729. Also Lloyd's Agent.

HAIFA: 32.49 N. 35.00 E.

DOCUMENTS:

1 Photograph of each member of the crew.
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.

Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 78 hours before arrival holds workable and gangs required, also draft forward and aft on arrival.

PILOTAGE: Compulsory for all merchant and foreign naval vessels. Pilotage service is rendered round the clock. Vessels are boarded by Pilot seaward of the main breakwater.

ANCHORAGE: Vessels shall not anchor within the prohibited areas and must keep clear of the fairways of the main harbour and Kishon Zone.

MAX. SIZE: The width of the entrance channel to the main port, between the main and lee breakwaters, is 183 m. The depth of the entrance is 12 m. The width of the entrance to the Kishon Harbour is 70 m., with a min depth of 8.50 m. Vessels of max. draft 35 ft. can be safely accommodated in the main port: in the Kishon Harbour accommodation is limited to vessels of 27 ft. draft. Depth in both harbours are maintained by dredging at regular intervals.

Tankers: Up to 50 ft. draft at buoy moorings.

RADIO: Radio-telephone service from ship-to-shore and vice versa via Haifa Radio, call sign 4XO. Ships in port may also be connected to the Israeli telephone system.

The port has a signal station equipped with a modern 60 kw VHF installation, working on Channels 12, 14 and 16. The station is licensed for port operation only and is in continuous service. For all other ship-to-shore communication contact Haifa Radio, call sign 4XO.

The Israeli Meteorological Service broadcasts twice daily the weather forecast in English for East Mediterranean area over Haifa Radio.

Vessels approaching the coast of Israel shall report their position to the Israeli Authorities in accordance with the following procedure:

(a) Every foreign vessel bound for the ports of Haifa, Ashdod, Ashkelon or Gaza, shall send a position report to the Israeli Ministry of Transport (IMOT) via Haifa Radio (4XO). Such position report should be sent in the form of a free of charge service cable when the vessel arrives at a distance of 50 miles from the coast and it shall contain vessel's name, position, course, speed and destination.

(b) In addition to the report, in *(a)* above and according to the ports' regulations, every vessel (foreign or Israeli) entering the Israeli territorial waters shall send a position report which shall contain vessel's name, position, course, speed and destination and which shall be sent at the time the vessel enters territorial waters (12 miles) to:

(1) The nearest Port Operation Services, by means of VHF; or
(2) The IMOT via Haifa Radio (free of charge service cable) in cases where VHF communication with the nearest port cannot be established.

HEALTH: Free pratique by radio is granted on request by the International Quarantine Message to the Quarantine Station round the clock (including holidays) via Haifa Radio, call sign 4XO on 500 kc/s.

Medical advice by radio for all ships may be obtained through Haifa Radio 4XO free of charge. Call "Medico Haifa".

There is no special quarantine anchorage.

Vaccination against smallpox is required from arrivals, except those who were resident in a European country, in Canada or in the U.S.A. for more than 14 days before disembarkation in Israel, provided those countries are free from smallpox.

TUGS: Vessels obtain tug assistance, if required, for entering or leaving the harbour and for shifting. 2 tugs of 1,500 h.p. 1 of 1,000 h.p. and 1 of 500 h.p.

BERTHING: Ships moor normally to wharves and jetties, and to a lesser extent stern to the main breakwater and alongside dolphins.

Main Harbour

The main harbour is situated on the Southern shore of Haifa Bay at Lat. 72° 48′ N., Long. 35° 01′ E. It is protected by 2 breakwaters: the main breakwater, 2,210 m. long, in the North, and the lee breakwater, 745 m. long, in the East.

The harbour basin covers an area of 1,050,000 sq.m. (about 260 acres). The main port's land area amounts to 630,000 sq.m. (about 155 acres).

Kishon Auxiliary Harbour

To the East of the main port, around the lower reaches of the Kishon rivulet, lies the Kishon Auxiliary Harbour. It consists of an outer harbour basin that is protected by 2 breakwaters of 600 m. and 350 m. length respectively, and a main channel of 1,045 m. length, of which the first stretch of 700 m., measured from the entrance to the outer harbour basin, has a depth of 8 m. while the second stretch of 345 m. has a depth of 6.50 m. A side channel, 213 m. long and 4 m. deep, which branches off the main channel toward the East, serves as a fishing dock. Another side channel 350 m. long and 8 m. deep serves as holding basin of the shipyard and the Chemicals Terminal.

Wharves

	Length metres	*Depth metres*
Main Port

Kishon Zone		
Cargo Wharf	355	6.5
	285	8.0
Fishing Dock	213	4.0
Chemicals Wharf	325	8.5

BULK HANDLING FACILITIES: *Coal:* Coal imports are usually handled by grabs fixed to shore cranes.

Grain: 2 mobile elevators on main wharf with combined unloading capacity of 465 t.p.h. A third elevator has a nominal capacity of 600 t.p.h. and is operating at 300 t.p.h. in the 1st Phase.

Chemicals: Chemicals in liquid bulk unloaded and loaded at chemical tank farm in Kishon Zone. Terminal jetty suitable for tankers up to 20,000 d.w.t. with draft 22 ft. 6 in. Storage capacity 45,000 cu.m.

Containers: Presently containers are discharged and loaded in the Western area of the port, having all facilities to handle 20 ft. and 40 ft. containers. A container terminal is in the process of being established in the Eastern part annexed to the Oil Dock Breakwater. All container handling equipment available.

CRANES:

	No.	*Capacity (Tons)*	*Radius (m.)*
Floating Derrick	1	100

Gantry Cranes	1	35	32	26.5
	No.	*Capacity (tons)*		
Rubber-tyred	2	30.5		
Portal Cranes	3	40		

TANKERS: Up to 4 oil tankers can be accommodated at one time at the Oil Jetty, 2 on each side (draft 28 ft.–33 ft.).

In the Roadstead.

There are 3 submarine oil loading and unloading berths, each connected to a submerged pipe-line, 2 to 12 in. dia. pipe-lines and 1 to a 32 in. dia. pipe-line.

Berth No.	*Situation in relation to harb. entrance*	*Diameter*	*Extension from shore*	*Direction*	*Depth under water*
1	1.75 m. N.E.	12 in.	4,200 ft.	307°	52 ft.
2	1.25 m. N.E.	12 in.	4,500 ft.	290°	52 ft.
3	0.50 m. N.E.	32 in.	10,000 ft.	319°	58 ft.

The signal station ashore opposite berth No. 3 has 2 signal masts. Vessels moor with their own 2 anchors ahead and mooring lines to 2 buoys astern. The Oil Company's Mooring Master acts as a Pilot until the vessel is moored and supervises the connecting and loading or discharging, remaining aboard until sailing time.

Throughput Rates

Vessels load or unload up to 1,000 t.p.h. through 10 in./12 in. pipe-lines on the Oil Jetty and up to 700 t.p.h. at the 12 in. pipe-line submarine berths. The 32 in. pipe-line berth is destined for loading or unloading supertankers at the rate of up to 2,000 t.p.h.

MEDICAL: Hospital facilities available. Agent will board vessel with company doctor if so required by the Master.

FRESH WATER: Drinking water is plentiful and of satisfactory

quality; no treatment is needed as water is frequently examined and chlorinated when required. The water is supplied by hydrants from shore or by water-barge at a delivery rate of 30–50 t.p.h. Boiler water not available.

FUEL: The following grades of oil are available for supply as bunkers:

Heavy Fuel Oil	1,500 secs. Red. 1 at 100° F.
Light Fuel Oil	450 secs. Red. 1 at 100° F.
Marine Diesel Oil	Standard Grade

The oil is supplied direct from Oil Dock or from barges. Bunkers are normally supplied between 0700 and 1515 hrs. on working days; at any other time by special arrangement. Delivery rate from Oil Dock is up to 500 t.p.h. (3,500 bbls.) and from barges up to 150 t.p.h. (1,000 bbls.)

REPAIRS: Israel Shipyards Ltd. run a modern shipyard, situated in the Kishon Zone, capable of building ships of up to 25,000 d.w.t. and to handle hull repairs, conversions, engine repairs and repairs of electric equipment.

The yard operates 2 floating docks with a lifting capacity of 7,500 and 1,100 tons respectively.

Vessels which need no dry docking can be repaired at the shipyard's quay, totalling 400 m. length with 7–8 m. depth. Ogen Ltd. also undertake ship repairs.

Floating Dock with lifting capacity of 20,000 tons near completion.

STEVEDORES: Enable Agent order gangs, important obtain 48 hours advance accurate ETA from vessel. Failure give precise ETA may result in ship losing 12/24 hours, also cost gang waiting time. No work on official holidays.

Working Hours

Work is usually carried on in 2 shifts: the first shift is from 0630 to 1430 hrs., on ordinary working days, or from 0630 to 1330 hrs. on the eve of Saturdays and holidays. The second shift is from 1530 to 2230 hrs. on ordinary working days and from 1330 to 2030 hrs. on the eve of Saturdays and holidays. Occasionally, in order to complete work on a ship or for special cargoes, a third shift is worked.

GANGWAY/DECK WATCHMEN: Not compulsory. Port guard keeps gangway watch.

OPENING/CLOSING HATCHES: Performed by Stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, and 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of G.M.T.

AIRPORT: International air connection from Lod Airport, 105 km. from Haifa.

CONSULS:

Austrian	Liberian
Belgian	Norwegian
Ivory Coast	Spanish
Guatemala	Finnish
Danish	Panamanian
Holland	French
Yugoslavian	Swedish
Greek	

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; the 2 days of the Jewish New Year (Rosh Hashana); the Day of Atonement (Yom Kippur); the first and the last day of the Feast of Tabernacles (Succot); the first and the last day of Passover (Pesach); Pentecost (Shevuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

GENERAL:

Persons Boarding Vessels

No person shall be allowed on board any vessel unless he is in possession of a boarding pass which must be shown on demand to the police officer at the gangway.

Passes for boarding cargo vessels on business are issued by the Port Management; passes for boarding cargo vessels for any other purpose and passes for boarding passenger vessels are issued by the Frontier Control Section of the Port Police.

Swimming

Swimming in Haifa Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of Ship's Boats

The use of ship's boats is forbidden in Haifa Port. A public motor-launch service is available for the convenience of ship's personnel. The signal to call the motor-launch is as follows:

By day: The international Code of Signals Flag "N" hoisted at the yard.

By night: Repeated flashing light signalling of the International Morse Signal "N".

Photographing

Photographing in the port area is strictly forbidden without a written permit issued by the Commander of the Port Guard.

SHORE LEAVE: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police. All shore leave passes must be surrendered to the Boarding Officer before departure of the vessel.

DEVELOPMENTS: Two projects, running concurrently, form the first stage of the development. One of the projects refers to the construction of a new Container Terminal within a specially designed containerships basin outside the existing breakwaters. The second project deals with the deepening and extension of the Kishon basin.

The Container Terminal will consist of 800 m. of quay front, with water depth reaching 14 m. below M.S.L. and a land area covering over 30 hectares.

The Kishon basin development provides for the construction of a 600 m. extension to the existing quay, which itself will be reconstructed and deepened. The extension, with the water depth reaching 11 m. below M.S.L., will provide specialized berths for handling scrap iron, logs and unitized timber.

The Kishon basin extension will make it possible to proceed with the development of the Industrial Port and Free Zones within the Kishon area of Haifa Port, where an inland Auxiliary Distribution Centre, covering an area of some 20 hectares is under construction.

Both the Container Terminal and the Kishon Basin projects are in advanced stages of detailed planning and their completion is expected toward the end of 1978.

AUTHORITY: Israel Ports Authority.

AGENT: Messrs. M. Dizengoff and Co. Ltd., POB 300, Haifa. Telegrams: Diship, Haifa. Telephone No. 43371. Inland Telex No. 044827. International Telex No., Haifa 044814/044815 (2 lines).

NOTES

Italy

ANCONA: 43.37 N. 13.32 E.

DOCUMENTS:
4 copies Crew Lists.
1 copy Provisions List.
1 copy B/L every set.
1 copy General Cargo Manifest.
3 copies Crew Dutiable Articles (slop-goods).
5 copies Passenger List (in transit or not).

PILOTAGE: Pilot usually boards vessel range 1-2 miles from harbour's entrance (red light) in fine weather conditions. Pilot house situated near the "red light" – pilot boat of international type. If bad weather Pilot boards vessel at harbour's entrance. Compulsory for vessels over 500 g.r.t.

ANCHORAGES: In Ancona roads at Master's discretion (Pilot available for anchorage).

RESTRICTIONS: Tankers berthed in daytime only.

MAX. SIZE: Falconara Oil Terminal: up to 44 ft. draft.
Ferruzzi Silos: up to 30 ft. draft.
General Cargo Berths: up to 28 ft. 6 in. draft.

HEALTH: Sanitary pratique obtainable by radio according International Rules by cabling "Sanimare Ancona" between 12 to 6 hrs. before arrival.

RADIO: Ancona Radio "ICA" – frequency 500 kc/s. – working frequency 489 kc/s. By radio-telephone: Ancona Radio PT "IPA", kc/s 2182. (Service for VHF to be installed within a short period of time.)

TUGS: Usually join vessel at harbour entrance – ship's lines used, compulsory for vessels of over 3,500 g.r.t.

STEVEDORES: ETA usually tendered to Agent 72/48/24 hrs. prior arrival in order arrange gangs.

MEDICAL: Assistance available if required.

BULK HANDLING FACILITIES: *Grain:* Silos operated by Ferruzzi and ICIC. Discharging rate 2,500 metric tons per 16 hours.

Silos owned by S.A.I., S.O.A., at dock 21. Draft, 28 ft. 12 vertical silos of 1,500 ton grain capacity and 4 inside service cells of 1,000 tons capacity. Fittings are provided for loading and discharging any kind of grain with Vacuvator pumps, each one of about 150 t.p.h. capacity.

Ore: Discharging rate 1,200 metric tons each shift of 8 hrs.

TANKERS: *Falconara Oil Terminal.* Owned by Anonima Petroli Italiana S.P.A. 1 hose of 16 in., 1 hose of 12 in., 2 hoses of 14 in., 1 hose of 8 in. (for bunker), 1 hose of 4 in. (for water), 1 flying hose for fresh water about 70 mm., 1 flying hose for bunker of 100 mm.

Permitted draft up to 42 ft.

Sea Buoy Berth. Situated 600 m. N.W. of the terminal, for discharging crude oil. 7 pipe-lines with the following size: 1 for fresh water (3 in.), 1 for crude oil (300 mm.), 1 for fuel oil (200 mm.), 1 for gas oil and diesel marine (200 mm.), 1 for gasoline (200 mm.), 1 for gasoline (300 mm.).

Permitted draft is about 44 ft.

Jetty: A tanker berth is situated at 300 m. from the end of the jetty, used for vessels with draft not over 19-20 ft.; 1 pipe-line of 200 mm. for gasoline. A further berth at the pier is being constructed to take vessels with draft not over 26 ft.

FRESH WATER: Available from quay. Straight time plus increase for overtime and holidays.

FUEL: All grades available. (Note: marine diesel obtainable not distilled but mixed fuel/gas oil.) Delivered by pipe-line or barge.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Optional crew or stevedores.

CERTIFICATES:
Radio Telegraphy.
Load Line.
Tonnage.
Class.
Registry Safety Equipment.
Derating, etc.
Italian Anchorage Dues Bill, if already paid.

CUSTOMS ALLOWANCES: Tobacco. 50 cigarettes for each man during vessel's stay at Ancona – British/U.S.A. flag vessels may obtain after a certain period of stay another ration of 50 cigarettes per man. Seals cannot be opened. Wines/vermouths/beer no restrictions. Spirits three quarter bottle depending on the number of crew.

IDENTIFICATION CARDS: Passport or seamen's book required.

CONSULS:
Swedish Consul, tel. 23252.
French Consular Attache, tel. 22879.

REPAIRS: Minor engine/electrical, carpentry repairs can be effected.

DRY DOCKS: 1 for up to 500 d.w.t.

REPATRIATION: From April to October weekly regular lines to Greece/Yugoslavia/Cyprus/Israel every fourth night.

AIRPORT: Falconara – 14 km. from Ancona. Direct flight to Rome/Milano, connection for international flights.

TIME: In Winter plus 1 hour to GMT. In Summer 2 hours to GMT.

HOLIDAYS: National and local holidays: 1st January, 6th January, 19th March, 25th April, 1st May, 4th May (local), Easter and day after Easter, Ascension Day, Corpus Christi, 2nd June, 29th June, 15th August, 1st November, 4th November, 8th December, 25th-26th December. Work can be arranged if required in time and subject to Harbour Master agreement.

POLICE/AMBULANCE/FIRE: Port Police, tel. 31030; Fire Station, Port, tel. 31715; Red Cross, tel. 23332; Yellow Cross, tel. 22680.

TELEPHONES: No facilities for connecting to vessels.

GENERAL: All tankers proceeding to Falconara must approach Ancona roadstead for Pilot and pratique.

AUTHORITY: Il Comandante, Colonello di Porto, Ancona.

AUGUSTA (Including Priolo): 37.13 N. 15.14 E.

LOCATION: The bay is divided into 3 parts: Port Xifonio, the old port, once used by small vessels, now sometimes used for anchorage of ships which cannot come into the port Megarese. Port Megarese, where there are oil installations and other works. Priolo's cove, industrial zone. Priolo is the place name used to indicate the area of the Montedison installations.

DOCUMENTS:
Crew Lists (at least 6 copies).
Custom Manifest.
Passenger Lists (6 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.

Can be presented as an information note on the arrival of the ship to the Harbour Master. This note can be broadcast by radio or telegraph. This facilitated procedure is suspensible by Harbour Master in case of particular events and, by request, these documents must be sent in:
Certificate of Registry.
Cargo and Gear Safety Certificates.
Radio Safety Certificates.
Safety Construction Certificate.

PILOTAGE: Compulsory for vessels over 500 tons (gross tonnage). Pilot available day and night. Vessels requiring a Pilot should display appropriate International Code Signals, should approach about 1 mile from the principal entrance. Pilot boat is black with a white band, letter "P" is painted in amber on each side of the bow. Pilot boards about 1 mile from main entrance. In bad weather the launch will wait inside the breakwater by the main entrance. Pilot station telegraphic address is Augusta Piloti. ETA should be given 12 hours in advance. Vessels with VHF can contact Augusta Piloti on Channel 12.

APPROACHES: Entrance is from the East, between central and Northern breakwaters, with leading lights in a line approx. 274°. Entrance is about 400 m. in width, with a depth over 35 m. in the middle, and may be used day or night.

Another entrance from S.E. between central and Southern breakwaters used only for small ships or emergency is about 300 m. in width, with a depth of 11 m.

ANCHORAGE: Inside the breakwaters, in the central zone, the depth of water is not less than 22.40 m., and is possible to receive many ships, including the VLCC.

MAX. SIZE: Up to 65 ft. draft at Montedison new supertanker jetty, capable of receiving vessels up to 130,000 g.r.t.

HEALTH: Pratique may be allowed by radio, request to Sanimare Augusta 24 hours prior arrival. If not requested by radio, pratique is given on arrival but only during daylight. Pratique is automatic for vessels coming from an Italian port and Common Market European Ports.

RADIO: R.T.: Augusta Radio listening on 2182 kc/s. Working on 1643 and 2260 (24 hours a day).

V.H.F.: Augusta Radio (Ch.16) Between 0000 and 2400 hrs. working.
Harbour Master (Ch.16) Working 24 hrs. a day.
Pilots (Ch.12) Working 24 hrs. a day.
Tugs and Liners (Ch. 8) Working 24 hrs. a day.
Taxi-boats (Ch.10) From 0600 to 2400 hrs.

TUGS: Available, join vessel inside breakwater entrance. H.p. varying from 750 to 3,000.

BERTHING: *Shell Pier:* Berth Nos. 1, 2 and 3 at a finger jetty with depths of 12, 28 and 12 ft. respectively and used by coasters and bunkering barges.

Punta Cugno: Northern Jetty: Berth No. 3 Liquichimica, used for discharging and loading chemical products by Liquichimica factory. Accepts vessels up to 3,000 g.r.t. with depth 17ft. 09 in. Mooring alongside. Southern jetty: Berth No. 4, used by Esso Bunker barges. Berth No. 5, used by Liquichimica factory, for vessels up to 15,000 g.r.t., which are moored by the stern with bow anchors. Depth 30 ft. Berth No. 5bis, is at Steel Island used for chemical products discharging and loading. Ships moored by the stern with 2 anchors. Depth 22 ft.

Esso: Pier No. 1: Length of pier about 740 m. Heading 110°.

Berth No. 6: Depth 16 ft., used by small tankers loading gasoline (regular, premium, Jet A 1), gasoil, bitumen, fuel oil, LPG, 4 pipe-lines at berth. Connection of 4 in. for LPG, loading rate about 300 t.p.h.; 6 in. for white products, loading rate 150 t.p.h.; 6 in. for black products, loading rate 150 t.p.h. Gangway ashore.

Berth No. 7: Depth 25 ft., vessel moored by the stern. 3 pipe-lines with connection of 6 in. Loading rate 150 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore.

Berth No. 8: Depth 36 ft., for ships about 20,000 g.r.t. 4 pipe-lines at berth with connections 8 in. (2 for white products and 2 for black products). Loading of same products as No. 7. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, depth 52 ft., receiving tankers up to 50,000 g.r.t. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6

in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 75,000 g.r.t. Loading of all products as No. 10 except lube oil. Connections 10 in.

At about 400 m. from end platform there are 2 smaller platforms (Berth No. 9 and 12).

Berth No. 9: Depth 28 ft., receiving tankers up to 7,000 g.r.t. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 8 in.

Berth No. 12: Depth 28 ft. for tankers up to 10,000 g.r.t. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Cement: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day.

N.A.T.O. Pier: Berths No. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

Montedison: Montedison Supertanker Jetty: For vessels up to130,000 g.r.t. Depths vary from 13 ft. to 65 ft. Berths Nos. 17 to 24. Montedison Jetty: Berth No. 25, depth 43 ft. and Berth No. 26, depth 38 ft. Steel Island: Berth No. 27, depth 33 ft., for vessels up to 20,000 g.r.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line.

Montedison concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, depth 18 ft., for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, depth 30 ft., for vessels up to 15,000 g.r.t. Berth No. 31, depth 31 ft. 06 in., for vessels up to 20,000 g.r.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, depth 13 ft., for small tankers only.

New Montedison jetty (carichi liquidi): Is situated in Priolo's cove. Chemical products are handled. Berth No. 33, depth 17 ft. for vessels up to 1,700 g.r.t. Berth No. 34, depth 25 ft., for vessels up to 5,000 g.r.t. Berth No. 35, depth 25 ft. and No. 36 with a depth of 12 ft.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.

TANKERS: See "Berthing".

DENSITY: 1024 to 1026.

FRESH WATER: Available by barge.

FUEL: All grades available by pipe-line or barge; suppliers Esso, Shell, B.P., Agip, Gulf. 48 hours notice required.

DEVELOPMENTS: A new pier for larger tankers will be constructed by Liquichimica at Punta Cugno. It is also planned to extend the Esso Pier No. 1.

GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Shore passes given by local police.

CONSULS:

Liberia. Tel. 975341.
Norway. Tel. 975182.

REPAIRS: No repairs permitted while alongside tanker berths. May be done in the anchorage subject permission of port authorities.

DRY DOCKS: E.B.A. Company. Floating Dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons.

REPATRIATION: No difficulties.

AIRPORT: Nearest at Catania, can be reached in 40 minutes by car. Daily flights to Rome and Milan for international connections.

TIME: GMT plus 1 hour. Summer time, May to September, GMT plus 2 hours.

HOLIDAYS: Tankers not affected. 1st January; 6th January; 19th March; Easter Monday; 25th April; Ascension Day; Corpus Domini; 15th August; 4th November; 8th December; 25th December.

POLICE/FIRE/AMBULANCE: Police, Tel. 975555; Ambulance, 975000; Fire, 974777.

TELEPHONES: Situated at all berths. No direct connection to vessels.

SHORE LEAVE: Allowed at all times.

AUTHORITY: Capitaneria di Porto.

BAGNOLI: 40.48 N. 14.10 E.

DOCUMENTS: An arrival report is required wherein are indicated main particulars of vessels entering. All vessels coming from abroad and/or from another Italian port must have ready before arrival following documents:

5 Crew Lists.
5 Passenger Lists.
Store List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Pilot is available any time of day. Usually boards vessels 3 miles out of port. Vessels requesting pilot service to use flag, sound morse signal "G". No VHF available. Pilotage is compulsory for anchorage. Full pilotage fee is due even if anchored without Pilot. On departure 30 minutes will be sufficient notice for having Pilot and tugs ready. In case of bad weather (Bagnoli area is exposed to S.S.W. winds) vessels to shift out of piers or change anchorage into Baia roads (sheltered natural bay 3 miles from Bagnoli in direction West).

ANCHORAGE: Depths ranging from 11 to 15 m. Sandy bottom.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: Draft 40 ft., largest vessel allowed is 80,000 tons d.w.t.

HEALTH: Free pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimar, Naples.

RADIO: Naples Radio.

TUGS: 1 tug available, if more required they come from Naples. Time taken approximately 2 hours.

BERTHING: 1 pier length 357 m. Max. depth 41 ft. 3 in.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge.

FUEL: All types available always delivered by barge, 48 hours notice required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS/ALLOWANCE: Tobacco, 50 cigarettes per crew member. Wine/spirit, 1 bottle opened.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Small repairs undertaken.

TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.

HOLIDAYS: See "Naples".

POLICE/AMBULANCE/FIRE: Police 602553; Ambulance 520696; Fire 330210; Port Office 602564.

SHORE LEAVE: Allowed.

AUTHORITY: Ente Autonomo del Porto di Napoli.

BARI: 41.08 N. 16.52 E.

DOCUMENTS: On arrival:

5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.

PILOTAGE: Pilot boards vessels on arrival by motor-boat near harbour entry, outer buoy. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.

ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Not allowed to anchor in fairway except in case of emergency. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.

RESTRICTIONS: Max. depth at harbour entrance 40ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.

HEALTH: Masters can request free pratique by radio by applying to "Sanimare Bari". Free pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.

RADIO: Radio Roma, call sign "IAR."

TUGS: Tugs normally join vessel outside harbour entrance. Towage service is carried out by following tug-boats belonging to "Rimorchiatori Napoletani": *Camaldoli* of 674 I.H.P.; *Citta di Trieste* of 812 I.H.P.; *Mastino* of 1,105 I.H.P. Basic tariff is increased by 20% when the towage rope is given by tug-boat.

BERTHING: When specific side alongside berth is required by stevedores, Agents radio Master prior arrival and advise Pilot. Otherwise side alongside at Master's option after conferring with Pilot. Depth at piers 20/38 ft. dependent location. No shore fenders alongside quays.

BULK HANDLING FACILITIES: Grain discharge by 2 suction pipes at rate of 90 to 100 metric t.p.h. each.

STEVEDORES: Important to give ETA in good time. Normal working hours: Winter time (weekdays), 0800–1200 hrs., 1300–1700 hrs. Saturdays, 0800–1300 hrs. Summer time (weekdays), 0800–1200 hrs., 1400–1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 to 0800 hrs. the tariff to be increased 25%; 1200 to 1300 hrs., 50%; 1700 to 2000 hrs., 25%; 2000 to 0600 hrs., 70%.

For handling pieces over 1,000 kilos, increase of 50% on the tariff. For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 to 0800 hrs. the tariff to be increased 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

MEDICAL: Not necessary for Agents to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: Not allowed to do any degassing of tanks or any kind of repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspection

of tankers and gas-free certificate can be obtained. Only clean ballast can be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. pipe-line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline.

Crude oil discharged to Stanic refinery from Berths No. 31 and No. 4 (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 32, 33 and 34.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths served with hydrants. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended: shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permitted to be held out of bond but no spirits allowance permitted.

IDENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

Great Britain	Holland
France	Spain
Belgium	Germany
Portugal	Norway
Liberia	Turkey
Sweden	Monaco
Denmark	Ethiopia
Switzerland	Bolivia
Greece	Austria

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Ascension Day; Corpus Domini; St. Nicholas (9th May); St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff increased as follows:

From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police, 214116; Ambulance, 246552, 341217; Fire, 212518.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

AUTHORITY: Capitaneria di Porto.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each Crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's tonnage.
Load Line Certificate.
Deratisation Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of Pilot station is "Piloti Porto, Brindisi". No ETA required for Pilots as station not equipped with wireless apparatus. Characteristics of Pilot boat: gross tonnage, 9.4; power, 65 hp; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having a draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (centrigrade), 16/20; specific weight, .950/960. Gasoil, viscosity Engler at 20° (centigrade), 1.4; specific weight, .830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

DEVELOPMENTS: Under construction: 1 pier in outer harbour, which is scheduled to be 200 m. in length (219 yards) with a depth of 12 m. (39 ft. 4 in.).

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: For vessels over 500 tons effecting international voyages:

(a) Passenger vessels:
Safety Certificate.
Radio and Radiophone Certificates (latter if included in vessel's equipment).

(b) Freighters:
Safety Construction Certificate.
Safety Equipment Certificate.
Radio and Radiophone Certificates.

CUSTOMS ALLOWANCES: 50 cigarettes a day for each crew member, if vessel's stay in port exceeds 24 hours. No allowance if stay is shorter than 24 hours. Third of a bottle of liqueurs only.

IDENTIFICATION CARDS: Not particularly needed besides regular seaman's books.

CONSULS: Vice-Consulate of Denmark, Portugal and Holland, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

REPATRIATION: Adequate facilities exist for effecting crew changes and repatriations as necessary.

AIRPORT: Distance from local airport 5 km. (3 miles). Airport regularly served by Alitalia Airline, ensuring 2 daily flights to Rome and 1 daily flight to other Italian cities, including, among others; Naples, Catania, Palermo, Cagliari, and other destinations via Rome. Direct international flights not scheduled from Brindisi.

TIME: Local time 1 hour ahead of GMT (generally from early June to end September), 2 hours ahead of GMT (Summer time).

HOLIDAYS: Officially recognised. Both national and religious holidays include: Sundays; New Year's Day; Epiphany (6th Jan.); St. Joseph's Name Day (19th March); Easter (Easter Monday); Anniversary of Liberation (25th April); Labour Day (1st May);

Ascension, Corpus Domini (oscillating dates); Proclamation of the Italian Republic (2nd June); the Saints Peter and Paul Name Day (29th June); Assumption (15th August); All Saints' Day (1st Nov.); National Unity (4th Nov.); the Virgin Immaculate Conception (8th Dec.); Christmas, Boxing Day.
POLICE/AMBULANCE/FIRE: Police, 25555; Ambulance, 21310; Fire, 21222.
TELEPHONES: No current arrangements existing for placing telephones on board.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante del Porto di Brindisi.

CAGLIARI Sardinia (including Sarroch): (See Plan) 39.05 N. 09.01 E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
2 Provisions Manifests.
2 Manifests of crew personal effects.
Cargo Manifest.
Bills of Lading.
2 Arrival Reports, completed on arrival.
Maritime Declaration of Health, completed on arrival.
Ship's Certificates including Italian anchorage dues.
Vaccination Certificates for sighting.
PILOTAGE: Compulsory for vessels over 500 tons. Requested by ship's Agents. Vessels should wait in the roads for Pilot to board. International Code signals used for calling Pilot. Pilot station telephone number: 652929. Pilot boards tankers about 2 miles East of oil terminal.
Sarroch. Compulsory for all tankers. Vessels should wait in roads as follows:
G1 – (for tankers of more than 42 ft. draft) Lat. 39° 05′ 00″ N. Long. 09° 05′ 00″ E.
G2 – (for tankers of less than 42 ft. draft) Lat. 39° 04′ 27″ N. Long. 09° 03′ 15″ E.
G3 – (for tankers of less than 5000 g.r.t.) Lat. 39° 05′ 48″ N. Long. 09° 02′ 00″ E.
Pilot station telephone number 929006–929057. VHF Channel 16.
ANCHORAGE: All of the roads is available for anchorage except where prohibited zones indicated on charts.
MAX. SIZE: Cagliari port. Max. draft 26 ft. Sarroch, SARAS Terminal, tankers up to 100,000 d.w.t. Max. draft 57 ft.
HEALTH: Free pratique may be requested by radio to Sanimare Cagliari between 12 to 6 hours prior arrival advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K. France, Belgium, Holland, W. Germany and Greece.
RADIO: Cagliari Radio operating continuously on 2182 kHz., and on 156.8 mHz.
VHF: *Cagliari.* Harbour Master's Office, Channel 16.
Sarroch. Harbour Master's Office, Channel 16. Pilot station, Channel 16. Mooring station, Channel 6. Boat Service station, Channel 8.
TUGS: 6 available, of up to 2,000 h.p.
Cagliari. Normally join vessels at the port entrance.
Sarroch. Normally join tankers at anchorage points and assist berthing at Saras Jetties Terminal.
BERTHING: *Cagliari*
Berth No. 1: Length 68.0 m.; draft 14 ft.
Berth No. 2: Length 128.0 m.; draft 24 ft.
Berth No. 3: Length 227.0 m.; draft 21 ft.
Berth No. 4: Length 123.7 m.; draft 18 ft. 03 in.
Berth No. 5: Length 60.3 m.; draft 18 ft. 03 in.
Berth No. 6: Length 116.8 m.; draft 8 ft.
Berth No. 7: Length 92.6 m.; draft 16 ft. 06 in.
Berth No. 8: Length 278.6 m.; draft 23 ft.
Berth No. 9: Length 325.8 m.; draft 24 ft.
Berth No. 10: Length 328.0 m.; draft 26 ft. 06 in.
Berth No. 11: Length 203.2 m.; draft 26 ft. 06 in.
Berth Numbers 2, 3 and 4 reserved daily for passenger ships.
TANKERS: *Sarroch Saras Jetties*

P.1: draft 42 ft.	P.6: draft 26 ft.
P.2: draft 39 ft.	P.7: draft 35 ft.
P.3: draft 39 ft.	P.8: not yet workable
P.4: draft 36 ft.	P.9: not yet workable
P.5: draft 36 ft.	P.10: draft 23 ft.

Platform island No. 1 (for crude oil discharging only) draft 57 ft.
Platform Island No. 2 (for crude oil discharging only) draft 47 ft.
Loading rates:

Berths No. 1–4	Crude oil	5,000 t.p.h.
	Fuel oil	2,000 t.p.h.
	Gas oil	1,600 t.p.h.
	Gasoline	500 t.p.h.
Berth No. 5	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.
	Gasoline	500 t.p.h.
	LPG	200 t.p.h.

Berth No. 6 For Bunkering Barges and small tankers up to 3,000 d.w.t. Fuel oil, gas oil, kerosene and gasoline at slow pumping rates.

Berth No. 7	LPG	200 t.p.h.
	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.

Platform island for crude oil only at 5,000 t.p.h.
MEDICAL: All facilities available at Cagliari.
DENSITY: 1025.
FRESH WATER: Available by pipe-line at all berths. No water barges, although bunker barges may be able supply small quantity fresh water in emergency only.
At times fresh water is in short supply and may not be available.
Cost of delivery of fresh water by tug is 3,000 lire per metric ton.
FUEL: All grades available ex-wharf at tanker berths. Barges supply vessels at anchor and vessels calling for bunkers only.
Vessels calling at Sarroch for bunkers by barge are required to keep Agents closely advised of their ETA and bunker requirements. Messages confirming the vessel's ETA should be sent to Agents 72, 48 and 24 hrs. before vessel's arrival. Masters should note that customs regulations do not permit the return of bunkers to the refinery after the barge is loaded, therefore an accurate figure of bunkers required must be given in the first ETA message to Agents.
BALLAST: The discharge of ballast by tankers can be effected at all berths at a pumping rate between 1,000 and 2,500 t.p.h. Reception of ballast ashore is into 3 tanks with total capacity of 20,000 cu.m. and 6 API separator vessels.
CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man, usually allowed for consumption on board while vessel in port.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS:

Belgium	Great Britain
Denmark	Netherlands
France	Norway
Sweden	

REPAIRS: Minor repairs can be handled at Cagliari. Slipway for vessels up to 400 tons.
REPATRIATION: No difficulties.
AIRPORT: Elmas Airport situated 12 km. from Cagliari.
TIME: GMT plus 1 hour. Summertime June to September: GMT plus 2 hours.
HOLIDAYS: Not applicable to tankers. New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter & St. Paul (29th June); Assumption B.V.Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).
POLICE/FIRE/AMBULANCE: *Cagliari:* Police 658956; Fire 652222; Ambulance 656979.
Sarroch: Police 929063; Fire 652222; Ambulance 929024.
TELEPHONE: No telephone connection on board.
SHORE LEAVE: Allowed.
AUTHORITY: Capitaneria di Porto di Cagliari.
AGENT: Enrico Pernis, 5, Piazza Deffenu, PO Box 273. Cables: "Pernis". Telex: 79036. Tel.: 654754.

CATANIA (Sicily): 37.29 N. 15.06 E.

DOCUMENTS: Arrival report requested by Harbour Authorities. Also see "Augusta".
PILOTAGE: Master can communicate with Pilot on VHF Channel 16. Pilot boards at sight on harbour entry. International Code signals used to call Pilot.
ANCHORAGE: Vessel must remain on roads awaiting Pilot.
RESTRICTIONS: No restrictions on entry at night, except for tankers (either loaded or empty, as per harbour regulation). The tide at Catania is no more than 30 cm. Bar at entrance 30 ft.
MAX. SIZE: No limitation on the length and breadth but only on draft of vessel, provided same can be contained within the size of piers of Catania Harbour. See "Berthing" below.
HEALTH: The usual sanitary pratique as per all Italian ports is requested. Free pratique obtainable by radio prior arrival sending cable to "Sanimare Catania".
RADIO: The quickest way is to address messages to "Romaradio", better if adding to the telegraphic address the telex number of Agency, so that after very short time from reception at Romaradio the message is in Agents hands.
It is important that 72 *working* hours notice of ETA be passed to Agent.
TUGS: When Pilots are on board, they can call tugs by small radio-calling station. Very frequently the tug's Company, when seeing a big ship, join vessel at same time as Pilot. Tugs using ship's lines.
BERTHING:

Berth Nos.		*Length*	*Depth*
1 and 2	Molo Mezzogiorno, Oil berths	361 m.	30 ft. 6 in.

22	,, ,,	60 m.	16 to 20 ft.

STEVEDORES: As per actual Port Labour Regulations, in order to book gangs, stowage details must reach Agency not later than 11 o'clock of the day before ship's arrival, except for work to be done on Saturdays, Sundays and Mondays when application for gangs must be made on Friday.

The official load/discharge rate for general cargo is 50 tons per hatch per day (8 hours), but real output is higher. Increase for overtime, continuous shifts (0700–1330 hrs; 1330–2000 hrs; 2000–0230 hrs.). Night work, Sundays, national holidays, etc.

MEDICAL: Hospital facilities easily available. No advance notice required unless for emergency cases and for cases to be urgently treated during night and holidays.

TANKERS: 2 tanker berths are situated in line at Southern breakwater, called "Molo Mezzogiorno". There are 3 pipe-lines, diameters of 8 in., 6 in., 4 in. No discharge facilities for tank washing.

Tankers are not allowed to berth or unberth at night.

SALINITY: Average salinity of water inside the port is the same as the average salinity of Mediterranean.

FRESH WATER: Available at nearly all quays including bunker piers.

FUEL: Bunkers available and supplied only by pipe connection at Bunker pier (Molo Mezzogiorno). Max. rate 400 t.p.h.

CUSTOMS ALLOWANCES: Tobacco, for foreign ships not in coastal service in Italian Ports: 50 cigarettes per each crew member, for the first 24 hours of the ship's stay in port. Other cigarettes can be obtained for which an application to the Customs House is required. Spirits: 2 or 3 bottles per day (provided minimum 20 crew members).

CONSULS:

Austria	Germany	Netherlands
Belgium	Greece	Portugal
Denmark	Nicaragua	Spain
Finland	Norway	Sweden
France		

REPAIRS/DRY DOCK: Small repairs can be carried out at Catania. No dry docks available.

AIRPORT: Very near important airport with regular international flights.

TIME: GMT plus 1 hour. In Summer time GMT plus 2 hours.

HOLIDAYS: Normally, during all holidays it is possible to work with extra payment.

TELEPHONES: Numbers of emergency services: Police 226741; Fire Brigade 227702; Sanitary Office 226262; Harbour Master 226762.

AUTHORITY: Capitaneira di Porto.

CIVITAVECCHIA: 42.05 N. 11.47 E.

DOCUMENTS: On arrival:

4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
2 Provisions Lists.
2 Lists of Crew Articles, including Tobacco, Cigarettes, Spirits, Radio, etc.
Manifest(s) and Bill(s) of Lading n/n covering all cargo on board.

It is recommended that particular care be exercised in giving the exact weight and number of tobacco, cigarettes, spirits, paper for cigarettes, cigars, cigarillos, coffee, sugar, salt, pepper, spices, cocoa and chocolate, etc., on board, as well as bunker quantities and lub. oil, thus avoiding fines in case the Customs guards in searching vessel subsequently should find any concealed.

PILOTAGE: Pilots are advised of vessel's arrival by port authorities and by Agents. Therefore accurate advance notice of ETA should be addressed by Master to Agents. Pilot usually boards vessel within 2 miles of port. Pilot station in port area.

ANCHORAGES: Any vacant place assigned by port authorities, taking into account vessel's draft. If port is congested vessels anchor at roads. Pilot assistance is recommended.

RESTRICTIONS: No restrictions are imposed upon entry. With the exceptions of particular individual cases to be submitted for perusal to harbour authorities, vessels may berth and sail at any time, weather permitting.

MAX. SIZE: Max. permissible draft: 29 ft.

HEALTH: Clearance is granted by radio; Master to cable Sanimare Civitavecchia 24 hours prior to vessel's arrival. Quarantine requirements are those prevailing in all other Italian ports.

RADIO: Communications to and from vessels are sent and received from Civitavecchia Radio.

TUGS: Tugs wait for vessel at port entrance. Tug assistance is necessary although not compulsory. Ship's lines have to be used.

BERTHING: Shore fenders keep vessel off the quay. Berths:

No. 2 for vessels up to 180 m. length, 28 ft. 6 in. draft.
No. 7 for vessels up to 160 m. length, 25 ft. draft.
No. 8 for vessels up to 240 m. length, 29 ft. draft.
No. 9 for vessels up to 130 m. length, 23 ft. 6 in. draft.
No. 10 for vessels up to 220 m. length, 29 ft. draft.
No. 11 for vessels up to 220 m. length, 29 ft. draft.
Grain Silo located at berth No. 8.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 8: grain silo of 35/40,000 tons capacity is available; this berth is equipped with 2 rail-suckers, 4 movable suckers and 1 elevator. Ore, coal, fertilisers, sulphur, etc. can be handled at quays No. 2/7/9/10 and 11. Structures for containers not available here, nevertheless small traffic might be practicable. Roll-on/roll-off traffic practicable. Liquid chemicals practicable. No facilities exist for LPG carriers.

STEVEDORES: To enable Agent to order gangs it is very important to obtain accurate ETA in good time.

From 0800 to 1200 hrs. and from 1300 to 1700 hrs., or from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs. against payment of 32.50% extra.

Saturday: From 0600 to 1230 hrs. against payment of 32.50% extra; from 1230 to 1900 hrs. and from 1900 to 0030 hrs. against payment of a further increase of 25%.

Sunday: Work can be performed at overtime rates plus 50% extra from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs.

Holidays: Work can be performed at overtime rates plus 150% extra from 0600 to 1230 hrs., from 1230 to 1900 hrs. and from 1900 to 0030 hrs.

MEDICAL: Not necessary to receive advance note of required medical attention. Hospital and clinical surgery available. Master to advise in advance of particular inoculations required.

TANKERS: Max. draft allowed 28 ft. 6 in. Max. length 180 m. Tankers are not permitted to enter port before sunrise and after sunset. Diameter of discharge lines 8–10 in.

FRESH WATER: Drinking water and water for boilers is supplied from pier by hoses. Average pumping rate 8–10 t.p.h.

FUEL: Bunkering can be effected by means of barges and/or tank-lorries at all quays. Grades available: fuel oil and gas oil.

DEVELOPMENTS: Availability of quay No. 0 dredging to 30 ft., length 180 m., equipped with 2 cranes of maximum lifting capacity of 35 tons each. Extension of outer breakwater and deepening of the basin.

The port is being developed to receive tankers up to 80,000 d.w.t.

GANGWAY/DECK WATCHMEN: Watchmen services recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CERTIFICATES: Requirements are those prevailing in all other Italian ports, e.g. Tonnage Certificate, Safety Equipment, Load Line, Deratting Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco. Quantity permitted to each crew member: 50 grams to be smoked within first 48 hours. Wine and/or Spirits. 1 open bottle of spirits.

IDENTIFICATION CARDS: Required. Passes issued by local police.

CONSULS: There are no Consulates, but only Consular Agencies or Honorary Representatives for the following countries:

France	Tel. 23044	Spain	Tel. 24304
Sweden	Tel. 23109	Norway	Tel. 25207
Finland	Tel. 23134	Portugal	Tel. 23048

Nearest British Consulate is in Rome.

REPAIRS: Repairs of limited extent and importance may be carried out by 2 local workshops.

REPATRIATION: Facilities exist to effect crew changes and to arrange repatriations.

AIRPORT: Distance from Airport Leonardo da Vinci (Rome) 70 km.

TIME: 1 hour in advance in relation to GMT. Clock will be advanced 1 hour in Summertime, giving 2 hours advance of GMT.

HOLIDAYS: All Sundays, 1st and 6th January, 19th March, 25th and 28th April, 1st May, 2nd and 29th June, 15th August, 1st and 4th November, 8th, 25th and 26th December, Easter Monday, Ascension Day, Corpus Domini. Holiday work is subject to the authorisation of port authorities.

POLICE/AMBULANCE/FIRE: Police, 23729; Ambulance, 23382; Fire, 23333.

TELEPHONES: Can be connected on board vessels at quays No. 7 and 10.

AUTHORITY: Capitaneria di Porto.

AGENT: Gastaldi & C. S.p.A., c/o Ant. Bellettieri & Co. S.p.A. 23 Largo Plebiscito – P.O. Box 70 – 0005 3 Civitavecchia. Cables: "Dick". Tel. 23289/23625; A.O. 21125. Telex 62432 "For Dick".

FIUMICINO: 41.46 N. 12.13 E.

DOCUMENTS:

3 copies of Crew List.
Store Manifest.
List of Personal Effects.
Manifest of Cargo.

PILOTAGE: Vessel should await Pilot about 0.5 mile off the tanker loading platforms which are situated in the following positions:

Platform R1: Lat. 41° 45′ 06″ N. Long. 12° 09′ 15″ E.
Platform R2: Lat. 41° 44′ 37″ N. Long. 12° 10′ 04″ E.

ANCHORAGE: Vessels waiting to berth should anchor to the South of Platform R2, not less than 1 mile from the platform. The anchorage is not recommended during strong South or South-westerly winds, and in unfavourable weather conditions it is advisable for vessels to remain underway.

It is forbidden to use anchors in the near vicinity of the tanker berths, due to the presence of underwater pipe-lines. When approaching the moorings, anchors must be firmly secured in the hawse.

RESTRICTIONS: Pilotage and mooring is not carried out during hours of darkness.

MAX. SIZE: Ships of any length can be moored.

At R1 platform, water depth 23 m., max. draft 54 ft.
At R2 platform, water depth 19.50 m., max. draft 46 ft.
From time to time it may be possible to allow greater drafts subject to Pilot's advice.

HEALTH: Sanitary pratique can be granted by radio cabling "Sanimare Fiumicino", 36 hours (48 hours in case of arrival a day

after holiday) before arrival stating: last port, number of crew and good health of same, ship's flag – using international code.
RADIO: Advise Refinery of vessel's ETA 72 hours before arrival via Roma Radio. Confirm ETA 24 hours before arrival.
Vessels arriving for the first time at Fiumicino should also advise dimensions of vessel's manifold flange connections.
During cargo operations, the tanker will communicate by radio-telephone with the pumping station and the refinery.
VHF: No VHF service, but vessel, when moored, can contact Agent through Refinery radio-telephone.
TUGS: Not required for mooring.
MEDICAL: Local doctor and hospitals available in Rome.
TANKER BERTHS: 2 offshore mooring platforms, R1 and R2, connected to sea-lines of 20 in., 28 in. and 36 in. diameters. Loading rates 600 to 1,200 cu.m. per hour. Rate of discharge 2,500 to 4,000 cu.m. per hour.
MOORING: Vessel to have ready on arrival: port derrick rigged for hose handling; boat-rope and pilot ladder on the port side; 3 good mooring lines at the bow, each not less than 150 m. length.
Vessel is moored by the bow about 30 to 50 m. distant from the mooring platform. All ship's ropes are led back and secured on board to facilitate unmooring.
HOSES: Connecting and disconnecting hoses performed by refinery personnel, vessel to supply winchman and man the derrick. Derrick capacity to be at least 3 tons. Each platform is equipped with 2 floating hoses, about 200 m. long, which drift fully extended when berth is not occupied.
BALLAST: Raffineria di Roma can accept dirty ballast or tank washings up to a maximum of 15,000 tons. Recommended advise before arrival the quantity of ballast to be discharged. Ballast should be reduced to a safe minimum to save time at the mooring berth.
SALINITY: 25-28 grams per litre.
FRESH WATER: Supply by barge 100 tons per trip.
FUEL: Bunkers not available, only luboil in drums can be supplied.
CUSTOMS ALLOWANCES: 40 cigarettes per day for 3 days for each Crew member.
CONSULS: All Consulates and Embassies in Rome.
REPAIRS: Small repairs can be effected but no dry dock.
AIRPORT: International airport "Leonardo da Vinci" at Fiumicino.
TIME: GMT plus 1 hour.
REGULATIONS: Raffineria di Roma will hold vessel responsible for consequences of any pollution caused by oil leaking or discharged from the ship. Strictest precautions to be observed.
Engine to be kept ready to leave the berth in the shortest possible time.
Propeller movements are forbidden while vessel in berth, due to presence of floating pipe-lines.
TERMINAL OPERATOR: Raffineria di Roma S.p.A.
AUTHORITY: Il Comandante del Porto.

GAETA: 41.13 N. 13.35 E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority dues.
Vaccination Certificates for sighting.
PILOTAGE: Compulsory for entering road, docking and undocking. Pilots meet vessels about 2 miles off Punta Stendardo.
MAX. SIZE: Pontile Petrole – North side: Max. length 265 m. draft 48 ft. South side: Max. length 190 m., draft 39 ft.
HEALTH: Automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece. Otherwise, free pratique granted by local Health Officer who boards ships on arrival together with harbour officers, between 0700 hrs. and sunset with possible exceptions. In order to facilitate boarding by Officers at anchorage or berth, it is requested that vessels have a convenient accommodation ladder/gangway ready.
RADIO: 72 hours and 24 hours definite notice to Agent through Roma Radio IAR.
TUGS: Tug-boat assistance compulsory for docking and undocking; also stand-by tug during loading/discharge, from connection to disconnection of cargo hose.
BERTHING: Docking and undocking – normally performed in daylight only, but with favourable weather conditions exceptions have been and will be granted. Undocking normally until midnight.
DRY CARGO FACILITIES:
Banchina Caboto: 106 m. long quay, with a maximum official draft limitation of 20 ft. Vessels 130 m. length have been accommodated with a draft of 21 ft. 6 in. Cargo operations are performed by ships' gear and/or dockers mobile cranes of up to 30 tons capacity. Ample space for lorries, no railway junction.
Genepesca Banchina Pier: About 50 m. long pier with 1 berth each side in about 4.20–4.30 m. (14 ft.–15 ft.) depth. Cargo operations performed as above. Cargo handled: frozen commodities (in and out), general cargo, newsprint, clay, woodpulp, steel coils, etc.
TANKERS: The oil terminal is situated at Punta Molino and is represented by a finger jetty with 2 berths alongside; North for tankers up to 100,000 d.w.t. with a depth 51 ft.; South for 40,000–50,000 d.w.t., with a depth of 40 ft. and 1 separate stern berth with 40 ft. depth available. The latter is generally used for small ships and loading refined products. At the 2 berths on the jetty discharge and loading is performed through up to 4 articulated 8-in. steel pipe connections. All berths are equipped for loading or discharge of full range of liquid petroleum cargoes. The distance between the connections of the hoses at midship and the stern of the ship must not be more than 450 ft.
The height between sea level and hose connection on the ship is not to exceed 15 m., otherwise necessity of ballasting during discharge of crude carriers may arise.
Sea Berth for VLCC's: The sea berth is in approximate position 41° 13′ 27″ N., 13° 36′ 27″ E. Moored vessels will lie in an 076.5° direction. The depth is reported to be 22 m. The pipe-line to the shore is 42 in. diameter. Length 3,150 m.
The mooring consists of 1 buoy with flashing red light marking the position of the manifold, 2 buoys to the W.S.W. of the mooring position in a line 076.5° to indicate the "berthing line" and 7 mooring buoys.
The max. draft initially, 19 m. Hourly pumping rate 7/8,000 tons.
BALLAST: Ballast is to be discharged exclusively ashore into tanks of the refinery plant; discharge is performed through 8 in. connections and a 1600 m. long 10 in. pipe-line at a rate of 350/400 t.p.h. It is therefore advisable that vessels nominated to load products at Gaeta arrive with as little ballast as possible. Heavy fines are put on Masters if ballast is discharged overboard.
MEDICAL: Physician, dentist, eye and other specialists available. Hospital and nursing homes in Formia about 7 km. from Gaeta. Inoculation against smallpox, typhoid fever, etc., international certificates released. Extension of deratisation certificates granted, but no fumigation performed.
FRESH WATER: Of excellent quality, is supplied from city main at all berths. The supply to ships at the jetty cannot be assured during Summer season, owing to lack of water in city mains.
FUEL: Supplies of Bunker C and gas-oil, can be arranged ex installation for ships at oil berths. A minimum quantity of 400 tons is required for fuel and 100 tons for gas-oil. At dry-cargo berths bunkers can be supplied by road tankers only.
REPAIRS: There are 2 machine shops for current requirements including welding work.
CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.
IDENTIFICATION CARDS: Shore passes given by local police.
TIME: GMT plus 1 hour. Summer-time: May to September, GMT plus 2 hours.
AIRPORT: Nearest Rome, Fiumicino, Leonardo da Vinci Airport.
DEVELOPMENTS: New dry cargo wharf under construction, to be suitable for vessels up to 14,000 d.w.t. in about 10 m. depth of water.
AUTHORITY: Gaeta Industrie Petroli S.p.A.
AGENT: Italnoli, Lungomare Caboto, Palazzo Albani 3, 04024 – Gaeta, Italy. Cable Address: "Italnoli – Gaeta". Telex: 68050 Italgaet. Tel. 40572, 40915. *After Hours:* 40859 and 43277.

GELA: 37.04 N. 14.15 E.

DOCUMENTS:
For Maritime Authority:
Arrival Report.
Crew List.
Passenger List.
Ship's Certificates, for sighting.
For Port Health:
Maritime Declaration of Health (2 copies).
Vaccination Certificates, for sighting.
For Customs:
List of supplies and engine stores.
Cargo Manifest enclosing Bills of Lading.
For Police:
Passenger List (2 copies).
Crew List (2 copies).
Shore Passes for all Passengers and Crew.
PILOTAGE: Pilots are requested by International Code signals. (Flag or whistle acoustic signal, 2 long and 1 short blast). Telegraphic address: Piloti del Porto Gela. ETA required at least 2 hours before arrival. No VHF.
The pilot boat has black hull, white cabin with letter "P" painted in black on both sides. The pilot boat stationed near port island, Pilot boards about 1 mile off the port.
ANCHORAGE: Anchorage for vessels waiting Pilot about 1 mile West of the head of the Western breakwater, South of the 10 m. depth line. Small vessels may anchor to the West or East of the pier not less than 0.2 miles from the pier and in such a position as not to obstruct vessels berthing or leaving from the dock or the pier.
LIMITATIONS: Entry only between sunrise and sunset.
MAX. SIZE: Dry Cargo vessels: 180 m. length, 30 ft. 6 in. draft. Tankers berthing at the Mole: 250 m. length 31 ft. draft. Sea Line Tanker terminal: 250 m. length, 44 ft. draft. Up to about 60,000 d.w.t.
HEALTH: No radio pratique. Free pratique can be given on board on request.
RADIO: Roma Radio, or Augusta Radio. Messages are forwarded quicker through Roma Radio.
TUGS: 1 stationed to West or East of the pier, depending on weather and tide. Use of tug lines is optional.
BERTHING: The Anic Pier has berths on both sides in depths of 30 to 31 ft. Jetty is 2,800 m. length, and is protected by a breakwater. 2 berths suitable for dry-cargo vessels of up to 10,000 d.w.t. are available at the jetty terminal platform.

At the Breakwater there are 2 berths suitable for tankers up to about 34,000 d.w.t., plus 4 other berths for smaller vessels. See "Tankers".

TANKERS: Anic Sea Line Terminal: situated about 1 mile off the breakwater, a crude oil discharge berth in depth of 15 m. served by 34-in. sea-line terminating in two 12-in. flexible hoses. No slop discharge facilities. At the breakwater, Berth Nos. 1 to 6 for loading refined products and LPG can accommodate vessels up to 34,000 tons with max. draft 31 ft. These berths are also used for discharging crude oil and naphtha.

Storage tanks situated up to about 15 m. above sea level.

STEVEDORES: Should be ordered 12 hours in advance. Ship's gear used in dry-cargo operations although 5-ton mobile cranes are available. 2 shore cranes are available fitted with grabs for discharge of bulk sulphur and phosphates.

MEDICAL: All assistance can be arranged at 2 hours notice to Agents. Hospital and private clinic available. Vaccinations and inoculations with relative certificates can be arranged.

DENSITY: 1024.

FRESH WATER: Available at all berths. Not available at Sea-Line Terminal.

FUEL: Usually available without notice. Bunker oil is only supplied at breakwater berths.

DEVELOPMENTS: 2 additional berths at the new pier situated to the West of the Anic pier, suitable for vessels of up to about 7.31 m. (24 ft.) draft and used for loading ammonia and discharge of sulphuric acid.

OPENING/CLOSING HATCHES: Optional to employ shore personnel.

CUSTOMS ALLOWANCES: As for other Italian Ports.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: Only minor repairs possible.

AIRPORT: Catania, 104 km. away, 8 flights a day to Rome.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); Patron Saint (8th September); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police, tel. 30091; Ambulance, 37058; Fire, 30222.

SHORE LEAVE: Allowed.

AUTHORITY: Ufficia Locale Maritimo.

GENOA: 44.24 N. 08.54 E. (See Plan)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
3 Cargo Manifests.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: Pilots advised of vessel arrival by port authority and the latter by vessel's Agent. Therefore accurate ETA recommended. Pilotage compulsory for vessels over 500 g.r.t. To contact Pilots and pilot boats, VHF Channel 12. Time of working 0800 to 1700 hrs. Pilots board vessel at about 1 mile off port entrance.

ANCHORAGES: In case of port congestion or awaiting Pilot, vessel may anchor outside port entrance, East of the fairway.

RESTRICTIONS: Tankers not usually berthed during night-time.

MAX. SIZE: Tankers: up to 46 ft. draft. Other vessels: 31 to 40 ft. draft. Also see "Tankers".

HEALTH: Free pratique may be requested by radio to Sanimare, Genoa, between 12 to 6 hours before arrival, advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.

RADIO: Genoa Radio, call sign ICB. Agent uses same station when cabling to vessels.

TUGS: Tugs join vessel at port entrance. Ship's line used.

BERTHING: Pilot advises Master which side to berth. Shore fenders keep vessel off quay.

Calata Betolo: 1,432 ft. berthing length, 29 ft. permitted draft; Ponte Rubattino: 1,863 ft. berthing length, 31 ft. permitted draft; Ponte S. Giorgio: 2,050 ft. berthing length, 30 ft. permitted draft; Italsider Pier: 1,700 ft. berthing length, 40 ft. permitted draft; Silos Granario: 555 ft. berthing length, 30 ft. permitted draft; Silos Granario: 490 ft. berthing length, 27 ft. permitted draft.

CRANES: 38 floating cranes with capacities up to 150 tons and many electric cranes with capacities up to 45 tons.

CONTAINER TERMINALS: I. *Ponte Ronco (Ronco Pier):* Depth alongside, 11 m. Length of quay along Eastern side of the pier where 2 container ships can operate simultaneously, 400 m.

Equipment: *(a)* 2 "Paceco-Vickers-Reggiane" cranes having a maximum lifting capacity of 45 tons and the following main characteristics:

gauge of crane gantry 27 m. (88 ft. 6 in.);
maximum height of structure above wharf level 31 m. (101 ft. 7 in.);
total length of travelling bridge 74.85 m. (245 ft. 6 in.);
maximum seaward outreach 35 m. (114 ft. 8 in.);
useful travel of spreader with bridge partially drawn back for crane working on quayside 28 m. (92 ft.);
maximum height of spreader above wharf level 20.5 m. (67 ft. 2 in.);
crane suitable to unload 20 ft., 30 ft., 35 ft., 40 ft. containers using telescopic spreader; other cargoes by hook (capacity 45 tons); bulk materials by bucket (capacity 15 tons);

(b) 1 telescopic straddle carrier for 20 ft., 35 ft., 40 ft. containers;

(c) 3 service tracks along the wharf; 1 side track for railcars along the Western side of the pier and 1 track for service of the container shed;

(d) independent in-and-out six-lane customs check-point, with weighing plants, rail and road sidings to the Sampierdarena base network and to Lungomare Canepa respectively;

(e) check-point buildings covering total surface of 875 sq. m. (9,418 sq. ft.) and of 9,620 cbm. (339,728 cu. ft.) in volume, divided as follows:

Building No. 1 to accommodate Police, Customs guard, Italian State Railways, the heating plant and other services;
Building No. 2 to accommodate Port Authority, Customs and commercial offices which can be enlarged 3,000 additional cbm (105,944 cu. ft.);

(f) 1 metallic shed with loading platform for both railway cars and lorries, for consolidation (groupage) operations, having a surface of 1,400 sq. m. (15,070 sq. ft.);

(g) special pavings which allow piling of containers up to 6 heights.

The Ronco pier also has the possibility of internal direct communications with Sampierdarena docks through the Calata Derna (Derna quay), the possibility of direct connection with the harbour elevated road through ramps at the end of the pier and the possibility of doubling the berthing places along the Western side of the pier and of a further Westward enlargement of 20,000 sq. m. (5 acres).

2. *Ponte Libia (Libia Pier):* Depth alongside, 11 m. Length of quay 400 m. along Western side of the pier served by the "Paceco" crane, and 150 m. on the Southern side not served by the crane.

Equipment: *(a)* 1 "Paceco-Vickers-Savigliano" crane having a maximum lifting capacity of 40 tons and the following main characteristics:

gauge of crane gantry 27 m. (88 ft. 6 in.);
maximum height of structures above wharf level 31 m. (101 ft. 7 in.);
total length of travelling bridge 69 m. (226 ft. 4 in.);
maximum seaward outreach 28.8 m. (94 ft. 3 in.);
useful travel of spreader with bridge partially drawn back for crane working on the quayside 23.3 m. (76 ft. 4 in.);
maximum height of spreader above wharf level 20.5 m. (67 ft. 2 in.);
crane suitable to unload containers by 20 ft., 30 ft., 35 ft., 40 ft. spreaders; other cargoes by hook (capacity 40 tons); bulk materials by bucket (capacity 15 tons);

(b) stockyards for a total surface of 42,900 sq. m. (10.7 acres);

(c) shed with loading platform and steel supporting frame 100 m. (328 ft.) long, 25 m. (82 ft.) wide and a total surface of 2,500 sq. m. (26,910 sq ft.);

(d) 6 straddle carriers having a lifting capacity of 30 tons and possibility of stacking up to 3 rows of containers.

(e) 80 flat cars, 7 of which are for 40 footers, 12 tractors, 12 fifth-wheel tractors, two 11.5 ton lift-trucks, six 2-ton lift-trucks, and one 3-ton lift-truck.

TANKERS: Berths in Genoa Harbour suitable for tankers up to 750 ft. length, 34 ft. draft. Tankers discharging at Calata Sanita and Calata Olii Minerali are berthed stern to quay.

Multedo Harbour situated West of main harbour has the following jetties:

Multedo Pier – for vessels up to 588 ft. length, 31 ft. draft.
Pier "A" – for vessels up to 580 ft. length, 36 ft. draft.
Pier "B" – for vessels up to 850 ft. length, 43 ft. draft.
Pier "C" – for vessels up to 850 ft. length, 46 ft. draft.
Pier "D" – Presently accommodating tankers up to 46 ft. draft.

Discharge Rate: Maximum discharge rate for crude products:

Pier "A"	2,500/3,500 t.p.h.
Pier "B"	3,500/6,000 t.p.h.
Pier "C"	6,000/10,000 t.p.h.
Pier "D"	6,000/10,000 t.p.h.

Masters may speak direct to Pilots or Harbour Masters at Multedo Oil Berth in order to obtain latest information about berthing, etc., by calling on VHF Channel 6.

Buoy Terminal: A steel tower, set up about 2,800 m. off the Genoa Multedo Oil Dock in water 50 m. in depth is provided for the discharge of crude oil from supertankers up to 500,000 d.w.t.

A 48 in. (120 cm.) submarine pipe-line connects the tower with the terminals of all the oil companies operating at the Multedo Oil Dock.

Technical Characteristics: The tower consists of a steel structure having the form of a truncated pyramid set into the sea-bed at a depth of 50 m. and supporting the following parts above the level of the sea:

A lower platform having quarters for the accommodation of personnel or the housing of the various services, the deck being at a height of 6.335 m. a.s.l. This platform is protected by a steel structure mounted on elastic supports, with wooden fenders topped with rubber buffers. The toroidal structure, externally to the

rubber buffers, is 34.200 m. in diameter. Under the impact of a vessel, the ring will shift axially for a distance of 2 m. as a result of the system of shock absorbers which support the lower platform.

An upper platform 10.335 m. a.s.l. which carries the rotating arm for berthing tankers and the connection of the floating discharge hoses. The rotating arm reaches a height of 13.882 m. a.s.l. and is fitted with:

(a) a bollard capable of withstanding a horizontal pull of 360 tons;

(b) 2 pipes 24 in. in diameter running to a double universal joint at sea level for connecting the riser of the submarine line to the floating hoses linking tower and tanker; on the rotating part of the tower, the two 24 in. pipes are fitted with cut-off valves and may be connected one to the other by means of a by-pass with a gate valve;

(c) a 5-ton service crane;

(d) a lighted beacon and radar reflector at a height of 23 m.

Floating hoses for crude oil discharge: The two 24 in. pipes with which the riser connects on the tower are coupled by universal joints to 2 floating hoses of 24 in. diameter, with 16 in. terminals, each hose being about 310 m. in length and consisting of 29 sections of 10.67 m., of which the last 3 are of 16 in. diameter for connecting to the ship's manifold. They are fitted with a blank flange, a Camlock rapid-closing joint and a Keystone rapid cut-off valve that will ensure perfect tightness and rapid disconnection in an emergency.

The hose connections are exactly 90° left of the bollard with respect to the mooring vessel.

Signal lights and fog horn: The tower is equipped with a regulation flashing white light 23 m. a.s.l. and a fog horn.

The 2 floating hoses are marked at night by 5 red lights visible at a distance of 2 miles.

Request for berth: Mooring at the tower is generally reserved for tankers which, owing to their size and draft, are unable to use the Multedo Oil Dock and have applied for permission to the Port of Genoa Authority Oil Dock Management.

Order of berthing: Arriving tankers that are to work cargo at the tower and are awaiting authorisation to berth thereat must anchor in the roads.

The order of berthing is that of anchorage in the roads and, for vessels authorised to berth, according to the moment when arrival in the roads is signalled to the Port Authority's lookout station at the foot of the main lighthouse in Genoa harbour.

Should it be impossible to communicate with the lookout station, the time when communication is established with the Genoa-Multedo Oil Dock Operations Office over VHF radio, on the frequency that will be notified as soon as possible (normally Channel 6 – 156.3 mc/s.), indicating the point of anchorage or the ship's position, will serve for establishing the order of berthing.

Berthing at the tower will be authorised by the Oil Dock Management upon receipt of the Master's written or radioed assurance that the ship is fully efficient and ready to proceed to berth and commence discharge. The Oil Companies that are receivers of cargoes or anyway interested as users of the Oil Dock should begin discharge within 4 hours of completion of mooring and continue without interruption, day and night.

Saving cases of proven *force majeure*, vessels moored at the tower must restrict berth occupancy to the time strictly needed for discharge operations and for ballasting.

Berthing at tower: Berthing at the tower will be authorised only weather permitting and must be carried out with the assistance of a Pilot. The Master may ask for the help of tugs, in the number needed to ensure the manoeuvre being executed safely.

Ships should moor using two 15 in. nylon hawsers 65 m. in length, supplied by the tower, each able to withstand a 300 ton pull. The end of each hawser is fitted with a 4.5 m. length of chain of which the last link, devoid of stud, will be made fast to the ship's bow structures for securing mooring ropes.

The section of chain outside the fairleads contains a safety element calculated for a breaking load of 200 tons.

The vessel's mooring structures: anchor plates with aperture for pin, quick release hooks, bollards, steel ropes, warping winches, etc., must be in fully efficient condition and able to withstand the stresses to which they will be subject once the mooring ropes have been made fast to them; they must furthermore allow for the ship's being unmoored at any moment by the crew.

As the mooring hawsers can break for accidental or other unpredictable causes before the limit of 200 tons is reached, despite the inspection normally made before the arrival of each ship, all tankers moored at the tower must at all times have their engines ready to move at full speed.

Safety distance around tower and pipe-line: No ship or other craft may station itself, anchor, fish, or carry out underwater or other activities in the area around the tower and pipe-line, boundaries of which are:

South: parallel 44° 23′ 30″ N.
North: the coast.
West: meridian 8° 49′ 40″ E.
East: meridian 8° 49′ 20″ E.

Excepting for tankers proceeding to the tower and the craft providing harbour services and assistance, or other craft which have been duly authorised, no vessel or whatsoever craft may sail within a radius of 800 m. of the tower.

Mooring and warping ropes: The 2 mooring hawsers will be secured to a bollard which is part of the rotating structure of the tower and about 14 m. a.s.l. When no vessel is at berth, the 2 hawsers float on the surface, supported by red and yellow luminescent sleeves.

The ends of the hawsers are secured to 2 luminescent red buoys which support the lengths of chain that are to be made fast aboard.

Before a tanker arrives, the Port Authority's personnel will make the ends of the chain of each mooring line fast to a big, floating polypropylene rope about 80 m. in length which the vessel must pick up so that she may be slowly warped in to the tower.

Vessel will be moored with the aid of a craft suitable for operations in the open sea.

Watches, emergency services and Master's contacts with personnel engaged in discharge: As though at anchor in the roads, vessels moored at the tower must continue to keep sea watches and retain on board the crew required to cope with any emergency manoeuvre, either for vacating the berth or to meet any other serious event involving the safety of the ship, persons and cargo.

Before commencing discharge, Masters should take steps to see that liaison ensuring rapid and reliable communication between the Oil Dock Management's representatives aboard, the Company interested with the discharge and the Master has been arranged.

Safety measures to keep vessel clear of tower: Vessels at berth must keep sufficiently clear of the outer ring of the tower to ensure that the bow bulb will not collide with the tower structures.

To this end, the Master must adopt all necessary measures and precautions and take such other steps as may be ordered by the Port Authority, including the use of the tender or, should that not suffice, of a tug in order to keep the vessel at a safe distance from the tower.

Vessels needing to activate propellers in order to heat turbines must keep revolution to the minimum and run engines astern.

Hose handling: While vessels are approaching and mooring at the tower, one of the craft will take the floating hoses in tow, arranging and keeping them in a position where they will not hinder manoeuvring.

On completion of mooring, the hoses will be brought alongside the vessel on the port side, so that the ends are level with the ship's manifold, and will be secured to the tackle of the cargo derrick in such a manner that the cargo receivers' personnel and the ship's crew may jointly hoist, connect and get the hoses ready and then begin discharge. Hoses must not be subjected to a pressure of more than 14 kg./sq. cm.

The ship's derrick should be able to lift at least 10 tons.

Stand-by tenders during discharge: During mooring and discharge and until sailing, the Port Authority will keep alongside or in proximity to the tower a stand-by tender of suitable size and power provided with the personnel, material and equipment that will ensure the proper functioning of the tower's facilities and provide any assistance that may be needed in the event of a spillage or other emergency.

Another smaller craft, duly equipped for the purpose, will be provided by the Port Authority for liaison between the Oil Dock, tower, tanker and tender and for transporting personnel or light materials.

The 2 craft will be equipped with continuous listening VHF radio and with anti-pollution and fire-fighting equipment.

Platform services: The services relating to the operation of the tower's fixed and mobile facilities are under the control of the Genoa-Multedo Oil Dock Management, which exercises them through its personnel on the spot.

The employee in charge of services on the tower will be in touch, by VHF radio, with the Oil Dock Management, informing the latter how discharge is proceeding and of any abnormality and receiving from the latter such instructions as may be necessary. Locally, he will keep in touch with the ship's Master and the representative of the Company interested with the discharge in order to facilitate operations in so far as he is responsible and comply with all requests that may result in advantages and in improving safety in general.

Personnel attending to ship's discharge: The Oil Company who is cargo receiver or anyway interested with the discharge and the Master, each within his own field of competence, will jointly supervise and be responsible for discharge and for connecting and disconnecting hoses.

A representative of the cargo receivers appointed for the purpose, will keep in constant touch with the company's booster station and the Oil Dock by means of VHF radio. He will act also in collaboration with the Master and the Port Authority's representative. For connecting and disconnecting hoses, the latter will make available the material and equipment provided on the tender.

Filling of hoses with water when not in use: For reasons of safety and to prevent pollution, the floating hoses must be kept full of water when not in use.

To this end, the 2 hoses are connected in the tower by means of the by-pass before the gate and non-return valves.

In agreement with the Master, the cargo receivers must drain the hoses of water before commencing discharge.

On completion of discharge, the cargo receivers must likewise flush out the hoses to remove all traces of oil, fill then with water, disconnect them, apply the blank flanges, close the Keystone cut-off valves and lower the hoses into the sea.

It is strictly forbidden:

(a) to introduce compressed air or any kind of gas into the hoses or the submarine pipe-line;

(b) to discharge the water from the hoses into the sea at the beginning of operations or that used for flushing the hoses on completion of operations.

During flushing, the cargo receivers must take all precautions against leakage or spillage of the water employed for the purpose.

Interruption of discharge operations for safety reasons: In the event of a deterioration of sea conditions, violent thunderstorms, trouble with the facilities that jeopardises safety, large scale

pollution or other dangerous circumstances, the Management of the Oil Dock may, at its own unchallengeable discretion, order:
- immediate interruption of discharge;
- that the hoses be got ready for lowering into the sea.
- the adoption of all such measures as will enable the vessel rapidly to vacate the berth.

In agreement with the cargo receivers, vessels must therefore maintain a trim during discharge that will enable them to take to sea safely at any moment.

Prohibition to pollute. Cleaning up: Ships moored at the tower must not pollute the water with hydrocarbons, solid residues, or oil mixtures of any kind, nor effect gas-freeing or tank cleaning or transfer oil from one tank to another by means of temporary hoses or pipes slung over manholes or other tank apertures.

In the event of oil spills, the Oil Dock Management, without prejudice to the application of the penalties provided by law, will order the anti-pollution equipment of the craft standing by to come into operation at once, at the expense of whomsoever may be concerned, and the despatch of other equipment for cleaning up should it deem this necessary.

Bunkering and victualling: Bunkers, victuals, drinking water and stores must in general be taken aboard while awaiting berth in the roads. Such operations may also be effected with the vessel moored at the tower before or during discharge (but not during ballasting) according to the procedure prescribed by the Oil Dock Management and with observance of the precautions that are ordered.

Ships and any other craft coming alongside tankers must be provided with a sufficient number of strong fenders to prevent hull to hull contact and be fitted with spark arresters on all main and auxiliary engine exhausts.

Authorisation to go aboard: Persons needing to go aboard to do work or for other justified reasons must be provided with an authorisation issued by the Oil Dock Management.

Work on engines: It is forbidden to vessels moored at the tower to carry out works which put the engines out of action or reduce its efficiency.

Other work which cannot be delayed may be authorised exceptionally by the Oil Dock Management at its own discretion provided certain instructions and safety measures are observed.

Transhipments: Vessels moored at the tower may carry out transhipment of their cargoes only to vessels moored in the Oil Dock, for such purposes making use of the pipe-line.

Other regulations: Without prejudice to the regulations currently in force in the waters of the Maritime Department of Genoa, for all such matters as are not expressly provided for in the present regulations there shall be applied, to the extent to which they are applicable, the provisions of the Harbour Police and Safety Regulations for the Genoa-Multedo Oil dock, approved by order No. 10 of the President of the Port of Genoa Authority on the 30th September, 1968, the regulations for bunkering tankers in the Genoa-Multedo Oil dock, approved by decree No. 1384 of the President of the Port of Genoa Authority on the 1st September, 1966, of the Marine Services and Harbour Police Regulations approved by order No. 2 of the President of the Port of Genoa Authority on the 1st March, 1972, and the other laws and regulations in force in the Port of Genoa.

Penalties: Infringements of these regulations will be punished by application of the penalties provided in the Code of Navigation.

Safety rules to complied with during stay of tankers at sea terminal of Genoa-Multedo: The following are the principal safety rules that the Master is bound to strictly comply with and enforce during the stay of the ship under his command of Genoa-Multedo.

1. The main propelling machinery must be kept ready to move (standby) and there must always be available on board a sufficient number of crewmen to enable the ship to leave the berth immediately whenever ordered to by the Port of Genoa Authority (Consorzio autonomo del porto);
2. Vessel must have ready the accommodation ladder on starboard side and – on port side – the pilot ladder rigged forward of the poophouse;
3. Decks and surrounding waters must be properly lighted;
4. When mooring to platform anchors must never be dropped;
5. Vessel's firefighting equipment and the men in charge with its operations must always be ready for immediate action (in case of emergency). Men in drunken state must be watched and kept under supervision;
6. The ends provided with eyes of 2 strong 3.5 in./4 in. wire cables, length of which must be of 80/100 m. (260 ft./330 ft.) at least, must be placed hanging one fore and one aft to enable the ship to be towed out (to sea) in case of fire.
7. Unless authorised to the contrary and which will only be allowed in exceptional cases by the Oil Harbour Master, it is forbidden:
   (a) to carry out repair works. cleaning or gasfreeing of tanks or bunkers, etc.;
   (b) to carry out loading of cargo, water or other liquid products using hoses introduced through the cargo tanks lids.
8. It is strictly prohibited:
   (a) to keep fires of any kind on board, with the only exception of those for the service of ship's boilers and galleys if located in special rooms thoroughly protected against gas exhalations and far from the cargo lines;
   (b) to throw or pump overboard waterballast, bilge-water or water from any other source, that might pollute the port waters;
   (c) to cause escape of oil from the sea valves due to delay in starting the ballast pumps or any other reasons; to cause escape of oil due to leakage of pipes or valves on board; to provoke overflow of oil from cargo tanks. Accidental leakages on deck on deck must be collected into suitable receptacles and – with all precautions – poured again into the cargo tanks or carried ashore; all scuppers on the main deck and particularly those near the cargo manifolds must be plugged during the loading/unloading and ballasting operations;
   (d) the use of devices, tools and wrenches not made of non-sparking material, to connect or disconnect hoses, pipes or pipe fittings and to carry out work to any ship's equipment placed on deck or inside those spaces where the generation and/or presence of gas is possible;
   (e) to smoke on board except in those rooms approved by the Master and to throw overboard lighted matches or cigarettes;
   (f) the use of rocket signals, flares, etc.;
   (g) the use of electric hot plates, fans and other equipment which might produce sparks on deck or into those rooms having openings towards the cargo tanks;
   (h) the use of electric portable lamps and cables and of telephones not being explosion proof;
   (i) to keep open skylights, doors and hatches of spaces located in way of or near the cargo tanks;
   (l) to keep open the cargo tanks lids; to keep open butterworth openings.

   The ship's personnel should take care that all ullage openings and gas vents are provided with spark arresters and that the latter are sound. They also should take care that the spark arresters placed on the funnels and combustion gases exhausts are sound;
   (m) shifting of steel tools, winch manoeuvring, loading and unloading of materials, connecting and disconnecting of cargo hoses during the whole period in which sampling and gauging of cargo tanks is carried out;
   (n) to carry out loading and unloading operations during storms with lightning;
   (o) the idling of pumps. Ship's personnel should immediately stop pumps that – for any reason – should idle;
   (p) the blowing of boiler's tubes;
   (q) the coming onboard of unauthorised people.
9. All engine propelled boats approaching the vessel must be provided with spark arresters on the combustion gas exhausts.
10. During shifting operations into tanks:
    (a) radio apparatus must be switched off and all aerials set to ground;
    (b) cargo lines not in use must have all valves closed and manifolds are to be blank flanged.
11. Loading of ship's stores and equipment should be carried out from the extreme poop. In case the aforesaid operations have to be carried out on deck, near the cargo tanks and should it involve the handling of heavy or metallic materials anyway, all precautions relating to the case or those each time specified by the Oil Harbour Master, should be taken.

    As a general rule the above mentioned operations are not allowed during the loading or ballasting of the ship. The crafts used for the transporatation of the materials must approach the ship, stay alongside and move out without making use of the engine.
12. Tankers having on board inflammable or dangerous products, or – being empty or in ballast – having their tanks not certified gasfree, must hoist steadily and well in view, a red flag (letter "B" of the international code of signals) and by night a red light, which can be sighted from round the horizon.

BALLAST: Facilities exist for the collection and clearance of slops by means of special barges.

BULK HANDLING FACILITIES: Coal, ore, steel waste, etc., discharged at Italsider Pier, length 518 m., depth alongside up to 13.70 m.

STEVEDORES: Working hours: General cargo 0800–1200 hrs. and 1330–1730 hrs.; coal, 0700–1300 hrs. and 1400–2000 hrs.; ore grain, 0800–1200 hrs. and 1330–1930 hrs.; Saturdays, 0800–1300 hrs.; grain silos, 0700–1200 hrs. and 1330–1630 hrs., 0700–1200 hrs. on Saturdays. Italsider Pier: 24 hours daily in 3 shifts.

MEDICAL: All medical assistance available. Advance notice required for urgent cases only.

DENSITY: Varying from 10253 to 10263.

FRESH WATER: Available direct from quay at almost all berths. Supply by lighter, minimum 20 cu. m.

FUEL: All grades available. Delivered by barge. 48 hours notice desirable.

DEVELOPMENTS: Construction of new port at Voltri. A floating dock with capacity of 300,000 tons under construction.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco. Customs allow a maximum of 50 cigarettes or 10 cigars, or 50 grams tobacco per person, as long as vessel stays in port. All cigarettes, cigars, etc. must be ready on arrival in a locker in order to be checked and sealed by Customs guards. Wine and/or spirits. Wine allowed any reasonable amounts. Spirits allowed 1 bottle for every 2 Crew members.

CARGO GEAR: Certificates must be in order, otherwise authorities may prevent vessel perform commercial operations, especially if using derricks.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

CONSULS:

Argentina	Guatemala
Austria	Haiti
Belgium	Honduras
Bolivia	Paraquay
Brazil	Spain
Chile	Turkey
Colombia	U.K.
Costa Rica	Indonesia
Cuba	Iceland
Denmark	Lebanon
Panama	Liberian
Portugal	Madagascar
Switzerland	Mexico
U.S.A.	Monaco
Cyprus	Nicaragua
Dominican	Norway
El Salvador	Netherlands
Ecuador	Peru
France	Sweden
Germany	Uruguay
Greece	Venezuela

REPAIRS: All types of repairs available. Preferable have advance notice of requirements.

DRY DOCKS: 1 floating dry dock, lifting capacity up to 15,000 tons; 7 dry docks (largest dimensions 280×40×12.50 m.).

REPATRIATION: All facilities available.

AIRPORT: Located at about 5 km from town. Served by regular lines, international services.

TIME: Local time in relation to GMT 1 hour ahead. Summer time further 1 hour ahead from May to September.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); Patron Saint's Day (24th June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).

Holiday work is available at overtime rates. Generally workers not available on 1st January, 1st May and 25th December. Saturday: work performed after 1200 hrs. is at overtime rates.

POLICE/AMBULANCE/FIRE: Police, tel. 55.555, 61.395; Ambulance, tel. 469659, 480171; Fire, tel. 22.222, 466666, 62.222.

TELEPHONES: Telephones can be placed on board at approximate cost of lire 6.500 for installation lire 2.250 rent per apparatus for the first day, lire 850 for each succeeding day.

IMPROVEMENTS: Forecasts for new traffic are of such extent that the Libia pier will be improved by adding a second special 45-ton crane with a seaside outreach of 35 m. (115 ft.) and with an enlargement on a new area of 20,200 sq. m. (5 acres) which will bring the total surface of the terminal up to 72,100 sq. m. (17.8 acres).

The above new area will be equipped with a bridge crane on rails with 54.50 m. (178 ft. 8 in.) of gauge and having sufficient height to allow stacking up to 4 rows of containers. This will bring the handling capacity of the pier up to 5,566×20 ft. containers. The terminal is connected to the port elevated road and through this, linked to the net of the inland bound highways.

Calata Bettolo Terminal: The third container terminal will be built on reclaimed land obtained in the waters facing the "Calata Bettolo" and along the "Calata Canzio". The filling-in works will be 400 m. (1,312 ft.) long and 220 m. (722 ft.) wide. Its total surface will be of about 100,000 sq. m. (24.7 acres).

Two 45-ton Paceco cranes will operate on the terminal which will be equipped with a warehouse similar to the one existing at Ponte Libia. An elevated road connection 2 km. (1.3 miles) long will link the new terminal to San Benigno customs check-point.

Track and railway facilities will run at the centre of the pier according to the most advanced trends, in order to avoid any interference with the truck traffic.

AUTHORITY: Consorzio Autonomo del Porto di Genoa.

LA SPEZIA: 44.06 N. 09.49 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 List of Parcels.
1 Cargo Manifest.
1 Bill of Lading.

All Ship's Certificates including Italian Anchorage Dues.

PILOTAGE: Compulsory. Pilot station situated on breakwater at entrance to Gulf. 1 hours notice to Pilots required for shifting, sailing vessel, Pilot boards incoming vessels at Torre Scuola.

ANCHORAGE: Safe areas available in depths 25 to 34 ft. Mud bottom, no tide. Tankers: if waiting berth required to anchor in Safety Zone immediately behind the breakwater. If this anchorage is occupied by 2 vessels later arrivals must anchor outside the Gulf.

RESTRICTIONS: Western entrance to Gulf is 400 m. wide with depth of 42 ft. 6 in. The dredged channel to the port is 42 ft. deep. Eastern entrance is 200 m. wide used by smaller vessels only.

MAX. SIZE: Limited only by draft; 33 ft. for the Mercantile Port and grain silos. For vessels proceeding to coal berth max. draft 30 ft. 4 in. For vessels proceeding to Enel Pier max. draft 35 ft.

Tankers up to 40 ft. draft accommodated.

HEALTH: Radio pratique may be requested to Sanimare-Laspezia before arrival. Pratique is automatic for vessels from Ports in U.K., France, Belgium, Holland, W. Germany, Greece and Italy.

RADIO: Genoa Radio – ICB or Marina Militare ICS. Radio telephone station at Leghorn, transmitting 2591 kHz., receiving 2182 kHz.

TUGS: 7 tugs available up to 1,500 h.p. For large tankers, 4 tugs usually used.

BERTHING:

Garibaldi Quay: Length 510 m., with 3 berths for ships up to 29 ft. draft.

Malaspina: Length 200 m., depth alongside 21 ft.

Paita Dock: Length 535 m., 3 berths for vessels up to 30 ft. draft. At Berth No. 7 depth increased to 33 ft.

Italia Quay: Length 368 m., depth alongside 19 ft. 6 in.

Dock No. 8: Length 80 m., depth alongside 18 ft.

ENEL Quay: Length 200 m., depth alongside up to 35 ft.

TANKERS: Shell Pier, length 177 m., with 4 berths up to 39 ft. 6 in. depth.

SPI Buoy Terminal, situated 650 m. from San Bartolomeo shore. Vessels moor stern towards the shore. A crude oil discharge berth in depth of 11.50 m., suitable for tankers up to 36 ft. draft. Other oil berths at ENEL Quay, depth 35 ft. SNAM terminal for loading situated in Panigaglia Bay. Length 498 m., depth alongside 39 ft. Berths for 2 vessels.

Safety regulations are handed to Master on arrival and must be strictly observed. No shore steam or electricity available. At Shell pier, no goods may be loaded from shore.

Slop discharge facilities available only at the Shell pier.

BULK HANDLING FACILITIES: Ferruzzi Grain Silos at Paita Dock. Discharge by 2 mechanical conveyors, capacity 2,000 tons per 8 hour shift.

At Garibaldi Quay grain discharged by 4 vaccuum-operated intake pipes, capacity 400 t.p.h.

Coal conveyor system at Paita Dock, capacity 450 t.p.h.

CONTAINER TERMINAL: Situated on the Eastern side of the Commercial Port. Owned by Contship of Cadenazzo. Crane for discharging and handling containers up to 40 ft. max. draft 18 ft.

STEVEDORES: Gangs to be ordered by 0700 hrs. for morning shift, and by 1300 hrs. for afternoon shift every normal day from Monday to Friday. For mechanised work the same routine is to be followed. Saturdays, morning is considered as overtime work (tariff plus 27.50%). On the afternoon of Saturday, time is considered as holidays and so are Sundays. Saturdays and Sundays shift to be ordered on Friday afternoon within 1530 hrs.

MEDICAL: All facilities available. Vaccination/inoculation can be arranged. Prior notice should be given if urgent attention required on arrival.

FRESH WATER: Available at most berths, or by barge.

FUEL: Can be taken concurrent discharge at Shell Pier and S.P.I. terminal. Supplied by barge at other berths.

IDENTIFICATION CARDS: Shore passes issued to crew.

CONSULS: Following countries represented at Spezia: Denmark, France, Finland, Holland, Norway, Portugal, Sweden.

REPAIRS: Naval and civil repair yards can undertake all types of work.

DRY DOCKS: Available only when not used for naval vessels: No. 5, 209.65 m. by 27.60 m.; No. 6, 210.20 m. by 23.10 m. Floating dock for 80,000 d.w.t. under construction.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Victoria Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

SHORE LEAVE: Allowed.

AUTHORITY: Capitaneria di Porto.

AGENT: Gastaldi & C. S.p.A., 39–A/4, Via F. Crispi, PO Box 371. Cables: "Dick". Telex: 27482. Tel.: 32040 and 32041.

LIVORNO (Leghorn): 43.33 N. 10.20 E. **(See Plan)**

DOCUMENTS: Complete set of Manifests and B/Ls relative to cargo destined for this port. Complete set of Manifests of all cargo in transit. 3 Crew Lists. 3 Passenger Lists. All ship's documents.

ANCHORAGE: Anywhere between 1–1.5 miles from breakwater.

PILOTAGE: Sound signals for calling Pilot, 3 long blasts, or international signal "G". Pilot boards vessels 1 mile from breakwater.

RESTRICTIONS: No night berthing for tankers; no restrictions for tankers on sailing, when empty and up to 15,000 gross tonnage according to weather conditions.

MAX. SIZE: Max. draft for commercial port 34 ft. 6 in.; for oil carriers: 37 ft. 6 in. for tankers up to the length of 215 m. or 34 ft. 6 in. for tankers from 215 to 240 m. length.

HEALTH: To obtain free pratique by radio cable to "Sanimare", Livorno, advising all health particulars at least 12 hours before arrival.

RADIO: Roma Radio generally used for communications.

VHF: 24 hour service on Channel 16 and 14.

TUGS: Tugs normally join vessel at entrance of the port. Ship's lines used.

BERTHING: Alto Fondale, depth alongside 34 ft. 6 in.
Calata Orlando, depth alongside 28 ft. 6 in.
Calata Carrata, depth alongside 25 ft.
Calata Pisa, depth alongside 25 ft.
Calata Depositi Franco, depth 29 ft.
Calata Sgarallino, depth 28 ft. 6 in.
BULK HANDLING FACILITIES: Grain: discharging rate 1,000 to 1,500 m. tons per day.
Ore and coal bulk: discharged by shore elevators at Calata Orlando, discharging rate 1,500 to 2,000 tons per day.
TANKERS: 2 berths at Darsena Petroli for tankers up to 240 m. length, draft 39 ft. 6 in.
4 other tanker berths, for vessels up to 30 ft. draft.
Loaded tankers berth only in daylight hours, tankers may sail up to midnight.
No slop facilities available.
STEVEDORES: ETA required by Agent in order to arrange matters with stevedores at least 48 hours before arrival.
MEDICAL: It is advisable to give details of assistance required together with ETA cable. Hospital facilities available.
FRESH WATER: Available, by pipe-line. On other quays delivery by barge.
FUEL: All grades available from berth. Advance notice required 48 hours; supply subject to Owners' stem.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CERTIFICATES: All ship's certificates required.
CUSTOMS ALLOWANCES: Tobacco. 50 cigarettes, or 50 grams tobacco per man for the first 24 hours. Wine and/or Spirits. Only in consignment of the Master.
IDENTIFICATION CARDS: Issued by local police authorities.
CONSULS:

Denmark	Norway
Finland	Netherlands
France	Peru

Greece	Spain
Haiti	Sweden
Liberia	Switzerland
Monaco	

REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: Dry docks suitable to accommodate a Liberty type ship. A small floating dry dock for vessels up to maximum of 1,500 tons.
New Graving dock 350 m. × 56 m.
REPATRIATION: All necessary repatriations possible.
AIRPORT: Nearest at Pisa, distance about 20 km.; served by Alitalia and British Airways.
TIME: Local time is 1 hour ahead of GMT, and Summer time 2 hours ahead.
HOLIDAYS: 1st January, 6th January, 19th March, Easter Monday, 25th April, 1st May, 23rd May, 2nd June, 13th June, 29th June, 15th August, 1st November, 4th November, 8th December, 25th December, 26th December. On these days work can be arranged with an increase of 150%. Some of these holidays are liable to be abolished in 1977.
TELEPHONES: Only at some quays is it possible to place telephones on board.
AUTHORITY: Camera di Comercio Industria e Agricultura Livorno.
AGENT: G. Fanfani & Co., via Fuime 15, Livorno. Tel: 28151 (5 lines) Telex: 50006 Cables: FANFANICO.

MANFREDONIA: 41.37 N. 15.55 E.

DOCUMENTS:
5 Crew Lists.
3 Provision Lists.
3 Lists of Crew Possessions.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.
PILOTAGE: Compulsory for vessels over 300 tons. Pilot boards 1 mile off Mole di Levante. No VHF station.
ANCHORAGE: Good holding ground in 5 fathoms, 1 mile S.E. from Mole di Levante. Sheltered from all winds, except N.E. to S.E.
RESTRICTIONS: Depth 23 ft. at breakwater entrance, which is 1.25 cables wide. Depth 23 ft. alongside Mole di Ponette, for a length of 1,500 ft.
HEALTH: Pratique given at anchorage.
RADIO: Radio Roma, call sign "IAR".
TUGS: 3. Tugs make fast at anchorage and tow vessel into harbour (in the case of large vessels). Ships lines used.
STEVEDORES: 100 men available.
MEDICAL: There is a small hospital.
FRESH WATER: Available.
FUEL OIL: Not available.
DEVELOPMENTS: Large future development expected. At present a new jetty is under construction, extends in a S.E. direction for 1.25 miles to seaward, about 0.5 mile east of Mole di Levante. Depth alongside this jetty will be 12 m. Owing to construction it is advisable, when arriving at night, to remain about 3 miles off until morning, when a closer approach can be made.
GANGWAY/DECK WATCHMEN: Available, but unnecessary.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCE: 40 cigarettes per man. 1 bottle spirits.
IDENTIFICATION CARDS: Shore passes are issued by Police on arrival.
CONSULS: None.
REPAIRS: Only small repairs.
REPATRIATION: Can be arranged.
AIRPORT: Bari and Foggia.
TIME: GMT plus 1. Alterations to clocks are made from Spring to beginning of Autumn, then GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: All services telephone 113.
TELEPHONE: Situated at Main Gate, end of Mole di Ponette.
SHORE LEAVE: No restrictions.
AUTHORITY: Harbour Master.

MESSINA: 38.11 N. 15.34 E.

DOCUMENTS: If vessel comes from foreign port, whenever possible, at least 1 copy of Crew List and Passenger List to be sent some days before her arrival, so that they can be delivered to police in advance. Required on arrival:
3 Crew Lists.
1 Provisions List.
3 Lists Passengers in Transit.
3 Lists Passengers Disembarking.
1 List of Articles – new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, new articles, etc. If on inspection articles or quantities not in conformity or in excess, Master responsible; articles removed and heavy fine imposed.
Copies of Cargo Manifest also to be prepared on arrival.
If Anchorage Dues already paid and still in force, the relative receipt to be shown to the harbour Authorities, together with other ship's papers and report of arrival to be delivered to them.
PILOTAGE: Pilot meets vessel at about 1 mile from port's entrance. On request he can meet vessel at a greater distance, but additional tariff to be paid. Pilotage through Messina Straights is available but not compulsory.
MAX. SIZE: Max. draft allowed: 33 ft. at passenger quay: Other berths 27 ft.
Max. length 200–300 m.
Tankers: Length 100 m., draft 27 ft.
ANCHORAGES: Allowed outside harbour; at Paradiso's Bay, sufficient depths for safe anchorage existing. Advisable to request Pilot's assistance for indication of best anchorages.
RESTRICTIONS: For entering harbour during night-time ETA to be given in advance.
HEALTH: Free pratique automatic for vessels coming from other Italian ports and quarantine flag not to be flown on entering. From other countries usual procedure applies.
RADIO: Contact through Rome Radio, Naples Radio, Augusta Radio, or Messina Radio.
TUGS: Not compulsory. Tugs join vessels at about 0.5 mile from entrance of harbour. If tug's lines used increase of 10% on tariff.
STEVEDORES: To enable Agent order gangs important obtain accurate ETA. Latest time to order gangs: normal shift 0730 hrs. for work in the morning; 1200 hrs. for work in afternoon; night shift 1600 hrs. same day – Saturday noon or Sunday at 1200 hrs. on Saturday.
Failure to give ETA results in cost of waiting gangs, charged to vessel.
Tonnage: Per gang in 8 hours: General cargo 50 ton – cereals 80 ton.
MEDICAL: Doctor can attend sick crew members or for vaccinations. Hospitals available.
TANKERS: There is an Esso bunkering station only. Small tankers from time to time discharge fuel oil, gasoline, etc.
FRESH WATER: All quays have water pipe-line connections and water may be supplied day and night (provided ETA given) directly from ashore by hoses; during Summer time water may be supplied from 0700 to 1100 hrs. only.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: May be carried out by the crew or stevedores.
CERTIFICATES:
Safety Certificate.
Wireless Safety Certificate.
Freeboard Certificate.
Deratisation Certificate.
Anchorage Duties Voucher.
Crew List.
Passenger List.
Construction Certificate.
CUSTOMS ALLOWANCES: 50 grms. tobacco for each seaman. Spirits: 0.75 bottle for all crew.
IDENTIFICATION CARDS: Required.
CONSULS:

Argentina	Peru
Great Britain	Germany
Norway	Panama
Sweden	Denmark
Colombia	Finland
Holland	Guatemala

REPAIRS: Almost all types of deck and engine repairs can be carried out.
DRY DOCK: Dry dock belonging to Italian Navy. If it is not engaged for warships it can be hired. Therefore application must be granted by the Marina Militare. Dimensions are as follows: 492 ft.×52 ft. 7 in. (bottom), 81 ft. 6 in.×24 ft. 8 in. (top).

Smaller floating dry dock available, but also belongs to Italian Navy. One graving dock, length 250 m., breadth 38 m.
REPATRIATION: No particular facilities existing; but necessary repatriation can normally be arranged.
AIRPORT: Reggio Calabria Airport – distance about 10 km. From Messina, Reggio Calabria can be reached in 15 minutes by hydrofoil boats, which run every half hour (about). Flights from Reggio Airport in Winter, 1 per day; in Summer, 2 per day.
TIME: In relation to GMT local time is an hour ahead. During Summer, from June to September, clocks are put 1 hour forward.
HOLIDAYS: Work can be arranged, provided timely notice is given, in following official holidays, paying the respective increase on normal tariff:
New Year's Day (January 1st); Epiphany (January 6th); March 19th; Easter Monday; 25th April; 1st May; Ascension Day; June 2nd; June 3rd; local religious holiday; Corpus Domini; 9th July; 15th August; 1st November; 4th November; 25th December; 26th December.
POLICE/AMBULANCE/FIRE: Police, 46830; Ambulance, 45070; Fire, 30222.
TELEPHONES: No arrangements exist.
SHORE LEAVE: Allowed.
AUTHORITY: Il Comandante Colonello di Porto.

MILAZZO (Sicily): 38.13 N. 15.16 E. **(See Plan)**

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority dues.
Vaccination Certificates for sighting.
ARRIVAL ADVICE: At least 24 hours notice of arrival to be passed to Agent in order to obtain allocation of berth from Port Authority. Consignees-Receivers as for Charter Party.
PILOTAGE: Pilot boards 1.5 miles off the berths. International Code signals used. Pilot can be contacted on VHF Channel 12. Compulsory for vessels over 500 g.r.t. (Berthing/Unberthing).
ANCHORAGE: There are 6 anchorages for tankers over 3,000 g.r.t.
No. 1 to 600 m. off the harbour green light – Bearing 034°;
No. 2 to 920 m. ,, ,, ,, ,, ,, – ,, 091°;
No. 3 to 3,870 m. ,, ,, ,, ,, ,, – ,, 097°;
No. 4 to 3,050 m. ,, ,, ,, ,, ,, – ,, 101°;
No. 5 to 1,200 m. ,, ,, ,, ,, ,, – ,, 036°;
No. 6 to 1,600 m. ,, ,, ,, ,, ,, – ,, 065°.
Anchoring prohibited within 1 mile of Refinery Wharves. Pilot can be used for anchoring but not compulsory.
RESTRICTIONS: Large tankers are berthed in daylight hours only, medium and small tankers all hours. Unberthing all hours.
MAX. SIZE: Tankers up to 326,000 d.w.t.
RADIO: Harbour Master Authority, Mediterranea Refinery, Pilot and Tugs may be contacted on VHF Channel 12. Harbour Master Authority may be contacted also on VHF Channel 16.
HEALTH: Free pratique on board may be requested on arrival by way of ship's Agents. It is perfectioning the procedure to obtain free pratique by radio. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.
TUGS: 6 tugs available, 2×2,500 h.p., and 4×1,000 h.p. Meet vessel 0.75 miles off berths. Obligatory, at least one for mooring/unmooring tankers over 3,000 g.r.t. Ship's lines used.
DRY CARGO FACILITIES: Ludovico Mazzullo Jetty, length 340 m., depth 22 ft.; Pennello Eolie Jetty, length 65 m., depth 23 ft.
MEDITERRANEA REFINERY FACILITIES: 10 berths for Tankers, distributed in 3 Jetties as follows:
No. 1 Jetty: (West Jetty) 500 m. long, for loading/unloading, with the following berths:
Berth No. 1 (West side – Outer end) – depth 48 ft.
Berth No. 2 (East side – Outer end) – depth 48 ft.
Berth No. 3 (West side – Inner end) – depth 16 ft.
Berth No. 4 (East side – Inner end) – depth 20 ft.
Arms: 12 in. and 8 in. – Ballast lines 2×10 in. – Cargo lines 20, 16, 12 and 10 in.
No. 2 Jetty: (Middle Jetty.) 650 m. long, for loading/unloading, with the following berths:
Berth No. 5 (West side – Middle) – depth 55 ft.
Berth No. 6 (East side – Middle) – depth 55 ft.
Arms:12 in. – Ballast line 1×20 in. – Cargo lines 2×40 in. (Crude oil) – 20, 16, 12 in. (Fuel oil) – 20 in. (Gasoil) – 12 in. (Virgin Naphtha) – 10 in. (Super Gasoline) – 10 in. (Normal Gasoline) – 10 in. (Kerosine).
Berth No. 5 bis (West side – Outer end) – depth 83 ft.
Berth No. 6 bis (East side – Outer end) – depth 75 ft.
Arms: 16 in. – Crude oil lines 2×40 in.
Berth No. 7 (West side – Inner end) – depth 20 ft.
Berth No. 8 (East side – Inner end) – depth 20 ft.
No. 3 Jetty (East Jetty) 558 m. long, for loading/unloading under construction, with following berths:
Berth No. 9 (West side) – depth 45ft.
Berth No. 10 (East side) – depth 45 ft.
No. 1, 3, 4, 7 and 8 berths also LPG lines.
Vessels berth head out. Lines run to mooring dolphin ahead and astern. Anchor is compulsory only for small tonnage tankers. Tankers may use wire ropes only on the jetty mooring hook. On the bitts may use wire ropes only if the eyes are made of manila or nylon. For tankers alongside the jetty it is compulsory to have ahead and astern, outside, wire ropes with eye back.
FIRE WATCHMEN: Compulsory for tankers alongside the Refinery Mediterranea jetties. Number of watchmen onboard is variable, according to the cargo Class ("A", "B" or "C") loading/discharging and to the tankers g.r.t.
GANGWAY/DECK WATCHMEN: Watchmen service available. It is, however, recommended but not compulsory.
FRESH WATER: Boiler and drinking water supplied from the jetty. At anchorage by barge. Max. pumping rate 50 t.p.h.
FUEL: All grades available at Mediterranea Refinery berths, subject to prior notice. Also available at Milazzo Dry cargo harbour berths all grades available by tank or truck.
BALLAST: Ballast facilities available at Mediterranea's berths. Reception 1,000 t.p.h. No restrictions on capacity.
IDENTIFICATION CARDS: Shore passes given by local police.
TIME: GMT plus 1 hour. Summer-time: May to September GMT plus 2 hours.
HOLIDAYS: Cargo work can be arranged on every day.
REPAIRS: All types of deck/engine repair possible. Experienced and established marine workshops available.
CUSTOMS ALLOWANCES: 50 cigarettes are allowed per man per day for the first 2 days.
CONSULS: No Consul in Milazzo. The nearest are in Messina for the following countries: Peru, Great Britain, Argentine, Norway, Uruguay, Chile, Denmark, Germany, Australia.
AIRPORT: The nearest is at Reggio Calabria where there are 3 regular flights per day. Reggio Calabria can be reached by car and by hydrofoil in about 2 hours. Catania airport also nearby, and may be reached by car or train in about 2 hours.
TELEPHONE: Connections possible at Refinery Wharves.
MEDICAL: All facilities available.
GARBAGE: Boats are available, and compulsory for vessels 24 hours after arrival.
SHORE LEAVE: Allowed but transit through the refinery area not permitted except in emergency. Boats are available for hire from wharves and anchorage to the landing pier in the port of Milazzo. Shore passes given by local police.
AUTHORITY: Ufficio Circondariale Marittimo and Mediterranea-Raffineria Siciliana Petroli, S.p.A.

MONFALCONE: 45.48 N. 13.32 E.

PORT LIMITS: A vessel is considered to be an "arrived ship" when it arrives within the anchorage zone, S.W. of Duino.
DOCUMENTS:
Arrival Report.
Crew List.
Passenger List.
Customs Documents.
Health Documents (only for vessels that are not arriving from the United States, and are members of the West European Union).
PILOTAGE: Pilotage service is the responsibility of the Harbour Office, and is carried out by local Pilots. Pilots are not supplied with radio equipment. Pilotage service has to be requested by radio via Trieste radio station, to the Harbour Office. Pilotage is compulsory for vessels over 400 g.r.t. Pilot boat is equipped with VHF and is stationed along the access channel or near to the channel entrance buoy. Pilot boards about one mile from the entrance buoy.
ANCHORAGE: Vessels awaiting entry to the port are required to anchor between Duino and Sistiana, about 3 miles from the entrance. At the port entrance the depth is about 10 m. The anchorage provides good shelter from winds from the first and fourth quarters. Good anchorage in sand and gravel.
RESTRICTIONS: Entry to port is permissible from daybreak to sunset. Entrance channel has depth of 12 m.
MAX. SIZE: Maximum permissible draft 24 ft. 3 in.
HEALTH: Vessels calling from countries that are not members of the West European Union are required to provide a Maritime Declaration of Health. In the event of any disease or epidemic on board, advice has to be sent to the Maritime Health Office by radio.
RADIO: Nearest coast station is Trieste Radio, through which all radio messages should be routed.
TUGS: Tug service is optional, but the Maritime Authority can make service temporarily compulsory.
BERTHING: 630 m. of berth length for discharging generals, and 120 m. berth length for discharging cereals. Depth alongside berths approximately 7 m. Berths are equipped with mobile cranes.
BUNK HANDLING FACILITIES: Silo berth is well equipped for discharging cereals.
TANKERS: The port receives tankers with cargoes for Enel.
DENSITY: Average 1027.
FRESH WATER: Available at all berths.
FUEL: Bukering is by barge or tank truck only.
CONSULS: None at Monfalcone, but available at Trieste.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Not compulsory, but available through Agent.
OPENING/CLOSING HATCHES: Opened and closed by ship's crew.
AIRPORT: Distance to airport 5 km. Two flights a day to Rome.
HOLIDAYS: 1st and 6th January, 19th March, 25th April, 1st May, 2nd and 29th June, 15th August, 1st and 4th November, 25th and 26th December, first day after Easter, Ascension Day, Corpus Domini Day.

POLICE/AMBULANCE/FIRE: Police 113 or 72715. Ambulance 72249. Fire 72222.
TELEPHONES: Not available to be placed on board.
SHORE LEAVE: Permitted.
AUTHORITY: Harbour Master.

NAPLES: 40.50 N. 14.17 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: 15 Pilots and 3 motor launches. Pilot station Tel. 322.832 and 312.604.
ANCHORAGES: Approximately 70, having depths ranging from 11 to 15 m.
RESTRICTIONS: 2 port entrances of which the Western is 300 m. wide, the Eastern is 250 m. wide.
MAX. SIZE: Tankers up to 45 ft. draft.
HEALTH: Free pratique may be requested by radio to "Sanimare Naples" between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board, Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.
TUGS: 19 tugs available as required to assist berthing.

CRANES:
Electric: 17 at 3 tons, 19 at 6 tons, 6 at 15 tons and 1 at 40 ton capacity.
Floating: 1 of 100 ton (Italian Navy) and 1 of 60 ton (SEBN).
BULK HANDLING FACILITIES:
Coal: Four 6 ton units with hourly payload of 400 tons.
Cereals: Five units with hourly payload of 520 tons.
Containers: One 40 ton container bridge crane at Flavio Gioia Pier, capable of a lift every 2 minutes.
TANKERS: The petroleum port is located at the far East area of the port of Naples and consists of the Vigliena Pier, Calata Progresso and Progresso Pier. The petroleum port is exclusively used for handling crude oil and petroleum products at its 11 berths, and several pipe-lines connect these berths with the Naples Refinery of Mobil Oil Italiana, the plant of Mobil Chimica Italiana and the bulk plants of Agip, Esso Standard Italiana and IIP (ex-Shell Italiana) which are all located in industrial area of Naples adjoining the petroleum port at a distance not exceeding 4 miles. The maximum size of crude tankers, fully loaded, which can be accommodated at Progresso pier is 90,000 d.w.t.
FRESH WATER: Water pipe-lines are connected to all wharves and piers in Port. Water barges available.
FUEL: All grades available. Delivered by barge subject to advance notice given.
REPAIRS: All types of ship repairs can be carried out by the shipyards of Soc. Esercizio Bacini Napoletani and Soc. Cantieri Pellegrino, at Pontile Vigliena.
DRY DOCKS: 3 graving docks with dimensions as follows:
Length 202 m., width 28.9 m.
Length 113 m., width 20.5 m.
Length 349 m., width 45 m.
In addition 2 floating docks:
Length 228 m., width 24 m.
Length 233 m., width 37 m., lifting capacity 28,000 tons
CONSULS: The following countries are represented in Naples:

Argentina	Greece	Spain
Belgium	Indonesia	Sweden
Brazil	Liberia	Switzerland
Denmark	Netherlands	Turkey
Finland	Norway	U.A.R.
France	Panama	U.S.A.
Germany	Portugal	Uruguay
Great Britain		

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.
IDENTIFICATION CARDS: Shore passes given by local police.
AIRPORT: Capodichino Airport, situated 8 km. from city. Full international services.
POLICE/FIRE/AMBULANCE: Police Tel. 315032; Fire 330210; Ambulance 351450.
TELEPHONES: Telephone system permits the connecting up of the ships in all berths with the city network.
TIME: GMT plus 1 hour. Summer-time: May to September GMT plus 2 hours.
HOLIDAYS: Local and national holidays: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); Local Saints' Day (19th September); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); and 26th December.
DEVELOPMENTS: Over the three-year period 1975–1978 the port will be equipped with a container terminal. The facility will include: Quay of 650 m. Depth of water 12–15 m. (Bausan Quay). 2 anchorages West of Flavio Gioia Quay with a depth of water of 12 m. Container park of 35,000 sq. m. (S. Erasmo). A link with the National Railway Network. 2 cranes for 20 ft. and 40 ft. containers at Bausan Quay East and 2 cranes for 20 ft. containers at Bausan Quay West. A trans-European railway terminal operated by International Containers S.A. fitted with a Paceco-Vickers transtainer of 35 tons, lateral cranes of 35 tons and 7 tons, and fork-lift trucks.
AUTHORITY: Consorzio Autonomo del Porto di Napoli.

OLBIA Sardinia: 40.45 N. 09.31 E.

DOCUMENTS:
For Maritime Authority:
Arrival Report.
Crew List.
Passenger List.
Ship's Certificates, for sighting.

For Port Health:
Maritime Declaration of Health (2 copies).
Vaccination Certificates, for sighting.
For Customs:
List of Supplies and Engine Stores.
Cargo Manifest, enclosing Bills of Lading.
For Police:
Passenger List (2 copies).
Crew List (2 copies).
Shore Passes for all passengers and crew.

PILOTAGE: Pilots are requested by international code signals – Telegraphic address: Pilot – Olbia, at least 2 hours notice of arrival required. VHF of 15 Watt on pilot boat (Watch on Channel 16 – Working on Channels 6, 9, 12, 14) with service from 0500 hrs. till 0100 hrs. Pilot launch is wooden motor boat of 145 h.p. – speed 12 knots. Pilot boards 1 mile from lighthouse Isola Bocca. Vessels may anchor temporarily to await Pilot.
ANCHORAGE: In the roads of Golfo Aranci.
RESTRICTIONS: Between 0530 and 0630 hrs.; 2230 and 2330 hrs., kept free for entrance and exit of liners.
MAX. SIZE: Isola Bianca, max. draft 22 ft. Inner port, max. draft 20 ft.
HEALTH: Before arrival vessel to advise Agents if free pratique required, indicating state of health on board.
RADIO: The Port Authority listen on Channel 16 (VHF, range about 30 miles).
TUGS: 1 available, 1,050 h.p. service is optional, tug normally meets vessel in vicinity of Isola Bianca.
CRANES: 2 of 6 tons on rails in the inner port (at the Benedetto Brin Quay). 1 mobile of 15 tons.
STEVEDORES: Agents require ETA 24 hours before arrival in order to arrange gangs.
MEDICAL: Hospital facilities available. Vaccinations and inoculations can be done, except for yellow fever which must be done in Cagliari.
FRESH WATER: Available in inner port and Isola Bianca.
FUEL: Available only by barge, subject 2 to 3 days notice.
DEVELOPMENTS: Planned to dredge entrance to 10 m. depth.
GANGWAY/DECK WATCHMEN: Service is optional.
OPENING/CLOSING HATCHES: Work is exclusively done by stevedores.
CUSTOMS ALLOWANCES: For first 48 hours, 50 grammes tobacco per person and 20 gm. for each successive day. Not permitted to take tobacco out of the docks. Reasonable amount wine/spirits allowed for normal consumption on board.
IDENTIFICATION CARDS: Shore passes required.
CONSULS: No local representatives.
AIRPORT: Olbia Airport is Olbia – Costa Esmeralda, 3 km. away. Regular services with Rome, Milan, Pisa, Bologna, and Nice (this last one in Summertime).
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from June to September.
HOLIDAYS: New Year's Day (1st January); Epiphany (6th January) St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).
Sundays – tariff plus 50%. Holidays – tariff plus 150%.
POLICE/AMBULANCE/FIRE: Police, 22081; Ambulance, 22394; Fire, 22222.
SHORE LEAVE: Allowed.
AUTHORITY: Capitaneria di Porto.

ORISTANO BAY, Sardinia: 39.45 N. 08.30. E.

Shipmasters Report:

Oristano Bay has many shallows none marked with buoys. A good anchorage was obtained 2.5 miles from the port. The Bay is completely open to the West and with a S.W. to West wind the swell builds up. The perlite loading berth is a pier and a ship berths across the 'T' end of it, the ship being parallel to the beach. The berthing part itself is 120 ft. long and the loading chute can be raised to a height of 8 m. A vessel has to move on the pier for loading in different hatches, as the chute has a fixed base. I understand that although at the time there was hardly any swell in Bay, alongside there was considerable movement. The loading rate as quoted by the Agent is 500 t.p.h. Good communications were obtained with link calls on VHF through Cagliari Radio to the Agents. No answer was obtained on VHF to a Pilot or port service.

A new harbour is being built in the Bay as observed on the ship's radar. This consists of 2 breakwaters and a third breakwater extending at right angles across the entrance, with opening at both ends. In the Southern part of the Bay, there is a no anchoring and fishing area.

In the opinion of the Master the berth is not practical during the Winter months, as delays are caused by swell coming into the port. 1 vessel was at anchor for 3 days and sailed finally without loading.

PALERMO (Sicily): 38.07 N. 13.20 E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 499 gross tons. Pilot joins vessel 1 mile off port entrance. Pilot can be requested by International Code Signals. Pilot station and every Pilot equipped with walkie-talkie VHF set. In case of rough weather pilot boat will be in the bay and will lead ships through port entrance where Pilot will be able to board.
ANCHORAGE: It is advisable to use Pilot for anchoring in Palermo Bay.
RESTRICTIONS: No entry restrictions, but there is a daily mail boat service to and from Naples arriving about 0800 hrs. and sailing at 1915 hrs. No vessel is allowed to leave or enter the port half an hour before arrival or sailing of this vessel.
MAX. SIZE: Draft max. is up to 44 ft. (13.40 m.) according to the quay. Tankers up to 15 m. draft.
HEALTH: Free pratique may be requested by radio to "Sanimare", Palermo, between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Holland, W. Germany and Greece.
RADIO: Naples Radio, call sign IQH, Roma Radio, call sign IAI, Cagliari Radio, call sign IDC.
TUGS: 6 to 8 tugs are available with up to 800 horse power. Tugs normally join vessel in the Bay. Ship's lines are used.
BERTHING:

Pier	*Length*	*Maximum draft*	
		ft.	*m.*
Puntone	400	44.0	13.4
S. Lucia – South side	150	37.5	11.4
Crispi 1	115	37.5	11.4
Piave – North side	325	37.5	11.4
Piave – East side	85	37.5	11.4
Piave – South side	325	37.5	11.4
Crispi 2	110	37.5	11.4
V. Veneto – North side	325	37.5	11.4
V. Veneto – South side	325	27.5	8.4
Crispi 3	115	24.5	7.4
Sammuzzo	350	26.0	7.9
Molo South/North end	380	21.0	6.4

There are 6 roll-on/roll-off terminals and others are projected.
S. Lucia. Max. draft 27 ft. and used for discharge of timber, generals, iron, steel and grain.
CONTAINER HANDLING FACILITIES: At Puntone Quay, where depths are 14 m. from the other port. One 35 ton container crane with outreach of 25 m. An additional larger Crane will be available in the near future. Also one mobile crane with capacity of 40 tons for moving containers within the terminal.
BULK HANDLING FACILITIES: There are 23 silos at Piave Pier with a total capacity of 23,950 tons. Discharge rate 120 t.p.h.
Wine: 11 storage tanks with total capacity of 1,500 cu.m.
Fat Acids: 8 storage tanks with total capacity of 3,000 tons.
CRANES: 4 electric cranes with capacity of 15 tons, max. outreach 25 m. and min. 7 m.
10 mobile cranes with capacities from 1–20 metric tons.
STEVEDORES: Gangs arranged through agent. To be ordered before 0800 hrs. to start work in the morning, and not later than 1100 hrs. to start work at 1300 hrs.
Port Labour Capacity: (quantities of goods loaded/unloaded in 8 hours daily work employing all stevedores available).
Bulk cargo – 1,700 tons.
General cargo – 700 tons.
Containers – 100.
Full loaded trucks and vans carried by roll-on/roll-off ships – 240.
MEDICAL: Assistance will be given upon request. English-speaking doctors available.
TANKERS:
Oil Products and Crude Oil: Agip. Max. length 185 m., draft 32 ft., 25,000 d.w.t. Tankers drop anchors and are tied up at 2 buoys astern. Discharge rate 200–400 t.p.h.
Islom. Max. length 260 m., draft 40 ft., 96,000 d.w.t. Vessels are berthed alongside. North breakwater is used for loading and discharging fuel oil at discharging rate of 400 t.p.h.
Esso. Max. draft 15 m., no limitation for length. Vessel drops anchor and ties up at 2 buoys by stern. Discharging rate 600–700 t.p.h.
DENSITY: 1025.
FRESH WATER: Available at any quay by hoses or barges. By hose at 25 t.p.h., by barge 45 t.p.h.
FUEL: Fuel oil, gas oil and marine diesel available at the quays and by barge.
GANGWAY/DECK WATCHMEN: Not compulsory; usually number of watchmen required depends upon the Master.
OPENING/CLOSING HATCHES: Crew usually carry out this operation.
CUSTOMS ALLOWANCES: 40 cigarettes and one opened bottle wine/spirits per man.
IDENTIFICATION CARDS: Shore passes given by local police.

TIME: GMT plus one hour. Summertime: May to September, GMT plus 2 hours.
CONSULS: Belgium, Holland, France, Germany, Norway, Panama, Portugal, Spain, U.K., United States.
REPAIRS: Any type of repairs undertaken. Facilities are provided by Cantiari Navali Riuniti, and the shipyard employs over 5,000 workmen. There are four building slips, two of which can take vessels of 250 m. length. The slipways are serviced by cranes of up to 45 tons capacity, and which allow handling of prefabricated units up to 70 tons weight. There is a plate shop capable of machining about 80 tons a day, and which is equipped with all the latest machine, drilling and welding units. The engineering works are also equipped with the latest types of machinery enabling total dismantling and reassembly of engines.
DRY DOCKS: Floating dock, length 285 m., breadth 46 m. Suitable for up to 150,000 d.w.t.
Floating dock, length 194 m., breadth 30 m. Suitable for up to 36,000 d.w.t.
Graving dock, length 172 m. breadth 28 m. Suitable for up to 30,000 d.w.t.
Also see "Developments".
AIRPORT: Distance from Punta Raise Airport is about 20 km. Airport served by regular services.
REPATRIATION: Good facilities exist.
HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).
Cargo work can be arranged on the above days.
POLICE/AMBULANCE/FIRE: Police, 233333; Ambulance, 231166; Fire, 212222.
TELEPHONES: Available if required, but only for local use.
SHORE LEAVE: Allowed.
DEVELOPMENTS: A graving dock suitable for up to 500,000 d.w.t. is under construction. Length of the new dock will be about 384 m. and breadth about 60 m. Also 1 drydock under construction for vessels up to 160,000 tons.
AUTHORITY: Comandante di Porto.

PIOMBINO: 42.56 N. 10.33 E.

DOCUMENTS:
3 copies of Crew List.
3 copies List of Passengers in Transit or Disembarking.
1 Customs List, including ship and crew articles (Master is responsible for any excess, less or more).
1 copy of Manifest and B/L of Cargo Discharging.
1 copy of Manifest for Cargo in Transit.
PORT LIMITS: Within one mile of Breakwater light.
PILOTAGE: ETA to Agent in local time (GMT plus one hour). Summer-time May to September (GMT plus two hours).
Pilots embark E.S.E. from breakwater light, distance 1 mile or less according to weather conditions. Pilotage usually available at greater distance on request of ship or Agent. Being an open road, care should be given to provide shelter to Pilot embarking/disembarking facilities, especially in Southerly winds or a swell.
Pilot ladder according to Convention Safety of Life at Sea, and EMPA recommendations.
Southerly gales may prevent Pilot from embarking or even from approaching the ship; in this case pilot boat may guide limited size vessels to sheltered water and then embark Pilot (signals by lamp or flags "UF").
Pilots VHF will be activated in near future.
ANCHORAGE: Outside the harbour leaving entrance of dredged channel clear and ample sea room to intense traffic of car ferries to and from Island of Elba.
Pilot not compulsory, but available day and night on request of ship or Agent.
RESTRICTIONS: Berthing of ships over 35,000 d.w.t. unadvisable in darkness. Berthing may be restricted by Southerly gales also for smaller vessels. No restrictions on sailing but may be necessary to disembark Pilot at Portoferraio (Island of Elba). Considerable swell in the harbour during gales.
MAX. SIZE: Max. draft 39 ft., length 260 m., no breadth restriction. Can accommodate vessels up to 50,000 d.w.t.
HEALTH: Free pratique automatic for vessels coming from Continent, "Q" flag not to be flown on entering. From other countries, including Spain and Portugal, usual procedure applies. Not coming from Continent it is possible to request free pratique by radio to "Sanimare", Piombino, between 12 to 6 hours before arrival.
RADIO: Civitavecchia or Leghorn Radio.
BERTHING: "Acciaierie di Piombino" (ex-Italsider) pier equipped for quick discharging of ore, coal, scrap, etc. – Berth No. 4 depth 39 ft. Berth No. 3 depth 35 ft. 6 in. Other commercial berths, max. depth 29 ft., equipped with mobile crane 10 tons. One berth (21 ft.) with roll-on/roll-off facilities.
STEVEDORES: To enable Agent to order gangs, it is important to radio accurate ETA. Latest time to order gangs: shift 0600–1400 hrs., 1700 hrs. day before, shift 2200–0600, 1700 hrs. same day, shift 1400–2200 hrs., 1100 hrs. same day. Failure to give precise ETA may result in ship losing 12–24 hours, and the cost of the gang not employed, about 70.000 lire.
MEDICAL: Doctor and dentist can attend sick crew. For yellow fever and smallpox vaccination doctor comes from Leghorn.
FRESH WATER: Available at any pier, by pipe-line.
FUEL: Available by barge from Livorno.
OPENING/CLOSING HATCHES: Normally carried out by crew (if stevedores, extra charge).
CERTIFICATES:
Certificate of Registry.
Load Line.
Safety Equipment.
Radio Certificate.
Deratisation Certificate.
CONSULS: No Consuls.
REPAIRS: Small repairs only undertaken.
REPATRIATION: It is possible to arrange repatriation.
HOLIDAYS: Cargo work can be arranged on all official holidays.
POLICE/AMBULANCE/FIRE: Police 31111 or 32222; Ambulance 36022; Fire 33333; Emergency call (all services) 113.
SHORE LEAVE: Allowed.
AUTHORITY: Il Comandante, Capitano di Porto.

PORTO EMPEDOCLE: 37.17 N. 13.32 E.

BERTHING: Two quays with max. draft 21 ft., and one pier max. draft about 28 ft. Berths used for loading salt, fertilisers and generals, and for discharging bulk phosphate. Salt is discharged at rate of about 250 tons per hatch/day using ship's gear, and about 1,000 tons per day ex-silos.

PORTO TORRES (Sassari): 40.51 N. 08.24 E.

DOCUMENTS:
4 Crew Lists.
1 Passenger List.
1 Maritime Health Declaration.
1 Arrival Report.
1 Crew Declaration.
PILOTAGE: International Code Signals are used to call Pilot. Pilot station telegraphic address, Corpo Piloti Porto Torres, tel. P. Torres 54936. The pilot boats carry international pilot signals. The Pilot normally boards about 1 mile from port entrance. On request, vessel can be boarded 3 miles off port entrance. Also see VHF.
RESTRICTIONS: The oil terminal is exposed to winds and swell from N.W. to N.E. Heavy N.E. swell may delay berthing of larger vessels. Vessels should be ready to leave the berth if necessary due to adverse weather conditions.
ANCHORAGE: About 1 mile from the green light on head of West Mole in depths of 25 m.
MAX. SIZE: Inner port: length 120 m., draft 7 m.; Outer port: length 150 m., draft 8 m.; West Mole: length 150 m., draft 8–10 m.
S.I.R. Terminal: Pier A, length no limit, draft 9 m.; Pier B, length no limit, draft 12 m.; Pier C, length no limit, draft 15 m.; Pier E, length no limit, draft 8 m.
S.B.M. mooring: up to 300,000 tons.
HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio pratique at present. Pratique not required for vessels arriving from Common Market countries.
RADIO: Coastal radio station, Porto Torres Radio P.T., call sign "IZN", operating on 2182 kHz. A continuous service.
VHF: Pilots work on Channels 12 and 16. Launch service from anchorage to Oil berths work on Channel 6. It is also possible to call Porto Torres Radio on VHF Channel 16 (Calling and Safety), with continuous service on Channels 25, 26 and 27.
Captain of the Port on VHF Channels 16, 12, and 9 and 14 from 0800 hrs. – 2000 hrs.
TUGS: Join vessel about 0.5 mile from port or from S.I.R. Piers. Ship's lines normally used. 4 tugs available.
TANKERS: S.B.M. located about 1.7 miles N.N.W. of S.I.R. Terminal in approx. position 40.52.5 N. 08.21.5 E. Suitable for up to 300,000 d.w.t.
New Port, consisting of the S.I.R. jetty with berths A, B, C and E and depths of water varying to allow ship drafts of between 9 and 15 m.
There are two lines of 20 in. and 10 in. diameter for deballasting ashore.
Old Port, the West Mole which forms the seaward limit of the (Outer) port has tanker berths in a depth of 7 m.
BERTHING: Tankers are only permitted to berth between sunrise and sunset, but may unberth at any time.
Dry-cargo vessels may enter at any time.
There are two ports, viz. New Port and Old Port. The New Port is comprised of the S.I.R. jetty, and the Old Port is that area bounded by the East and West breakwater moles, within which are the Inner and Outer harbours. The Inner harbour is composed of the general cargo wharves which have in service electrical cranes up to 9 tons capacity, and a heavy lift gantry crane of 30 tons capacity. The Outer harbour has oil berths at the West Mole, and general cargo berths at the East Mole in depths of up to 8.23 m.
STEVEDORES: There are two ordering times each day. The first at 0800 hrs. and the second at 1330 hrs. It is possible to order gangs outside normal working hours through ship's Agents.

MEDICAL: All facilities available. Nearest hospital located at Sassari, 18 km. away.
DENSITY: Salt water.
FRESH WATER: Can be supplied in limited quantities to vessels in port and in the roads. All berths are fitted with fresh-water connections, but supply is unreliable due scarcity. Advance notice is required for deliveries by barge or from tugs.
FUEL: All grades available by pipe-line at S.I.R. piers. Elsewhere, can be supplied by barge, subject advance notice of 12 hours.
GANGWAY/DECK WATCHMEN: Authorised shore service available.
OPENING/CLOSING HATCHES: Normally done by crew, can be done by stevedores on request.
CUSTOMS ALLOWANCES: 40 grammes tobacco per man. Normal daily consumption wine/spirits allowed.
IDENTIFICATION CARDS: Not required.
CONSULS: No local consular representation.
REPAIRS: Only minor repairs can be effected locally.
REPATRIATION: Can be arranged through Agents.
AIRPORT: Nearest at Alghero-Fertilia, 34 km. away. Daily flights to main Italian cities.
TIME: GMT plus 1 hour. Summer-time, clocks advanced 1 hour between 24th May and 21st October.
HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Patron Saint (22nd May); Easter Day, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).
POLICE/FIRE/AMBULANCE: Police tel. 54888; Fire, 31421; Ambulance, 54973.
SHORE LEAVE: Allowed. Shore passes are issued by Immigration.
AUTHORITY: Capitaneria di Porto Torres.

PORTO VESME (Sardinia): 39.12 N. 08.24 E.

DOCUMENTS: See "Genoa".
TUGS: Vessels normally require two tugs. One tug is available from Porto Vesme, and the second usually comes from Cagliari at a charge of about Lit. 800.000 per trip plus Lit. 40.000 per hour from two hours after arrival at Porto Vesme.
BERTHING: All bauxite cargoes are discharged at Eurallumina Quay, including all cargoes discharged for account Comalco. This is a private installation, operating with own personnel on a 24-hour shift basis. Out-turns may reach 10/15,000 tons per day. Depth of water on approach to Eurallumina reported to be 13 m., and permitted draft alongside the quay is 10.97 m. (36 ft.).
FUEL: Not available.
FRESH WATER: Available, but in short supply. Preferably vessels should arrive with sufficient water on board in order to avoid the heavy charges incurred in deliveries by tank-lorries.

SHIPMASTER'S REPORT:

HARBOUR: The harbour is protected by two moles between which there is a wharf. A channel marked by buoys leads to the entrance.
DOCUMENTS: On arrival the following documents are required.
Declaration of Health.
2 Crew Lists.
1 Copy of last Port Clearance.
1 Copy Vaccination List.
2 Store Lists.
2 Personal Effects Lists.
1 Valid Derat Certificate.
All other ship's documents.
RADIO PRATIQUE: Unavailable.
PILOTAGE: For ships arriving the Pilot boards at 39.14 N. 08.19 E., but in severe N.-Easterly gales the Pilot will board in Palmas Bay, position 39.00 N., 08.30 E. When leaving Port the Pilot leaves the ship abeam of Ghingetta Is., 3 cables off, position 39.11.5 N., 08.22.25 E. There is no Pilot V/L, the Pilot boards from a tug.
RADIO: Cagliari (IDC). No VHF service for pilotage.
TUGS: Two permanent tugs of 1,750 h.p. are operating and other tugs are available from Cagliari when necessary, and advising four days before ship's ETA.
MOORING BOAT: Available.
DEPTHS OF WATER:

In the Channel	14 m.
Eurallumina Quay	12 m.
Alsar Pier	8.5 m.
Trade Quay	8.5 m.

BERTHINGS: *Eurallumina Quay* (unloading point of bauxite vessels). Length 442 m. Height on surface of water 3.6 m. Large rubber sprung fenders 150 ft. apart are fixed to the quay. Double bollards 150 ft. apart.
Vessels using this quay usually berth starboard side to using the port anchor which is let go well off the berth.
Bauxite Discharging Rate: 10,000 m. tons/day. Discharging by grab.
FRESH WATER: Available at the Trade Quay by tank cars. At Eurallumina Quay available at 15 cu. m./hr. (Boiler Water only). No fresh water available at Alsar Pier.
BUNKERS: Available by barge from Sarroch, about 70 miles from Porto Vesme.
REPAIRS: Limited minor repairs only and giving notice by radio. For Radio and Radar available at Cagliari.
SHIP CHANDLER: Available advising Agent.
CONSULS: No foreign representation.
LAUNDRY: Available advising Agent.
PROVISIONS: Fresh foods available but notice must be given immediately on arrival.
AIRPORT: Cagliari about 90 km. from Porto Vesme. International schedule flights and domestic flights over the Italy Area.
MEDICAL: Qualified doctors available ashore and also equipped hospitals. In emergency doctor will board ship.
REPATRIATION: Arrangements must be made with Agent in advance by cable or immediately on arrival.

QUILIANO TERMINAL: 44.17 N. 08.28 E.

(See Plan)

LOCATION: Terminal is located in Vado Ligure Bay in approx. Lat. 44° 16′ 48″ N., Long. 08° 27′ 42″ E. between Savona Harbour and Capo Vado.
DOCUMENTS:
2 copies Store List.
2 copies Curios List.
8 copies Crew List.
4 copies Passenger List.
Clearance, not required.
1 copy Cargo Manifest.
Health Declaration. International Health Form to be filled out by Master on arrival.
Consignee Papers:
Bills of Lading (original and copy).
Certificate of Origin (original and copy).
Ullages report at the loading port.
PILOTAGE: Also see "Mooring".
Pilotage is compulsory. Vessels proceeding to the terminal must call off Savona Harbour to pick up Pilot.
Pilot station is located one mile off Savona Harbour breakwater in position approx. Lat. 44° 19′ 00″ N., Long. 08° 31′ 24″ E. and maintains VHF radio-telephone service (Channel 13).
Vessels are requested to have a proper pilot ladder securely rigged and long enough to reach the pilot launch; during night-time, adequate light must be rigged overboard for the Pilot to approach the side of the vessel and safely climb the ladder.
Vessels partially loaded must have the pilot ladder rigged in conjunction with the accommodation ladder.
When the vessel is berthed, the Port Authorities require the accommodation ladder on the starboard side.
ANCHORAGE: For vessels awaiting berth, the anchorage area is off Savona Harbour breakwater, or in the area East of berth in position approx. Lat. 44° 17′ 00″ N., Long. 08° 28′ 05″ E.
MAX. SIZE: The berth is established for a 70 ft. draft vessel, with min. keel clearance of 15 ft., making the safe manoeuvring depth 85 ft. (26 m.).
HEALTH: Master to request free pratique by radio 24 hours prior arrival to "Sanimare Savona".
RADIO/VHF:
Master to Radio "Sarpom Quiliano"

AAA	Blading quantity in long tons.
BBB	Slops, quantity water percentage, tank number.
CCC	ETA Quiliano upon departure last port.
DDD	Any ETA change exceeding 12 hours.
EEE	ETA Quiliano 72–24 hours prior arrival.
FFF	Draft of arrival at berth.

Ship-to-shore communications
Ship-to-shore communications, while the ship is berthed will be by portable VHF radio units used by Sarpom Marine Terminal Supervisor only. The use of the ship's radio station (except VHF set) and/or battery charging equipment is prohibited for safety reasons during cargo-ballast transfer operations. In event of normal ship-to-shore communications failure, an emergency system will be operated.
Free pratique. See "Health".
Radio Message
Local Agent will transmit the following standard message to all inbound vessels:
Standard Message No. 1 Sarpom Quiliano
Master . . . . . .
Please advise ETA draft other requirements stop please urgently inform:

AAA	Have two 16 in. ASA connections ready on standard manifolds all other flanges to be blanked and fully bolted stop if 16 in. not available advise size manifold connection.
BBB	Have boom hoisted on starboard side able to work abreast of main cargo manifolds certified lifting capacity 10 tons.
CCC	Vessel will be moored at a 7 buoys SBB using both bow anchors with . . . . shackles each side stop advise details/availability your mooring system stop mooring lines/wires of 150 fathoms each are required stop terminal preventer wires may be required.
DDD	Accommodation ladder to be ready on starboard side on arrival stop have pilot ladder ready on stbd side in connection with the accommodation ladder.
EEE	During entire stay at berth engine to be always on readiness and steam on deck to be kept open.
FFF	Have ullages, cargo temperatures and water measured and ready before arrival.

GGG Advise main cargo pumps total water rate capacity stop failing to answer above details may result in operational delays accountable to vessel.

Important that a reply to this message be sent soonest after receipt.

TUGS: Tugs are generally stationed in Savona Harbour. In view of required time to reach the Terminal Area (about 20 minutes time in good weather conditions) sufficient notice should be granted.

The principal characteristics of tugs are:

Luigi Noli: motor, 3000 h.p. – 50 tons bollard pull (Korte nozzle). *Fire equipment:* Equipped with "Sourbel" fire-fighting articulated arms. 1 monitor fore mast, 23 m. above sea level; 2 monitors main mast, 16 m. above sea level, water/foam range 120/90 m.

Carmelo Noli: Motor, 1,700 h.p. – 20 tons bollard pull. 1 monitor fore mast – 12 m. above sea level. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Giuseppe Piaggio: Motor, 1,600 h.p. – 17 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Capo Vado: Motor, 1,250 h.p. – 15 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam.

Leon Pancaldo: Motor, 808 h.p. – 10 tons bollard pull. No monitors – fire hoses only.

Priamar: Motor, 650 h.p. – 9 tons bollard pull. No monitors – fire hoses only.

Riviera: Motor, no monitors – fire hoses only.

MOORING: The vessel will be boarded before mooring operations by a Sarpom Marine Terminal Supervisor (S.M.T.S.) who is an experienced captain. He will remain on board up to the time the harbour Pilot boards the vessel for unmooring operations and he will also act as co-ordinator of all ship/shore operations, providing local advice to the Master in any emergency that may arise.

Responsibility for the safe conduct of operations on board while in berth or in the area of Terminal rests with the Master, as solely responsible on behalf of the Owners of the vessel.

Vessels will be boarded by the harbour Pilot off Savona Harbour breakwater or at anchorage. All manoeuvring of ships proceeding to the Terminal and within the Terminal area will be done in accordance with the harbour Pilot advices. Vessels will proceed subsequently to Vado Bay with a course parallel to the coast, about 1.2 miles from shore, up to the terminal area.

A starboard turn will be taken, steering on the "approaching range line", leading to the buoys field. Another range line, crossing with above line, marks the position where the starboard anchor should be dropped. With the assistance of 4 to 5 tugs the vessel then backs into the berth.

The position of anchors is assumed for vessels of 980 ft. LOA and 13 shackles in the water. The Pilot according to current information can also do anticlockwise manoeuvring instead of above clockwise, in this case the first anchor to be dropped will be the port anchor.

It is recommended that at least the following number of shackles in the water should be used according to size of vessel:

(1) VLCC's above 140,000 d.w.t.	13
(2) Vessels 80 to 140,000 d.w.t.	11
(3) Vessels 50 to 80,000 d.w.t.	9

According to existing local weather conditions the first line to be sent out is generally on buoy N.7 or 6 (port side of vessel). The sequence of mooring operations will take place as suggested by harbour Pilot.

In expected or bad weather conditions, preventer wires will be picked up.

For vessels in the range of 50,000–90,000 d.w.t., according to existing and foreseen weather conditions and other factors, only five buoys instead of seven will be used.

Vessels must be moored to the entire satisfaction of the Pilot and Sarpom Marine Terminal Supervisor and must be ready at all times to put out more lines, to take in preventer wires using messenger lines, or to adjust lines or leave the berth as required by S.M.T.S. due to any change in the weather.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment lines or gear, which might impose special hazards in connection with handling, mooring or discharging the vessel.

It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berth. The Pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

The mooring boat has the following characteristics: LOA 12 m. – beam 4.20 m. – displacement 17 tons. Motor Diesel *Deutz* 150 h.p., can be overpowered up to 200 h.p.

A successful test of the boat power was carried out by towing 250 m. of two 38 mm. dia. wires at the same time.

N.B. Being an open roadstead, vessels must keep engines on stand-by during their stay in the moorings. No repairs to main engine may be undertaken in berth. Steam must be kept on deck in case an adjustment to anchor cables or mooring lines is found necessary.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Pilot or S.M.T.S., having in mind the hazards of the operations because of the product being discharged, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply or be in accord with the Safety Rules as per form 1–49 Mar–B and others handed to Master on arrival, to ensure as far as possible the safety of the ship as well as the properties of Terminal. Unsatisfactory conditions will be reported to Sarpom Marine Terminal Supervisor who is empowered to reject the ship for future calls unless the reported deficiencies have been remedied.

Note: If in the opinion of the harbour Pilot and/or Sarpom Marine Terminal Supervisor the vessel is not equipped with adequate mooring facilities, lines or gears he will so inform the ship's Master and in such event the ship shall not be brought into the mooring until facilities, lines or gear, are deemed satisfactory.

BERTH: The sea bed at the berth is firm sand overlain by 1 to 2 m. of mud.

The berth is a conventional buoy mooring consisting of seven Langmar buoys designed for a 125 short ton load. Each buoy is equipped with a 40 mm. diameter preventer wire. Vessel is berthed with two anchors ahead and seven mooring lines to buoys round the stern. Moored vessels have their bow seaward heading S.E., 155° true.

As the mooring buoys are at distances from 500 to 650 ft. away when the ship is in position, vessels should have ropes of 200 fathoms ready for running out on each side of the after deck to warp ship into position. Where vessels are not so equipped, two ropes of 150 fathoms (or of such a length as to have the eye splice on board when in position), should be married together and flaked out on deck clear of all obstructions and ready for running.

Vessels not equipped with wire winches should have at least 15 mooring lines aft with diameter appropriate for the size of the vessel and a min. length of 150 fathoms with lashings ready for marrying one rope to another for running out. Combinations of wire synthetic lines are acceptable on the basis that 2 synthetic lines replace 1 wire.

Speed of running out and warping are often of vital importance when berthing, and experience has proved that the smaller diameter synthetic ropes of equivalent strength not only improve mooring time but often make mooring possible when the larger ropes fail. Max. circumference of such ropes should be 10 in.

Mooring wires on ship's winches are favoured at this terminal but it is recommended that the wire be not less than 1.625 in. diameter and at least 150 fathoms long, preferably 200 fathoms. Such winches must be solidly locked when in moorings; the tension feature is not acceptable. It is also recommended that the wire be secured on the drum in such a manner that it can be slipped without endangering personnel.

Where nylon tails are used, they should be spliced on the wire round a thimble.

When slipping wire has been found necessary, the mooring company launch will make every effort to recover and return it to the vessel.

Chain stoppers must be ready both sides of vessel and aft.

DISCHARGING: Ships will discharge through 2 strings of hoses, i.e.:

String No. 1	9 lengths	25 ft.×20 in. dia.
	2 lengths	25 ft.×16 in. dia.
	1 length	30 ft.×16 in. dia.
String No. 2	10 lengths	25 ft.×20 in. dia.
	2 lengths	25 ft.×16 in. dia.
	1 length	30 ft.×16 in. dia.

The weight to be lifted on each string is about 9 tons: they are invariably taken up on the starboard side. Both headers are equipped with fast uncoupling devices.

The submarine line connected by manifold to the above strings consists of 2 lines (one 32 in. dia. one 36 in. dia.) of about 3.470 m. length reaching the shore installations (Sarpom Depot) which has, at present, the capacity of 387.500 cu.m.

The max. discharging rate allowed is 13,000 cu.m/hr.= 81,600 bbls/hr. with a max. pressure at ship's rail of 150 p.s.i.=10.6 kg/sq. cm.

Raising, connecting, disconnecting and lowering of the hoses will be performed by shore personnel (7 men), who will remain on board throughout discharging operations, using a special motor-boat chartered by Sarpom.

The boat is fitted with anti-oil-pollution equipment. Vessel's crew are required to assist shore personnel handling the boom winch and to carefully inspect their hose boom equipment before arrival.

It is recommended that vessels send max. flow possible with due regard to safety, in order to expedite turn-around time, as well as to provide ballasting as quickly as possible.

N.B. The Sarpom Terminal maintains a vigorous tanker discharging safety programme. S.M.T.S. is authorised to suspend discharging operations in the event of any of the safety rules not being observed, or if any other danger is believed to exist. Tankers are expected to follow all safety regulations generally accepted and practised in the marine transport industry (IOTTSG Safety Guide).

The S.M.T.S. will advise the Cargo Officer or a responsible officer in due time when the switching of shore tanks, changes in discharging rates, etc. are required by the shore installation operations and for any emergency stop.

BALLAST: Vessels provided with segregated ballast will start ballasting as soon as possible during discharge operations. All vessels that are able to handle cargo and ballast simultaneously will be authorised to do so, after S.M.T.S. is satisfied that no sea pollution or cargo contamination might occur.

All efforts must be made to avoid the vessel remaining in completely light condition. Should a vessel neither be fitted with segregated ballast nor be able to simultaneously handle cargo ballast, S.M.T.S. in agreement with the Master may ask the vessel to stop discharge operations and start ballasting, after having inspected the tanks involved.

Ballast operations after completion of discharge must be reduced to the min. required for safe handling of the vessel out of

berth, which in fair weather conditions can be: propeller submerged and vessel trimmed 10 ft. by the stern. Ballast operation can continue at reduced speed during unmooring.

While the vessel is ballasting the S.M.T.S. in agreement with the Master will start singling-up by letting go all preventer wires and any other additional mooring lines not strictly required for a safe mooring. This, of course, taking in due consideration all weather and current conditions.

WEATHER: The bay, although sheltered from the strongest winds blowing from the fourth quadrant by high mountains coming down close to the coast, is subject to strong wind gusts from this quadrant, and the relative wind direction varies considerably in different parts of the bay at one time due to irregularities of the coastal heights.

The bay is open to southerly winds and seas, and it is from this direction that seas and swells caused by strong wind between S.E. and South may interrupt marine operations. Delays in this area are mainly due to the impossibility of mooring a vessel under certain weather conditions than to withstand elements once she is moored. The berth current is part of the general offshore current stream and is not wind blown or tidal; its predominant direction is toward the South-west and the maximum speed is 0.8–1 knots; generally currents do not exceed 0.5–0.6 knots. The faster currents are likely to occur more frequently during the winter period; occasionally they reverse and set N.W. with a reduced velocity.

Tide is negligible and fog is rare.

In general, weather in the bay is seasonal. From May to October it is very good. The worst period is from October to December when winds and seas from South cause the maximum number of port closures.

From December to May the strongest winds are experienced from third and fourth quadrants but sea is usually smooth.

12 and 24 hour weather forecast data is available on request on a round-the-clock basis at the Terminal Office. In addition the Office is provided with "Murfax" type continuous long-range weather recording data, waverider receiver, and anemometer.

Broadcast weather reports for Mar Ligure, North Tirreno and Corsica are prepared by Navy Dept. of La Spezia and Air Force Weather Bureau. For Mar Ligure, they refer to Capo Mele (West of Vado Bay). Radiotelephone information concerning weather is also given on 2182 kc/sec. (Genova Radio Station). Weather reports transmitted on 1722 kc/sec. at 0135–0735–1935 hrs. GMT.

Weather forecast covering the following 12 hours is transmitted at 0135 hrs. and 1335 hrs. GMT.

VHF-weather information can be received through Genova Radio Station on Channel 25 at same periods as for radiotelephone.

Special Gale Reports:

Wireless After 15/18 min. and 45/48 min. every hour on 500/487 kc/sec.

VHF On Channels 16 and 25 at same times as above.

SIP (Telephone) – Genoa Weather Report, prepared by Air Force Dept. at Genoa Airport, is based on the Genoa Radio information plus local information received by planes or vessels along the coast from Capo Mele to La Spezia. The report is inserted on a tape recorder and it is amended according to latest information received.

This report can be received by telephone by simply dialling 010-5605 at the following times:

from 31/5 to 26/9 at 0600–0900–1200 hrs. (forecast validity up to 2400 hrs. same day)
at 1800–2000–2400 hrs. (forecast validity up to 0600 hrs. following day);

from 27/9 to 30/5 at 0600–0800–1400 hrs. (forecast validity up to 2400 hrs. same day)
at 2000–2400 hrs. (forecast validity up to 0600 hrs. following day).

In case of necessity the Air Force Weather Bureau can be called by 'phone (010-420341 ext. 275) at any time of the day or night, to obtain additional information about developments of the exisiting situation and forecasts.

FRESH WATER: Fresh water is supplied at the berth, with no limitation, through a 3 in. flexible hose (international flange) at rate of about 60 t.p.h.

FUEL: Bunkers are supplied by barge which moors portside alongside the vessel. Bunker requirement must be radioed to local Agent at least 48 hours in advance. For vessels expecting to arrive on Saturday or Sunday, the requirement must be forwarded not later than Thursday afternoon.

CUSTOMS: Present regulations allow each seaman to retain in his possession a max. of 40 cigarettes or the equivalent of tobacco or cigars, and 1 open bottle of spirits. The balance of all smoking items and spirits must be collected, listed and locked, and included in the Stores List.

MEDICAL: Doctors and hospital facilities are available at Savona.

CONSULS: Consulates for most nations maintain offices in Genoa (about 50 km. from Savona).

REPAIRS: Repair shops for minor repairs are available. For electronic equipment repairs, notice should be sent to the local Agent in due time.

SHORE LEAVE: Launches are sailing from Chevron Pier (located about 1 mile North of berth) and keep regular connection with tankers berthed at Sarpom's berth.

During bad weather the service is performed sailing from Porto Vado.

Sufficient personnel must be aboard at all times for letting go lines so that the vessel can clear the berth whenever required.

AGENCY: Sarpom does not perform any vessel agency functions. Owners of vessels calling at Sarpom Terminal must arrange their own ship's Agent.

AUTHORITY: Port Captain.

RAVENNA: 44.25 N. 12.12 E.

DOCUMENTS:

For Maritime Authority:
- Ship Safety Certificates.
- 3 Crew Lists.
- 3 Passenger Lists.

For Customs:
- 1 Crew List.
- 1 Passenger List.
- Cargo Manifest.
- Bills of Lading.
- 1 Provisions List.
- 1 Customs Declaration of each Crew member.

For Maritime Health:
- 1 Crew List.
- 1 Passenger List.
- Derat Certificate or Exemption.
- Maritime Health Declaration.

For Police:
- 1 Crew List.
- 1 Passenger List.

PILOTAGE: Ordered by Agent in advance. Contact by radio telephone: Nos. 430453 and 430204 during office hours. Cables to Piloti del Porto, Marina di Ravenna. Pilot station and both pilot boats equipped with VHF, Channels 16, 9, 6 and 12. Pilot is embarked not less than 1 mile from head of breakwater. Vessel awaiting Pilot may anchor 1.5 miles from breakwater head. This anchorage is not secure in bad weather. Vessel bound for SAROM installation, embark Pilot at least 0.5 mile from the berths. Pilot launches have black hull with white band, white superstructure, 10 or 14 m. in length.

ANCHORAGE: Anchorage prohibited in vicinity of submarine pipelines and cables. Vessels waiting for a berth may anchor at a distance more than 1.5 miles from the outer breakwater head according to their draft and subject to weather conditons.

RESTRICTIONS: Berthing in daylight only. The channel to the inner port is navigable one way only. Traffic signals are displayed to indicate when channel closed to incoming vessels.

MAX. SIZE: *Inner Port*, draft limited from 17 ft. to 17 ft. 6 in. depending on vessel's beam.

San Vitale, max. draft 28 ft. allowed from port entrance to San Vitale Basin.

Sarom (Oil Platform), length not limited, max. draft 36 ft.

Sarom (Oil Berth), length not limited, max. draft 36 ft.

SBM Terminal, length not limited, max. draft 44 ft.

HEALTH: Pratique given by radio, on request to Sanimare Ravenna. Pratique is automatic for vessels coming from ports in Italy, United Kingdom, France, Belgium, Netherlands, Germany and Greece.

RADIO: Messages via Ancona Radio, Venezia Radio, or Trieste Radio. Ravenna VHF Radio Station operates on Channels 16, 25, 26, and 27.

TUGS: Available, join vessel in outer port. Ship's lines are used.

STEVEDORES: To be ordered before 1030 hrs. for afternoon work, and before 1630 hrs. for following morning.

MEDICAL: All facilities available.

TANKERS: No slop discharge facilities available. Dirty ballast may not be discharged within 50 miles of the port.

S.B.M. TERMINAL:

No. 3 Terminal (Ocean Berth) lies in position Lat. 44° 29′ N., Long. 12° 25′ E. It can accommodate vessels of any length but there is a max. draft of 44 ft.

Discharging by 10-in. flexible hoses connected to ship's port manifold.

Vessel lies stern to buoy heading Northward, using both anchors. These are backed up with a shore wire on each bow. At the stern shore wires are used and there are two breast lines on either side.

If the vessel has to anchor, this should be to the North of the buoy and not less than 3.5 miles from the coast. This gives good holding in mud and clay if plenty of cable is used, as there is occasionally a 2.5 to 3.0 knot Southerly current. Vessels should not anchor South of the buoy due to the presence of telegraphic cables and pipelines.

DENSITY: 1024.

FRESH WATER: Only available ex-wharf at San Vitale and at inner port piers. Barge available for deliveries to the Silos Piers and tanker terminals.

FUEL: Available by barge.

FIRE PRECAUTIONS: Tankers are given copy of port fire regulations on arrival. No repairs or gasfreeing to be carried out without permission of Port Authorities.

DEVELOPMENTS: The buoy berth about 9.5 miles East of Ravenna in a depth of 75 ft. is expected to be operational during 1974.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

OPENING/CLOSING HATCHES: Can be performed by ship's crew or by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes per man for first day in port. Wine/spirits, allowance is made for normal daily consumption on board.

IDENTIFICATION CARDS: Shore passes given by police.

CONSULS:

Norway	tel. 24.5.47
Sweden	tel. 22.6.39
Spain	tel. 24.0.14

REPAIRS: Minor engine repairs can be effected. Floating dry-dock available for up to 1,000 tons displacement.
REPATRIATION: Can be arranged.
AIRPORT: Forli Airport situated 25 km. away, with daily flights to Rome and Milan.
TIME: GMT plus 1 hour. From May to September, GMT plus 2 hours.
POLICE/FIRE/AMBULANCE: Police, tel. 22.4.66; Ambulance, 22.3.11; Fire, 22.2.22.
TELEPHONES: Cannot be installed on board.
SHORE LEAVE: Allowed. Launch service available for vessels in the roads.
AUTHORITY: Capitaneria di Porto Ravenna.
AGENT: Gastaldi and Co., S.p.A., c/o Marittima Ravennate, 23 Via Carducci, P.O. Box 391, Cables "Dick Ravenna". Tel. 23505. Telex 55183.

SALERNO: 40.40 N. 14.45 E.

DOCUMENTS: As for all Italian ports, i.e. all ship's documents in valid condition and Arrival Reports, to be filled upon arrival with the Port Authority's representative.
PILOTAGE: Master may communicate with Pilot in the normal way. Either by hoisting "G" flag, or by calling him on "ALDIS" if night time.
ANCHORAGE: Position of anchorage, about 1.8 miles S.W. of the intermittent red light. Depth of water 12 m.
RESTRICTIONS: Vessel cannot enter or sail from the harbour between 2100 and 0500 hrs.
MAX. SIZE: Vessel allowed to enter port should not exceed 150 m. in length or 23 ft. draft.
HEALTH: Free pratique not obtainable by radio. Usual formalities on berthing.
RADIO: All cables should be sent via "Napoli Radio" call sign "IQH".
No VHF Station exists.
TUGS: Lines must be supplied by the ship. Tugs position is near the intermittent light (red).
BERTHING: Five berths with depths from 19 ft. to 23 ft.
STEVEDORES: Stevedores are to be informed 24 hours prior to vessel's arrival.
MEDICAL: Medical Service should be requested in advance. Hospital facilities are obtainable.
DENSITY: Average salinity is 1025 inside port.
FRESH WATER: Fresh water available at all berths.
FUEL: Bunkers may be supplied from Naples by truck or barge. If large quantities are requested supply will be effected by barge from Naples.
DEVELOPMENTS: Presently some works are in progress in order to obtain a further berth with deeper draft.
CUSTOMS ALLOWANCES: Only 40 cigarettes on vessel's arrival. This applies to officers and crew. The remaining stock will be sealed in vessel's bonded store.
CONSULS: No consular representatives exist in Salerno. Nearest at Naples.
REPAIRS/DRY DOCKS: No dry dock exists. Only small workshops attending minor repairs.
AIRPORT: The nearest airport is at Naples. Distance 70 km.
TIME: One hour ahead of GMT.
HOLIDAYS: Other than the national festivities, 21st September, a local holiday, being the Name Day of the town's Patron Saint.
TELEPHONES: Emergency phone number is: 113.

SAVONA (including Vado Ligure): 44.18 N. 08.29 E.

DOCUMENTS:
Arrival Report for Port Authority.
Cargo Manifest.
Provisions and Crew Personal Effects Manifest.
8 Crew Lists.
Safety Certificates.
PILOTAGE: Ordered through Agent. Telegraphic address: Piloti Porto di Savona. Pilot launch is black with white band. To call Pilot, use flag or light signals according to International Code. For vessels bound for Savona or Vado Ligure, Pilot boards about 0.5 to 1 mile S.E. of the red light at Savona port entrance.
ANCHORAGE: Depths of 25 m. Important limit: it is forbidden to anchor North of bearing 270° from red light between 1st October and 14th May. It is forbidden to anchor East of bearing 360° from the white light between 15th May and 30th September.
RESTRICTIONS: Night entrance is considered for each case depending on type of mooring and vessel's draft. At Savona berths, vessels on maximum draft berth in daylight at high tide. No restrictions on un-berthing.
MAX. SIZE: Savona inner port, max. draft 9 m.; Savona Silos, max. draft 10.50 m.; Vado Ligure Roads, depending on berth depth.
HEALTH: Request free pratique by radio from Sanimare Savona prior arrival.
RADIO: Genova Radio or Roma Radio, VHF at Harbour Master's Office (Tel. 386656).
TUGS: Available, join vessel in vicinity of Savona port entrance or at Vado Ligure just off the berth. Ship's line usually used. If tug line used, tariff plus 20% is charged.
BERTHING:
Savona: Funivie (S. Giuseppe), 32 ft. depth; Savona Silos S.p.A., 30 ft. depth.
Vado Ligure: Fornicoke Pier, 38 ft. depth; Esso berth, 32 ft. depth; Vadoil berth, 39 ft. depth; Shell berth, 31 ft. depth; Chevron berth, 31 ft. depth. Sarpom buoy berths, see "Quiliano Terminal".
BULK HANDLING FACILITIES: Grain: discharged at berth No. 17, rate 500 t.p.h.
Coal: discharged at Funivie, discharging rates ranging between 7,500 and 16,000 tons per day, depending on suitability of vessel for discharging facilities.
TANKERS: Sarpom Sea-Line Terminal, see "Quiliano Terminal".
At Chevron, Shell and Vadoil berths, tankers are moored stern to quay.
No slop discharge facilities available.
STEVEDORES: Ordered by ship's Agent, no separate ETA required.
MEDICAL: All facilities available.
DENSITY: 1025.
FRESH WATER: Obtainable at berths by pipe-line. Barge available for quantities in excess of 60 tons.
FUEL: All grades available by barge.
FIRE PRECAUTIONS: Watchmen on board tankers or vessels handling dangerous cargo.
OPENING/CLOSING HATCHES: Can be handled by ship's crew or stevedores.
CUSTOMS ALLOWANCES: Bond Sealed. Small quantity cigarettes and spirits permitted for consumption while in port.
IDENTIFICATION CARDS: Shore passes given by local police.
CONSULS:

Finland	Norway
France	Spain
Netherlands	Sweden

REPAIRS: All types of repairs possible.
HOLIDAYS: 1st January; 6th January; 19th March; 25th April; Easter Monday; 1st May; 7th May; 28th May; 2nd June; 29th June; 15th August; 1st November; 4th November; 8th December; 25th December and 26th December.
POLICE/FIRE/AMBULANCE: Police, Tel. 28868; Ambulance, 20104; Fire, 801801–802441.
TELEPHONES: Can be connected on board.
SHORE LEAVE: Allowed.
AUTHORITY: Capitaneria di Porto.

TARANTO: 40.29 N. 17.15 E.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Anchorage Dues.
Vaccination Certificates for sighting.
PILOTAGE: Piloting in Port of Taranto is compulsory to all vessels over 500 g.r.t. Vessels are taken 1 mile off S. Vito Cape Lighthouse. Also for shifting from berth to berth Pilot assistance is compulsory.
RESTRICTIONS: Entry allowed day and night.
MAX. SIZE: Tankers up to 72 ft. draft may berth at buoy mooring.
Bulk carriers up to 50 ft. draft may berth at Italsider Pier.
HEALTH: Free pratique is automatic for vessels coming from Italy, France, Great Britain, Ireland, Germany, Belgium, Holland and Greece. From other countries it may be obtained via radio, by applying to "Sanimare Taranto" between 12 and 6 hours before arrival.
Smallpox vaccinations available. Yellow fever vaccinations could be arranged by calling Bari port doctor to Taranto with two days notice.
TUGS: Towage service is not compulsory and is supplied by one tug of 1,350 h.p., 2 tugs of 1,000 h.p., and one of 1,035 h.p. belonging to Rimorchiatori Napoletani. It is expected that the service will be improved in the future with a further tug of 1,920 h.p.
BERTHING: *Outer Harbour:* Quays No. 1/2, combined length, 1,050 ft. (32 m.); max. draft, 26 ft. 3 in. (8 m.); Quay No. 3, length, 820 ft. (250 m.); max. 27 ft. 10 in. (8.50 m.).
Italsider Pier: *Eastern side* (for discharge of ore, coal, steel scrap): length, 4,456 ft. (444 m.); depth alongside 52 ft. 6 in.; max. draft allowed 50 ft.
Western side (for discharge and loading of finished goods): length, 1,566 ft. (477 m.); depth alongside 33 ft.
Safety. During Winter time, berths are subjected to heavy swell which may force vessels to leave same, as the breakwater effectively protects only the Eastern side. However, work is now in progress to lay new breakwater, which should also render safe the Western side.
Head of the Pier: Width, 448 ft. (136.55 m.); max. length of vessel, 459 ft. (140 m.) or up to 525 ft. (160 m.), subject to vessels laying at Western and Eastern sides being berthed at not less than 164 ft. (50 m.) from head of pier; depth alongside, 32 ft. 8 in. (10 m.).
Cement Pier: Max. depth is 8.50 m.; suggested max. draft 8.20 m. (26 ft, 10 in.); max. vessel length acceptable, 120 m.; rate of loading (in bulk): up to 280 m./t.p.h.; (in bag): up to 35 m./t.p.h.
TANKERS: *Aviation Gasoline Oil Jetty.* Tankers moor with two anchors and with stern made fast to four buoys. Connection by

stern. Vessel lifting up hoses (9 in.) from the jetty (breadth 9 ft., length 1,476 ft.). Length of pipe-line from 0.5 to 1.5 miles.

Access to vessel by boat. No water or bunkers available. Max. draft 25 ft. Night crossing of Mar Piccolo up to and from jetty is not allowed.

Navy Oil Jetty: Pier, terminating in two quays, which may accommodate two vessels each. Max. draft 33 ft., hoses 300 mm. Night movements allowed.

Petroleum Pier: Exclusively used for handling petroleum products at its four berths and is connected by several pipe-lines with Shell Italiana Refinery, as well as with the bulk plants belonging to Agip, and Industrie Chimiche De Gaeta, which are all located in the industrial area of Taranto adjoining to the petroleum port. Access to the pier is through a dock 350 m. long and 33 m. wide. The pier itself is 560 m. long.

Berth No. 1 and 2 (aft berths), max. length of vessel, 175 m. (557 ft. 3 in.); max. draft, 9.50 m. (31 ft. 2 in.). Max. depth, 10 m. (32 ft. 9 in.). Bunkers from line, (8 in. hose, 10 in. pipe-line). Water, by barge. Loading arms, 2 of 10 in., 3 of 8 in.

Berth No. 3 and 4 (fore berths), max. length of vessel, 208 m. (682 ft. 5 in.); max. draft, 10.50 m. (34 ft. 5 in.); max. depth, 11.00 m. (36 ft. 1 in.). Bunkers and water, as per berths 1 and 2. Loading arms, 6 of 10 in.

Pier is fitted with one line for each product to be loaded (14 lines) and a 20 ft. line for ballast discharge. Any quantity of ballast may be received by the pier. Access to the pier for provisions only via boats.

Shell CBM. Shell terminal for discharge of crude oil is situated in Mar Grande North-east of St. Paul's Island. Distance 3,000 m., and bearing 048° from light at the head of St. Paul Breakwater. Vessels moor at five buoys with port anchor down. Buoys are equipped with intermittent red lights and quick-release hooks.

The hoses (two of 12-in.) are signalled by marker floats and have to be lifted by vessel with derrick capacity at least 8 tons. The terminal is connected with the refinery by a 34-in. pipe-line, 5 km long. Max. length acceptable 330 m., max. draft 72 ft., max. d.w.t. 200,000 tons.

Two tugs recommended for berthing with good weather and without North-westerly winds. Night mooring and unmooring allowed.

Agip/Anic Terminal: Vessels moor with two anchors and with stern made fast to four mooring buoys.

Maximum draft 26 ft. 3 in. (8 m.). Under rough weather conditions vessels may have to leave the terminal, position being exposed. No mooring at night allowed, while unmooring is permitted. Supplies, bunkers, water, and connections with vessel by barge.

For methanol, tank inspection is usually carried out in the road, before berthing.

Pozzi Ferrandina SPA Terminal: Three sea lines, the hoses of which must be lifted from the sea bottom by ship's gears. One sea line (6 in.) is used to load methanol and one (6 in.) to load soda. Third (3 in.) sea line is for water. Port side hose connection. Pipe-line length 0.25 mile.

Vessels moor with starboard anchor and made fast to three buoys astern and one port. Night movements are not allowed. Max. draft 22 ft. Max. length 85 m.

Industrie Chimiche Di Gaeta, G.I.D. Terminal: Situated further West of Pozzi Terminal, it has three sea lines with hoses of 6 in. and 10 in., which have to be lifted from sea bottom.

Vessels moor with port anchor and make fast to three buoys astern and one buoy forward starboard. Max. draft 22 ft. Night movements not allowed.

BRIDGES: One bridge in inner harbour. Opening times: 0020–0420 hrs., 0830, 1510, 2110 hrs. Opening on Agent's request to Harbour Master (24 hours notice requested for day opening time). Max. speed in the canal, 6 knots.

STEVEDORES: Available. Normal working hours are from 0700 to 1500 hrs. For work performed in overtime/and/or holiday, the "Tariffs to the Workers" are increased as follows:

Day	*Shift*	*Increase*
Weekday	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Saturday	1100–1500 hrs.	40%
	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Sunday	0700–1500 hrs.	50%
	1500–2300 hrs.	80%
	2300–0700 hrs.	100%

DENSITY: 1029 and 1031. Tides negligible. Maximum variation 1 ft.

FRESH WATER: Available at all quays from 0700 to 1700 hrs. Also available by barge of up to 190 tons capacity.

FUEL: Available by barges from Agip; Shell and Sincat. 48 hours notice requested, aside from usual stemming.

Lubricating Oil. Available from Shell, Mobil and Esso.

FIRE PRECUATIONS: Performed by fire brigade and compulsory to all tankers undergoing repairs/dry docking. It is requested and paid for by the shipyard, which afterwards charge same directly to the Owners.

GANGWAY/DECK WATCHMEN: Available. Hourly cost, lire 450 per watchman used (lire 500 on Sunday and holiday).

OPENING/CLOSING HATCHES: Usually carried out by crew, but stevedores also carry out this operation at 1,202 lire per hatch.

CUSTOMS ALLOWANCES: 40 cigarettes and one opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

CONSULS: Spain, France, Panama and Norway.

REPAIRS: All major repairs undertaken.

DRY DOCKS: Two floating docks owned by Stabilimenti Navali with dimensions as follows:

	Dock No. 1	*Dock No. 2*
Length at support level	699 ft. 8 in.	808 ft. 4 in.
Length overall	765 ft. 4 in.	869 ft. 4 in.
Breadth at support level	121 ft. 3 in.	137 ft. 1 in.
Depth	29 ft. 8 in.	27 ft. 9 in.
Lifting capacities	28,000 tons	40,000 tons

Max. draft acceptable in channel leading to the shipyard is 33 ft.

REPATRIATION: Good facilities exist.

AIRPORT: Located at Grottaglio, 20 minutes by car from the city. It is served by four daily connections with Rome, and one to Naples.

TIME: GMT plus 1 hr. Winter. GMT plus 2 hrs. Summer.

HOLIDAYS: New Year's Day (1st January); Epiphany Day (6th January); Saint Joseph's Day (19th March); Liberation Anniversary (25th April); Easter Monday; Ascension Day (19th May); Corpus Domini Day (9th June); Labour Day (1st May); Republic Foundation's Day (2nd June); Saint Peter and Paul's Day (29th June); Assumption Day (15th August); All Saints' Day (1st November; National Unity Day (4th November); Immaculate Conception Day (8th December); Christmas Day (25th December); Saint Stephen's Day (26th December); Town Saint Patron's Day 10th May, at Taranto).

SERVICES: Compass adjusting, etc. available.

SHORE LEAVE: Allowed.

AUTHORITY: Il Comandante Colonello di Porto. Ministero della Marina Mercantile.

TORRE ANNUNZIATA: 40.45 N. 14.27 E.

DOCUMENTS and all General Information – refer to "Naples".

RESTRICTIONS: Mainly a fishing port with few facilities for larger vessels. Reported not to be suitable for larger vessels during winter months due to frequent high winds and heavy swell within the harbour.

MAX. SIZE: Length 472 ft., draft 30 ft.

TRIESTE: 45.39 N. 13.45 E. (See Plan)

PORT LIMITS: From Barcola (4 km. East of Capo Miramare) to Zaule, in the Muggia Bay. The roadstead is 18/24 m. deep. If readiness is declared before 1200 hrs. laytime commences at 1300 hrs. If readiness is declared between 1200 hrs. and 1700 hrs. laytime commences at 0800 hrs. the following day. The declaration of "readiness" is made when the ship docks at the operative pier or when the ship anchors in the roadstead.

DOCUMENTS:

For Customs:
- 2 Cargo Manifests.
- 1 Stores List.
- 1 Provisions List.

For Port Authorities:
- Arrival Report.
- 2 Crew Lists.
- 3 Passenger Lists.

For police:
- 1 Crew List.
- 1 Passenger List.
- Shore Passes, provided by Agents.

For Port Health:
- Maritime Declaration of Health.

PILOTAGE: Compulsory for vessels over 499 g.r.t. Location of Pilot station for large tankers is in approximate position 45° 37′ N., 13° 43′ E.

For smaller vessels Pilot boards in approximate position 45° 39′ N., 13° 44′ E.

ANCHORAGE: No Pilot required to anchor in roads. Normal anchorage for vessels awaiting entry is to the West of Luigi Rizzo Breakwater where the holding ground has been reported to be poor.

MAX. SIZE: Tankers up to 1,000 ft. LOA, draft 54 ft. 3 in. and 160,000 S.D.W.T. at Siot Terminal berths No's 3 and 4.

HEALTH: Free pratique is granted by the local Health Officers who board the vessels on arrival together with Port Authorities. The pratique can also be requested by cable, addressed to "Sanimare – Trieste" and stating the port of origin, the number of crew and general health condition on board.

RADIO: Trieste radio call sign IQX, operating continuously. Radio Telephony and/or telegraphy can be used. RTF Channels 8, 12, 16, and 500. ETA to be sent 48 hours in advance to Agent. Any change of ETA of more than 1 hour should be reported.

TUGS: 10 tugs available up to 3,000 h.p. Tugs normally join vessel at pilot boarding station. Ship's lines used. Tug assistance is compulsory for tankers. Tugs equipped with VHF and foam fire fighting equipment.

BERTHING: Max. draft allowed at berths as follows:

Punta Franco, Vecchio, ore pier, 28 ft.; Other berths, 21 ft. Punto Franco, Nuovo, ore pier, 30 ft. silos, 31 ft. 5 in.; general cargo, 31 ft.

Punto Franco, Scalo Legnami, 24 ft. Molo Martello, 30 ft., max. length of ship, 171 m. Italsider, berths, 45 ft.

Siot Terminal, 54 ft 3 in. Pontile Aquila, oil pier, 38 ft. Italcementi, berths, 30 ft. Vetrobel, berth, 30 ft. A.F.A., berth, 21 ft.

Mole No. 7 (Container Terminal)-, max. draft 52 ft.

SPECIALISED CARGO HANDLING FACILITIES: Wheat storage-bin for cereals and oil-seeds, capacity 30,000 tons, with 4 pneumatic unloaders. Auxiliary set, capacity 16,000 tons, with 3 pneumatic dockers.

Coals and minerals plant, Molo VI North, with 7 cranes and 2 bridge cranes.

Coals and minerals plant Italsider pier with two 25-ton unloaders.

Unloading, loading, alcohol and other liquid stowage plant, capacity 5,340 cu.m.

Maturity, conservation and disinfestation fruits and vegetables plant.

Refrigerant, capacity 3,700 tons.

Container Terminal: Quay length 650 m., total area 20 ha. 3 rail-mounted 42-ton gantry cranes (portainer) and other modern and special installations for unloading/loading, moving and parking containers.

Roll-on/Roll-off: 2 ramps.

STEVEDORES: The working hours for the harbour operations are: 1st turn from 0730 to 1400 hrs. 2nd turn from 1400 to 2030 hrs. On Sundays and holidays the 2nd turn is limited to ferry boats, container ships, unloading/loading of live animals, and to perishable goods operations. Customers can take advantage of a possible 3rd turn in the labour days, Monday to Friday, from 2100 to 0330 hrs.

Night work, Sundays and holiday work, the 2nd turn of Saturday and the continuation of the turn is considered as overtime work.

MEDICAL: All facilities available. Preferable order in advance if required on holidays.

TANKERS: No slop discharge facilities; no repairs allowed to tankers at loading/discharge berths; no trucks or lorries allowed at Aquila Oil Pier which can only be approached by motor boats.

Transalpine Pipe-line Terminal (Siot). The piers are orientated 067.5°–247.5° in direction of prevailing winds. Currents do not affect the berths sensibly.

Berths No. 1 & 2 (No. 1 Finger pier 1420 ft. LOA). Max. LOA 950 ft. Max. draft 54 ft. 3 in. Max. d.w.t. 100,000.

Berths No. 3 and 4 (No. 2 Finger pier, 1,475 ft. LOA). Max. LOA 1,000 ft. Max. draft 54 ft. 3 in. Max. d.w.t. 160,000.

Discharge of crude or products is via 3×16 in. unloading arms at berths No. 1, 2 and 3 and via 4×16 in. arms at berth No. 4. The shoreline is 36 in. at foot of pier enlarging to 42 in.

Discharge rates of 14,000 cbm/hr. are possible. Max. permitted pressure 150 p.s.i.

Fuel oil and marine diesel bunkers are available at all berths through 10 in. loading arms on each side of the discharging rack.

Fresh water available all berths and should be ordered through the Agent.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No barges available.

FUEL: All grades available, loading rate about 250 t.p.h. 48 hours notice required.

DEVELOPMENTS: New dry dock 350 m. length under construction.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Optional, but stevedores usually perform this operation for convenience.

CUSTOMS ALLOWANCES: 50 cigarettes for each man and one bottle wine/spirits between 5 men. Only one allowance given while vessel in port.

IDENTIFICATION CARDS: Shore passes are issued by local police.

CONSULS:

Austria	tel. 90891	Holland	tel. 61690

REPAIRS: All kinds of hull, deck and engine repairs can be carried out by Arsenale San Marco, Cantieri Alto Adriatico and other yards.

DRY DOCKS: 4 dry docks available, the largest of which is 206.96 m. long; 30.0 m. wide, 27.60 m. depth and 8.25 m. sill depth.

REPATRIATION: No facilities.

AIRPORTS: 30 miles distant. Two flights daily to Venice/Milan and Rome for international connections.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Good Friday, Easter Monday, Ascension Day, Corpus Domini (variable dates); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); St. Giusto (3rd November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December); Cargo work can be arranged on the above days.

POLICE/FIRE/AMBULANCE: Police, tel. 113; Fire, 2222; Ambulance, 68888.

TELEPHONES: Can be installed on board.

SHORE LEAVE: Allowed.

AUTHORITY: Ente Autonomo del Porto di Trieste.

VENICE: 45.26 N. 12.20 E.

DOCUMENTS: Minimum number of ship's papers required upon arrival:

By Port Health
2 copies Passenger List.
2 copies Crew List.

By Police
2 copies Passenger List.
2 copies Crew List.

By Ship's Agents
2 copies Passenger List
2 copies Crew List.
2 copies Cargo Manifest.

By Customs
2 copies Cargo Manifest.
2 copies Provisions and Stores List.

PILOTAGE: Pilot boards 2 miles from breakwater. Master can contact Pilot by VHF.

ANCHORAGE: Anchorage for large tankers will depend upon Master's discretion. However there is a good anchorage in position 45.23.30 N. 12.34.00 E.

RESTRICTIONS: Advisable to enter during daytime and with favourable tide. Vessel up to 29 to 30 ft. draft can enter at high water. Vessel of this size can berth alongside with use of a pontoon. Tankers; normally restricted to 31 ft. draft. Also see "Tankers".

HEALTH: Health Officer boards as soon as vessel is berthed. Pratique can be obtained by radio prior arrival. Radio request to Sanimare Venice through Trieste Radio.

TUGS: Tugs are available in plenty and will join vessel at breakwater and/or off Lido when proceeding to S. Nicolo. Ship's lines have to be used.

BERTHING: Banchina Piave have a total quayage of 2,760 ft. long with a depth of water varying from 25 to 26 ft. at low water.

Banchina Tagliamento have a total quayage of 2,500 ft. long with a depth of water varying from 26 to 29 ft. at low water.

Testata Marmi have a total quayage of 720 ft. long and 26 ft. depth of water.

Banchina Palazzo have a total quayage of 525 ft. long and a depth of water of 26 ft.

Banchina Isonzo have a total quayage of 2,360 ft. long with depth varying from 24 to 30 ft. at low water.

Testata Silos have a total quayage of 330 ft. long with a depth of water 21 ft. at low water.

Banchina S. Marte e Magazzini Generali Punto Franco (Free Port) have a total quayage of 2,950 ft. long with a depth of water varying from 21 to 23 ft. at low water.

Porto Marghera:

Leghe Leggere with a depth of water 27 ft. at low water.

Radice Molo "A" with a depth of water 27 ft. at low water.

Banchina Veneto with a depth of water varying from 22 to 25 ft. at low water.

Banchina Lombardia with a depth of water 28 ft. at low water.

Banchina Piemonte with a depth of 30 ft. at low water.

BULK HANDLING FACILITIES: Bauxite discharging at Montecatini and Molo Commerciale in Porto Marghera.

Discharge by crane grabs at rate of 2,000 tons per day at Montecatini, and 1,500 tons per day at Molo Commerciale. Vessels up to 28 ft. draft can be accommodated.

STEVEDORES: The Provveditorato al Porto Venice are exclusively entitled to manage all the commercial work in the harbour including stevedores. Vessel should en route ETA cable to Agent at least 48 hours prior vessels arrival to arrange gangs.

MEDICAL: Hospital facilities always available. No notice required in advance.

TANKERS: Tank washings cannot be disposed of inside port. Diameter of loading discharge lines 8 to 12 in.

One berth for tankers at San Leonardo can accommodate vessels up to 85,000 d.w.t. Max. draft is 43 ft. 3 in. Good discharging and no back-pressure. Speedboats up to Venice take about 40 minutes.

Discharging berths for tankers at Porto Marghera:

Darsena IROM, length 570 m., depth 30 ft. Tankers over 31 ft, draft require special approval.

Esso Pier: depth alongside 30 ft.

Shell Pier: depth alongside 30 ft.

Agip Pier: depth alongside 23 ft.

Port entrance of Malamocco, at point of the island of Lido, has been reopened where a canal 12 m. deep leads to Port of Marghera. This canal allows large tankers to proceed to coastal storage tanks without passing through urban centre of Venice.

DENSITY: Average salinity of water inside port 1020.

FRESH WATER: Plenty available.

FUEL: All grades available and delivered by barge.

CUSTOMS ALLOWANCES: The Customs require from the ship a complete list in duplicate of Provisions and Stores. It is particularly important that the quantities of items such as tobacco, cigarettes, spirits, coffee, matches, pepper, salt, spices, cars, chocolate, should be given accurately. Customs Officers will supervise the issue while ship is in port. Amount of tobacco allowed out of Bond: 50 cigarettes per man for all foreign vessels except British and U.S.A. flags. 20 cigarettes per day per man on British and American flag vessels.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CONSULS: Following are Consulates maintaining their offices at Venice.

Argentine	Germany	Panama
Austria	Greece	Peru
Belgium	Guatemala	Portugal
Denmark	Lebanon	Spain
Finland	Liberia	Sweden
France	Norway	Switzerland
Great Britain	Holland	Uruguay

REPAIRS/DRY DOCKS: There are ample facilities for repairs. Following are particulars of Venice dry docks:

Minore	*Maggiore*	*Principe*	
298.8 ft.	526.3 ft.	820.3 ft.	extreme length
58.4 ft.	79.8 ft.	117.8 ft.	breadth of entrance
1.0 ft.	1.0 ft.	3.1 ft.	height of sill above bottom dock
19.7 ft.	29.6 ft.	36.0 ft.	depth on sill at high water.

AIRPORT: International Airport Marco Polo about 10 km. from Porto Marghera. Served by regular airlines.

TIME: GMT plus 1 hour. Summer Time from June to September.

HOLIDAYS: The public and port holidays are the following: 1st January; 6th January; 19th March; 25th April; Monday after Easter Day; 1st May; Ascension Day; Corpus Christi Day; 2nd June; 29th June; 15th August; 1st November; 4th November; 21st November; 8th December; 25th December; 26th December.

TELEPHONES: Telephones will be placed aboard the ship.

AUTHORITY: Il Comandante di Porto.

AGENT: Bassani S.p.A., Venice – Via 22 Marzo, 2414, PO Box 484. Tel. 20340 – 22771. Telex 41066. (Subagents of Gastaldi & Co) Cables: "Dick Venice".

NOTES

Please also advise Shipping Guides (Services) Ltd.

Ivory Coast

ABIDJAN: 05.18 N. 04.00 E.

DOCUMENTS: "All ships calling at Abidjan to discharge cargo will have to supply on arrival altogether 13 sets of cargo manifests and 4 sets of freighted manifests for each port of loading, as the administration no longer accepts reproductions of documents supplied by the agents. Furthermore, Masters are reminded to hand to agents on arrival, 6 crew lists, 4 stores lists, 4 bonded stores lists, 4 crew declarations, 6 passenger lists (even if nil), 5 animal lists (even if nil), 5 narcotics lists, (even if nil), 5 lists of ports of call and 1 vaccination list. Furthermore, the attention of Masters is drawn to the fact that the Customs Services are strictly enforcing the control regulations on incoming vessels and very heavy fines are imposed in cases of omission or mistakes in declarations of slop chests, stores lists etc".

PILOTAGE: About 1 hour before arrival ships equipped with VHF shall confirm to the Pilot station their correct hour of arrival off the roads; then the boarding time for Pilot shall be communicated. It is essential that these times are clearly understood both by ship and Pilot station.

Ships shall stay in a position so they keep across the swell and the wind which both generally come from the South and they shall put the pilot ladder at the lee, i.e. Port if steering Eastward, Starboard if steering Westward.

Pilotage is compulsory, except for shifting alongside quays. For ships leaving harbour or shifting within harbour limits, request for a Pilot should be made at the Harbour Master's Office at least 3 hours before sailing or shifting. For a night sailing or shifting, request must be made before 1700 hrs.

Warning: when embarking Pilot, keep well clear of sandbank extending from entrance to Vridi Canal.

RESTRICTIONS: Ships may leave or enter Abidjan only between certain time limits. These limits are transmitted by Abidjan-Radio: on 500 kc/s on request; on short wave, at the beginning of each watch period.

MAX. SIZE: Max. draft 32 ft., max. length 200 m.

HEALTH: Request for free pratique is given by the Agent to port Health Authority, who will board vessel on arrival.

RADIO: Captains should radio their ETA and draft to "Comport Abidjan". When at anchorage off Vridi canal, they should watch for signals from Vridi signal station, which keeps continuous watch, and advise them regarding the time the Pilot will board their ship. Port Captain's office and Vridi signal station keep a permanent watch on 156.6 Mc/s and 156.8 Mc/s. Agents may be obtained through Abidjan-Radio on 2182 kHz. Abidjan-Radio answers on 1813 kHz.

VHF: 16 and 12 Channels are used: 16 for security and 12 for general traffic. It is strongly advised to use Channel 12. This channel is strictly reserved for the harbour traffic and ships wishing to talk to each other should do so on a ship to ship Channel (6 or 8).

PORT RADAR: Is installed in the Harbour Master's office. Vessels can contact port radar by VHF calling Comport Abidjan on Channels 16, 12 and 11, or through Abidjan Radio, which keeps watch on Channel 16.

TUGS: Tugs join vessel at the port entrance. Towing lines are provided by the tug.

BERTHING: At the Tanker berth in the Vridi channel, berthing is effected at slack water and unberthing is effected at the end of flood tide. Mooring at the sea line buoys at Port Bouet is only made at certain stages of the tide determined by the Pilot.

SPECIALISED CARGO HANDLING FACILITIES:

Cranes: Two sheer-legs for unloading heavy lifts, capacity 150 and 25 tonnes.

2 gantry cranes for timber handling, capacity 10 and 20 tonnes.

Grain: Priority berthing at No. 1 berth where silos and handling equipment available.

Containers: Discharged by vessel's derricks and removed by trailers. Proper container handling berths available in near future with container park of 30,000 sq. m.

Bananas: 1 specialised berth with accommodation for two vessels, max. draft 7 m.

Ore: 1 berth available, max. draft. 10m.

Timber: 2 berths. One with length of 300 m. and max. draft 2.50 m. and the other length 380 m. and max. draft. of 0.70 m. Timber is lowered into the water by gantry cranes and floated out to vessels.

TANKERS: 1 Private berth in the Vridi Channel, max. draft 30 ft. *Shipmaster's Report: The Sea Line Berth at Port Bouet near Abidjan.*

(a) Introduction: Vessel ordered to part discharge 21,000 tons of crude. With a max. draft of 48 ft. 6 in., this was the largest vessel to use these facilities; the previous largest being about 60,000 d.w.t. (1973).

(b) Approach from sea: Coast line is low with few distinguishing marks. Outline picked up at about 18 miles range (using Marconi Raymark), at about the same time as 100 fathom line was crossed. Coast is very steep-to with a pronounced rift in sea bed leading to canal entrance in Abidjan.

(c) Anchorage: Vessel anchored about 2 miles from sea line terminal at Port Bouet. The usual anchorage is to West of canal, which would permit a more suitable approach to the berth.

(d) Berth: The sea berth is situated about 1 mile S.S.E. of Port Bouet light. According to chart prepared by terminal authorities Societe Ivoirienne de Raffinage (SIR), the depths of water in the berth are 16 m. aft and 19 m. for'd, at chart datum. Members of the diving team and terminal representatives are of the opinion that there is greater than 1m. more water than indicated; this is backed up by observed soundings of for'd depth of 21 m., with a rise of tide of 0.5 m.

Moorings consist of four 6 in. shore wires from buoys aft; 4 similar wires for'd, 2 from buoys, 2 from the sea bed; both anchors are used with about 8 or 9 shackles of cable on each.

Hoses are made fast on port side, 2×12 in. leading to a 1×24 in. × 5 km. sea line. Back pressure is limited to 7 kg./sq. cm. (about 100 lb. sq. in.). Berth is aligned to head into the prevailing Southwesterly wind. Unfortunately this places the vessel beam on to the current which is unpredictable in both magnitude and direction. After 9 years' experience at the berth, the diving team are unable to predict for a particular time if the current will run at all, or in what direction or at what strength. Current velocities of up to 2.5 knots are normal. If the current starts to run at this strength at an early stage of a berthing operation it is probable that the operation will have to be abandoned.

(e) Berthing: Approach to the berth is made on a heading of 145° in line with buoys A and B on SIR chart. During much of the approach the vessel is within 5 cables of the shore, but, with one exception, the depth of water is adequate.

When the vessel was between 1 and 2 ship's lengths from buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h., which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

STEVEDORES: Gangs must be ordered before 1700 hrs. on the previous day.

MEDICAL: All medical services and hospitalisation can be arranged without difficulty. Crew members are obliged to have valid certificates against smallpox and yellow fever.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

WATCHMEN: Services of shore watchmen are recommended.

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

CONSULS: The following countries are represented locally:

Algeria	Germany	Morocco
Belgium	Ghana	Netherlands
Brazil	Great Britain	Nigeria
Colombia	Italy	Norway
Congo	Israel	Sweden
Denmark	Japan	South Vietnam
Ethiopa	Korea	Tunisia
Finland	Lebanon	U.A.R.
France	Liberia	U.S.A.
Gabon	Mauretania	U.S.S.R.

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction.

DEVELOPMENTS: Additional berths to be constructed at Vridi Jetty.

A container park of 30,000 sq.m. to be constructed.

The access channel to be deepened and widened to allow vessels of 37 ft. 6 in. draft to enter. Channel width to be 130 m.

AUTHORITY: Direction du Port D'Abidjan, Commandant du Port.

AGENT: Socopao Cote D'Ivoire, B.P. 1297. Tel. 32 02 11. Telex 745, 755, 413. Telex (Maritime): 562. Cables: "Freight Abidjan".

Jamaica

KINGSTON: 17.57 N. 76.47 W.

DOCUMENTS:

For Customs Port Royal

2 Health Certificates (obtainable from Customs Port Royal).
2 Crew Lists.
2 copies Passenger Lists.
2 Dangerous Cargo Lists.
1 Ship's Register.
2 Crew Declaration (obtainable from Customs Port Royal).
2 Stores List.
International Certificates of Vaccination for each Crew member.

For Immigration

2 Crew Lists.
2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Derat. Certificate.
International Certificates of Vaccination for Crew members.

PILOTAGE: Forty-eight hours advance notice to Agents required. Pilot boards vessel about 2 miles S.E. of Plumb Point Lighthouse. Vessels required to anchor at Port Royal whilst Customs board to grant pratique and seal stores. Contact Pilot station VHF Channel 11. Several small Pilot boats in use at present which come out from Kingston as required.

ANCHORAGES: Depth of ship channel 35 ft. recommended. 4 specified anchorages, namely A, B, C, D – these having to be reserved in advance. Also unlimited anchorage space towards Eastern end of harbour. Positions of these 4 specified anchorages as follows:

Anchorage A 221° distant from R.C. Cathedral Dome 14.4 cables.
Anchorage B 180° distant from R.C. Cathedral Dome 11.0 cables.
Anchorage C 168° distant from R.C. Cathedral Dome 10.7 cables.
Anchorage D 155° distant from R.C. Cathedral Dome 11.0 cables.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots in some places. Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15–November 15.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel has max. recommended draft of 36 ft. 6 in. and is 800 ft. wide. Depth 39 ft. at MLO. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".
Radio Pratique may be granted.

Pratique Procedure: The Customs Officer who boards vessel will indicate to Master when pratique granted, after he has checked all documents and placed under bond all excess tobacco and liquor on board. In respect of vessels arriving from restricted areas (e.g. Texas, U.S.A.) vessel will not be granted pratique at Port Royal but at berth after being sprayed (at berth) by Quarantine Officer. A vessel with suspected fever or disease on board should inform Agent before arrival. The Agent will advise Customs at Port Royal and Quarantine. The Quarantine Officer will tell Master whether to proceed to Quarantine Anchorage or to berth direct.

If a vessel obtains pratique at Kingston, automatic pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Tugs optional. Tug joins incoming vessel near berth. In case of emergency tug joins vessel wherever requested by master. Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: No specific requirements for berthing. If explosives on board a special permit is required from Harbour Master and Customs. Extract from Gunpowder and Firearms Law:

"Twelve hours' notice shall be given by Agent of ship to Harbour Master or Principal Officer of Customs, as case may require, of intended arrival of a ship with Gunpowder and/or Dangerous Explosives on board, and such ship shall not be permitted to come alongside a wharf or any ship in Harbour or to break bulk until Harbour Master or Chief Officer of Customs, as case may be, is satisfied that Gunpowder and/or Dangerous Explosives are of such character and are so stowed, or are in opinion of Harbour Master or Collector of Customs, in such trifling quantity as not to be an element of danger, when proper Officer shall certify –

(a) that in consideration of character, method of stowage, or quantity of such Gunpowder and/or Explosives it is safe for such ship to berth and proceed to discharge cargo without special precaution, or

(b) that having regard to considerations aforesaid such ship should discharge such Gunpowder and/or Explosives into lighters or at place appointed under rules for special landing before being allowed to berth or break bulk in connection with landing or shipping of other cargo."

L Kingston has a new port development in harbour West of the city. There are nine berths (numbers 1–9) operated by two private wharf companies. All berths equipped for Ro/Ro traffic. Max. depth of water in channel approaching and alongside berths is 35 ft. Recommended draft is 32 ft 6 in. Bunkering facilities available at all new berths.

		Length	*Depth*
Old Port:	No. 1 Pier	580 ft.	24–37 ft.

Newport West: Operated by Western Terminals.

Berth No.	Length	Depth
No. 1	525 ft.	26 ft.
No. 2	600 ft.	35 ft.
No. 3	600 ft.	35 ft.
No. 4	600 ft.	35 ft.

Operated by Kingston Wharves.

No. 5	600 ft.	35 ft.
No. 6	600 ft.	35 ft.
No. 7	600 ft.	35 ft.
No. 8	600 ft.	35 ft.
No. 9	600 ft.	35 ft.
No. 10	600 ft.	40 ft.
No. 11	600 ft.	40 ft.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700–1400 hrs., 1400–2100 hrs. Mondays to Fridays; 0700–1200 hrs. Saturdays. Sundays – full overtime.

Stevedores normally rig and open, but crew open McGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gears, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

CARGO HANDLING: Wherry Wharf (a Sufferance Wharf) maintains a pier at Newport East for unloading lumber, corn and animal feed ingredients. The wharf is 200 ft. long and a depth of 29 ft. and an apron of 200×60 ft.

Jamaica Gypsum Limited: Jamaica Gypum Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The minimum draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700-1000 t.p.h. are available.

There are no specialised berths on the public wharves for handling bulk cargoes. Although sulphur salt, caustic soda and grains have been discharged, consignees make their own discharging and storage arrangements.

Grains for the flour mill and feed factory are discharged at Shell Oil Pier and conveyed by the plant's own system into the factories. Berths 1 to 9 in Newport West are equipped for roll-on/roll-off traffic and containers. There is a mobile crane stationed on the docks capable of lifting 140 tons max. Liquid chemicals and LPG are handled by the oil companies at their private docks.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in.–4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.:
Texaco Caribbean Inc. operates 2 wharves:

Eastern Terminal: Jetty 325 ft. long. Takes vessels up to 18,000 tons (gross). Maximum draft is 28 ft. at low tide, Berthing facilities provide 2 concrete dolphins supported by steel piles and 4 mooring buoys. 6 pipe-lines are run on the jetty for the receival of bulk petroleum products and the bunkering of vessels. No packaged goods are handled at this berth. Fresh water supplies are available.

Western Terminal: Jetty 643 ft. long. Takes vessels up to 18,000 tons (gross). Constructed with 2 concrete dolphins and wooden dock head. Berthing facilities provide 2 mooring buoys. Maximum draft at low tide is 28 ft. 6 in. Four product lines are run on the jetty to receive cargoes only. Fresh water is not available at this jetty. No packaged goods are handled at this berth. However, this berth is inactive at present.

Shell Company (W.I.) Limited: The Shell Company (W.I.) Ltd. has bunkering facilities at 2 wharves:–

Shell Installation: The wharf has a maximum draft of 32 ft. It is used for loading and unloading of goods in connection with the petroleum operations in Jamaica of the Shell Company (W.I.) Ltd. and also loading and unloading of goods in connection with Jamaica Flour Mills Limited. A complete range of bunkers is available.

Shell Bunkering Depot Newport West: A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso Standard Oil S.A. Limited: Esso Standard Oil S.A. Limited operates 2 wharves:–

Esso Marketing Terminal: Maximum length of vessels – 600 ft. Maximum safe draft – 29 ft. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Auto Diesel and a wide range of intermediate bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil, Diesel Oil and intermediate ranges of bunkers.

Esso West Indies Limited (Refinery):
Operates 2 Wharves:
Esso Refinery Marine Dock:
Maximum length of vessels – 690 ft. Maximum safe draft 34 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. undersea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.
Esso Refinery Dry Cargo Dock: Maximum length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers) with maximum safe draft of 18 ft. Fresh water is available. This dock is used for loading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.
Other material exported here are lubricating oil in bulk and various grades of asphalt in drums.
DENSITY: Average density 1026. No tide.
FRESH WATER: Fresh water avaiiable at berth. Average rate of delivery 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days advance notice required.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. McGregor hatches handled by crew.
CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.
CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.
CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.
IDENTIFICATION CARDS: No Identification Cards required.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.
DRY DOCKS: No dry dock facilities available.
REPATRIATION: Facilities available for effecting crew changes.
AIRPORT: 10 miles from port and is served by regular airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.
POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.
TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.
GENERAL: Bunkering Facilities: Bunkers are supplied by three firms: The Shell Oil Co. (West Indies) Ltd. Texaco Caribbean Inc. Esso Standard Oil S.A.
Ship's Chandlers: 3 ship's chandlers available.
Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.
Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.
SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.
SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.
REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.
DELAYS: Normally there are no delays to vessels calling at the port.
AUTHORITY: The Harbour Master, Kingston.
AGENT: Jamaica Freight and Shipping Co. Ltd., 80-82 Second Street, Newport West, Kingston 11. P.O. Box 167, Kingston, Jamaica. Tel. 923-9271-6 (six lines). Telex 2260. Cable address: Jashipco Kingston.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".
ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.
RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January–February to occasional 2–3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500-ft.-long 400-ft.-wide straight channel has a min. depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration offices are maintained at the port.
BERTHING:
Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited, P.O. Box 303, Montego Bay.
Berth 2–600 ft. long, 34 ft. min. depth alongside, 7.5 ft above water line.
Berth 3–588 ft. long, 25 ft. min. depth alongside, 6.5 ft. above water line.
Berth 4–387 ft. long, 25 ft. min. depth alongside, 6.5 ft. above water line.
These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq. ft. warehouse and an 87,000 cu. ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for roll-on/roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.
Montego Freeport Limited intends to build berth 1 in the next few years which will be a continuation of berth 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in.–4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free certificate required for tankers laying alongside.
DENSITY: Average density 1026. No tide.
FUEL: All grades (viscosities) available. At least four days notice required.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
MEDICAL: All facilities at St. James's Hospital.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
CONSULS: No consular offices in Montego Bay. See "Kingston".
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700–1400 hrs., 1400–2100 hrs. Mondays to Fridays with option to

extend the first shift to 1700 hrs. at single time; 0700–1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
IDENTIFICATION CARDS: Recommended for crew.
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
AIRPORT: 5 miles from port. Sangster's International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, tel. 119; Ambulance, tel. 110; Fire, tel. 110.
AUTHORITY: Montego Freeport Limited.

OCHO RIOS: 18.25 N. 77.072 W.

GENERAL: Reynolds Jamaica Mines must act as Agents for all vessels using the pier at Ocho Rios. *(a)* Tel. Ocho Rios 603. *(b)* Cable address is "Mines" Ocho Rios, Jamaica. *(c)* 72 hour and 24 hour ETA requested. *(d)* Radio telephone 2738 Kc/s open when calls expected at 0700, 1100, and 1500 hrs. local zone time.
PILOTAGE: Compulsory. Pilot meets vessel 1 mile N.E. of sea-buoy. On rare occasions when a local Pilot is not available expenses and detention must be paid for an outside Pilot.
FRESH WATER: 50 c. per ton supplied from pipe-lines on the pier.
FUEL: Bunker"C" Fuel Oil – daily prevailing rate Kingston Harbour. Diesel Fuel Oil – per oil company suppliers Kingston.
REGULATIONS: (1) If any captain of any vessel or any other person shall throw or deposit, or permit to be thrown or deposited *(a)* any rubbish, earth, mud, stone, sand, ballast or other similar matter; or *(b)* any oil or mixture containing oil or oil residues, in any channel leading into or out of any harbour, or in any place within the limits of any harbour other than such place therein as shall be set apart for such purpose he shall be liable to a penalty not exceeding one thousand pounds. (2) No siren or steam whistle shall be sounded on any vessel in any harbour except for the purpose of making signals as laid down in the regulations for preventing collisions at sea, provided that any vessel may sound one warning blast of not more than five seconds duration before sailing. Any person committing a breach of the rules is liable for a penalty not exceeding 1,000 Dollars.
CARGOES: The Reynolds Jamaica Mines Pier is occupied about twice each week by ore carriers for 8 to 12 hours and about twice a month by sugar ships for indefinite periods.
TOURIST VESSELS: Tourist ships are accepted at Ocho Rios without Ministry of Finance approval in accordance with verbal instructions of the Collector at St. Ann's Bay, 19th September 1966, subject to the availability of berth at Reynold's option and: *(a)* Any guarantee to be only for Monday through Friday and for the hours 0700 to 1800. *(b)* Ocho Rios must be the first port of call in Jamaica of the ship on any particular voyage. *(c)* Signature of release form.
PASSENGERS: *(a)* Passengers disembark via shore gangways (2 if requested) direct to wharf situated in fence enclosed compound with guarded gate. Where lighterage is required a landing is available at the back of the wharf sufficiently large to be used by a 45 ft. tug. *(b)* Entry and clearance by Customs and Immigration are made at the pier. *(c)* Taxis are kept outside the gate. *(d)* Normally the Ocho Rios Chamber of Commerce set up a table on the wharf for the purpose of providing information and distributing literature on local musical groups to spend some time playing on the wharf for the benefit of the passengers.
AGENCY: *(a)* Normally Reynolds Jamaica Mines acts as sub-agent in Jamaica for vessels calling at Ocho Rios and bills for disbursements are directed to the Island agent for payment. *(b)* In cases where Reynolds Jamaica Mines acts as sole Agent for a vessel, a sum of money adequate to cover vessel's disbursements is requested from the owner or charterer to be deposited to Reynolds Jamaica Mines' account in advance.

PORT ESQUIVEL: 17.53 N. 77.08 W.

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Customs Documents:
4 Stores Lists.
Crew's Manifest of Declaration outside of Personal Effects.
4 Load Line Certificates.
4 Small Parcels Lists.
4 Customs Clearance from last port of call.
Health Documents:
International Certificate of Vaccination of all Crew members.
Maritime Declaration of Health.
Crew's Declaration of Health.
6 Manifests.
4 Bills of Lading.
Ship's Documents:
3 Stowage Plan of Cargo.
2 Deadweight Survey (Bulk carriers only).
Charter Party and any other specific documents of instructions relating to the loading or discharging of cargo.

PILOTAGE: Pilotage compulsory. Compulsory pilotage limit 2 miles to seaward of line drawn from Polink Point to Bare Bush Cay to Portland Cay to Portland Point. Cable advice 48 and 24 hours ahead of vessels ETA at Pilot station must be sent to vessel's Agent at Kingston, Jamaica.
One pilot boat *Silver Spray*, launch equipped with ship-to-shore radio communication: *(a)* One Marconi VHF – FM 30-watt output multi-channel set. *(b)* One Marlin HF – AM 75 output multi-channel set.
VHF shore set manned 24 hours per day. Contact with Port or launch can be made on three international Channels – 16, 2 and 6.
ANCHORAGES: A. Seaward to East of Pilot station, depth in excess of 36 ft. B. Leeward of Pigeon Island – depth 36 ft. min. C. Eastward of entrance of main channel – depth 37 ft. 06 in. min.
RESTRICTIONS: Restriction of permissible draft to max. of 35 ft.
MAX. SIZE: Max. permissible length 650 ft. and draft 35 ft. at low tide.
HEALTH: Pratique procedure requires presentation of undermentioned health documents: *(a)* International Certificate of Vaccination of all crew members. *(b)* Maritime Declaration of Health. *(c)* Crew's Declaration of Health. In event any suspected communicable disease or fever on board, Master required to advise Agents in advance.
RADIO: JAMINTEL "KNRDO 6YI".
TUGS: Pilot boat will be on standby during berthing operations of all vessels to assist in placing ship's lines on to pier.
BERTHING: Facilities for 2 berths – Eastern side and Western side of pier. Alumina bulkloading facilities on Western berth. Bulk alumina vessels given priority on Western berth. Both sides of pier used otherwise for vessels handling general cargo, loading or discharging fuel oil, caustic liquor, etc. Length of pier, East side 550 ft., West side, 600 ft.
Dolphin constructed at Head of pier for convenience of vessels turning around on arrival and departure. Dimensions 35 ft. long by 80 ft. wide. Additional berth, 250 ft. long, South-Western shoreline, with max. permissible draft of 17 ft. for this berth only.
SPECIALISED CARGO HANDLING FACILITIES: Eastern and Western berths equipped to handle receival of bulk cargoes, e.g. grain, fertilisers, sulphur, etc., by using shore crane with grabs, vacuvators, vessel discharging by grabs or conveyor system. Bulk liquid chemicals handled as shown under "Tankers". Additional berth on South-Western shoreline now being used to handle containerised cargo and can be utilised for handling of roll-on/roll-off traffic.
STEVEDORES: Cable advice to Agents in Kingston, Jamaica, 48 and 24 hours ahead of vessel's ETA at Pilot station for arrangements to provide stevedore and dock labour.
MEDICAL: Agents to be advised 48 hours ahead of vessel's ETA Pilot station of medical attention required, details of inoculations, vaccination/fever certificates, etc. Free ambulance service provided. Nearest hospital approximately 15 miles.
TANKERS: Both sides of pier equipped to handle receival and delivery of Bunker C oil, caustic liquor, sulphuric acid and molasses. Diameters of the load/discharge lines are:

Bunker C Oil	8 in.
Caustic liquor	10 in.
Sulphuric acid	4 in.
Molasses	12 in.
Water	4 in.

Max. permissible draft 35 ft.
DENSITY: 1025 subject to slight variation during heavy rainfall.
FRESH WATER: Max. of 300 metric tons available. Delivery made from storage tank at a rate of 40 to 50 metric t.p.h.
FUEL: Bunker C fuel oil is available from dock. Application to be made to Esso (W.I.) Ltd., through ship's Agent for supply of bunkers. Pumping rate approx. 130 metric t.p.h. Specification – Group 0 or Group 1 – Viscosity SSF at 122° F; 180–180 Flash P – M 190°F plus. Arrangements to supply other grades of fuel oil can be made on request of local Agents to Esso.
FIRE PRECAUTIONS: Strategically located fire hydrants throughout port and on pier. No special precautions apart from "No smoking" rule.
GANGWAY/DECK WATCHMEN: Service of watchman optional but not necessary. During time vessel is in port there is Customs guard on pier and strict security measures are carried out by port Security Force on personnel entering or leaving port compound which is surrounded by a chain-link security fence.
OPENING/CLOSING HATCHES: For bulk alumina vessels, opening and closing of hatches is done by crew members. For general cargo vessels, opening and closing of hatches may be done by crew members or on request to Agents, by stevedores.
SHIP CERTIFICATES:
Load Line Certificate.
Registration Certificate.
CUSTOMS ALLOWANCES: Tobacco: Each crew member including ship's officers, normally allowed by local customs authority 2 oz. of tobacco or 2 pk. of 20 or 25 cigarettes per day released from bond. Wine and/or Spirit: No limitations to use of wine on board. For spirits each crew member is allowed a part bottle per man.
CARGO GEAR: Local Agents provide necessary cargo gear. These are tested every 6 months in accordance with Factory Law and certificates issued for respective maximum lifting capacities.
IDENTIFICATION CARDS: Not necessary as the Passport will serve this purpose.
CONSULS: No consuls are available. Consular offices are located in Kingston approximately 30 miles away.
REPAIRS: Limited repairs may be undertaken.
DRY DOCKS: None.

REPATRIATION: Upon request, local Agents arrange crew changes and any necessary repatriation.
AIRPORT: Norman Manley International Airport approximately 40 miles away.
TIME: GMT minus 5.
HOLIDAYS: New Year's Day (1st January); Ash Wednesday (in accordance with calendar); Good Friday (in accordance with calendar); Easter Monday (in accordance with calendar); Labour Day (23rd May); Independence Day (first Monday in August); National Heroes Day (third Monday in October); Christmas Day (25th December); Boxing Day (26th December). These holidays are sometimes subjected to change in accordance with Government Proclamations.
1. No work is carried out on Good Friday and Christmas Day.
2. Work on vessels loading bulk alumina and discharging Bunker C oil and caustic liquor is usually carried out on other public holidays.
3. For general cargo vessels work is optional on public holidays except Good Friday and Christmas day, and only carried out on Master's request or in accordance with Terms of Charter Party.
POLICE/AMBULANCE/FIRE: Old Harbour Constabulary tel. 983–2255; Old Harbour Fire Brigade tel. 983–2276. An ambulance service is available for any crew member requiring medical attention. Several qualified doctors within a 6-mile radius of port. There is also a fire station.
TELEPHONES: Facilities do not exist for placing of telephones on board ship other than Magneto telephones. International telephone services available and scale of rates is as per schedule listed in Jamaica Telephone Company's Directory.
GENERAL: Port normal working days Mondays-Fridays 0730 to 1630 hrs. Overtime in excess of 8 hours per day or 40 hours per week, Monday-Friday at time and a half normal rate; Saturday between midnight and midnight time and a half normal rate, double time for hours worked on Sundays and two and one half times for hours worked on public holidays, between midnight and midnight. Rail facilities exist on Western side of the pier. Distance from fender to centre of rail line 17 ft. 09 in. Ship chandlering or any other requirements may be acquired through local Agents.
SERVICES: Special services are limited. Arrangements can be made through vessel's Agents for the port or local contractors to undertake these jobs.
SHORE LEAVE: Crew members usually granted shore leave by Immigration Authority for period vessel remains in port. Immigration Authority can, however, withdraw permission of shore leave to any individual crew member who, in their opinion, may be a security risk.
REGULATIONS: No unusual regulations.
DELAYS: The normal delays in berthing, loading or discharging or bunkering can be expected when the two berths are occupied.
AUTHORITY: *(a)* Alcan Jamaica Limited, Port Esquivel.
(b) The Port Authority, Kingston.
AGENT: See Jamaica Freight and Shipping Co. Ltd. Kingston.

PORT KAISER: 17.52 N. 77.37 W.

DOCUMENTS:
6 Crew Lists.
4 Stores Lists.
Declaration of Crew Personal Effects.
Customs Clearance from Last Port.
Maritime Declaration of Health.
Vaccination Certificates for all crew members.
Cargo Documents.
PILOTAGE: Compulsory. Pilot boards about 1 mile seaward of the jetty. International code Pilot signals used.
ANCHORAGE: Recommended 1.5 to 2 miles off end of finger pier from South to S.W.
MAX. SIZE: Tankers up to 40 ft. draft.
HEALTH: Pratique granted by customs officers who board on arrival, after Master has completed Maritime Declaration of Health, and Crew's Declaration of Health. All crew members require valid vaccination Certificates. In event of suspected disease or fever on board Agent should be advised full particulars by radio before arrival.
RADIO: "KNRDO 6Y1."
TUGS: None available.
BERTHING: Tanker berth at the end of a finger pier. Pier head is adequately fendered and a holding off buoy is utilised if necessary because of swell. Vessels berth portside to the jetty. Both anchors used.
Finger pier is 610 ft. long. The berth is being dredged to 50 ft. depth.
TANKERS: Fuel and gas oil discharged, 8 in. hoses. No slop facilities.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 25 cigarettes and part bottle spirits per day per man.
CONSULS: Nearest at Kingston.
TIME: GMT minus 5 hours. No changes.
SHORE LEAVE: Allowed.
AUTHORITY: Port Authority, Kingston.

PORT RHOADES, Discovery Bay: 18.29 N. 77.25 W.

DOCUMENTS:
5 Crew Lists.
2 Stores Lists.
1 Customs Clearance from last port.
2 Declaration of Crew Personal Effects.
1 Maritime Declaration of Health (available on arrival).
Vaccination Certificates for all crew members.
1 Copy of each cargo document.
PILOTAGE: Compulsory. ETA's should be cabled to "Kaisbaux Discovery Bay", 48, 24, and 12 hours before arrival.
Pilot will board vessel on arrival 2 miles outside channel, if berth is available.
ANCHORAGES: No designated anchorage. If berth is occupied, vessels will remain within a 3-mile area of the channel until berth is available.
RESTRICTIONS: Entry may be at any time of day or night throughout the year.
MAX. SIZE: Max. permissible length, 660 ft.
Max. permissible breadth, 90 ft.
Max. permissible draft, 37 ft.
PRATIQUE: Pratique inspection and clearance given on berthing. Notify "Kaisbaux, Discovery Bay" as soon as possible before arrival full details of any suspected disease or fever on board.
There is no radio pratique.
RADIO: Route all ETA's and cables via Kingston Radio or nearest radio station.
TUGS: None available. Pilot launch will assist in taking ship's lines during docking if required.
BERTHING: One finger pier, adequate fenders, used by bauxite ships and tankers alike.
Ships loading bauxite must dock with the top of the hatch covering of the first hold to be loaded not more than 35 ft. above sea level.
Bauxite loading rate 4,000 t.p.h.
All loading hatches to be opened for inspection if weather permits.
Gangway to be rigged ready for lowering immediately on berthing.
STEVEDORES: All arrangements are made by Kaiser Bauxite Company for unloading/loading any general cargo.
MEDICAL: Medical facilities and hospital available in the vicinity.
TANKERS: Two fuel lines, hose 8 in. (pipe-line 12 in.) diameter. Back pressure 150 lb. One gas oil line, hose 8 in. (pipe-lines 6 in.) diameter. Back pressure 150 lb.
Tankers use same berth as bauxite vessels. It may be necessary at times for tankers to wait on bauxite vessels loading, or arriving, and tankers may have to vacate the berth before completion of discharging to make way for bauxite vessels which have absolute priority.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
FIRE PRECAUTIONS: Usual non-smoking precautions with respect to tankers. Portable fire extinguisher available on pier.
GANGWAY/DECK WATCHMEN: To be provided by vessel.
OPENING/CLOSING HATCHES: To be done by ship's crew.
CERTIFICATES REQUIRED:
Load Line Certificate.
Registration Certificate.
Derating Exemption Certificate.
CUSTOMS ALLOWANCES: Tobacco: Each crew member, including officers, normal allowance 2 oz. tobacco or 2 pks. of 20 cigarettes per day released from bond. Wine: no limitations on use of wine on board. Spirits: Officers only are allowed part bottle.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest Consuls are in Kingston, 80 miles distant.
DRY DOCKS: No facilities in Jamaica for other than the smaller types of vessel (e.g. tug).
REPATRIATION: Can be arranged through ship's Agent.
AIRPORT: Montego Bay, 40 miles away; Kingston, 90 miles away.
Both are international airports, with several scheduled flights per day to U.S.A. and Europe.
TIME: GMT minus 5 hours.
TELEPHONES: No arrangements for ship-board connections.
AUTHORITY: Kaiser Bauxite Company, Discovery Bay, Jamaica.

SALT RIVER: 17.50 N. 77.10 W.

DOCUMENTS: Health Certificate. Crew List. Manifest. Bills of Lading and other ship's papers for cargo shipped, prepared by Wisco Wharves Limited, a subsidiary of The West Indies Sugar Company Limited.
PILOTAGE: Latest 24 hours prior arrival off Pilot station. Cable "Monymusk Lioneltown" giving name of vessel, ETA, date of arrival. Pilotage – optional, Barebush Cay; Compulsory, Pigeon Island; pilot boat at Salt River.
ANCHORAGE: 17° 49.58′ N.; 77° 8.40′ W.
RESTRICTIONS: No restrictions.
MAX. SIZE: Draft 30 ft.
HEALTH: Customs grant pratique.
RADIO: Cable Agents via Kingston Radio/6YI.
TUGS: Not applicable.
BERTHING: No berthing facilities.
STEVEDORES: 48 hours notice prior arrival of vessel. Commodity bulk sugar. Loading rate approximately 1,800 tons per day.

MEDICAL: No advance notice required.
FRESH WATER: Can be arranged if given sufficient notice.
FUEL: None available at port but can be arranged.
GANGWAY/DECK WATCHMEN: Customs guards.
OPENING/CLOSING HATCHES: Normally done by crew.
SHIP CERTIFICATES: Registered tonnage certificate on first call. Master's and Chief Engineer's certificates of Competency, also Loading Line Certificate.
CUSTOMS ALLOWANCES: Tobacco, determined by Customs. Wine and/or Spirit, determined by Customs.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Not possible.

AUTHORITY: The West Indies Sugar Co. Ltd.
AGENT: The West Indies Sugar Company Limited, 5 Trevennion Park Road, PO Box 174, Kingston 5, Jamaica, W.I. Tel. 65927–8. Telex 13. Cable address: Head Office: "Wisco Kingstonja". Home Office: "Wicaroo Frome".

NOTES

Please also advise Shipping Guides (Services) Ltd.

Japan

GENERAL: *Radio Pratique:* At ports where Radio Pratique is possible, vessels must be in possession of the Japanese Sanitary Inspection Certificate to obtain Radio Pratique and night-time entry. The certificate is only obtainable in Japan and is valid for one year.

Pollution: Effective 16th January, 1975, the Marine Pollution Prevention Law requires any tanker of 150 tons gross and above which is loaded with an oil cargo to have materials for oil removal either on board, or aboard escort boats, or at a depot base. Depot bases are understood to have been established, and in this connection Owners, Timecharterers, or Masters are strongly recommended to contact their Agents at least ten days prior to vessels' arrival Japan.

Requirements of Travelling Documents to Japan for Crew/Superintendent:

Crew Joining vessel Max. Stay ashore	Travelling Document	Visa	Remarks
(1) Ordinary Case			
within 5 days	Seaman's Book or Passport	No	Special Landing Permit issued but valid for crew travelling direct to port where crew join ship.
over 5 days	Passport	Req'd	See names of Countries for which visa exempted
(2) New building			
within 30 days	Seaman's Book or Passport	No	See (1) Remarks
over 30 days	Passport	Req'd	See names of Countries for which visa exempted
(3) Purchase/Delivery			
Crew arrival before ownership changed within 10 days	Seaman's Book or Passport	No	Max. 10 days stay ashore permitted subject to Agents' submission of Sale of Contract and Export Licence. See (1) Remarks
Crew arrival before ownership changed over 10 days	Passport	Req'd	See names of Countries for which visa exempted
Crew joining ship before ownership changed	Passport	Req'd	See names of Countries for which visa exempted
Crew arrival after ownership changed	Same as (1) Ordinary case		
Superintendent *(4) All cases*	Passport	Req'd	See names of Countries for which visa exempted

Names of countries for which visa not required:
Within 30 days New Zealand.
Within 90 days Argentina, Bangladesh, Belgium, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, El Salvador, Finland, France, Greece, Holland, Honduras, Iceland, Iran, Israel, Italy, Luxembourg, Malta, Norway, Pakistan, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Tunisia, Turkey, Uruguay, Yugoslavia.
Within 180 days Austria, Federal Republic of Germany, Ireland, Mexico, Switzerland, United Kingdom.
Remarks: The above schedule is made out by Dodwell Tramp Agencies on general understanding with Immigration Authorities. However, the above details are not expressly stated in the text of the law but based on Immigration Control Order Article 16 which reads:
Article 16. Permission for landing for Reshipping.

1. The Immigration Inspector may, in case an alien crewman desires to pass through Japan in order to reship on board another vessel in another port of entry in Japan, upon application of the carrier operating the vessel on which the alien crewman has arrived, and in case the alien crewman desires in order to become a crewman of a vessel in Japan, to land from another vessel, etc. and pass through Japan, upon application of the carrier operating the vessel in Japan, permit the landing for reshipping respectively.

2. In case the permission provided for in the preceding paragraph is given, the Immigration Inspector shall issue a permit for landing for reshipping to the crewman concerned.

3. In case the permission provided for in paragraph 1, is given, the Immigration Inspector may impose upon the crewman such restrictions regarding period of stay in Japan, route to be followed in transit, and any others which he may deem necessary in accordance with Ministry of Justice Ordinance.

In view of the foregoing, the contents of the schedule is not absolute and may be altered. In order to ensure that crew members are permitted to land Japan to join ships, please send Agent information well in advance on personal data of crewmember such as Full Name, Rating, Date of Birth, Passport or Seaman's Book Number together with Flight No. and Ship's ETA/calling port.

PILOTAGE: It is *compulsory for vessels over 10,000 g.r.t.* to take a Pilot to navigate the Uraga Channel. Application for this Pilot service must be made 24 hours and 6 hours in advance of actual ETA to the Uraga pilot station. At the same time compulsory pilotage has been extended to certain other areas in Tokyo Bay.

AIOI: 34.46 N. 134.28 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare: Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34.38 N.; 135.11 E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33.13 N.; 131.54 E. Telegraphic address "Anjin Saganoseki".In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33.56.24 N.; 131.03.12 E.

Aioi Dock Master not licensed to pilot vessels from outer harbour and boards at anchorage.

ANCHORAGES: Inside Aioi Bay. Max. 18 ft. draft.
A. True bearing 250° from Kabeshima post, distance 350 m.
B. True bearing 217° from Kabeshima post, distance 730 m.
C. True bearing 313° from Kasamatsu Iwa bench mark, distance 620 m.

RESTRICTIONS: Vessels may anchor any time day or night. Draft to be adjusted to enter dry dock per dockyard recommendation as follows:

Name of Dock	*Trim Recommendation*
No. 1 & 2 Dry dock	$\frac{\text{Vessel's LOA (mm.)}}{200}$ plus 500 mm.
No. 3 Dry dock	$\frac{\text{Vessel's LOA (mm.)}}{300}$ plus 500 mm.

MAX. SIZE: Max. size of ships to be accommodated as follows:

Dock	*LOA*	*LBP*	*Breadth*	*Draft*	*DWT (L/T)*
No. 1 dock	238 m. 780′ 9″	230 m. 754′ 7″	33 m. 108′ 3″	5.5 m. 18′	73,000
No. 2 dock	156.1 m. 512′ 1″	145 m. 475′ 8″	19.5 m. 63′ 11″	5.5 m. 18′	14,000
No. 3 dock	341 m. 1118′ 9″	328 m. 1076′ 1″	54 m. 177′ 1″	6.0 m. 19′ 8″	300,000

HEALTH: Pratique to be obtained at another Port prior arrival Aioi.

At first port of call in Japan, vessel must obtain free pratique. Quarantine officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Normally join vessel at anchorage inside Aioi Bay. Tug's lines always used without charge.

TANKERS: Must be fully gas-freed before arrival. No facilities for tank cleaning or gas freeing.

DENSITY: Average 1025/1026 Winter, and 1018/1020 Summer.

FRESH WATER: Available from jetty/dock. Cost Y120 per ton (approx.).

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

REPAIRS: Dockyard port. All repairs available. Specialist technicians obtainable from Kobe/Osaka area.
AIRPORT: Osaka (Itanii).
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police 07912 or Aioi 2-0740; Ambulance/Fire 119 or Aioi 2-7128.
TELEPHONES: Placed aboard at IHI shipyard.
SERVICES: No special services at Aioi, but available from Kobe/Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kamigori Doboku (Public works) Office.
AGENTS: See "Himeji"

AKITA: 39.45 N. 140.03 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Ships Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory but recommended, available daylight only. Boards off Akita one mile 280° from Akita lighthouse or off Funakawa one mile 140° from breakwater end light if required. 2 Pilots board if ship's gross tonnage exceeds 18,000. Cost 180% of pilotage.
ANCHORAGE: Off Akita, 2 miles 280° from Akita Lighthouse. Depth exceeds 20 m. Bottom – soft clay with mud. No buoys.
RESTRICTIONS: Pilot available daylight only.
MAX. SIZE: Max. draft available 9.6 m. in fairway. Size at berths, see "Berthing". Min. depth at extreme low water – In fairway – 10.0 m. At Anchorage – 20.0 m.
HEALTH: Officer stationed at Funakawa. Quarantine anchorage 39° 51′ N. 139° 53′ E. When impossible to inspect at Funakawa, i.e. during bad weather, attends off Akita.
RADIO: Niigata Radio when ship coming from South. Sapporo Radio when ship coming from East/North. Choshi Radio if long distance.
VHF: VHF Channel 16–156.8 mc/s. VHF Channel 12–121.5 mc/s. Operated by Regional Maritime Safety Headquarters – Harbour Master.
TUGS: 1 tug 2,000 h.p. available owned by local government. 1 tug 800 h.p. and 4 small tugs (150-250 h.p.) available, privately owned.
BERTHING:

Wharf	*Length (m.)*	*Depth (m.)*	*Berthing Capacity (g.t.)*	*Discharging*

STEVEDORES: Working time 0830–1630 hrs. every day.
Phosphate rock in bulk: 200–270 t.p.h. by shore crane, 50–70 t.p.h. by ship's gear.
Grain in bulk: 150–170 t.p.h. by shore crane, 40–60 t.p.h. by ship's gear.
Logs/lumbers: 200,000 BM per gang per day (Nanyozai), 80,000–100,000 per gang per day (Beizai).
Potash in bulk: 150–180 t.p.h. by shore crane, 50–60 t.p.h. by ship's gear.
Fertiliser in bag: 250–300 tons per day per gang.
Zinc concentrate in bulk: 140–160 t.p.h. by shore crane. 40–60 t.p.h. by Ship's gear.
MEDICAL: Hospital and treatment available.
DENSITY: 1020–1021. Tidal range 20/30 cm.
FRESH WATER: Available at every wharf. Rate 30 t.p.h.
FUEL: Domestic bunkers available. If bonded bunkers required, brought from Niigata, Hakodate.
GANGWAY/DECK WATCHMEN: Not compulsory, but available if required.
OPENING/CLOSING HATCHES: Stevedores open and close hatches. Cost per hour depending on cargo. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete before berthing.
CERTIFICATES: Ship's register to show Customs Inspector, ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance seems poor.
CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.
CONSULS: No Consuls, but two notary public offices.
REPAIRS: Minor repairs only.
REPATRIATION: Possible.
AIRPORT: Flights to Tokyo 2 or 3 times per day. 12 km. from port.
TIME: GMT plus 9 hours. No alterations during year.
HOLIDAYS: Local holidays: January 2nd, 3rd, July 21st, August 13th (p.m.), 14th, December 31st (p.m.) Other Sundays/Holidays Non working days.
POLICE/AMBULANCE/FIRE: Contact through Agents.

Daikyo Oil Jetty. Only available by barge from Kobe.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
Bunkering at Oil Jetty prohibited.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
Compulsory for tankers working cargo at oil jetty.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: No consulate in Amagasaki area.
REPAIRS: No dockyard. Minor repairs can be carried out on vessel alongside wharf.
REPATRIATION: Possible.
AIRPORT: International airport Osaka, 15 miles from Amagasaki.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: Kobe Steel (Ore/Coal) Nil. Public Wharf (Scrap) 20th July.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONE: No telephone installation service on board.
SERVICES: Compass adjustment can be carried out at anchorage.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENTS: Dodwell Tramp Agencies, Osaka. (see "Osaka.)

ANAN (Tachibana): 33.52 N. 134.40 E.

DOCUMENTS: and all general information, refer to "Shimotsu".
PILOTAGE: Not compulsory. Pilot can be arranged through Agent if required.
MAX. SIZE: Max. draft 10.50 m., limited by channel depth.
PRATIQUE: Closed port. If arriving directly from abroad, vessel should proceed to Shimotsu for health clearance. Immigration authorities attend from Komatsushima if required.
TUGS: One tug of 2,000 h.p. available.
BERTHING: Nippon Denko Wharf, 12 m. depth alongside. Unloading capacity 500 t.p.h.
FRESH WATER: Available from shore hydrants only.
FUEL: By barge from Hanshin area only.
AUTHORITY: Port and Harbour Department.
AGENT: See "Nühama".

AOMORI: 40.52 N. 140.45 E.

DOCUMENTS: and all general information, refer to "Hachinohe".
TUGS: 2 tugs available, up to 500 h.p.
BERTHING: No. 2 Wharf depth 9.0 m.
depth 7.5 m.
depth 8.5 m.
Tsutsumi Wharf depth 8.0 m.
FUEL: Can be supplied by barge from nearest stock port.
FRESH WATER: Available ex-wharf.
AUTHORITY: Port Administration Office.
AGENTS: Abeki Shokai, c/o Bridgestone Ekika Gas K.K. Aomori Seizosho 84-1, Urashima, Nonai Aomori-shi, Aomori-ken. Cables: Abe Aomori. Tel. Aomori (0177) 36–3341

ATSUMI: 34.40 N. 137.04 E.

DOCUMENTS, and all general information: refer to "Yokkaichi".
PILOTAGE: Not compulsory but Atsumi Berthing Master may board vessel at Yokkaichi Quarantine Anchorage.
MAX. SIZE: *Dolphin Pier:* 70,000 d.w.t., LOA 240 m., Max. draft 11.00 m.
SBM: 210,000 d.w.t., Max. draft 13.00 m.
CLEARANCE: *Quarantine:* Quarantine Office opened at Atsumi.
Immigration: Immigration Officials attending from Gamagori.
TUGS: Minimum 2 tugs required for mooring/unmooring due to strong current.
BERTHING: *Dolpin Pier:* Lat. 34° 38′ 36″ N. Lat. 137° 04′ 54″ E. 2.5 km from installation.
SBM: Lat. 34° 39′ 47″ N. Long. 137° 03′ 56″ E. 2 km from installation.
Shoreline: Dolphin Pier 2×12 in, discharge rate 1,000 t.p.h.
SBM 2×16 in, discharge rate 7,500 t.p.h.
FRESH WATER: At Dolphin Pier ex pipe-line (boiler water only). At SBM by barge.
FUEL: Bunkering permissible only at anchorage by barge.
DENSITY: 1025 at both berths.
AGENT: See "Yokkaichi".

CHIBA (including Yahata): 35.36 N. 140.07 E.

DOCUMENTS:
Ship's Register. Last Port Clearance. 3 Crew Lists including Passport Nos. 3 Passenger Lists. 1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: See "Tokyo".
ANCHORAGES: Quarantine anchorage on Northern part of Tokyo wan. Chart No. 1061, published by Maritime Safety Agency.

TIME: Japan Standard Time (135° E.) = GMT plus 9. Permanent.
HOLIDAYS: New Year's Day (January 1st); Attaining the Age of Maturity Day (January 15th); State Foundation Day (February 11th); Vernal Equinox Day (March 21st); Birthday of Emperor (April 29th); Constitution (May 3rd); Children's Day (May 5th); Respect Day for the Aged (September 15th); Autumnal Equinox Day (September 24th); Gymnastic Day (October 10th); Civilisation Day (November 3rd); Labour Thanksgiving Day (November 23rd). Cargo work can be arranged at 50 – 100% extra on basic cost.
POLICE/AMBULANCE/FIRE: Police Tel. 110, Fire and Ambulance 119.
TELEPHONE: Facilities for placing telephones on board only at Chuo Pier.
SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.
AUTHORITY: Chiba Port Control Office.

AGENT: Sub-Agent of Dodwell & Co. Tokyo. Chiba Kaiun Sangyo Co. Ltd., 1-20, 3-Chome,Suehiro, Chiba. Cable: Chibamarine, Chiba. Tel. Chiba (0472) 61-3361. Telex: 3722–230.

ETAJIMA: 34.11 N. 132.29 E. (See Plan)

OPERATORS: Ataka Sekyo Kichi.
LOCATION: Name of berth, Ataka Sekija. Position, Lat. 34° 11′ 30″ N., Long. 132° 29′ 00″ E.
DOCUMENTS:
Certificate of Registry.
Safety Equipment Certificate.
Derating Exemption.
Clearance from Last Port.
10 Crew Lists.
2 Crew Customs Declaration (Japanese Form).
4 Stores Lists.
5 Slop Chest Lists.
1 Quarantine Declaration.
PILOTAGE: Compulsory. Pilot boards in Bungo Channel 3 miles South Seki Saki Lighthouse. Pilot station (33.13 N. 131.54 E.) equipped with light signal – no VHF. Pilot remains on board during pratique operations – also see "Tankers".
ANCHORAGE: See "Restrictions".
RESTRICTIONS: Controlling depths (MLW) are as follows: entrance 20 m.; channel 17 m.; anchorage 17 m.; berth 15 m.; The mean tidal range is 3 m. Nature of bottom is mud. Velocity of current: entrance 1 knot; channel 1.5 knots; anchorage 0.5 knots; berth 0.5 knots. Vessels may berth at any stage of the tide during the day.
MAX. SIZE: 80,000 d.w.t. Length 260 m. Draft 14 m. – 15.5 m. according to tidal conditions. Beam 40 m.
PRATIQUE: Available during daytime only in Kure or Iwakuna quarantine anchorage. Quarantine officers inspect galley, pantry and food stores. Pilot ladder used for boarding.
RADIO: Shimonoseki – Kobe.
TUGS: Two available and advised for berthing and unberthing. One forward and one aft, 3,000 h.p.
MEDICAL: Doctor available.
TANKERS: Pilot berths/unberths vessel.
It is dangerous to navigate at night.

Moorings: Forward	3 headlines	Aft 3 sternlines
	2 breast lines	2 breast lines
	2 spring lines	2 spring lines

Connections: 2 × 12 in. connected and disconnected by shore gang booms not necessary. Max. pressure required by shore is 7 kg/sq.cm.
Pumping rate: 5,000 k/l per hour expected.
Pipeline: Length 131.6 m.; 2 × 24 in.
Gangway: Pilot ladder used as not sufficient room for gangway.
Pollution: Berth is closed by floating pollution retain. Dimension 320 × 56 m.
Ballast: During ballast operations shore personnel remain on board to check for dirty ballast and a motor-boat watches for same purpose. There are no slop tanks or facilities for dirty ballast ashore.
Storage capacity: crude oil, 22,000 k/l × 4 tanks; heavy oil, 22,000 k/l × 2 tanks; refined oil, 22,000 k/l × 2 tanks.

DENSITY: Summer 1020, Winter 1025 average.
FRESH WATER: Available, any quantity, by water barge from Kure, 4 days notice required.
FUEL: Available.
FIRE PRECAUTION: Standard regulations.
REPAIRS: Facilities available – shore steam and electricity available.
DRY DOCKS: Available, lifting capacity 500,000 tons.
STORES: Laundry and provisions available.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits and some beer.
Customs officers inspect crew cabins.

FUKUYAMA: 34.29 N. 133.21 E.

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.
1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed shelter as near as possible having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 14″ N. 131° 03′ 12″ E.
APPROACHES: Approach channel: length: (from quarantine anchorage to "A" berth) 7,000 m.; depth: 16 m. below low water; width: 350 m.
Branch channel: (leading to NKK loading berths) depth: 11m. below low water; width: 200–300 m.
ANCHORAGES: Quarantine anchorage position: 34° 22.5′ N. and 133° 26.3′ E., an area of 750 m. radius.
MAX. SIZE:
NKK's Private Berths.

Berth	*Length and depth in metres*	*Max. vessels acceptable in d.w.t.*	*Unloaders*	*Cargoes handled*
Raw Materials Berth				
"A"	300 17	150,000	4 gantry cranes each with 1,500 t.p.h. discharging capacity	iron ore and coal
"B"	280 16	100,000		
"E"		90,000		
"F"	180 11	20,000	2 level-luffing cranes each with 300 t.p.h. discharging capacity	Coal and other raw materials except iron ore
Mooring buoy	— 11	25,000	Ship's gear	Pig iron and scrap
Scrap berth	180 13	35,000	2 level-luffing cranes each with 20 tons lifting capacity	Pig iron and scrap
Export Berths				
Berth 1	234 11	30,000	2 level-luffing cranes each with 30 tons lifting capacity	Steel coil and plate
Berth 2	230 13	35,000	1 level-luffing crane with 30 tons lifting capacity and 1 gantry crane with 20 tons lifting capacity	Steel coil and plate
Pipe berth	200 13	35,000	1 level-luffing crane with 20 tons lifting capacity	Steel pipe

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Deratting Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound, to Nagasaki Radio respectively.
TUGS: "Nikko Maru" and "Kofuku Maru" (both 3,000 h.p.) are available in the Fukuyama Harbour. Additional tugs are available from other Inland Sea terminals.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Summer 1016–1022. Winter 1025. The density not much affected by tide, which is maximum 3.84 m.
FRESH WATER: Available at any berth. Supply capacity 50 t.p.h. However, for a vessel moored to a buoy or at anchorage, water barge comes from Onomichi.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice. Bunkering barge comes usually from Mizushima (31 miles East of Fukuyama) or from Kobe (97 miles East of Fukuyama). Therefore, an advance order is required.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Only minor repairs.
DRY DOCK: None. Available at Innoshima or Mukayima.
REPATRIATION: Possible.
AIRPORT: Okayama airport 70 kms. from Fukuyama which takes about 2 hours by car. 2 flights daily.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Report to Guardmen's office located at West Gate of Nippon Kokan.
TELEPHONES: No arrangements for placing telephone on board. Private telephones connecting with offices in the compound of the Fukuyama Works are placed at each of the raw material berths.
For vessels alongside export berths, private telephone available at foremen's office located on berth.
GENERAL: Fukuyama is a local and new port, developed along with the expansion of Nippon Kokan, Fukuyama Steel Works.
Ship repairs (except small ones) for machinery, radio, radar, etc., are all arranged by firms located in Tokyo, Osaka and Kobe.
SERVICES: Hold cleaning. Labour comes from Mizushima.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nissan Shipping Co. Ltd., Port Bldg., 1, Kokan-cho, Fukuyama-shi, Hiroshima-ken. Cable address: Sunsenpaku Fukuyama. Domestic Telex: 6436–11; 6436–12 Nissan J. Tel.: Fukuyama (0849) 41–0535 and 0536.

FUSHIKI: 36.49 N. 137.03 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of Pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209°, 2 miles off leading light, thence takes vessel to Quarantine Anchorage ground. Due to many fish-nets on both sides of fairway if requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fish-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigataradio and/or VHF to Fushiki Harbour Master. Small wooden Pilot boat painted yellow. No particular light or sound signals required.

ANCHORAGE: Safe at all seasons with depth from 8 to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour.
MAX. SIZE: Length 180 m., draft 31 ft. in Summer and 30 ft. in Winter. However, depth of port not always definite, being a river port and dredging operations always carried out to keep depth all year round. Tidal range is maximum 0.45 m.
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique.
A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.
If crew or passengers on board do not possess valid Smallpox Vaccination certificates.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: (Also see "Pilotage".) Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Outer Harbour for large vessels. Narita-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. Used only when Pilot on board.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Left No. 1 Wharf	depth 9.5 m.
Left No. 2 Wharf	depth 9.5 m.
Left No. 3 Wharf	depth 5.0 m.
Right No. 1 Wharf	depth 7.5 m.
Right No. 2 Wharf	depth 7.5 m.
Right No. 3 Wharf	depth 10.0 m.
Right No. 4 Wharf	depth 10.0 m.
Right No. 5 Wharf	depth 7.0 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from left wharf No. 1 and 2, average 45 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker ports at maximum 7 days prior notice.
DEVELOPMENTS: Right No. 4 wharf reconstructed, now 175 m. long, 10 m. deep, also Right No. 5 wharf, 130 m. long, 7 m. deep. Left No. 1 pier under reconstruction, when completed will be 185 m. length, 10 m. depth. Left No. 2 pier to be reconstructed and completed to same size as Left No. 1.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks. Nearest available in Toyama.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 35 km distance. two regular services a day. ANA only.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day.
POLICE/AMBULANCE/FIRE: Police, Fushiki Police Station, Takaoka (0766) 44–1500; Ambulance, Fushiki Fire Station, Takaoka (0766) 44–1122; or 119; Fire, Fushiki Fire Station, Takaoka (0766) 44–1122.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Dept.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Toyko. Fushiki Kairiku Unso Co. Ltd., 6–6, Fushiki-Minatomachi, Takaoka-shi. Tel. Takaoka (0766) 44–1300. Telegraphic address "Fushikikairiku Fushiki". Telex: 5155–571/572.

HACHINOHE (Hachinoe): 40.33 N. 141.30 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilotage compulsory, but arrangeable at Master's request. Pilot always arranged by Agent if Master requires, and vessel required radio Agent ETA 24 hours before arrival. Pilot boat has no facility to communicate with ship, but flies pilot flag "H". Pilot boards at Quarantine Anchorage (Lat. 40° 32′ N. Long. 141° 32′ E.).
ANCHORAGE: Open sea anchorage. Depth of water: 10–15 m.
RESTRICTIONS: Pilot arrangeable only in daytime for entry.
MAX. SIZE: Draft: 13.00 m. LOA: 296 m. Breadth: no restriction.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days., Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.
TUG: Tug joins vessel inside breakwater.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: 1025.
FRESH WATER: Available from wharf and barge. 20 t.p.h. from barge (capacity: 60 tons). 30 t.p.h. from wharf. Overtime service: plus 30% for 1700–2200 hrs. and Sunday/holiday. Plus 50% for 2200–0500 hrs.
FUEL: No bonded fuel oil, but domestic diesel oil.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIR: Minor repairs such as welding, piping and lathing.
REPATRATION: Possible.
AIRPORT: Nearest airport at Misawa.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: 1st May, 21st August.

POLICE/AMBULANCE/FIRE: Police 43-4141 (Headquarters); 33-0237 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONE: No facilities for placing telephones on board.
GENERAL: 1. Discharging ex-gearless vessel not available at anchorage because of no facilities. 2. In case vessel is moored to buoy, vessel required to prepare anchor chain (port or starboard anchor chain) prior to ship's arrival.
SERVICE: Surveyor: Tally. Hold cleaning. Radar service by Nippon Radar Service Co. Notary public.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
SHIPMASTERS REPORT: June 1975.
Pilotage: Compulsory. The Quarantine Anchorage is position 40° 32.9′ N. 131° 32.7′ E., bounded by a circle radius 2.5 cables. In view of the considerable new development vessels should obtain Japanese chart No. 65 if possible. Vessels navigating on B.A. charts can be met by pilot at a position 2 miles north of Same Kaku lighthouse, by prior arrangement.
Restrictions: Vessels may sail any time.
Max. Size: Draft 9.5 m. LOA 170 m. breadth no restriction (June 1975).
Health: Radio pratique can be obtained by all vessels holding valid Japanese Sanitary Inspection Certificate. (This rule applies to all Japanese Ports).
Tugs: A number of tugs are available.
Berthing: A number of new berths are now available. Dredging is in progress and available drafts can be expected to increase.
Airport: Two flights per day.
Developments: Reclamation, expansion, dredging etc., in progress.
AUTHORITY: Port Administration Office.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Abeki Shokai, c/o Nishimura Tekko K.K. 27 Ningyozawa, Shirogane-cho Hachinohe-shi. Cable Address: "Abe Hachinohe". Tel.: 0178-33-5560.

HAKATA: 33.36 N. 130.24 E. (See Plan)

DOCUMENTS:
Customs: When vessel arrives direct from foreign port, Customs officials will board vessel for search. The following documents are to be submitted.

Crew list, Passenger list, Store list, Manifest of crew personal effects (must be signed by individual crew member), Arms and ammunition list, Narcotics list, List of ports of call on current voyage, Discharging cargo manifest, Through cargo manifest, Declaration inward/outward (Form No. C2000).

The following will be checked on board:

Ship's registry, Last port clearance.

When vessel comes from Japanese port, Customs officials will not attend on board, except special case. The Master or Agents are to attend at Custom House for entry formalities with the following documents:

Discharging cargo manifest, Through cargo manifest, Declaration inward/outward, Ship's registry, Last port clearance, Documents entrusted with the Master by at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.
Immigration: Immigration officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide a 72-hour landing pass for crew members and passengers. One copy each of crew list and passenger list are required by them. Providing vessel's Agents with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application.

In the event that crew members, without entry visaes, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the vessels to which they are to be transferred, arrive in Japan within 5 days.
PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at quarantine anchorage; position 33° 38′ N. 130° 19′ 30″ E. Request for Pilot made through ship's Agent, Master reporting ship's ETA by radio giving accurate time of arrival at least 24 hours prior arrival, also any subsequent change. No VHF. In the event of rough sea, harbour tug-boat will be used.
ANCHORAGE: No anchorage in port.
RESTRICTIONS: No restrictions if vessel in free pratique and draft less than 10 m. No tide.
MAX. SIZE: No restrictions of length, breadth. Draft 10.7 m.
HEALTH: (a) Quarantine station: Sea area surrounded by the following lines.

1. The line connecting between the top of the Nokono-Shima and point "A" which is located on the sea in the direction of 90° and at the distance of 2,540 m. from the top of the Nokono-Shima. (The parallel of 33° 38′ 00″ N.)
2. The line connecting between point "A" and point "B" which is located on the sea in the direction of 0° and at the distance of 1,750 m. from point "A". (The Longitudinal line of 130° 20′ 00″ E.).
3. The line drawn towards the Nokono-Shima in the direction of 270° from point "B". (The parallel of 33° 37′ 06″ N.).
4. The coast line of the Nokono-Shima.

The centre of the quarantine anchorage: 33° 37′ 30″ N., 130° 19′ 30″ E.

(b) Quarantine service is rendered from sunrise to 1 hour before sunset.
(c) 'Q' flag should be hoisted until free pratique is granted.
(d) Vessels exceeding 20,000 gross tonnage can undergo quarantine on application when they berth alongside wharf.
(e) When vessel arrives from plague infected or suspected area within 10 days after she left such place, a 24-hour special quarantine is required. All sanitary scuppers must be closed and garbage not thrown overboard after vessel reaches 60 miles off inland sea areas.
(f) Radio pratique is applicable.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.
TUGS: 2 tugs, 1,000 and 800 h.p. Normally join vessel when approaching wharf. Ship's lines used. If vessel over 15,000 g.r.t. an additional tug of 1,500-3,200 h.p. should be ordered from Moji or Wakamatsu.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Wharf	*Length (m.)*	*Depth (m.)*	*Capacity (g.t.)*
Central Pier			
Quay No. 5 and 6	362	10.0	15,000 × 2

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Normal working hours: 0800 to 1700 hrs.

Overtime work is possible by applying to customs at the following fees:

0000–0500 hrs.	350 Yen per hour
0500–0830 hrs.	
1700–2200 hrs. and Sundays and Holidays	300 Yen per hour
2200–2400 hrs.	350 Yen per hour

No work can be arranged for on 31st December to 3rd January.
MEDICAL: No advance notice required unless urgent.
DENSITY: About 1024.
FRESH WATER: No water barge available. Hydrants: at Central and Suzaki Pier. Rate of delivery: 10/20 t.p.h.
FUEL: Bonded bunker oil is not available at this port, but is to be lightered from other port. An adequate notice should be given to the suppliers in order to avoid delay in replenishment. The rate of delivery from oil barge is 80/100 t.p.h.

FIRE PRECAUTIONS: Modern chemical fire service boat "Hiryu Maru" (30 tons).
CONSULS:
Hon. British Consulate, Kitakyushu Tel. 093-331-1311
American Consulate General, Fukuoka Tel. 092-751-9331
Republic of China Consular Agency, Fukuoka Tel. 092-761-3458
Republic of Korea Consulate General, Fukuoka Tel. 092-771-0461
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: American Consul, Fukuoka, tel. 092–75–9331.
REPAIRS: Local workshop (fishing-boat repairs) available only for small repairs, so Agent for ocean-going vessel in Hakata arranges repairs from Moji or Tobata.
REPATRIATION: Possible.
AIRPORT: Fukuoka airport: Distance: about 20 minutes from Hakata port by car. JAL Domestic regular airline for Tokyo and Osaka. ANA Domestic regular airline for Tokyo, Osaka. Also, CATHAY and JAL airlines for Taipei, Hong Kong 4 times a week. Korean and JAL airlines for Seoul and Pusan daily except Sunday.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police/Ambulance tel. 110; Fire 119.
TELEPHONES: May be placed on board if 48 hours notice given.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Harbour Bureau.
AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., Fukuoka Branch, c/o Mitsubishi Warehouse Co. Ltd., 2-30, Okihama-cho, Fukuoka. Telegraphic address "Ringer Fukuoka". Tel. 092–271 1292. Telex: 722-684 stating "For Ringer Hakata"

HAKODATE: 41.47 N. 140.46 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but in practice is necessary. Pilots available 24 hours a day and vessels able enter and leave port day and night. Pilots board about 1.5 miles S.W. of Breakwater Lt. Ho. Pilot-boat is small boat carrying flag "H".

The limit of Hakodate piloting district is the sea area surrounded by a line drawn from Obana Misaki to Kattoshi Misaki and the coastline.
ANCHORAGES: Quarantine anchorage outside Breakwater and care should be taken not to foul fishing nets. Good anchorage inside breakwater at East side of section 3 – depth 11 to 13 m.
RESTRICTIONS: Quarantine and Customs business between 08.00 and 17.00 hours only.
MAX. SIZE: Tankers up to 75,000 d.w.t. at S.B.M. Max. draft 13 m. Max. L.O.A. 250 m.

,, (North side)	9 m.	171 m.	8,000 ,, (1)

PRATIQUE: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique:
A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.
If a crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Two tug-boats available for big ships: m.s. "Hakodate Maru" 107 g.t. 800 h.p. (Hakodate Municipal); m.s. "Soryu Maru" 150 g.t. 1,100 h.p. (Kyodo-Office) Ferry Boat Co. Tug-boat waits and joins vessel near the appointed berth. Tug line generally used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's agents mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage) 2100–0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
SINGLE-BUOY MOORING: Asia Oil Company, sea berth suitable for up to 75,000 d.w.t. at Imodco Buoy.
Position: 41° 48′ 08″ N. 140° 40′ 57″ E.
Soundings: At site 15.5 m. In approaches to site, more than 15.5 m. The approach to terminal is free from obstructions.
There is one 20-in. crude line running 2,000 m. from shore to the buoy, and about 500 m. from shore line to the storage tanks.
Mooring: There is no night mooring. Unmooring is carried out from 0600 till 2400 hrs., and may be done by the Master of the ship without a Pilot.
A mooring/unmooring gang is provided for by Agent. Two launches and one tug are in attendance at the mooring. One launch will keep the hose clear while the other handles the lines. The tug is standing by and only pushes against bow or near the stern to keep the head of the vessel in position whilst mooring.
At least six good mooring lines are required, preferably each line to its own bollard. The lines are run single to the buoy. The position of the ship's bow from the buoy is about 40 m., when the distance from the buoy to ship's manifold is about 360 ft.
When mooring, it is requested that the propeller is completely stopped or otherwise turned astern.
Both bow anchors are to be hove well up in the hawse pipe and properly secured before reaching the buoy. Anchors are never to be used while on the buoy. They may foul the buoy's mooring cables and pipe-line on the bottom if released.
Floating Hose: There is one set of 12-in. floating hose for the discharge of crude only. The floating hose is about 600 ft. long from the buoy's manifold. The last two lengths are floating in doughnut-shaped plastic floats. The end is marked with an unlit marker buoy.
The hose connections are always made to the port manifold and are lifted with ship's gear. The hose when full of cargo and equipment weighs over one and a half tons. Information is required of the distance from ship's bow to ship's manifold, and the distance from ship's side to ship's manifold prior to arrival.
Standard flanges are used on the hose. OD 19 in. diameter of bolt-circle 17 in. with 12 bolt-holes size 0.875 in.
Discharging: The discharging should be arranged in such a way as to be able to take sufficient ballast into ship's tanks, when about half way during discharge; to be able to get the ship's head down to prevent the vessel from veering too widely, and run over the hose near the buoy, in case of unfavourable conditions.
Maximum allowed backpressure by shore is about 10 kg/sq.cm. During the discharge the main engine must not be immobilised as it may be used to keep the vessel clear of the buoy.
Stand-by Men: While on the buoy, the vessel will be required to

provide sleeping quarters for four men, this includes the foreman who will remain on board throughout the entire operation. It is requested that the discharge officer be provided with meals. The other men are supplied with food from shore.

Discharge Rate: 1,800 k/l per hour.

DENSITY: Average 1025.

FRESH WATER: Available at piers ex-hydrants and by barge at anchorage. Supplier, Hakodate Municipal Office.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Fuel supplies for Hakodate are generally lightered from Tokyo Bay area and delays can be caused by weather conditions.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Custom Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

DEVELOPMENTS: A new berth will be established for VLCC's in 1977.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Hakodate Dockyard Co., undertakes hull and engine repairs.

DRY DOCKS: No. 1. Capacity 15,000 g.t., length 180 m., breadth 22.45 m. depth 6 m. No. 2. Capacity 9,000 g.t., length 140 m., breadth 8 m., depth 6 m.

AIRPORT: Distant 20 min. by car.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; fire 119.

TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co., Ltd. c/o Kyoei Unyu Co., Ltd., No. 5–22, Kaigan-cho, Hakodate, Hokkaido. Cable address: "FUNEKYOEI HAKODATE". Domestic Telex: 9925–64. Tel. Hakodate (0138) 42–4121.

HIMEJI: (including Hirohata, Shikama, Mega and Aboshi): 34.47 N. 134.41 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Kobe". Vessels take Inland sea Pilot off Wada, Hesaki or Sekisaki; or from ports of Inland sea. No exact Pilot station and no checking point at port of Himeji (Mega, Shikama, Hirohata and Aboshi) but Agents arrange Pilot when vessel approaches upon receiving cable giving 24 hours advance notice. Pilot boarding positions as follows: Mega 34° 44′ N. 134° 42′ 15″ E. Shikama 34° 45′ N. 134° 39′ E. Hirohata 34° 44′ N. 134° 37′ E. Aboshi 34° 44′ N. 134° 34′ 10″ E.

No strict location of anchorage for vessel awaiting a Pilot in Himeji area, but should be as close as possible to port according to draft and communication.

ANCHORAGE: No strict boundary areas for anchorages. Anchor as close as possible to the port according to draft.

RESTRICTIONS: At ports of Mega, Shikama and Aboshi, no Pilot boarding between sunset to sunrise. Hirohata Pilot will board from sunrise to 22.00 hours for vessels less than 10,000 d.w.t. for entry, and less than 15,000 for departure, for piers No. 4, 5, 6, 7, 9 and 10 but other berths only from sunrise to sunset.

MAX. SIZE: Draft restrictions as follows:

Mega 11.80 m., Shikama 8.80 m., Hirohata 13.0 m. for central pier, 7.50 m. for Kamota pier (Pier No. 1–7), 9.45 m. for Tsuruta pier (Pier No. 10–14). Aboshi 9.0 m.

Sea buoy mooring, max. draft 19 m. Max d.w.t. 250,000 tons.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards. Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Tug(s) normally join vesel when approaching, or at anchorage. Always use tug's lines without charges.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Idemitsu Kosan Kaisha Ltd., Himeji oil jetty where 1 berth only and max. 11.8 m. draft allowed. Shore discharging facilities two 12 in. diameter hose connections which connect to 18 in. diameter line for tank hoses. Acceptable max. 5 kg/sq.cm. on hose gauge, discharge rate abt. 2,000 l/t per hour. Discharge rate at the Sea Berth is 10,000 t.p.h. through 2×19 in. lines.

Note: Idemitsu Kosan Kaisha Ltd., Himeji, require following information prior to arrival for smooth berthing and connecting hoses: Height from sea to deck; Length from vessel's side to underneath of hose connections; Height from deck to connection of line; Diameter of connection.

DENSITY: Average density between 1025 and 1026 in Winter season and 1018 and 1020 in Summer season.

FRESH WATER: Idemitsu Oil Jetty, Shikama public pier and Hirohata pier able to supply fresh water from shore, but *No Water Barge available at Port of Himeji* therefore not able to supply fresh water at Satetsu pier (Shikama), Shikama buoy, Aboshi buoy or outside anchorage.

Port	*Average rate of delivery*
Mega	20–30 m/t per hour
Shikama	15–20 m/t per hour
Hirohata	15–20 m/t per hour

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passenger or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: No consuls at Himeji, Shikama or Hirohata.

REPAIRS: Most minor deck and engine repairs available at port of Himeji; in case special technician required, should be called from Kobe.

DRY DOCKS: No dry dock available at port of Hijemi, Nearest dry dock Ishikawajima-Harima Heavy Industries Co. Ltd., Aioi, who have following dry docks. Also see Aioi.

	LOA	*LBP*	*Breadth*	*Depth*	*Capacity*

REPATRIATION: Possible.

AIRPORT: About 60 km. to Irami airport. Regular services.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAYS: At Aboshi, no work on 1st and 3rd Sunday. At Shikama, shore crane, no work on 1st and 3rd Sunday but gangs available for discharging and loading.

POLICE/AMBULANCE/FIRE: Police (Shikama) Tel. 35–1441; Ambulance (Shikama) 119 or 35-0119; Fire (Shikama) 119 or 35-0119.
TELEPHONE: No facilities for placing telephones on board.
GENERAL: No quarantine available at port of Himeji, therefore pratique to be obtained at other ports.
SERVICES: Tally, laundry, daily provisions by ship chandler available locally. All other service from Kobe or Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: See "Amagasaki".
AGENTS: Sub-agents of Dodwell & Co., Tokyo. Shikama Kalun K.K., Minatomachi, Shikama-Ku, Himeji-shi. Tel. Himeji (0792) 35-0912. Telegraphic address "Shikamakaiun Himeji".

HIROSHIMA: 34.20 N. 132.25 E.

DOCUMENTS: See "Yokohama".
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

Ujina Lighthouse is at South of Ujina-islet 34° 20′ 14″ N.: 132° 27′ 55″ E.
RESTRICTIONS: Depth of approach to berth about 10 m.
MAX. SIZE: Wharf (Hiroshima Prefecture Public Berth) No. 1 length 166 m., draft 9.7 m. (10,000 g/t vessel). No. 2, length 166 m.

Gaibo-Ganpeki (wharf for ocean-going vessel) length 337 m., depth alongside about 10 m., max. draft acceptable 9.70 m.
HEALTH: See "Kobe".
TUGS: Join vessel at quarantine anchorages. Tug's lines used.
TIDES: Max. (spring tide) 3.9 m. Min. (neaps) 0.57 m.

Rate of current at flood tide generally 0.25 knot to N.E.; 0.5 knot at ebb tide to S.W. South area of Togeshima and Kannonsaki 0.25 knot at flood to S.S.E., and 0.5 knot at ebb tide to N.N.W.
FRESH WATER: By water barge (capacity: 330 m/t available). Additional charges made for overtime i.e. after 5 p.m., and Sunday, holidays and Saturday afternoon.
CONSULS: No consul in Hiroshima. Nearest Osaka or Kobe. Marine note of protest can be attested by local notary public.
REPAIRS: All types of deck, electrical and engine repairs.
DRY DOCKS: Largest dry dock Taibi dry dock, Mitsubishi-Hiroshima Works, L 154 m. B 22.00 m. 10,300 g/t. Kanawa dry dock and Ujina dry dock available for 3,500 g/t and 1,500 g/t respectively.
AIRPORT: Hiroshima airport. Only domestic airlines every hour to Osaka and Tokyo.
POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119; Fire 119.
TELEPHONE: No arrangements for placing telephones on board.
SERVICES: Any navigational apparatus can be serviced on request, Cargo holds cleaning services can also be carried out, but tank-cleaning and other services are to be arranged from Kobe.
REGULATIONS: Many seaweed and oyster beds near anchorages, therefore oil pollution precautions strictly observed.
AUTHORITY: Hiroshima-Kencho.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 23–36, 2-chome, Kaigan-dori, Ujina Hiroshima-shi, Hiroshima-ken. Cable address: Naigai Hiroshima. Domestic Telex: 652–963 Naigai Hir. Tel.: Hiroshima (0822) 54–2421.

HITACHI: 36.30 N. 140.37 E.

DOCUMENTS: and all general information, refer to "Onahama".
PILOTAGE: Not compulsory. Pilot boards in approximate position 36° 28′ 39″ N. 140° 38′ 40″ E.
MAX. SIZE: Draft, 8.50 m. limited by channel depth.
PRATIQUE: If arriving from abroad, vessel should obtain pratique at Onahama.
TUGS: One tug of 180 h.p. available.
BERTHING:

Hitachi Pier (A)	depth 7.5 m.
Hitachi Pier (B)	depth 7.5 m.
10,000 tons Wharf	depth 7.5 m.
10,000 tons Wharf	depth 9.0 m.

AUTHORITY: Port Administration Office.
AGENTS: See "Onahama".

HOSOSHIMA: 32.25 N. 131.41 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Telegraphic address of pilot station "Pilot Hososhima". 48 and 24 hours advance notice of ETA required, and any change in ETA. Pilot boards at Hososhima Quarantine anchorage location, Hosohima lighthouse N.E. one mile off, position 32° 25′ 50″ N. 131° 41′ 53″ E.
ANCHORAGE: Refer Japanese chart No. 1223 (Ozue-wan and Hososhima-Ko).
RESTRICTIONS: Strictly no entry after sunset.
MAX. SIZE: Max. permissible LOA 170 m. and draft 31 ft. 6 in.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
TUGS: Join vessel in position 32° 26.5′ N. 131° 39.5′ E. Tug's lines to be used.
BERTHING:

Industrial Port	
Wharf No. 1	depth 10.0 m.
Wharf No. 2	depth 10.0 m.
Wharf No. 3	depth 5.7 m.
Wharf No. 4	depth 5.7 m.
Wharf No. 5	depth 10.0 m.
Hyuga Refinery's Wharf	depth 11.0 m.
Sugar Plant Wharf (Dolphin)	depth 11.0 m.
Commercial Port	
Wharf No. 1	depth 7.5 m.
Wharf No. 2	depth 7.5 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.
FRESH WATER: Available from dock, 20/30 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: No local representatives.
REPAIRS: None.
REPATRIATION: Possible.
AIRPORT: Nearest, Miyazaki airport about 2 hours drive from Hososhima. JAL and ANA lines.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENTS: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Hakko Unyu Co. Ltd., No. 731, Kaigan-dori, Hososhima Hyuga-shi, Miyazaki-ken (883). Cable Address: "Ringer Hyuga". Domestic Telex: 776677 Hakko Hyuga. Tel.: Hyuga (09825)2–2185.

IHO: 34.45 N. 134.46 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobee".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 14″ N., 131° 03′ 12″ E.

ANCHORAGE: Closed Port. Agent will arrange Anchorage position for discharging, with Authorities, but usual position Iho signal station, bearing 215° distant 3,000 m. (signal stn. 34° 44′ 58″ N., 134° 46′ 12″ E.).
HEALTH: Pratique must be obtained at another Port before calling Iho.

At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Not required. Discharging at Outer Anchorage.
TANKERS: Port is operated for oil discharging only. Discharge is into barges through 6 in. hoses at either side of vessel.
DENSITY: Average density is between 1025 and 1026 in Winter season and between 1018 and 1020 in Summer season.
FRESH WATER: Not available.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunker will be lightered from the nearest stock ports at maximum 7 days prior notice.
REPAIRS: Not available.
DRY DOCK: Nearest dockyard at Aioi.
AIRPORT: Nearest airport at Osaka.
TIME: GMT plus 9 hours, no alterations.
POLICE/AMBULANCE/FIRE: Police tel. 07944/2-3377; Ambulance, 119 or 2–2101; Fire 119 or 2–2101.
SERVICES: None. Nearest services available at Kobe/Osaka area.
AGENTS: See "Himeji".

IMABARI (Imahuru): 34.04 N. 133.00 E. (incl. Mategata).

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel), Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels. To discharge/load only Temposan wharf available for vessels alongside berth where holding ground is good and depth of water is 7.50 m.

Vessels drawing over 7 m.: vessel can enter Mategata (open road) deemed to be most fitted place for vessels entry to discharge/load. Port of Mategata faces Aki-Nada and located near West entrance of Kurushima Channel; 132° 55′ E., 36° 06′ N., where holding ground good and depth of water 12–20 m. is kept.
RESTRICTIONS: No entry after dark.
MAX. SIZE: Temposan Wharf length 110 m., breadth no limit, draft 7 m. Mategata (open road) length no limit, breadth no limit, draft 10 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Temposan wharf: join vessel at sea anchorage, using tug's line without charge. Mategata (open road): no tug required in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Temposan wharf 1015. Mategata 1015.
FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 4 hours run to Imabari/Mategata). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request

stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Kobe".
REPAIRS: Only minor repairs.
DRY DOCKS: Not available at this port, the nearest ones are Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima; and Mukaishima; dimensions of these docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. It is not in action yet for ships to repair. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dock, Dock No. 1 for 20,000 d.w.t. vessel. 175 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel. 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard, Dock No. 1 for 3,000 d.w.t. vessel. 86.18 m.×13.60 m. ×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel. 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel. 175 m.×29 m.×9 m.

REPATRIATION: Possible.
AIRPORT: No airport. Nearest airports are Matsuyama and Takamatsu where are All Nippon Airways.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
GENERAL: Mategata is a closed port. To conform with regulations, vessel obtains permission from Shikoku Maritime Bureau to enter.

Customs request vessels calling Mategata to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival of vessel. Application undertaken by Agent.

No quarantine available. Nearest station Matsuyama. No Immigration. Officer comes from Niihama.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENT: See "Matsuyama".

INNOSHIMA: 34.17 N. 133.11 E.

DOCUMENTS:
Ship's Register.

IWAKUNI, Hiroshima Bay: 34.10 N. 132.11 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Cable address "Ansin Moji". Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout, 24 hours and 72 hours

advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGES: Two anchorages, one for "Quarantine" and repairing, etc., other for discharging logs.

(a) Quarantine 34° 10′ 28″ N., 132° 16′ 43″ E. min. depth 27 m.

(b) Discharging area 34° 11′ 12″ N., 132° 14′ 21″ E. min. depth 10 m.

Nature of bottom mud. Minimum bottom width no limit.

HEALTH: At first port of call in Japan vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at Quarantine area. Tug's lines to be used free of charge. Two tugs available of 3,800 h.p.

BERTHING: No berthing from sunset to sunrise. At least 2 hours notice arrival necessary to reach berth, in event of direct arrival from foreign country.

MEDICAL: No advance notice required unless urgent.

TANKERS: Max. 150,000 d.w.t.; slop discharge pipe-lines.

	Max. d.w.t.	*Max. LOA*	*Max. safe draft*	*No. and diameter hoses*
Koa Oil Crude Pier	150,000	No limit	16.50 m.	12″×3

Kenei North No. 3 Pier	35,000	230 m.	9.00 m.	10″×2

Discharge rates:

Koa Oil Crude Pier	(Crude Oil)	6,000 t.p.h.
Koa Oil No. 3 Pier	(Low sulphur Fuel Oil)	600 t.p.h.
Kenei North No. 3 Pier	(Crude Oil)	500/800 t.p.h.

DENSITY: 1020.

FRESH WATER: Alongside Koa Oil Pier, possible to take fresh water ex. shore.

Berth	*Capacity*
Koa Oil Crude Pier	5 t.p.h.
Kenei No. 3 Pier	3 t.p.h.
Sanyo Pier	5 t.p.h.

FUEL: Available ex-wharf, but not ex-barge. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

DEVELOPMENTS: New berth named "Muronoki Pier" under construction.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: No consul but marine note of protest can be attended by local notary public.

REPAIRS: None. For heavy repairs from Hiroshima.

REPATRIATION: Possible.

AIRPORT: Hiroshima airport 45 km. (Abt. 2 hours).

For Osaka (TOA Airline) 0900 hrs., 1415 hrs., 1725 hrs., 2000 hrs.

For Tokyo 0750 hrs., 1100 hrs., 1355 hrs., 1510 hrs., 1755 hrs., 1905 hrs.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110 (just dial); Ambulance 119 (just dial); Fire 119 (just dial).

TELEPHONES: No arrangements available except Koa Oil.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

AGENTS: Sub-agents of Dodwell & Co., Tokyo. Naigai Unyu Co. Ltd., Iwakuni Office, 7–351 4-chome, Shinminato-cho, Iwakuni-shi, Yamaguchi-ken. Cable address: Naigai Iwakuni; Domestic Telex: 6672–39, Naigaiunyu Iwa; Tel.: Iwakuni (0827) 21–7115/6.

KAGOSHIMA: 31.35 N. 130.33 E.

DESCRIPTION: Port situated in Kagoshima Bay, the Southern part of Kyushu and consists of 3 sections as follows:

Main Harbour: divided into Inner Harbour sheltered by breakwaters which can accommodate up to 3,000 tonners, and Outer Harbour, (open roads) where large size vessels lie at anchor.

New Harbour: adjacent to Main Harbour on the South. This section also sheltered by breakwaters and a 10,000 tonner can be accommodated.

South Harbour: located about 6 kms. away from main harbour on South and used for small coasters.

DOCUMENTS:

Customs: When vessel arrives direct from foreign port, customs officials board for search. Following documents to be submitted:

Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual crew member).
Store List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.

Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs officials will not attend on board, except special case. Master or Agents to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at quarantine anchorage (see "Health"). Request for Pilot made through Agent. Master report by radio accurate ETA at least 24 hours prior to arrival.

ANCHORAGE: Ample good holding anchorage available in Outer Harbour. Depth: Over 9 m.

RESTRICTIONS: Berthing/unberthing during day only.

Wharf	*Location*	*Length*	*Depth*
7.9 m. wharf	Main harbour	110 m.	7.9 m.
7.5 m. wharf	,,	220 m.	7.5 m.
North	New harbour	125 m.	7.5 m.
North	,,	160 m.	5.5 m.
South	,,	165 m.	9.0 m.
South	,,	260 m.	7.5 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique.

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Quarantine:

(a) Quarantine station: Sea area within radius of 1,000 m. from centre, position 31° 33′ 25″ N., 130° 35′ 33″ E.

(b) Quarantine service rendered from sunrise to 1 hour before sunset.

(c) "Q" flag should be hoisted until free pratique granted.

(d) When vessel arrives from plague-infected or suspected area within 10 days after she left such place, 24-hour special quarantine required.

All sanitary scuppers must be closed and garbage not thrown overboard after reaching 60 miles off Japanese coast.

RADIO: Recommended Captain contacts Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: "Wakashio Maru" twin diesel vessel 1,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by Agent mainly by radio.

New Port (Kagoshima-Shinko). Sheltered harbour with main entrance 150 m. wide between S. breakwater (350 m.) and N. breakwater (150 m.). Sheltered anchorage in depth of 5.5–9.0 m. No mooring buoy. Berthage outside breakwater in depth of 9.0 m. and inside breakwater in depth of 5.5–9.0 m.

Piers: South pier (in foreign trade zone, for outbound vessels only):' 165 m. long with 9.0 m. alongside, will take one vessel of about 10,000 g.r.t.

260 m. long with 7.5 m. alongside, two vessels less than 5,000 g.r.t.

120 m. long with 4.5 m. alongside, two vessels less than 500 g.r.t.

North pier (for inbound vessels):

125 m. long with 7.5 m. alongside will take one vessel of about 3,000 g.r.t.

160 m. long with 5.5 m. alongside two vessels less than 1,000 g.r.t.
60 m. long with 4.0 m. alongside one vessel less than 500 g.r.t.
160 m. long with 5.5 m. alongside two vessels less than 1,000 g.r.t.

Taniyama Harbour: South pier has been constructed, located about 10 kms. from main harbour on South and used for large coasters.

Berthing: Sheltered harbour with main entrance 200 m. wide between S. breakwater (780 m.) and N. breakwater (650 m.). Sheltered anchorage in depth of 5.5–13 m. No mooring buoy. Berthage inside breakwater in depth of 5.5–12.5 m. South pier (in foreign trade zone, for outbound vessels only).

Pier	*Length*	*Depth alongside*	
S–1	250 m.	12 m.	one vessel of 50,000 g.r.t.
S–2	260 m.	7.5 m.	two vessels less than 10,000 g.r.t.
S–3	270 m.	5.5 m.	two vessels less than 1,000 g.r.t.

North pier: now under construction.

STEVEDORES: Maximum 10 gangs available. Working hours: 1 labour shift. Normal working hours: 0800 to 1700 hrs. Overtime work possible until about 2000 hrs. by applying to Customs at following hours: 1700–2200 hrs., 0500–0830 hrs. also Sundays and holidays 2200–0500 hrs. All night work is impracticable. No work can be arranged for 31st December and during New Year holidays (1st to 3rd January).

MEDICAL: Hattanmaru Hospital; Fukusaki Hospital; Nagata Dental Plant. No advance notice required unless urgent.

TANKERS: No tanker berths at Kagoshima, but Central Terminal Station (C.T.S.) in Kagoshima Bay. See "Kiire".

FRESH WATER: One 150-ton water barge available. Hydrants at wharves in main harbour. Rate of delivery: 50 t.p.h. from barge; 15–20 t.p.h. from hydrants.

FUEL: None available. Lightered from another port. Ample notice so that necessary lighterage can be arranged.

GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores open/close hatches. Cost per hour depending on type of cargo. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete before berthing.

CERTIFICATES: Ship's register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears poor.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore but no spirits.

REPAIRS: Only minor repairs – Kikukawa Iron Works and Kagoshima Dockyard Co.

REPATRIATION: Possible. Also see "Regulations".

AIRPORT: Kagoshima Airport. Short distance from town.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: See "Tokyo" (Also see "Stevedores").

SERVICES: Cargo Survey. Provisions and Stores. Fumigation – Toyo Fumigation attend from Moji on request.

WIND/TIDE: N.W. wind prevails in Winter season and Easterly wind in Summer. Wet seasons in April and July. Average tidal range 2.74 m. In the outer harbour, flood tide sets to North and ebb to South. Maximum speed of current 2 knots. Current in inner harbour is less than 0.25 knots.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if vessel stays longer. Also see "Regulations".

REGULATIONS: Immigration officials board vessel on arrival to examine passports, discharge-books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. 1 copy each of crew list and passenger list required by them. Providing ship's Agent with a crew list beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes may be extended 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

AUTHORITY: Kagoshima Kencho.

AGENTS: Sub-agents of Dodwell & Co. Tokyo. Kyoshingumi Co. Ltd., Agency Department, Zisaki, Zyonan-cho, Kagoshima-shi, Kagoshima-ken. Cable address: Kyoshingumico Kagoshima; Domestic Telex: 7825–12. Kyoshingumico Kagoshima; Tel.: (0992) 26–7123.

KAKOGAWA: 34.42 N. 134.50 E.

Port is for sole use of the Kobe Steel Co. Ltd. Declared open port as of 1st May 1970, but vessels should first call off Kobe to obtain free pratique, Customs clearance and Pilot.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot will board off Kobe when calling for free pratique and Customs clearance. Pilot will be arranged by Agent subject advance request and usual ETA advices.

HEALTH: Vessel must call off Kobe for free pratique. At first port call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

RESTRICTIONS: Mooring/unmooring conducted daylight hours only.

BERTHING:

	Length	*Depth*
Pier E-1	200 m.	15 m.
Pier E-2	200 m.	14 m.
Pier E-3	300 m.	14.5 m.
Pier E-4	400 m.	17 m.

3 unloaders are presently available. 2 have capacity of discharging 1,500 t.p.h. and the third 700 tons.

Depth at low water is 17 m. in the fairway which is 400 m. wide.

MEDICAL: Treatment has to be arranged from Kobe.

FRESH WATER: Available from quay. Rate 50–80 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

REPAIRS: Arranged from Kobe.

REPATRIATION: Possible, through Kobe.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

SHIPMASTER'S REPORT:

When the vessel anchors off Kobe in the roads, "Kobe Harbour Control" will call on VHF Channel 16 and ask for anchoring time and position from Kobe headlight.

The maximum draft at Higashi Harima is 15.5 m.

Vessels always berth port side alongside. The gangway should be lowered as soon as possible to let the officials aboard.

The vessel loaded 112,000 metric tons in 60 hours, previously the same amount had been loaded a little quicker.

Bilge water, oil or garbage should never be thrown overboard because owners have to pay compensation to the Fishermen's Union.

Berthing takes place two hours before high water.

AUTHORITY: Kakogawa Doboku (Public Works) Office.

AGENT: See "Himeji".

KAMAISHI: 39.16 N. 141.55 E.

DOCUMENTS:

Ship's Register. Last Port Clearance. 3 Crew Lists including Passport Nos. 3 Passenger Lists. 1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot not compulsory, but arrangeable at Master's request. Pilot arranged by Agent and vessel required to radio Agent ETA 24 hours before ship's arrival. Pilot boat has no facility to communicate, nor particular light or sound signals, but flies Pilot flag "H". Pilot boards at 39° 16′ N. 141° 59′ E. 1 mile off Osaki Point. No alternative area in event bad weather.

ANCHORAGE: Up to four 30,000 d.w. tonners can safely anchor. Depth of water: 31–43 m. at Quarantine anchorage. 20–27 m. at discharging anchorage.

RESTRICTIONS: Vessel free in and out anytime, but no Pilot available after dark for entry.

MAX. SIZE: Draft 12 m. and LOA, 200 m. (656 ft.) Breadth no restriction. Vessels with draft exceeding 9 m. required to berth on high water.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Qurantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO : Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs (2) join vessel at anchorage and tugs' lines used free of charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Max. depth alongside, 13 m.
STEVEDORES : At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700-1900 hrs. 50% additional of basic stevedorage; 2100-0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL : No advance notice required unless urgent.
DENSITY : Winter 1026-1027. Summer 1023-1024.
FRESH WATER : Available from wharf by hose. Rate of delivery: about 10-15 t.p.h. No water barge, but in case vessel requires water at anchorage, tugboat arrangeable for that purpose.
FUEL : Domestic diesel oil. No bonded fuel oil. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
OPENING/CLOSING HATCHES : Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES : Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE : Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS : None.
REPAIRS : Minor repairs such as welding, piping, lathing works etc. only.
DRY DOCKS : None.
REPATRIATION : Possible.
AIRPORT : Hanamaki, distant 100 km. (2 hours by car). One flight between Hanamaki/Tokyo on Tuesday/Thursday/Saturday and two flights on Sunday/Monday/Friday by All Nippon Airline (ANA).
TIME : GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE : Police 2-4536 (Headquarter) and 2-3828 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES : No facilities for placing telephones on board.
SERVICES : Surveyor, Tally, Hold cleaning, Tank cleaning.
GENERAL : Discharging ex-gearless vessel not possible at anchorage.
SHORE LEAVE : Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY : Port and Harbour Dept.
AGENTS : Sub-agents of Dodwell & Co. Ltd., Tokyo. Abeki Shokai, 1–210, Hama-cho, 1-chome, Kamaishi-shi, Iwate-ken. Cable address: Abe Kamaishi; Domestic Telex: 8355–61 Abe J; Tel.: Kamaishi (01932) 2–4583/4.

KANDA: 33.47 N. 131.00 E.

RESTRICTIONS: Main channel length 11,080 m., width 200 m., depth 9 m.
Tidal range 3.2 to 3.3 m.
BERTHING: Main berths dredged to 9 m. alongside. Berths mostly used for importing lumber.

KANMON-KO (Kanmon Harbour).

According to Japanese Harbour Area Regulations, Moji, Shimonoseki, Kokura, Tobata, Wakamatsu and Yawata are respective sections included in one port namely Kanmon Harbour. The expression of the port as "Kanmon" has been used in charter parties, where these six ports are considered to be one port. Vessel's movements within these ports is treated as shifting berth in the same port. Therefore, if vessels calls at more than 2 ports within this area, such calls are covered by one payment of tonnage dues. However, at Tobata, Wakamatsu and Yawata, port dues are levied in addition to tonnage dues.

Entry/departure procedures to Customs, Immigration and/or Harbour Master should be effected at each port, as those officials stationed individually at each port.

KANOKAWA: 34.11 N. 132.26 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF Communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

Inland Sea Pilots also attend Harbour Pilotage but if specifically required Harbour Pilot boards at Port entrance South side of Ohkurokamishima, Position 34° 10′ N. 132° 26′ E.
ANCHORAGES: Good holding ground. Entrance channel and Harbour Channels. Depths 18 m. min. Bottom mud and sand. Difference between quoted datum and chart datum about 2 m. (to be added). Harbour anchorage about 2 miles South of "T" head berth where vessel remains if waiting berth.
MAX. SIZE: Length 240 m., beam 30 m., draft 13 m., deadweight 60,000. See "Tankers".
HEALTH: Closed port. Vessel must call at another port (Such as, Matsuyama or Iwakuni) for Customs and Health clearance before entering Kanokawa. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

N.B. Vessels destined to Kanokawa have called at Kure Quarantine Anchorage for free pratique and customs' clearance before proceeding to Kanokawa. The above practice is not only a loss of time (50 miles deviation) but dangerous for vessels to transit in a congested traffic area. In view of the above, the practice was amended and vessels from now on must call at Matsuyama or Iwakuni instead of Kure for Customs and Quarantine clearance.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
TUGS: Arranged from Kure. Normally join at Kanokawa Port entrance. Usually tug's lines used without extra charge.
TANKERS: "T" head jetty with 4 buoys. Depth alongside 13 m. 2 hoses with 12 in. connections, max. 8 kgs/sq. cm. Grades handled: molasses, crude and fuel oil. Discharge rate for crude oil 800/1,000 t.p.h.

A new berth is expected to be opened in 1974, the particulars are as follows.
Berth: Mitsubishi Corp. Kanokawa oil pier No. 3, being extension of the old berth Nos. 1 and 2. Depth alongside, 15.4 m. Nature of bottom, sand with shell. Average density, 1020 (Summer), 1025 (Winter). Max. size, length 300 m., beam 40 m., draft 14.0 m. d.w.t. about 80,000 L.T.

Type and size of manifold: 2 × 12 in. and Chikusan arm. Discharge rate 2,000 t.p.h.
DENSITY: 1023–1025 alongside berth. Rise of tide: Springs 3.4 m. Neaps 2.6 m.
FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate – 20 ton/hour.
CONSULS: None.
REPAIRS: See "Kure".
AIRPORT: Kure.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police 2005; Ambulance 2711; Fire 2711.
TELEPHONES: No arrangements available for placing telephones on board.
AUTHORITY: Ohgaki Doboku (Public Works) Office.
AGENTS: See "Kure".

KASHIMA: 35.54 N. 140.42 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot called through Agent. Pilot boards about 2 miles to N.E. from the end of breakwater, in position 35° 57′ 5″ N. 140° 43′ 5″ E.
ANCHORAGE: No suitable anchorage at present Quarantine Anchorage located at section between 183° and 279° from the undermentioned centre within a circle of radius of 1,300 m. centering the position of 35° 57′ 19″ N., and 140° 42′ 30″ E., where depth of water, 18 m.
RESTRICTIONS: Pilot does not board vessel after dark.
MAX. SIZE: *Tankers:*

Berth	*Max. D.W.T.*	*Max. L.O.A.*	*Max. Safe Draft*
200,000 Ton Sea Berth	200,000	No Limit	17.00 m.
100,000 Ton Berth	100,000	No Limit	14.50 m.
70,000 Ton Berth	70,000	No Limit	13.30 m.

Bulk carriers have entered with draft up to 44 ft.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.
TUGS: Usually joins vessel at anchorage where Pilot boards; ship's lines used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
Sumitomo Metal Depth 16.0 m.
Sumitomo Metal ,, 12.0 m.
Kashima Denkai ,, 16.0 m.
Kashima Sekiyu ,, 16.0 m.
MEDICAL: No advance notice required unless urgent.
TANKERS: Requirements prior to arrival: Manifold: position, number and external and internal diameters. Reducer: type (ASA or JIS etc.) and external and internal diameters. Bolt: diameter and number, also diameter of pitch circle. Pumping capacity. Ship's draft and ETA, to be received by 0900 hrs. every morning continued 3 days prior to day of arrival. Water requirement (because of necessity of pumping-up tank for preparation).
Discharge Rates:

Berth	*Product*	*Discharge Rate (t.p.h.)*	*Shoreline*
200,000 Ton Berth	Crude Oil	10/12,000	38″×1
			42″×1
100,000 Ton Berth	Crude Oil	4/6,000	24″×1
		4/6,000	26″×1
	Bunker	5/600	8″×1
70,000 Ton Berth	Naphtha / White Kerosene	1,800	14″×1
	Minus Crude Oil	3/3,500	16″×1
	Fuel Oil	1,800/2,000	20″×1
	Crude Oil	3/3,500	20″×1
	Bunker	5/600	8″×1

DENSITY: 1025.
FRESH WATER: 50 metric t.p.h. from shore pipe, 50% additional for service between 0600–0800 hrs. 1700–2200 hrs. and during rainy and rough weather, also on Sundays and holiday. 100% additional for service between 2200–0600 hrs.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No special precautions, but water curtain made alongside dolphin in case, and there is an extinguisher-boat (15 gross tons, and airfoam system).
DEVELOPMENT: Port under construction. When completed, total length of wharf will be about 17 km. for about 30 big industries such as iron and steel works, oil refinery and chemical works, foodstuff and foodstuff industries, etc.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Arranged from Tokyo/Yokohama.
AIRPORT: Presently under construction, about 60 km.s away.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance/Fire Tel. 119.
TELEPHONES: Not available for placing on board.
SERVICES: No equipment nor facilities, but compass adjusting and others arrangeable from Yokohama.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kashima Port Development Office.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Keiyo Shipping Agency Ltd., Kashima Office, Kizaki, Kamisu-machi Kashima-gun, Ibaraki-ken. Cable Address: Keiyoshipkashima Itakoibaraki Domestic Telex: 3658-926 Tel.: Kashima (02999) 2-2193.

KAWASAKI: 35.32 N. 139.42 E.

Also refer to Yokohama.
PORT LIMITS: Consists of sea and rivers below the most downstream bridges bordered by the coastline, the line drawn between the administrative areas of Tokyo and Yokohama and the point 143° 30′, 2950 m. from the Hane-da light buoy, the line drawn 233° from the above-mentioned point, the line drawn 151° 30′ from the end point of Sakai Channel which divides Yokohama City administrative section from Kawasaki City. (The river of Tama is not included.)

No. 2	220 m.	30 m.	10 m.	25,000 g.t.

AIRPORT: Distance from airport (Tokyo International Airport) 5 miles. Airport served by regular airlines.

TIME: Akashi standard time 135° GMT plus 9 hours. Permanent.

HOLIDAYS: National holidays, Sundays. National holidays January 1, 2, 3, 15; February 11; March 21; April 29; May 3, 5; September 15, 23; October 10; November 3, 23; December 28, 29, 30, 31. Cargo work cannot be arranged on following days: December 31st; January 1st, 2nd, 3rd.

POLICE/FIRE/AMBULANCE: Police Kawasaki 26–9161; Ambulance Kawasaki 28–0963; Fire Kawasaki 28–5521.

TELEPHONES: Connection to ship. Charge for use.

SERVICES: Tank-cleaning. Compass adjusting.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Awaiting favourable tide. Delay of Quarantine inspection.

SHIPMASTER'S REPORT: *The Tonen Ohgishima Sea Berth:*

1. Suggest Mikimoto Lighthouse used for end of passage as from there inwards to Uraga Channel (58 miles) heavy concentrations of traffic frequently experienced.
2. Entry to Uraga Channel for VLCCs permitted only during daylight (i.e. sunrise to sunset).
3. Pilot boards in vicinity Uraga No. 1 buoy from 1 of the 2 tugs which escort the vessel to Yokohama.
4. Deep draft signal to be displayed including the red flashing light and Code "First Substitute over Flag 'B' " (refer Maritime Traffic Safety Law).
5. ETAs (No. 1 Buoy Uraga) should be updated as promptly as possible. Considerable importance attached to the vessel's arrival time by Yokohama Port Authorities.
6. Vessel must anchor at Yokohama Quarantine Anchorage where Port Health boards (pilot hoist used).
7. Berthing/Unberthing Ohgishima Sea – berth during daylight only (sunrise to sunset).
8. Berthing pilots (2) embark at Quarantine Anchorage, 6 tugs all using nylon tow ropes with eye on bitts. Always port side alongside. Refer mooring diagram for details. No additional mooring ropes available on loan or hire from berth. Shore gangway, Chiksan arms 4×16 in. connections.
9. A spill boom completely surrounds the vessel on the berth. A comprehensive book (in English) of the Terminal Regulations placed on board on arrival. Tonen Company require a tape recording concerning oil pollution to be broadcast throughout the vessel's p/a system before cargo discharge commences.
10. Ullaging is witnessed by Oil Co. representative. Samples taken from all tanks necessitating the opening of tank hatches. All tanks dipped after discharging completed.
11. The loading of stores, provisions, etc. (either by crane or derrick) is not permitted on this berth. No restrictions on items being *carried* on board via the gangway, e.g. laundry. Necessary to anchor after discharging/ballasting to take on stores.
12. During severe weather conditions tug assistance was requested to stand by the vessel on the berth. Tugs cannot approach unless the spill boom is removed and this will only be removed if cargo discharge ceases and Chiksan arms disconnected.
13. A shore liberty boat was arranged through Agent. This service is to Yokohama, approx. 1 hour journey. A boat service to nearby Kawasaki is not permitted due to Customs difficulties. All boat services suspended when weather deteriorates. Shore passes issued by Immigration Authorities on board and must be collected in before vessel leaves berth.

AUTHORITY: Port & Harbour Bureau of Kawasaki Municipality.

AGENTS: See "Yokohama".

KIIRE: 31.23 N. 130.32 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Nos.
5 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms.

Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: No particular regulations for navigating in Kagoshima Bay. Suggest enter Bay on course close to Osumi Peninsula. 3 Light Beacons South of oil piers for Ships approaching and manoeuvring. Bay pilots not provided but Mooring Master provided for assistance to Master for berthing without charge. No VHF available for ship-shore communication.
ANCHORAGES: Anchorage area ranges in depth from 30 to 60 m. Holding ground in these areas only fair; recommended vessels lie to long scope of chain. Locally tide rise approximately 3 m. in springs and 1.5 m. neaps. Maximum tide currents Northerly 0.32 knot, Southerly 0.47 knot. Ample anchorage and manoeuvring area N.E. of terminal.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions. However, Harbour Master will not permit vessels loaded with oil cargoes to berth between sunset and sunrise.
MAX. SIZE: Max. draft at Nos. 1 and 2 berths – 18 m. acceptable 30,000–150,000 d.w.t. vessels. Max. draft at No. 3 berth – 28 m. acceptable 30,000–450,000 d.w.t. vessels. Max. safe draft at No. 4 berth 34 m. suitable for up to 500,000 d.w.t. Also see "Tankers".
HEALTH: See "Kagoshima".
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
TUGS: Mooring and unmooring assistance provided by two 4,200 h.p. CPP tugs and two 3,000 h.p. VSP tugs regularly stationed.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: Advance notice required if arriving at weekend.
TANKERS:

Berth No.	*Max. LOA*	*Connections*	*Discharge Rate*
1	310 m.	5×12″	10,000 k/l (loading only)
2	310 m.	5×12″	10,000 k/l
3	350 m.	6×16″	20,000 k/l
4	400 m.	2×16″	5,000 k/l
		3×24″	10,000 k/l

DENSITY: 1025.
FRESH WATER: Water obtainable at berth on oil piers at rate of 40 tons per hour.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: Very strict Safety Regulations.
Disregard of regulations will result in stopping all loading or unloading operations and the vessel being ordered off berth for appropriate action to be taken.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Available Moji, Sasebo & Nagasaki.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Distance from airport about 2 hours by car. ANA and Towa airlines serve daily.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police station tel. 110; Fire brigade station is located at terminal and Ambulance available at that station.
TELEPHONE: Telephone placed on board at Terminal free of charge for inter-office communication.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Nippon Oil Staging Terminal Co., Ltd.

KIKUMA: 34.02 N. 132.50 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot-stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea pilots also act as Harbour pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot-stations.
1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot-station.
3. Mesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N., 131° 03′ 12″ E.
ANCHORAGE: Lat. 34° 03′ N. Long. 132° 51′ E. Depth of water: 15–30 m. Anchorage located about 350 m. off beach. Holding ground good and Port faces Iyo-Nada and located Bungo channel. Current at berth and off shore very strong. During winter months strong North-westerly wind prevails.
RESTRICTIONS: Mooring and unmooring daytime only and to be carried out on flood tide.
MAX. SIZE: See "Tankers".
PRATIQUE: Closed port. Vessels should obtain pratique at Matsuyama. If Kikuma is first port of call in Japan, customs formalities will be carried out by Imabari Branch Customs Kikuma Port Guard Office.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
TUGS: Join vessel at sea anchorage, always using tugs line without charge. 2 to 4 tugs are required for berthing, depending on size of vessel. 3 tugs are normally used for unberthing.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: *Taiyo Oil Co. Terminal.* 2 tanker berths available in approximate position 34° 03′ N. 132° 51′ E.
No. 1 Berth: Max. d.w.t. 125,000 tons, Max. LOA, 280 m. Max. safe draft 20.0 m. Connections 1×28″ for Fuel Oil, pumping rate 4,500 t.p.h. and 1×28″ for Crude Oil, pumping rate, 4,500 t.p.h.
No. 2 Berth: Max. d.w.t., 40,000 tons, Max. LOA, 220 m. Max. safe draft 13.20 m. Connections 1×20″ for fuel oil, pumping rate 1,800 t.p.h. and 1×20″ for Crude oil, pumping rate 1,800 t.p.h.
DENSITY: Anchorage 1015. Berth 1015.
FRESH WATER: Fresh water not available but usually brought by barge from Onomichi (about 4 hrs. run to Kikuma). Rate of delivery 80 tons to 200 t.p.h. dependent on barge.
FUEL: Can only be supplied by barge from Hanshin and Kanmon area, provided five days notice is given. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: No consuls. The nearest Consulates in Kobe.
REPAIRS: Only minor repairs.
REPATRIATION: Possible. Nearest Immigration office situated at Matsuyama.
AIRPORT: Nearest Matsuyama and Takamatsu.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
GENERAL: As this port is a closed port, the undermentioned procedures required: In conformity with regulations vessel required to obtain special permission to enter from Shikoku Maritime Bureau.
Customs request vessel call at Kikuma to obtain special permission for entering at preceding port, by paying the charge at the same rate of tonnage dues prior to arrival; the above procedures will be taken by Agent.
No quarantine available, the nearest quarantine station is located at Matsuyama.
No Immigration office at this port (coming from Matsuyama).
SERVICES: See "Kobe".
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
DEVELOPMENTS: A Taiyo Oil Co. Ltd. dolphin sea berth is under construction, to be suitable for up to 70,000 d.w.t. and will replace the existing 40,000 d.w.t. berth.
AGENTS: See "Niihama".

KIMITSU (Kisarazu): 35.22 N. 139.52 E. **(See Plan)**

DOCUMENTS:
Ship's Register.
Last Port Clearance.
4 Crew Lists including Passport Nos.
4 Passenger Lists.
1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *Berthing Pilot:* Not compulsory but necessary. Application to be made to Yokohama pilot office, via local Agent. Pilot boards on Kisarazu Quarantine station or entrance of approaching passage. Available during daytime only.

Bay Pilot . . . . Uraga & Nakano-SE Suido on entering: Bay Pilot will become compulsory as of January 1977 with effect to foreign trade vessels over 10,000 gross tonnage. Application required 24 hours prior to entering by Cable to Anjin Yokosuku through Agent or direct. Pilot boarding position located on point 3.5 miles and 150° from Kannon Saki L.H. Available any time, if any notice delay, change must be cabled to Anjin Yokosuka.

On leaving: Application same as On Entering. Pilot boarding on pier or off harbour.

ANCHORAGE: Refer to Japanese Chart No. 1062 (middle part of Tokyo Bay). Kisarazu Quarantine Anchorage boundary:

Point A, 35° 24′ 6″ N. 139° 49′ 30″ E.
Point B, 85° 3,500 m. direction from A.
Point C, 355° 1,500 m. direction from B.
Point D, 265° 3,500 m. direction from C.
Position usually used: 35° 24.5′ N. 139° 50.5′ E.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port. A vessel may be berthed without a stay at the anchorage if Radio Pratique system used and permission of Chief of Quarantine Office.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF: Port Radio Station at Yokohama works 24 hours. Channel 16.

TUGS:

6 tug boats belonging to Kimitsu tug boat station.

3,500 h.p.–4,000 h.p.	2 tugs
2,900 h.p.–3,500 h.p.	3 tugs
2,200 h.p.	1 tug

Another 16 tug boats listed belonging to Yokohama tug boat station.

3,500 h.p.–4,000 h.p.	2 tugs
3,000 h.p.–3,500 h.p.	4 tugs
2,500 h.p.–3,000 h.p.	2 tugs
2,000 h.p.–2,500 h.p.	8 tugs

Tug boat's lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by VHF.

Centre Pier:

No. 1 – 4 Coastal chemical tanker, tug boat basin.
No. 5 Coastal Raw material discharging berth.
No. 6 Discharging berth of iron ore and coal. Max. draft 16.3 m. at high tide. Length of berth 304 m. Capable of 150,000 d.w.t.
No. 7 Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 350 m. Capable for 200,000 d.w.t.
No. 8 Discharging berth of iron ore and coal. Max. draft 18 m. at high tide. Length of berth 422 m. Capable for 270,000 d.w.t.
No. 10 Coastal Limestone carrier berth.
No. 11, 12 Coastal tanker berth.

Centre pier unloader at No. 6 & 7 – 4 units each capacity 1500 t.p.h.
Centre pier unloader at No. 8 – 1 unit capacity 2,500 t.p.h.

West Pier:

No. 1 – 6 Coastal small ships only.
No. 7 Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capable for 30,000 d.w.t. Shore crane 1 unit 20 tons 1 unit 30 tons.
No. 8 Loading berth of steel products. Max. draft 11 m. Length of berth 250 m. Capable for 30,000 d.w.t. Shore crane 1 unit 30 tons 1 unit 20 tons.
No. 9 Loading berth of steel products. Max. draft 11 m. Length of berth 285 m. Capable for 30,000 d.w.t. Shore crane 1 unit 30 tons 1 unit 35 tons.
No. 10 Loading berth of steel products. Length of berth 230 m. Max. draft 11 m. Capable for 40,000 d.w.t. Shore crane 2 units each 30 tons.

East Pier:

No. 2 Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capable of 30,000 d.w.t. Shore crane 3 units on No. 2 & No. 3 berth 30 ton.
No. 3 Loading berth of steel pipes. Max. draft 11 m. Length of berth 240 m. Capable for 30,000 d.w.t.
No. 4 – 13 Coastal ship use only for loading wire rod, angle bar, etc. and discharging materials.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost.

Average loading rates:	Coils 75 t.p.h.
	Plates 50–60 t.p.h.
	Pipes 40 t.p.h.
	Angle 40 t.p.h.
	Wire rods 15–25 t.p.h.
Average discharging rates:	Coal 700 t.p.h.
	Iron ore 750–800 t.p.h.
	1,500–1,600 t.p.h.
	(2,500 ton unloader)
	Manganese ore 600 t.p.h.
	Iron sand 900 t.p.h.
	Coke 700 t.p.h.

MEDICAL: No advance notice required unless urgent.

TANKERS: Only coastal tankers.

DENSITY: 1021-1025

FRESH WATER: Available from shore line. Rate of delivery 40-50 t.p.h. Costs Yen 125 per ton.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches except steel hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CARGO GEAR: Usually load/unload by shore cranes.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRYDOCKS: None.

SURVEYORS: Nippon K.K.K., Kimitsu Branch.

REPATRIATION: Possible.

AIRPORT: Haneda International Airport is about 3-4 hours distant.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: No cargo loaded on January 1st. Cargo discharged on all holidays.

POLICE/AMBULANCE/FIRE: Kisarazu Police Station tel. 0438–23–4011; Kisarazu Fire Brigade and Fire Station tel. 0438–23–7121.

TELEPHONES: No telephones installation direct to vessels alongside wharf.

SERVICES: Provisions, Laundry, Ships store, Garbage, Hold cleaning, Navigation aids. Special service are called from Yokohama and Tokyo.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

GENERAL: Notification to Maritime Safety Agency:

According to Maritime Traffic Safety Law, The Master of large vessel (over 200 m. in LOA) is required to give to Regional Maritime Safety Agency an advance report of estimated time passing the traffic route and other matters and also requires to obey the instruction given by the Agencies.

Notification cable definitely to be given by 1200 hrs. (JST) on the day prior to entering, directly from Master or through local Agent. Any change in reported matters, to be reported 3 hours before the time of entering by radio communication or telephone.

Seaweed cultivation to be carried out in the vicinity of Nippon Steel Corporation Kimitsu Works so Master's co-operation with regards to the following items would be appreciated.

1. The discharge of oil or oily waste into the water is strictly prohibited by Marine Pollution Law and other related ordinance.
2. Proceeding to the cultivation area is prohibited.
3. Numerous buoys each exhibiting flashing yellow light have been established to mark the outer side-line of the seaweed cultivation area.
4. Bunkering possible daytime only (sunrise to 1 hour before sunset) in the port of Kimitsu.

AGENT: Sub-agents of Dodwell & Co. Ltd. Toyko. Chiba Kaiun Sangyo Co. Ltd., Kimitsu Office, c/o Kaiun Centre Kimitsu Works of Nippon Steel Corporation, No. 1, Kimitsu, Kimitsu-shi, Chiba-ken. Tel. Kimitsu (04785) 2-0800. Telegraphic "Chibamarine Kisarazu".

KINUURA: 34.50 N. 136.56 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: When Pilot required, cable Agent at least 1 day before arrival with ETA. Pilot station located 34° 40′ N. 136° 58′ E. If ETA changes cable "Handakoun Handa Aichi" who pass messages to Pilot. Vessels anchor to await Pilot at above position. No VHF communication available. Pilot boats have no communication system.
ANCHORAGE: Kinuura anchorage located 34° 49′ N. 136° 57′ E. Depth of anchorage: Outside high tide bank about 38-39 ft., inside high tide bank about 32-33 ft.
RESTRICTIONS: Entry restricted only by draft; no other restrictions.
MAX. SIZE: Depth at Chubu Nihon Grain Centre, 12 m. At other berths, 10 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel, to Choshi and North bound to Nagasaki Radio respectively.
TUGS: No tug required when vessels enter anchorage, only alongside wharves.

Pilot Boats – "Yahagi Maru" 1,600 h.p., "Shiomi Maru" 1,300 h.p. Tugs standby near wharves.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: About 1023–1027.
FRESH WATER: Available, but only 1 water barge – capacity 50 tons. When vessels alongside Public Wharves, water can be taken from shore. Delivery rate: 50 t.p.h. but if more than 50 tons required barge returns to shore to load, therefore 1 trip takes about 3 hours.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: None.
AIRPORT: None.
TIME: GMT plus 9 hrs. No alterations made to clocks during year.
HOLIDAYS: 20th July.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 109.
TELEPHONES: No telephones available to place on board.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kinuura Port Office.

AGENT: Dodwell & Co., c/o Handa Koun Kabushiki Kaisha 28, Hama-cho, Handa, Aichi-ken. Cable Address: Handakoun Handa Domestic Telex: 4563-626 H Koun J Tel.: Handa (0569) 21-2301.

KIN WAN (Okinawa): 26.22 N. 127.58 E.

(See Plan)

Kin Wan Port Services Company, Heianza Island.
DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of crew baggage, i.e. tobacco, wines/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest, Cargo Manifest in Transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

APPROACHES: For those vessels which may not be provided with a large-scale chart the following suggestions are given as a guide to approaching the pilot station:

Vessels should make for the position 26° 26′ N., 128° 04′ E. (off the East coast of Okinawa) and from there should steer due West, passing No. 1 Buoy (fl. 4 sec., Ra. Refl.) abeam to port, distant about 1.25 miles. The Berthing Master will board VLCC's (150,000 d.w.t. plus) or any vessel which is a stranger to the port, when they are abeam of the bouy, but if circumstances should prevent this the vessel should continue on the Westerly course for a mile past the buoy and then alter course to 233 (T). About 3.25 miles on this new course brings the vessel approximately to the inner pilot station in 26° 24′ N., 127° 58′ E.

For the purpose of Traffic Separation and Control, the approach to Kin Wan Port is divided by a centre line joining the following positions:

1. 26° 26′ 00″ N., 128° 02′ 00″ E.
2. 26° 25′ 20″ N., 128° 00′ 00″ E.
3. 26° 23′ 30″ N., 127° 58′ 00″ E.

Vessels entering or leaving the port should keep to their own starboard side of this line.
PILOTAGE: Also see "Approaches".

Berthing Masters will normally board from a tug having a blue hull and cream upperworks, with a tall lattice mast bearing a number (1, 2, 3 or 4). Since the tugs have a fairly high freeboard, pilot ladders should be rigged with the bottom step about 6 ft. (2 m.) above the water-level, otherwise the lower steps may be crushed or damaged. Vessels with a freeboard exceeding 30 ft. are requested to rig the pilot ladder in conjunction with an accommodation ladder in the approved manner.

Masters of calling vessels are reminded of their obligation to comply with statutory rules and are requested to comply with International recommendations concerning pilot ladders. If the ladder is not safe, the Berthing Master may refuse to board and thus cause unnecessary delay to the ship.
ANCHORAGES: Recommended anchorages:
For mammoths in order of arrival:

M1: Lat. 26° 24′ 09″ N. Long. 127° 57′ 41″ E.
M2: Lat. 26° 24′ 49″ N. Long. 127° 58′ 15″ E.
M3: Lat. 26° 25′ 29″ N. Long. 127° 58′ 40″ E.
M4: Lat. 26° 26′ 08″ N. Long. 127° 59′ 05″ E.

(Subject Japanese Coastguard M.S.A. approval is obtained by Agent.)
For vessels 50,000 d.w.t.–150,000 d.w.t.

S1: Lat. 26° 23′ 38″ N. Long. 127° 57′ 29″ E.
S2: Lat. 26° 23′ 14″ N. Long. 127° 57′ 14″ E.
S3: Lat. 26° 22′ 50″ N. Long. 127° 56′ 59″ E.

Products anchorage: The area bounded by a line joining the following positions:

1. 26° 22′ 00″ N. 127° 56′ 29″ E.
2. 26° 22′ 13″ N. 127° 56′ 33″ E.
3. 26° 22′ 00″ N. 127° 57′ 19″ E.
4. 26° 21′ 51″ N. 127° 57′ 05″ E.

The holding ground is good in anchorages, but depths in the first groups between 22 and 25 fathoms; it is therefore recommended that at least one shackle of chain be walked back on the windlass before letting go the anchor.

Depths in the product anchorage vary between 10 and 14 fathoms.

Prohibited Anchorage: Owing to the existence of underwater pipe-lines, telephone cables and obstructions, anchoring is prohibited anywhere S.E. of a line joining the following two positions:

1. 26° 22′ 31″ N., 127° 58′ 08″ E. (i.e. the N.E. dolphin of the Sea Island)
2. 26° 21′ 37″ N., 127° 56′ 44″ E. (i.e. the N.E. dolphin of No. 3 berth on the Products Pier)

For berthing, Masters of vessels are requested to have the propeller submerged and vessel in a reasonable trim for ship-handling purposes (not exceeding 3.5 m.).
RESTRICTIONS: Berthing and sailing operations take place 24 hours a day with the exception that vessels do not berth on Nos. 4 and 5 between sunset and sunrise. However, the island of Okinawa recently reverted to Japanese control and it is possible that movements after sunset may be restricted in the future, especially if the anticipated increase in traffic takes place.

There are no specific restrictions on draft, but in order to ensure safe handling characteristics it is recommended that vessels arriving in ballast arrange that the propeller is fully submerged, with a stern trim not exceeding about 10 ft. Vessels which do not meet this requirement may be delayed in berthing until additional ballast has been run in.
MAX. SIZE: Five berths are available for calling tankers. No. 1 berth can accommodate vessels up to 500,000 d.w.t., and No. 2 berth vessels up to 150,000 d.w.t. These two berths are situated at the offshore platform. Berths No. 3, No. 4, No. 5 are situated at the product dock. (Also see "Berthing").

Berth No.	*Max. d.w.t.*	*Least depth of water below datum*	*Remarks*
Sea Berth 1	500,000	102 ft.	
,, ,, 2	150,000	90 ft.	
Prod. Pier 3	60,000	50 ft.	Max. dist. stern to manifold 320 ft.
,, ,, 4	20,000	36 ft.	
,, ,, 5	10,000	30 ft.	

In addition to the above tanker berths a dry-cargo berth is also available. This berth is 110 m. in length and has a least depth of 22 ft. below Okinawa Datum.

HEALTH: At first port of call in Japan, vessel may obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset, and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected zone within 10 days, Captain must advise crew and passengers' health condition to Quarantine Officer through ship's Agent prior to arrival, and close all soil pipes before entering port.

No person other than port health and customs officer is allowed to board or disembark from a vessel until clearance has been obtained from Government Authorities.

Radio pratique is available to vessels in possession of valid certificates issued by the Japanese Government. For radio pratique procedures Owners are advised to consult with their Agents for details.

RADIO: When en route to the Kin Wan Port at Okinawa a vessel's ETA must be communicated to his Agent, 72, 48 and 24 hours prior to arrival. If VHF is not available arrival information can also be passed to your Agent by "Ship Telephone Service". Naha: 098854–5155.

It is important that ETAs are confirmed 12 hours before expected arrivals and amendments communicated when known.

VHF station "Kin Wan Tug" located on Heianza Island keeps a 24 hour listening watch on Channel 16 (156.800 mc/s) and Channel 13 (156.650 mc/s). Tel. 098967-8131 is also manned 24 hours per day.

RADAR: The port is not equipped with radar. Poor visibility may occur in heavy rain, but fog is rare. Coastlines and buoys within the bay give good echo returns on ship's radar. All tugs are fitted with radar, and on occasions vessels have been guided into the port by them in heavy rainstorms, the tug keeping close alongside within sight of the bridge, and communicating by VHF.

TUGS: Four tugboats are stationed at the Terminal. The Berthing Master in consultation with the Master will decide the number of tugs required for each berthing operation and as stand-by tugs during the vessel's stay in port.

Vessels are berthed with the assistance of up to four tugs according to the vessel's size and weather conditions. Such tugs will either secure alongside, "American style", or will secure forward or aft by their towing hooks. Tugs' lines are always used. The tugs are of 2,400 h.p. and have twin C.P. propellers with independent Kort-nozzle rudders, and are manned by highly skilled crews. It should be noted that the port charges for vessels are a fixed amount based on deadweight tonnage, and this charge is not affected by the number of tugs used or not used. Masters may thus follow the Berthing Master's recommendations regarding tug requirements without having to consider what may well be dangerous economies.

READINESS: A vessel is "arrived" for notice of readiness purposes, when the Berthing Master boards or, if vessel proceeds to anchorage without a Berthing Master, when she drops her anchor.

BERTHING: In normal circumstances no lines are run out until the vessel is alongside the berth and in position. Tugs will hold her there whilst the mooring takes place, springs usually being run first, followed by breastlines, then head-and stern-lines. On the larger berths all lines except springs are lowered to the water and taken to the dolphins by line-handling boats, where they are secured to quick-release hooks. Nothing is required in the way of pennants, tails or shackles. Springs are passed direct to the dolphins by heaving-lines.

Owing to the depth of water, anchors are not normally used when berthing at the sea-berth. However, the outboard anchor should in all cases be ready for emergency use.

Weather permitting, vessels secure starboard side alongside at No. 3 Berth. At Nos. 4 and 5 vessels can only berth starboard side to the pier, owing to the construction of the berths. Therefore if wind conditions do not permit of berthing in this way, the berthing will be delayed until the wind is suitable. At the sea-berth, mammoth vessels normally berth port side to the pier, but this is only to reduce the time taken for the operation, and they can be berthed starboard side to if conditions require it. Smaller vessels are berthed either way according to requirements and conditions.

The Marine Office is equipped with a Weather Facsimile Recorder, and Masters can obtain the latest information regarding possible storm conditions by contacting the Harbour Master on VHF Channel 14 or by calling 214 on the internal telephone system from the berths. When typhoons are imminent all cargo operations cease and vessels are required to vacate the berths and are recommended to proceed to sea.

Berth No. 1

Owners: Okinawa Terminal Company Ltd.
Position: 26° 22′ 25″ N., 127° 58′ 01″ E.
Depth: 30 m. (MLWS).
Max. Size: 385 m. LOA, 55 m. beam, 28 m. draft. 500,000 d.w.t.
Services: Fuel oil (bunkers), loading rate 2,800 kl/h, chicksan used. No fresh water.
Loading Rates: Bunkers/HFO 3,000 kl/h, product 2,000 kl/h. All other products 4,000 kl/h. Max. pressure 250 p.s.i.

Berth No. 2

Owners: Okinawa Terminal Company Ltd.
Position: 26° 22′ 25″ N., 127° 58′ 01″ E.
Depth: 30 m. (MLWS).
Max. Size: 315 m. LOA, 45 m. beam, 20 m. draft.
Services: See Berth No. 1.
Loading Rates: See Berth No. 1.

Berth No. 3

Owners: Okinawa Sekiyu Seisei K.K.
Position: 26° 21′ 34″ N., 127° 56′ 40″ E.
Depth: 15.5 m. (MLWS).
Max. Size: 240 m. LOA, 35 m. beam, 13.5 m. draft.
Services: Fuel oil (bunkers) available, 70 kl/h. 6 in. hoses used. No fresh water.
Loading Rates: Aviation, JP4 and Naphtha, 500 kl/h × 2 low sulphur FO 1,000 kl/h × 3. Fuel oil and diesel 1,000 kl/h. Max. pressure 15 kg/sq. cm.

Vessels normally berth starboard side to.

Berth No. 4

Owners: Okinawa Sekiyu Seisei K.K.
Position: 26° 21′ 29″ N., 127° 56′ 48″ E.
Depth: 11.5 m. (MLWS).
Max. Size: 175 m. LOA, 22 m. beam, 10 m. draft limiting condition 90 m. stern to manifold.
Services: Fuel oil available, rate 70 kl/h. Chicksan used. No fresh water.
Loading Rates: Aviation, JP4, JP1, kerosene 500 kl/h × 2. Low sulphur F.O. 600 kl/h. diesel 1,000 kl/h, fuel oil "A" 1,000 kl/h. Maximum pressure 15 kg/sq. cm.

Vessels berth starboard side to.

Berth No. 5

Owners: Okinawa Sekiyu Seisei K.K.
Position: 26° 21′ 28″ N., 127° 56′ 58″ E.
Depth: 10 m. (MLWS).
Max. Size: 110 m. LOA, 17 m. beam, 8.5 m. draft limiting condition 10,000 d.w.t.
Services: Fuel oil, 6 in. hose, 70 kl/h diesel, 6 in. hose, 700 kl/h.
Loading Rates: JP4, JP1, kerosene, diesel and fuel oil "A" 700 kl/h. Max. pressure 20 kg/sq. cm. sulphur, 120 kl/h, max. pressure 15 kg/sq. cm. low sulphur fuel, 600 kl/h max. pressure 20 kg/sq. cm. LPG 200 kl/h max. pressure 27 kg/sq. cm.

Vessels berth port to.

During cargo transfer or ballast operation all vessels shall show signal flag "B" during the day, and a red light during the night.

Transfer operation shall not be started, or if started shall be discontinued by either the duty officer of the vessel or the Terminal supervisor, when any of the following conditions come to his attention:

(a) During severe electrical storms.
(b) If a fire occurs on the pier or on the vessel.
(c) If there is not sufficient competent personnel aboard the vessel or on the pier to safely handle cargo operation in progress.
(d) Should any condition develop which represents a hazard to the vessel or Terminal installation.

MEDICAL: Agents should be given advance notice of medical or dental attention required. Clinic and hospital facilities are available, and in emergencies helicopter evacuation is possible. There is also a Company ambulance on Heianza Island, for emergencies only. Telephone 319. If no answer, or at night, telephone 300. Or contact C.C.D. (Central Control Desk) on VHF Channel 16 or telephone 211.

DENSITY: The bay is open to the sea, and normal density is 1025.

FRESH WATER: Not available.

FUEL: Heavy fuel is available at Nos. 1 and 2 Berths. All grades of bunkers are available at Nos. 3, 4 and 5.

CONSULS: At present the only Consulates on Okinawa are those of U.S.A. and Taiwan, but it is expected that Consular Officers for Norway and Greece will be established.

REPAIRS: Only minor repair facilities are available in Kin Wan, for such small components as can be sent ashore, e.g. repairing of valves or piping, re-winding of electric motors.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore gangways are fitted at Nos. 1, 2 and 3, and are supplied free of charge. Ship's gangways must be provided at Nos. 4 and 5. Watchmen are not required since access to the berths is controlled by the Company's security guards at the installation gates.
REPATRIATION: Crew changes and/or repatriation can be arranged by the Agent.
AIRPORT: Kin Wan Port is about two hours by car from Naha airport (depending on traffic conditions) from where there are frequent services by several major airlines to all parts of the world via Tokyo, Honolulu, Taipeh or Hong Kong.
TIME: Local time is nine hours ahead of GMT, unchanged throughout the year.
HOLIDAYS: Local holidays do not normally affect operations in the port. Bank Holidays are now basically the same as those in other Japanese ports.
POLICE/AMBULANCE/FIRE: Ambulance 319 or 300 after hours or 211 (C.C.D.) or VHF 16; Fire 319 or 300 after hours or 211 (C.C.D.) or VHF 16; Police inform C.C.D. by VHF Ch. 16 or tel. 211, or Harbour Master tel. 214.
TELEPHONES: Telephones are not placed on board, but for urgent ship's business arrangements can be made for calls to be placed through the Company switchboard.
SERVICES: Tank-cleaning alongside is prohibited, but facilities for discharge of tank washings are available. See "Pollution Control".
SHORE LEAVE: For reason of safety the Terminal and the Off-Shore Platform are restricted areas. However, ship's personnel and visitors to ships are permitted to disembark and embark via the dolphins, which are also the personnel landing areas. Loitering at the loading platform will not be permitted.

Unauthorized or apparently intoxicated or disorderly persons shall be prohibited from entering the pier and the Terminal.

Shore passes will be issued by the Agent. These passes must be surrendered to the Agent prior to the ship's departure, unless the vessel is bound for another port in Japan when they can, after stamping, be used in the second port. The pass is sufficient, and no other means of identification need be carried when ashore.
POLLUTION CONTROL: Gas-freeing is not allowed on tankships alongside the pier.

To minimise the chances of pollution *all* ballast, whether clean or dirty, *must* be discharged ashore, except that which is contained in independent "permanent" ballast tanks. Also all ballast loaded into cargo tanks must be taken from ashore, and not from the Bay. The shore ballast tank has a capacity of 550,000 barrels and is connected to all tanker berths.

Caution: The sea berth is surrounded by a new type of sink/float oil fence to contain any oil that may be spilled on the sea. This fence is moored in place by 36 anchors and ropes. Vessels are therefore warned against approaching this fence or using any anchors in the vicinity of the sea berth. Nor should they throw overboard any old wires, ropes or other rubbish which may foul or damage the fence or its moorings.

The Terminal will, in case of an oil spill, take such steps as may be deemed necessary to fight the pollution before it spreads. If the spill is due to faulty equipment or materials on the vessel or to negligency on the part of ship's personnel, the Terminal shall be indemnified for any expenses incurred in connection with the preventive action taken.

No ballast is to be taken from the Bay unless required for the ship's clean permanent ballast system. Ballast for cargo tanks will be supplied by the Terminal.
FIRE PRECAUTIONS: Smoking and use of naked lights is strictly prohibited on board vessels alongside the berths, except in those enclosed spaces aboard ship specifically designated by the Master as "Smoking Areas".

Fire wires of steel must be hanging over the side of the offside bow and quarter whilst alongside to enable tugs to connect readily in an emergency situation. The towing eyes should be maintained at water level.

Boiler tubes must not be blown whilst vessel is alongside and every precaution must be taken to prevent sparks and soot particles escaping from the funnel.

Mooring of boats or craft with mechanical propulsion alongside a vessel loading/discharging crude oil or in the process of ballasting, is not allowed, unless special permission has been given by the Terminal.

In case of a fire aboard a vessel alongside the pier the following sequence of procedure should be adhered to:

(a) "Kin Wan Tug" to be informed immediately.
(b) All cargo operations to cease forthwith.
(c) MOVs and gate valves on loading arms, nitrogen and battery limit valves to be closed as soon as possible.
(d) Dock personnel to stand-by for disconnecting loading arms, unberthing or fire-fighting in accordance with instructions issued by the Berthing Master or "Kin Wan Tug".

During an emergency situation on board a vessel alongside, the Berthing Master will be in charge of organising the preliminary fire-fighting assisted by "Kin Wan Tug". He is to make use of all available means at his disposal, such as tugboats, launches, personnel, terminal equipment and other facilities to assist the vessel and protect lives and Terminal installations. Should the Berthing Master be unavailable or unable to communicate, "Kin Wan Tug" will direct the preliminary fire-fighting.

Kin Bay area comes under the jurisdiction of the 11th District of the Japanese Coastguard and lies in Kin Nakagusuku Port. The telephone number of the Captain of the Port-Coastguard offices, 11th District is 098892-4874.
AUTHORITY: Maritime Safety Agency, 11th Maritime District.

AGENTS: Connell Bros. Co. Ltd., GPO Box 57, Naha, Okinawa. Tel. 098868-4145. Cables: Seabsea, Okinawa. Telex: Seabsea, OKI 49.

KOBE: 34.41 N. 135.10 E. (See Plan)

PILOTAGE: The Hanshin Pilot Association, Umetate-chisaki, Kaigan-dori, Ikuta-ku, Kobe. Tel. 39-5032. Telegraphic address: "Pilot".

When ship arrives daylight, application should be made not later than 1800 hrs. of previous day. When application made on same day as ship arrives, ETA should be advised at least two hours earlier.

R/T used between pilot office and pilot boat. Frequency: 153.49 Mc. Output: Key station 50 W.; Mobile Station 5-10 W. As neither pilot office nor pilot boat equipped with International VHF apparatus, no arriving ship can exchange direct communication with them.

Six pilot boats available. Gross tonnage 15 tons, speed 15 knots. (maximum 20 knots). Ship requiring Pilot makes request to signal station by flying International flag "G" in day-time, or sending by lamp at night. Pilot taken at quarantine anchorage at Wada-misaki Point. Pilot boats usually located at pier in front of pilot's office. Special point fixed for Pilot to board in bad weather. The ship awaits a pilot either at or near quarantine anchorage at Wada-misaki Point or outside breakwater.

When moored to a mooring buoy, chain cable should be used. Chain shackles must be ready. Pilot boards vessel for mooring if ship arrives before 2230 hrs. and for unmooring any time except following berths:

	Mooring	*Unmooring*
Kobe Seiko Pier (Steel Mill)	Before sunset	Up to 2000 Hrs.
Toyo Menka Pier (Silo Berth)	" "	No restriction
Showa Sangyo Pier (Silo Berth)	" "	" "
Mitsubishi Shoji Pier (Tanker Berth)	" "	" "
Shell Buoy (Tanker Berth)	" " but subject to tide being available.	Before sunset as a rule but possibly up to 2200 hrs. depending on weather conges – tion, etc.
MKS Buoy (Tanker Berth)	" "	"
Nissho Buoy (Tanker Berth)	" "	"

ANCHORAGES: Quarantine anchorage: Latitude 34° 38′ N; 34° 38.6′ N. Longitude 135° 10′ E; 135° 11′ E.

Section of Port	*Number of Anchorages*	*Depth of Water*
3rd	8 berths	12 m.–15 m.
4th	4 berths	11 m.–15 m.
5th	28 berths	11 m.–15 m.
6th	6 berths	13 m.–15 m.

All vessels requiring anchorage for awaiting berth, repairs, bunkering etc., must obtain anchoring position from Harbour Master except following cases: 1. Vessels coming from foreign ports and anchoring at Quarantine Anchorage for inspection. 2. Vessels staying in Quarantine Anchorage not longer than 24 hours after obtaining pratique.

RESTRICTIONS: Quarantine. When ship arrives outside breakwater after sunset, it is inspected for quarantine purposes next day.

Entry at night. When ship arrives outside breakwater after 2130 hrs. it is not permitted to enter.

Hazardous cargo. Depending on kind and quantity of hazardous cargo carried, ship is ordered to berth alongside a pier, at a buoy or outside breakwaters.

Tide. 3 sea berths in the 3rd section can be used only when tide running towards the West.

Draft. Each berth limited for draft.

MAX. SIZE: (Dry Cargoes)

Berth	*Permissible LOA*	*Safe Draft*	*Cargo Handled*	*Remarks*
Buoy 12 (Public)	210 m.	10.3 m.	Any cargo	
Pier 7-B (Public)	192 m.	9.9 m.	Grain	Vessel with Government cargo has priority to use this berth.
M'bishi D Buoy (Private)	190 m.	10.3 m.	Grain/ Scrap/ general	This buoy can be used only when there is no repair vessel.
Tomen Silo Berth (Private)	208 m.	11.3 m.	Grain	
Showa Sangyo Silo Berth (Private)	200 m.	11.3 m.	Grain	
Kobe Seiko Pier-3 (Private)	300 m.	11.0 m.	Coal/ iron ore	

(Tankers)

Name of Berth	*Max. d.w.t. (approx.)*	*Max. LOA*	*Max. safe Draft*	*Mooring–Pipeline–discharging rate*
Shell. Bunkers ex-barge only. No slop discharge facilities.	70,000	250 m.	12.6 m.	To 4 buoys. 1×24″, 1×12″ for F.O., D.O. Minas/Seria Waxy Residue. Average discharge rate (1 Pipe) 1,000 t.p.h. Max. (2 Pipe) 3,000 t.p.h. (mooring possible when tide runs towards West)
MKS. Bunkers ex-barge only.	40,000	234 m. (breadth 33 m).	12.24 m.	To 3 buoys. 2×16″ for F.O. and D.O. Average discharge rate 1,000 t.p.h. Max. 1,300 t.p.h. (mooring possible when tide runs towards West)
Mitsubishi Shoji (for L.P.G. tankers). Bunkers available ex-wharf; ex-barge at anchorage. No slop discharge facilities.	45,000	240 m.	10.35 m.	Alongside Pier. 1×16″, 2×12″ for F.O. and 1×12″ for D.O. Average discharge 800 t.p.h. per pipe. Max. 2,000 t.p.h.
Port Island Oil Berth	70,000	300 m.	10.98 m.	1×22″ for Fuel oil. Average discharge rate 2,000 t.p.h. Max. 3,500 t.p.h.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommend Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West-bound vessel to Choshi, and North-bound to Nagasaki Radios respectively.

Kobe-Radio details.

TUGS: Meet vessel at entrance of fairway but if Master/Pilot so requests, service commences from anchorage. Tug's lines used without extra charge.

BERTHING: Chains must be used in mooring to a buoy. Ship must not drop anchor near a buoy when it is moored to one. Ship brought head in alongside pier except in special cases. Some berths impossible to reach after sunset. Example: dolphin berths. This is why ships need to arrive outside breakwater before sunset.

Berths alongside and Mooring Dolphins for Large Vessels (Public).

BULK HANDLING FACILITIES: Hanshin Silo Company Berth, 12.50 m. depth alongside available for vessels up to 50,000 tons d.w.t. Discharge effected by 2 pneumatic unloaders with capacity 400 t.p.h. per unit.

Kobe Silo Berth, length 752 ft., depth alongside 41 ft. 2 mobile discharging units each with capacity of 500 t.p.h.

Kohan Silo Berth, length 214 m., depth alongside 12.5 m. equipped with 2 discharging units which can be used for grain, sugar, or general cargo, also 1 pnuematic unloader, with capacity 1,500 t.p.h. per unit.

In the current development programme a total of 7 container berths are to be provided at Kobe.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vesel must constantly keep Agent advised ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: Agent required give information when patient to be hospitalised or needs medical attention. All medical facilities in port (Kobe City) can be used. When report made by means of VHF or wireless, necessary arrangements are made at once for urgent treatment of patient.

TANKERS: See "Max. size".

The Port Island receives bunker oil from tankers into the terminal and delivers Intermediate 15 and MDO by pipe-line to vessels moored at Kobe Port Island. This berth is equipped with loading arms and utilises a boom completely surrounding the discharging tanker to prevent the spread of any oil spill.

Storage facilities consist of three tanks of 36,000 kl (226 mb) for Intermediate 15 and two tanks of 5,000 kl (31 mb) for MDO.

Pumping facilities consist of three pumps of 700 kl/hour (4,400 b.p.h.) capacity for Intermediate 15 and two pumps of 200 kl/hour (1,258 b.p.h.) capacity for MDO.

Special features include an automatic control system from a central control board, remote valve operation, remote tank gauges, communication equipment at each bunkering berth, flow meters for all deliveries, a chemical fire engine, a crane and a lorry for recovery of waste oil.

The terminal is open between 0900 and 1700 hrs. and availability at other times involves overtime.

TIDE: Mean height of tide 1.030 metres. Some of tanker berths in West part of port affected by tide. Currents less than one knot inside harbour.

DENSITY: Winter: 1023–1026. Summer: 1018–1022.

FRESH WATER: Supplied from the quays at rates of 40 to 50 cu. m. per hour. Four water barges available, largest with capacity 325 cubic metres, can supply vessels at rates up to 300 cu. m. per hour.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. See also "Max. Size – Tankers".

FIRE PRECAUTIONS: LPG tankers instructed by Maritime Safety Headquarters to strictly observe safety rules. Example: checking on what is carried by those who go aboard; banning ship's stores to be loaded on to ship which is working.

DEVELOPMENTS: *Port Island:* When complete 11 container berths (depth 12 m., length 2,600 m.) and 18 liner berths (depth 12 m., length 4,200 m.) will be available.

Rokko Island: Further development planned providing a further 37 berths.

WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: By Stevedores. Charges for assistance.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnage. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Tobacco (per passenger or crew member). Temporary shore-leave up to 50 cigarettes (duty free); Disembarkation up to 200 cigarettes (duty free). Maximum allowable (only in case of disembarkation) up to 800 cigarettes duty free (however, 600 cigarettes – taxable).

Wines and/or Spirits: Crew member: When the ship at sea for more than one month, up to 6 bottles (one bottle – duty free); less than one month up to 6 bottles (no duty free). Passengers: When a passenger travels for less than a fortnight up to 12 bottles (one bottle – duty free); more than a fortnight up to 12 bottles (up to 3 bottles – duty free).

CONSULS: The following countries are represented by Consuls at Kobe:

Argentina	France	Pakistan
Australia	Germany	Panama
Austria	Great Britain	Paraguay
Belgium	Greece	Philippines
Bolivia	Guatemala	Portugal
Brazil	India	Singapore
Central Africa	Indonesia	Spain
Chile	Ivory Coast	Sweden
China	Korea	Switzerland
Coast Rica	Malagasy Republic	Thailand
Denmark	Malta	Turkey
El Salvador	Mexico	Uruguay
Ethiopia	Netherlands	U.S.A.
Finland	Norway	U.S.S.R.

REPAIRS: All repairs possible.

AIRPORT: Osaka International Airport. Distance from Airport about 1.5 hours by car.

Domestic: Following regular airlines, Japan Air Lines, All Nippon Air Lines, Nihon Kokunai Koku, Toa Koku.

International: For Far East: Japan Air Lines 31 flights per a week, Thai International Air Lines 10 flights per a week, Cathay Pacific Air Lines 8 flights per a week, China Air Lines 11 flights per a week, Korean Air Lines 12 flights per a week, North-West Air Lines 7 flights per a week.

For Europe: Lufthansa 1 flight per week, British Airways 3 flights per week, Air France 2 flights per week.

For United States: Japan Air Lines 12 flights per week, Pan American 3 flights per week.

TIME: Japan Standard Time set at the 135th degree of East longitude GMT plus 9 hours. No alteration to clocks throughout year.

HOLIDAYS: On 2 Sundays of each month, no cargo work arranged. In special cases, daytime cargo handling operation possible on Sundays and holidays.

POLICE/AMBULANCE/FIRE: *Police* 110 Water Police Station tel. 33–2351, 33–2354, Ikuta Police Station 33–0044, Fukiai Police Station 23–4441, Hyogo Police Station 55–0051.

Ambulance: 119 Ikuta Fire Department 39–4994.

Fire: 119 Water Fire Department 33–9951, Ikuta Fire Department 33–4994, Fukiai Fire Department 29–0401, Hyogo Fire Department 56–6141.

TELEPHONES: Installation charge on board vessel lying alongside pier. Installation on board vessel which is lying at buoy or anchorage.

GENERAL: When typhoon approaching, Port captain requires ships to proceed outside breakwater.

SHORE LEAVE: Crew members free to go ashore.

DELAYS: 1. Weather condition (where strong wind prevents ships entering port). 2. Tide (berths in West part of port). 3. Berths where no ships permitted berth alongside at night. 4. Where a quarantine officer or Pilot being awaited. 5. Shortage of gangs, weather.

AUTHORITY: Port Management Body: City Government of Kobe.

AGENT: Dodwell Tramp Agencies, PO Box 557 Kobe Port, Kobe Meiji Seimei Building 3–7, Isogami-dori 8-chome Fukiai-ku, Kobe. Tel. (078) 251–0021. Telegraphic "Dodtramp Kobe". International Telex J 78826.

KOKURA: 33.54 N. 130.53 E. (See "Kanmon-Ko") (See Plan)

Kokura situated between Moji and Tobata. On the East is contiguous to Moji Port, on the West to Tobata Port and on the North it opens to the Kanmon Straits.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N. 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Anchorage not in use as the area is being dredged for the purpose of navigation fairway.

RESTRICTIONS: Vessel enters port only within 1 hour before and after slack tide in daytime. No night departure.

MAX. SIZE: 18,000 tons gross., 10 m. draft.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: See "Moji".

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

(a) Max. 6 gangs are available.

Stevedores, regular employees 116, temporary labourers 109. Longshoremen 459.

(b) Lighters: Kokura Marine Transportation Co., lighters 25, tonnage 8,900 tons.

(c) Shore crane:

No.	*Capacity*		*Location*	*Owners*
2	10 tons		Sunatsu Wharf	Sumitomo Metal
1	6 tons		,,	Kokura Marine
3	12 tons	outreach 18 m.	Sumitomo Metal Wharf	Sumitomo Metal
3	35 tons		Hiagari Wharves Nos. 6 and 7	Shin Nihon Steel Corp.

(d) Floating crane: arrangeable from Moji.

(e) Average performance of loading/discharging: Discharging: Iron ore 40/50 t.p.h./gang/hatch (by ship's gear). 200 t.p.h./gang/hatch (by shore crane). Coal 40/50 t.p.h./gang/hatch (by ship's gear). 100/150 t.p.h./gang/hatch (by shore cranes). Scrap steel, pressed 20 t.p.h./gang/hatch (by ship's gear). Ordinary 10 t.p.h./gang/hatch (by ship's gear). Bulky 5 t.p.h./gang/hatch (by ship's gear). Loading: Steel under 20 ft. long 25–30 t.p.h./gang/hatch, over 20 ft. long 15–20 t.p.h./gang/hatch.

(f) 2 shifts: 0800 to 1700 hrs. and 1700 to 0700 hrs. Normal working hours: 0800 to 1700 hrs. Refer to Moji for further information.

TANKERS: Also see "Berthing". At Kanematsu-Goshi Oil Refinery 1×8 in. and 1×10 in. diameter shore pipe-line. No slop facilities available.

DENSITY: 1025.

FRESH WATER: From hydrants at Sunatsu and Sumitomo Metal wharves, the rate of delivery per hour: 30 tons per hydrant. Also delivered by barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: See "Moji".

REPAIRS: See "Moji".

AIRPORT: All Nippon Airways, Kitakyushu, about 30 minutes by taxi from Kokura station to airport. Japan Air Lines, Fukuoka, and Cathay Pacific Air Lines, Fukuoka, about 1.5 hours by train and taxi from Kokura station to airport.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 56–7171; Ambulance 119; Fire 92–4831.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Kita Kyushu Port Authority.

SHIPMASTER'S REPORT: December 1975, Vessel discharged iron ore at Sumitomo Metal Industries.

Pilotage: Arriving from East. He Saki: Lat. 33° 56′ 24″ N. Long. 131° 03′ 12″ E. Arriving from West. Mutsure: Lat. 33° 58′ 30″ N. Long. 130° 53′ 00″ E.

Anchorage:

He Saki: Lat. 33° 56.2′ N. Long. 131° 02.9′ E. Depth 11.4 m.

Mutsure: Lat. 34° 00.0′ N. Long. 130° 52.5′ E. Depth 19.0 m.

Departing from He Saki anchorage to arrive to port of destination in Kanmon Straits in Slack Water and only in daylight.

Normally Pilot boarding 1 hour before tide change. Allowable Drafts to transit Kanmon Straits Max. 30 ft. anytime. Max. 32 ft. 10 in. at High Water.

Radio Pratique: Obtained if in possession of valid Sanitary Certificate and all Smallpox Certificates valid. Send cable to Agent with prefix RPM following the standard text.

Docking: Always Starboard side.

Anchor: Port anchor ready for emergency.

Fenders: Prismatic Rubber.

Gangway: Ship's Accomodation ladder.

Discharging Facilities: 3 Cranes – Capacity 180 t.p.h. each.

Departure from Dock: Undocking only in daylight and about 1 hour before slack water. 3 tugs are necessary for turning the vessel in the narrow basin to head out.

Note: A new Dock is built facing Kanmon Straits, just North outside this Basin.

Sumitomo representative said that it will be ready in Spring 1976.

Under completion 2 Unloaders Canti-Lever, Bridge type with capacity of 1200 t.p.h. each.

AGENT: See "Moji".

KOMATSUSHIMA: 34.00 N. 134.36 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 5 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. 3 authorised licensed Pilots available.

ANCHORAGES: Situated at Western corner of Komatsushima bay and port protected by three breakwaters, North, East and South covering 396,700 sq. m. Depths of water at anchorages as follows:

(a) Inside breakwater 8–10 m., *(b)* Outside breakwater 8–13 m., *(c)* Wharf 8.50 m.

RESTRICTIONS: Vessels must get permission and instructions where to anchor from Port Captain before arrival. Wharf and Inner harbour: entering and sailing usually only during day-time regardless tide and current. Outer harbour: Entry and sailing anytime.
MAX. SIZE: Anchorage inside breakwater: length no limit, breadth no limit, draft 8.60 m.
Anchorage outside breakwater: length no limit, breadth no limit, draft 8.60 m.
Wharf. (Suitable 10,000 d.w.t.). length 175 m., breadth no limit, depth 9 m.
Shinko Wharf: (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 10,000 d.w.t.) Length 175 m. Draft 8.5 m.
Kanaiso Wharf. (Suitable 15,000 d.w.t.) Length no limit. Draft 10 m. after dredging.
HEALTH: Pratique to be obtained at Shimotsu prior arrival Komatsushima. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Wharf and inner harbour: join vessel at sea anchorage, always using tug's line without charge. Outer harbour: no tug required in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by telegram.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630–2130 hrs. 60% additional of basic stevedorage; 2130–0500 hrs. next morning special additional; Sundays/holidays 100% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: 1015.
FRESH WATER: Alongside berth: Can be supplied by shore line with capacity of 25 t.p.h.
Anchorage: Can be supplied by 50-ton barge with capacity of 28 t.p.h. (but as strong winds prevail during Winter months no water supplied at anchorage outside breakwater).
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None. Nearest consulates in Osaka.
REPAIRS: Only minor repairs up to 3,000 d.w.t..
DRY DOCKS: No dry dock. Nearest at Hitachi Shipbuilding & Engineering Co. Ltd., Chikko works, Osaka; Kawasaki Heavy Industries Ltd., Kobe and Mitsubishi Heavy-Industries Reorganised Ltd., Kobe Shipyard & Engine Works.
AIRPORT: Nearest airport Tokushima (10 miles North) where TOA Domestic Airlines, 9 flights to Osaka, 1 to Tokyo.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: None.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENT: See "Niihama".

KUSHIRO: 42.58 N. 144.21 E.

DOCUMENTS: Ship's Register. Last Port Clearance. 3 Crew Lists including Passport Nos. 3 Passenger Lists. 1 Store List. 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: No telegraphic address. Previous advance notice, minimum 8 hours advance notice ETA and any alterations. Contact Pilot boat through Harbour office/tug boats with wireless telephones. Pilot boat has no radio telephone. Pilot boat waits at Quarantine anchorage (1,000 m. off and 280° from North Breakwater white light), and entrance of Breakwater during Winter period (December–March).
ANCHORAGE: Bottom sand and mud. Min. depth 9 m. in passage and 7.5 m. in anchorage. Depth over 29.5 ft. 162,075 sq. m., Section 2; Depth over 24.5 ft. 690,000 sq. m., Section 2 and 3; Depth under 24.5 ft. 393,600 sq. m., Section 3. Tidal range, average high-tide plus 1.533 m., average low-tide plus 0.154 m., average tidal difference plus 0.953 m.
RESTRICTIONS: Vessel allowed enter and sail day and night. Pilot assistance officially not compulsory but in practice necessary, and Pilot service available for 24 hours subject to 8 hours advance notice.

MAX. SIZE: Pilot agrees take in 25,000 d.w.t. vessels (LOA about 185 m.). However, depth max. 9.5 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Usually join vessel at entrance of breakwater and ship's lines to be used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. All berths limited by depth in entrance channel.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ships' crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: North Pier – 3 berths for 20,000 d.w.t.×2 and 18,000 d.w.t.×1. Hose-diameters 10″×1, 8″×3, 6″×3. South New Pier – 1 berth for 3,000 d.w.t. Hose-diameters 10″×1.
DENSITY: Average 1025 inner breakwater high-tide, and average 1022 low-tide.
FRESH WATER: Direct supply from the wharves at 30 t.p.h. Barge supply and capacity 3 hours round per barge.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
DEVELOPMENT: Total of 21 berths including 4 for up to 40,000 d.w.t. Industrial raw materials carriers will be built and port breakwater will be lengthened by 3,940 m.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None. U.S. Consul located in Sapporo city.
REPAIRS: Ordinary deck, engine and electrical repairs arrangable by the local factory.
DRY DOCKS: None; nearest located in Hakodate and Muroran ports.
REPATRIATION: Possible.
AIRPORT: Kushiro air port about 40 minutes taxi or direct connection bus from port area. Flight service daily, 2 flights for Tokyo and 1 flight for Sapporo.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: 1st May.
POLICE/AMBULANCE/FIRE: Police HQ 23–7111 or emergency 110; Hospitals Kushiro Grand Hospital 41–6121, Kushiro Red-Cross Hospital 22–7171; Fire HQ 22–2156 or emergency 119.
TELEPHONES: No systems for arranging on board.
GENERAL: All port facilities services except wharfage applicable. Winter period additional charges 30%–50% while 1st December and 31st March (all Hokkaido ports same).
SERVICES: Arrangable from Muroran.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kushiro-Shiyakusho.

AGENT: Sub-agents Dodwell & Co. Ltd., Tokyo, Narasaki Sangyo Co. Ltd., c/o Mitsuwa Transport Co. Ltd., Attn. Shipping Agency Dept., Minami Hama-cho, Kushiro. Tel. Kushiro (0154) 22–3030, 22–0903. Telegraphic "Narasaki Kushiro".

MATSUYAMA: 33.52 N. 132.42 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot station.

3. Hosaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N., 131° 03′ 12″ E.

ANCHORAGE: The port faces Iyo-Nada and located near Bungo Straits. Entrance open to Iyo-Nada towards West, but port protected by West breakwater and small island off Northern part of approaches where holding ground good. During Winter months strong N.W. wind prevails causing heavy swell at anchorage. Depth of water 17–25 m.

RESTRICTIONS: *Oil tanker berth.* Vessel drawing less than 12 m. can moor and unmoor at half-flood during daytime but vessels drawing 12 m. or more advised to await high water.

Dry cargo vessels berth. Dry cargo is logs and cargo working carried out at anchorage of Horie, Umaiso and Yura Bay.

Horie Bay. Vessels no longer than 160 m. can berth. Vessels enter daytime only regardless of tide and current.

Umaiso Bay. As Horie Bay.

Yura Bay. Vessels no longer than 110 m. can berth. Daytime entry only regardless of tide and current.

MAX. SIZE: *Maruzen Oil Co. Ltd., Matsuyama refinery, Genyu Sambashi.* Max. 50,000 d.w.t. Max. LOA, no limit. Max. safe draft 12.00 m.

Horie and Umaiso Bays. Length of vessel 160 m.; breadth no limit; draft 15 m.

Yura Bay. Length 110 m.; breadth no limit; draft 10 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: For tankers: join vessel at Quarantine anchorage, using Tug's lines without charge. For dry cargo vessel, no tug required for berthing and unberthing in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No advance notice of dia. of load/discharge lines required. See "Max. Size".

Shorelines: 1×10″ (Fuel Oil) 600 t.p.h. and 1×10″ (Crude Oil) 2,000 t.p.h.

DENSITY: Anchorage 1015. Berth 1015.

FRESH WATER: *Maruzen Oil Co. Ltd., Matsuyama refinery, Genyu Sambashi.* Can be supplied by shore line with capacity 25 t.p.h.

Anchorage: Can be supplied by 30 ton barge with capacity 30 t.p.h.. Strong winds prevail during Winter months, when no water can be supplied.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Also see "Moji, Fuel".

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless ship's crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears' maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Consulates in Kobe.

REPAIRS: Only minor repairs.

DRY DOCKS: None. Nearest at Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima and Mukaishima, dimensions of those docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel 450 m.×72 m.×12.3 m. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dockyard. Dock No. 1 for 20,000 d.w.t. vessel 175 m.×25 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel 282.50 m.×47 m. 11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard. Dock No. 1 for 3,000 d.w.t. vessel 86.18 m.×13.60 m.×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel 175 m.×29 m.×9 m.

REPATRIATION: Possible.

AIRPORT: Domestic airport situated South of harbour. All Nippon Airways flights to Osaka and Tokyo.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Only at Kobe.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days. 3 days extension possible if ship stays longer.

AUTHORITY: Port Administration Office.

For Maritime Safety Base
1 Declaration of Inward Vessel.
1 Crew List.
1 Cargo Manifest (Discharging).
1 Cargo Manifest (Through).
Above documents to be prepared by Master before arrival.
Master to telegraph ETA and crew's health condition directly to Quarantine Miyako before arrival.
PILOTAGE: Pilot not compulsory but arrangable at Master's request. Pilot boards about 1,200 m. from Miyako breakwater light 130 degrees. Master must radio vessel's Agent of ETA 24 hours in advance, because neither telegraphic address of pilot station nor VHF available. In bad weather, wait instructions from Agent.
ANCHORAGE: Quarantine anchorage located at 39° 37′ 9″ N., 141° 59′ 35″ E. outside breakwater and care should be taken not to foul fishing nets.
RESTRICTIONS: Night entry and departure permitted subject to weather conditions.
MAX. SIZE: Draft 9 m. and LOA 175 m., breadth no restrictions. New pier "Fujiwara-futo" now under construction, draft 12 m. and LOA 240 m., breadth no restrictions.
PRATIQUE: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine officers on arrival:
Maritime declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique: A vessel that has been in contact with an infected area or a suspected infectious disease, within 15 days of arrival. If crew or passengers on board do not possess valid Smallpox Vaccination Certificates. If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. Westbound vessel, via Choshi Radio, and Northbound via Nagasaki Radio.
TUGS: Normally join vessel on passage from anchorage. Tug's line used. *Yokohama Maru* 1,800 h.p. If Pilot requires 2 tugs, 1 tug available from Kamaishi.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Max. LOA*	*Max. draft*	*No. of wharf*	*Max. d.w.t.*
	m.	m.		
Desaki wharf	214	7.3	2	3,000
,, ,,	175	9.0	1	10,000
Lumber port buoy		8.0	1	
Fujiwara wharf	260	7.5	2	5,000
,, ,,	240	12.0	1	40,000

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified

by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additonal; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities.

DENSITY: Average 1019.

FRESH WATER: Available from wharf about 50 t.p.h. but no water barge. In case vessel urgently requires water at anchorage, tug-boat arrangable for this purpose.

FUEL: Domestic diesel oil. No bonded fuel oil. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

DEVELOPMENT: New berth named "Fujiwara Pier" under construction.

GANGWAY/DECK WATCHMEN: Not especially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depends on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register, Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: 60 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: Hanamaki Airport distant 150 km. from Miyako (2.5 hours by car). 1 flight between Hanamaki/Tokyo Monday/Thursday/Friday and Saturday and 2 flights Tuesday/Wednesday and Sunday by Toa Domestic Air Lines (TDA).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 2-5011 (Headquarters) and 2-6037 (Water Police Station); Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Surveyor, Tally, Hold cleaning, Tank cleaning.

GENERAL: Discharging ex-gearless vessel at wharf unavailable, because no shore crane for discharge.

SHORE LEAVE: Local Immigration Office issues shore pass valid for only 3 days; 3 days extension possible if ship stays longer. If vessel advises longer stay in port on arrival, Immigration can issue shore pass for 9 days.

AUTHORITY: Miyako Port Management Office.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Abeki Shokai, c/o Nishimura Tekko K.K., 18–7, Kuwagasaki, Miyako-shi, Iwate-ken. Cable Address: Abe Miyako, Tel.: 01936–2–5870.

MIZUSHIMA: 34.31 N. 133.45 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: *(a)* Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from 1 of 3 Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

(b) Vessels over 50,000 d.w.t. or of draft of more than 12.5 m. are unable to pass through Kurushima Strait and required to transit Wadamisaki.

There are very narrow and crooked channels, such as the Kurushima Strait, maximum tidal current amounting to 10 knots; the Bisan Strait maximum tidal current amounting to 4 knots, and the Akashi Strait, maximum tidal current amounting to 6 knots.

(c) Harbour Pilot: Pilots of the Inland Sea Pilots Association are also employed for this pilotage if required, and Pilot boards at Mizushima Quarantine Anchorage (34° 26′ 30″ N. 133° 34′ 30″ E. approximate centre position of quarantine area). However, if an Inland Sea Pilot is employed at the above-mentioned Pilot stations, the same Pilot acts for harbour pilotage.

ANCHORAGES: Anchorages available for small size vessels only, and not for large vessels. In case of large vessels waiting for berthing, these vessels shall wait at Quarantine Anchorage, at around Nabeshima, at nearby Sakatewan or off Kobe.

Around "Q" Anchorage Depth		15–18 m.
Around Nabeshima	,,	32–40 m. (temporarily suspended.)
Nearby Sakatewan	,,	32–41 m.
Off Kobe	,,	43–47 m.

RESTRICTIONS: *(a)* Entering and departing from port shall be in accordance with instructions to be given by Signal Station.

(b) No restriction imposed upon entering or leaving port during night-time, nevertheless such movements are next to impossible in consideration of the nature of the structures of the port. In addition Pilots refuse to board during night-time.

(c) Super-sized vessels, unable to enter except at high tide. Pilots should be consulted in advance for draft exceeding 14.80 m.

MAX. SIZE: See "Berthing".

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.

If a vessel does not posses a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: Tugs normally join the vessel at the Quarantine Anchorage area. Usually tug's lines used free of charge.

*N.B.—Some allowance may be granted by Pilot depending on tidal condition. Depth of water (14.80 m.)+tide=ship's draft+keel allowance (ship's draft×0.1+0.5 m.).

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notifed by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additonal cost. Overtime surcharges 1700–2100 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: See "Berthing".
DENSITY: Entrance channel Summer av. 1020, Winter av. 1023. Harbour channel Summer av. 1019, Winter av. 1025.
FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate 20 k/t/hour. Water barges available, sent from Onomichi. Delivery rate approximately 50 k/tons per hour.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. All grades available by pipe-line at Refinery berths.
FIRE PRECAUTIONS: *(a)* Whenever necessary to repair vessel, the rule of "Strictly and Completely No Fire" is to be observed. *(b)* To keep sufficiently powered tugboat alongside vessel at all times when engine is under repair. *(c)* A written pledge to be submitted to Oil Company, promising to take full responsibility and to pay full indemnity by ship's Owners (in case of repairing vessel) if any accident has occurred by fault of the vessel.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: No consul available, but marine note of protest can be attested by the local notary public.
REPAIRS: All types of deck and engine repairs possible by Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Works. Minor repairs possible by Nojima Senpaku Co. Ltd., Mizushima Works, Sonkyo Nainenki Seisakusho Co.
DRY DOCKS: No dry docks at Mizushima, but Mitsui Shipbuilding and Engineering Co. Ltd. Tamano Dock is the nearest from Mizushima, distance approximately 20 miles and navigation about 2 hours.
Mitsui Shipbuilding and Engineering Co. Ltd., Tamano Dock.
(a) Dimensions of largest dry dock No. 3 D. Dock (length 672 ft. × width 103 ft. 3 in. × depth 32 ft.). *(b)* Number of small docks: 2.
AIRPORT: Okayama airport is the nearest from Mizushima, distance approximately 40 km. and takes about 40 minutes by car. Only domestic regular airlines available. 3 flights to Tokyo, daily.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONES: No telephone installation service on board.
SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
SERVICES: All navigational apparatus can be served, as requested, but technicians are to be sent from Kobe.
REGULATIONS: Quarantine Anchorage is outside harbour limits therefore (i) no persons allowed ashore from this anchorage, (ii) No supplies permitted to vessels and, (iii) No Agency services available.
AUTHORITY: Okayama-Kencho.

AGENT: Sub-agent of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 1, 2-chome, Kaigan-Dori Mizushima, Kurashiki-Shi. Cables: Naigai Kurashikimizushima. Tel. Kurashiki (0864) 44–5211.

MOJI (Kitakyushu): 33.54 N. 130.58 E.
(See Kanmon-Ko)

DOCUMENTS: When ship arrives direct from foreign port, customs officials will board vessel for search. Following documents to be submitted:

Crew List.
Passenger List.
Store list.
Manifest of crew personal effects (must be signed by individual crew member).
Arms and ammunition list.
Narcotics List.
List of ports of call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward (Form No. C2000).

The following will be checked on board:
Ship's Registry.
Last Port Clearance.

When ship comes from Japanese port, Customs Officials will not attend on board, except special case. Master or Agent to attend Custom House for entry formalities with following documents:
Discharging Cargo Manifest.
Through Cargo manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port. On ship's departure, clearance issued by Customs, after confirming payment of tonnage dues.
PILOTAGE: (1) *Harbour pilotage* compulsory for entry and departure, but not when vessel passing through Straits. Pilots embark East-bound vessels at Mutsure Quarantine Anchorage position half mile East Mutsure L.H. 33° 58′ 15″ N. 130° 53′ 43″ E. and West-bound vessels at Hesaki Quarantine Anchorage position 125 degrees, 1,500 metres from Hesaki L.H. 33° 56′ 24″ N. 131° 03′ 12″ E. Two Pilots embark vessels exceeding 30,000 gross tons for entry and departure charging double pilotage.

(2) *Sea pilotage:* Vessels approaching from East can obtain Pilots by radio request made at least 24 hours in advance. Pilot embarks at position 3 miles South from Sekisaki L.H. 33° 13′ 00″ N. 131° 54° 00″ E.

(3) Pilots should be kept closely advised of vessel's accurate ETA at pilot station. If any change in vessel's movements, Master requested to immediately communicate by radio or VHF to pilot offices directly or through Agent reporting revised ETA. Cable addresses of pilot offices are: Harbour pilot "Kanmonpilot Moji", Inland Sea Pilot "Anjin Moji".

(4) *VHF:* Vessels keep in direct contact with port authorities with regard to arrival, berthing instructions and Pilot's requirements through VHF as follows:
(a) Call sign: Kitakyushu Port Radio (or Shimonoseki Port Radio).
(b) Location of Radio facilities: Transmitting and receiving station located at the top of Mt. Hinoyama, Shimonoseki.
(c) Type of wave: Channel: Simplex 16 (calling, responding); Simplex 12 (communicating); Simplex 14 (communicating); Duplex 20 (communicating). Output 50 W.
(d) Operating hours: 00.00–24.00 hrs.
(e) Communicating range: within a radius of 50 miles from the Hinoyama Station.
(f) Communicating language: Japanese/English.

ANCHORAGE:

	Depth	*Capacity (g/t)*
Tanoura	9.1 m.	20,000 tons×2

(No. 2 anchorage: 83 degrees from Mojisaki light buoy, 1,770 m.)
(No. 3 anchorage: 80 degrees from Mojisaki light buoy, 2,300 m.)

WIND, TIDE: Easterly winds prevail in warm seasons. North-westerly winds prevail in winter season. Dense fog frequently prevails in spring and autumn.
Tidal range 3.07 metres. Current near entrance of port runs Westward at flood and Eastward at ebb. Speed of current in vicinity of narrowest section of Straits sometimes reaches 7-8 knots. In stream of port, it is about 3-5 knots.

RESTRICTIONS: *(a)* Berthing: During daytime only. Swift tidal current prevails at buoy berths necessitating strong moorings, and in accordance with harbour rules, ships moor with anchor chains to buoy. Requisite chain preparations should be completed before ship leaving Pilot station. Occasionally large vessels drawing deep draft made to await high water and/or suitable current to berth alongside wharves.
(b) Departure: with adequate notice, no restrictions from anchorage and/or buoys. Night departure from wharves generally practicable, except when Pilot disagrees to ship-out; this will depend upon conditions of weather, tide, etc.
(c) Tug assistance may be required at Pilot's discretion for large vessel mooring to and/or unmooring from buoy, depending upon efficiency of engine and conditions of weather, tidal current, etc.
(d) Maximum draft to enter and passing through Kanmon Straits limited to 10 m.

MAX. SIZE:

Tachinoura Wharf (public). Approximately 7 berths with depth of water between 10 and 12 m.

Tankers: 1 tanker berth, Mitsui & Co. Berth "B". Max. d.w.t. 33,000 tons. Max. LOA, 200 m. Max. safe draft 9.10 m.

PRATIQUE: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

(a) Quarantine Station at Western entrance: half mile East from Mutsure lighthouse 33° 58′ 15″ N., 130° 53′ 43″ E.

(b) Quarantine station at Eastern entrance: 125 degrees, 1,500 metres from Hesaki lighthouse 33° 56′ 24″ N., 131° 30′ 12″ E.

(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.

(d) "Q" flag should be hoisted until ship is in free pratique.

(e) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Normally join vessel at adequate position in judgment of pilot and tug for mooring. In operation, tug's line to be used for mooring and unmooring without any charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Average loading/discharging:

Bulk cargo:	Coal	50 t.p.h./gang/hatch (dis.)
	Iron ore	45–50 t.p.h./gang/hatch (dis.)
	Grain	50 t.p.h./gang/hatch (dis.)
Baled cargo:	Cement	50 t.p.h./gang/hatch (load)
	Fertilisers	40 t.p.h./gang/hatch (load.)
	Grain	30–50 t.p.h./gang/hatch (dis.)
	General	40 t.p.h./gang/hatch (load.)
Steel cargo:	Under 20 ft. long	25–30 t.p.h./gang/hatch (load.)
	Over 20 ft.	15–20 t.p.h./gang/hatch (load.)
Scrap steel:	Pressed	20 t.p.h./gang/hatch (dis.)
	Ordinary	10 t.p.h./gang/hatch (dis.)
	Bulky and awkward	5 t.p.h./gang/hatch (dis.)
Lumber/logs:	Lumber	15–20 t.p.h./gang/hatch (dis.)
	Logs	30 t.p.h. gang/hatch (dis.)

2 shifts; 0800 to 1700 hrs. and 1800 to 0500 hrs. Normal working hours 0800 to 1700 hrs. Overtime work is possible by applying to Customs. No work can be arranged on 31st December and during New Year holidays (1st to 3rd Jan.). No work on 1st and 3rd Sunday of each month.

MEDICAL: No advance notice required unless urgent.

TANKERS: No slop discharge facilities. Mobil Oil berth situated at Okubo, near Tanoura. At vicinity of berth, the current runs towards West nearly all the time. Maximum rate of current 3 knots. Vessels berthed during period that tide sets to West, in day-time only. Mooring berth consists of 1 oil pier (length 80 m. width 5 m.) and 2 dolphins. Two 10-in. pipes connected to vessel; discharge rate 1,000 tons per hour.

FRESH WATER: Good fresh water supplied from water barges to vessels lying at buoys and/or anchorage; from hydrants to those alongside wharves. The rate of delivery per hour is 20–40 tons from hydrant and 50 tons from barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bonded bunker oil is supplied by oil barges. The rate of delivery: 80-100 tons per hour.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: Honorary British Consulate concurrent with Honorary Swedish Consulate.

REPAIRS: Mitsubishi Heavy Industries, Ltd. Shimonoseki; Sasebo Heavy Industries Co., Ltd. Moji; Kitakyushu Iron Works, Tobata.

DRY DOCKS: Refer "Shimonoseki".

REPATRIATION: Possible.

AIRPORT: Distance to Kitakyushu airport: 30 minutes by taxi and to Fukuoka airport; 2 hours by train and taxi.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police station (tel. 110) and Fire/Ambulance (tel. 119).

TELEPHONE: Telephone placed on board.

SERVICES: All services available, including hold cleaning and grain fitting.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days extension possible if ship stays longer. Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide 72-hour landing passes for crew members and passengers. One copy each of crew list and passenger list are required by them. Providing ship's Agent with a crew list beforehand will be a great help in expediting immigration business on ship's arrival. When ship stays in port more than 72 hours, the landing passes may be extended every 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men, has been booked, or unless the ships to which they are to be transferred, arrives in Japan within 5 days.

AUTHORITY: Kita-Kyushu Port Authority.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., PO Box 72, 9–9, Minato-merchi, Moji-Ku, Kitakyushu. Tel. Moji (093) 331–1311. Telegraphic "Ringer Moji".

MURORAN: 42.20 N. 140.58 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare 2 Inward/Outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Arranged by Agent subject receipt of ETA advice at least 24 hours prior arrival. Pilot boards vessel about one mile outside breakwater.

ANCHORAGE: Outside harbour limits: Subject notice having been given to Authorities prior arrival. Inside harbour limits: Permitted in any part.

MAX. SIZE: *Nissei Pier (Nippon Petroleum):*

Max. d.w.t.	*Max. LOA*	*Max Safe Draft*
*50,000	220 m.	10.80 m.
*30,000 (G/T)		
100,000 Sea Berth (Under construction)	390 m.	16.50 m.

*For vessels of deadweight tons, gross tons and LOA in excess of above limits it is necessary to obtain entry permission from the Harbour Master, Pilot and the Refinery in advance.

Ore Carriers: Max. LOA, 300 m., max. draft, 16.0 m.

PRATIQUE: See "Hakodate".

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically West bound vessel to Choshi, and North bound to Nagasaki Radio respectively.

TUGS: Six tugs, up to 2,000 h.p. Usually meet vessel near Inner Harbour breakwater. 10% additional charge if tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Motowanishi Wharf	depth 9.5 m.
Nippon Steel Wharves	depth 9.0 m.
Nippon Steel (iron ore)	depth 14.0 m.
Nittsu Pier	depth 9.0 m.
Centre Pier	depth 9.0 m.
West Pier	depth 9.0 m.
Nikko Pier	depth 8.0 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent. Hospital facilities available.

TANKERS: See "Max. Size". N.P.R.C. Muroran Refinery. Discharge berth. About 25% of deadweight required in ballast.

Berth	*Product*	*Pipe-line*	*Discharge Rate*
50,000 d.w.t.	Crude Oil	12″×1	4,000 k/l
		10″×1	
30,000 g.t.	Fuel Oil	14″×1	1,500 k/l
	Diesel Oil	10″×1	1,200 k/l
100,000 d.w.t.	Crude Oil		5,000 k/l

DENSITY/TIDE: Density 1025. Rise and fall of tide about 4 ft.

FRESH WATER: Delivery at piers: Average rate about 40 t.p.h. Delivery by barge: Rate about 60 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Only minor repairs available, but Hakodate dockyard able undertake all grades repairs.

AIRPORT: Domestic flights only from Chitose Airport – 100 km. from Muroran.

TIME: GMT plus 9 hours. Permanent.

POLICE/FIRE: Police Muroran 2-5191; Fire Muroran 2-2111.

TELEPHONES: May only be connected on board at No. 2–2 West Pier.

SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd. 3–2, 3-chome, Kaigan-Cho, Muroran. Tel. Muroran (0143) 2–1171. Telegraphic "Narasaki Muroran".

NAGASAKI: 32.45 N. 129.52 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks in vicinity of Loshima lighthouse, lat. 32° 43′ 20″ N., 129° 46′ 43″ E. Pilot available any time, subject to adequate notice (no VHF system). All communication with Pilot through Agent. Pilot boat carries International signals. "G" flag in day-time and "Morse" signals at night to call Pilot. In event bad weather Pilot boards at anchorage off Megami.

ANCHORAGE: Megami anchorage located in Harbour Division No. 3 (within line between Kagenoo lighthouse and West end of Shirogashima) 60 ft. depth and capacity of 3 vessels of 20,000 d.w.t. Safe anchorage.

RESTRICTIONS: Berthing: During day-time only, except for emergency purposes. Entering into anchorage at Megami is generally permitted during day-time only except with Harbour Master's permit. Departure: No restriction from buoy or wharf with adequate notice, but no night departure from Oil Terminal.

MAX. SIZE: Max. permissible length 1,200 ft., breadth 120 ft., draft 15.0 m.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Hayashikane Oil Co. (Kozaki Depot)	42,000	—	10.00 m.
Hayashikane Oil Co. (Dinokubi Depot)	30,000	230 m.	15.00 m.
Mobil Oil Co. (Kibachi Depot)	22,000	200 m.	11.00 m.
Idemitsu Kosan (Kibachi Depot)	22,000	200 m.	11.00 m.
General Sekiyu (Otao Depot)	20,000	230 m.	15.00 m.

PRATIQUE: See "Moji."

RADIO: Recommended Captain communicates with Agent through Chosi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at anchorage for swinging and/or at berth for assisting vessel. Tugs arrangeable at outer harbour at vessel's special request.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

AUTHORITY: Naha Trade & Commerce Bureau.

AGENT: Sub-agent of Dodwell & Co., Connell Bros. Company, Ltd., PO Box 57, Naha, Okinawa. Cable address "Seabsea Naha". Telex J 79822. Telephone (0988) 57–0391–95.

NAOETSU: 37.11 N. 138.14 E.

DOCUMENTS:
1 Inward Declaration of Vessel.
1 Cargo Manifest.
1 Through Cargo Manifest.
1 List of Provisions and Stores.
1 List of Tobacco and Personal Effects.
7 Crew Lists (preferably airmailed in advance).
2 Passenger Lists.

PILOTAGE: Pilot embarks at quarantine anchorage to take vessel directly to berth during daytime. All transmitting and receiving through Niigata Radio Station (call sign JCF, Type of Wave: 438454) or Choshi Radio Station and/or Nagasaki Radio Station. Cable Agent one week's notice of ETA and accurate ETA 24 hours before arrival, thereafter advising any change in arrival time. No Pilot boat. Pilot uses tug-boat.
ANCHORAGE: Half-circle drawn at a point of 37° 11′ 31″ N., 138° 13′ 59″ E. (lighthouse) with radius 1,600 m. Quarantine anchorage: circle 700 m. radius drawn from point 1,600 m. off lighthouse at 335°.
RESTRICTIONS: Berthing and unberthing daytime only.
MAX. SIZE: LOA 160 m. draft 9.50 m. in Summer, and 9.00 m. in Winter.
HEALTH: Pratique obtainable during daytime. Detailed information to be promptly given to Quarantine Authorities. Instruction from Authorities given by return.
RADIO: Niigata Radio Station: JCF. Nagasaki Radio Station: JOS. Choshi Radio Station: JCS.
VHF: Channel 16.
TUG: Normally joins vessel at entrance of port. Ship's lines used.
BERTHING:
West Wharf, depth alongside 10.0 m.
Centre Pier, depth alongside 7.5 to 10.0 m.
South Pier, depth alongside 5.0 to 6.0 m.
STEVEDORES: ETA, draft and hatch cargo quantities to be advised before arrival. Main bulk commodities: unloader crane (1) 150 t.p.h.; tower cranes (3) 120–130 t.p.h. and equipment.
MEDICAL: No notice required except in emergency, and attendance on Sundays/holidays.
DENSITY: 1023–1025.
FRESH WATER: Available from shore. 30 t.p.h.
FUEL: Can be brought in coastal barge from Kanmon; 10 days advance notice.
GANGWAY/DECK WATCHMEN: No professional watchmen available.
OPENING/CLOSING HATCHES: Longshoremen if shipowner guarantees payment of operation charges.
CUSTOMS ALLOWANCES: Tobacco: Each crew member allowed to retain for his private use 200 cigarettes, 50 cigars, 250 grams of tobacco, etc. Wine/and/or Spirits: 1 bottle of liquor, to last one week.
IDENTIFICATION CARD: Passport and/or seaman book required.
CONSULS: None.
REPAIRS: Minor repairs only.
REPATRIATION: Necessary documents to be submitted to Immigration and Customs Authorities in Naoetsu.
AIRPORT: Niigata. 2.5 hours by train. One flight per day to Tokyo.
TIME: GMT plus 9 hours. Permanent.
HOLIDAYS: No work 31st December and 1st, 2nd and 3rd January. Subject to gang's on other holidays.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.
TELEPHONE: No facilities for placing telephones on board.
GENERAL: During Winter and bad weather, hire of nylon rope (100 mm.) desirable in order to avoid hull damage. Rope owned by Naoetsu Agency Association. Charge made for use.
SERVICE: Technicians for repair and/or adjustment of radar or wireless despatched from Niigata or Tokyo. Hold and/or tank cleaning operations by shorehands available, however gangs are from Niigata.
SHORE LEAVE: Crews allowed ashore within limit of Joetsu City.
DELAYS: Due to port congestion.
AUTHORITY: Port Administration Office.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Niligata Rinko Kairiku Unso K.K. Niigata, Jigyo Bldg. 9–11, 2-Chome, Minato-cho, Joetsu-shi, Niigata-ken. Tel. Naoetsu (02554) 2–0417, 2–4207. Telegraphic "Rinko Naoetsu". Telex 3252–468 Naoetsu Kaiun Unso.

NAOSHIMA: 34.28 N. 133.58 E.

RESTRICTIONS: *Mitsubishi Naoshima Pier* (Private) depth of approaches 14–20 m., length of berth 160 m., depth of alongside berth 9.5 m., max. draft acceptable 9.5 m., max. length acceptable 200 m., max. width acceptable about 45 m.
For other details see "Uno".

AGENTS: See "Tamano".

NIIGATA: 37.54 N. 139.04 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot embarks at Quarantine Anchorage to take vessel directly to berth during daytime. All transmitting and receiving normally effected through Niigata Radio Station (call sign: JCF, Wave: 438454), or Choshi Radio Station and/or Nagasaki Radio Station. Radio ETA one weeks notice and accurate ETA at least 24 hours before arrival. Notify any changes to ETA.

ANCHORAGE: Anchorage is a rectangle located North-west of lighthouse at West breakwater in a distance of 1,600 m. covering an area of about 160,000 sq. m. North 37° 57′ 37″ East 139° 04′ 00″. Depth: 18-24 m. Bottom: fine sand.

Safe Anchoring: Warning and instructions have been given by Niigata Harbour Master to secure safety of vessels anchoring off Niigata Port especially in winter season, when the port is greatly affected by N.W. gale.

1. Vessels anchoring outside the breakwater within the Harbour limit must maintain their position Westside of N.W. line drawn from Niigata Lighthouse (Fl. r. sec. 13 m. 12 m.) and must avoid the vicinity of the mouth of the Shinano River or Showa Oil Co.'s Seaberth (which is connected with shore facilities by submerged pipelines).

2. Vessels anchoring outside the breakwater must maintain their positions in the sea area where the depth of water is 25 m. or more. This rule does not apply to vessels waiting for quarantine inspection and/or Pilot. Vessels under 10,000 gross tons should also keep a sufficient distance from shore.

3. Vessels over 10,000 gross tons with dangerous cargoes or oil anchoring outside the breakwater must advise their positions to the Harbour Master by radio.

4. Vessels anchoring outside the breakwater, must keep a bridge watch unless they are equipped with radio. (According to the governing law, any vessel staying outside the breakwater is treated as a navigating vessel even if she is within the harbour limit).

5. Vessels waiting at anchorage must keep watching weather forecast. In case bad weather is reported, the following necessary actions should be taken; namely, officers on duty, confirmation of ship's position, engines on standby, the use of extra anchors, sheltering, etc.

6. In case a vessel requires shelter from N.W. wind in Winter, it is suggested that such vessel proceed to Sado Island and anchor off Morotsu Port, Akadomari Port, Sado Island South Coast or Sado Channel.

7. When approaching the entrance of the port, a vessel can be drawn too close to the East Breakwater or the shallows existing East of the port entrance by force of N.W. gale, N.E. current and river flow. Therefore, vessel must enter from N.W. of Niigata Lighthouse, approaching from Quarantine Anchorage and alter course as West Breakwater Lighthouse and Niigata Port Light Beacon are seen in a line. It is dangerous for vessel to anchor at any areas East of Shinano River.

8. Prior to arrival, Japanese Charts No. 1155A, 122 and 1197 or substitutes should be provided on board. Charts 1181, 1198 may also be needed.

RESTRICTIONS: Berthing and unberthing daytime only. Entry and/or departure at time authorised by Port Authority. Shinano fairway from port entrance to Rinko wharves, depth 11 m. to 12 m.

MAX SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. LOA*	*Max. Safe Draft*
Nisseki Dolphin	36,000	210 m.	10.40 m.
SBM (Sealine Buoy)	120,000	—	21.00 m.
Rinko "B" Pier	40,000	210 m.	11.00 m.
Rinko "C" Pier	40,000	210 m.	11.00 m.
Rinko "E" Pier	20,000	170 m.	10.00 m.

Bulk Carriers: Max. LOA 230 m. Max. beam,, 32 m. Max. draft, 11.0 m.

HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. West bound vessel to Choshi, and North bound to Nagasaki Radio respectively. (Also see "Pilotage".)

TUGS: Tugs normally join vessel at position of fairway. Towing operations are done by ship's lines.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Higashi: West Pier, depth alongside 12 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKER: Slop (residues): No discharge facilities.

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Nisseki Dolphin	Crude Oil	16″×1	700/1,500
	Fuel Oil	12″×1	600/1,000
SBM	Crude Oil	20″×1	3,000
Rinko "B"	Crude, Fuel	10″×2	600/1,500
Rinko "C"	Crude, Fuel	10″×2	800/1,000
Rinko "E"	Crude, Fuel	8″×1	600

DENSITY: Average in Rinko wharves approx. 1006. Average in Municipal wharves approx. 1005.

FRESH WATER: Available from all wharves. Cannot be supplied at anchorage during the winter season.

FUEL: Seven days notice usually required. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. (Also see "Regulations").

DEVELOPMENTS: The reclamation of land for Niigata East Port completed in 1975. One public berth is ready for about 15,000 d.w.t. class vessel. One shore crane with about 570 M/T discharging capacity for ore in bulk per hour.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

DRY DOCKS: No facilities for ocean going vessel.

REPATRIATION: Possible.

AIRPORT: 5 km. Round service Japan Domestic Air Line.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAY: 22nd August.

POLICE/AMBULANCE/FIRE: Water Police Station 44–2269; Ambulance Station 119; Fire Station 119; Main Police Station 110.

TELEPHONES: No facilities for telephones on board available.

SERVICES: Hold cleaning by longshoremen available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

REGULATIONS: Oil carriers can receive bunker by oil barge and/or shoreline except when discharging cargo.

AUTHORITY: Port and Harbour Bureau.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Niigata Rinko Kairiku Unso K.K., 2-Chome, Rinko-cho, Niigata-shi, Niigata-ken. Tel. Niigata (0252) 74–5181. Domestic Telex 3122–310. Telegraphic "Rinko Kairiku Niigata".

NIIHAMA: 33.58 N. 133.16 E.

DOCUMENTS: *No. of copies*

For Quarantine
- *1. Statement by Ship's Master — 1
- *2. Crew List — 1
- *3. Passenger List (if any) — 1
- *4. Yellow Cards for All
- *5. Derating Certificate

For Immigration
- 1. Declaration of Inward Vessel — 1
- *2. Passport or Seamen's Book for All
- 3. Crew List — 1
- 4. Application for Shore Pass. — 1

For Customs
- 1. Declaration of Inward Vessel — 1
- *2. Crew List — 1
- *3. List of Tobacco — 1
- *4. List of Crew's Baggages — 1
- *5. List of Ship's Stores — 1

For Harbour Master
- 1. Declaration of Inward Vessel — 1
- *2. Crew List. — 1

For Harbour Office
- 1. Declaration of Inward Vessel — 1

1. Master to telegraph ETA and Crew's Health Condition directly to Quarantine Niihama before arrival.

2.*To be prepared by Master before arrival. Others to be made up by Agent with assistance of Master on arrival.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N., 131° 03′ 12″ E.

ANCHORAGES: Approved anchorage area just inside harbour limit. A circle drawn at a point 33° 59′ 18″ N., 133° 16′ 31″ E. with radius of 430 m. where holding ground good and depth of water 12–15 m. No buoy moorings. Harbour protected by breakwater.

TIDE: (Springs) Max. 263 cm.; min.: −9 cm. (Neaps) max. 182 cm.; min.: 136 cm.

RESTRICTIONS: Pilot does not take vessel in during darkness. Vessel has to wait if depth during low water 8.50 m. is insufficient to pass channel.

MAX. SIZE: Pier No. 4 (Sumitomo Chemical Co. Ltd., Kikumoto Wharf). Length of vessel 160 m. Breadth (range of cranes, reaching 12 m. from the pier), draft, 9.50 m.

Berth B (Anchorage. Stern moored to Sumitomo Chemical Co. Ltd., Niihama Works). Length of vessel, 170 m. Breadth, no restriction. Draft, 9 m.

HEALTH: Quarantine Inspectors go aboard during day. Master to keep waste until Quarantine inspected in event of any suspected disease or fever on board after entered Japan.

RADIO: Choshi Radio, Nagasaki Radio.

TUG: Joins vessel at Quarantine anchorage or Section II, always using tug's lines without charge. "Niihama Maru" 700 h.p. If more powerful tugs required, can be obtained from Matsuyama or Mizushima.

BERTHING: Harbour Pilot operates during day.

Berth	*Length*	*Depth*
Berth No. 1	80 m.	7.5 m.
Berth No. 2	130 m.	9.50 m.
Berth No. 3	Dolphin	6.5 m.
Berth No. 4	120 m.	9.80 m.
Berth A	anchorage	8.0 m.
Berth B	anchorage	9.0 m.
Berth C	anchorage	9.0 m.
Berth D	anchorage	8.0 m.

Remarks: Berth No. 1: Owned by Sumitomo Chemical Co. Ltd., Niihama Works and used for loading fertiliser, nitric acid, ammonium nitrate by ship's gear.

Berth No.2: Owned by Sumitomo Metal Mining Co. Ltd., equipped with 2×5-ton luffing cranes with max. reach 22 m. and max. height 20 m.; used for discharging of Nickel Ore, copper concentrates, Nickel copper concentrates and maize and also by ship's gear.

Berth No. 3: Owned by Sumitomo Chemical Co. Ltd., Oh-e Works and used for loading and discharging of clean oil only.

Berth No. 4: Owned by Sumitomo Chemical Co. Ltd., Kikumoto Works and used for discharging of Bauxite, anthracite, salt, fluorspar and loading of alumina. 3×5-ton level mobile cranes, max. reach 22 m. and max. height 20 m.

Berth A: Public berth for general purposes, no buoy, just anchorage. However, vessel anchoring at this berth sometimes ordered by port authority to shift in order vessel approaching or leaving berth No. 4 may pass.

Berth B: Owned by Sumitomo Chemical Co. Ltd., Niihama Works and used for loading of fertiliser and discharge of phosphate and muriate of potash. Possible to use for general purposes with permission by Sumitomo Chemical Co. Ltd., Niihama Works through Agent. Vessel moors stern to wharf with 2 anchors about 4 shackles each.

Berths C and D: as above.

Average rate of Discharge	
Phosphate	70–90 tons by ship's gear
Potash	40–60 tons by ship's gear
Copper Conc.	70–90 tons by ship's gear and 130–150 by cranes
Nickel Copper Conc.	70–90 tons by ship's gear and 130–150 by cranes
Nickel Ore	40–70 tons by ship's gear and 40–70 by cranes
Bauxite	140–160 tons by cranes
Anthracite	60 tons by ship's gear and 80–100 by cranes
Salt	120–140 tons by cranes
Lumbers	13,000–15,000 BFM
Average Rate of Loading	
Fertiliser in bags	30–65 t.p.h. by ship's gear
Alumina	100 t.p.h. by two pneumatic loaders

MEDICAL: Hospitals and medical facilities available week-days only.

TANKERS: No facilities for oil carriers.

DENSITY: Entrance 1023 (rate of tide, 1 knot); channel 1022; anchorage 1021.

FUEL: Available but not in bond. Bunkers in bond available from main ports or oil stations in transhp. 2 days notice.

FRESH WATER: By barge which needs about 1 hour to supply after being alongside vessel. 4 trips daily available. By shore line, rate 10 t.p.h.

DEVELOPMENTS: Sumitomo Chemical Co. Ltd., Kikumoto Works, intend to make another Bauxite berth available for large size vessel (suitable for vessels up to 50,000 d.w.t.).

Sumitomo Metal Mining Co. Ltd., Niihama reclaiming land adjacent to Western harbour limit of port of Niihama to construct additional refinery for producing copper with a berth for 25,000 ton vessel to discharge copper concentrate. Final date of completion unknown.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Stevedores.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.

CARGO GEAR: Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.

CONSULS: None. Nearest in Kobe.

REPAIRS: Minor repairs only. Main engine piston overhauling possible.

DRY DOCKS: None. For nearest see "Matsuyama".

REPATRIATION: Arranged by Agent.

AIRPORT: None. Nearest at Matsuyama and Takamatsu. All Nippon Airways – 11 flights per day to Osaka and one to Tokyo.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Day, January 1st; Adult's Day, January 15th; Foundation Day, February 15th; Vernal Equinox Day, March 20th; Emperor's Birthday, April 29th; Constitution Memorial Day, May 3rd; Children's Day, May 5th; Respect-for-age Day, September 15th; Autumnal Equinox Day, September 23rd; Physical Culture Day, October 10th; Culture Day, November 3rd; Labour Thanksgiving Day, November 23rd.

Local holidays: New Year's Day (Lunar Calendar), January 30th; May Day, May 1st; Memorial Day of the Sea, July 20th; Bon Festival (Lunar Calendar), August 8th; Autumnal Festival, October 17th-18th.

Vessels may enter/leave *except* January 1st, and cargo work can be done as usual at overtime rates on above national/local holidays *except* for *Niihama* December 31, January 1, 2, 3, and October 17, 18.

Vessels may enter/leave port at overtime rates and cargo work will be done up to 1700 hrs. (day-time) against surcharges.

No cargo will be handled: *Niihama* December 31, January 1, 2, 3, and October 17, 18. No ship's movement (as well as cargo handling) can be done on January 1st.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: *Quarantine:* Hiroshima Quarantine Office, Niihama Detached Office, Nishibara-cho, Niihama, tel. Niihama 2–3966.

Customs: Kobe Customs, Niihama Branch Customs, Nishibara-cho, Niihama, tel. Niihama 2–3405.

Immigration: Niihama Port Station, Takamatsu Immigration Office, Nishibara-cho, Niihama, tel. Niihama 2–2672.

Maritime Bureau: Sanbashi-dori, Niihama, tel. Niihama 2–2855.

Maritime Safety Agency: Nishibara-cho, Niihama, tel. Niihama 2–3879.

Emergency Procedure: No Harbour Master radio available, therefore cable Agent. Telephone sub-agent since one person will be in attendance even during night, who in turn will contact person in charge.

Salvage: No salvage tug stationed, nearest from Kure.

SHORE LEAVE: Crew allowed ashore with pass.

AUTHORITY: Port and Harbour Bureau.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Sumitomo Warehouse Co. Ltd., 2–5, Sobiraki-cho, Niihama-shi, Ehime-ken. Cable Address: Sumitomosoko Niihama. Domestic Telex: 584–4432. Tel.: Niihama (0897) 37–1101.

NISHIHARA (Buckner Bay), Okinawa: 26.14 N. 127.50 E. **(See Plan)**

LOCATION: The Esso Standard (Okinawa) Ltd. Refinery is located in Nishihara village on the East coast of Okinawa, towards the Southern end of Nakagusuku Bay (Buckner Bay). Also see "Max. Size". There is also a Shell Terminal-SBM about 1 mile North of the Esso SALM.

DOCUMENTS:

Ship's Register.
6 Crew Lists.
List of Valid Smallpox/Cholera Certificates.
Cargo Manifest.
Bill of Lading.
1 Stores List.
1 Personal Effects List.
Health Declaration.

Each crew member will be issued with an Official Pass, which must be returned prior vessel sailing.

PILOTAGE: Normally vessels will be expected to enter Nakagusuku Bay through entrance marked Tatsu Kuchi, and pick up Berthing Master inside bay – South of Tsuken Jima. Inside bay Berthing Master requests that vessel keeps South of buoy marking Chikunigaa Shoal. No vessels should enter bay without first establishing communications with "Esso Control" – or without berthing instructions by W/T from Agent. Berthing may be carried out at any time of day or night – depending on weather conditions.

A safe convenient Pilot ladder is to be provided for the Berthing Master. Berthing Master stays aboard vessel throughout discharge.

MAX. SIZE: For crude vessels a single point mooring (SALM – Single Anchor Leg Type Mooring), capable of handling vessels from 90,000 d.w.t. to 250,000 d.w.t. is established in approximate position Lat. 26° 14′ N. Long. 127° 49.7′ E. about 2.5 miles offshore.

Products are shipped from a pier connected to the shore – the pier has two berths, one for vessels up to 65,000 d.w.t. and one for small vessels up to 3,500 d.w.t.

PRATIQUE: Port Officials will board vessel after berthing.

RADIO: Crude vessels discharging at Nishihara should report ETA Fairway Buoy, 72, 48, 24, 12 hours prior arrival. Berthing instructions and time of Pilot boarding will be relayed by W/T. "Esso Control" use 5 watt VHF on frequency 154.25 mHz.

Weather reports essential – particularly during typhoon season.

Naha Radio – JCX medium wave 500 kHz. Traffic lists broadcast at odd hours GMT. Short wave 6470 kHz, traffic lists broadcast at even hours GMT.

ANCHORAGE: Navigation and anchorage in the waters near the Esso product pier and crude berth will in so far as possible be restricted to those ships directed into these waters by station "Esso Control". In the interest of safety, ships will not enter the restricted area unless so directed by "Esso Control". The restricted area is within the following boundaries:

Beginning at a point described as 26° 13′ 33.88″ N. Lat. and 127° 47′ 30.24″ E. Long. (N. 25,074.89, E. 29,145.48); thence running S. 60° 00′ 00″ E. a distance of 200 m. to an angle point described as Lat. 26° 13′ 30.62″ N., Long. 127° 47′ 36.48″ E. (24,974.89, N. 29,318.69 E.); thence running S. 35° 40′ 45″ E. a distance of 1,170 m. to an angle point described as 26° 12′ 59.69″ N. Lat., 127° 48′ 00.98″ E. Long. (N. 24,024.88, E. 30,000.82); thence running N. 45° E. a distance of 3,350 m. to a point on the circumference of a circle described a 26° 14′ 20″ N. Lat., 127° 49′ 30″ E. Long.; thence running to the right a distance of 3,710 m. along said circumference, which is described by a radius of 1,060 m. with its centre located at 26° 13′ 56.18″ N. Lat., 127° 50′ 00.00″ E. Long. (N. 25,771, E. 33,300) to a point on the circumference described as 26° 13′ 30″ N. Lat., 127° 50′ 22″ E. Long. thence running S. 48° W. a distance of 1,780 m. to the Naka Sone buoy located at 26° 12′ 54.2″ N. Lat., 127° 49′ 37.5″ E. Long. thence running S. 53° W. a distance of 1,940 m. to the Wara reef located at 26° 12′ 17.7″ N. Lat., 127° 48′ 45.0″ E. Long., thence running W. 18° N. a distance of 2,810 m. to a buoy located at 26° 12′ 44″ N. Lat., 127° 47′ 07″ E. Long., thence running N. 17° W. a distance of 710 m. to a point at 26° 12′ 46.42″ N. Lat., 127° 47′ 56.61″ E. Long., (23,616.16, N. 29,880.55 E.).

TUGS: Two tug boats and a launch are available for assistance in mooring or departing. The Berthing Master in consultation with the Master will decide the number of tugs required for the berthing operation and for standby during the time at berth.

CRUDE BERTH: Single buoy mooring with vessel secured by two heavy polypropylene lines from buoy. Lines connected to chains through Bow Mooring Pipe and secured inboard. Chains secured direct to Brega Pin or by double polypropylene lines to bollards, port and starboard side of forecastle head. There is 85 ft. of water at buoy position. Vessels may remain in berth in winds of up to 50 m.p.h.

Floating hoses, two by 24 in. to two by 20 in. connected to two by 16 in. are connected on vessel's port side. There is a 42-in. line from buoy to shore. The maximum pumping rate is 75,000 b.p.h.

PRODUCT PIER: A 290° orientation of the pier allows tankers to approach the berth in a ballasted condition in either of two opposite directions. Vessels of 5 mdwt. size and above will be handled at Berth No. 1 and smaller vessels at Berth No. 2.

The water depth at the pier is approximately 47 ft. The extreme tidal variation is +7.9 ft. to −1.0 ft. and maximum storm tide will add approximately 3 ft. The maximum current is less than 1 knot.

Berth No. 1 is equipped with 1–16 in. loading arm for clean products and 2–16 in. loading arms for dark products. Each of these all-metal hydraulically controlled loading arms is fitted with a remotely operated coupling device to connect to a nominal 10 in. ASA, DIN or BS flanged connection without bolting.

Berth No. 2 is equipped with 1–6 in. loading arm for dark products. These arms are part metal, part hose and are fitted with flanges to be bolted to a nominal 6 in. ASA, DIN or BS flanged connection.

Bunker fuel is available at both berths through meters and 4 in. hose connections.

Each berth is provided with a gangway.

Vessels will deballast through the loading arms into a 24 in. ballast water line leading to refinery tankage. Under no circumstances should a vessel discharge any ballast water directly to the bay.

Fire protection at the pier consists of a foam concentrate tank and proportioning pump, a fire water pump and distribution system, fixed combination water–foam monitors and air–foam play-pipes.

TIME: GMT plus nine hours.

SHORE LEAVE: Shore leave is permitted – launch service may be arranged but is at vessel's expense.

AUTHORITY: Nansei Sekiyo Limited, Nishihara Refinery, Okinawa.

OFUNATO: 39.03 N. 141.44 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. Pilot boards about two miles from entrance of Ofunato Bay, at 38° 59′ N. and 141° 48′ E., where depth 35 m. (but not after dark). Master must radio vessel's Agent of ETA 24 hours in advance, because neither telegraphic address of pilot station nor VHF available.

ANCHORAGE: Not suitable in stormy weather. Depth of water at anchorage 30 to 40 m. Quarantine anchorage located between radius 500 m. of 38° 59′ N. 141° 48′ E.

RESTRICTIONS: Depth of water at entrance of passage 14 m., oil tanker's draft restricted to 13 m. (42 ft. 6 in.) and draft of log and coke carriers restricted to 8 m. (26 ft. 2 in.). Depth of water alongside wharf 9 m. (29 ft. 5 in.) at mean level.

MAX. SIZE: *Tankers:* Kamei Oil Piers Max. d.w.t. 35,000 Max. L.O.A., 200 m. Max. Safe draft 12.0 m.

Log and Coke Carriers: Max. LOA 200 m., max. draft 8.0 m. Tidal range 1–1.4 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.

TUGS: One tug 250 h.p., but assistance from three or four others available, and they usually join vessel about 400 m. in front of jetty and discharging wharf. Ship's lines used if necessary.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: One tanker berth. Product handled, Diesel Oil. Shoreline, 8″× 2. Discharge rate, 800 t.p.h.

DENSITY: Average density 1020.

FRESH WATER: Available from shore installation. Supply 10 – 15 tons per hour.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: None.

REPAIRS: Minor deck and engine repairs available.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: Hanamaki Airport about 17 km. from Ofunato. All Nippon Air Lines; two flights between Hanamaki/Tokyo every day.

TIME: GMT plus 9. No alterations made to clocks during year.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Discharging ex-gearless vessel at wharf unavailable, because no shore crane for discharge.

SERVICES: Surveyor: NKKK and Kentei Shin Nihonsha. Hold and tank cleaning. Provisions/Laundry/Water. Bunker: Domestic diesel oil available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; 3 days extension possible if ship stays longer.

AUTHORITY: Ofunato Port Office.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo, Abeki Shokai, c/o Fujisawaya Shoken, 10–12 Suzaki, Ofunato-shi. Tel. Ofunato (019222) 2753. Telegraphic "Abe Ofunato".

OITA: 33.15 N. 131.35 E.

DOCUMENTS:

OMISHIMA (Ohmishima) Inokuchi Port: 34.16 N. 133.00 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea pilots also act as harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo channel). Position 33° 13′ N. 131° 54 E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Omishima Island located at centre of the Inland Sea and lies between Ehime and Hiroshima prefectures. Eastern part of island, Inokuchi surrounded by deep water where holding ground good. Oil company located at Inokuchi. No strong winds.

RESTRICTIONS: No restriction on entry; however mooring and unmooring to be carried out during day-time, regardless of tide and current.

MAX. SIZE: *Tankers:* Maruzen Pier, max. d.w.t. 20,000 tons. Max. LOA 230 m. Max. safe draft 9.40 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Join vessel at sea anchorage, always using tug's line without charge.

TANKERS: No advance information of loading/discharge lines required. No loading facility. Only one berth available for discharge. Product handled, Fuel Oil. Shoreline, 1×10″ Discharge Rate, 400 t.p.h.

DENSITY: Anchorage 1025. Berth 1025.

FRESH WATER: Not available but usually brought by barge from Onomichi (about 3 hrs. run to Omishima). Rate of delivery 80 tons to 200 tons per hour which depends on barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS: No consuls. Nearest Consulates are in Kobe.

REPAIRS: Minor repairs only.

REPATRIATION: Possible.

AIRPORT: Nearest at Matsuyama and Takamatsu.

TIME: GMT plus 9. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Not available.

GENERAL: Closed port. To conform with regulations vessel obtains special permission from Maritime Bureau and Customs at Takamatsu to enter.

Customs request vessels calling Omishima to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival. This procedure undertaken by Agent. No quarantine station, nearest at Matsuyama. Immigration officer comes from Niihama.

SHORE LEAVE: Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AGENT: See "Niihama".

ONAHAMA (Iwaki City): 36.56 N. 140.55 E.

The port is protected by breakwater, 8,200 ft. long and is open to the South.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: No means of communication with Pilots and vessels should arrange pilotage by advising Agent of ETA. Vessels awaiting Pilot should anchor in position 36° 55′ N. 140° 54′ E. Pilot-boat carries flag "H".

ANCHORAGE: Just outside No. 1 West breakwater. Depth of water 14–22 m.

RESTRICTIONS: Restriction only by ship's draft. Depths of water alongside wharves 9 and 10 m. at low tide, and rise of tide is about 1.40 m. highest.

MAX SIZE: (Also see "Berthing").

	Length of Wharf	*Depth of Water*
No. 2	350 metres	9 m. for 165 m. and 10 m. for 185 m.
No. 3	350 metres	10 metres
	350 metres	10 metres

Each wharf used for 2 vessels, and view depths, Pilot requires restrict draft within 32 ft. 2 in.

Tankers: Sea Berth: Max. d.w.t. 80,000 tons. Max. safe draft, 13.50 m.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Chosi Radio or Nagasaki Radio which covers all ports in Japan. If specifically West bound vessel to Chosi and North bound to Nagasaki Radio respectively.

TUGS: Normally join vessel on passage from anchorage. Vessel's lines used.

"Bandai Maru"	800 h.p.
"No. 2. Shukutsu Maru"	675 h.p.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.
AUTHORITY: Port and Harbour Dept.
AGENT: Sub-agent of Dodwell and Co. Chugeku Kaiun Kaisha Ltd., Onomichi Chuo-Sanbashi Bldg., No. 10–3, Tsuchido 2-chome, Onomichi-shi, Hiroshima-ken. Cable Address: Chugokukaiun Onomichi. Domestic Telex: 6422–15. Tel.: Onomichi (0848) 22–3141/4.

OSAKA: 34.39 N. 135.26 E. (See Plan)

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: 24 hours notice required. Telegraphic address: "Hanshinpilot Osaka". VHF contact on Channels 12, 16, 19, 20. Agents operate Channel 26. Three 15-ton Pilot boats with radio equipment to pilot office. Pilot boards anywhere within harbour limits. In event bad weather Pilot boards just inside breakwater when acknowledgement obtainable from Master. If awaiting Pilot, anchor inside harbour limits as near as possible to breakwater.
ANCHORAGES: Sections Nos. 7 and 8. Section 7 is quarantine anchorage. Section 8 for other vessels. Harbour Master allocates anchorage position prior vessel's arrival which radioed to Master by Agent. Max. draft about 42 ft.
RESTRICTIONS: Vessels only permitted enter from sunrise to 2000 hrs. However, order avoid danger, some wharves (oil wharf, Nakayama wharf and various shipyards where there is not enough space to conduct berthing operation), accept vessel only until sunset. Max. depth 39 ft. 4 in., Wharf No. 49.
Depth restrictions at other berths depend upon berth allocated. But less than 39 ft. 4 in.
MAX. SIZE: Max. permissible length, 750 ft., draft 34 ft. 6 in. Also see "Tankers".
HEALTH: Vessel requiring free pratique requested cable directly to "Quarantine Station", Osaka informing ETA, date of departure from last port, name of last port, number of crew and health condition. At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from day-light to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
Radio Pratique is available only for a vessel which possesses Valid Sanitary Inspection Certificate issued by the Japanese Government.
RADIO: Osaka Port Radio, 24-hour VHF service on Channels 16, 12, 19 and 20. Osaka Harbour Radar has 24-hour navigation aid and weather information service. Contact by VHF Channels 16, 14 and 22.
TUGS: Tugs join vessel just before harbour entrance. Tug's lines used, no extra charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by VHF or radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If

stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs: next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: No slop discharge facilities. Wharf No. 49, Sakurajima Oil Wharf, max. LOA 210 m, max. safe draft 11.60 m. Product handled, Fuel oil, diesel oil. Minas Waxy. Shoreline 1×12in. Discharge rate 1,000 t.p.h.

Wharf No. 25. Max. LOA 210 m. Max. safe draft 10.30 m. Product handled, Fuel oil. Shoreline 1×14in. Discharge rate, 850 t.p.h.

DENSITY: Outside anchorage: 1023–1025. Near breakwater: 1020–1022. Average density inside breakwater 1020. Wharves near estuaries (Aji river, Shirinashi river, Kizu river and etc.): 1016–1020.

FRESH WATER: Methods of delivery: by barges or pipe-line. Rate of delivery: 200 ton barges – 4; 160 ton barges – 1; 60 ton barges – 1; Total – 6.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.

CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: The following consulates available in Osaka:

Great Britain Denmark Mexico
Spain Korea

REPAIRS: All grades repairs possible.

DRY DOCKS: Mitsui Shipbuilding & Engineering Co. Ltd., Fujinagata Works, No. 1 dock size 446 ft. 2 in.×55 ft. 2 in., depth 17 ft. No. 2 dock size 541 ft. 2 in.×66 ft. 2 in., depth 23 ft. 5 in.

Hitachi Shipbuilding & Engineering Co. Ltd., No. 1 dock size 653 ft. 5 in.×88 ft., depth 34 ft. 3 in. No. 2 dock size 547 ft. 6 in.×75 ft. 3 in., depth 28 ft. 3 in.

Namura Shipyard Co. Ltd., No. 1 dock size 590 ft. 3 in.×90 ft. 1 in., depth 29 ft. 4 in. No. 2 dock size 478 ft. 7 in.×72 ft. 1 in., depth 29 ft. 1 in.

Sanoyasu Dockyard Co. Ltd., No. 1 dock size 508 ft. 3 in.×71 ft. 1 in., depth 24 ft. 2 in. No. 2 dock size 367 ft. 3 in.×55 ft. 6 in. depth 22 ft. 8 in.

AIRPORT: One hour required from Osaka Port to Osaka International Airport by car (about 25 km. distance). Regular airlines:

Overseas Lines, Japan Airlines, Cathay Pacific Airlines, China Airlines, Thai International Airlines, North West Airlines, Pan American Airlines, British Airways, Korean Airlines, Lufthansa Airlines, Scandinavian Airlines.

Domestic Lines, Japan Airlines, All Nippon Airways, Toa Airways.

TIME: GMT plus 9. No alterations made to clocks during year.

HOLIDAYS: Public 20 July; Sakurajima Nil; Silo Wharf 20 July; Nakayama Steel Nil.

POLICE/AMBULANCE/FIRE: Police tel. 110; Ambulance tel. 119; Fire tel. 119.

SERVICES: All services available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau.

AGENT: Dodwell Tramp Agencies, Osaka Kagaku-Seni Kaikan, 39, 5-chome, Kawara-machi, Higashi-ku, Osaka. International Telex: J63250. Cable Address: Dodtramp Osaka. Domestic Telex: 522-3948. Telephone: (06) 203-5151.

OTARU: 43.12 N. 141.01 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot district fixed by Ministry of Transport. Limit of Otaru piloting district is sea area surrounded by line drawn from Kayashiba-misaki to Horaiso-misaki and coast line. Licensed Pilots stationed in office from 0900 to 1700 hrs. When Pilot observes pilot signal or is requested by any other means he comes out to ship at once. Boarding place about one mile from North B.W. Lt. H. 70°. Pilot boat painted white and carries International Code flag "H" at forecastle deck. "Otaru Pilot" registered cable address for Otaru Pilot Association.

ANCHORAGE: Depth of water inside breakwater is 3.6 to 17.0 m. (average 9.4m.) and nearly everywhere, except some Southern parts, good anchorage. Sea area, outside breakwater, also good holding for anchors, but be careful not to foul fishing nets. Around quarantine anchorage is best anchorage of ship staying outside breakwater.

RESTRICTIONS: Quarantine and Customs business between 0800 hrs. and 1700 hrs. Pilot: Vessel allowed to enter and leave day and night. Pilot assistance officially not compulsory but in practice necessary, and Pilots available 24 hours.

MAX. SIZE: *Buoys:* Four mooring buoys available for large vessels.

Pier and wharves: Three piers, two wharves, and one coal pier. Also No. 4 pier now under construction.

HEALTH: See Hakodate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Two tugs available for large vessels. Tugs M/S "Sakura Maru" 147 g/t 1,000 h.p. M/S "Tatwiea Maru" 38 g/t 180 h.p. Both belong to city's Harbour Bureau.

Position: Tug boat waits and joins vessel near appointed berth according to Agent's request. Tug's line in general use.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additonal.

MEDICAL: No advance notice required unless urgent.

TANKERS: Available berthing for small vessels only, 1,000 g/t and usual berthing 300–500 g/t. Japanese tankers only. Draft: max. permitted 7.2 m. discharging: about 100 k/t per 1 hr.

DENSITY: Average 1025.

FRESH WATER: Good drinking-water at all piers and wharves. Two water barges (both 150 tons) available when off shore in harbour. International code flag "YJ" used as "I want fresh water".

Remarks: Charges for water supply outside office hours (1700–0830) increased by 50% of basic. Very bad weather add 50%.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: No smoking at tanker berth, Umaya Machi Ganpeki No. 1 and No. 3 berth.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore, but no spirits.

CONSULS:
American Consulate, Sapporo in Sapporo City only. Tel. 0122–22–5121.
U.S.S.R. Consulate, Sapporo in Sapporo City only. Tel. 0122–56–3171.
Korean Consulate, Sapporo in Sapporo City only. Tel. 0122–62–0288.
REPAIRS: All type of deck and engine repair are possible.
DRY DOCKS: None.
REPATRIATION: Possible.
AIRPORT: Distance from airport to Agent's office at Otaru about 80 km. Service bus air station in Sapporo to airport by each airline. Charge: Y200. – Flights: JAL (from Chitose airport to Haneda airport) 19 times per day. ANA (from Chitose airport to Haneda airport) 15 times per day. Kokunai Koku twice per day.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: Stevedores do not work on 1st May.
POLICE/AMBULANCE/FIRE: Tel. Police 110; Ambulance and Fire 119.
TELEPHONES: Arrangable on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Bureau.
AGENT: Sub-agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co. Ltd., Otaru Branch, Mitsui Bldg., 1–9 1-chome, Ironai-cho, Otaru-shi. Tel. Otaru (0134) 3–3281. Telegraphic "Narasaki Otaru".

OWASE: 34.04 N. 136.15 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare 2 Inward/outward Declarations, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Ocean-going vessels calling at Owase have cargo destined to Toho Oil, Owase Refinery only. There is no local Pilot Association in this port and the Oil Refinery's Dock Master boards all vessels as a Pilot. Pilot boarding time is passed to ship by ship's Agents after consulting with Pilot (Dock Master) and he boards vessel 1 mile East of Toto Island.
ANCHORAGE: Quarantine Anchorage position is 34° 4′ 13″ N. 136° 16′ 43″ E. Depth Water 60–80 m. Radius 500 m. However, it is not advisable for vessels to stay there for a long time as there are many fishing boats nearby.
RESTRICTIONS: According to Agreement between Fishery Association and Oil Refinery, ship's movement is prohibited at night.
MAX. SIZE: See "Tankers".
HEALTH: At first port of call in Japan vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs usually join vessel at Harbour Limit (near Sabaru Island) and tug's line is used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
MEDICAL: No advance notice required unless urgent. Hospital facilities available.
TANKERS: *Toho Oil Owase Pier:* Max. d.w.t. 150,000. Max. LOA, 300 m. Max. safe draft 16.50 m. Product handled, crude oil. Shoreline 2×12 in. Discharge rate, 4,000 k/l per hour.
Toho Oil Sea Berth: Max. d.w.t. 210,000. Max. LOA, 350 m. Max. safe draft 18.00 m. Product handled, crude oil. Shoreline 2×20 in. Discharge rate 8,500 k/l per hour.
FRESH WATER: Fresh water can be supplied to the vessel from pipe at Quay. Supply Capacity 30 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS/REPAIRS/AIRPORT: None.
TIME: GMT plus 9 hrs. Permanent.
TELEPHONES: Emergency numbers, Owase Police Office (05972); 2–0004; Owase Fire Station (05972) 2–2020; Owase Hospital (05972) 2–2118. No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration offices issue shore pass valid for only 3 days, but extension possible if ship stays longer.
AUTHORITY: Port and Harbour Dept.
AGENT: See "Yokkaichi" (Uyeno Unyu Shokai).

SAKAI: (Including Senboku and Hannan Port). 34.34 N. 135.27 E. **(See Plan)**

DOCUMENTS:
Ship's Register.
Last Port Clearance.

DENSITY: Osaka Gas Wharf and Nippon Steel Corporation Wharves 1020 to 1025.
All other wharves, 1010 to 1025.
FRESH WATER: Minami Hakuchi anchorage by barges. All other wharves by shore line.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stocks ports at max. 7 days prior notice. Also see "Moji-Fuel".
GANGWAY/DECK WATCHMEN: Recommended and compulsory for tankers working cargo.
OPENING/CLOSING HATCHES: Stevedores open and close hatches with terms subject to charter party.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Each man allowed 200 cigarettes to take ashore but no spirits.
CARGO GEAR: See "Certificates" but no special requirements.
CONSULS: None.
REPAIRS: See "Osaka".
DRY DOCK: Hitachi Shipbuilding & Engineering Co. Ltd., Sakai Shipyard, Dock No. 2, length 455 m., width 63 m., depth 11 m., capacity 400,000 d.w.t.
REPATRIATION: Possible.
AIRPORT: International Airport Osaka, 45 km. distant.
TIME: GMT plus 9. hrs. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: See "Osaka".
TELEPHONES: Available except Nippon Steel Wharf and Public Wharf.
SHORE LEAVE: Local Immigration Officers issue shore-leave pass valid for 3 days, but a 9-day pass is obtainable in case where a vessel stays in port for longer period.
DEVELOPMENTS: 40 berths under construction at Sakai-Seaboku. Max. depth 12 m. 58 berths under construction at Hannan, depths from 4 m.–7.5 m.
AUTHORITY: Port Administration Office.
AGENTS: See "Osaka".

SAKAIDE: 34.19 N. 133.51 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position 34° 38′ N.; 135° 11′ E. Telegraphic address "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse (vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Port located on North coast at East part of Shikoku Island in Inland Sea.
Boundaries and Areas. Area bounded by line joined with three points, East corner of Sosha river mouth, Mamako-Hana of Semi Jima and Tako-Saki of Shotsuji-Yama.
Depth of water inside harbour limit: 11 m. outside harbour limit: 13 m.
RESTRICTIONS: Vessels entering and/or leaving during daytime only at wharves; but done day and night at sea anchorage provided favourable weather conditions prevail.
MAX. SIZE: East section of Centre pier, length 160 m., breadth no limit, depth 9 m.
West section of Centre pier, length 110 m., breadth no limit, depth 7.50 m.
Mitsubishi Chemical Industries wharf, length 250 m., breadth no limit, depth 12 m.
Anchorage inside breakwater, length no limit, breadth no limit, depth 7–9 m.
Anchorage outside breakwater, length no limit, breadth no limit, depth 10 m.
Tankers: Max. d.w.t., 50,000. Max. LOA 400 m. Max. safe draft 12.50 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from Cholera infected area within 10 days, Captain must advise crew and passengers health condition prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
VHF: *Shipmaster's Report:* There is a VHF radio station at Sakaide in position 34° 21′ 00″ N. 133° 51′ 00″ E. Watch is kept from 0600 to 2000 hrs. each day, using Channel 16. The radio station will indicate where to anchor if there is a delay in berthing.
TUGS: Wharves. Join vessel at sea anchorage, using tug's line without charge. Sea anchorage. No tug required in normal conditions.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: There is an oil tanker berth for the Asia Kyoseki refinery at No. 2 pier. Depth 13 m. Product handled, Crude oil. Shorelines 2×20 in. (One for high sulphur and one for low sulphur). Discharge rate 2,000 t.p.h.
DENSITY: Inside harbour limit 1025. Outside harbour limit 1025.
FRESH WATER: Sea anchorage. No water barge available but usually brought from Onomichi (about four hrs. run to Sakaide). Rate of delivery 80 tons to 200 tons per hour dependent on barge.
Centre pier: can be supplied by shore line with capacity 25 tons per hour.
Mitsubishi Chemical Industries wharf: Can be supplied by shore line with capacity 60 tons per hour.
FUEL: All grades of bonded bunkers are stocked in Tokyo, Ise Bay, Osaka and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
FIRE PRECAUTIONS: No specific precaution.
DEVELOPMENTS: There is a Sea-Berth under construction.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per gang per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificate sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.
CONSULS: None. See "Kobe".
REPAIRS: Only minor repairs.
DRY DOCKS: Kawasaki Heavy Industries Ltd., Sakaide, which is suitable to dry dock. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. Not yet in action for ship repairs. Only used at present for ship building and after services.

REPATRIATION: Possible.
AIRPORT: No airport. Nearest Takamatsu, All Nippon Airways 11 flights to Osaka and one to Tokyo.
TIME: GMT plus 9. No alterations made to clocks during year.
HOLIDAYS: National Holidays – see "Niihama". Local Holidays: New Year's Day (Lunar Calendar) January 30th; May Day May 1st; Memorial Day of the Sea July 20th; Bon Festival August 8th.

No ship's movement can be effected on January 1st, 2nd and 3rd, August 8th and October 15th.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Sakaide Maritime Safety Base, 6–2858.
TELEPHONES: No facilities for placing telephones on board.
GENERAL: Mitsubishi Chemical Industries Co. Ltd., Sakaide Works. As wharf of above works located outer harbour limit of Sakaide port, the undermentioned procedures required: In conformity with regulations, vessel required to get special permission for entering into closed port, which will be given from Shikoku Maritime Bureau.

Customs request vessel calls Mitsubishi Chemicals wharf to obtain special permission for entering. If tonnage dues paid prior arrival, this procedure will be attended to by Agent.

Waiting anchorage: Avoid Bisan Seto Boundary according to special water zone navigation order. Imperative to exclude water surfaces with established Fishery Privilege.

Vessels waiting to berth at centre pier are lightened at anchor.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENTS: See "Niihama".

SAKATA: 38.57 N. 139.48 E.

Located at mouth of Mogami River. Strong wind blows from Japan Sea November to March.

In Winter season, wave height between 3 to 5 m., length 70 to 80 m. and period 7 to 10 seconds. Current South to North along coastline at 0.15 m. sec.
TIDAL RANGE:

Higher high water	+40 cm.
Spring tide high water	+28 cm.
Neap tide high water	+24 cm.
Mean sea level	+20 cm.
Neap tide low water	+16 cm.
Spring tide low water	+12 cm.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory but required. Order Pilot through Agent. Pilot boards about 600 m. off port entrance. In bad weather, wait instructions from Agent.
ANCHORAGE: All sea areas available for anchorage. No prohibited anchorage areas. Pilot station and quarantine anchorage position 38° 56.5′ N., 139° 48.0′ E.
RESTRICTIONS: Ship movements in daytime only.
MAX. SIZE: Restricted by depth alongside West Pier, 10 m.
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Niigata. Call sign JCF. Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: One of 800 h.p.
BERTHING:

Name	*Depth*	*Length*	*No. Berths*
East Pier	7.5 m.	260 m.	2
Nishi Pier	10.0 m.	185 m.	
West Pier	10.0 m.	185 m.	1
Ohama Pier	4.5 m.	260 m.	3
Ohama Pier	9.0 m.	330 m.	2
Sodeoka Pier	7.5 m.	390 m.	3
Buoy (Logs only)	11.0 m.	230 m.	1

STEVEDORES: Working hours: 0800 to 1700 hrs.

Phosphate rock in bulk handled at a rate of 200 to 250 t.p.h by shore cranes.

Logs, 1,400 cu.m. per day are handled by ship's gear.

Rice, 900 to 1,000 tons per day loaded by ship's gear.

Manganese ore in bulk, 150 t.p.h. by shore crane, 120 t.p.h. by truck crane, 60 t.p.h. by ship's gear.
MEDICAL: No advance notice required unless urgent. Medical facilities available at Sakata City Hospital.
TANKERS: Draft not to exceed 8.5 m.
FRESH WATER: Available only from wharf at a rate of 25 t.p.h.
FUEL: Bunkers lightered from Hakodate provided at least 7 days' notice given.
GANGWAY/DECK WATCHMEN: Not specially required, unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: 200 cigarettes and three bottles of spirits per man.
CONSULS: Korean Consulate Tel. 0222–21–2751. Consul: Mr. Cho Kian.
REPAIRS: Minor repairs only.
REPATRIATION: Crew replacement conducted basis "landing for transfer to another vessel".
AIRPORT: Yamagata Airport, situated 105 km. from Sakata. Two flights per day.
TIME: GMT plus 9 hours. No alterations.
HOLIDAYS: Public offices closed on Sundays and National holidays. Cargo work every day except 1st, 2nd and 3rd January.
POLICE/AMBULANCE/FIRE: Police (urgent) 110; (usual) 2–6611; Ambulance (urgent) 119; Fire (urgent) 119; (usual) 2–3214.
TELEPHONES: No facilities for placing on board.
SERVICES: Compass adjustment.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extensions possible if ship stays longer.
AUTHORITY: Sakata Port Management Body.
AGENT: Sub-agent of Dodwell & Co., Tokyo. Sakata Kairiku Unso Co., Ltd., P.O. Box 35, 6–19, 2-chome, Funaba-cho, Sakata-shi, Yamagata-ken. Cable address: Kairikusakata Sakata. Domestic Telex: 8733–08, Tel.: Sakata (0234) 22–1801.

SASEBO: 33.10N. 129.43 E.

DOCUMENTS: See "General – Customs and Immigration".
PILOTAGE: Compulsory. Vessel should keep Pilot closely advised through Agent, of ETA Pilot station at least 24 hrs. prior arrival and any subsequent change. Pilot boards vessel 1 mile N.W. Kogosaki lighthouse. (33° 06′ N. 129° 38′ E.). In bad weather, Pilot will board at 33° 05′ 48″ N. 129° 40′ 24″ E.

Telegraphic address of Port Captain "JNK" 500 kc/s (Sasebo Maritime Safety Office).
ANCHORAGE: Ample good holding ground in inner harbour, but is controlled by U.S. Navy and only following anchorage available for commercial vessels: No. 3 Section, Depth 10 m.-37 m. Capacity (g/t) 20,000 tons and over × 20.
RESTRICTIONS: Entry and departure from sunset to sunrise only allowed under extenuating circumstances subject to Port Captain's special permission (MSTS chartered vessels excepted). No particular restrictions upon draft or tide conditions. Berthing during day only. Controlling depth of water – in the passage 23-54 m., at anchorage 10-37 m.
WEATHER: South-westerly winds prevail in Summer, while Northerly blows frequently in other seasons. Max. wind velocity recorded 26.1 m/sec. In early Spring dense fog prevails, but renders navigation impossible only for 7 days or so.

Tidal range 2.6 m. Current rate max. 1.5 knots in vicinity of harbour entrance at rising tide. At ebb tide, it flows in opposite direction and is faster than during flood, but not so strong as to hinder navigation.
MAX. SIZE: See "Berthing". No particular limitation for entering port. For berthing however, acceptable length, draft and breadth will be decided case by case in accordance with conditions of each berth consulting with Pilots, U.S. Navy and Port Captain. No tanker installations outside port.
HEALTH: See "Moji". Quarantine station: 33° 05′ 30″ N., 129° 42′ 00″ E. 1.5 mile East of Kogosaki lighthouse. Quarantine service from sunrise to one hour before sunset. "Q" flag should be hoisted until free pratique granted. When vessel arrives from plague and cholera infected or suspected area within 10 days (plague) and five days (cholera), 24-hour special quarantine required. All sanitary scuppers must be closed and garbage not thrown overboard after vessel reaches 60 miles off Japanese coast. Vessel chartered by MSTS or USN (GAA, T/C, CVC, V/C) shall be cleared by U.S. Navy Quarantine and service available after sunset also.
RADIO: See "Yokohama".
TUGS: Normally join vessel about 0.5-1 hour prior berthing and tug's lines used. Charge for use of lines included in tug hire.
BERTHING:

3	30 tons	U.S. Navy	Their use for commercial purposes is subject to U.S. Navy's permission.
1	150 tons	U.S. Navy	
1	15 tons	S.S.K.	
1	12 tons	S.S.K.	

IDENTIFICATION CARDS: See "General – Immigration".

CONSULS: None.

REPAIRS: All deck and engine repairs possible.

DRY DOCKS: Sasebo Heavy Industries Co. Ltd. No. 3, dry dock: Length 370 m. Width 70 m. Depth 15 m. Max. ship (d.w.t.) 300,000. Another 5 dry docks available.

AIRPORT: Itazuke Airport, Fukuoka, about 120 km. (about 220 min. by taxi). Served by regular airlines. Nagasaki Airport, Nagasaki, about 50 km. (about 70 min. by taxi). Seven flights daily (All Nippon Airways).

TIME: GMT plus 9 hours. No alterations to clocks throughout year.

POLICE/AMBULANCE/FIRE: Police Station: Sasebo 23-7161 (if emergency: 110). Ambulance Sasebo 23-5121 (Sasebo Fire Station). Fire Sasebo 119 (Sasebo Fire Station).

TELEPHONES: No facilities exist for placing telephones on board.

GENERAL: *Customs:* When vessel arrives direct from foreign port, Customs officials board for search. Following documents to be submitted. Crew List, Passenger List, Store List, Manifest of crew personal effects (must be signed by individual crew member). Arms and ammunition List, Narcotics List, List of Port of call on current voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward (Form No. C2000). Following will be checked on board. Ship's Registry, Last port clearance.

When vessel comes from Japanese port, Customs officals will not attend on board, except special case. Master or Agents to attend at Customs House for entry formalities with following documents. Discharging Cargo Manifest, Through Cargo Manifest, Declaration inward/outward, Ship's Registry, Last Port Clearance, documents entrusted with the Master by Customs at previous port.

On vessel's departure, clearance issued by Customs after confirming payment of tonnage dues.

Immigration: Immigration officials board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents and provide a 72-hour landing pass for crew members and passengers. Two copies each of crew list and passenger list are required by them. Providing vessel's Agent with these documents beforehand will help in expediting immigration business on arrival. When vessel in port more than 72 hours, landing passes will be extended every 72 hours on application.

In event that crew members, without entry visas, to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within five days. Services are rendered from 0900 hrs. to 1700 hrs.

MEDICAL: Hospital: U.S. Station Hospital (for U.S. military personnel only). Sasebo Dojinkai Hospital. Bussaka Dental Hospital. Tanaka Dental Hospital.

SERVICES: Hold cleaning. Compass adjusting. Fumigation.

AUTHORITY: Sasebo Harbour Administration.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Nishikyushu Warehouse Co. Ltd., Tategami-cho, Sasebo-shi, Nagasaki-ken. Tel. Sasebo (0956) 24–6161. Telegraphic "Ringer Sasebo".

SHIMIZU: 35.01 N. 138.31 E. (See Plan)

DOCUMENTS: *Quarantine* (only when arriving from a foreign port):

1 Maritime Declaration of Health.
1 Crew List.
1 List of Passengers (if any on board).
Log Book and Registry should be readily available.

Customs:

1 Declaration Inward/Outward with Ports of Call.
1 Ship's Registry.
1 Last Port Clearance.
1 Store List including arms and narcotics.
2 Manifests of Cargo for discharge (prepared by Agents).
1 Manifest of Through Cargo.
1 Crew List.
1 List of Passengers.
1 List of Crew's Baggage (only necessary if crew-members have to land personal effects ashore).

Immigration:

2 Crew Lists.
1 Application for Shore-passes.
2 Lists of Passengers.
Notification of Departure, (to be returned through Agents after sailing).

Harbour Master:

1 Declaration Inward/Outward with Ports of Call.

Port Authority:

1 Declaration Inward/Outward with Ports of Call.

PILOTAGE: Pilot boats: black hulls and white house with H flag at bow. G flag: when requiring a Pilot. Pilot station: 35° 01′ 30″ N. 138° 31′ 30″ E. (to be altered at a later date to the point 80° 2600 m. distant from Masaki Lighthouse 35° 01′ 02″ N., 138° 31′ 06″ E.). Night Pilotage: charge – 50% extra applicable from one hour before sunset to one hour after sunrise.

ANCHORAGES: See Section 3 on Chart of Shimizu.

MAX. SIZE: Dry-cargo max. draft 12 m. Length and breadth no restriction.

HEALTH: Free pratique automatic calling at another Japanese port. Radio Pratique available.

RADIO: Cable Agent giving ETA, draft and any other information via Shimizu Radio. Call sign: JGQ. Transmitting frequency 500, 512, 486 kc/s. Receiving frequency 500, 480 kc/s. Area within 200 km.

VHF: Call sign: Shimizu Port Radio. Channels 16, 12, 14 Simplex, 20 Duplex. Power 50 W. Area 50 km.

TUGS: Normally join in-coming vessels near Pilot station. Tug's lines usually used no extra charge. Up to 2,000 h.p. available.

SPECIALISED CARGO HANDLING FACILITIES:
Container Berth: Okitsu Wharf No. 11/12, depth 12 m. length 440 m. (2 berths), Gantry cranes Capacity 30.5 ton and 30 ton.
Grain Berth: Fujimi Wharf No. 5, depth 11 m. length 185 m. 2 suckers. Honen Dolphin, depth 12 m., 3 suckers.
Wood Chip Berth: Fujimi Wharf No. 3/4, depth 9m. length 330 m., 3 unloaders. Sodeshi Wharf No. 16, depth 10–12 m. length 330 m., 2 unloaders.
Bauxite Berth: Nihon Keikinzoku Wharf, depth 11 m. length 276 m. 2 unloaders.
TANKERS: Toa Nenryo Kogyo Co. Ltd. operate a sea-berth suitable for tankers up to 250,000 d.w.t. in depth of 22 m. at low water. Honen Dolphin 11 m. deep.
DEVELOPMENTS: Sodeshi Wharf construction to be completed end 1980. New facilities will include 4 berths for vessels of 30,000 tons, water depth 12.0 m. 5 berths for vessels of 5,000 tons, depth 7.5 m. These facilities are specially for container vessels. 3 gantry cranes and other facilities are also under construction.
STEVEDORES: Enable Agents order gangs important obtain accurate ETA in good time. Latest time to order gangs 1600 hrs. previous day. Gang shifts: Normal and deferred shift 0830 hrs. every day. Night shift 1700 hrs. every day except last Sunday in month. Any request for attendance preceding 0830 hrs. non-acceptable.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required.
DENSITY: 1023–1024.
FRESH WATER: Most berths supply by shore installations, otherwise barge.
FUEL: All grades of oil delivered by barge only.
FIRE PRECAUTIONS: Harbour fire-fighting corps with a fire-fighting boat.
GANGWAY/DECK WATCHMEN: Available for gangway, hold, checking hawsers, bridge, telephone, etc.
OPENING/CLOSING HATCHES: On liners normally by stevedores with assistance of crews, otherwise according Charter Party.
CERTIFICATES: Ship Registry, Radio and Safety equipment Certificate, Derating Exemption Certificate, etc.
CUSTOMS ALLOWANCES: Tobacco: 50 packets permitted per each crew per day. Wine six bottles per crew member.
IDENTIFICATION CARDS: Passport or Seaman's Book.
CONSULS: None.
REPAIRS: Most repairs and overhauls possible.
DRY DOCKS: NKK Shimizu yard (largest dock 210×24.6 m.).
AIRPORT: 180 km. distant from Haneda International Airport.
TIME: GMT plus 9 hrs. Permanent.
HOLIDAYS: No work on from December 31 to January 3 and Shimizu Port Festival Day (Aug. 5).
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119; Water Police (52) 0200.
TELEPHONE: Available on board.
SHORE LEAVE: Normally allowed.
AUTHORITY: Shimizu Port Administration Office.
AGENT: Sub-Agent of Dodwell & Co. Ltd. Suzuyo & Co., Ltd. 12, 3-chome Irifune-cho, Shimizu-shi, Shizuoka-ken. Cable Address: Suzuyo Shimizu. Domestic Telex: 3965-671, 672, 677 Suzuyo Smz. Tel.: Shimizu (0543) 53-3111/3914 and 52-1398.

SHIMONOSEKI (including Mutsure): 33.57 N. 130.58 E. (See Kanmon-Ko) **(See Plan)**

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Moji".
ANCHORAGE: Nishiyama anchorage located off Hikoshima Island, on Western end of Honshu Island. Max. draft 9.5 m. capacity 10,000×2.
Mutsure anchorage: undermentioned area is open port. The sea area surrounded by:
(a) Line connecting Daibahana on Takenoko Island and top of Wagora Island.
(b) Line connecting top of Wagora Island and Udonohama on Mutsure Island.
(c) Coastline between Udonohama and Unoishibana on Mutsure Island.
(d) Line connecting Unoishibana and Anse-no-Shiri in Shimonoseki.
(e) Line connecting Anse-no-Shiri and point at 370 m. from Daibahana on the line connecting Daibahana and top of Wagora Island.
(f) Line Long. 130° 54′ E.
Anchorage includes a part of quarantine anchorage and Mutsure oil berth; depth 10-25 m.
RESTRICTIONS: See "Moji".
MAX. SIZE:

Wharf		*Length*	*Depth*	*Capacity (g/t)*
Western wharf	(Nos. 3–4)	340 m.	6.5 m.	15,000×1
Daiichi Pier	(Nos. 9–10)	330 m.	8.5 m.	24,000×1
	(Nos. 12)	330 m.	8.0 m.	13,000×1
Daini Pier	(Nos. 15–16)	340 m.	8.5 m.	15,000×1
	(Nos. 17)	210 m.	9.1 m.	25,000×1

For tank installations, see "Tankers".
PRATIQUE: See "Moji".
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to Choshi and North bound to Nagasaki Radio respectively.
VHF: See "Yawata".
TUGS: See "Moji".
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
BRIDGES: No bridges at present, but construction begun on suspension bridge, across Kanmon Strait.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
TANKERS: Shell oil berth situated at Hikoshima, on Southwestern end of Honshu, facing Moji across Kanmon Strait. In vicinity of berth, flood tide sets to East, ebb tide to West, current about 5-6 knots. Mooring berth consists of four buoys, approximately 140 m. offshore, space between buoys being approx. 270 m.
Max. dimensions of vessel which can be safely accommodated are 18,000 d.w.t., length OA 170 m., breadth unlimited, draft 9 m. Product handled, fuel oil. Shoreline 1×8 in. Discharge rate 500 t.p.h.
Vessels only berthed or unberthed when tide sets to West during daytime only. In approaching berth, as vessel comes against tide, full engine power and tug assistance required. One 10 in. pipe connected to vessel; discharge efficiency per hour 500-600 kl.
Nissin Tanker Pier located about 610 m. South of Mutsure lighthouse. At this berth, West-going current stronger than East-going and ship taken to berth only on Westerly current, with stern towards South. Most suitable berthing time is 2-3 hrs. after commencement of West-going current. Max. dimension of vessel which can be accommodated at this berth is 100,000 d.w.t., LOA 250 m., draft 11 m. Product handled, fuel oil. Shoreline 2×8 in. Discharge rate 1,500 t.p.h.
DENSITY: 1025.
FRESH WATER: Good fresh water supplied either from water barge or from hydrants alongside wharves. Rate of delivery from water barge 50 t.p.h. and from hydrants 40-50 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. seven days prior notice. Also see "Moji, Fuel".
DEVELOPMENTS: At present, No. 18 wharf, mostly reclaimed land, used for ferry boat service linking Shimonoseki to Pusan, which opened service June 1970. After completion of reclamation, further 3 berths (Nos. 19, 20 & 21) will be equipped for larger vessels, where maximum draft planned 10 m.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
CARGO GEAR: See "Certificates", but no special requirements.

CONSULS: Korean Consul, Tel. (66) 5341.
REPAIRS: All types of repairs possible.
DRY DOCKS: Mitsubishi Heavy Industries Ltd. four dockyards (Nos. 3 & 4 for smaller vessels).
Hayashikane Shipbuilding K.K. three dockyards (Max. 1,100 g.t.).
Towa Shipbuilding K.K. one dockyard (Max. 1,000 g.t.).
Mitsubishi Heavy Industries Ltd.
Dimensions of dock

	Length metres	*Breadth metres*	*Draft metres*
No. 1 Dock	164.13	25.0	7.04
No. 2 Dock	150.10	20.0	6.88

Max. size of vessel for docking

	Length metres	*Breadth metres*	*Draft metres*
No. 1 Dock	160.00	22.50	5.50
No. 2 Dock	143.00	19.30	5.00

REPATRIATION: Possible.
AIRPORT: Approx. 80 km. to Fukuoka airport; about 1.5 hrs. by train. Approx. 18 km. to Kitakyushu airport; 40 minutes by taxi.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police station 110; Ambulance/Fire Station 119.
TELEPHONE: Possible to place telephone on board.
SERVICES: All services available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port and Harbour Bureau.
AGENTS: See "Moji".

SHIMOTSU (including Kainan): 34.06 N. 135.08 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot request to be given to pilot station through Agent. Advance notice of ETA: 72 hours and 24 hours before arrival. No VHF available. Pilot usually attends by tug boat. No special pilot boat. Pilot boards 34° 07′ 25″ N. and 135° 06′ 45″ E. No alternative area in event of bad weather. Location of anchorage for awaiting pilot – 34° 07′ 25″ N. and 135° 06′ 45″ E., as pilot station.
ANCHORAGES: Quarantine anchorage, 20 metres depth.
RESTRICTIONS: Entry daytime only.
Yura Bay: Vessels no longer than 110 metres berth. Daytime entrance only regardless of tide and current.
MAX. SIZE:

	Max. d.w.t.	*Length*	*Draft*
Tonen O-1	200,000	No limit	20.00 m.
Tonen E-1	70,000	No limit	13.00 m.
Maruzen Buoy Berth	35,000	230 m.	10.00 m.
Maruzen Jetty 5	56,000	250 m.	11.60 m.
Fuji Kosan Jetty 9 (Kainan)	70,000	250 m.	12.50 m.

Also see "Tankers".
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique:
A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.
If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound, to Choshi, and Northbound, to Nagasaki Radio respectively.
TUGS: Tugs join at Quarantine anchorage, tug lines used.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.
MEDICAL: No advance notice required unless urgent.
TANKERS: There are no slop facilities.

DENSITY: Average density 1012.
FRESH WATER: Available at every berth by shore lines, rate about 25 metric tons per hour.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice. Some grades available in Shimotsu/Kainan subject to enquiry.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Only minor deck and engine repairs.
DRY DOCKS:
Yura Dockyard: Mitsui Shipping & Engineering Co. Ltd. have constructed a 350,000 d.w.t. new dockyard in Yura, 50 nautical miles South of Kobe 33° 57′ 30″ N. 135° 07′ 00″ E. Vessels calling at Yura port are requested to note the following information:
Tonnage dues should be paid at Wakayama since Yura is closed port.
Dock Master boards at position 280 degrees 2,000 metres from Arijima lighthouse for entering Yura and Pilot is not required.
Vessel is requested to wait at Wakayama Anchorage if dry dock or wet basin is not available.
Vessel is requested to call at Shimotsu for free pratique if necessary.
REPATRIATION: Possible.
AIRPORT: Osaka International Airport.
TIME: GMT plus 9 hrs. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 110 and Ambulance/Fire 119 (in case of emergency).
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENTS: See "Kainan".

SHIOGAMA: 38.20 N. 141.03 E.

Tohoku Oil Co. Refinery Terminal, Sendai.
DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including passport numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Personal Effects.
Agent should be provided with necessary information to prepare Inward/Outward Declarations and Cargo Manifests.
PILOTAGE: Not compulsory but can be arranged at request of Master. Pilot not available after dark. Pilot boards at Fairway Buoy "A", position 38° 13′ 15″ N. 141° 08′ 15″ E.
ANCHORAGE: Depth: 28 m. Bottom: Rock and sand. Anchorage not suitable in rough weather and as no sheltered anchorage nearby it is advisable for vessels to proceed offshore.
RESTRICTIONS: *For vessels entry into and sailing from Sendai:* Priority of entry and sailing from the port is given to ferries. Entry and sailing of other vessels is restricted to times outside ferry schedules. Entry of tankers controlled by Tohoku Oil Refinery Co. Ltd. under supervision of Harbour Master.
Depth of water in channel 28 m. length 7 miles, width 300 m.
MAX. SIZE: Max. d.w.t. 75,000. Max. LOA 350 m. Max. safe draft 16.20 m.
HEALTH: There is no quarantine anchorage at Sendai at present, vessels proceeding to Sendai must obtain free pratique at either quarantine anchorage Shiogama, position 38° 18′ 12″ N. 141° 08′ 48″ E. and/or 38° 16′ 07″ N. 141° 13′ 05″ E. (for vessels over 30,000 d.w.t.).
At first port of call in Japan vessel must obtain free pratique. Quarantine Officers attend only from daylight to sunset. Master required to produce all vaccination cards and Derat Exemption Certificate.
If vessel arriving from cholera-infected area within ten days, Master must report crew and passengers' health condition to respective Quarantine office through Agent prior to arrival, and close all soil pipes before entering port.
RADIO: Choshi Radio or Nagasaki Radio.
BERTHING: *Tohoku Oil LPG Pier:* Vapour Line: 1 × 8 in., Liquid line connection (Propane) 2 × 12 in., Butane 1 × 12 in., Depth alongside 17.0 m.

Public Wharves: One Pier length 250 m., depth 12.0 m. One Pier, length 925 m., depth 10 m.
Azuma Seiko Private Wharf: One pier length 275 m. depth 12 m. One pier length 200 m. depth 10 m. Shore cranes, 2 × 15 tons. Cargo handled, steel scrap and wire rods.
TANKER BERTH: Dolphin berth situated in 17 m. depth of water. Length between dolphins, 125 m.
Vessel discharges through two 16 in. Chiksan loading arms each capable of receiving 4,000 t.p.h. Also 1×8″ Chiksan loading arm for Bunker.
There are no facilities for dirty ballast.
Storage capacity:
Crude Oil: 102,000 K/L × 5
55,000 K/L × 1
Fuel Oil: 31,000 × 5
Position of Oil Pier: 38° 16′ 18″ N. 141° 02′ 06″ E.
FRESH WATER: Supplied by shore line at 40 t.p.h.
FUEL: Nearest bunker stock port Tokyo Bay. Lightered subject to 7 days' prior notice. Local supply may be possible.
TIME: GMT plus 9 hours. No alterations during the year.
DEVELOPMENTS: 15 public wharves under construction to accommodate vessels of 15,000 – 40,000 d.w.t. for discharging and loading of general and bulk cargoes. Depth alongside 10 – 12 m.
AUTHORITY: Port Administration Office.
AGENT: Abeki Shokai, (Higashi-Shiogama Eki Mae) 9-10, 4-chome Kitahama Shiogama-shi, Miyagi-ken. Cable Address: "Abe Sendai" Domestic Telex: 8592-86 Abesen J Tel.: 02236–5–0785.

TAGONOURAKO: 35.08 N. 138.42 E.

SHIPMASTERS REPORT: JULY 1975
PORT LIMITS: Commences 5 cables from the harbour entrance. A vessel is considered an "arrived ship" at this point.
DOCUMENTS: As for "Shimizu".
PILOTAGE: Ordered 24 hours in advance through Agents. If possible vessels should obtain Japanese Chart 1075 for the approaches and Japanese Harbour Plan No. (P) 98. Two fixed green leading lights visible 13 miles lead the ship through the entrance on a bearing of 323.5° True. Vessels should approach on this transit until 1 mile off the breakwater entrance which is marked by an occ. G. 6 second 12 mile light on the West breakwater and a occ. R. 6 second 13 mile light on the East breakwater. The Pilot will board from a tug 1 mile from the entrance. 2 tugs will attend for the entrance transit.
ANCHORAGE: Due to the steep nature of the coast no roadstead anchorages are available. In the event of having to wait for Pilot or weather to moderate it is necessary to steam outside the entrance.
RESTRICTIONS: The allowable draft should be verified with the Agents before arrival as this does vary, the average being 6.5 m. alongside the berth. The entrance channel has a minimum depth of 9 m. at all times.
MAX. SIZE: LOA 600 ft., beam 100 ft. These extremes are likely to be increased as the port develops.
PRATIQUE: Radio pratique is available if vessel holds a valid Japanese Sanitary Inspection Certificate, if not then quarantine will be cleared at Shimizu.
RADIO: Chosi radio. When nearing Shimizu a call can be made via Shimizu Radio VHF requesting them to telephone ETA to Tagonoura Pilot.
TUGS: 2 tugs normally required. These are ordered from Shimizu in advance by Tagonoura Agents. The same applies on departure.
BERTHING: The harbour is still under construction. Approximately 5,000 ft. of berthage is presently available with depths between 5 and 9 m. however, vessels exceeding 150 m. in length are restricted to 6.5 m. maximum.
SPECIALISED CARGO FACILITIES: Tagonoura handles bulk phosphates, etc. Also liquid chemical carriers and tankers.
BRIDGES: None.
STEVEDORES: Private arrangements.
MEDICAL: Hospital and immediate services available.
TANKERS: Specific details unknown.
DENSITY: 1021
FRESH WATER: Unlimited. Available on the berth, rate less than 15 t.p.h. cost Yen 100 per ton.
FUEL: All grades and lubricants available from Chiba and Toyko.
REPAIRS: Minor repairs only available.
DRYDOCK: None.
SURVEYORS: Available at short notice from Shimizu, all societies.
GANGWAY/DECK WATCHMEN: Available but not necessary.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: As per "Shimizu".
CARGO GEAR: Ship's gear.
REPATRIATION: Possible. Frequent train services to Toyko.
AIRPORT: Haneda, Toyko.
TIME: J.S.T. GMT plus 9 hours throughout.
TELEPHONES: Available on the wharf only.
SERVICES: All services available at short notice from Shimizu or Toyko.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: 3 day passes issued, extended if necessary.
GENERAL: Vessel called 26th June to 2nd July discharged 10,000 tons phosphate rock.
DEVELOPMENTS: Deepening of the harbour and further berth development is in progress.
AUTHORITY: Tagonoura Port Administration.

TANABE: 33.44 N. 135.21 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but if required Agent to be advised 72 hours prior arrival. No pilotage sunset to sunrise. Anchorage waiting for Pilot 33° 42′ N.; 135° 19′ E. Pilot station 2,200 m. 315° from Banshono-hana lighthouse. Depth, 38 m.
ANCHORAGE: Waiting anchorage, 1,900 m. 40° from Banshono-hana lighthouse. Depth, 19 m. Bottom, sand and mud.
RESTRICTIONS: Max. draft, 9.5 m. (31ft.), high tide. Usual draft, under 8.5 m. (28 ft.).
HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards and Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: If required, ordered from Wakayama subject three days advance notice. Tug's line used, no extra charge.
BERTHING: Two buoy-berths, depth 10 m. and 7.5 m.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700-1900 hrs. (50% additional of basic stevedorage), 2100-0500 hrs. next morning (130% additional). Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
DENSITY: About 1.03.
TIDE: Tidal range. Maximum plus 2.13 m. Minimum minus 0.21 m.
FRESH WATER: Available by water-barge, capacity 30 tons. Daytime delivery only to buoy berths. 48 hours notice required.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
AIRPORT: Shirahama Airport about 25 km. distant. Domestic flights only, daily to Tokyo, Osaka, and Nagoya.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tanabe police office, tel. 0739-22-1226; Ambulance, Chu-o Hospital, tel. 0739-22-8383; Fire department, tel. 0739-22-0931.
SERVICES: None available locally but obtainable from Osaka.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Port Administration Office.
AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Shimamoto Kaiun K.K., 193 Kamiyashiki, Tanabe-shi, Wakayama-ken. Tel. Tanabe (0739) 24-2424. Telegraphic, Shimamoto Tanabe. Telex 5562-103.

TOBATA: 33.55 N. 130.51 E.

(See Kanmon-Ko).

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: See "Yawata".
ANCHORAGES: No. 5 Section, Wakamatsu. Depth: 9–11 m. Capacity (g/t) 15,000×2. Quarantine anchorages also used when necessary.
WIND/TIDE: South-easterly winds prevail in the warm seasons and North-westerly winds in the Winter season. The maximum velocity recorded in the past being 18 m./sec. The tidal range is 2.145 m. The current at the channel leading to new port runs Southward at the flood and Northward at the ebb. The maximum speed of the current is about 3 knots. There is no current in the dock.
RESTRICTIONS:
(a) Vessels exceeding 20,000 tons gross may berth only within one hour before and/or after slack tide. Vessel's under 20,000 tons gross may berth regardless of current, if it does not exceed 5 knots.
(b) Night entry: Vessels under 10,000 gross tons may berth at Nos. 1, 2, 3 and 8 wharves until 2200 hrs. in Summer season and 2100 hrs. in Winter season, subject to Harbour Master's permission and Pilot's agreement.
(c) Night departure: Vessels under 20,000 gross tons allowed to sail from Nos. 1, 2, 3, 8 wharves and Nos. "A", "B", "C" buoys until 2200 hrs., regardless of current, provided they are moored with bow outward.
(d) Least depth in channel, 14.0 m.
MAX. SIZE:

(a)	*Wharf*	*Length* (m.)	*LOA* (m.)	*Depth* (m.)
	1	200	180	11.0
	2	200	180	12.0
	3	250	220	13.0
	4			17.0
	8	316	250	12.0
	9	280	170	10.0
	Uchiura No. 5	221	175	8.5
	Shoko wharf	165	150	8.5

(b)	*Buoy*	*Ship's LOA* (m.)	*Depth* (m.)
	A	180	12.5
	B	200	12.5
	C	180	12.5

PRATIQUE: See "Moji".
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Two tugs join vessel at entrance of harbour (in front of harbour signal station). Vessels exceeding 20,000 tons gross require 3 tugs. One of them will join vessel at Mutsure leading into main harbour and 2 join vessel at entrance of port (in front of harbour signal station).
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. See "Max. Size".
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: Kinjyo Hospital, Yawata; Shimada Surgical Hospital, Yawata. No advance notice required unless urgent.
DENSITY: Average density in the port is about 1019–1021 in Summer season, 1025–1026 in Winter season.
FRESH WATER: Available in connecting lines from shore side at wharves Nos. 1, 2, 3, 8, 9. No. of hydrant 5 4 5 5 5. At buoys: from barges, arranged from Wakamatsu. Rate of delivery: 55–70 t.p.h., ex-hydrant, 60 t.p.h., barge. Overtime (0500–0800 hrs.) (1700–2200 hrs.), 50% add.; (2200–0500 hrs.), 100% add.; bad weather, 50% add.; Sundays and holidays, 50% add.; minimum quantity at Tobata, 30 tons; minimum quantity at Mutsure, 50 tons.
FUEL: Available ex-barge. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No tanker berth. Each tugboat equipped with fire extinguishing system for attending emergencies on request.
DEVELOPMENTS: No. 4 Wharf completed. Depth of water about 17 m., but also 2nd plan for 19 m. Berthing capacity, over 150,000 d.w.t.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Yawata".
REPAIRS: All types of deck and engine repairs possible afloat.
DRY DOCK: No dry dock.
REPATRIATION: Possible.
AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Tobata Police Office, tel. 093–87–4321; Wakamatsu Water Police, Tobata Branch, tel. 093–87–1561; Ambulance/Fire: Tobata Fire Department, tel. 093–87–2621.
TELEPHONES: See "Yawata".
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kitakyushuko Kanti-Kumiai.
AGENTS: Sub-agents of Dodwell & Co. Tokyo. Holme Ringer & Co. Ltd., 2nd Floor, Service Center Bldg., Outside West Gate, Tobata Works, Nippon Steel Corp., Kawashiro-cho, Tobata-ku, Kitakyushu-shi. Cable Address: Ringer Tobata. Domestic Telex: Ringer Kik 7145–75. Tel.: (093) 861–02212, 871–1561 (Ext. 5678).

TOKUYAMA: 33.59 N. 131.45 E.

Port situated in Yamaguchi Prefecture on Western part of mainland, facing Seto Inland Sea. Surrounded by Oshima peninsula on the East, by Otsu-Shima and Uma-Shima (islands) on the S.W. and by the land on the North Forms a grand bay with deep water suitable for shelter. Sen-Shima and Kurokami-Shima (islands) lying in harbour, divide it into Tokuyama section and Tonda section.
DOCUMENTS:
(a) Customs. When vessel arrives direct from foreign port, Customs officials will board her for search. The following documents are to be submitted:
Crew List.
Passenger List.
Store List.
Manifest of Crew Personal Effects (must be signed by individual crew member).
Arms and Ammunition List.
Narcotics List.
List of Ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward (Form No. 02000).
The following will be checked on board: Ship's Registry, Last Port Clearance. When vessel comes from Japanese port, Customs officials will not attend on board, except special case. Master or Agent are to attend at Custom House for entry formalities with the following documents:
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration Inward/Outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with Master by Customs at previous port.
On vessel's departure a clearance is issued by Customs, after confirming payment of tonnage dues. Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
(b) Immigration. Immigration officials attend from Tokuyama. They board vessel on arrival to examine passports, discharge books and/or other equivalent travel documents, and provide 72-hr. landing passes for crew members and passengers. One copy each of Crew List and Passenger List are required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hrs., the landing passes will be extended every 72 hrs. on application. In event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hrs.) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within five days.
PILOTAGE:
Inland Sea Pilot (Sekisaki/Tokuyama): Not compulsory. Agent gives 24 hrs. notice to Pilot Association Moji, and advice if ETA changed. (Master to cable "Anjin Moji" in case ETA changed and believes that his advice, if relayed by Agent, will not reach in good time; for example, at night before date of arrival at Sekisaki). Location: 3 miles South of Sekisaki lighthouse (33° 13′ N., 131° 54′ E.). Pilot boards on vessel's arrival at pilot station day and night. No alternative area in event of bad weather. No VHF.
Harbour Pilot (Tokuyama Harbour or Tokuyama-wan): Not compulsory. Pilot boards in Tokuyama-wan at quarantine anchorage, or other anchorage to pilot to berth. Master who has not taken Pilot at Sekisaki should enter harbour without Pilot (no pilot station at entrance). Master to inquire position for anchoring from Agent prior arrival. Agent will advise Master in consideration of vessel's size, draft or nos. Of other vessels, especially supertankers in port.

ANCHORAGE: Quarantine anchorage, 34° 01′ N. 131° 46′ E., depth water 36 ft. Deeper water of more than 60 ft. about two miles S.W. of quarantine anchorage where quarantine board supertankers. If harbour congested, vessels, especially supertankers, anchor outer harbour. In this case quarantine go to outer harbour if advised by Master or Agent. In emergency or unable contact Agent, vessel can talk with Harbour Master by VHF, Channel 16, calling "Tokuyama Hoan". No restriction for entry into and/or departure from the anchorages after nightfall.

MAX. SIZE: Biggest recorded vessel to enter, 215,000 d.w.t., 64 ft. draft.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA (m)*	*Max. Safe Draft (m)*
Idemitsu Kosan Sea berth	No limit	No limit	19.50
Idemitsu Kosan Ohura No. 3 Jetty	50,000	250	12.00
Idemitsu Kosan Ohura No. 4 Jetty	50,000	250	12.00
Idemitsu Kosan	70,000	300	12.00
Idemitsu Kosan Centre Pier	35,000	220	11.00
Nippon Seiro Nishigamori Jetty	18,000	180	11.00

HEALTH: Radio Agent for free pratique not less than 12 hrs. and not more than 36 hrs. before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If crew or passengers on board do not possess Valid Smallpox Vaccination Certificates.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Join inside harbour. For supertankers outer harbour if requested. Tugs' lines used. Eight tugs available, up to 4000 h.p.

BERTHING: Also see "Tankers". No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

(a) Wharf	*Length (m.)*	*Depth (m.)*	*Capacity (g/t)*	*Cargo*

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

Loading/Unloading facilities

(a) Gangs: Maximum 20 gangs are available.

Classification	*Regular Employees*	*Temporary labourers*
Stevedores	160	180
Longshoremen	80	60

Tokuyama Kairiku Unso Kabushiki Kaisha; Kamigumi & Co. Ltd.; Toyo Koun Co. Ltd.; Sankyu Transportation & Engineering Co., Ltd.

(b) Lighters: No lighter is available, but semi-motor schooners are arrangeable in case of need.

(c) Shore crane: None.

(d) Floating crane: No. 1. Capacity, 100 tons. Owners, Maruike Kaiun (from Kudamatsu).

(e) Average performance of loading/unloading: Loading: Cement in bags, 55–65 t.p.h./gang; Soda ash in bags, 40–50 t.p.h./gang; Fertilisers in bags, 55–65 t.p.h./gang. Discharging: Salt in bulk, 65–75 t.p.h./gang.

Working hours: One labour shift. Normal working hours: 0800 to 1700 hrs. Overtime is possible by applying to Customs. No work can be arranged for during New Year holidays (1st to 3rd January).

MEDICAL: No advance notice required unless urgent. Hospital: Asanoumi Hospital, Asami Hospital, Ono Dental Plant.

TANKERS: No slop facilities.

Idemitsu Sea berth: is located in Tokuyama Bay at the position of 33° 59.5′ N., 131° 46.1′ E., consisting of seven mooring buoys. 130,000 d.w.t. tanker can be accommodated at this berth, being moored to buoys fore and aft. Four powerful tug boats and two line boats are engaged in berthing/unberthing. The depth of water is 20 m.

Nippon Seiro Refinery: The mooring berth consists of one oil pier and two mooring buoys, to which vessel is moored fore and aft, keeping about 15 m. off the pier. The depth of water is 12 m.

Nippon Geon Wharf (25 ft.) (for LPG).

DENSITY: Salt. 1025.

FRESH WATER: Water barges available, one each of 450 tons, 350 tons and 160 tons. Hydrants at Idemitsu Central pier, Toyo Soda wharf. The rate of delivery: 50 t.p.h. from barge, 20 t.p.h. from hydrant.

FUEL: Ex-barge. Delivery rate 80–100 t.p.h. All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice. Bunkering alongside Refinery berths not permitted.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: Kasado Dockyard in Kudamatsu-wan, entrance three miles E. of Tokuyama-wan entrance. Largest dry dock for 50,000 tonners and four other dry docks/building docks.

AIRPORT: Hiroshima (about 2.5 hrs. by taxi/train), Ube (2 hrs. by taxi/train) two flights a day.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance and Fire, tel. 119.

TELEPHONES: No facilities for placing on board.

SERVICES: From Moji, Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., c/o Sankyu Transportation & Engineering Co. Ltd., Shunan Branch, 12–7 Chikko-cho, Tokuyama-shi, Yamaguchi-ken. Cable adress: "Ringer Tokuyama". Domestic Telex: 6765–93 Sankyu J. Tel.: Tokuyama (0834) 22–0039.

TOKYO: 35.43 N. 139.45 E. (See Plan)

DOCUMENTS:

3 copies Inward/Outward Declaration – (Form C.2000).
1 copy Berth Application (normally prepared by Agent).
1 Cargo Manifest (Form C.2030).
1 List Ship's Stores (Form C.2060).
1 Parcel List.
1 Passenger Manifest (Form C.2070).
1 Crew Manifest (Form C.2080).
1 Statement by Master (Form C.2020).
1 Declaration for Payment Tonnage Dues.
1 Maritime Declaration of Health.
1 Application for Shore Passes.

PILOTAGE: 12 hrs. advance notice of ETA required. Pilot boats named Musashi, Takao, Tsukuba and Asuka. No light or sound signals, use ship's radio in case necessity arises. Address: Tokyo

Pilot Union, 3-26-82 Kaigan, Minato-ku, Tokyo (at the Southern tip of the Shibaura Wharf). Tel. (453) 1691.

Pilot boards vessel outside harbour. Vessel awaits Pilot around "Quarantine Anchorage".

Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka advising ship's details and arriving time at No. 1 Uraga Channel light buoy. Uraga Channel Pilot embarks three/five miles S.S.E. of Kannonsaki lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hrs. before vessels arrival at No. 1 Uraga Channel light buoy.

ADVANCE APPLICATIONS: Passenger ships and large vessels using mooring facilities must submit applications for use of facilities to port managers (the Port and Harbour Bureau of Tokyo Metropolitan Government) through shipping firms or Agents 24 hrs. before entry into port so that they may have berths designated.

When they want to use anchorage facilities, they must submit applications for use of anchorage areas to Tokyo-Yokohama Port Director (the Port and Harbour Section of the Tokyo Maritime Safety Agency) to have anchorage sites designated. Small vessels of less than 300 gross tons do not need to submit anchorage application.

When ships of over 500 gross tons want to enter port at night (from sunset to sunrise), must submit applications in advance to Port Director and receive permission. Copy of written permission given to captain of ship when ship has entered port.

A ship carrying explosives or any other dangerous cargo must submit two copies of application in advance for permission to use port to Port Director. Such ships required to stay outside port in No. 3 Area. However, they will be allowed to enter port when Port Director considers it allowable.

RESTRICTIONS: No. 1 fairway is long and narrow (4,200 m. × 300 m.) and carries considerable traffic. Vessels under 500 tons not permitted use fairway when vessel over 5,000 tons is in transit. Depth in channel 12 m.

DEPARTURE PROCEDURE: Ship over 300 tons departing must hoist signal in daytime and two white lamps at night and make two prolonged blasts of whistles or siren 30 minutes before starts to move and then act according to signals given by signal station on Shibaura Quay. Departure notice must be submitted to Maritime Safety Agency and port managers (Operations Section of Port and Harbour Bureau). Foreign ships must submit required documents in addition to above notice to Tokyo Custom House, Immigration Control Office and Tokyo Medical Inspection Station to receive permission from these quarters.

ANCHORAGES: See "Advance Applications".

Quarantine anchorage on starboard hand of No. 1 fairway.

Sector A triangular sea area formed by line passing through point 180° and 400 m. from light buoy No. 16 and point 105° and 240 m. from same light buoy. Accommodates one 1,000 ton class ship or two ships of 500 ton class or smaller.

Sector B circular area with radius 120 m. from point 295° and 380 m. from tide signal post of No. 3 Daiba. Accommodates one 1,000 ton class ship.

Sector C (263,330 sq.m.) is a space between Harumi Wharf and Toyosu Wharf. Accommodates five 2,000 ton class vessels.

Sector D (141,350 sq.m.) sea area enclosed by line drawn from point 217° and 400 m. from Northwestern tip of Tsukishima Fishery Base through No. 8 mooring buoy. No. 15 buoy and Southern tip of Tsukishima Fishery Base. Accommodates five vessels smaller than 1,000 tons, but two if vessels larger than 700 tons.

MAX. SIZE: (Draft). Bulk carrier, 9.3 m. or less; general cargo, 9.3 m. or less. (Quay and Pier capacity). Passenger vessels up to 20,000 gross tons or cargo vessels up to 15,000 d.w.t. ,

(Tide). Vessels of said size will not be affected by tide. Largest vessels to enter: bulk carrier, 19,947 d.w.t.; general cargo vessel, 19,599 d.w.t.

Tankers: One berth, Tokyo Gas Wharf. Max. d.w.t. 25,000. Max. LOA, 205 m. Max. safe draft 9.70 m.

PRATIQUE: Radio Agent for free pratique not less than 12 hrs. and not more than 36 hrs. before arrival, advising full details of vessel and health condition on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.

Crew List.

Passenger List.

The following vessels will not be able to get radio pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or suspected case, of infectious disease within 15 days of arrival.

If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Medical inspection of plants: When a report is received in advance from a ship by telegraph or other means of communication, Tokyo Office of the Yokohama Plant Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of plant in question.

Medical inspection of animals: When a report is received from a ship in advance by telegraph or other means of communication, the Tokyo Branch or the Haneda Branch of Animal Disease Prevention Station must be notified by telephone or verbally in request for an on-the-spot inspection of the animals.

RADIO: Vessels entering are watched at all times at Torigasaki, the entrance gate to Tokyo Bay, and record of passing the point is taken. As each ship passes point, this is immediately communicated by VHF radio telephone to head office of Tokyo Signal Communications Company. From here news communicated on normal telephone or on exclusive direct call telephone to interested parties (also see "VHF").

Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF:

A. Transmitting antenna:	Located 39° 26′ N. 139° 39′ E.
B. Type:	Single communication – Yagi type. Plural communication – corner reflector type.
C. Direction:	Southern part of entrance to Tokyo Bay and Port of Tokyo.
D. Frequency class:	F3.
E. Frequency:	Single communication – 156.6 mc/s., CH 12 156.7 mc/s., CH 14 156.8 mc/s., CH 16 (for calling, answering and safety) Plural communications – 161.6 mc/s., CH 20 161.7 mc/s., CH 22
F. Antenna power:	50 W.
G. Call sign:	Tokyo Port Radio.
H. Range:	Approx. 1,000 km (straight range) S.E. side – About 20 nautical miles South of Mojimazaki. S.W. side – About five nautical miles North of Oshima Island. North side – Tokyo Port and Chiba port.
I. Operating time:	All times.

Ship telephone: Uses VHF and is a service between navigating or anchored ships and subscriber telephones on land, and between ships connected via base station on land. Communicating sphere approximately 50 to 100 km. from base station. Base stations located so as to allow communication with any ship sailing along Japanese coasts.

Charges for device: Y1,000 for one telephone set and actual cost for use by ship.

Service charges: (in case Japan Telegraph and Telephone Public Corporation installed the unit) Y22,000 a month for long term, Y1,100 a day for short term.

Call charges: Within specified call area for ship telephone in general – Y90 up to 3 minutes and additional Y30 per minute after the 3 minutes.

TUGS: The port has two tug companies: (i) Toko Service Co. Ltd., 3-25-8, Kaigan, Minato-ku, Tokyo. Tel. (452) 4781. (ii) Shibaura Tsusen Co. Ltd., 3-1-3, Kaigan, Minato-ku, Tokyo. Tel. (451) 3871. Upon notification to either, tugs will be waiting in neighbourhood of scheduled berth. Ship's lines to be used.

BERTHING: Any vessel entering port required to:

(1) Submit one each of "Declarations Inward/Outward of Vessels" to TMG and TMSA. See "Documents". (2) Submit "Application for Berth" to TMG. See "Documents". (3) Submit "Application for Designation of Anchoring Site" to TMSA (Form No. 13) regarding anchoring area. Berthing will be in order of arrival, passenger and special cargo vessels excepted.

Name of Wharf	*Length* (m.)	*Depth* (m.)	*No. of Berths*
Shinagawa	1,143	10.0	6
Shinagawa	476	8.0	3
Shibaura	910	7.8	6
Hinode	564	6.7	6
Takeshiba	103	6.7	1
Takeshiba	206	6.7	2
Harumi	Dolphin-3 (24 m.)	9.0	1
Harumi	132	9.5	1
Harumi	132	10.0	1
Harumi	797	9.0	5
Harumi	190	10.0	1
Harumi	456	10.0	2
Toyosu	140	7.0	1
Toyosu	210	7.0	1
Toyosu	200	7.5	1
Toyosu	Dolphin-7 (250 m.)	10.0	1
Oi Marine Products Wharf	450	12.0	2
Land Lot No.15	400	10.0	2
Keihin Port Development	500	12.0	2
Oi Wharf	1,800	12.0	6
Liner Wharf Reclaimed Land	1,800	10.0	9

There are many private wharves and other smaller public wharves in use and under construction.

BULK HANDLING FACILITIES: Containers handled at 2 berths at Shinagawa Wharf equipped with gantry cranes lifting capacity 30 tons and 37.5 tons.

There are also 8 container berths at Oi Wharf equipped with 16 gantry cranes of 30.5 tons capacity.

STEVEDORES: Advance advices should be made 24 hours at latest before vessel's arrival order arrange necessary gangs.

Discharge rates (approx.):

(a) Iron, steel and scrap, using crane or magnet, about 1,000 tons/day.

(b) Coal, crane and bucket, 1,500/2,000 tons/day.

(c) Ores, grabs and bulldozers, 1,000 tons/day.

(d) Timber, 1,000 tons/day.

(e) Grain, crane with bucket or suction, 1,000 tons/day.

MEDICAL: Hospitals, clinics and all specified facilities. Advance notice not necessary.

TANKERS: No slop discharge facilities (but see "Services"). One tanker berth only. Products handled, Naphtha and Crude oil. Shorelines, one 12 in. for each product. Discharge rates 1,000 t.p.h. (Naphtha) 900-1,000 t.p.h. (Crude).

FRESH WATER: Water supply from hydrant by Tokyo Metropolis, and waterboat by private management.

(a) Water supply on wharves		
Application	Bureau of Port and Harbour Offices in charge of each wharf.	
Work of water supply	Tokyo Port Service Association.	
(b) Water supply by water boat		
Extra charge	Overtime from 1700 to 2300	50%
	from 2300 to 0700	100%
	Special district	50%
	Festal day	50%

In the case of less than 15 tons per time, it will be considered 15 tons supply.

FUEL: All grades available. 24 hrs. notice required.

FIRE PRECAUTIONS: (Tankers).

1. Must enter port at dead slow speed preceded by patrol boat of TMSA, one tug boat each side of vessel and followed by fire patrol boat.

2. Engine to be kept ready for immediate use in case of emergency.

3. Tow lines to be placed over bow and stern with eyes close to water surface.

Note: No vessels allowed alongside a tanker during loading or discharging.

DEVELOPMENTS: 27 public wharves, 2 car ferry berths, 7 timber berths, 12 berths for dangerous cargo and 6 specialised berths to be constructed.

GANGWAY/DECK WATCHMEN: Necessary only in the case of valuable cargo.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: (Tobacco) 200 cigarettes a week. (Wine and/or spirits) 760 cc's per crew member per week.

IDENTIFICATION CARDS: Not required.

CONSULS: No consulates. But most countries have embassies in Tokyo.

REPAIRS: All grades of repairs available.

DRY DOCKS: Largest dry dock: length 180 m.; width 24 m.; depth 7.27 m. Capable of accommodating vessel of 16,750 gross tons.

Also one other dry dock for ocean-going vessels.

REPATRIATION: All facilities. Crew accommodation:

(1) Tokyo Seamen's Club, 1-4-9 Kaigan, Minato-ku, Tokyo, Tel. (433) 5688.

(2) Tokyo Shibaura Seamen's home, 1-11-8, Shibaura, Minato-ku, Tokyo. Tel. (451) 3249.

(3) Kaiko-ryo, c/o Tokyo Central Wholesale Market, 5-2-1, Tsukiji, Chuo-ku, Tokyo. Tel. (541) 0934.

AIRPORT: Distance to Tokyo International Airport, approx. 18 km.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National Holidays: New Year's Holidays (Dec. 31st–Jan. 3rd); New Year's Day (Jan. 1st); Adult Day (Jan. 15th); Foundation Day (Feb. 11th); Vernal Equinox Day (around Mar. 21st); Emperor's Birthday (Apr. 29th); Constitution Commemoration Day (May 3rd); Children's Day (May 5th); Respect-for-Age Day (Sept. 15th); Autumnal Equinox Day (around Sept. 23rd); Tokyo Festival (Oct. 1st); Physical Education Day (Oct. 10th); Culture Day (Nov. 3rd); Labour Thanksgiving Day (Nov. 23rd).

No cargo work on 1st or 3rd Sundays of each month, and no work from 31st December to 3rd January inclusive. Cargo work can be arranged on all other days including National Holidays.

POLICE/AMBULANCE/FIRE: Tokyo Water Police, 1-11-12, Kaigan, Minato-ku, Tokyo. Tel. (433) 2411. Call Fire Stations for ambulances. Tokyo Water Fire Station, 5-1-23, Kachidoki, Chuo-ku, Tokyo. Tel. (531) 3121-3.

TELEPHONES: (also see "VHF").

Installed on ships moored at piers or jetties to allow telephone communications between ships and subscriber telephones on land and between ships.

SERVICES: Two tank cleaning companies available with barges of capacity 100 tons for disposal of residues. All other usual services available.

SHORE LEAVE: Crew members allowed ashore upon ship Master's request to Tokyo Immigration Office if have valid passports or seaman's pocket ledgers. In case a crew member has a criminal record or has been expelled from Japan, he will not be allowed ashore.

PORT REGULATIONS: Maintenance of order in Port of Tokyo is under the responsibility of TMSA in accordance Port Regulation Law. In case of an occurrence of disaster, TMSA and the Tokyo Water Fire Station will take charge of refuge, rescue and fire fighting.

DELAYS: Congestion in the port. Bad weather.

AUTHORITY: Bureau of Port and Harbour, Tokyo Metropolitan Government.

AGENTS: Dodwell Tramp Agencies, CPO Box 297, Togin Building, 4–2, 1-chome, Marunouchi, Chiyoda-ku, Tokyo. Tel. (03) 211–2141. Telegraphic: Dodtramp Tokyo. International Telex: J22274, J22602 and J24469.

TOMAKOMAI: 42.35 N. 141.35 E.

MAX. SIZE:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*
Idemitsu Sea Berth	280,000	350	21.50
Idemitsu West Dolphin	70,000	250	12.60

TANKERS:

Berth	*Type of cargo & Diameter Number of shorelines*	*Discharge Rate*
Sea Berth	16″×4 (suction pipes) Raw Fuel Oil. Shoreline 48″.	15,000 K/L (If discharged by 4 suction pipes and received 2 Tanks).
West Dolphin	12″×2 (suction pipes) Raw Fuel Oil. Shoreline 30″.	5,000 K/L (If discharged by 2 suction pipes).
	Minas Raw Fuel Shoreline 28″.	5,000 K/L (If discharged by 2 suction pipes).
	"B" & "C" Fuel Oil Shoreline 24″.	5,000 K/L (If discharged by 2 suction pipes).
	"A" Fuel Oil. Shoreline 18″.	1,500 K/L (If discharged by 2 suction pipes).
	Light Oil Shoreline 18″.	1,500 K/L. (If discharged by 2 suction pipes).

TOYAMA: 36.46 N. 137.13 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory. No telegraphic address for Pilot station, but Pilot arranged through Agent whom keep advised ETA which may be sent through Niigata Radio. Pilot boards 1 mile off East breakwater from small tug. In event bad weather recommend remain outside port until weather clears. Pilot available daytime only.

ANCHORAGE: The harbour at the Jintsu river mouth is always calm. Covers about 125 acres, with depths of from 16.5 ft. to 33 ft. over mud and sand. Room at anchorage for at least four vessels over 5,000 gross tons. Anchoring position for ocean tankers is 36° 48′ N.; 137° 14′ E.

MAX. SIZE: Length 170 m. Draft 9.5 m. (Summer) and 9.10 m. (Winter). Tidal range max. 0.45 m. Also see "Tankers".

HEALTH: See "Fushiki".

RADIO: (Also see "Pilotage"): Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Usually join vessel at port entrance but can join outside harbour for large vessels. Used only when Pilot aboard.

"Narita Maru" – 2,060 h.p. uses own lines free of charge.
"Nihonkai Maru" – 1,800 h.p. uses own lines free of charge.
"Raicho Maru" – uses ship's lines.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: Max. size: 200,000 d.w.t., Max. LOA, no limit, and Max. safe draft 19 m. for Sea Berth of Nihonkai Sekiyu K.K., Toyama. Two lines, diameters 16 in. Reducing pieces supplied as necessary. Discharge rate 7,500 t.p.h.

DENSITY: 1015–1019 min./max.

FRESH WATER: Available ex-wharf at Nos. 1, 2, 3, 4 and 5 wharves; average 40 t.p.h. Other berthing positions supplied by barge which ordered from Fushiki and is filled up at Toyama.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

FIRE PRECAUTIONS: Nihonkai Oil Co., Toyama, issue Safety Regulations to Master on arrival tanker sea-berth.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: Nil.
REPAIRS: Minor repairs only.
DRY DOCKS: Nihonkai Juko Co. Ltd., Toyama. No. 1 dock, used for construction. No. 2 dock, ship-building capacity: length, 104 m.; width 15 m.; depth, 1.8 m. Size of dock: length, 112 m.; width, 14.6 m.; depth, 4 m. Max. building capacity, 4,000 g.r.t. No. 3 dock, ship-building capacity: length, 150 m.; width, 20.8 m.; depth, 5 m. Size of dock: length 168.2 m.; width, 21.88 m.; depth, 9.2 m. Max. building capacity, 10,750 g.r.t.
AIRPORT: Toyama airport, distance about 10 kms. Two daily flights.
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police, Toyama North Police Station, Toyama (0764) 37–7171; Ambulance, Toyama Iwase Fire Station, Toyama (0764) 37–7141 or 119; Fire, Toyama Fire Station, Toyama (0764) 37–7141.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Toyama-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo. Fushiki Kairiku Unso Co., Ltd., Toyama Port Office, 82, Higashiiwase-Irifune-cho, Toyama-shi, Toyama-ken. Cable Address: Fushikikairiku Fushiki. Tel.: (0764) 38–1100.

TOYAMA SHINKO: 36.47 N. 137.10 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifests and 1 Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of Pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 209° 2 miles off leading light of Fushiki Port, thence takes vessel to Fushiki Quarantine Anchorage ground, due to many fishing-nets on both sides of fairway. No Quarantine Anchorage ground established presently at Toyama-Shinko, therefore, every vessel obtains free pratique at Fushiki. If requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fishing-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot-boat painted yellow. No particular light or sound signals required. Even if the vessel already obtained free pratique in other port, need to approach the aforesaid position for Pilot, because of no Pilot position located in Toyama-Shinko.
ANCHORAGE: No anchorage at Toyama-Shinko, therefore, if vessel required to await for berth or some other reason, use Fushiki Outer Anchorage ground where safe at all seasons with depth from 8 to 11 m. Sand and clay bottom. Room at anchorage for at least six vessels over 5,000 gross tons.
RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour in Fushiki.
MAX. SIZE: Length 200 m., draft 34 ft. Tidal range is max. 0.45 m.
PRATIQUE: See "Fushiki".
RADIO: (also see "Pilotage"). Recommend Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at port entrance, but sometimes in Fushiki Outer Harbour for larger vessels. Maritia-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. In case public tug, i.e. Nihonkai-Maru and Raicho-Maru used, always require Pilot on board.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.
MEDICAL: No advance notice required unless urgent.
DENSITY: Average density between 1015 and 1019 in all seasons.
FRESH WATER: Available, from wharves No. 1, 2, 3 & 4, average 10 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker ports at maximum 7 days prior notice.
DEVELOPMENTS: *(a)* Planning to make one berth for 80,000 tons d.w.t. vessel, 280 m. long, 14 m. deep. However, the berth already constructed, and necessary to dredge to make deeper than present depths of 10.5 m., together with making channel from 200 m. to 300 m. wide with 14 m. depth. *(b)* Planning to make 3 berths for 15,000 tons d.w.t., and 2 berths for 5,000 tons d.w.t.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCE: Only allowed 50 cigarettes to take ashore, but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry docks. Nearest available in Toyama.
REPATRIATION: Possible.
AIRPORT: Toyama Airport about 25 km. distance. Two regular services a day. ANA only.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: 1st May and New Year's Day, most probably from 31st Dec. to 3rd Jan.
POLICE/AMBULANCE/FIRE: Police, Shinminato Police Station, Shinminato (07668) 2–3141; Ambulance, Shinminato Fire Station, Shinminato (07668) 2–3175; Fire, Shinminato Fire Station, Shinminato (07668) 2–3175.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer. Attending from Fushiki Immigration Office, Fushiki, due to no office in Toyama-Shinko.
AUTHORITY: Toyama-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd. Tokyo, Fushiki Kairiku Unso Co. Ltd., 6–6 Fushiki-Minatomachi, Takaoka-Shi, Toyama-ken. Head Office in Fushiki; Takaoka (0766) 44–1300/9 and Toyama-Shinko Branch; Shinminato (07668) 4–3330. Telegraphic address: Fushikikairiku Fushiki, only to Fushiki Head Office.

TSUKUMI: 33.05 N. 131.52 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory, but recommended unless Master well acquainted with locality. Pilot embarks vessel at anchorage, position 33° 05′ 30″ N. 131° 54′ 00″ E. Request for Pilot made through Agent; Master to report ETA 24 hours prior arrival.
ANCHORAGE: Good holding anchorage available; depth of water about 25 m. Loading and/or unloading of cargo usually effected alongside wharves and in event of loading/unloading at anchorage, when rough weather prevails, difficulty sometimes experienced on account of swell from open sea. Therefore suggested that vessel anchor as close to shore as possible consistent with safety.
RESTRICTIONS:
(a) Berthing: Night entry or berthing after nightfall, though not impractical (depending on weather) is not recommended unless special arrangements (stevedores, etc.) necessitate vessel's immediate berthing.
(b) Departure: Night departure allowed, weather permitting, and subject Pilot's agreement.

MAX. SIZE:

Wharf	*Length*	*Depth*	*Capacity (g/t)*
Noshima Pier	168 m.	16.0 m.	60,000
Prefectual W. (Noshima W.)	164 m.	9.0 m.	10,000×1
Onoda Cement No. 1 W.	82 m.	8.0 m.	3,500×1
Onoda Cement No. 2 W.	185 m.	8.0 m.	10,000×1
Nittetsu Pier	155 m.	10.5 m.	18,000×1
Todaka Pier	120 m.	9.0 m.	15,000×1

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all vaccination cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

Quarantine Office was closed on 1st October 1972 therefore vessels are required to obtain free pratique at Mutsure/Hesaki, Oita, Saganoseki or Saiki.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: One tugboat named "Bungo" 1,600 h.p., 150 g/t.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density about 1024.

FRESH WATER: Available. On prefectual wharf and Onoda No. 2 wharf, on Nittetsu Pier, and by barge on anchorage.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

FIRE PRECAUTIONS: By Marine Security Guards.

DEVELOPMENTS: New prefectural wharf. Now under construction. Length, 200 m.; depth, 15 m.; capacity, 20,000 g/t×1, 3,000 g/t×1.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: Nil.

REPAIRS: Local workshop available only for minor repairs.

REPATRIATION: Possible.

AIRPORT: Oita airport; one hour from Tsukumi by train. Regular airlines: ANA, JDA, TAW.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: 14th–16th August.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: No special services available, but if required will be arranged by Agent who calls from another port.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.

AUTHORITY: Usuki Doboku (Public Works) Office.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Azuma Shipping Co. Ltd., Nakatsuru Bldg., 2nd Floor, 15–5, Semento-machi, Tsukumi-shi, Oita-ken. Cable Address: Ringer Tsukumi. Domestic Telex: 7755–77. Tel.: Tsukumi (09728) 2–2144.

TSURUGA: 35.40 N. 136.03 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Daylight hours only. Pilot arranged through Agent. Await Pilot at quarantine anchorage (see "Anchorages").

ANCHORAGES: Quarantine anchorage is best area for anchoring to avoid heavy weather (being protected from the North by mountains). Position 35° 40′ 08″ N.; 136° 02′ 55″ E.

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine Officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Captain must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

TUGS: Join ship inside breakwater and use tug's line.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Depths alongside up to 12.0 m.

New Wharf depth 10 m.
Kanegasaki Wharf, depth 9.5 m.
Railway Wharf, depth 8.5 m.
Horai Wharf, depth 7.3 m.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: No facilities for big tankers.

DENSITY: Average density through year 1023.

FRESH WATER: Available from wharf, and by barge.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspectors ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

AIRPORT: Distance one hour by train. Two flights daily to Tokyo.

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police, 2–4000; Ambulance and Fire, 119.

TELEPHONES: Not available for placing on board.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

SERVICES: Hold cleaning.

AUTHORITY: Tsuruga Port Office.

AGENT: Sub-agents of Dodwell & Co., Tokyo. Tsuruga Kairiku Unso Kaisha Ltd., P.O. Box 11, 10–2, Sakura-machi, Tsuruga-shi, Fukui-ken; Cable Address: Kairiku Tsuruga, Domestic Telex: 5176–693, Tel.: Tsuruga (07702) 2–3111.

UBE: 33.56 N. 131.15 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended unless Master well acquainted with area. No Harbour Pilot stationed at Ube but Inland Sea Pilot will attend.

Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hrs. notice. Urgent correction of ETA outside business hours should be cabled direct to Pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage not compulsory but recommended in view of great number of islands causing navigational hazards. Pilots obtained from one of three Pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hrs. and 72 hrs. advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* No VHF communication available with Inland Sea Pilot stations.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 38′ N. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel). Position 33° 13′ N. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position 33° 56′ 24″ N. 131° 03′ 12″ E.

ANCHORAGE: Sea bottom is mud.

	Depth	
	4–7.5 m.	*7.5–10 m.*
Sheltered	73,000	233,100 sq. m.
Unsheltered	12,175,500	680,000

RESTRICTIONS:

(a) Outer harbour: No restriction.

(b) Inner harbour: Berthing/unberthing is practicable only during daytime.

(c) Deep draft vessels may berth at high water only.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: At first port of call in Japan, vessel must obtain free pratique. Quarantine officers will attend vessel only from daylight to sunset and Captain to show all Vaccination Cards, Derating Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Captain must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Captain communicates with Agents through Choshi Radio or Nagaskai Radio which cover all ports in Japan. If specifically Westbound vessel to Choshi and Northbound to Nagasaki Radio respectively.

TUGS: "Naruto Maru" 2,800 h.p. stationed at Ube. Other tugs available from Moji or Tokuyama. Tug's lines used at no extra charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Wharf	*Length*	*Depth*
Public Okinoyama Wharf	370 m.	10 m.
Public Shibanaka Wharf	185 m.	10 m.
Ube Cement wharf	247 m.	9 m.
Ube Kosan Chisso wharf	188 m.	9 m.
Ube Kosan Urea wharf	223 m.	9 m.
Ube Kosan No. 2 pier	131 m.	9 m.
Central Glass wharf	162 m.	9 m.

Wharf for Limestone:

Name of wharf: Okinoyama Limestone Wharf (Ube Kosan No. 5 Wharf). Length of wharf 165 m. Maximum safe draft 11.00 m. Maximum d.w. tonnage 30,000 tons. Fairway 300 m. wide, 2.25 miles long, 8.80 m. deep, with shallow spot 8.40 m. at low water. Accessible max. draft 10.50 m. Facilities Loaders × 2; 1,500 tons per unit/hour. Entry and Departure Berthing/unberthing is practicable only during daytime. Deep draft vessel may unberth at high tide only.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: Seibu Sekiyu Co. Refinery.

(a) Geographical Location: 33° 49′ 48″ N. 131° 13′ E. 163°, 11,400 m. from Motoyama Misaki.

(b) Entry Permission: Sea berth located outside harbour limit of Ube port and treated as a closed port. Vessels therefore required to obtain special permission for entry from Customs at any open port prior to arrival.

(c) Restrictions: Max. 230,000 d.w.t. Max. LOA, 325 m. Max. safe draft 19.5 m.

(d) Diameter/No. of shore pipes: Float-sink hose: 16 in.×2 lines connecting to manifold; sub-marine hose: 20 in.×2 lines; sub-marine pipe-line: 48 in.×1 line.

(e) Discharging Rate: 7,800 t.p.h. (Crude oil).

DENSITY: 1025.

FRESH WATER: *(a)* Water barges available from Moji and supply about 50 t.p.h. *(b)* Water from wharf supply at Central Glass Ube Cement and Ube Chisso wharves.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. seven days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Sasebo Heavy Industries Co., Ltd., Moji; Kitakyushu Iron Works, Tobata; Ube Dockyard Co., Ltd.

DRY DOCKS: None.

AIRPORT: 30 mins. by road.

TIME: GMT plus 9 hrs. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance/Fire 119.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if ship stays longer.

SERVICES: All services available.

AUTHORITY: Yamaguchi-Kencho.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo.

Dry Cargo: See "Moji".

Tankers: Uyeno Unyu Shokai, Yamaguchi Branch Office, Oaza Nishioki, Onoda-shi, Yamaguchi-ken; Cable address: Uyenoshell Ube, Domestic Telex: 6845–42, Tel. Ube (0836) 88–1171.

ANCHORAGES: No. 5 section, Wakamatsu. Depth 9-11 m. Capacity (g/t), 15,000×2. Also quarantine anchorage.
RESTRICTIONS: Easterly winds prevail in warm season, dense fog prevails sometimes in Spring and Winter, but generally clears in a few hours in the morning. Tidal range about 1.5 m. and current in leading channel about 1.5–2.5 knots, but no current in port. Due to narrow channel leading to main harbour and shallow water at entrance of channel, length and draft of vessels are generally limited as follows:
Buoy: Ship's length overall, 165 m.; draft, 8.5 m.; 11,000 g.r.t
Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to a breakwater and reclaimed land. In this channel, as in main harbour and fairway, vessels observe only one-way traffic and on an outgoing signal from the shore, wait outside for outgoing vessel until channel is cleared. Vessels with draft of more than 7 m. can enter/depart only at high tide. Entry permitted only from sunrise and vessel to be berthed before sunset. Night departure prohibited.
MAX. SIZE:

Buoy	*Ship's LOA*	*Draft*	*Capacity*
	m.	m.	
"B"	165	8.5	11,000×1
"C"	165	8.4	11,000×1

"N"	147	6.7	7,000×1
"O"	147	7.3	5,000×1
"L"	165	8.5	10,000×1

HEALTH: See "Moji".
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specially Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: 2 tugs join vessel under Wakato bridge at corner of fairway leading to main harbour.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
BRIDGES: Wakato bridge. Height of mast limited to 38 m. for passing under bridge.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: No tanker berths.
DENSITY: Average density in port about 1019–1021 in Summer season; 1025/1026 in Winter season.
FRESH WATER: Available. Rate of delivery: 50–60 t.p.h. ex-barge. Minimum quantity at buoy, 10 tons; minimum quantity at No. 5 sec., 30 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency case at request.
DEVELOPMENTS: Land reclamation N.E. Wakamatsu for discharge wharves (coal/iron ore). Depth to be 12 m.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: See "Yawata".
REPAIRS: All grades deck and engine repairs afloat.
DRY DOCKS: None.
AIRPORT: See "Yawata".
TIME: GMT plus 9 hours. Permanent.

3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Wakayama-Shimotsu licensed Pilots. ETA advices to Agent. Pilot boards 1,500–2,500 m. off Wakayama breakwater. Chart Nos. 1150 and 1143 (Japanese Maritime Safety Board). No pilot boat. Pilot boards from tug.
ANCHORAGE: For waiting Pilot and/or berth. (Nature of bottom, sand mixed with mud.) (Sumitomo Metal Ore Carrier): 4,800 m. 292° and 3,500 m. 272° from White lighthouse; depth about 30 m.

(Wakayama Log Carrier): 2,000 m. 245° and 230° from Red lighthouse; depth about 22 m.
RESTRICTIONS: Pilot available daytime only. Channel depth, (Southern Section) 9.0 m; (Northern Section) 14.0 m.
MAX. SIZE: (Wakayama Log Carrier): South Section, LOA 160 m., d/w 20,000 tons, draft 9.0 m.; LOA 200 m., d/w 35,000 tons, draft 10 m. (Sumitomo Metal Pier, South Section): LOA 250 m., d/w 140,000 tons, draft 14.0 m.
HEALTH: Radio Agent for free pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health condition on board. When free pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique:
A vessel that has been in contact with an infected area, or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or suspected cases, of infectious disease within 15 days of arrival.
If crew or passengers on board do not possess valid Smallpox Vaccination Certificate.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio or Kobe Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio or Kobe Radio respectively.
TUGS: Tug assistance normally commences from outer harbour. Tug lines used and charge included in towage. 8 tugs available, up to 3,000 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630–2130 hrs. (60% additional of basic stevedorage), 2130–0400 hrs. next morning (130% additional), 0400–0830 (60% additional), Sundays/holidays (100% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: No tanker berth.
DENSITY: 1025–1030.
FRESH WATER: Available, Water boat, capacity 90 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 200 cigarettes to take ashore for one week but no spirits.
CONSULS: None.
REPAIRS: Minor repairs only. Suwa Shipyard Co., Ltd Tel. 0734–31–1694.
DRY DOCK: None
REPATRIATION: Possible.
AIRPORT: Itami, Osaka, about 3 hours by car.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 9 days, but 9 days extension possible if ship stays longer.
AUTHORITY: Wakayama-kencho.

3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: *Harbour pilotage:* Compulsory for entry and departure but not when passing through straits. Pilots embark Eastbound vessels at Mutsure quarantine anchorage (see "Moji"), Westbound vessels at Hesaki quarantine anchorage (see "Moji"). Two Pilots embark vessels exceeding 20,000 gross tons, charging 180% pilotage.
Sea pilotage: Vessel approaching from East obtain Pilot by radio request made at least 24 hours in advance. Pilot embarks 3 miles South from Sekisaki lighthouse; 33° 13′ N.; 131° 54′ E.
Pilots should be kept closely advised of accurate ETA Pilot station. If any changes, Masters requested radio immediately to Pilot offices direct or through Agent reporting revised ETA. Cable addresses of Pilot offices: Harbour Pilot, "Kanmonpilot Moji". Inland Sea Pilot, "Anjin Moji". Require 24 hours notice of ETA, but can attend with 2–3 hours notice in emergency cases.
ANCHORAGES: No anchorage at Yawata, but quarantine anchorage used in essential cases. See "Quarantine".
RESTRICTIONS:
(a) Because of narrow channel leading to Yawata and shallow water at entrance of channel, length and draft of vessel limited, except for berthing at Nishi-Yawata wharf, where 20,000 gross tonnage with 200 m. length overall and 8.3 m. draft may be accommodated. Limits:

	Wharf	*Buoy*
Length (overall)	166 m.	155 m.
Draft	8.5 m.	8.5 m.
Gross tonnage	10,000 tons	10,000 tons

Vessel slightly exceeding above may be berthed at the Pilot's discretion, subject weather conditions and efficiency of engine, steering, etc.
(b) Fairway leading into main harbour about 200 m. wide and 2 miles long, running parallel to breakwater and reclaimed land. In this channel, as in main harbour and fairway to Yawata, vessels observe one-way traffic and, on a "not-clear" signal from shore, wait outside for outgoing vessels to clear channel. Vessels with draft of more than 7 m. can enter/depart only at high tide.
(c) Entry permitted only from sunrise and vessels to be berthed before sunset. Night departure prohibited.
(d) Wakato suspension bridge crosses channel between Tobata and Wakamatsu. Height of bridge from water line at fairway 42.675 m. at spring high tide; height of mast of vessels passing under bridge limited to 38 m.
(e) Easterly winds prevail in warm season. N.W. winds in Winter. Dense fog sometimes in Spring and Winter, but generally clear in morning. Tidal range about 1.2 m. Tidal current in channel about 1.5 to 2.5 knots, but no current in port.
(f) Port privately owned and controlled by Nippon Steel Corp.

MAX. SIZE:

Wharf No.	*Length m.*	*Depth m.*
15	150	9.0
16	150	9.0
17	150	9.0
18	179	9.0
19	185	9.0
20	185	9.0
Nishi-Yawata	320	9.0
Makiyama	160	8.5

Buoy No.	*Depth m.*
4 berth (F–G buoys)	9.0
5 berth (G–H buoys)	9.0
6 berth (H–I buoys)	9.0
7 berth (I buoy-anchor)	9.0
10 berth (F buoy-anchor)	9.0
12 berth (G buoy-anchor)	9.0
14 berth (H buoy-anchor)	9.0
16 berth (I buoy-anchor)	9.0

HEALTH: See "Moji".
QUARANTINE:
(a) Quarantine station at Western entrance: Half-mile East of Mutsure lighthouse 33° 58′ 15″ N., 130° 53′ 43″ E.
(b) Quarantine station at Eastern entrance: 125°, 1,500 m. from Hesaki lighthouse 33° 56′ 24″ N., 131° 30′ 12″ E.
(c) Quarantine inspection not allowed inside port except when weather or other special reasons prevent quarantine boat from approaching ship at anchorage.
(d) Quarantine service is rendered from sunrise to one hour before sunset.
(e) "Q" flag should be hoisted until ship in free pratique.
(f) Vessels exceeding 20,000 gross tonnage may undergo quarantine on application when they berth inside port.
(g) When ship arrives from plague-infected or suspected area within 10 days after she left such place, 24 hours special quarantine required. All sanitary scuppers must be closed and garbage must not be thrown overboard after ship reaches 60 miles off Japanese coast.

RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.

VHF: Vessel can keep in direct contact with port authorities in regard to arrival, berthing instruction, etc, through VHF, details as follows:

	Kitakyushu (Moji)	*Shimonoseki*
(a) Call sign:	"Kitakyushu port radio"	"Shimonoseki port radio"
(b) Location of radio facilities:	The transmitting and receiving station located at top of Mt. Hinoyama, Shimonoseki, for the above both radio.	
(c) Type of wave:		
Channel: Simplex 16	(Calling, responding)	16 (Calling, responding)
Simplex 12	(Communication)	12 (Communication)
Simplex 14	(Communication)	14 (Communication)
Duplex 20	(Communication)	20 (Communication)
Outport:	50 W.	50 W.
(d) Operating hours:	0600–2000.	
(e) Communicating range:	Within a radius of 50 miles from the station.	
(f) Communicating language:	English and Japanese.	

TUGS: Two tugs join vessel at corner of fairway leading into main harbour. Ship's lines used when vessel berths.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
BRIDGE: See "Restrictions".
STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional), Sundays/holidays (60% additional).
MEDICAL: No advance notice required unless urgent.
TANKERS: No tanker berth.
DENSITY: Average density in port about 1020–1022 in Summer season, 1024–1025 in Winter season.
FRESH WATER: At buoys: Water barges available from Wakamatsu, rate of delivery about 50 t.p.h. At wharves: (No. 16, 17, 18, 19, 20 and Nishi-Yawata wharf.) From hydrants: 25–40 t.p.h. For supply at Nishi-Yawata wharf, one day prior notice required. Overtime charge: (0500–0800 hrs.) (1700–2200 hrs.), 50% add.; (2200–0500 hrs.), 100% add.; bad weather 50% add.; Sundays and holidays, 50% add. Minimum quantity at Yawata, 10 tons. Minimum quantity at Mutsure anchorage, 50 tons.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.
FIRE PRECAUTIONS: No tanker berth. Each tugboat is equipped with fire extinguisher system for attending emergency cases.
DEVELOPMENTS: All the present discharging berths (wharves) for coal, ore (including Nishi-Yawata scrap wharf) converted to loading berths.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo aboard.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
CONSULS: British Consul, who is also acting Swedish Consul, is stationed with Holme Ringer, Moji (tel. 093–33–1311). American Consul stationed at Fukuoka (tel. 092–75–9331). Korean Consul stationed at Fukuoka (tel. 092–77–0461).
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: No dry dock available.
REPATRIATION: Possible.
AIRPORT: Fukuoka airport; approx. 70 kms.
(a) International line:
JAL, for Pusan (Tuesday and Thursday);
for Taipei-Hongkong (Monday and Thursday);
CPA, for Taipei-Hongkong (Wednesday and Saturday);
KAL, for Pusan-Seoul (Mon., Tues., Wed., Fri., and Sat.).
(b) Domestic line:
JAL and ANA, regular service.
Kitakyushu airport; approx. 20 kms. Flights often suspended by heavy rain and fog.
(c) Domestic line:
ANA, regular service.
TIME: GMT plus 9. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Yawata Police Station, tel. 093–67–6631; Wakamatsu Water Police, Yawata Port branch, tel. 093–67–0611; Ambulance/Fire, Yawata Fire Department, tel. 093–67–4831.
TELEPHONES: Nippon Senpaku Tsushin K.K. available at Moji (tel. 093–33–1089). In case of Mutsure anchorage, extra boat charge and personnel expenses will be incurred. Due to insufficient number of telephones require adequate advance notice for installation. Suitable ship's electrical voltage; DC–22/28 v. AC–100 v. 110 v. 120 v. (to keep at least within 10 v.).
GENERAL: Whenever vessel takes bunkers in port, advisable to close deck scuppers' holes before pumping in order to avoid overflow oil into sea.
SERVICES: Tank cleaning, sand blasting (Fuji Co., Tobata), chemical cleaning (Fuji Co., Tobata). Hold cleaning (Tsuyama Kosan K.K., Yawata; Fuji Co., Tobata). Compass adjusting (Kajiwara Koki, Shimonoseki). DF calibration (Nippon Radio Co., Tobata). Life-raft servicing and inspection (Kikutani Sengu, Shimonoseki; Marinair International, Kobe; International Marine, Kobe; Marine International; Yokohama and Tokyo); this service requires name of maker in advance. Radio and radar repairs available, but requires name of makers/type of the machine in advance. Laundry (Sunrise Cleaning, Tobata; Moji Dry Cleaning, Moji). Watchmen service available. Charts: only Japanese charts available locally; BA and HO charts can be obtained from Kobe and Yokohama respectively, with adequate notice. Grain fitting (Ushio Co., Moji; Fuji Sobi, Moji); this work is usually carried out at Moji (public port). Fumigation (Toyo Fumigation Co., Moji), this work is not permitted at Yawata but at Moji. Floating crane, capacity 200 tons (Kondo Kaiji, Wakamatsu; Nichibei Kosan). Diver (Nippon Salvage Co., Moji; Tsuyama Kosan, Wakamatsu). Salvage service (Nippon Salvage, Moji) Painting service (Fuji Co.).
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY: Kitakyushuko Kauti-Kumiai.
AGENTS: See "Tobata".

YOKKAICHI: 34.57 N. 136.38 E.

DOCUMENTS: See "Yokohama".
PILOTAGE: Not compulsory; Pilot available at 34° 56′ 15″ N.; 136° 40′ 40″ E. Vessels requiring Pilot cable Agent at least a day ahead advising exact ETA Pilot station. Wireless station for communicating with entering ships and for other port business, call signal JCZ. Radio wave in use is A1.A2 500 kc/s. and A1.A2 486 kc/s., output A1 50 W. and A2 110 W. Zone of communication about 100 km. Yokkaichi signal station also equipped for assigning berths to entering ships and for other port business. VHF communication available, call signal Yokkaichi Port Radio, Channel 16. Working Channel 14, 0600 to 2000 hrs. any day.
ANCHORAGE: Vessels anchor 34° 56′ 15″ N., 136° 40′ 40″ E. where authorities board and grant free pratique; max. depth 13 m.
RESTRICTIONS: Entry restricted by vessel's draft and pratique. Max. draft inside port 12 m. Quarantine authority attend vessel usually from dawn to sundown on any day. Berthing daytime only. Unberthing any time except tankers daytime only.
MAX. SIZE: Maximum permissible draft *inside port* 12 m.
Tankers:

Berth	*Max. d.w.t.*	*Max. LOA (m.)*	*Max. Safe Draft (m.)*
Showa Outer SBM	No limit	No limit	19.30
Showa Inner SBM	170,000	No limit	16.00
Showa Wharf "E"	45,000	211	10.00
Daikyo SBM	No limit	No limit	9.50
Daiyo Umaokoshi Pier	60,000	245	9.80

HEALTH: Request for radio pratique to be addressed to Agents not less than 12 hrs. before arrival.
TIDE: Tidal current of Ise Bay runs Northward along East side of Mie Pref. and turns round at mouth of Kiso River and runs Southward for Chita peninsula.

Tidal level:	High tide	Tidal level (average) +7.74 ft.
	Mean tide	+4.30 ft.
	Low tide	±0.00 ft.

TUGS: Normally stand-by to assist vessel inside breakwater of entrance to fairway; tug's lines used.
BERTHING: Depths alongside:

Berth No.	*Depth*
1	8 metres
2–3	8.5 metres
4–5	8.5 metres
8	10 metres
9	10 metres
11	10 metres
13	11 metres
14	10 metres
15	10 metres

SPECIALISED CARGO HANDLING FACILITIES: *Bulk Cargoes:*
No special berth for this, No. 2 wharf has a cereal silo which can store 30,000 tons of imported grain. Two pneumatic unloaders with unloading capacity of 300 t.p.h. per machine, at the Northern berth of the pier to connect the silo with conveyors.
Containers: One container berth, depth 36 ft. with a container crane of 37.5 tons capacity.
Liquid Chemicals/LPG Carriers: Private berth.
TANKERS:

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Showa Outer SBM	Crude Oil	16″×2	4,500/6,500
Showa Inner SBM	Crude Oil	12″×2	4,500/5,000
Showa Wharf "E"	Naphtha	12″×1	500/900
	Fuel Oil	12″×1	500/900
	Kerosene (Load)	10″×1	300/500
	Lub. Oil (Load)	3″×1	200/300
Daikyo SBM	Crude Oil	16″×2	4,500/6,000

Berth	*Product*	*Shoreline*	*Discharge Rate (t.p.h.)*
Daiyo Umaokoshi Pier	Crude Oil	12″×2 (Chiksan)	3,000/4,000
	Fuel Oil	12″×1 6″×1	700/900
	Kerosene (Load)	6″×2	380/400

DENSITY: Average 1025.
FRESH WATER: Available, rate of delivery 50 t.p.h. from shore pipes at Government wharves; 100 tons from barge; before 2200 hrs. additional cost 50%; after 2200 hrs. additional cost 100%.
FUEL: Most domestic and bonded oil available, ex-barge. Min. five days notice required.
CONSULS: None.
REPAIRS: Minor repairs only.
AIRPORT: No airport.
POLICE/AMBULANCE/FIRE: Police, tel. 110; Ambulance/Fire, tel. 119.
TELEPHONES: Telephone can be arranged from shore connection at Government wharves. No connections at tanker berths.
GENERAL: Lightening: Not allowed, except a cargo of oil or chemicals.
SERVICES: Technicians for vessel's instruments can be arranged from other ports.
REGULATIONS: Under adverse weather conditions:

1. If a typhoon is reported approaching, and upon advice from refinery representative, loading or unloading operation will be suspended and vessel will leave berth to a designated area for refuge.
2. During a violent thunderstorm, cargo work will be stopped upon receiving order from refinery, and vent-line valves securely closed.
3. During stormy weather, with gusty winds condition, Master shall follow weather reports closely and shall endeavour to prevent any accidents by taking all possible precautions, such as reinforcing mooring ropes and arranging adequate emergency personnel to stand-by for any emergency.

Liability for Accidents: If accident is judged by Maritime Safety Office and Port Captain to be ship's fault, either through negligence of these Safety Regulations or otherwise, Master shall immediately cease operations, if necessary, and simultaneously follow in good faith the instructions of refinery and Port Captain, and take all necessary actions. Master shall inspect and verify cause of accident in the presence of refinery representative and ship's Agent, and shall be held responsible for reporting the accident, in writing, to the parties concerned. Until this is completed and full agreement reached with refinery representatives, the vessel shall not leave the jetty, unless otherwise requested. For actual confirmation of the accident, and damage liability, Public Surveyor (Messrs. Japan Marine Inspections Co. Ltd.) is fully entitled to inspect the accident.
AUTHORITY: Yokkaichi Port Authority.

AGENTS: Sub-agents of Dodwell & Co. Ltd., Tokyo.
Dry Cargo Vessels: Yokkaichi Warehouse Co. Ltd., 6, Chitose-cho, Yokkaichi Mie-ken. Cable address: "Soko Yokkaichi". Domestic Telex: 4948–179 Yonso J. Tel. Yokkaichi (0593) 53–5211.
Tankers: Uyeno Unyu Shokai Yokkaichi Office c/o Showa Yokkaichi Sekiyu K.K. 1, Shiohama-cho, Yokkaichi-shi Mie-ken. Cable address "Uyenoshell Yokkaichi". Domestic Telex 494–8276. Tel. Yokkaichi (0593) 45–2271/8.

YOKOHAMA (incl. Negishi and Tsurumi): 35.27 N. 139.38 E. **(See Plan)**

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists, including Passport Nos.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: As Yokohama/Kawasaki a busy port, all movements – entering, leaving port and shifting within port – regulated by Harbour Authorities, and Agent has to make application for movement one day before, also tugboat(s) arranged through Agent. If any change necessary to arrangement already made, two hrs. notice sufficient to make rearrangement with Pilot. If Pilot required at area off Ashika Shima Lt. Bn. in Tokyo Bay for passing Uraga Strait, 24 hrs. prior notice required for dispatching Pilot. (In rough sea Pilot cannot be obtained in that area.) No station pilot boat; Pilots use small launches and often make use of tugboat when it is employed at same time, for embarking and disembarking especially when sea rough. In either case, launch or tugboat with Pilot on board displays "H" flag or lights prescribed in International Regulations. Pilot for Yokohama/Kawasaki port picked-up off Yokohama fairway entrance buoys No. 1 and No. 2, but in case ship has to wait for berth, usually does not take Pilot and proceeds to anchorage shown on chart as "Quarantine Anchorage" or as near as safety permits, and anchors. In this case Pilot boards at anchorage. If anchor or picks-up Pilot inside harbour limit, pilotage cheaper because assessed on two stages; "From Bay to Sea" and "From Sea to Berth", but Master requested to anchor outside fairway. Vessel to provide properly approved Pilot ladder.
Uraga Channel:
Vessels requiring a Pilot for the Uraga Channel should radio request to Anjin Yokosuka, advising ship's details and arriving time at No. 1 Uraga Channel light buoy. Uraga Channel Pilot embarks 3 to 5 miles S.S.E. of Kannonsaki lighthouse, and will disembark on arrival at destination port limits. Applications for Uraga Channel Pilot should reach pilot office 24 hrs. before vessels arrival at No. 1 Uraga Channel light buoy.
Recommendations: To be followed by tankers of 100,000 d.w.t. or more when they navigate through the Uraga Channel with cargo loaded:

1. Twelve hrs. and three hrs., respectively, before such a vessel expects to pass the Uraga Channel No. 1 light buoy, it should report the following items to the Yokohama Maritime Safety Division. Also, after the three-hours-in-advance report, it should keep its radio station open. This, however, is not required if the vessel is South bound:
   (*a*) Name of vessel.
   (*b*) Signal letters, d.w.t. tonnage, type and quantity of cargo, name of port intended to enter (not required in a three-hours-in-advance report).
   (*c*) Availability of international VHF transmitter-receiver equipment aboard.
   (*d*) Time at which the vessel expects to pass the Uraga Channel No. 1 light buoy.
2. Refrain from sailing through the Channel when visibility is poor (less than about one nautical mile).
3. Avoid sailing through the Channel at night unless it is essential to do so.

Follow any instruction that may be issued from the Director of the Yokohama Maritime Safety Division as to the time for sailing through the Channel.

4. Maintain look-out at stem.
5. Between the neighbourhood of the Uraga Channel No. 2 light buoy and that of the Uraga Channel No. 5 light buoy, avoid overtaking other vessels (weighing about 500 g.r.t. or more) unless it is essential to do so.

ANCHORAGES: 12–26 m. in quarantine anchorage, and 26–34 m. in other areas. For details refer to chart published by Hydrographic Division of Japan MSA.
RESTRICTIONS: Entry or departure or movement inside port not allowed from sunset to sunrise, but ships less than 15,000 g.r.t. without dangerous cargo can be given special permission to enter, leave port and move inside the port (only in Yokohama). In Kawasaki, which is very narrow and long, no special permission given. Depths of shallows in Yokohama, Tsurumi and Kawasaki fairways 11.6, 11.2 and 12.0 m., and Pilot Association make these the max. drafts accessible to the berths inside the respective fairways. Ship with max. draft of 11.6 m., when entering Yokohama through Yokohama fairway, has to wait for tide.
MAX. SIZE: *Tankers:*

Name of Berth	*Max. d.w.t.*	*Max. LOA*	*Max. safe draft*
Keihin Yokohama (Sea berth)	No limit	No limit	19.50 m.
Shell Oil (Main Jetty)	No limit	180 m.	10.00 m.
General Sekiyu	No limit	182 m.	9.30 m.
Mobil Oil	No limit	176 m.	9.45 m.
Asia Oil No. 5	No limit	No limit	12.00 m.
Nisseki Koyasu	No limit	250 m.	12.00 m.
Nisseki Negishi A (E.)	No limit	310 m.	17.00 m.
Nisseki Negishi B	No limit	250 m.	13.60 m.
Shell	No limit	260 m.	11.70 m.

PRATIQUE: Radio Agent for free pratique not less than 12 hrs. and not more than 36 hrs. before arrival, advising full details of vessel and health conditions on board. When free pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:
Maritime Declaration of Health.
Crew List.
Passenger List.
The following vessels will not be able to get radio pratique:
A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.
If crew or passengers on board do not possess valid Smallpox Vaccination Certificates.
If a vessel does not possess a valid Derat or Derat Exemption Certificate.
RADIO: Recommended Captain communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to Choshi, and Northbound to Nagasaki Radio respectively.
TUGS: Under control of Pilot, compulsory in Yokohama/Kawasaki for foreign ships, and normally join ships in fairway between outer breakwater and Lt. Hos. and Entrance Lt. Buoys. If ship is at anchor in quarantine area or near to it, tug(s) joins ship at anchor. Usually two tugs used for mooring and/or unmooring, but depends largely upon special conditions of berth and weather conditions. Tug's lines used and charge included in towage.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Mooring Buoys:

District	Mooring capacity (g.t.)	No. of berths	Buoys
1st District	1,000	2	A, B, C, D
	1,500	2	H1, H2
	2,000	1	H3
	7,000	2	Nos. 12–13
	12,000	1	No. 11
	15,000	7	Nos. 1–10
2nd District	12,000	1	Nos. 20, 21
	15,000	2	Nos. 22–25
	30,000	1	D6
3rd District	12,000	2	Nos. 36–38
	15,000	2	Nos. 32, 42, 43, 44
	20,000		

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. (50% additional of basic stevedorage), 2100–0500 hrs. next morning (130% additional). Sundays/holidays (60% additional).

VHF: Call sign Yokohama Port Radio. (See details under "Kawasaki/VHF").

MEDICAL: No advance notice required unless urgent.

TANKERS: Masters of tankers seldom requested to fit reducing pieces before arrival for connection of shore lines since oil installation have own appliances. Two slop disposal facilities, one in district No. 5 in Yokohama which is private enterprise and can dispose of dense residues, and one in District No. 1 in Kawasaki

DENSITY: Average approx. 1023.

FRESH WATER: Can be taken either at wharf ex-pipe or at buoy or anchorage by barge.

Place	*Rate of delivery*
South Pier	70 tons per hour
Government Silo	70 tons per hour
Nippon Petroleum Refinery, Negishi	70 tons per hour
Buoy or anchorage	100 tons per hour (subject to ship's condition)

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

FIRE PRECAUTIONS: Oil installations in Yokohama/Kawasaki generally do not allow bunker barge to come alongside ships moored to their berths.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gears maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS:

REPAIRS: Any kind of repairs can be effected at this port.

DRY DOCKS: The largest dry dock, owned by Ishikawajima-Harima Heavy Industries Ltd. (and another six smaller dry docks owned by Mitsubishi Heavy Industries Ltd., Nippon Kokan K.K.). Max. length, 1,161 ft. 5 in.; breadth at entrance, 183 ft. 8 in.; height of sill above bottom dock,, 5 ft. 3 in.; depth on sill at high water, ordinary spring tides, 20 ft. 3 in.

REPATRIATION: Possible.

AIRPORT: Haneda International Airport 25 km. and served by many regular airlines.

TIME: GMT plus 9 hrs. No alterations made to clocks during year.

HOLIDAYS: Only observed at Public terminals.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance, 119; Fire, 119.

TELEPHONES: Telephones can be placed on board.

SERVICES: Almost all requirements by ships could be met, if time permits.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days; but 3 days extension possible if ship stays longer.

DEVELOPMENTS:

Honmoku Pier construction plan: A 26-berth pier of 5,200 m. with a water depth of 10 m.. for ships of 15,000 tons and a 3-berth container pier 750 m. long and with a water depth of 12 m. for 25,000 ton ships has been completed. Under construction are a 1-berth container pier 350 m. long and a 1-berth dangerous cargo pier 230 m. long. These will have a water depth of 12 m. and are intended for vessels of 30,000 tons.

Daikoku Pier construction plan: A 1,826,000 sq.m. land reclamation plan is being carried out in front of Daikoku-cho in order to build an 11-berth pier, 2,200 m. long with a water depth of 10 m. for vessels of 15,000 tons and a 2-berth container pier 600 m. long with a water depth of 12 m. for ships of 30,000 tons.

Shinko Pier remodelling plan: Stage I. Existing pier space of 244,000 sq.m. to be extended to 419,000 sq.m.

Stage II. Existing berths Nos. 9 to 12 to be converted to a berth 240 m. long with a water depth of 4.5 m. and an 800 m. long 4-berth pier with a water depth of 10 m.

Stage III. Road and rail links and bridges to be improved.

Ferryboat Pier construction plan: This pier has an area of 37,500 sq.m. and is designed for handling medium and long-distance ferries. The plan calls for a 600 sq.m. passenger terminal building, a 17,500 sq.m. parking lot for 340 lorries, 2 berths for 8,000 ton ships and 1 berth for a 1,000 ton ship.

AUTHORITY: Port and Harbour Bureau.

YOKOSUKA: 35.17 N. 139.40 E.

DOCUMENTS:

Customs:
- Port Call Notification.
- Cargo List.
- List of Crews dutiable possessions.
- Passenger List.
- Crew List.
- Ship's Nationality Certificate.
- Port Departure permission paper.

Immigration:
- Crew List.
- Port Call Notification.
- Passport or Crew Pocket Book.

Quarantine:
- Declaration of Health.
- Crew List.
- Passenger List.

Plant Protection Station:
- Plant Importation Inspection Application.

Maritime Safety Agency:
Port Call Notification.
Application for Loading, Transfer and Unloading of Explosives and Combustibles.
Application for Transport of Explosives and Combustibles.
Port Authority:
Port Call Notification.
Application for use of Facility.

PILOTAGE: In applying for Pilot at time of entry and departure, Pilot station should be contacted 20 hours in advance of beginning of Pilotage through Agent. 44 Pilots available. Pilot boat has telephone.

ANCHORAGES: At 4th District of Yokosuka Port. Depths 10–30 m.

RESTRICTIONS: The 1st, 2nd and 3rd District of Yokosuka Port under compulsory pilotage districts.

MAX. SIZE: At buoys: length 200 m., draft 9.6 m. At wharves: length 200 m., draft 9.6 m.

HEALTH: Quarantine station to be informed in advance name of last port, ship's name, tonnage, number of crew, number of passengers, ship's nationality, etc. In event any suspected disease, Agent should be advised. When isolation of ship needed, it will be transferred to Nagahama Quarantine Station in Yokohama.

RADIO: Local radio station.

TUGS: Can be arranged through Agent. Tugs normally join vessel in 3rd District when vessel enters Nagaura and New Port, and in 7th District when it enters Kurihama. Tug's lines to be used. Charge for tug's lines included in charge for tug.

BERTHING: Agent submits application for berth to Port Authority (Nagaura and Kurihama port offices and Yokosuka New Port Wharf Company).
Nagaura Pier No. 1, depth 9 m.
Nagaura Pier No. 2, depth 10 m.
Kurihama Pier depth 7.5 m.
New Port Pier No. 1, depth 10 m.
New Port Pier No. 2, depth 10 m.
Five buoy berths in depths of 9.5 to 13 m.

STEVEDORES: Agent will arrange stevedores.

MEDICAL: Agent can arrange doctor who understands foreign languages.

TANKERS: No berthing facility for commercial tankers. Only U.S. Naval Base, Yokosuka, has berthing facilities.

FRESH WATER: Available by barge or ex wharf. 50% additional charge in case of bad weather or out of office hours.

FUEL: Available ex-lighter.

GANGWAY/DECK WATCHMEN: Agent arranges watchmen.

OPENING/CLOSING HATCHES: Stevedores or crew carry out this work.

CUSTOMS ALLOWANCES: Tobacco: 2 packets per day. Spirits: 1 bottle when more than 1 month voyage; 2 bottles when more than 6 months voyage.

CONSULS: None.

REPAIRS: Dockyards available for all repairs.

DRY DOCKS: 1 – 475×19.5 ft.; 1 – 352×15.75 ft. 5 large-size slips; 1 rigging wharf.

REPATRIATION: No facilities exist. If necessity occurs, Yokohama Immigration Office will attend.

AIRPORT: 40 km. to Tokyo International Airport.

TIME: GMT plus 9 hours. No alterations during year.

HOLIDAYS: Cargo work usually daytime. On Saturday afternoon and Sunday, National holidays, Municipal Inauguration Anniversary, and December 31, January 1, 2 and 3 no cargo work.

POLICE/AMBULANCE/FIRE: Police, 110; Ambulance/Fire, 119.

TELEPHONES: Facilities now underway.

GENERAL: Port situated in city confines, a portion of port is used by JMSDF and also by the U.S. Navy according to Japan-U.S. Security Treaty.

AUTHORITY: Yokosuka City.

AGENT: Sub-agent of Dodwell & Co., Tokyo. Sagami Unyu Kabushiki Kaisha, Taura Minato-Machi, Yokosuka-sui, Kanagawa-ken. Cables: Sagami. Tel. Yokosuka (0468) 61-3111. Telex 3852-5280.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Jordan

AQABA: 29.31 N. 35.01 E.

DOCUMENTS:

1 copy Freighted Manifest, stating all details.
6 copies Unfreighted Manifest.
2 copies of Unfreighted Manifest not showing shippers nor consignees but weights and measurements.
1 set of non-negotiable Bills of Lading.

All Manifests should bear the following clause: "This is to certify that the above vessel has not called and is also not scheduled to call at any Israeli ports nor is owned by any Israeli Company, also it is not included in the Black List." All the above documents are to be airmailed to the Agent's Head Office in Amman and not Aqaba.

Documents required by the authorities for free pratique:

7 copies Crew List.
7 copies Passenger List.
1 copy Stores List.
1 copy Crew Declaration List.
1 copy Vaccination List.

The following forms to be filled:

2 copies of Maritime Declaration Form.
1 Customs Declaration Form.
2 copies Vessel's Specification Form.
1 copy Pilotage Form.

The following documents to be produced for checking:

(a) Log Book.
(b) Ship's Registry Certificate.
(c) Derating Certificate.

PILOTAGE: Compulsory Pilotage in that area of Aqaba Bay North of an imaginary line 270° from Al-Breij Point. Ships in harbour requiring a Pilot should by day hoist "G" flag below a ball or shape, one hour before ship is ready to move; and "B" flag by night with a red over white. The sound signal is four long blasts. Advance notice of the ship's requirement of pilot service should be given to the Agent who will advise the Harbour Master or his representative. It should be noted that vessels may proceed to sea from the anchorage without taking a Pilot, but for ships leaving the berths alongside, pilotage is compulsory, and the signals described above should be made.

ANCHORAGE: About 0.5 miles from shore in depths of 15 to 30 fathoms. Ships awaiting discharge can easily anchor in deep water anchorage which can accommodate 25 ships or more.

MAX. SIZE: Up to 20,000 d.w.t. Max. draft 32 ft. Phosphate loading berth: up to 50 ft. draft.

TUGS: The tugs available at Aqaba are only for towing barges and handling ship's line during berthing but no salvage tugs are available.

HEALTH: A ship arriving from sea should, in addition to the "G" flag for Pilot, hoist its signal letters and "Q" flag to request free pratique if it is healthy. If there are passengers to land, "I" flag should be hoisted. The port doctor boards the vessel together with a representative of the Port Dept., Customs Dept., Passport Dept., and Police. If the vessel has to anchor first, boarding the vessel takes place at anchorage. If the vessel berths alongside, then the aforementioned representatives board the vessel. Health certificates of crew and passengers are required.

RADIO: Aqaba Radio station call sign JYO. Watchkeeping hours GMT 0500 to 1700. Station has transmitting frequencies presently only 500 and 477, however, 2182, 2612.5, 4326.5, 6479, 8723 are reserved.

Station can receive on all M/F and H/F frequencies. Station listens continuous, 500 kc/s. at present; will listen 6200 to 6300 A1 H to H plus 10.

VHF: Aqaba Port Control at Harbour Master's office listen from 0700 to 2400 hrs. local time on VHF Channel 16, working Channels 10 and 12 for service messages. Pilots listen VHF Channel 16.

BERTHING:

General Cargo Berth: Three medium-size ships or two large ships can berth alongside. The depth is 10 m. (32 ft.) at low tide.

Phosphate Loading Berth: The berth is 210 m. long and 32 ft. depth. It is situated South of the General Cargo Berth and is especially built to load phosphate. The berth is designed to accommodate ships of up to 20,000 d.w.t. In addition, pipes have been laid to supply petroleum to a nearby tank farm for the occasional import of some petroleum products. There are two main berthing dolphins with a loading tower in between, and mooring dolphins at each end. The loading tower is connected with a conveyor belt feeding the tower from two silos with a 20,000-ton capacity each. There is a short retractable boom and telescopic trunk which can be travelled forward up to a distance of 9 m. from the berthing face to plumb the centre of the hold of a ship. The loading capacity is 500 t.p.h. The guaranteed loading rate by the Phosphate Company is 2,000 tons per weather working day of 24 hours. Vessels should arrive at the berth with as large an amount of water ballast as possible, both to facilitate berthing (as there is no tug) and to reduce the height from water-line to hatch coaming. This height should not exceed 30 ft.

Bulk Export Berth "B": Is 180 m. long with 15.5 m. (50 ft.) depth of water at low water spring tides and is designed for berthing and loading 100,000 d.w.t. bulk carriers. The travelling ship-loader has a capacity of 1,500 tons of phosphate per hour and provision is made in the design for the installation in the future of a second similar shiploader to give a total loading capacity of 3,000 t.p.h. Phosphate for loading into ship is weighed on a continuous recording belt weigher (accuracy +0.5% between 25% and 150% of rated capacity) and is loaded through a telescopic pivoting feed chute. Clearance above high water level is 18 m.

Lighters Wharf: The Lighters Wharf has a length of 215 m. and a width of 10 m. and a depth of about 9 ft. About 10 lighters can be discharged alongside.

STEVEDORES: Stevedoring Company's working hours are from 0800–1600 hrs. Work has to start at 0700 hrs. and end at 1600 hrs.; therefore, there are two compulsory overtime hours in the morning, from 0600 to 0800 hrs. and 1 hour in the afternoon, i.e. from 1600 to 1700 hrs.

Ships Working Hours: Ships can work round the clock, depending on Captains' option and the number of ships available in port. Opening hatch of a ship is allowed up to 2200 hrs. and subject to Port Authority agreement. Friday is the official weekly holiday, however, work is carried on, on the ships.

TANKERS: Berth in daylight hours only.

MEDICAL: The Health Section of Aqaba Port Department gives all medical services required and responds to any urgent call by radio before arrival. A government hospital is available and is satisfactorily staffed by doctors. A doctor may be called on board at any time day or night, to attend to sick crew or passengers by arrangement with the Agent.

FRESH WATER: Can be supplied to ships berthed alongside.

FUEL: Bunkering is inadvisable. In case of necessity, fuel oil can be transported from the refinery in Zerka by tank lorries with a capacity of 12 tons each. Three day's notice must be given in order to arrange transport.

GANGWAY/DECK WATCHMEN: Customs provide a guard who has to be given full board and lodging. Ships are also supplied by local watchmen through Agents.

HOLIDAYS: Arbor Day (January 15th); Arab Summit Conference Day (January 17th); *Thil-Hijja 10, Eid El Adha (January 14th); Arab League Day (March 22nd); *Moharram 1, Islamic New Year (March 3rd); Independence Day (National Day May 25th); *Rabi' El Awal 12, Prophet's Birthday (April 13th); H.M.'s Accession to the Throne (August 11th); Birthday of Crown Prince Hassan (September 5th); *Rajab 27, Al-M'raj Al Sharif (May 24th); Birthday of H.M. the King (November 14th); Arab Renaissance Day (November 22nd); *Shawal 1, Eid El Fitr (November 26th).

*Dates fluctuate due months being lunar months.

CONSULS: No consul or vice-consul available at Aqaba. All Consular Offices in Amman, the Capital.

TIME: GMT plus 2 hours.

REPAIRS: A shipyard has been established to build fishing boats and trawlers, barges, tugboats and undertake minor repairs. Welding can also be carried out.

DRY DOCKS: No dry docks are available at Aqaba.

AIRPORT: From Aqaba Air communication: Alia, (The Royal Jordanian Airlines) to Amman 4 flights weekly. Distance to Amman International Airport, 355 kms.

GENERAL: Masters are warned that during the Winter months strong Southerly gales can develop within two hours followed by swell. In such case it may be necessary to unberth the vessel, and it should be noted that there is no tug available for this operation. Vessels in the anchorage in such weather conditions should not hesitate to weigh anchor if there is a possibility of dragging, and proceed out of the bay until the weather moderates.

DEVELOPMENTS: 4 general cargo berths under construction. It is estimated that the construction will take about 2 years, total length of the 4 new berths is 720 m.

AUTHORITY: Aqaba Port Department, Ministry of Transport, Ports, Railways and Airports in Amman.

AGENT: *Head Office:* Amin Kawar & Sons, POB 222, Phone 22324 (6 lines). Telex: 1212. Amman – Jordan. Cables: Orenco Amman.

Port Office: Amin Kawar & Sons, POB 22. Phone: 83. Telex: 0220 Aqaba – Jordan. (All correspondence to be addressed to Head Office at Amman).

Kenya

MOMBASA: 04.04. S. 39.40 E. (See Plan)

DOCUMENTS:
Health Certificates: Forms obtainable from Pilot.
6 Crew Lists.
10 Passenger Lists.
Dangerous Cargo Lists.
Ship's Register.

PILOTAGE: ETA through ships' Agents, 48 hours' notice. VHF Channel 12 (Mombasa Radio VHF Ch. 16). Pilot boat 72 ft. ex-Admiralty launch, white. No signals for Pilot – call on VHF 12 (Mombasa Pilots) or by signal lamp to lighthouse. Pilot boat position one mile outside turning buoy on Ras Serani leads (301°) except for deep-load tankers (over 35 ft.) when pilot boat position one mile from turning buoy on Mackenzie leads (327°). No special bad weather regulations. Pilot ladder 6 ft. from water – must have manropes – light at night.

ANCHORAGES: No safe outer anchorage.

RESTRICTIONS: No tidal restrictions. Entry for dangerous cargo restricted to daylight. Entry for tankers over 650 ft. restricted to daylight.

MAX. SIZE: Length 820 ft. Draft 40 ft.

HEALTH: Radio Port Health Officer, Mombasa, giving last port of departure, ETA Mombasa, condition of crew, any sickness on board, passengers. Must have Q Flag until doctor visits vessel or until Pilot passes information to lower flag.

RADIO: Mombasa Radio Coast Station M/F, H/F, W/T & R/T and VHF R/T Services:

Station 5ZF (W/T) 500–524 kc/s.; traffic list 0100, 0500, 0900, 1300, 1700, 2100; Continuous watch; listening freqs. 500 kc/s.

Station (R/T) 4409.4 kc/s.; traffic list 0533, 1303; schedules 0530–0600, 1300–1330; listening freq. 4104.4 kc/s.

(R/T) 8805.6 kc/s.; traffic list 0633, 1233; schedules 0630–0700 1230–1300; listening watch on 8255.6 kc/s 0330–1530 listening freq. 8255.6 kc/s.

Mombasa Radio also provides continuous R/T service on VHF for the benefit of ships in and around Mombasa within radius of 30 miles. Channel 16 for calling and Channels 26 and 27 for working. All times in GMT.

TUGS: Tugs join vessel inside harbour between Ferry and Kilindini reef. Tug lines no additional charge.

BERTHING: All berths fendered. Nos. 89 and 10 and Shimanzi Oil Terminal berths, no berthing on ebb tide, with range of 6 ft. or more. Kipevu Oil Terminal berthing on first of ebb with tankers over 650 ft.

CARGO HANDLING: No. 9 berth has been arranged for bulk export of soda ash. No berths for roll-on/roll-off traffic but a site is being considered. No container berth is available, but certain facilities at berths No. 16 and 17 available for containerised cargo in 1976.

Mbaraki cement berth for bulk export of cement clinker and automated loading of cement in bags is now in operation.

Shimanzi oil terminal now handles all imports of bulk vegetable oil as well as all other oil products except crude oil.

Bulk cargoes are at present handled by grabs, railway wagons, and lorries.

STEVEDORES: ETA preferably 48 hours in advance in order to arrange gangs. Advisable notify Habour Master ETA and also give quantity of cargo to be loaded and/or discharged and other matters of importance.

MEDICAL: In emergencies necessary to receive advance notice. Hospital facilities available. Inoculations required – smallpox (compulsory), yellow fever (endemic zones in Africa and South America), cholera (all ships from Asia).

TANKERS: Discharge and load white oils at Shimanzi. Discharge and load Heavy oils at Kipevu.

Shimanzi Oil Terminal: T-head jetty with 200 ft. long berthing head. Depth alongside 32 ft. LWOST. Bunkers and fresh water available. Slop reception facilities for up to 6,000 tons.

Kipevu Oil Terminal: T-head jetty with 225 ft. long berthing head. Tankers up to 65,000 d.w.t. berth at dolphins alongside jetty head; depth alongside 44 ft. LWOST. Max. length 820 ft. Max. draft 40 ft.

DENSITY: 1025.

FRESH WATER: Available at all berths in stream ex-tug at Harbour Master's discretion or barge of 140 tons capacity. 30 t.p.h. on quay.

FUEL: *Main Quay Berths:* Marine fuel oil, viscosity 1500 seconds. Marine diesel fuel. Gas oil cannot be delivered by pipe-line at these berths but delivery can be made up to only 10 tons by bulk lorries at extra delivery cost. Minimum 48 hours' notice required. Quantities of 10 to 30 tons can be made by rail tank wagon if 48 hours advance notice given. Thin fuel oil viscosity below 1500 secs. can be delivered at all berths through Fisher blender. Only 1 Fisher blender available and can deliver fuel to only 1 vessel at a time.

Shimanzi Oil Terminal: All grades, i.e. fuel oil, marine diesel, gas oil and thin fuel oil (through Fisher blender).

Cased Oil Jetty: Only marine diesel and gas oil can be delivered at this jetty.

Kipevu Oil Terminal: Only fuel oil of viscosity between 1500 secs. and 3500 secs available. Fuel oil viscosity below 1500 not available. At least three days clear notice required by EA Oil Refineries for arranging bunker delivery. Not possible to deliver any marine diesel or gas oil either ex pipe-line or rail tank-wagons/bulk lorries at this berth.

GANGWAY/DECK WATCHMEN: Watchmen available for gangway and deck and recommended.

OPENING/CLOSING HATCHES: Normally done by stevedores except Macgregor type hatches.

CERTIFICATES: Normal port requirements for safety cargo equipment.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes for each crew member for 8 days. Wine and/or Spirit, 8 small bottles of beer for each crew member for 4 days.

CARGO GEAR: All cargo gear supplied by stevedores.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented in Mombasa: Germany, British High Commission, India, Belgium, Denmark, France, Italy, Norway, Sweden, Netherlands, Greece.

REPAIRS: Normal running repairs.

DRY DOCKS: Vessels up to 2,000 tons, length 320 ft., beam 50 ft.

REPATRIATION: Possible. Facilities available.

AIRPORT: About 7 miles from port. Served by regular airlines. Mombasa/Nairobi 4 flights a day. Mombasa/Dar-es-Salaam 4 flights a day. From Nairobi regular lines all over world.

TIME: GMT plus 3 hours.

HOLIDAYS: Weekdays: 3 shifts – 0700–1500 hrs. 1500–2300 and 2300/0600 hrs. Saturday: 2 shifts – 0700–1230 and 1230–1800 hrs. Sundays: 1 shift – 0700–1500 hrs. New Year's Day; Good Friday; Easter Monday; Labour Day (1st May.); Madaraka Day (1st June); First Monday in August; Kenyatta Day (20th October); Independence Day (12th December); Christmas Day; Boxing Day (26th December).

Also for persons belonging to Islamic Faith: Idd ul Azha and Idd ul Fitr. 1st May (Labour Day) and Christmas Day are normally only holidays on which port closed except for necessary pilotage of ships in and out and for dealing with mails, passengers and their baggage, livestock and perishables. On other public holidays restricted working at Mombasa may be carried out at overtime rates. Overtime rates also apply on Saturdays after 1500 hrs. and on Sundays, and to third shift between 2300–0600 hrs.

POLICE/AMBULANCE/FIRE: In Port Area – Police 567 444; Ambulance 33; Fire 333.

TELEPHONES: Telephones supplied on board. Charges include cost of local calls. Telephone essential per port regulations.

SERVICES: All solvents for tank cleaning available. Repairs to Gyro compass, radar and most other electronic aids to navigation. Compass adjusting by arrangement with port.

SHORE LEAVE: All crew members allowed ashore and to travel except those from Socialist countries who must stay on Mombasa island. This does not include Tanga and Dar-es-Salaam.

PORT REGULATIONS: White tankers and vessels carrying explosives enter port daylight only. No vessels carrying explosives or dangerous cargo allowed to berth at Main Quay.

DELAYS: Normally one or two days for loading and discharging and for bunkering. Usually no waiting days.

SHIP'S OFFICER'S REPORT: The Boarding Customs require crew declarations on their special form duly signed by each individual member of crew. The excess private property, or the items not required during the ship's stay in port, are to be collected and placed in a locker or room and sealed by the Customs. This seal has to be kept intact even in the case of the vessel sailing from Tanzania to Kenya or vice versa. On arrival at the next port, the previous Custom's seal is replaced by the local authorities. No new crew declaration is needed if once filed at first port. However, it is recommended that an extra copy of the crew declaration is kept on board as a record in case it is requested by the local authorities.

AUTHORITY: East African Harbours.

AGENT: East African Commercial and Shipping Company, Kilindini Road, PO Box 95103. Tel. 26251/2. Telex 21151. Cables "Kenship, Mombasa".

Khmer Republic (Cambodia)

KOMPONGSOM 10.38 N. 103.29 E.

PORT LIMITS: The seaward boundaries are fixed by the buoys "KS" to the South and "A" to the East (for cargo ships) and 2 miles N.W. of Rocher Carre (for tankers).

DOCUMENTS:

Entry form to be completed on arrival.
23 Manifests of Cargo for Discharge.
2 Manifests of Cargo in Transit.
10 Crew Lists.
7 Passenger Lists.
7 Lists of Provisions.
7 Lists of Crew Personal Effects.
7 Lists of Arms and Ammunition.
7 Lists of Drugs and Narcotics.
Ship's Register.
Passenger Safety Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Contact "Pilot Kompongsom" giving ETA 24 hours before arrival. Pilotage is compulsory for all vessels of more than 150 nrt. Pilot launch is a white motor boat carrying international pilot signals. Cargo Vessels: Pilot boards at buoy KS. Tankers: Pilot boards 2 miles N.W. of Rocher Carre. Pilot station equipped with VHF simplex channel only, Channel 16.

ANCHORAGE: Southern Anchorage: Centred on buoy KS at the entrance of the deep-water channel in depths of 10 to 12 m.

Northern Anchorage: to the West of buoy A, in depths of 10 to 11 m.

Tanker Anchorage: two miles N.W. of Rocher Carre in depths of 15 to 18 m.

RESTRICTIONS: Entrance prohibited to Portuguese and South African vessels. Berthing daylight only, and unberthing day and night but delays may occur in bad weather during S.W. monsoon.

MAX. SIZE: Cargo vessels: draft 7.60 m. plus height of tide. Limited by entrance channel. Tankers: length 220 m., and draft 11.50 m.

HEALTH: Authorities board all vessels on arrival at the quay or in the outer harbour. Quarantine flag to be flown by all vessels even if coming from a Cambodian port. In case of suspected disease on board, contact "Sante Kompongsom" by radio before arrival.

RADIO: Kompongsom Radio; call sign XUK, operating 24 hours daily, medium wave: receiving on 500 kHz, transmitting on 500 and 458 kHz. short wave: receiving on 8364 and 4185 kHz. transmitting on 8480, 8680, and 4342 kHz.

TUGS: Available to assist berthing and unberthing. Join vessel in immediate vicinity of the berth. Vessel's lines used. Three tugs available, largest 1,500 h.p.

BERTHING: Commercial Dock: West side, 2 berths for vessels up to 9.50 m. draft. East side, 2 berths for vessels up to 7.50 m. draft.

New basin, for vessels up to 6.50 m. draft.

Tankers: Oil Refinery Terminal situated at Pointe du Depart. Two sea-line buoy berths in depths of 13 m. No slop disposal facilities. Hoses are lifted and connected by ship's crew.

STEVEDORES: Working times from 0700–1130 hrs, from 1400–1700 hrs., from 1900–2200 hrs. according to authorisation of Military.

MEDICAL: Advance notice required of serious cases to arrange transportation to Phnom Penh. Local doctors and hospital available for non-surgical cases. Crew require cholera and yellow fever certificates.

DENSITY: 1022 in February; 1012 in July.

FRESH WATER: Available at Commercial Dock at rate of 10 cu.m. per hour. Very small quantities may be supplied by tug.

FUEL: Only available supply by tanker-lorries in case of emergency.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

DEVELOPMENTS: New wharves being built and access channels deepened.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Each crew member allowed one carton cigarettes and one bottle alcohol for five days. Master not included in this restriction.

IDENTIFICATION CARDS: Seamans passports or seamans books are taken by immigration in exchange for a shore pass to be surrendered when vessel departs.

CONSULS: France, tel. 2742. All other consuls at Phnom Penh.

REPAIRS: Small repairs can be undertaken on board.

REPATRIATION: Can be arranged.

AIRPORT: Ream Airport, 18 km. from Kompongsom, domestic flights only. Pochentong Airport at Phnom Penh 226 km. from Kompongsom, with full international services.

TIME: GMT plus 7 hours all the year round.

HOLIDAYS: Work can usually be arranged on all days except at Cambodian New Year, 13th, 14th and 15th April, and for two days near the end of September which is the Buddhist Festival of the Dead.

POLICE/AMBULANCE/FIRE: National Police tel. 2630; Police Aid 17; Fire 18; Ambulance 19.

SHORE LEAVE: Allowed. Permission of Immigration Dept. is required to travel outside of Kompongsom port area.

Curfew: In force from 2200–0600 hrs.

AUTHORITY: Direction du Port Autonome de Kompongsom.

NOTES

Please also advise Shipping Guides (Services) Ltd.

Korea (North)

CHUNGJIN 41.43 N. 129.42 E.

DOCUMENTS:
8 Crew Lists.
2 Vaccination Certificates.
2 Lists showing currency, gold and valuables in possession of crew members.
The following information should be radioed to port authorities before arrival:
Number and nationality of crew.
Name of last port.
Ports called at during last month.

PILOTAGE: On reaching North Korean waters, vessels required to give a position report every 3 hours to KCSA Chungjin. Pilot and Port Authorities board in position 41.30 N. 130.05 E. where vessels should await Pilot. Water depth too deep to permit anchoring.

ANCHORAGE: No possibility of anchoring outside harbour limits.

CLEARANCE: On arrival in port, the radar, echo sounder, main and emergency transmitters and all optical equipment is sealed. An inspection team board the vessel to verify currency and valuables declarations. Seamen's Books required to be stamped with landing pass.

BERTHING: Berth No. 1 max. draft 24 ft. Berths 2 and 3 max. draft 27 ft. Berths No. 4 and 5 max. draft 28 ft.

CARGO GEAR: Vessels loaded and unloaded by ship's gear. At berths 4 and 5 there is a conveyor belt facility for coal loading.

SHORE LEAVE: Seamen not allowed to visit other vessels, or leave the harbour area.
Unauthorised money changing forbidden, and it is prohibited to take away Korean currency.
No bathing in harbour area.

NAMPO (Chinnampo): 38.43 N. 125.25 E. **(See Plan)**

Shipmaster's Report No. 1

DOCUMENTS:
8 Crew Lists.
2 Vaccination Lists.
2 Lists showing currency, gold and valuables in possession of crew. Bonded stores must be declared but not sealed.

ARRIVAL ADVICE: The following information should be radioed to KNSA Nampo before arrival:
(1) ETA Nampo Station, Lat. 38° 37′ 30″ N., Long. 124° 49′ 30″ E.
(2) Nationality.
(3) Gross Registered Tonnage.
(4) Net Registered Tonnage.
(5) Deadweight.
(6) Length overall.
(7) Height of Freeboard.
(8) Speed.
(9) Last Port of Call.
(10) Colour of ship's hull.
(11) Number of crew and passengers.
(12) Hatch Loading/Discharging cargo Plan.
(13) Draft.
(14) Ship's position together with ETA 24 hours before arrival within area connected positions 37° 00′ N. 124° 30′ E., 38° 08′ N., 123° 35′ E., and 39° 50′ N., 124° 07′ E. Also vessel should advise position and time passing above connected lines.

PILOTAGE/ANCHORAGE: Pilot and Port Authorities (Quarantine Officer and Immigration Officers) board at position 38° 37′ 30″ N. 124′ 49′ 30″ E. where vessels should anchor awaiting Pilot.
Night pilotage prohibited, according to port regulations.

CLEARANCE: After embarkation of Port Authorities at Nampo Station the Radar, Echo sounder, VHF, DF, Radio Room and all optical equipment is sealed. On arrival in Port, Customs Officers board the vessel and together with Immigration Officers search the whole ship.
Seamen's books required to be stamped with landing pass, also seamen's books are taken ashore by Immigration Authorities for formalities.

BERTHING: Coal berth can accommodate vessels up to 20,000 d.w.t. There are 2 conveyor belts for coal loading but 1 only can work at a time. conveyor belts are not movable, the vessel has to shift. Vessels loaded and unloaded mostly in the roads by ship's gear. There are 3 other berths but have no information.

RADIO: Nampo Radio. Call sign HML.

FRESH WATER: Only available by barge.

TIME: GMT plus 9 hours.

SHORE LEAVE: Seamen allowed to go ashore by boat or bus only. Seamen are not allowed to leave harbour area. In order to visit other vessels in port, application should be made to Immigration Authorities.

GENERAL: *Currency:* It is prohibited to take Korean currency out of the country.
Bathing: Prohibited.
Fishing: Prohibited.
Provisions: Limited quantities available at the Seamen's Club.

Shipmaster's Report No. 2

Information covering Nampo, North Korea, previously known as Chinnampo. See in connection with this B.A. Chart 1257 and 1656, China Sea Pilot III.

The following general information was produced by the navigating officers of a vessel in 1974.

NAVIGATIONAL INFORMATION: Pilot boarding point now 38° 37′ 5″ N., 124° 49′ 5″ E. Wreck at 37° 38′ 2″ N., 124° 48′ 2″ E., 3 masts above water at all states of tide. Radar echo good at 6 miles. Buoy – old position 37° 37′ 4″ N., 124° 51′ 4″ E., moved to 37° 37′ 2″ N., 124° 50′ 7″ E.
Light Sei To – flash every 23 sec. Visible for 8 miles
Light buoy at 37° 37′ 4″ N., 124° 53′ 6″ E., flashes 18 sec.
Light Shimai To flashes 18 sec.
Light San extinguished
Light Chiri extinguished
Light Hi To extinguished
Light at 38° 41′ 7″ N., 125° 18′ 1″ E., (Bachishin) flashes 30 sec.
Light at Nanryoki extinguished
Light at 38° 43′ 3″ N., 125° 24′ 6″ E., extinguished.

PILOTAGE, ANCHORAGES, INSPECTION AND CLEARANCE: The Pilot boarding point is at the same time the outer limit of Nampo Harbour and the clearing inwards point. To await Pilot and further instructions before proceeding into Nampo, vessels must wait here. Information can be obtained via coastal radio Nampo (details in Nautical Wireless Service Standing Instructions), VHF is not available.

The anchorage at the pilotage waiting point is good, and the bottom is a thin layer of grey mud with clay underneath it. With wind from the S.W., there is a slight swell. Depth of water between 25 m. and 26 m., vessels should anchor with a chain length of at least 100 m. on the capstan and calculate adequate room for swinging, since there is a very strong tidal flow at all states of the wind and weather, running up to 4 kn. according to our observations.

The Pilot comes on board with clearance authorities. As pilot cutter (also no VHF) a normal tug is used, which in Winter is also used as an ice-breaker. The tug does not display a Pilot's flag, only the national flag. On the engine skylight the protective shield of an anti-aircraft gun is mounted. The hull of the tug is black, superstructure white with large Korean characters on the front of the bridge. Pilotage only available during daylight hours.

At clearance inwards point (pilotage boarding point) all binoculars, including bridge binoculars, and photographic equipment is gathered together and sealed for the total time in port. It is only released after the Pilot leaves the vessel on departure from the port. Likewise all echo-sounding, radar, direction finding equipment is sealed. The use of such equipment and filming and photography in North Korean ports is completely forbidden.

From the clearance inwards point the journey to the anchorage in front of the town is usually at full speed for most of the way. The anchorage is selected by the Pilot. The Pilot gives a good impression and from our observations knows his job well. However, one can only expect very rudimentary English from him. The same applies to the clearance authorities who have only a very few words of English. Clearance proceeds slowly but is carried out very correctly.

GENERAL INFORMATION: When at anchor in front of the town, further official authorities come on board. These check the whole ship, and go through the deck and engine room areas accompanied by one chosen member of the crew. Whilst the ship is being examined, all other crew members must remain in their cabins. The crew member accompanying the authorities must have his seaman's book with him as identification. When the authorities leave the ship finally they take the log away, and bring it back after a few days. Going ashore is permitted, but normally only in the port area. There is a seaman's hostel there. Travel further inland is possible, but only by giving 24 hours prior notice to Immigration via the ship's Agent. Also from time to time it is possible for crew members to fly out, but this must be arranged via the state ship's Agent. Visits to other ships is also possible, but only by giving 24 hours prior notice to Immigration. Radios and cassette recorders may not be taken on land or even on deck. Their use is only permitted within the ship and cabins. Fresh water and fresh food are available. In the roads water is delivered by water boats. Removal of rubbish is also possible by due notice through the Agent, and is even possible at the anchorage. Boat manoeuvring can likewise take place, but it must be reported, and may only take place in the vicinity of one's own ship.

For clearance inwards, the following documents are required:

7 crew lists.
1 list of items in possession of crew divided into gold, valuables, money, signature.
1 vaccination list.
1 maritime declaration of health.
1 passenger list, even if none on board.
1 narcotics list.
1 list of tobacco and personal goods.

The authorities bring a list of provisions with them and fill it out after declaration on board. Stores, such as alcohol and cigarettes are not sealed.

The health authorities place greatest score by cleanliness of toilets, refrigerators, food stores, kitchens, pantries, hospital and first-aid station.

Generally, it may be stated that the ship's broker and Agent speak and understand good English, but from the authorities normally one can expect no knowledge of Western languages.

The port roads offer anchorages for at least 15 sea-going vessels and enough room for swinging. However, in each case at least 170 m. chain should be allowed so that the vessel lies securely. The tidal current, in accordance with our observations, runs at a good 4 kn. The anchorage bottom is good and comprises grey mud. The

depths of water shown in the charts are, in accordance with our observations, roughly correct.

To the West of the port on the town shore there is a large shipyard with a mobile gantry crane over a slipway under construction. The slipway is about 150 m. long. Normally, the crane is at night directly on the bank (high water mark) is illuminated and thus constitutes a good bearing, particularly at night, since otherwise no long-range port lights are available.

The position of the crane is about 34°, 43′ 2″ N., 125° 24′ 1″ E. This area where the shipyard is located is designated as "Iron works" in chart 1656 map of Chinnampo Ko. The waterside there no longer has an inlet, but has been straightened out, and building work is still in process. See plan section of "Guide".

Likewise building works are in progress along the whole shore line between the shipyard and Nampo Ki. The shore line is also straightened here, and to all appearances has been developed as anchorage and repair yard for the Korean Navy. The 2 red/black buoys to the South of the iron works in the chart are no longer there. In this area there is only a small fixed buoy for guard boats and fishing craft.

In the middle of Shienshin island there is a 9-storey white hotel, which is a good landmark by day.

The tidal pole in front of Nampo Ki is no longer available. On the Southern end Nampo Ki is a bunker with a small house on top. The lower part of the house is pink and the upper part white. The West pier of Hibatsu To has 5 mobile port cranes, with lifting capacity up to 5 tons. At the Southern end of the pier are 2 new large warehouses. A floating crane is available. American type, and with a capacity of a good 160 tons. On the Western pier is likewise a small warehouse and 2 mobile port cranes (up to 5 tons). At the Southern end of the Western pier, are two berths for deep sea freighters with a good 9 m. water depth N.W. alongside. At the Southern part of the Western pier there is a good 8 m. of water along a length of some 210 m. At berth 1 (West pier, Southern berth), vessels up to 32 ft. draft can go alongside in normal water conditions. The depth of water in the inner part of the port could not be exactly determined, but judging by the vessels there must be about 5 m.

The old coal pier has a berth with at least 10 m. depth of water. East of this pier is also a further coal pier, equipped also with conveyor belts and about 10 m. depth of water alongside.

For berthing and unberthing there are one large and three small tugs available. The large tug acts as pilot craft and for the authorities to visit for clearance. It has been previously described.

From our observations, in the inner roads loading and unloading rarely takes place. There are only a few lighters available. As the port is overloaded, a long waiting time must always be allowed for (at least 14 days).

Medical care for crew members here is somewhat difficult, since one tries with all means to avoid having to have the crew member transferred beyond the confines of the port. In this connection, the doctor comes only once on board and a decision is taken as to whether or not a visit to hospital is necessary. For such a hospital visit one has further to go through the Agent to the authorities to obtain permission to go beyond the port area.

Below are some soundings of the roads. The vessel's draft = 8.35 m. Times in GMT. Wind in degrees and knots. First bearing is Nampo Ki, second bearing is the pier light, fixed red, in front of the east pier:

Weather	*Bearing*	*Time*	*Measured depth, taking into consideration vessel's draft*
			m.
15° 8 kn.	344°, 38°	2330	21.15
100° 8 kn.	355°, 42°	0130	19.93
360° 5 kn.	355°, 39°	0715	15.97
340° 5 kn.	343°, 37°	0900	18.41
070° 9 kn.	340.5°, 38.5°	2330	21.15
060° 5 kn.	343°, 39.5°	0100	21.46
Circulating 5 kn.	324°, 41°	0430	16.88
270° 13 kn.	339°, 37°	0000	21.46
300° 20 kn.	357°, 40.5°	0300	19.93
290° 10 kn.	345°, 40°	0840	18.43
Circulating 5 kn.	360°, 45°	0640	16.58

The pier structures have shuttering walls at the bottom, and the upper part is composed of equal-shaped stone blocks. At the mooring points fenders are composed of car tyres strung together on wires. The pier itself is in a satisfactory condition. Rail connection is available, and lorries may run along it. Water connections are also available. As the two cranes on pier berth No. 1 have very large beams, they are often positioned between two hatches and then work the two hatches alternately.

Loading and unloading is made difficult since it is not possible to obtain precise information as to the number of gangs, the time they will turn up for work, whether they will work with their own equipment or with cranes or with the mobile cranes available. It continually happens that suddenly port workers will appear or disappear, although shortly beforehand the Agent will inform to the contrary.

Telephone connections with Europe are possible. Connections can be obtained at the Seaman's Club in the port after 1600 hrs. On average it takes an hour to get through. It is advisable always to try to get a line to Moscow, and then ask for the required connection oneself in English from the Moscow operator. This noticeably hastens the connection. Comprehension is at times very bad, calculation of charges is dreadful, and one must be prepared to pay three or four times the price as would appertain for a similar call in Europe.

The local currency is the Won. 1 US dollar = approx. 2.15 Won. In the Seaman's Club all customary Western currencies can be changed into Wons.

Loading rigging can be positioned from the ship. If for example this has to be done at night, it must be discussed in advance with the Agent as to whether this has to be done by the ship or the port personnel. If the rigging is done by the port personnel, it must be checked carefully.

Clearance outwards occurs in the harbour roads and not at the pier. It takes a good 3 to 4 hours. Here also, all crew members must be in their cabins for checking purposes, and if the authorities require it, personnel must be available to guide them around the ship. On leaving the port, yet another list must be presented of currency which each crew member has spent in Korea.

They are only interested in foreign currency which has been exchanged for Wons in the Seaman's Club, since Wons may not be exported.

On the journey out from the port, the Pilot is accompanied by an assistant and member of the coastguard. The latter, shortly after coming on board, removes all seals from apparatus sealed when coming into port. The Pilot leaves the vessel at a position 38° 35′ 5″ N. and 124° 55′ 5″ E.

Herewith some soundings, taking into consideration draft of vessel. First bearing – pier light East side Hibatsu To – fixed red. Second bearing chimney at 38° 44′ 1″ N. and 125° 25′ 9″ E. (shown on the chart as Chy.)

NOTES

Please also advise Shipping Guides (Services) Ltd.

Korea (Republic of South)

GENERAL:

Foreign flags: Ministry of Transportation issued following instructions regarding entry and exit of foreign flag vessels in South Korea waters.

Item 1: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessels under ownership of North Korea, North Vietnam and Red China.

Item 2: Director, local Marine Bureau shall not grant permission on entry of foreign flag vessel bound for North Korea or falling short of 90 days of departure from ports of North Korea.

Item 3: No restriction shall be applied on entry of foreign flag vessels unless same appertained to above clauses in accordance with internationally accepted practices.

CHINHAI: (Jinhae)

SHIPMASTER'S REPORT

LOCATION: 35° 09′ N., 128° 40′ E. (Town); 35° 07′ N., 128° 42′ E. (Fˌer).

DOCUMENTS:

8 Cargo Manifests.
8 Crew Lists.
4 Stores Lists.
3 Lists of Crew's Personal Effects. Tobacco/Spirits.
1 Vaccination List.
1 Health Declaration.
2 Currency Lists.

All documents are Standard Form. Although currency lists are required, there are no restrictions on importing or exporting either Korean or other currencies.

PILOTAGE: Pilotage not compulsory but recommended. Pilots are ordered through Agents and board vessel about 10 cables West of Kadok Do Island. VHF not available. No pilotage during night hours. Pilot boat is a wooden launch exhibiting International pilotage signals.

ANCHORAGE: Recommended 7 cables in Northwesterly direction off Tongdu Mal Lt. Ho. (Kadok Do.). Depth 25 m. Good anchorage is sand and mud. Quarantine anchorage is located about 1 mile N.N.W. from Chori Som Island.

RESTRICTIONS: Curfew effective from 2400 hrs. until 0400 hrs. daily.

HEALTH: Radio pratique not available. Pratique granted after inspection.

RADIO: Pusan Radio, call-sign "HLP".

TUGS: Required for mooring and unmooring. 2 tugs available of 600 and 1,000 h.p.

BERTHING: Chinhai is a principal naval base. Vessels drawing up to 17 ft. can be accommodated alongside inner harbour.

A buoyed channel with a depth of 36 ft. MHW leads from East of Madang So, to the only berth available for deep-sea vessels about 1.5 miles N.E. The berth, about 660 ft. in length, belongs to the Chinhai Chemical Co. and can accommodate vessels with a maximum draft of 34 ft.

Depth-sounding alongside showed at least 43 ft. 3 in. at HW. (officially 34 ft.). Distance from HW level to deck of pier 2.10 m. Bottom thick mud, and density 1025.

Vessels not exceeding 34 ft. saltwater draft berth 2 hours prior HW., and discharging commences immediately.

The berth is equipped with 1 grab only, and with conveyor-belt to nearby factory. The berth is used for discharging phosphate and potash, and very few general cargoes are handled. Discharge rate for phosphate is a maximum of 8,000 tons per 24 hours, with average of 6,200 tons.

STEVEDORES: Work is continuous throughout 24 hours including Sundays, and without mealbreaks.

MEDICAL: Attention available.

FRESH WATER: Available ex-barge from Masan, Min. 200 tons at US $3.00 per ton.

FUEL: Available ex-barge from Masan.

CONSULS: Nearest at Pusan.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Available and recommended.

REPATRIATION: Possible from Pusan.

CUSTOMS ALLOWANCES: No restrictions. Stores remain unsealed.

TIME: GMT plus 9 hours. No alterations.

AUTHORITY: Masan District Marine Bureau.

DAIPORI (Daepo): 38.10 N. 128.36 E.

Vessels bound for Daipori to load iron ore must first call at Mukho for quarantine and customs clearance.

Pilotage from Mukho to Daipori, distance of 50 miles, is not compulsory, but recommended.

INCHON: 37.29 N. 126.38 E.

DOCUMENTS: *Purser's Report:*

Arrival:

8 Crew Lists.
4 Cargo Manifests.
4 Stores Lists (Bond and shop).
4 Crew Customs Declaration.
4 Narcotics List.
4 Arms and Ammunitions List.
4 Ports of Call Lists (last 90 days).
1 Vaccination List.
2 Money Lists.
4 Passenger Lists (Marked Nil).
Derat Certificate or exemption.

All the above lists are typed on ship's plain paper.

Coasting on Korean Coast: At each port after the first, one requires the same papers but only two copies of each, with the exception of the Crew List, of which 5 copies are required.

Vessels with hazardous cargo must complete application to carry hazardous cargo and an application for anchorage of hazardous cargo vessel.

PILOTAGE: There are two Pilot stations for entering Inchon:

Ando – At the Ando Light some 38 miles off Inchon, position 36° 58′ N. and 126° 10′ E. located in entrance to Channel approaching Inchon from the Yellow Sea. 48 hrs. advance notice to Agent required for vessels requesting to meet Pilot at Ando. Customary boarding point for deep-draft vessels.

Palmido – Pilotage from Palmido to Inchon or Inchon to Palmido is compulsory. This Pilot station is at Palmido Island and Light, some 8 miles off Inchon, position 37° 21′ N. and 126° 31′ E.

ANCHORAGE: *Anchorage A.* Commercial anchorages available for 9 vessels. The position of each anchorage is as follows:

Number	*Position*	*Draft acceptable*	
A–1	37°29′56″ N. 126°36′05″ E.	42 ft.	
A–2	37°29′32″ N. 126°36′02″ E.	31 ft.	
A–3	37°29′15″ N. 126°35′44″ E.	39 ft.	
A–4	37°28′56″ N. 126°35′25″ E.	33 ft.	
A–5	37°28′33″ N. 126°35′20″ E.	29 ft.	
A–6	37°28′11″ N. 126°36′08″ E.	42 ft.	
A–7	37°27′57″ N. 126°35′30″ E.	28 ft.	(Coaster only)
A–8	37°27′48″ N. 126°35′04″ E.	42 ft.	
A–0	37°27′23″ N. 126°35′40″ E.	26 ft.	(Coaster only)

Only two anchorages, as specified below, are allocated for vessels carrying logs to be discharged rafting in stream:

A–2E	37°29′28″ N. 126°36′08″ E.	28 ft.
A–3E	37°29′07″ N. 126°36′02″ E.	32 ft.

A sudden congestion of log vessels could cause undue delay in waiting berth.

Anchorage B. Available for twelve vessels. This anchorage is used mostly for military cargoes, partly used as quarantine anchorage and/or for commercial and Army vessels awaiting berth.

Number	*Position*	*Draft*
B–1	37°27′22″ N. 126°34′59″ E.	35 ft.
B–2	37°26′54″ N. 126°34′45″ E.	39 ft.
B–3	37°26′24″ N. 126°34′35″ E.	37 ft.
B–4	37°25′55″ N. 126°34′24″ E.	37 ft.
B–5	37°25′27″ N. 126°34′13″ E.	37 ft.
B–6	37°24′58″ N. 126°33′58″ E.	40 ft.
B–7	37°28′00″ N. 126°35′25″ E.	34 ft.
B–8	37°26′30″ N. 126°35′11″ E.	35 ft.
B–9	37°26′01″ N. 126°35′02″ E.	36 ft.
B–10	37°25′32″ N. 126°34′51″ E.	40 ft.
B–11	37°25′08″ N. 126°34′36″ E.	42 ft.
B–12	37°24′28″ N. 126°33′50″ E.	44 ft.

Anchorage C. Available for eight vessels. This anchorage is used either for quarantine, vessels awaiting berth, or for vessels (military) discharging/loading dangerous cargoes.

Number	*Position*	*Draft*
C–1	37°24′29″ N. 126°34′26″ E.	26 ft.
C–2	37°24′07″ N. 126°34′17″ E.	30 ft.
C–3	37°23′07″ N. 126°34′08″ E.	35 ft.
C–4	37°21′21″ N. 126°33′55″ E.	42 ft.
C–5	37°24′37″ N. 126°34′52″ E.	42 ft.
C–6	37°24′10″ N. 126°24′45″ E.	30 ft.
C–7	37°23′47″ N. 126°34′36″ E.	42 ft.
C–8	37°23′25″ N. 126°24′21″ E.	42 ft.

RADIO: Address of Radio Station and call sign, Inchon Radio (HLC).

RESTRICTIONS: A peculiarity of Inchon port is the wide tidal range, i.e. max. 30 ft. difference between the low and high tides. Because of the extreme tidal range in Inchon Harbour and the strong tidal currents which result, the importance of maintaining strict surveillance of the vessel's mooring lines is emphasised. In this regard, the ship's officers and crew must be diligent in the performance of their duties. All vessels to discharge or load commercial cargoes should invariably obtain prior permission for berthing/anchoring from the Inchon District Marine Bureau at least 24 hrs. before arrival, then proceed to a nominated anchorage in the stream under direction of a compulsory Pilot.

HEALTH: The Quarantine Anchorage is located outside the harbour limit, at anchorages No. B–4, B–5, B–6, B–10, B–11, B–12, or C–1 to C–8, the position and depth of which are noted above. A vessel which sailed from an "Affected Zone" and not passed 10 days thereafter is compelled to receive 24 hrs. quarantine before entering the discharging anchorage. Quarantine is available only for the period from sunrise to sunset.

TUGS: Tankers berthing at Kyung In Energy Co. Terminal normally require three tugs for berthing and two for unberthing. All tugs operated by Korean Navy.

BERTHING: The port consists of the "Outer Harbour" and "Inner Harbour" which are separated by two islands called Wolmido and Sowolmido, which are connected by a bank. The Outer Harbour, comprising downstream of the Han River, is used as Stream Anchorages for commercial ocean steamers.

A new tidal basin constructed in the area of the present inner harbour. The dock will include entire area of the present Inner Harbour which would provide a total 1,400,000 sq.m. of water area; 3,820 m. of berthing pier including 1,160 m. of (Container Pier and max. 12 m. or 39 ft.) depth. This new dock is directly connected with the terminal of the Seoul-Inchon Highway. After completion the new dock would accommodate a total of 240,000 tons of vessels alongside the piers simultaneously, as follows:

50,000 tonners 1 ship
20,000 tonners 3 ships
10,000 tonners 6 ships
8,000 tonners 8 ships
5,000 tonners 1 ship

TANKERS: *Kyung In Energy Co. Terminal*

Designed for 50,000 d.w.t. over 50 ft. depth at LW. The marine terminal is situated at 37° 30′ 12″ N. 126° 36′ 19″ E. The face of the dolphin fendering system is on a bearing of approximately 347° true.

The vessel will be berthed alongside the main and secondary berthing dolphins with the vessel's hull against the fenders, which are an integral part of the dolphins. All the dolphins are equipped with electric capstans and quick-release mooring hooks. A navigation light and fog horn is located on the Southern Exterior Mooring Dolphin (Exterior Mooring Dolphin No. 1). A navigation light is also located on Exterior Mooring Dolphin No. 2 on the N. side of the terminal facilities. When a vessel of the 50,000 d.w.t. class is moored to the terminal, the bow and stern lines will perform the function of the breast lines. Therefore, the spring lines must be led out through the chocks on board which will provide sufficient leads ahead and astern to restrict the movement of the vessel along the face of the dolphins. In this regard, due consideration must be given to the rise and fall of the tide.

Loading Arms: There are three "Continental-Emsco" loading arms situated on the loading platform. The one to the extreme North and the middle one of the three are for the discharge of crude oil. Both are fitted with 16-in. swivel connections having 150 pound flanges. The loading arm to the extreme South is for the loading of naphtha and is fitted with a 12-in. 150-pound flange. The loading arms are designed for a working pressure of 100 p.s.i.

During the connecting and disconnecting of the loading arms to the vessel, the loading arms will be manipulated and positioned by shore personnel. During the period of time when the loading arms are connected to the vessel's manifold, they will be in the "float" position and will be self-adjusting.

General Information:

Under no circumstances should any member of the ship's crew activate or operate the controls for the loading arms. Authorised shore personnel will perform this function.

The "Continental-Emsco" loading arms will tolerate only a min. amount of transverse movement by the vessel in either direction. In other words, the movement of the vessel along the face of the dolphins is restricted. For this reason, it is mandatory that the vessel be kept in position, and that the mooring lines be properly tended. It is the responsibility of the vessel to maintain sufficient deck crew on duty to properly tend the mooring lines, and to ensure that the vessel maintains proper position relative to the loading arms.

Discharging Crude Oil:

The distance from the loading platform to the tanks is approximately 2.2 kms. (1.4 miles). A 30-in. block valve is situated near the location where the trestle joins the island causeway. Block valves are also installed in the pipe-line system near the inlet to each of the crude oil storage tanks.

There are three crude oil storage tanks on Yul Do Island. Each has a capacity of 200,000 barrels. The tanks are 48 ft. in height with an overflow at 46 ft. There are no check valves in the crude oil pipe-line system. Thus, the vessel must take precautions against back-filling due to head pressure on the system.

It may be necessary to discontinue the discharge of crude oil when changing from one tank to another ashore. The vessel will be given adequate notice for the stoppage of the ship's cargo pumps.

Ballast:

It is unlawful to discharge dirty or oily ballast water into the waters of Inchon Harbour. Severe penalties may be invoked against the vessel by the Republic of Korea in the event of pollution of harbour waters.

The centre loading arm provides a dual function. It is used for discharging ballast from the vessel as well as for the discharge of crude. The ballast flows through a 12-in. pipe-line to the ballast storage tank on Yul Do Island. This tank has a capacity of 30,000 barrels, and is situated about 1.1 kms. (0.68 miles) from the loading platform.

Loading Naphtha:

Naphtha is stored in two mainland storage tanks each of which has a capacity of 125,000 barrels. Three pumps provide the flow for shipping naphtha. Each pump has a capacity of 1,600 g.p.m. (2285 BHP). The pumps are on independent circuits. Thus, the loading rate of the naphtha can be governed by the number of pumps used.

The pipe-line from the pumps to the loading platform is 18 in. and is reduced to 12 in. on the loading platform. A block valve is located in the 18-in. pipe-line near the point where the island causeway joins the trestle. Another block valve is provided in the 12-in. pipe-line on the loading platform.

The pumps which are used for shipping naphtha can be stopped from the Marine Terminal Loading Platform, but they must be started from the mainland. Under normal conditions the vessel's deck officer on watch should give the terminal personnel 10 minutes notice prior to requesting that the loading rate be reduced, and the same notification prior to the completion of loading. As previously stated, the pumps can be stopped from the loading platform in case of an emergency.

The approximate distance from the mainland naphtha storage tanks to the loading platform is 5.4 kms. (3.35 miles).

Regulations:

1. Sufficient number of crew members are to be on duty at all times to properly tend the mooring lines and ensure that the position of the vessel is maintained alongside of the dolphins.
2. Except in the case of an emergency, the deck officer on duty shall give the terminal personnel at least 10 minutes notice prior to changing the loading rate of the naphtha, and at least 10 minutes notice prior to the completion of loading cargo.
3. Under no circumstances is the vessel's main propulsion engine to be disabled, or are any repairs to be undertaken while the vessel is moored to the marine terminal.
4. The vessel's fire-fighting equipment is to be kept ready for immediate use. A sufficient number of hoses shall be led out forward and aft to provide full deck coverage.
5. Lights must be provided by the vessel to illuminate the water area in the vicinity of the bow, stern and off-shore side.
6. Smoking will be permitted in such *Interior* spaces as may be designated by the vessel's Master. However, smoking will not be permitted on any open deck areas.
7. The loading of ship's stores and supplies will not be permitted during the time ballast is being discharged, or naphtha is being received by the vessel.
8. Ullage hole screens are to be used at all times while bulk oil transfer operations are in progress.
9. Galley ranges, unless electric, are not to be used while the vessel is loading naphtha.
10. Except for the period of time actually required for passengers to embark or disembark from a launch, no boats, launches or vessels will be permitted to moor alongside a vessel which is berthed at the marine terminal.
11. Safety practices which are common to marine terminals on a world-wide basis will apply.

Honam Buoys: Lat. 37° 29′ 00″ N. and Long. 126° 36′ 03″ E., draft acceptable 30 ft., at East side of A–3 anchorage. This berth is the private facility of the Honam Oil Refinery Co. (joint company with Caltex) for discharge of their own petroleum products. Consisting of 4 mooring Buoys and sub-marine pipe-lines.

Union Oil Terminal, 42 ft. depth alongside. Berthing/unberthing in daytime slack water only.

MEDICAL: Launch is provided in emergency call to evacuate sick men. Modernised hospital is available. Provincial and Christian hospital.

STEVEDORES: There are 12 stevedoring companies with:
162 wooden barges (16,200 tons) – total capacity 34,200 tons.
60 steel barges (18,000 tons) – total capacity 34,200 tons.

DENSITY: Varies between 1022 and 1024.

FRESH WATER: Can be supplied by lighter, max. quantity 250 tons in 10 hrs. Earliest advance notice essential.

FUEL: Available by barge only.

CUSTOMS ALLOWANCES: One carton cigarettes or one lb. of tobacco, and one bottle wine or spirits allowed, each man.

IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.

REPATRIATION: Facilities for crew changes or repatriation.

GANGWAY/DECK WATCHMEN: Ship security guard is required. Stream charge 30% additional.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CONSULS: None.

REPAIRS: Deck and engine repairs possible. Floating cranes up to 60 tons capacity.

AIRPORT: 20 miles from port. Regular flights to Japan.

POLICE/FIRE/AMBULANCE: Police Officer (2) 0568; Fire Depot (2) 119; Medical Centre (2) 2535.

TELEPHONES: Portable communication facility is available.

TIME: Korean Standard Time. 9 hrs. ahead of GMT. No alterations during year.

HOLIDAYS: 1st January, 1st March,, 5th April, 6th June, 17th July, 15th August, 3rd October, 9th October, 24th October, 25th December.

GENERAL: Tide condition is critical, swift currents (high tide: 9 to 10 m.) special attention is required.

ACCOMMODATION LADDER: Essential for Port Officials on entry. Also for tanker berth no access allowed through plant. Rig on port side.

SHORE LEAVE: Launch service required, also local curfew ashore 2400 to 0400 hrs., on launches and craft 1900 to 0600 hrs.

DELAYS: Can be caused by bad weather.

SHIPMASTER'S REPORT

Approaches: Inchon, the port for Seoul, the capital of South Korea, is situated in Lat. 37° 28′ 20″ N., Long. 126° 37′ 09″ E., and is approached from the South through the Yellow Sea. From Kyoknyolbi Do (Clifford Is.) LH. a course should be set to pass one mile North of An Do LH., in the vicinity of which the pilot boat will be waiting. Pilotage is not compulsory from this point but is

recommended and the Pilot should be ordered at least 48 hrs. before arrival through the Agent, in Inchon.

From An Do vessels proceed via the Dong Soodo (East Channel) which is very winding and narrow in places. All lighthouses on this part of the Korean coast appear to show lights of very low power, the range of visibility appears to be about one quarter of that shown on charts and in the Adm. Light List.

Pilotage is about 38 miles to the Inchon anchorage for deep-sea vessels, about three hours steaming. The Pilot was good even in thick fog, and all Pilots seem to speak reasonable English. The Pilot launch is fitted with VHF.

The anchorage is extensive, with room for about 30 ocean-going vessels, holding ground is good and no trouble was experienced in currents of 5 knots, although even stronger currents are experienced at Spring tides.

The port: Can be divided into three sections according to location and function; the inner dock, outer harbour and Northern shoreline.

The Inner Harbour basin is presently operated for the accommodation of cargo ships up to 50,000 d.w.t. The outer harbour, of new construction, is largely for coastal and fishing vessels of less than 500 tons, and is located just outside and to the S.W. of the inner basin.

The Northern shoreline, North of the closed basin has unloading facilities at many private plants. These are lighter berths.

With the completion, in May 1974, of the new lock system and second tidal basin, the berthing facilities in the port have changed the cargo handling capacity from 1,420,000 tons to 6,270,000 tons per year by providing 3,820 m. length of quay and container berths.

Within the inner harbour is the first tidal basin (the older lock system dating from 1923). This basin is accessible through the new lock system.

Lock Particulars:

	For 50,000 d.w.t. vessels	*For 10,000 d.w.t. vessels*
Lock chamber	1 base	1 base
Total length	381 m.	288.25 m.
Usable length to		
Inner gate	280 m.	183 m.
Outer gate	310 m.	208 m.
Width	36 m.	22.5 m.
Height	18.5 m. from sill	18.5 m. from sill
Height	19.0 m. from bottom	19.0 m. from bottom
Number of gates	3 sets	3 sets
Length of gates	38 m.	24.5 m
Width of gates	8.3 m.	6.4 m.
Height of gate	18.5 m.	18.5 m.
Weight per gate	1,050 tons	590 tons
Time required for opening–closing	5 min.	3 min.

The Inner Harbour has berths for 27 vessels as summarised below:

Pier	*Length* m.	*Berthing capacity* d.w.t.	*Cargo type*
Pier No. 1	454	4,500 (3) vessels	Dry cargo
Pier No. 2	1,425	2,000 (4) ,,	Dry cargo and bulk cargo
		20,000 (1) vessel	,, ,, ,, ,,
		8,000 (5) vessels	,, ,, ,, ,,
Pier No. 3	1,250	8,000 (4) ,,	Steel products
		10,000 (2) ,,	,, ,,
		20,000 (1) vessel	Heavy cargo
Pier No. 4	1,160	10,000 (1) vessel	Dry cargo and containers
		20,000 (1) ,,	,, ,, ,, ,,
		30,000 (1) ,,	,, ,, ,, ,,
		40,000 (1) ,,	,, ,, ,, ,,
		50,000 (1) ,,	,, ,, ,, ,,
Pier No. 7	786	50,000 (2) vessels	Bulk grain

Equipment in use (August 1974): Tug boats, 2 of 2,000 h.p.; 3 of 3,600 h.p.; Floating cranes, 1 of 75 tons capacity; 1 of 30 tons capacity; Container crane, 1 of 30 tons capacity. Bulk Grain: Pier 7 elevator with conveyor facilities; capacity 800 t.p.h.

Additional equipment planned: Tug boats, 4 of 7,000 h.p. Floating cranes, 1 of 100 tons capacity; 1 of 70 tons capacity. Container cranes, 4 of 35 tons capacity.

Further expansion is planned for the Northern side of the inner harbour. When completed there will be an additional 800 m. of quay at Pier 6 and 780 m. at Pier 8. This will add a total of 10 new berths for vessels from 5,000 to 50,000 d.w.t.

The Port of Inchon is administrated, managed and operated by the Government, represented by the Inchon District Marine Bureau (IDMB) in the Ministry of Transportation.

Decisions on administration and operation of the port, particularly to daily activities, are made by the Director, District Marine Bureau of the above Ministry.

Port activities, such as cargo in transit sheds, or in storage and port facilities of Government property, are in the custody of the Association of Port Management. This Association is formed from members of the various port users associations and was formed in 1972, under the control of the Minister in charge of Port Operations.

Port service companies and Stevedoring companies are still privately owned.

Repatriation and relief of crew members was made without any apparent difficulty. Flights to and from the U.K. being routed through Tokyo.

SHIPMASTER'S REPORT: *December, 1975:*

The Ando pilot vessel is equipped with VHF Channel 16. If berthing in the tidal basin it is necessary to use vessel's sewage tank or sanitary tanks provided from ashore. Immigration require 2 copies of crew list forwarded before arrival to Agents, also require ports of call list for previous 3 months. If any crew member is caught smuggling in South Korean ports the vessel is liable to be detained indefinitely.

AUTHORITY: Inchon Marine Bureau.

KUNSAN (including Changhang): 35.55 N. 126.45 E.

The Port of Kunsan is situated on the Southern mouth of the Kum River which flows into the Yellow Sea, and North Changhang.

DOCUMENTS:

6 copies Report (Ent/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List.
2 copies Store List.
9 copies Manifest (Dis./Loading) only.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange Pilot if necessary.

RESTRICTIONS: Vessels should enter during daylight hours only. Many small Korean fishing and cargo boats in this area display dim navigation lights or none at all at night. Pilot is not compulsory but all vessels calling at this port recommended employ a Pilot in view of the hazardous channel and tidal difficulties. Controlling depth 8 ft. at Bar. Keel clearance of 2 ft. required.

PILOTAGE: The Pilot station is situated at the Southern side of Piun Do (Hiyo To) Island the correct position of which is at 35° 56′ N. and 126° 27′ E.

The boarding point near Piun Do is about 14 miles from Kunsan. Pilot to be ordered at least 24 hours in advance. Pilots cannot board in rough weather. Due to constantly changing bottom conditions, vessel should not attempt to enter without Pilot.

ANCHORAGE: Outer anchorage about 5.5. miles West of Kunsan for vessels drawing up to 28 ft.

Inner anchorage off Kunsan suitable for vessels of 21 ft. draft.

RADIO: Kunsan Radio, call sign HLN operating on 500 and 484 kHz.

MAX. SIZE: Draft 18 ft. to 27 ft. dependent on height of tide.

TUGS: 5 tugs with respective capacity of 300 h.p. (1) 150 h.p. (2) and 80 h.p. (2) are available. 1 floating crane with capacity of 30 tons owned and managed by the Korea Dredging Corp. is available.

BERTHING: The port is controlled by Kunsan District Marine Bureau and all vessels come under jurisdiction of Kunsan Custom House. The anchorages in stream inner harbour can accommodate 1 or 2 vessels less than 1,000 gross tons, and outer anchorage (Yubudo Anchorage) accommodates 1 ocean going vessel drawing about 28 ft. There are 5 pontoon piers (3 for Kunsan and 2 for Changhang) each of which can accommodate an ocean-going vessel with maximum draft of 27 ft.

STEVEDORES: There is 1 stevedoring company with 14 wooden barges, 3 steel barges and 3 tug boats. Discharging capacities: average records per day of 24 hours: coal 1,500 tons; grain and wheat 1,600 tons; fertilizer 1,300–1,400 tons; cement 1,000–1,100 tons; lauan log 500,000 B/F. Daytime only.

MEDICAL: Crew members should be in possession of health certificate showing vaccinations for smallpox and typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

CURFEW: In Korea the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time, GMT plus 9 hours.

HOLIDAYS: Public Holidays – New Year (January 1-3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25). (Can be worked if requested.)

Local Holidays. Work cannot be carried out on Lunar New Year's Day and the Moon Festival, about 15th August.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office.

AUTHORITY: Kunsan Maritime Bureau.

MASAN: 35.11 N. 128.33 E.

DOCUMENTS:

6 copies Report (Ent/Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
2 copies Store List.
9 copies Manifest (Dis./Loading only).

PILOTAGE: Not compulsory, but inadvisable to enter without Pilot. Pilots available at Pusan, to be ordered by Agent at least 24 hours in advance. Pilot station at Kaduk Do. A berthing/unberthing pilot available at Masan.

NOTICES: All vessels bound for Korean ports should give ETA to the local Agents 27 hours prior arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

MAX. SIZE: The maximum draft admissible for entrance is 26 ft.

TUGS: 1 tug boat of 1,000 h.p., owned and managed by Masan District Marine Bureau available. Also 6 private tugs.

ANCHORAGE: Mooring capacity at anchorages: A-1, A-2, A-3 Depth 30 ft.; A-4, A-5, A-6 Depth 24 ft.; A-7, A-8 depth 23 ft. Quarantine Station A Depth 36 ft.

BERTHING:

	Depth (m)	Length (m)	Max. Size	No. of Berths
Pier No. 1	8.0	445	8,000	2
Pier No. 2	5.0	385	500	2
Pier No. 3	11.0	210	20,000	1
	11.0	210	20,000	1*
Pier No. 4	11.0	240	20,000	1*

Central Lighters Wharf	1—2	1,022	—	—

*Under construction.

STEVEDORES: Korea Express Co., 8 barges (1,000 tons), 1 tug (145 h.p.); Hyopshin Stev. Co., 6 barges (1,000 tons), 1 tug (180 h.p.).

Discharging capacity – average records per day (24 hours).

Coal	in bulk	1,000 tons
Cement	in bags	1,000 tons
Grain & Wheat	in bulk	1,000 tons
Fertiliser	in bags	1,000 tons
Steel Scrap	in bulk	750 tons

MEDICAL: Crew members should be in possession of health certificate showing vaccinations for smallpox and typhoid. If the health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

CURFEW: In Korea the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time. GMT plus 9 hours.

HOLIDAYS: Public Holidays:

New Year (January 1–3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations' Day (October 24); Christmas Day (December 25).

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hours.

AUTHORITY: This port is controlled by Masan District Marine Bureau, under jurisdiction of Masan Custom House.

MOKPO: 34.37 N. 126.23 E.

DOCUMENTS:

6 copies Report (Ent./Departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 copies Passenger Luggage List..
2 copies Stores List.
9 copies Manifest (Dis./Loading only).

PILOTAGE: Pilots stationed at Kasado Island, 34° 27′ N. 125° 02′ E. 30 miles from Mokpo. 24 hours notice to Agent required to arrange Pilot. Although not compulsory, vessels strongly recommended not to enter without Pilot.

NOTICES: All vessels bound for Korean ports should give an ETA to the local Agents 27 hours prior to arrival. This is essential to enable the Agents to notify the Port Authorities and arrange a Pilot if necessary.

RESTRICTIONS: Mokpo is located at the South-Western end of the Korean peninsula. The port is at the mouth of the Yungsan River which flows through the Yungsan peninsula. Kasako Island protects this port from heavy winds and swell. The Yungsan River provides 5 anchorages where 5 vessels of Liberty type can berth at a time. The port is 30 miles from the pilot station off Ksasdo Island, in position 34° 27′ 20″ N. and 125° 02′ 05″ E.

Tide Information: max. tide level at high water 4.5 m.; min. tide level at high water 2.8 m.; average tide level at high water 3.5; Max. tide level at low water 0.5 m.; Min. tide level at low water 1.3 m.; Average tide level at low water 0.7 m.

ANCHORAGE: Five anchorages in depths from 11 m. to 20 m. Anchorage Nos. 2, 3, and 4 are better than No. 1 and 5 for discharging cargo because No. 1 is sometimes very dangerous due to strong tidal currents.

TUGS: Three tugs available, up to 150 h.p.

RADIO: Mokpo Radio. Call sign HLM operating on 500 and 484 kc/s.

BERTHING: Sam Hak Do Pier, length 168 m. and width 18 m., where only one 8,000 ton ocean-going vessel can operate in 13 m. depth.

STEVEDORES: There are 3 stevedores companies with 28 wooden barges (1,680 tons), 7 steel barges (1,200 tons) and 3 tug-boats.

MEDICAL: Crew members should be in possession of Health Certificate showing vaccinations for smallpox and typhoid. In case the Health Certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

FRESH WATER: Available at rate of 150 tons per day. 24 hrs. notice required.

CURFEW: In Korea, the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time, GMT plus 9 hrs.

HOLIDAYS: Public Holidays; New Year (January 1st-3rd); Independence Movement Day (March 1st); Labour Day (March 10th); Arbor Day (April 5th); Memorial Day (June 6th); Constitution Day (July 17th); Liberation Day (August 15th); Nation's Foundation Day (October 3rd); National Alphabet Day (October 9th); United Nations Day (October 24th); Christmas (December 25th). Work can be arranged on all above holidays. Local Holidays; No work can be done on Lunar New Year or on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration Office. Extension of shore passes should be made every 72 hrs.

AUTHORITY: Mokpo District Marine Bureau.

MUKHO: 37.33 N. 129.27 E.

DOCUMENTS:

6 copies Report (ent/departure).
6 copies Crew List.
6 copies Passenger List.
2 copies Crew Personal Effects List.
3 Passenger Luggage Lists.
2 copies Store List.
9 copies Manifest (dis./loading only).

PILOTAGE: Compulsory. Pilotage area from quarantine station to inside boundary line of harbour limits.

RESTRICTIONS: Vessels bound for this port should anchor at the out-harbour awaiting Quarantine Inspectors, and are required to radio the Harbour Master (6MF2/500 kc/s) the following, free of charge, at least 12 hours prior to the ship's arrival at the Quarantine Station, viz.: 1. Name and nationality of vessel; 2. Exact ETA at out-harbour (Quarantine or Pilot Station); 3. Maximum draft on arrival; 4. Description and quantity of cargo and the number of passengers, and so on.

ANCHORAGE: In Outer Harbour with max. draft 40 ft., 20,000 to 30,000 G/tonners, possible anchor near Quarantine Station, however, cargo work not possible due to no cargo gear and bad weather except under special circumstances.

TUGS: Two tugs available of 320 h.p. and 650 h.p.

BERTHING: Central Pier depth 18 ft. 05 in.; Coal Pier Conveyor A depth 21 ft. 00 in.; Conveyor B depth 21 ft. 09 in.; Stream berth depth, 21 ft. 00 in.; Ssangyong Pier depth 26 ft. 10 in.; Ssangyong Pier depth 31 ft. 05 in.

Generally speaking, the loading berth at Coal Pier, Central Pier and Ssangyong Pier, is determined by ship's arrival order. However priority is often given to local vessels carrying domestic coal when domestic coal transportation is urgently required which could cause a rather prolonged wait. Therefore, all vessels bound for this port for coal/graphite/cement are recommended to contact Agents well in advance to ascertain the port conditions.

STEVEDORES: One stevedoring company: Korea Express Company Limited.

MEDICAL: Crew members should be in possession of health certificate showing vaccination for smallpox and typhoid. In case health certificate has expired, the person(s) will be vaccinated/inoculated by a quarantine doctor.

FUEL: Nearest supply point is Ulsan, 140 miles away.

CURFEW: In Korea the curfew is still effective from 2400 to 0400 hrs. every day.

TIME: Korean Standard Time – GMT plus 9 hours.

HOLIDAYS: Public holidays:

New Year (January 1–3); Independence Movement Day (March 1); Labour Day (March 10); Arbor Day (April 5); Memorial Day (June 6); Constitution Day (July 17); Liberation Day (August 15); Nation's Foundation Day (October 3); National Alphabet Day (October 9); United Nations Day (October 24); Christmas Day (December 25) Work can be done.

Local Holidays: No work can be done on Lunar New Year's Day and on the Moon Festival about August 15th.

SHORE LEAVE: Crew shore passes will be issued by Port Immigration office. Extension of shore passes should be made every 72 hours.

AUTHORITY: District Marine Bureau.

POHANG: 36.01 N. 129.24 E. **(See Plan)**

DOCUMENTS: See 'Pusan''.

PILOTAGE: Compulsory, two licensed pilots available.

ANCHORAGE: In roadstead, open to N.E. in depth 36–40 ft. Good holding ground for cargo operations.

TUGS: Two tugs available of 250 h.p.

BERTHING: New pier for discharging iron ore cargoes. One berth for bulk carriers up to 50,000 d.w.t. and one berth for smaller vessels up to 5,000 d.w.t. Total length of pier 2,340 m. Operated by Pohang Composite Iron and Steel Works.

FRESH WATER: Small amounts up to 50 tons, may be barged from Ulsan, 56 miles away. See also ''Shipmaster's Report''.

SHIPMASTER'S REPORT: *Pilot:* Usually boards the vessel after anchoring in position 36.03 N., 129.26 E.

Anchorage Position for Quarantine Clearance: Same as for Pilot.

Berthing; Entry and departure are only permissible during daylight hours, vessels are not allowed to berth at night.

Fresh Water; Available at all times ex-wharf without limit on quantity taken.

SHIPMASTER'S REPORT: May 1975.

Approaches: There are no British Admiralty Charts covering this port. The coastal approach to Yongil Man can be made on Chart BA 3666, thereafter an American Chart No. 95166 (formerly HO 3257) is suitable for making the approach to the quarantine anchorage.

There are no offlying dangers, and depths shelve gradually from the entrance to the head of the bay.

A good lookout should be maintained for fishing nets which are very profuse.

Quarantine: Port Health officials board at the quarantine anchorage

– Position 36° 02′ N., 129° 26′ E., in a depth of 19 m. No radio pratique available.

If vessel arrives at night, officials board at daybreak next morning. No port movements during the hours of darkness.

Notice of Readiness: Accepted at time of free pratique granted.

Pilotage: Pilot boards with port health at anchorage. Pilot stated that our vessel 72,072 d.w.t. was too big for the port, which was designed for max. size 50,000 d.w.t. However, no difficulties experienced, berthing in calm weather conditions. Berthing and sailing in daylight hours only.

Entrance Channel: Entrance to harbour is made via dredged channel, commencing between two buoys, (No. 1 & 2), about 200 ft. apart, situated about 1 mile off Southern breakwater head.

Axis of approach channel, from midway between the buoys to midway between the breakwater heads, is a straight line 259° True.

Dredged depth in the channel is stated to be not less than 13 m. However, according to the echo sounder, depth beneath keel was never less than 11 ft. until vessel entered the harbour basin, when further depth recording was impossible due to 'noise' from propeller wash caused by astern movements, obscuring echo sounder signal propagation. As the vessel's draft was 36 ft. 08 in. min. depth of water was therefore 47 ft. 08 in. = 14.5 m. approx. This was verified on the outward passage. The 13 m. min. probably refers to the basin within the harbour entrance.

Tide: The rise and fall of tide is only about 1 ft.

Tugs: There are only 2 tugs available, both very weak. Pilot kept complaining that the tugs were inadequate for a vessel of this size, which was a fair assessment.

Berth: See sketch (Plan) for depth alongside POSCO mineral quay. Min. depth at berth stated to be 12 m.= 39 ft. 04.5 in. Max. permissible draft 11.2 m. = 36 ft. 09 in. Density was 1026.

Loaded vessels berth head in, starboard side alongside. Can prepare accommodation ladder starboard side before arrival.

The face of the quay is protected by permanent heavy-duty rubber fendering.

Moorings: A min. of 3 headlines, 1 breastline, and 2 backsprings, each end, is recommended. Although the port is well sheltered from the prevailing W. – N.W. winds, it is wide open to the N.E. from which strong gales can suddenly develop.

Discharge: 2 modern transporter grabs discharge into a conveyor belt system. Discharge rate overall about 1,100 t.p.h., on a 24 hour basis. Holds were well swept clean on completion.

A meticulous draft survey was held upon arrival and after completion, to verify Bill of Lading.

Fresh Water: Plentiful supply from pipe line on the quay. Apply to Agent for services of waterman.

Customs: The bond is not sealed, but a Custom's Officer is stationed on board at the gangway throughout.

Curfew: A curfew is in operation in South Korea, from 2400 hrs. to 0400 hrs.

Shore Leave: The crew are not allowed to pass through the steelworks, going ashore. A liberty boat must be hired, which plies between the end of the quay and Pohang town pier, about a half hour run.

Last boat returning to ship at night leaves the town at 2200 hrs. First boat in the morning leaves at 0600 hrs. Shore passes issued on arrival.

Documents: The following arrival papers are required:—

Quarantine Declaration and Vaccination List.
14 Crew Lists.
3 Stores Lists.
3 Crew's Effects Declarations.
10 Cargo Manifests in Metric Tons.

N.B. The cargo manifests can be made up on board by typing on plain paper, but quantities must be stated in *metric tons.*

Agent: Pohang Shipping Agency Co. (Teladdress "Pohangship Pohang"), are sub-agents for Young Jin Shipping Co. Ltd; Seoul, (Teladdress "Three Young Seoul"). The Agent was very helpful and attentive.

Repatriation: Possible. A complete Chinese crew change (25 men) was carried out during vessel's stay, plus one officer to the U.K.

Communications: There is no Telex system in Pohang. Cables are passed by telephone to General Agents in Seoul, for onward transmission. There is no problem arranging telephone communication with the U.K., but it is not possible to reverse the charges. (call collect). Average waiting time about 1 hour.

Repair Facilities: Most engine and hull repairs can be carried out. There are 4 repair firms available, but it is advisable to take the Agent's advice as 3 of these firms are very small, with limited manpower. Materials not immediately available, can be brought by road from Pusan, about 3 hours journey. Lloyd's Hull & Engine Surveyors based in Pusan.

Future Port Developments: Work is at present in progress on the construction of a new bulk-handling facility, seaward of the present installation. The approach channel to the new facility will have a min. depth of 16 m., and the berths will be capable of taking vessels of up to 100,000 d.w.t., at drafts of up to 14 m. Scheduled for completion in 1977.

SHIPMASTER'S REPORT: July 1975

Port Limits: By a line drawn from 36° 04′ 10″ N., 129° 25′ E., to 35° 59′ 50″ N., 129° 27′ 30″ E., Korean Chart No. 135 Pohang Harbour and Approaches refers.

Documents: See "Pusan" (Busan).

Pilotage: Pilots board either at the Quarantine anchorage or off the channel entrance as required. Pilotage within the harbour breakwaters is compulsory. No VHF available but Pilots are equipped with transceivers for port operations.

Anchorages: In roadstead, open to the N.E. in depths of 15 to 20 m. – Numerous mooring buoys and marker buoys for reclamation are in the vicinity. Vessels should anchor to seaward until a Pilot boards.

Restrictions: Vessels may arrive and sail from the roadstead at any time, but in daylight only if using the inner harbour.

Max. Size: No restriction in the roadstead, 12 m. in the inner harbour.

Pratique: It is advisable to give advance notice of pratique. Pratique is granted to vessels anchored in a circular quarantine anchorage, radius 500 m., the centre of which is located in 36° 03′ 20″ N., 129° 25′ 25″ E.

Radio: All messages to Pohang should be routed through Busan Radio HLP.

Tugs: A number of tugs are available, the 2 largest being 2,500 h.p. each. Tugs join the vessel at the breakwater entrance.

Approaches: Vessels using B.A. Chart 3666 should find flashing seabuoy in the entrance to Yon Iru Bay located in position 36° 05′ 50″ N., 129° 30′ 35″ E., and from there steer a course 227° True (6.8 miles) to the inner harbour fairway entrance, which is marked by two buoys marked 1 and 2 and QK FL. G. and FL. R. 3 seconds, respectively each visible 5 miles. An anchorage should be found close seaward of the entrance buoys whilst awaiting a Pilot.

Berthing: A number of inner harbour berths are available at depths ranging between 8 and 12 m. datum.

The entrance fairway has a min. depth of 12.4 m. Harbour developments are still in progress.

Stevedores: Arranged through Agents. Advance notice desirable.

Medical: Available.

Fresh Water: Limited quantities available by barge, if advance notice given.

Fuel: None.

Consuls: None.

Repairs: Only repairs of a minor nature can be undertaken.

Drydock: None.

Surveyors: Lloyds available from Busan.

Gangway/Deck Watchmen: Not required.

Opening/Closing Hatch: By Crew.

Customs Allowance: See "Busan".

Repatriation: Not available.

Airport: Busan (Suyeng).

Shore Leave: Permitted, but even if vessel berthed alongside, launch service must be used.

Identification: Shore Passes.

Curfew: 2400–0400 hrs.

Developments: Considerable reclamation and harbour developments in progress.

General: Last call of vessel was July 1975. B.A. Chart No. 3666 does not show the new port of Pohang at all but can be used for approach work. Korean Chart No. 135 should be obtained if possible.

AUTHORITY: Pohang District Marine Bureau.

PUSAN: 35.07 N. 129.02 E.

DOCUMENTS:

9 Cargo Manifests.
3 Transit Cargo Manifests.
8 Crew Lists.
8 Passenger Lists.
4 Passenger Baggage Lists.
4 Mail Lists (forms supplied by Agent).
5 Parcels Lists (forms supplied by Agent).
2 Arms-Narcotics Lists.
2 Tobacco Lists.
2 Currency Lists.
4 Stores Lists.
4 Crew Personal Effects Lists.

Immigration: All Seamen's Books examined and shore passes made out. These passes to be carried at all times when ashore. Strict curfew from 0000 hrs. to 0400 hrs.

CERTIFICATES:

Derat. Certificate or Exemption.

Inoculation and Vaccination Certificates for all crew members.

PILOTAGE: Professional Pilot service is available at Pusan and contact can be made by telephone No. 6-1346 or 6-1743. Necessary for arriving vessel to notify Pilots of arrival 24 hrs. in advance. VHF unavailable. Formal address is: 73 2-Ka, Choong-Gu Taigyo-Ro, Pusan, Korea. Blast signal from vessel used to call Pilots. Pilot station position 35° 05′ 5″ N. 129° 05′ E.

Pilotage is compulsory and available day and night. Pilot boards off the entrance to the outer harbour. Pilot boat is white launch with pilot signals. Tugs cannot be employed unless Pilot is on board.

HEALTH: Pratique granted to vessels anchored in a circular quarantine anchorage located in outer harbour. Quarantine inspection can be arranged by day or night if sufficient advance notice given although regular hours are sunrise to sunset. Valid smallpox and cholera certificates required. Inoculations against typhoid and typhus may be required depending on prevalent conditions.

ANCHORAGES:

Designation	*Depth*	*Capacity*
S-anchorage	8-9 m.	6 vessels of 300-2,000 t.
E-anchorage	11-12 m.	6 vessels of 8,000-12,000 t.
N-anchorage	7-10 m.	18 vessels of 500-6,000 t.

RESTRICTIONS: Vessel having called at Communist ports within 6 months of contemplated entry of Pusan needs to obtain permission of authorities.

MAX. SIZE: No restrictions on length or breadth of a vessel. Draft should be less than 10 m. when vessel is alongside a pier, or 12 m. when anchored at an anchorage.
RADIO: Pusan Harbour Radio Station: call sign, HLP. Frequency, 500, 434 kc/s. operation round the clock.

Cable Harbour Master 12 hrs. in advance, advising ETA, last port and max. draft. If name of Agent is included, the Harbour Office will inform Agents.

VHF is now available.Calling Channel 16. Working Channel 14. Call sign "Harbour Control". Range about 12 miles.

A radar has been sited at the Harbour Office to help vessels approaching in poor visibility.
TUGS: Tugs join an arriving vessel at immediate interior to breakwater, Pusan Harbour, Ship's own lines are used.
BERTHING: Normally in daylight only.

	Length	*Beam*	*Draft*
Pier No. 1	407 m.	115 m.	28 ft.
Pier No. 2	407 m.	116 m.	28 ft.
Quay way No. 2	645 m.	—	27 ft.
Pier No. 4	556 m.	145 m.	29 ft.

STEVEDORES: On basis using full gangs per day, the capacity is : 1,000 L/tons on general cargo; 1,200 L/tons on grains; 1,500 L/tons on anthracite or coal.
TANKERS: A T-head oil pier extends about 700 ft. on the S.E. side of the North harbour. Least depth at pier head is 32 ft. Used by tankers servicing Korea Oil Corporation.
DEVELOPMENTS: Dredging of the approach channel to piers to about 36 ft. Dredging Northern section of harbour to 29 ft.
MEDICAL: Service is available at short notice.
FRESH WATER: Available. Rate of water supply, 80 L/t.p.h. Supplied at pier, or by barge.
FUEL: Availability on Bunker "A", Bunker "C", LRFO, LO and diesel oil.
FIRE PRECAUTIONS: Port has separate anchorage for tankers. Port requests for compliance with regulation not to contaminate waters with inflammable substances, e.g. petroleum products. Tankers are prohibited to clean tanks in port.
GANGWAY/DECK WATCHMEN: This service is available.
OPENING/CLOSING HATCHES: Usually carried out by stevedores.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
CONSULS:

Consul, Republic of China (Formosa)	Tel. 4-0276
Consul, Japan	,, 22-0135

REPAIRS: All repairs can be effected.
DRY DOCKS:

Name of facility	*Capacity*	*Location*
Korea Ship Building Eng. Corp. No.1	5,000	Pusan
Korea Ship Building Eng. Corp. No.2	10,000	Pusan
Korea Ship Building Eng. Corp. No.3	100,000	Pusan
Dae Sun Ship Building Corp.	4,000	Pusan

REPATRIATION: No facilities.
AIRPORT: Airport is at Suyeng about 12 km. from Pusan. Japan-bound plane takes off once a day.
TIME: Korean Standard Time. 9 hrs. ahead of GMT. No alterations during year.
HOLIDAYS: 1st-3rd January; 1st March; 10th March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 25th December.

On above holidays vessels can be discharged and loaded with permission to work granted by the Customs Authority on request.

Local holidays when no work may be performed are: New Year's Day in Lunar Calendar, and the Moon Festival (15th August) in Lunar Calendar.
POLICE/AMBULANCE/FIRE: Police, 22-0863/2497; Ambulance, Pusan Quarantine Station, 6-1371, 4-5736.
TELEPHONES: "Port Telephone Service" operates for purpose of serving communication on board-shore.
SERVICES: Adjustment of compass, available.
SHORE LEAVE: Allowed.
DELAYS: Port congestion is experienced occasionally.
AUTHORITY: Pusan District Marine Bureau.

ULSAN: 35.27N.129.23E. (See Plan)

DOCUMENTS:
3 copies of Manifested Parcels on board.
3 copies of the Store List.
3 copies of List of Narcotics on board.
3 copies of List of Arms and Ammunition on board.
3 copies of List of Vessel's Foreign Currency.
3 copies of List of Crew's Foreign Currency.
3 copies of List of Vessel's Tobacco, Cigarettes, Spirits, etc.
13 copies of the Crew List.
3 copies of List of Crew's Personal Effects, Tobacco, Cigarettes, Spirits, etc.
Crew's Vaccination Certificates.
Deratisation Exemption Certificates.
Clearance from Last Port.
10 copies of List of Landing Passengers, if any.
10 copies of List of Passengers in Transit, if any.
3 copies of List of Passengers' Baggage.

PILOTAGE: The seaward approaches to the Imodco Terminal mooring site are free of underwater obstructions and existing landmarks and navigation aids are adequate. Depth of water not less than 65 ft. in approaches. The Imodco Terminal can be approached with the summit of Pongdae San bearing 333° true. When in position the following navigation fix will obtain at the mooring site:

Pongdae San (summit)	bearing	333° true	distance	2,915 yd.
Pongjin Hang Light (end of breakwater)	"	053° true	"	4,770 yd.
Chuck To (centre cut)	"	255° true	"	3,800 yd.

A good radar echo will be obtained from the tanks ashore at approximately 20 miles, the Imodco buoys at a distance of 8 miles, and the small buoys, marking the floating hose heading off the Imodco buoy, at 1.5 miles.

Lights ashore, lights on the Imodco buoys and on the small buoys appear to be unreliable.

After clearing Customs a Harbour Pilot will board the vessel to direct it to the buoy and conduct the mooring operations if required. There is no night mooring. However, unmooring is carried out during darkness as well as in daylight.
ANCHORAGE: Anchor the vessel about 1 mile South-east of the buoy, if the weather permits. In this location it is less difficult to find vessel, when in fog. Do not anchor less than 1 mile from buoy, and under no circumstances can the anchors ever be used on approaching the buoy terminal, chain cables and pipe-lines are located at this site and anchoring is strictly prohibited.
HEALTH: Entry prediction to be supplied to quarantine authorities by vessel's Agent 24 hrs. before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.
RADIO: There is no marine radio telephone at Ulsan to communicate with on radio telephone frequency. A small transreceiver on shore can communicate with attendant launch.
BERTH DESCRIPTION: 2 berths at single buoy moorings.
No. 1 Imodco Buoy

Position: Lat. 35° 27′ 15″ North, Long. 129° 23′ 30″ East.

Description: A 12.5 m. red and white vertically striped buoy.

Lights: On buoy; alternate flashing red and white every 12 sec., visibility 5 miles or more. Duration of each flash 4 sec.

On hose; there are 3 red flashing marker lights equally spaced along 675 ft. hose, visible for 2 miles.

All of the above lights are activated by photoelectric cells.

Radar Reflector: On buoy's mast.

Foghorn: A 2-sec. blast, period 20 sec., range 1 mile. Must be turned on at the buoy.

Soundings: 11 fathoms in buoy area.

No. 2 Imodco Buoy

Position: Latitude 35° 26′ 44″ North, Long. 129° 23′ 20.5″ East.

Description: A 12.5m. red coloured buoy.

Lights: On buoy; has a range of at least 5 miles, on hose; as for No. 1 Imodco buoy.

Foghorn: A battery powered foghorn with a range in excess of 0.5 mile.
DRY CARGO BERTHS:

Commercial harbour mainly serves export of chemicals, fertilisers and by-products of the refineries. The harbour lies about 4 miles in from the sea and there are 4 berths available with depths up to 33 ft.

Quarantine/Pilot station situated in position 35° 27′ 26″ N., 129° 24′ 30″ E.

Entrance at night is not permitted. Only 1 tug is available. Water is available. No VHF. Max. tide in harbour is 1 ft.
BERTHING: 2 launches are in attendance during mooring and unmooring operations. 1 launch will keep the hoses clear and the other handles the mooring rope. Both bow anchors are to be hove well up in the hawse pipes and properly secured before reaching the buoy. Anchors are never to be used while on the buoy, they can foul buoy cables and pipe-line on the bottom if released.

*No. 1 Buoy.*The vessel will be moored with 4 to 5 ropes off the bow. No rope used from the well decks. 1 rope will be run single to the buoy to heave the vessel in proper position, all other lines will be used double by sending one end out through the port or starboard bow chock and hove back through the opposite side of the bow chock, sufficient slack is brought on board so that a complete set of turns can be securely placed on the bollard. A good messenger rope about 3.5 in. to 4 in. circumference, at least 400 ft. in length, will be required to heave the lines around the mooring arm on the mooring and back on the vessel. The first line used single will be doubled up last.

No. 2 Buoy. The vessel will be moored with 2 nylon lines, 250 ft. in length, floating off the buoy. 2 of the ship's mooring ropes will be run to the buoy to heave the vessel in proper position. At about 40 yd. distance from the buoy a good messenger rope will be required to pick up the floating ropes one by one. When the floating ropes are made fast on board, 1 of the 2 ship's ropes sent to the buoy will be doubled up.
HOSES: *No. 1 Buoy.* There are 2 sets of 12 in. hoses and 1 set of 8 in. hose. The 2×12 in. hoses are for crude oil and the 8 in. hose for gas oil. The hoses are 675 ft. in length from the buoy manifold and are floating in plastic doughnut shaped floats. The hose connections are always made to the port manifold, and are lifted one at a time to the ship's manifold. Each hose, when full of cargo and equipment, is over 1.5 tons in weight.

No. 2 Buoy. There are 2 strings of 16 in. hoses, each 945 ft. in length. The final 70 ft. of hose is reduced to 12 in. to permit lifting by the tanker's lifting gear. The hose connections are made to the starboard manifold of the vessel.

BUNKERS AND WATER: Available by barge only.
BALLASTING: After the vessel has been somewhat more than half discharged, the vessel should be ballasted to a safe margin, to draw not less than 12 to 13 ft. forward. This will avoid the vessel yawing widely on the buoy with strong winds and assist in avoiding contact with the buoy and hoses. Vessel will moor about 120 ft. from buoy.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
REPATRIATION: Nearest facilities for crew change or repatriation are at Pusan.
TIME: Korean Standard Time, 9 hrs. ahead of GMT. No alterations during year.
HOLIDAYS: 1st January; 1st March; 5th April; 6th June; 17th July; 15th August; 3rd October; 9th October; 24th October; 25th December.
SHORE LEAVE: Allowed up to midnight.
GENERAL: Vessels arriving at Ulsan should radio to Agent at Pusan 4 days in advance information on size of vessel's manifold connections, as the adapters, if required, will have to be made by the Korea Oil Corp. This applies mainly to vessels arriving at Ulsan for the first time or in case there has been any alteration to the manifold since the last arrival.

While on the buoy the vessel will be required to provide sleeping quarters and linen for about 8 to 10 men; this includes the discharging Master and his apprentice. The standby men include launch-men and riggers; these men connect and disconnect hoses and are mainly kept on board for emergency.

The discharging Master will remain with the vessel during its entire operation on the buoy. Under certain conditions, should it become necessary, they may ask the vessel for meals; however, food for standby men is generally furnished from ashore.

The ship's engines must remain ready for immediate use.

CHIEF OFFICERS REPORT: *August 1975*
Vessels Particulars:
Length Overall — 162.18 m. Breadth — 22.8 m.
Summer Draft — 10.382 m. Summer d.w.t. 21,705 m./tons.
Dry Cargo Berths
Anchorage: Local Agents generally wireless the quarantine anchorage position which is approx. 1.5′ W.N.W. from the position shown on BA Chart No. 898. Care should be taken while anchoring as there are innumerable fishing floats, nets, etc. North of 35° 28′ N., and West of 129° 23.7′ E.
Restrictions: No pilotage between sunset and sunrise. Curfew from 0000-0400 hrs.
Pilotage & Berthing: The standard of pilotage was generally good. Pilot arranged by Agents and embarks at quarantine anchorage after vessel is cleared by authorities. 1 anchor is used while going alongside. 1 tug of unknown h.p. and 2 mooring boats assist while berthing. 4 berths are available:-
No. 1 Pier — Length 300 m. Depth variable (see plan)
No. 2 Pier — Length unknown. Depth supposed to be 36 ft.
No. 3 Pier — Length 165 m. Depth 29 ft.
No. 4 Pier — No details known.
Local authorities themselves do not have any idea as to the actual depths alongside. It is advisable to sound the bottom twice daily especially at No. 1 Pier as the depths were found to vary almost every 10 ft. Cargo is loaded/discharged by vessels cargo gear. Rate of loading Bagged Urea is approx. 400 m/tons per gang per day. Working hours are normally between 0700 hrs. and 1900 hrs. every day, Saturdays and Sundays included. Only on National Holidays no cargo is worked. Discharge of Bulk Sulphur and Gas/Product Carriers is around the clock. A vessel carrying 28,000 tons of Bulk Sulphur was discharged in 5 days. There is 1 crane and conveyor belt on No. 1 Pier only for handling Sulphur. It was observed that sometimes small coasters were loaded/discharged by mobile cranes.
Stevedores: Ulsan Port has a rule that a gang engaged for one particular hatch will only work that hatch from start to finish and will not work any other hatch, not even the other end of the hatch if the hatch has more than 1 set of derricks. Gangs have to be ordered before noon for the next day.
Medical — Local hospital used, patients normally taken there by watchmen.
Density — Apparently varies. Once 1016 was obtained while 10 days earlier 1020 was obtained.
Fresh Water — Available from barge whose capacity appears to be 150 tons. At least 24 hours notice necessary, Charges approx. 150 Won/Ton. (1 U.S. $ = 480 Won approx.)
Fuel — Not available.
Repairs — Facility available but rates exorbitant.
Dry Docks — Hyundai Shipyard located at Ulsan. Builds VLCC's but we have no information regarding details.
Watchmen — Essential on foreign vessels. Arranged by Agents.
Hatches — As per charter party but suggest use own crew as labour are only experienced with wooden hatchboards.
Repatriation — Usually done through Seoul which is about 5 hours away by bus. We changed Radio Officers and experienced no difficulty.
Telephones — Placed on board, but only for local calls via exchange.
Services — Only 1 shipchandler who handles everything including providing watchmen, laundrymen, etc.
Identity Cards — Shore pass issued for Ulsan valid for 3 days. To be renewed every fourth day. Usually done by watchmen who collect all passes and go to Immigration Office.
Surveyors — Lloyds can be arranged from Busan.
General — Ulsan is a very busy port with a large amount of local and Japanese coastal traffic. Local Agents keep trying to shift bigger vessels ahead and astern to try and squeeze in small coasters. It is advisable to strictly adhere to the charter party rules at all times in this port to prevent delays and expense on vessels account.
AUTHORITY: Korea Oil Corporation, Ulsan.

YOSU: 34.44 N. 127.45 E. (See Plan)

(a) SINGLE BUOY MOORING, HONAM OIL REFINERY
(b) PRODUCT WHARF, HONAM OIL REFINERY
(c) DRY CARGO, YOSU HARBOUR
(d) DEVELOPMENTS

DOCUMENTS:
Last Port Clearance.
Register.
12 copies of Crew List.
12 copies of Passenger Manifest.
3 copies of Store List.
3 copies of Bonded Store List.
3 copies of Arms and Ammunition List.
3 copies of Livestock List.
1 copy of Vaccination List showing dates of last smallpox and yellow fever vaccination, etc.

PILOTAGE: There are 2 pilot stations. Pilot station for vessels of less than 30,000 g.r.t. is located at Lat. 34° 44′ N., Long. 127° 49′ E., and for more than 30,000 g.r.t., such as crude tankers, is located at Lat. 34° 39′ N., Long. 127° 58′ E.

Vessels calling at Yosu must cable the exact time of arrival at the pilot station to ship's Agent and Harbour Pilot's office. VHF Radio for calling Pilot is Channel 16 and switch to Channel 13 to talk.
QUARANTINE AND MEDICAL: ETA to be supplied to quarantine authorities by vessel's Agent 24 hours before arrival. Master required to complete Health Declaration when officer boards on arrival. Free pratique is automatic when coming from another Korean port.

There are medical facilities in Yosu town. Inoculations and vaccinations can be arranged by the quarantine doctor.

The Quarantine Stations are located at Lat. 34° 42.5′ N., Long. 127° 52.7′ E., for deep drafted vessel and Lat. 34° 45.2′ N., Long. 127° 46.3′ E., for less drafted vessel. The Quarantine inspection can be made at other than the above location depending on the situations. The inspection takes place during daylight.
RADIO: See "Radio" in section "A".
TUGS: Available, up to 1,200 h.p.
DENSITY: 1025.
FRESH WATER: Fresh water is available for delivery to ships.
FUEL: Bunkers available by barge subject to advance notice being given.
REPAIRS: There are minor repair facilities in Yosu.
CUSTOMS ALLOWANCES: One carton cigarettes or 1 lb. of tobacco, and one bottle wine or spirits allowed, each man.
REPATRIATION: Crew changes or repatriation can be arranged.
TIME: Korean Standard Time, GMT plus 9 hours. No alterations during year.
HOLIDAYS: 1st January, 1st March, 5th April, 6th June, 17th July, 15th August, 3rd October, 9th October, 24th October, 25th December.
IDENTIFICATION CARDS: Crew required to carry valid identification cards at all times.
SHORE LEAVE: Shore leave for ship's personnel is arranged by ship's Agent and the local authorities.

(A) SINGLE BUOY MOORING, HONAM OIL REFINERY

GENERAL DESCRIPTION: The 10 m. diameter IMODCO Single Buoy Mooring Terminal is located at the approximate position of Lat. 34° 51′ N., Long. 127° 47.3′ E. The terminal is modified to provide a safe mooring for tankers up to 200,000 d.w.t. under the environmental condition of about 40 knots maximum wind speed.
MAX. SIZE: The safe depth of Samg i channel which is located 4 miles South of the Terminal is 19 m. at about LLW.

The tidal rise in this area is 2 to 3.5 m. at high tide. Therefore, the terminal accepts tankers having draft up to 19 m.
NAVIGATIONAL AIDS: Vessels calling Honam Oil Terminal should have charts No. 242 and 209 published by the Republic of Korea Hydrographic office. Within the area, there is no port radar service.
NOTICE OF READINESS: Notice of Readiness will be tendered and accepted at the time when the vessel is in all respects ready for cargo operations and in accordance with charter party agreed.
BERTHING: Mooring operations are done jointly by ship's crew on the forecastle and mooring gang from Yosu on mooring boat.

The vessel shall prepare 2 strong messenger lines of more than 50 m. each and pass them to the mooring boat. The mooring gang will tie the vessel's messenger lines to 18 in. Buoy ropes' messenger lines. Upon signal from mooring gang, vessel will heave in both mooring ropes up to chafing gear of the ropes on deck and make fast to the vessel's bollards by the 8 turn method.

Normally starboard rope is heaved in first and or both port and starboard ropes are heaved in simultaneously.

It is compulsory to moor with 18 in. Buoy ropes. For the use of these ropes Honam Oil charges a nominal fee for each call at the SBM.
CONNECTING HOSES: The vessel must install two 16 in. ASA type flanges to her starboard manifolds, rig starboard derrick doubled and capable of lifting up to 10 tons of weight prior to berthing and

G. P. E. — VOL I

have standing by a derrick operator and responsible ship's officer at her manifolds upon berthing.

Connecting/disconnecting cargo hoses will be done by shore team. The team leader will co-ordinate with ship's cargo officer for cargo hose handlings.

DISCHARGING: Discharging should be commenced by the signal of Terminal respresentative. The Terminal receiving facilities have a working pressure of 225 p.s.i. with safety factor of 7:1, but the pumping pressure must be raised gradually and then the pressure should be raised up to 225 p.s.i. at ship's manifolds. The vessels are required to find out discharging rate at least every 4 hours.

SHIP'S READINESS: During discharging the international code flag "B" shall be displayed from a topmast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile and show an unbroken light all around the horizon. The vessel's engines must be ready while discharging at a moment's notice and the Master is responsible for having sufficient officers on duty both on bridge and in engine room to take action immediately upon instructions from Honam Oil representative.

In order to avoid riding up on the buoy and the cargo hoses, astern movements of the vessel are required. For turbine vessels when for various reasons, the Chief Engineer officer is unable to completely stop his engines, the r.p.m. must be kept at a minimum by using the turning gear. The propeller must also propel the vessel astern only. Vessels which are not able to conform with these regulations should advise Honam Oil representative in writing. In addition to the lights usually displayed, vessels discharging cargo during darkness, will illuminate the area around the ship and especially the IMODCO Buoy to the satisfaction of the terminal representative in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels should provide suitable floodlights for working on deck during night operation.

BALLAST: There are no facilities for reception of dirty ballast. It is the ship Master's responsibility to see that no oil or oily ballast is spilled or pumped overboard from his ship. Drip-pans must be used at all times and all scuppers must be plugged. The waters in or adjacent to the terminal must not be polluted and only oil-free bilge water may be discharged at the terminal. If, during inspection or during progress of discharging, it is revealed that the vessel's tanks are not oil-tight, she will be refused further discharging facilities.

SAFETY: Sufficient officers and crew personnel must always be on board to attend to the vessel and to cargo. Power must be available at all times on deck winches and windlass while the vessel is in the moorings.

The presence of unauthorised craft alongside is extremely hazardous, and Masters are requested to require all unauthorised craft to clear the vessel's side prior to commencement of cargo discharging. Master should shut down all cargo operations during severe electrical storms and under any circumstances which imperil the cargo operation.

While bunkering barge is alongside the crude tanker, it is required that ship's Master shall check mooring lines, fenders or engines of bunkering barge.

RADIO: In Korea there are 4 coastal radio stations, Pusan, Inchon, Mokpo and Yosu as listed in International communication publications. Vessels calling Yosu would call Pusan, Mokpo, and Yosu.

For the vessels visiting Honam Oil Refinery, it is recommended to call Mokpo coastal station, call sign HLM and address to: Honam Oil Yosu Refinery Telex number K762 or K764, via: Mokpo Radio. The Mokpo Radio keeps telex operation network with telex room of Honam Oil Yosu Refinery and messages can be handled within half an hour during the service hours of Honam Oil Yosu Refinery Telex room (weekdays: 0830–1930, Saturday: 0830–1500, Sunday/Holiday: off-service). Also vessels within VHF voice radio range of about 100 km to Yosu, call Ch-16 (Simplex), Switch to Ch-26 (Duplex) and then ask for vessel Agent, Harbour Pilot or Honam Oil Yosu Refinery. Honam Oil Yosu Refinery provides the telephone service every day from 0830 to 2300 hrs. local time with telephone number 3141-9. (Terminal representative located on extension 279 for office hours, 370 for out of office hours).

The communications from tanker to shore when moored at the IMODCO Buoy will be made by ferry boat and refinery matters are made by transceiver handled by refinery personnel on board.

AUTHORITY: Honam Oil, Yosu Refinery.

(B) PRODUCTS WHARF, HONAM OIL REFINERY

BERTHING: The 4 products berths are located in approximate position 34° 51′ 38″ North, 127° 44′ East, in East-West direction and designed to accommodate 4 tankers simultaneously viz. No. 1 and No. 4 berths for about 5,000 d.w.t. tankers, No. 2 for 3,000 d.w.t., and No. 3 for 20,000 ton tankers. No. 3 berth is under modification and installation of Chicksan loading arm. The Honam Oil Product Wharf is designed to moor and unmoor tankers on a 24-hour basis, depending on the condition prevailing at the time and the Master's judgement. The wharf is well and sufficiently illuminated for night work.

Minimum mooring line requirements are:

Forward: 3 headlines	Aft: 3 stern lines
1 spring line	1 spring line
1 breast line	1 breast line

In strong wind 1 more head and 1 more stern iine are required.

The direction of the tidal stream in the vicinity of the products wharf is nearly rectilinear and parallel to the berths, the flood running in a 172° direction and the ebb in an 084° direction. The maximum velocity is 2.5 knots. The duration of the ebb stream is about 6.75 hours, and the flood stream 5.5 hours.

The tidal range is about 4 m. Therefore, ship's crew must adjust vessel's ropes with tidal height so as to avoid damage to the ropes.

MAX. SIZE: There is shallow water of about 10 m. depth at LLW en route approaching the channel to the wharf. With this depth of water, the Terminal limits vessel's draft to less than 32 ft.

CONNECTING HOSES: It is the policy of the Honam Oil Refinery Co., Ltd. that the ship's crew shall be responsible for the connecting and disconnecting of the cargo hoses at the ships manifold. The wharf crew will operate the cargo hose winches.

LOADING: The refinery can furnish loading at 5,000 b.p.h. or more. The Chief Officer should, however, state the loading rate he requires which should be maximum consistent with safety at all times. A qualified deck officer should, however, be on deck during the entire loading operation. The international code flag "B" shall be displayed from the signal yard-arm during daylight hours. A red light shown during hours of darkness. Lines for loading and deballasting for each berth are as follows:

No. 1 Berth		*No. 2 Berth*	
BFO	8 in.	BFO	6 in.
Solvent	6 in.	Solvent	6 in.
BFO	8 in.	BFO	6 in.
LRFO	8 in.	LRFO	6 in.
Diesel	4 in.	Diesel	4 in.
Ballast	8 in.	Ballast	6 in.
BFO	4 in.	BFO	4 in.
Reg-gas	8 in.	Reg-gas	8 in.
Kero	4 in.	Kero	4 in.
Diesel	8 in.	Diesel	6 in.
Naphtha	8 in.	Naphtha	6 in.
Kero	8 in.	Kero	6 in.
JP-4	8 in.	JP-4	6 in.
Pre-gas	8 in.	Pre-gas	6 in.
No. 3 Berth		*No. 4 Berth*	
Kero	8 in.	Kero	6 in.
JP-4	8 in.	JP-4	6 in.
Naphtha	8 in.	Naphtha	6 in.
Pre-gas	8 in.	Pre-gas	6 in.
Solvent	8 in.	Solvent	6 in.
LRFO	8 in.	LRFO	6 in.
Diesel	4 in.	Diesel	4 in.
BFO	4 in.	BFO	4 in.
Reg-gas	8 in.	Reg-gas	6 in.
BFO	8 in.	BFO	6 in.
Ballast	8 in.	Ballast	6 in.
BFO	8 in.	BFO	6 in.
Diesel	8 in.	Diesel	6 in.
BFO	8 in.	LPG	6 in.

FRESH WATER: Every berth has fresh water supply line. Vessels requiring fresh water will request required amount of water to wharf operator. After completion of supply, ships have to sign the form issued.

REPAIRS: There are no repair facilities and also repairs are not allowed on the product wharf. In the event of emergency cases, Honam Oil will assist in carrying out repairs under the supervision of refinery's safety personnel to expedite from the wharf and a quick turn around.

RADIO: See "Radio" in section "A".

AUTHORITY: Honam Oil Refinery.

(C) DRY CARGO PORT

PIERS: 3 piers are located in Yosu town at about Lat. 34° 44.3′ N., Long. 127° 45.3′ E. and consist of No. 1, No. 2 and No. 3 Piers.

RESTRICTIONS: No. 1 Pier is used for only small vessels. No. 2 Pier for the vessels of less than 20 ft. draft and max. draft of No. 3 Pier is 26 ft. At anchor draft up to 35 ft.

CARGO-HANDLING FACILITIES: Crane barge of 30 tons capacity is available.

RADIO: See "Radio" in section "A".

AUTHORITY: Local Marine Bureau, Yosu.

(D) DEVELOPMENTS:

1. Wharf, 7th Fertilizer Plant: Located between Single Buoy Mooring and Products Wharf, Honam Oil Refinery. Completion will be in 1977. Vessel size to be berthed, 50,000 d.w.t.

2. Pier, Dae Sung Methanol Plant: Located close to the products wharf of Honam Oil Refinery and will be in operation after April, 1976. Maximum vessel size and draft will be about 4,400 d.w.t. and 5.5 m., respectively.

Kuwait

KHOR-EL-MUFATTA: 28.39.17 N. 48.23.26 E.

DOCUMENTS: The only document required for this port is copy of the Cargo Manifest.
PILOTAGE: No pilotage available.
ANCHORAGE: Vessels anchor to seaward side of black and white conical shaped buoy which is situated 2 miles to the East of the Khor. Mufatta is some 55 miles by sea from the port of Kuwait. The flashing lights marked on the charts at the entrance to the Khor have been discontinued.
HEALTH: Before arrival vessels required pass following items to Agent (about three or four days prior to ETA). Name of vessel, Nationality, ETA, Last Port of Call, tonnage, quarantinable disease on board (if any) infectious disease (if any), sick persons, death, and any requirements.
ETA should be notified again 24 hours before arrival.
RADIO: No separate radio service for this port and all communication to Agent to be made through Kuwait Radio 9 KK.
TUGS: None.
BERTHING: Ship discharged in open roadstead.
STEVEDORES: Sent from Kuwait. At least 48 hours notice required.
MEDICAL: Facilities available only at Kuwait.
DENSITY: Salt water.
FRESH WATER: Not available.
FUEL: Can be arranged at Mina Abdulla. Mina-al-Ahmadi.
FIRE PRECAUTIONS: No equipment for fire-fighting.
GANGWAY/DECK WATCHMEN: Can be arranged through Agent.
CERTIFICATES: All usual documents such as Ship's Manifest, Bill of Health, Crew List, Clearance from last port, Store List, Bonded Store List, etc.
CUSTOMS ALLOWANCE: (Tobacco) No restrictions. (Wine and/or Spirits) Alcoholic beverage strictly prohibited to be held out of bond. Master allowed keep limited quantity in cabin.
CARGO GEAR: Ship's gear used for discharging.
IDENTIFICATION CARDS: Not needed.
REPAIRS: None.
REPATRIATION: Can be arranged via Kuwait.
Seamen arriving Kuwait Airport to join vessels at Partitioned Zone ports can obtain transit visa at airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait and/or Partitioned Zone. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew.
Marine Superintendent of Owners, or Owners' representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait government's diplomatic missions abroad.
AIRPORT: Kuwait Airport served by regular airlines.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day; Eid al Fitr; Accession to the Throne; Eid al Haj; 1st Muharram; Prophet's Birthday; Rajab.
TELEPHONE: Cannot be arranged on board.
PROVISIONS: Foodstuffs, beverages, tobaccos, etc., available from ships chandlers in Kuwait in limited kinds and quantities. Prices more expensive than town of Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.
SPECIAL SERVICES: Swedish Welfare for Seamen, Lloyds Surveyor, Butterworth tank cleaning machines and equipment, and under-water cleaning.
SHORE LEAVE: Not limitations.
AGENT: See "Shuwaikh".

MINA ABDULLA: 29.02 N. 48.11E. (See Plan)

LOCATION: Mina Abdulla bounded on South by parallel of Lat. 28° 55′ N. on the East by Long. 48° 18′ E. and on North by a line joining following points:

(1) 29° 01′ 45″ N.	48° 09′ 25″ E.
(2) 29° 01′ 45″ N.	48° 10′ 06″ E.
(3) 29° 02′ N.	48° 10′ 18″ E.
(4) 29° 02′ N.	48° 18′ 00″ E.

FLAG: Every merchant ship when entering or leaving port between sunrise and sunset shall fly her national flag and national flag of Kuwait and, when entering port, shall fly her signal letters. All vessels required to fly Kuwait flag on foremast during daylight hours. Flags may be obtained from Agent.
APPROACHES: Two oil-loading berths supplied by three pipe-lines are situated here. A number of large tanks define tank farm area. A refinery stands to S.W.of tank farm. The flare is conspicuous. Other conspicuous objects in area are the radio tower, Mosque Minaret and the four leading beacons for two berths. These are lit for night berthing by three white lights on each beacon in the form of triangles, the beacon lights for Berth No. 1 are occulting every 5 seconds, the lights of No. 2 Berth are fixed.
When a vessel is ready to enter at the same time as another vessel is ready to leave the port, the outgoing vessel shall have priority over the incoming vessel, subject always to the provisions of the International Regulations for Preventing Collisions at Sea and to the requirements of safe navigation.
DOCUMENTS: Before leaving Kuwait the Master shall be responsible for obtaining a Port Clearance Certificate. The documents necessary for vessels to enter and leave Mina Abdulla are:

Enter
Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Light Dues Certificate.
Clear
Register.
Load Line Certificate.
Radio Certificate.
Safety Certificate.
Last Port Clearance.

Masters and Agents of vessels shall, when called upon by a Customs Officer or Marine Officer, produce any documents relative to the landing or shipment of their vessel's cargo in the port. The Master or his representative is required to hand to the Company a written Notice of Readiness to load.
Discharging certificates of oil cargo loaded from Kuwait and Partitioned Zone ports are to be sent to vessels' local Agents immediately duly attested by the Customs Authorities and Arab Consulate covering full quantity as per Bill of Lading.
If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.
In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agents at discharging ports to forward relevant cargo discharge certificates to Agents at loading ports without delay.
PILOTAGE: Mooring Master normally meets vessels within 1.5 miles of terminal sea berths and will act as Pilot and as Company's Representative and remain on board during vessel's stay in port. Vessels requested to have Pilot ladder of an approved pattern, safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. When it is necessary for a vessel to anchor before being berthed she should do so in the recommended anchorage area. Two 45 ft. tugs painted blue with white superstructure assist berthing by running mooring lines to stern buoys. The Pilot boat has a blue hull and white superstructure and is radar equipped. The name "Independent" is on each bow and stern.
Vessels with a Mooring Master on board shall display International Code Flag "H" in a prominent position whilst manoeuvring under his advice, and shall, if so instructed by Mooring Master, display a flag indicating berth to which vessel is proceeding.
ANCHORAGES: Vessels requiring anchor for any reason in port limits should do so within area enclosed between positions:

29° 02′ N.	48° 14.3′ E.
29° 02′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 15.1′ E.
29° 01.2′ N.	48° 14.1′ E.

or within reasonable proximity to the East if congestion arises in anchorage area.
All vessels and craft within the port shall be navigated with care and caution, at a speed, and in a manner which shall not endanger the safety of other vessels or craft. In particular, special care and caution is to be observed in passing vessels or craft of the following category: weight-lifting or deeply-laden craft, vessels which are mooring or moored at terminal buoys, vessels or craft in tow and vessels or craft engaged on diving, dredging, grabbing, pile-driving or construction work, survey operations or the removal of obstructions.
All vessels within the port shall anchor, or moor and unmoor, when and where required by the Marine Officer, and shall be moved from place to place as required and by such means or appliances as may be ordered by the Marine Officer.
Vessels or craft shall not anchor near any submarine lines within the port limits, unless engaged on work which, in the opinion of the Marine Officer, necessitates their doing so.
MAX. SIZE: Vessels of unlimited length can be accommodated. Approximately 90,000 d.w.t. tankers fully loaded up to a maximum draft of 46 ft. on arrival, calling for bunkers only, can be accommodated. Vessels in the 200,000 d.w.t. class can be accommodated arriving in ballast condition for loading part cargoes up to a max. sailing draft of 51 ft. or for normal bunkering requirements when remaining in ballast.
HEALTH: Quarantine regulations administered by Kuwait Government's Quarantine Medical Officer. Pratique granted at anchorage or berth.
Vessels calling at Mina Abdulla are requested to send following information to "Health Minahmadi Port":
(1) Name of vessel.
(2) Last port of call.
(3) Health condition of crew.
(4) Validity of Smallpox and Cholera Certificates.
(5) Request for Free Pratique.
No craft, other than one having on board the Mooring Master or Port Health Officer, may approach any vessel entering the port and no other person may board any such vessel until free pratique has been granted.
Adequate covers shall be placed over all overside discharges.
Masters shall be responsible for ensuring that no unhealthy or offensive matter is deposited from their vessels on port premises. Any such matter so deposited that is, or becomes offensive, or, in the opinion of the Port Health Officer, injurious to health, may be removed, confiscated or destroyed and the place of deposit cleaned or disinfected on the direction of the Marine Officer at the expense of the Master responsible.

Any vessel, having on board offensive goods, or goods which, in the opinion of the Port Health Officer, are injurious to health, may be ordered to leave the port by the Marine Officer.

No ashes, refuse or other objectionable matter shall be thrown overboard from any vessel either on to any premises or into any waters of the port.

RADIO: Master shall inform Marine Aminoil at least 72, 48 and 24 hours notice of time of arrival via Kuwait Government Coastal Radio Station, call sign "9KK".

MOORING: Mooring Masters may decline to moor any vessel if in his opinion it is not equipped with satisfactory mooring facilities, lines and gear, etc.

Vessels shall provide such tackle as may be required for loading or discharging cargo.

Vessels berthed at sea terminals shall provide not less than six good quality mooring ropes and/or wire hawsers aft, each not less than 120 fathoms in length. An eye shall be spliced in ends of ropes to secure lines to pelican hooks on buoys. Two insurance wires are provided in each berth. Ships must have both anchors ready for immediate use each with minimum of chain as follows:

Below: d.w.t. 10,000, 8 shackles. Between: d.w.t. 10,000–20,000, 9 shackles; 20,000–30,000, 10 shackles. Above: d.w.t. 30,000, 11 shackles; 40,000, 12 shackles. Above 60,000, 13 shackles; and above 80,000, 16 shackles. The term shackles is to be interpreted as a length of 15 fathoms. Masters shall be responsible for seeing that a strict watch is kept on their vessel's moorings to prevent ranging.

BERTHING: Master shall, before berthing, advise Marine Officer of any special damage or disability to the vessel. No. 1 Berth Lat. 29° 01′ 16″ N., Long. 48° 11′ 52″ E. approximately, situated about 2 miles offshore in 43 ft. water LWOST over sand and coral with fair holding ground. A spar-buoy painted yellow with black bands marks end of submerged steel pipe-lines. A common bunker line to the berths, off-branches approximately 1,000 ft. South of Berth No. 1 and runs in to meet the direct line from shore to this berth. Ends of attached loading hoses marked by can-buoys on either side of the Spar. Four mooring buoys in Berth No. 1 and five in Berth No. 2 painted red and silver located in an arc, 1–2 cables approximately E.S.E. through South of S.S.W. from spar-buoys for vessel's stern moorings. Ship's anchors only are used forward No. 2 Berth (situated approximately half a cable South and nine cables East of Berth No. 1); Lat. 29° 01′ 0″ N., Long. 48° 12′ 51″ E. approximately. Depth of water in Berth No. 2 is 56 ft. LWOST over mud and clay which is excellent holding ground.

LOADING: Terminal has facilities to load at max. rate of 1,500 t.p.h. in Berth No. 1 and 2,800 t.p.h. in Berth No. 2, but this loading rate can be achieved only when vessel is furnished with appropriate equipment.

Caution: The incoming oil stream is pumped from shore and it is extremely dangerous to close a ship's valve against the incoming oil stream. Such a procedure creates an excessive pressure, which may damage submarine lines, ship's pipe-lines or the terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by shore crew as advised by Mooring Master who will remain on board while ship is mooring, loading or discharging and unmooring. Vessels will provide winch drivers and remove such manifold blanking flanges and fit reducing pieces as required.

Deck hose connections from submarine lines as follows:

Cargo: 10 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges. Bunker flanges 8 in. ID, working pressure 150 p.s.i., fitted with 150# ASA steel flanges.

Loading and discharging of petroleum vessels shall not be undertaken without permission of Marine Officer.

Loading and discharging of petroleum vessels shall not commence until:

(1) Master or Chief Officer has certified to Marine Officer that all necessary valves are open and that vessel is in proper condition to receive or discharge cargo.

(2) Master or Chief Officer has certified to Marine Officer that all ship's sea valves are closed or blankflanged except those required for water circulation purposes, and that these regulations are being and will be observed.

(3) Ship's tanks have been inspected by an authorised inspector and passed as suitable for loading.

Throughout period of loading and discharging operations, following conditions shall be observed:

(1) A responsible ship's officer shall be on watch on board at a point near tanks which are receiving oil during process of loading. The company's staff have received instructions to stop loading immediately whenever this rule is disregarded.

(2) A capable member of ship's crew shall be stationed by ship's tank valves which are receiving oil during loading.

(3) All pipe-lines and hoses shall, while rigged for loading or discharging petroleum, be directly and continuously earthed and kept constantly under supervision.

(4) No petroleum shall be allowed to escape or overflow.

(5) The following signals will be observed, as well as the radio communications, between ship and shore:

Signal Flag by Day		*Light Signal by Night*
1 Red Flag	*Starting* Slow Speed	1 Red Light
2 Red Flags	Full Speed	2 Red Lights
	Stopping	
1 Red Flag	Slow Speed	1 Red Light
All Flags Down	Stop	No Lights

(6) When normal ship-to-shore communication fails, the emergency signal to stop the oil flow will be a continuous blast on the ship's whistle until the oil ceases to flow. Steam or air should never be shut off from whistle during loading. When practical, means should be provided for blowing the whistle from the after section of the cat walk. Whenever an Emergency Whistle Signal is used, all loading operations in the berths will be shut down until normal communication is restored. For this reason it is requested that ships in the area refrain from using ship's whistle for other than essential purposes.

Load Lines: Masters are warned that their load lines are subject to scrutiny by the port officer from Mina-al-Ahmadi on completion of loading or bunkering. It is in their own interest therefore, to observe the regulations, as vessels are liable to be delayed and have to pump ashore or be fined if overloaded, and Port Clearance withheld.

BALLAST: As soon as practicable after arrival, all vessel's tanks will be inspected for evidence of oil in ballast. During discharge of ballast, similar inspections will continue. If evidence of oil appears at any of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there completely discharge all oily or dirty ballast.

Masters will be required to sign a declaration certifying that any water ballast intended for discharge from vessel is clean and free from oil. Arrangements are being made by the Company for dirty ballast disposal facilities to be supplied in the future, if and when required, by vessels in this port.

POLLUTION: Cases of discharging dirty ballast or oil spillages will be investigated and vessels are liable to fines and/or detention. Vessels shall not discharge into the water of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. Masters shall ensure that pipe-line and equipment are clean before using them for discharging anything into the water of the port. Scuppers shall be plugged effectively and no leakage or spillage of petroleum on board shall be allowed to leak or be swept overboard.

The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars."

Paragraph 3, Art. 6.. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

TIDE: The maximum tidal range is 10 ft. 6 in. and velocity of tide is from 0.5 to 2 knots.

DENSITY: 1025.

MEDICAL: Patients will in normal course of events be treated by Quarantine Medical Officer on board. Neither medical nor hospital facilities are provided by the Company. However, in cases of emergency those requiring urgent hospitalisation may be taken by vessel's Agent.

FUEL: Fuel oil bunkers can be loaded in either berth at a max. rate of 500 t.p.h, thus raising the max. loading rate of either berth by 500 t.p.h. for fuel oil cargoes only.

FRESH WATER: Cannot be supplied at Mina Abdulla. In case of utmost need Agent may hire a barge with a capacity of 100 tons of fresh water from Kuwait, and send to Mina Abdulla.

CUSTOMS: Import of firearms and ammunition is forbidden. Under Kuwait Law No. 46, it is an offence to sell or trade liquor within the State of Kuwait. Any person convicted for selling, purchasing, giving away, accepting or acquiring in any manner, liquor or any intoxicating drinks for the purpose of trading and marketing shall be punished by a max. 3 years imprisonment and a max. fine of KD 300 or by only one of the two aforesaid penalties. Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CONSULS: See "Shuwaikh". The American Consulate is situated just outside Kuwait town, some 30 miles from the terminal.

REPAIRS: No facilities.

REPATRIATION: Seamen arriving Kuwait Airport to join vessels at Kuwait ports can obtain transit visa at airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at Kuwait. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew. Marine Superintendent of Owners, or Owner's Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

AIRPORT: Kuwait.

TIME: GMT plus 3 hours.

PROVISIONS: Aminoil does not provide any chandlering facilities. Masters of vessels calling at Mina Abdulla must arrange for supplies through ship's Agent. Foodstuffs, beverages, tobaccos, etc., are available from ship chandlers in Kuwait in limited kinds and quantities. Prices a little more expensive than in Kuwait due to long transportation. Ship's Agent should be advised by cable well in advance.

CERTIFICATES: See "Documents". There is no organisation for dealing with Deratisation Certificate at Mina Abdulla. Agents are responsible for presentation of oil-discharging certificate to Customs Authorities as guaranteed by them. All cargo discharge certificates duly attested by the Arab Consulate are to be sent to Agents directly.

SHORE LEAVE: At present, crews not allowed ashore at Mina Abdulla, and this rule will be strictly adhered to.

REGULATIONS: Main engines shall always be kept ready for immediate use. Steam pressure shall be maintained at min. necessary to operate auxiliaries and to manoeuvre in case of need. Deck steam is to be maintained at all times.

Engine repairs which may prevent working of main engines may only be undertaken with written permission of Marine Officer.

Master shall at all times retain on board sufficient crew to work vessels.

Vessels shall have both anchors ready for immediate use on arrival and departure.

Vessels berthed at sea terminals shall not carry out engine trials without permission of Marine Officer.

Vessels berthing during hours of darkness must if available provide a portable light of an approved gas-tight pattern capable of being placed on either quarter of vessel to illuminate vessel's mooring ropes sufficiently for mooring boat.

Vessels shall provide an efficient accommodation ladder and boat rope for port authorities and, during hours of darkness, shall install adequate approved lighting for same. Failure to comply with this may lead to inward clearance being delayed by authorities, thus incurring delays to vessel.

No swimming in vicinity of vessels or from vessels in berth is allowed.

AUTHORITY: American Independent Oil Company.

AGENTS: See "Shuwaikh".

MINA-AL-AHMADI: 29.04 N. 48.09 E.

OPERATORS: Kuwait Oil Company Ltd.

LOCATION: Port of Mina-al-Ahmadi is open roadstead situated on Western shores of the Gulf.

PORT LIMITS: From the shore at Lat. 29° 02′ 50″ N. Eastward to Long. 48° 09′ 42″ E. Thence in a S.E. direction to position Lat. 29° 02′ 45″ N., Long. 48° 09′ 47″ E. then in an Easterly direction towards Long. 48° 11′ 30″ E. and the Northerly limit 29° 10′ 00″ N. from the shore to 48° 11′ 30″ E.

FLAG: National flag of Kuwait is to be flown at foremast head during vessel's stay in port.

NAVIGATIONAL AIDS:

Current hydrographic information may be obtained by radio from the "Middle East Navigation Aids Service, Bahrain".

Lights and Fog Signals

A fog signal on the extreme South end of South Pier with characteristics of one 3-second blast every minute. Approx. position Lat. 29° 04′ 05″ N., Long. 48° 10′ 00″ E.

A fog signal situated on the North Pier with a characteristic of 2.5-second blast, 3-second silence, 2.5-second blast, 3-second silence, 2.5-second blast, 46.5-second silence, Approximate position 29° 07′ 24″ N., 48° 09′ 00″ E.

A fog signal situated on the Sea Island with a characteristic of 2×3 second blasts every 90 seconds. Approximate position 29° 06′ 48″ N., 48° 17′ 29″ E.

DOCUMENTS:

1. To obtain clearance inwards, following documents required by Agents:
   - (i) Ship's Register.
   - (ii) Safety Equipment Certificate.
   - (iii) Safety Radio Certificate.
   - (iv) Load Line Certificate.
   - (v) Last Port Clearance.
   - (vi) Two copies of Crew List showing names, nationalities and passport/seamen's book numbers.

Items (i) to (v) are returned to Master together with Port Clearance (valid 24 hours only) prior to sailing.

2. Customs boarding officers require following:
   - *(a)* One copy of Crew List.
   - *(b)* Log Books covering period from last visit.
   - *(c)* Completed Customs Declaration Form (supplied by boarding officer).
   - *(d)* List of Ports visited with arrival and departure dates since last visit (form also supplied by boarding officer).
   - *(e)* Completed Ballast Form (form also supplied by boarding officer).

3. Immigration officials require the following:
   - *(a)* Valid Passport or Seamen's Book – the latter is preferable for landing.
   - *(b)* Letter of Guarantee from Agents (iv above).
   - *(c)* Two copies of Crew Lists.

4. Early Departure Procedure. KOC Documents Section are now operating an Early Departure Procedure to cut down delays in documentation. Masters may opt to use this scheme, full details of which can be obtained from KOTC.

5. Discharge Certificates: Discharging certificates of oil cargo loaded from Kuwait and neutral zone ports are to be sent to vessels' local Agent immediately, duly attested by Customs authorities and Arab Consulate covering full quantity as per Bill of Lading.

If a vessel, which has not submitted the certificate for the previous voyage, calls for the second time, she will be allowed to load and sail only after paying a cash deposit of KD 2,000.

In order to avoid delay in berthing, loading and outward clearance for vessels, all owners must give instructions to Agent at discharging ports to forward relevant cargo discharge certificates to Agent at loading ports without delay.

PILOTAGE: Vessels should arrive with sufficient clean ballast for safe manoeuvring under prevailing weather conditions. Under certain conditions the Pilot, after consulting the Harbour Master, may require additional ballast to be run in before berthing.

All berthing, unberthing and manoeuvring of vessels within the port limits, restricted area and prohibited anchorage must be done under the supervision of a KOC Pilot.

It is the duty of the Master to inform the Pilot of any special conditions, difficulties, or peculiarities whatsoever pertaining to his vessel which might impose hazards in connections with the handling, mooring, unmooring, loading or discharging of the vessel.

ANCHORAGES: The suggested anchorages in the port of Mina-al-Ahmadi have been laid out to facilitate shipping in general. These anchorage areas are outside of the port limits and clear of the prohibited anchorage and restricted areas. Depths in the anchorages range from 10 to 15 fathoms, the seabed is of sand and soft coral with mud patches and affords good holding ground.

Incoming vessels are assigned berths by the Harbour Master in accordance with time of arrival, type of cargo required, size of vessel and loaded draft. Endeavour is made to berth vessels on arrival and Masters will be advised, prior to arrival, of the pier at which they will berth. If a berth is not available, vessels will be requested to anchor in one of the three anchorages as follows:

1. To the North-East of the Sea Island and outside of the restricted area.
2. To the East of the North Pier, outside of the port limits and to the North of the prohibited anchorage.
3. To the East of the South Pier, outside of the port limits and between the Southern limit of the prohibited anchorage and the Northern port limit of Shuaiba Port.

To the East of the port limits exists a prohibited anchorage and a restricted area which embraces the Sea Island and submarine-feeder pipe-lines.

Positions of these areas are:

Prohibited anchorage	29° 05′ 00″ N.	to	29° 05′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
	29° 07′ 00″ N.		29° 07′ 00″ N.
	48° 11′ 30″ E.		48° 15′ 00″ E.
Restricted area	29° 05′ 00″ N.	to	29° 05′ 00″ E.
	48° 15′ 00″ E.		48° 20′ 00″ E.
	29° 09′ 00″ N.		29° 09′ 00″ N.
	48° 15′ 00″ E.		48° 20′ 00″ E.

HEALTH:

Vessels calling at Mina-al-Ahamdi are requested to radio the following information to "Health Minahmadi Port":

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that free pratique has been granted.

Regulations.

- (i) All vessels must exhibit quarantine signals until quarantine formalities are completed or free pratique granted. By day, International Code Flag "Q"; by night, red light over white light. No person other than the Pilot is allowed to board any vessel either alongside pier or at anchorage until pratique has been granted.
- (ii) Valid smallpox Vaccination Certificates for all crew members and passengers are required. Valid Cholera Certificates will be required from travellers coming from infected areas with the exception of children under one year.
- (iii) Ratguards must be fitted to all moorings – this is being rigidly enforced.
- (iv) Maritime Declaration of Health Form (supplied by boarding quarantine officer) to be completed.
- (v) One copy of Crew List containing dates of vaccination and inoculation is required.
- (vi) International Certificates of Vaccination and Inoculation to be available for inspection if required.
- (vii) Details of air-conditioning available in vessel (form supplied by boarding officer).
- (viii) A valid Deratisation Certificate must be produced. Facilities are available locally for renewal.

RADIO:

1. *Station:* All radio communications to the Company should be

quoted in Greenwich Meantime and should be routed through Kuwait Coast Station 9KK, details of which are given below:

412G Al Kuwait (9KK) 29° 10′ 09″ N., 47° 45′ 42″ E.

Frequency			*Hours*
(9KK) 430*, 450, 500	A1, A2	2 kW.	0300–2100
(9KK2) 4,287	A1	0.75 kW.	On request
(9KK3) 6,370	A1	0.75 kW.	On request
(9KK4) 8,525	A1	0.75 kW.	0300–2100
(9KK5) 12,895	A1	0.75 kW.	0300–2100
2,182, 2,200, 2,750	A3	0.1 kW.	0300–2100

*On request.

Procedure: Transmits traffic lists on 450 kc/s. each even hour; 8,525 and 12,895 kc/s. each odd hour plus 35, listens for 30 mins. thereafter: 2,750 kc/s. each odd hour plus 05.

2. *ETA:* 96 hours before arrival Masters should transmit to Kuoco through Al Kuwait Radio (9KK) the following information required by Kuwait Oil Company.

1. ETA.
2. Cargo and Bunkers required.
3. Notice of any repairs which may immobilise vessel.
4. Any special requirements regarding cargo documents.
5. Max. loading rate and ballast discharge time, special loading instructions if any.

The ETA should be confirmed 24 hours before arrival. The Master should also provide Agent with following information prior to arrival:

1. ETA.
2. Last port of call.
3. Any sickness on board.
4. Number of crew members unprotected against smallpox.
5. Number of crew to see doctor or dentist.
6. All requirements – provisions, supplies, lubricating oils, repairs, stores, machinery for landing, crew repatriation, etc.

3. *Radio Beacon:* A low power radio beacon call sign "9KU" frequency 312.6 kc/s. is situated at Lat. 29° 04′ 13.4″ N., Long. 48° 08′ 27.5′ E. Code transmissions are repeated every 20 minutes commencing on the hour throughout the 24 hours as follows: 9KU repeated 3 times for a period of 20 seconds followed by a dash for 20 seconds alternately for a whole period of two minutes.

VHF: A short range VHF radio telephone Port Control system is in operation and continuous watch is maintained on International Channel 16. Port Working Channels are:

Channel	*Function*
11	General Port Working
12	Pilot and Tugs North/South Pier/Sea Island
13	Sea Island Loading
14	Pilot and Tugs North/South Pier/Sea Island
26	Public Correspondence
27	Public Correspondence

Vessels bound for Mina-al-Ahmadi should contact Port Control calling "Mina South Pier signal" on Channel 16 a few hours before arrival.

N.B As Channel 16 is reserved for Calling, Safety and Emergency, vessels should refrain from using this Channel unnecessarily.

NOTICE OF READINESS: *(a) Vessels Berthing Direct from Sea:* The vessel will be advised by VHF or signal lamp. "Berthing on arrival" and the "Notice of Readiness time" will be taken as the time the Pilot boards the vessel.

(b) Vessels Anchoring and Awaiting Berth: When a berth is not available, or in the absence of any communication from the shore the time of NOR is taken as the time the vessel anchors in the roads. Time of anchoring, together with position relative to South Pier Control, should be advised to the Harbour Master by VHF or through 9KK as soon as possible. All vessels at anchor are required to be ready to berth on receipt of one hour's notice from the shore; this notice will be given by VHF or lamp and vessels should ensure an efficient watch is maintained to receive this notice.

(c) Cancellation of NOR: If after receiving one hour's notice a vessel is not ready to berth when Pilot boards, at the expiry of that notice the original NOR will be cancelled and the Pilot withdrawn. The new NOR will be the time the vessel indicates to the shore that she has rectified the defect that originally prevented her from berthing. As vessels are normally berthed in strict order to NOR time a vessel could lose considerable time through not being ready, and Masters should ensure that delays of this nature do not occur.

TUGS: KOC maintain 6 diesel tugs for port use. 4×1,500 h.p. with a bollard pull of 24 tons, and 2×2,500 h.p. with a bollard pull of 30 tons. 4 tugs normally maintained on duty at all times. Hire charges for the services of Pilots, tugs and rope launches are covered by comprehensive port charges. Under normal operating conditions, no tug or other craft will come alongside the vessel before the Pilot boards; ship's personnel must not signal for tugs or other boats to come alongside.

MOORINGS: When at berth, vessels must be moored to entire satisfaction of Pilot. Vessels must be ready at all times to put out extra moorings as requested by pier personnel or dictated by weather changes.

Mina-al-Ahmadi is subject to sudden fierce squalls; winds of 70 knots have been recorded, therefore vessel's mooring lines must be checked frequently to prevent excessive movement of vessel in berth. Experience has shown that wholly synthetic moorings have too much elasticity and allow vessel to range or drift away from the berth during periods of adverse weather. Whilst these moorings are acceptable as head/stern ropes, it is felt that the ideal breast moorings should be of wire or a wire rope combination with the end being sent ashore fitted with a synthetic pennant or tail. This type of mooring provides the necessary elasticity while still being able to hold the vessel in position. All vessels moored with automatic tension winches must set the manual brakes on these winches.

BERTHING: Vessels can berth at any time of the day and night. Berths are allocated depending on shipping position and size of vessel and the berthing position is advised by VHF. All vessels must establish contact with Signal Station or Sea Island Control before anchoring to ascertain position indicating the NOR time. Vessels should remain at one hour notice for berthing at all times and maintain an efficient watch on VHF.

There are 2 piers, 6 buoy moorings (seaberths) and a Sea Island.

South Pier. The South Pier is connected to the shore by an approach trestle, this trestle leaves the shore in position 29° 04′ N., 48° 09′ E., and runs seaward in an 071° 26′ direction for a distance of 4,200 ft. (1,280 m.). The "T" head is formed by the oil pier running Northwards in a 341° 26′ direction for 2,805 ft. (655 m.) and the general cargo/oil pier running Southwards in a 174° 26′ direction for 1,076 ft. (328 m.). The pier is a steel piled structure with a wooden deck, 24 ft. above LWOST. The South Pier has 6 oil-loading berths, plus 2 berths which can be used for general cargo or L.P.G. loading; details of these berths are as follows:

Limiting Depths and Berth Lengths

Berth	*Depth at LWOST*	*Nominal Length*
1	48.0 ft.	660 ft.
2	47.0 ft.	675 ft.
3	47.0 ft.	705 ft.
4	50.5 ft.	765 ft.
5	41.5 ft.	765 ft.
6	43.5 ft.	705 ft.
9	44.0 ft.	615 ft.
10	49.0 ft.	1,050 ft.

All berths except Nos. 1 and 10 are equipped with 10 in. cargo lines and 8 in. bunker lines. No. 1 and 10 berths are equipped for loading LPG each comprising a 16 in. loading line and a 10 in. vapour return line and a 6 in. circulating line. No. 9 is only equipped for bunkers and dry cargo.

North Pier. The North Pier is situated 3.5 nautical miles North of the South Pier and connected to the shore by an approach trestle which runs seaward from 29° 07′ 04″ N., 48° 08′ 10″ E. in a direction of 071° for a distance of 4,754 ft. (1,449 m.); the head is formed by the oil pier which runs Northward in a direction of 341° for a distance of 2,304 ft. (702 m.). The pier is a steel piled structure with a wooden deck, 20 ft. above LWOST. The North Pier has 4 oil-loading berths details of which are:

Limiting Depths and Berth Lengths

Berth	*Depth at LWOST*	*Nominal Length*
11	59 ft.	1,008 ft.
12	58 ft.	1,296 ft.
15	57 ft.	792 ft.
16	57 ft.	740 ft.

Berths 11 and 12 each have 4×12 in. cargo hoses, 1×12 in. Chiksan arm for naphtha loading and 2×8 in. bunker hoses. Berths 15 and 16 each have a Chiksan loading unit consisting of 4×12 in. cargo arms and 2×8 in. bunker arms. To facilitate the connecting of hoses on Berths 11 and 12, North Pier vessels are requested to retain sufficient ballast so that their manifold height above zero ft. tide does not exceed 60 ft.

Sea Island Terminal. The loading platform of this new terminal is located in position 29° 06′ 48″ N., 48° 17′ 29″ E., approximately 7.4 miles East of the North and South Piers. This terminal is a steel piled structure in 94 ft. of water (LWOST). It consists primarily of a central loading platform with control tower, six mooring and four breasting dolphins, all interconnected by catwalks. The terminal, which lies in 330°–150° direction, is some 1,620 ft. in length. The height above datum of the loading platform is 44 ft.

Control Room on this terminal is about 90 ft. above water level.

Two vessels can berth at the same time but loading is possible one at a time, and the crude oil is fed by a 48″, and heavy fuel oil bunkers by a 20″, submarine pipe-line from shore. Navigational lighted buoys lettered A, B and C have been installed to mark the run of these pipe-lines. Other than heavy fuel oil no other bunkers available. Light fuel, marine diesel are not available at the Sea Island Terminal. Therefore vessels berthing at Sea Island requiring light fuel oil and marine diesel should inform Sea Island Control prior to berthing to avoid any possibility of delays. Sea Island berths each fitted with 4×16″ cargo lines and 2×12″ bunker lines.

Sea Berths: These berths are no longer in use and the buoys and moorings have been withdrawn.

Manifold Loading Connection Sizes. North Pier cargo flanges are 12 in. and bunker flanges 8 in. standard 150#ASA. South Pier cargo flanges are 10 in. and bunker flanges 8 in. standard 150#ASA. Sea Island Terminal cargo flanges are 16 in. and bunker flanges 12 in. standard 150#ASA.

Reducers. All vessels using the port of Mina-al-Ahmadi, should be equipped with reducing spools to fit these loading connections. These fittings should be in place prior to berthing to help expedite the vessel's turn-around time.

Slops. A 6 in. slop-line is available on all berths on North and South Piers for reception of slops. For first 3 hours use of this facility is free, for each additional hour or part thereof, a charge is made. Reception of slops is necessarily slow and a vessel may be considerably delayed in having to pump slops ashore. Vessels are therefore expected to arrive with clean ballast and Masters are asked to certify that all tanks and lines have been thoroughly washed unless "load on top" techniques are being operated.

CRUDE/PRODUCT LOADING RATES: The following table shows the crude products available at each berth and the nominal loading rates:

Cargo	*Available at berths*	*Nominal t.p.h.*	*Maximum potential*
Crude Oil	Sea Island 20 and 21	15,000	
Crude Oil	11, 12, 15 and 16	7,200	12,000
Crude Oil	2, 4 and 5	3,800	7,000
Crude Oil	3 and 6	3,200	5,000
Crude Oil	1 and 10	2,800	2,800
Heavy Fuel Oil	11, 12, 15 and 16	2,000	
Heavy Fuel Oil	4 5 and 6	2,700	
Heavy Fuel Oil	3	1,100	
Heavy Fuel Oil	1, 2, 9 and 10	500	
Light Fuel Oil	11, 12, 15 and 16	600	
Light Fuel Oil	3, 4, 5 and 6	1,100	
Light Fuel Oil	1, 2, 9 and 10	500	
Admiralty FO	3, 4, 5 and 6	1,200	
Diesel Oil	11, 12, 15 and 16	250	
Diesel Oil	1, 2, 3, 4, 5 and 6	500	
Diesel Oil	9 and 10	250	
Gas Oil	1, 3, 4, 5 and 6	1,500	
KLD	1, 2 and 4, 11 & 12	1,400	
PPO	1 and 2	300	
KNG	1, 2 and 4, 11 & 12	1,400	
Bulk LPG	1 and 10	1,000	

Note: All blended cargoes containing crude oil as one of the components can be loaded at any berth.

FUEL: Heavy, light and diesel fuel can be supplied on all berths except the Sea Island, where only heavy fuel is available. Approx. Specifications:

	API	*Viscosity*	*Sulphur content*
Heavy Fuel	15.2–15.8	2,900–3,400	4.0 or less
Light Fuel	19.0–20.0	600	3.5 or less
Diesel Fuel	35.5–36.5	36	1.5 or less

LUBRICATING OILS: The stock of marine products of BP, Shell and Gulf Oil are maintained at Mina-al-Ahmadi and requests indicating the quantities are to be made in advance. All drums are to be handled during deballasting or before loading. Vessels will not be allowed to load more than 9 drums after loading unless under special circumstances and depending on shipping congestion. No bulk luboil delivery service available in Kuwait.

DRY CARGOES: Dry cargo vessels will either discharge into lighters in the anchorage or alongside South Pier at Berths No. 9 or No. 10, subject availability of berths.

Cargo Cranes. Portal cranes of 5 tons capacity on Berths 9 and 10, also a stiff-leg derrick with a lift of 54 tons on Berth No. 10A. However, vessels are expected to have their own cargo equipment ready for use in case this gear is required.

Explosives. Cargo vessels carrying explosives are not allowed alongside piers.

Barges. Company barges available for use in discharging dangerous cargoes or other cargo in the anchorage.

Stevedores. Agents will arrange stevedores to work cargo whilst KOC will provide launch, barge and shore labour.

MEDICAL: Patients will normally be treated at State Quarantine Clinic, where doctors are on duty between 0800–1200 hrs. and 1500–2000 hrs. daily. In emergencies doctors are available any time. Patients requiring hospital treatment will be transported by Agents to either KOC hospital in Ahmadi or to State hospital in Kuwait. Dental treatment can be arranged by Agents.

FRESH WATER: Fresh water is not normally available except in emergency cases but in the Summer it will be difficult to obtain. However, vessels must send in their requirements well in advance to ascertain possibility of supply from Shuwaikh anchorage. This will be subject to draft restrictions, deviation, delay depending on availability of suitable barges and previous port commitments to other shipping and additional port charges.

DEEP WATER DEPARTURE CHANNEL: A comprehensive survey was carried out to determine the route of the departure channel for the larger and deep draft vessels leaving the port of Mina-al-Ahmadi in a loaded condition. This channel is some 28 miles in length; it extends from the Sea Island Terminal to Madaira Reef and is marked by 21 light buoys and 2 light beacons, one established on Taylor Rock and the other on Madaira Reef. In addition to the above aids, Madaira Reef Light Vessel has been re-positioned further to the East and renamed Ahmadi to act as a fairway mark. Water depth in the departure channel is from 91 ft. to 100 ft. and above. Two shallow patches, one is about 9 miles from Sea Island with a minimum 91 ft. and the second is 14 miles from Sea Island with 92 ft. minimum water. Vessels which by reason of their draft are confined to this deep water channel and consequently hampered in their freedom to manoeuvre, will exhibit the following signals:

(i) *By day.* A black cylinder 4 ft. long by 2 ft. in diameter exhibited where it can best be seen.

(ii) *By night.* Four red lights vertically disposed spaced 3 ft. apart with an all round visibility of 4 miles exhibited where they can best be seen.

The exhibition of these signals in no way absolves any vessel from taking all appropriate action to avoid collision as required by the International Rules and Regulations for Preventing Collisions at Sea, but if a deep draft vessel is in doubt that an approaching vessel is not giving her sufficient room to manoeuvre she should indicate such doubt by giving at least five short and rapid blasts on her whistle.

Vessels having less draft should, when able to do so, give way to vessels exhibiting and sounding these signals and indicate this intention by giving one short blast followed immediately by 1 long blast on the whistle. Normal sound signals for vessels in sight of another should then follow.

Anchoring and fishing are forbidden within the deep water departure channel.

The departure channel is marked by the following buoys and beacons:

Number/ letter	*Type*	*Position N/Lat.*	*E/Long.*	*Character*	*Port star-board/ middle ground*	*Vis. (0.85) (miles)*

CUSTOMS:
Customs officials will board vessels to inspect log books to ascertain violation of Israeli Boycott Rules and seal the liquor bond during stay in berth. An accurate list of alcoholic drinks in *Bonded Store* only is to be presented to the officials sealing the bond and the seal is not to be broken until vessel leaves the port.

(i) Personal effects mainly required for personal use and not for re-sale or purpose of commercial gain are allowed free of duty. However, all other goods are subject to a 4% ad valorem duty (CIF value). Suppliers invoices and Certificate of Origin are required for clearance.

(ii) Importation and the sale of alcoholic beverages is strictly prohibited.

(iii) All goods for landing from tankers must be declared to boarding Customs Officer and necessary documentation completed.

(iv) Israeli goods, goods made by companies having interest or branches in Israel, Israeli vessels and vessels trading with Israel are boycotted and not allowed entry into Kuwait.

IMMIGRATION:

(i) Nationals of all friendly countries normally allowed to land. Israelis forbidden entry into Kuwait.

(ii) Transit visas should be obtained from Kuwait Embassies and Consulates abroad. However, in emergencies entry visas can be arranged at airport.

(iii) Transit passengers having valid connecting airline ticket to next port are allowed to land without visas up to 24 hours, extendable to 48 hours if required.

(iv) Seamen of all friendly countries normally allowed to land in transit to join vessels, without visas but on Agents guarantee. Advance information regarding names, nationalities, age, sex, etc. is required by Agents in order to facilitate reception and immigration clearance. *N.B.* Thursdays and Fridays are Company holidays.

(v) Seamen allowed to land for hospitalisation, repatriation, transfer, etc., on a written undertaking that all expenses are met by Agents on behalf of Owners.

(vi) Passports must be valid for Kuwait for citizens of all countries. Stateless persons are required to have a visa before arrival in Kuwait.

CONSULS: Most friendly countries maintain Embassies or Consulates in Kuwait Town.

TIME: Kuwait State bases local time on the 45th meridian (GMT plus 3 hours). This time is in force the whole year.

SERVICES: To avoid delay all vessels advised to cable Agent of all their requirements in advance, giving full details:

Repairs

(a) *Ship Repair.* All running repairs are undertaken through local contractors.

(b) *Radar/Radio and Electronic Equipment.* Maintenance service of this equipment is available through KOTC whose engineers/technicians are available for service on request.

Supplies. Supply of chemicals, paints, spare parts and provisions are available through local Agents.

Laundry. Laundry service is available on advance notice.

Oil Inspection. E. W. Saybolt & Co. maintain an independent inspection service.

Seamen Centre. This service is now centred only on South Pier,

open to visiting seamen from 0700–2200 hrs. daily. Film exchange facilities are available at the South Pier.

Classification Societies. Lloyds Register of Shipping has a Resident Surveyor in Kuwait and maintains an office with Kuwait Maritime & Mercantile Co., who attend marine and non-marine work. Other societies have non-exclusive surveyors and their services can be obtained through KOTC.

Divers. Divers services are available, including underwater hull cleaning service, through KOTC.

SHORE LEAVE: Ship's personnel and passengers not permitted ashore for any purpose whatsoever until pratique granted. All shore leave is contingent upon compliance with quarantine regulations and, under limited conditions and hours, shore leave may be granted. Masters should consult Agents to obtain the necessary passes.

REGULATIONS:

(a) Local laws. The laws of Kuwait are in force at the port of Mina-al-Ahmadi. Masters and crew members are advised for their own protection to abide by them. Comprehensive regulations governing the use of the port are promulgated in Law No. 21 of 1961. Masters of visiting vessels should acquaint themselves with this law.

(b) Pollution. The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwait Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwait Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

(c) Certificates. All vessels must comply with International Safety Regulations and ensure that ship's certificates, i.e. Safety Radio, Safety Equipment and Load Line are valid. Facilities are available for renewal or extension providing proper notice is given. At least 48 hours should be allowed *excluding* Thursdays, Fridays or other local holidays.

(d) Load Line Regulations are strictly enforced, vessels overloaded will not be allowed to sail and subject to lengthy delay awaiting suitable facilities for pumping ashore. No facilities for pumping cargo ashore from Sea Island are available.

(e) A Cargo Discharge Certificate for cargo loaded from Kuwait each voyage is to be presented to the Customs and Ports in Kuwait through the Agents within 4 months from sailing and these certificates are to be signed and stamped by local Customs officials and authenticated by an Arab Embassy or Consulate in the country of discharge.

PORT TAX: New tax introduced by the State of Kuwait at the rate of 45.25 fils (KD. 0.4525) calculated on ship's g.r.t. and outward clearance is subject to payment of their dues before departure.

Declaration of g.r.t. and n.r.t. details essential to avoid overcharge.

Early Departure Procedure:

EDP Cargo Documentation System is offered to all ships. Those vessels not accepting this system of documentation are unberthed to anchorage to await documentation and therefore subject to delay in sailing until documents are ready and delivered on board by launch. Weather conditions may prolong such delays on occasions.

AGENT: For all tankers loading/discharging or sundry errands on a sole agency basis. Address: Kuwait Oil Tanker S.A.K. (Agency Branch), P.O. Box Fahaheel No. 7055, Kuwait. Telex: 4201, 4202. A/B MINATANK KWT. Tel. 911753/5; 911758/9; 911811. Cables: "Minatank Kuwait."

KOTC Agency is also connected with direct short range telephone VHF system and continuous watch is maintained on Channel 16. Working channels are and can be reached by calling"Minatank". Channel 16, calling only. Channel 26, Agency working. Channel 27, Agency Working.

MINA SAUD: 28.45 N. 48.24E. (See Plan)

LOCATION: Mina Saud located just South of Ras Az Zaur approximately 24 miles 244° from Madaira Light Vessel. Terminal connected to field and production centre at Wafra, 31 miles to N.W., by 16-in, and 10-in. oil pipe-lines, and 8-in. gas line.

The most conspicuous object at the terminal is the refinery flare, in position 28° 44′ 13″ N. 48° 23′ 19″ E. Other objects conspicuous to the navigator are: Northern Radio Mast, Lat. 28° 44′ 32″ N. Long. 48° 23′ 38″ E. surmounted by a fixed red light at night; Az Zaur Beacon 28° 44′ 28″ N. 48° 23′ 40″ E. a 30 ft. high frame exhibiting flash every 5 seconds.

OPERATORS: Mina Saud Marine Terminal operated by Getty Oil Company (hereinafter referred to as the Company) 7 days a week. Weather and other circumstances permitting, ships will be loaded, moored and unmoored at all hours of the day. Company representatives available at all times to discuss with Master any problems affecting vessel turnaround.

FLAG: All vessels required to fly Kuwait flag at foremast during daylight hours. Flags may be obtained from Agents.

APPROACHES: Vessels on passage direct to Mina Saud up Gulf should pass about 1 mile South of Madaira Reef light-vessel, thence make good a course of 242° to an anchorage off Mina Saud in 9 fathoms.

DOCUMENTS:

Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passengers Manifest, if any.
Store List.
Bonded Store List.

Agents are responsible for presentation of oil discharging certificate to Customs authorities as guaranteed by them. All cargo discharge certificates duly attested by Arab Consulate to be sent to the Agents directly.

Cargo documentation carried out by Terminal. Masters will greatly assist Terminal Staff by prompt provision of ship's tank ullages on completion of loading.

PILOTAGE: Vessels boarded by Mooring Master either on approach or at anchorage. Mooring Masters are Licensed Masters Foreign Going. They act in an advisory capacity to Master and have expert knowledge of local conditions.

Mooring Master will pilot the vessel into the berth, supervise the mooring and unmooring, and advise Master with respect to the connecting and disconnecting submarine hose. A ship's deck officer must be on the bridge at all times while ship is manoeuvring, and deck officer must direct ship's crew in all hose handling. During loading operations Mooring Master will act as Company's representative

ANCHORAGE: Centre of anchorage area recommended is in position 090° from Flare 4.3 miles, which has good holding ground with mud and sand bottom.

Prohibited anchorage area defined as follows: beginning at refinery flare 060° 3.5′ thence 180° 1.75′ thence 270° 3.0′ to refinery flare.

WEATHER: In Summer months of June, July and August light to moderate Northerly and North-westerly winds are general rule at Mina Saud. Occasional strong N.W. winds of Gale force. Strength and duration governed by strength of S.W. monsoon blowing outside Gulf.

During Autumn and early Winter months fine weather is generally experienced associated with moderate N.E. monsoon prevailing outside Gulf. Occasional 'Shamals' (N.W. winds) occur.

In late Winter period and Spring, strong S.E. winds with moderately heavy seas frequently experienced at Mina Saud. These are due to approach of low pressure systems from Atlantic and Mediterranean Sea spreading Eastwards across Levant and Iraq.

TIDES: Tide cycle is combination of diurnal and semi-diurnal tides giving a Higher High, Lower High, Higher Low and Lower Low waters during a 24 hour period.

Range of tide is average 9 feet at Springs and 5 feet at Neaps.

Commencement of ebb stream (direction 190°) after Higher High water may be taken as 2 hours before predicted time of Higher High water at Mina Saud published in Admiralty Tide Tables.

Main direction of flood and ebb streams 010° and 190° is extremely variable between Lower High Water and Higher Low Water period. Average direction during this period about 045°

Tides subject to meteorological conditions and may be affected in height by plus or minus 2 ft. Times of High and Low water may be considerably affected.

The Mooring Masters have access to information from the Marine Meteorological Station at Mina Saud.

MAX. SIZE: See "Berthing".

HEALTH: Vessels calling at Mina Saud are requested to include the following information.

(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates.
(5) Request for Free Pratique or details or any cases or suspected cases of infectious diseases during the last four weeks.

Free pratique will be considered at the discretion of the Quarantine Officer and vessel must hoist the yellow flag unless informed by Agent or Harbour Control that free pratique has been granted.

RADIO: W/T messages routed via Kuwait Radio, call sign 9KK on 500 kHz. Kuwait radio transmits traffic lists on 450 kHz at 25 minutes past every even hour and on 8525 kHz and 12895 kHz at 35 minutes past every odd hour.

VHF Service maintained by Mina Saud Marine. Listening on Channel 16 (156.8 mHz). Operating hours: 0700 to 1200 and 1300 to 1600 local time.

Masters are requested to advise ETA 72 hours before arrival Mina Saud, and to confirm this when 24 hours distant from the Port.

It will assist if the following information is passed to "Gettymar Mina Saud" before vessel's arrival.

Bunker fuel requirements in metric tons or U.S. bbls. at 60° F.
Cargo requirements in long tons or U.S. bbls. at 60° F.
Confirmation that only clean ballast is to be discharged.
ETA should be confirmed 24 hours before arrival.

When berthed at Mina Saud Contact with the shore is maintained by VHF R/T portable units supplied by the Company.

TUGS: None.

READINESS: Notice of Readiness will be accepted by Company within terms of Charter Party or Contract when known, otherwise during ordinary business hours, which shall be between 0700 and 1800 local time except on Fridays and Public Holidays.

Laytime to commence 6 hours after time of acceptance or upon commencement of loading, whichever occurs first, except that when Notice of Readiness received before 1600 hrs. local time the 6 hours shall be continuous, but if received after 1600 hrs. then such 6 hours shall be daylight hours, daylight hours for such purpose being between 0600 and 1800 hrs. local time.

If after giving Notice of Readiness, vessel delayed in getting into berth or in loading, such delay shall not count as used laytime unless delay shall be due to default of Company. On completion of loading, laytime shall cease upon disconnecting cargo hoses.

Should Company Mooring Master be handed a Notice of Readiness out of business hours and before commencement of loading he will note it as "Received" at that time, for acceptance by the Company at earliest recommencement of business hours, or at time of commencement of loading, whichever shall be first.

If Notice of Readiness given after latest accepted nominated lifting date, laytime shall not commence before commencement of loading.

BALLAST: Vessels must have enough clean ballast to permit safe manoeuvring under any conditions. No shore tanks for disposal of dirty ballast.

Mooring Master will advise when ballast discharge may commence. Inspection of ship's tanks for suitability to receive cargo carried out by Mooring Master or by qualified petroleum inspectors if required.

GEAR: For handling 12 in. and 10 in. strings of hoses ship's derrick should have a minimum safe working load of at least 5 tons. Outreach overside should be at least 5 ft.

Two lengths of 3 in. or 3.5 in. circumference good quality manilla rope each of 50 fathoms in length should be available for use as guys to lead forward and aft for North and South flexible hoses.

Reducers should be available for connection of hoses to ship's manifold and to ship's bunker line connection.

Company provides snub lines of manilla and wire rope for hanging off hoses.

In the event that ship's derrick gear is inadequate for loads required, a work barge can be made available. Charge for this barge, including positioning and personnel, is equivalent of 150 U.S. Dollars per hour (approx.).

BERTHING: There are 2 loading berths with conventional sealine mooring which are connected by a 20 in. submarine line for cargo and a 12 in. submarine line for bunker fuel. Each berth has two 12 in. cargo hoses, and a 10 in. hose for bunkers.

The outer berth, 073°-2.6 miles from refinery flare, is equipped to take vessels of up to 120,000 d.w.t. or larger if part loaded and has a min. depth of 55 ft. the lowest low water. Max. draft allowed is 52 ft. at LLW. Except in exceptional circumstances when tidal loading is allowed. See Appendix below.

Appendix A. Mina Saud Tidal Loading Procedure December, 1975:

Assuming 1000 ft. ship has berthed. Starboard anchor between 150 ft. and 300 ft. South of starboard anchor marker and one ship's length (1000 ft.) inside, (Course make good 270°T). Starboard anchor ranged along bottom and port anchor let go when 11 – 12 shackles out on starboard. i.e. 900 ft. West of starboard (allowing for slack). Vessel would be in berth with between 8 – 10 shackles on each anchor.

When letting go at HW with ebb tide and heaving port anchor. V/L should manage to remain in at least 16.4 m. charted depth, heading about 340°T with stern in line with, or to seaward, of manifold marker buoy.

Every effort should be made to pick up port anchor without slacking too much on starboard anchor. Ideally, last shot of port cable is dragged home whilst starboard cable is fairly tight, so that when port anchor is aweigh vessel swings to starboard and presents her port side to the ebb, thus regaining a mid berth position. (Sometimes necessary to put engines ahead in order to clear manifold marker hose buoys).

Pilot should endeavour to have vessel heading North when starboard anchor is aweigh. Vessel should then steam North or slightly West of North in order to maintain a distance of approx. 1000 ft. from starboard anchor marker buoy. Vessel should start turn to starboard (bearing in mind ebb tide) when abeam of starboard anchor marker buoy, and endeavour to turn on radius of about 1000 ft. with starboard anchor marker buoy at centre. A course of 66°T should be made good until deep water is reached. If this procedure is followed, the min. depth should be not less than 16.4 m. (chart datum).

Note: 16.4 m. exists in berth and on exit channel. Close attention must be paid to vessel's position, as depths of less than 16 m. are in close proximity to exit channel.

Vessel should finish loading cargo or bunkers at least three hours before HW. Thus ensuring maximum height of tide for bottom clearance plus ebbing tide for easier control. (Ebb tide usually commences 2 hours before HW).

Divers should be utilised to check clearance at LW or some convenient time before ship is committed to a tidal loading. (In case of tidal anomaly).

16.4 m. must be reckoned governing depth. (53.8 ft.) and "Alaska Getty" must never be loaded to max. draft unless it is certain that she will sail with at least 1.8 m. of tide above chart datum.

For other vessels calculate thus:-16.4 + ht of tide then subtract 1 m., result will be max. allowable draft (only if weather conditions are ideal).

eg. Alaska Getty

16.4
+ 1.8 ht of tide
18.2
– 1.0 clearance
17.2 allowable draft (56 ft. 05 in.)

It must be borne in mind that mentioned clearances are the absolute minimum that can be tolerated in ideal conditions.

Seismic survey indicates feasibility of dredging or burying pipelines should it ever be necessary and also indicates good anchor holding power potential throughout area. *End of appendix.*

The inner berths, 073°-2.0 miles from refinery flare, has a min. depth of 44 ft. at lowest low water and can accommodate vessels up to 1,000 ft. in length. Max. draft allowed is 41 ft. at LLW.

MOORING: *(a)* Port is an open roadstead and ships must be prepared to use main engines, unmoor and leave at any time.

(b) Mooring and unmooring carried out during day or night, as required. Except mooring at Berth 1, during daylight only.

(c) Vessels moored to ebb tide stream at both inner and outer berths.

(d) At outer berth latest resilient type mooring method is employed.

Resilience in mooring achieved by weight of clump anchor and catenary of chain cable. A quick release hook connects ship's ropes to the buoy.

(e) Both port and starboard anchors should be lowered clear of hawse pipes and ready for instant letting-go from brakes.

Spar buoys established to mark starboard and port anchor dropping positions.

(f) Nine good quality natural or synthetic ropes should be flaked ready for running from the stern. After anchoring, as vessel proceeds astern in Berth, quarter lines are run by Company launch and secured to quick release hooks on quarter buoys.

(g) When securely moored in correct position for handling hoses, each anchor should have about 8 shackles out and it is advisable that tankers using these submarine berths be provided with not less than ten 15 fathom lengths of cable on each anchor.

(h) Masters are requested to ensure that power to deck machinery and sufficient seamen to operate it are immediately available at all times when in berth.

LOADING: Submarine line marked by permanent buoy at each berth, and marker buoys fitted to all hoses.

Recovery of flexible hoses is by fleeting with ship's tackle making use of beckets fitted to recovery chain.

"Ship's Stop" is invariable rule except in an emergency. Ship must give reasonable stand-by time to Mooring Master, 15 to 20 minutes, to alert Terminal staff on shore for closing gauges.

Loading rate at present averages 1,500 t.p.h. Max. 2,000 t.p.h.

MEDICAL: In emergency only. For normal cases, Agent arranges visit to Port Health Doctor.

FRESH WATER: Not available.

FUEL: Bunker fuel (Max. 1500 secs Redwood No. 1) at loading berths through 12 in. submarine line with single 10 in. flexible hose, at Berth 1, and 10 in. hose at Berth 2.

FIRE PRECAUTIONS: Masters are responsible for enforcing "No Smoking" regulations for their vessels and Mooring Master will stop loading if he considers them to be inadequate or if they are not being obeyed. Smoking in Company craft in the berths is forbidden.

CUSTOMS: Alcoholic beverages strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

It is important to remind Owners and Masters that all goods, either landed or embarked, must be cleared by Agent through local Kuwait Government Customs.

Import of firearms and ammunition forbidden.

CONSULS: See "Kuwait."

REPAIRS: No regular repair facilities available. However, fully qualified divers are available from Terminal. Underwater cutting gear and welding equipment available.

Services of divers and equipment are available at rates to be arranged for the job and agreed by Superintendent of Marine and Terminal Operations, Mina Saud.

Repairs to main engines must not be carried out in the berth without permission of Superintendent of Marine and Terminal Operations. Normally vessels requiring to immobilise engines will be anchored well clear of other ships.

REPATRIATION: Crew changes normally effected through Kuwait.

Seamen arriving at Kuwait Airport to join vessels at Partitioned Zone ports can obtain transit visa at the airport, if Agents arranged to submit the necessary guarantee to the Immigration Authorities confirming that they are in transit and joining vessels calling at Partitioned Zone. In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before the arrival of the crew.

Marine Superintendent of Owners, or Owner's representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions aboard.

TIME: GMT plus 3 hours. Permanent.

STORES: Provisions and stores are available from Kuwait. Requirements should be arranged with Agents through Kuwait Radio prior to arrival at Mina Saud.

SHORE LEAVE: Can be arranged through agent.
AUTHORITY: Getty Oil Company, Mina Saud.
AGENTS: See "Shuwaikh."
Communication is by road by personal visit of agency staff. Distance about 50 miles.

SHUAIBA: 29.02 N. 48.08 E.

All vessels should hoist the Kuwait flag.
PORT LIMITS: Shuaiba port limits defined as follows:
North: This separates port of Shuaiba and Mina-al-Ahmadi and is defined by the point of intersection of the coast line with Lat. 29° 02′ 50″ N. in an Easterly direction until it intersects Long. 48° 09′ 42″ E. Thence in a South-easterly direction to the intersection of Lat. 29° 02′ 45″ N. and Long. 48° 09′ 47″ E. Thence in an Easterly direction along Lat. 29° 02′ 45″ N. seawards to Long. 48° 15′ 07″ E.
East: Long. 48° 15′ 07″ E.
West: Coast line.
South: This separates port of Shuaiba and Miña-al-Abdullah and is defined by the point of intersection of the coast line with Lat. 29° 01′ 45″ N. Extends due East till Long. 48° 09′ 59″ E. and runs on 45° direction to Lat. 29° 02′ 00″ N. then due East on that line until Long. 48° 15′ 07″ E.
DOCUMENTS: 10 copies of Cargo Manifest (3 copies duly signed by Agent at loading port) and one copy each of hatch list and stowage plan. Also 2 copies of Crew List to be presented to Customs Office.
N.B. A copy of complete set of Inward Manifests and a copy of the Stowage Plan covering cargo for discharge at Shuaiba has to be passed to Authorities by Agents at least 24 hours before vessels expected time of arrival, otherwise berthing likely to be delayed.
PILOTAGE: Pilotage compulsory and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use.
ANCHORAGE: Lat. 29° 02′ 02″ N., Long. 48° 12′ 15″ E. Depth is 18.5 m. with good holding ground.
MAX. SIZE: See "Berthing".
HEALTH: Vessels calling at Shuaiba are requested to send the following information to "Health Shuaiba Port".
(1) Name of vessel
(2) Last port of call
(3) Health condition of crew
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique
Free pratique will be considered at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Harbour Control that free pratique has been granted.
RADIO: Give ETA well in advance and confirm ETA 24 hours before arrival through Kuwait Coast Station 9KK. A shore station at Shuaiba has been established and operates on following frequencies: 156.80 mc/s. PS: Channel 16, int'l and safety channel. 156.65 mc/s. PS: Channel 13, port and operations Channel. 156.45 mc/s. PS: Channel 9, berthing operations Channel.
TUGS: 3 tugs available, each of 2,100 h.p.
BERTHING: Vessel has to give arrival time and fore and aft draft to Harbour Master. Normal official hours for berthing and departure on Saturdays through Wednesdays, count from 0700 to 1600 hrs,. on Thursdays from 0700 to 1200 hrs.
The port consists of 3 main parts as follows:
Small Craft and Barge Harbour: Situated at the South-west direction from the Main Quay; consists of 3 berths accommodating vessels of less than 4 m. draft:

(i) Berth No. 1	Length	100 m.
(ii) Berth No. 2	,,	200 m.
(iii) Berth No. 3	,,	175 m.

Main Cargo Quay Mole: Allows berthing of ships on both sides. The Eastern side consists of 2 berths Nos. 4 and 5 having a total length of 350 m. The Western side consists of 3 berths: Nos. 1, 2 and 3 having a total length of 500 m.

Berth No. 1	maximum allowable draft			9.1 m.
Berth No. 2	,,	,,	,,	10.3 m.
Berth No. 3	,,	,,	,,	10.3 m.
Berths No. 4 and 5	,,	,,	,,	6.7 m.

Usage of berths 4 and 5 is restricted to good weather conditions only.
Harbour Control Offices (Harbour Master's building) and signal station are situated at the beginning of the main quay. Meteorological Centre, Passport and Immigration Office, Customs Office and Health Office are also at the beginning of the main quay.
Oil Pier: Situated in deep water due East from the Main Quay. Oil Pier is connected with the main quay by a causeway carrying pipes of 1,000 m. length. At present it consists of an Eastern-side berth (No. 1) with a length of 300 m. allowing tankers of maximum 13.7 m. draft and a Western-side (No. 2) berth with length of 270 m. allowing tankers of max. 12.8 m. draft.
At a distance of 40 m. from the Northern end is a newly constructed dolphin to facilitate berthing of bigger tankers without any difficulty. An extension of the oil pier from the Southern side with two more berths and an additional dolphin South of them has been completed.
Oil loading connections are at the middle of each berth and comprise of: 2 × 20″, 3 × 16″, 2 × 12″ and 1 × 8″ lines. The bunker line is 8 inch and fresh water line is 4 inch.
SHORE FACILITIES: Main cargo quay mole: Berths 1, 2 and 3 are equipped with 5 travelling electric cranes of 3 and 5 tons capacity. Services of 10 ton mobile cranes are also available on the main quay. All berths are fitted with bunker lines for fuel and fresh water.
Allocation of Berths:

Berth No.	*Allocation*
1	Discharging
2	Loading
3	Optional – Discharge/Load
4	Optional – Discharge/Load
5	Optional – Discharge/Load

The allocation of an optional berth is at the sole discretion of the Harbour Master and Traffic Manager.
A vessel arriving at the port to load may berth at No. 1 and similarly a vessel wishing to discharge may berth at No. 2, but it must be clearly understood that any vessel so doing is only berthed at that berth on sufferance and will be required to vacate the berth if a vessel arrives which has a claim to it.
STEVEDORES: Stevedores aboard ship will be provided by ship's Agent. Labourers in barges and ashore will be provided by port of Shuaiba but under ship's responsibility for breakage, pilferage, etc. Vessels will be required to maintain a min. daily tonnage dependent on the type of cargo they are carrying. Ships failing to achieve the average daily rate laid down will be liable for a penalty charge, for every day or part thereof, they remain on the quay over the prescribed period.
Minimum Daily Rates. Cement, 1,700 tons; fertiliser, 1,700 tons; charcoal, 800 tons; general cargo, 400 tons.
Shore cranes are available for ships to enable them to achieve these rates and ships Agents, importers and exporters are expected to make use of them.
No cranes over 20 tons lifting capacity available. Regarding landing of heavy lifts on quay, permission has to be obtained from the Port Authorities each time in advance. On the quay pieces up to 300 tons have been discharged.
MEDICAL: Advance notice required if medical attendance needed on board.
DENSITY: 1025.
FRESH WATER: All berths fitted with fresh water connections. No water barge available. Vessels can obtain water according to requirement.
FUEL: The Kuwait National Petroleum Co. KSC, Kuwait, supply marine fuel and diesel oil at cargo wharf and oil jetty at Shuaiba. Specifications as under:

	FO 1500	*MDO*
Ash % wt. max.	0, 5	0, 01
Pour point degs. C (degs. F.) max.	10 (50)	2 (35)
Specific Gravity 60/60 degs. F max.	0.99	–
Sulphur % wt. max.	3.7	1.8

Bunker nomination is to be arranged through Kuwait National Petroleum Co. (U.K.) Ltd., 25 St. James Street, London S.W.1: cables: "Kunpetco", London S.W.1. Telex: 261998. At least 3 days notice required.
Facilities on main quay mole for bunker fuel, gas oil and marine diesel oil in berths 1 through 5. No barges.
DEVELOPMENTS: The Port of Shuaiba will be extended by adding another finger pier and a marginal berth. The first phase, starting from December, 1976, will consist of a marginal multi-purpose berth and three finger berths. The second phase will consist of six additional berths. Water depth for all berths will be 14 m.
The existing Oil Pier is now extended Southwards along its line of direction of 153°/333° to a total distance of 446 m.
The extension consist of a piled trestle of 108 m. in length which incorporates a mooring dolphin, a piled berthing structure of 282 m. in length providing one berth on its seaward side for tankers of max. 13.7 m. draft and one berth on its landward side for tankers of max. 12.8 m. draft and a piled trestle and mooring dolphin at the Southern end of 56 m. in length.
GANGWAY/DECK WATCHMEN: Not necessary in port area.
OPENING/CLOSING HATCHES: Opening and closing of hatches normally carried out by stevedores on liners, and by ship's crew on charter vessels.
CERTIFICATES: All usual documents such as:
Ship's Manifest.
Bill of Health.
Crew List.
Clearance from Last Port.
Passenger Manifest, if any.
Store List.
Bonded Store List.
Safety Radio Certificate.
Bill of Measurements, etc.
CUSTOMS ALLOWANCES: Tobacco. No restrictions. Wine and/or Spirit. Alcoholic beverage strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.
CARGO GEAR: Ship's gears and shore cranes used for discharging; slings and pallets can be hired from the port. Shore cranes capacity 3–5 tons.
IDENTIFICATION CARDS: Passport or seamen's book necessary.
CONSULS: See "Shuwaikh".
REPAIRS: Small repairs can be arranged if sufficient notice is given.
DRY DOCK: No dry dock available.
REPATRIATION: Can be arranged. Entry visa regulations have been enforced in Kuwait, and the following is roughly the procedure in respect of crew changes.
1. Seamen arriving at Kuwait Airport to join vessels at Kuwait and Partitioned Zone ports can obtain transit visa at Airport, if Agents arrange to submit necessary guarantee to Immigration Authorities confirming that they are in transit and joining vessels calling at

Kuwait and/or Partitioned Zone. Order meet crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew.

2. Marine Superintendent of owners, or owners' representative and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day, Eid Al Fitr, Accession to the Throne, Eid Al Haj, 1st Muharram, Prophet's Birthday, Rajab. Dates are subject to alteration.

TELEPHONES: Telephone sockets fitted on North side of Main Quay Mole for convenience of vessels requiring a telephone on board.

SPECIAL SERVICES: Swedish Welfare for Seamen; Lloyd's surveyor; Butterworth Tank Cleaning Machines and Equipment; and also underwater cleaning, compass adjusting, d/f calibration and adjusting services are available through the Port Authority.

SHORE LEAVE: Permitted.

PORT REGULATIONS: Masters are required to observe the following regulations:

Fire fighting appliances to be kept in readiness for immediate use.

Pumping or discharging in any way into the sea oil fuel tanks, bilges, dirty ballasts, etc., is prohibited.

Disposal of garbage over the side of the ship into the harbour is prohibited.

The presence of a Pilot on board a vessel shall not relieve the Master of his responsibility regarding the safety of the vessel. The harbour authority shall have right to claim against a vessel for any damage caused by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ship's life-boats, launches or life-rafts on navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the harbour area. Engines should be stopped when approaching their working area at a circle of 150 m. The launch attending divers displays the International flag letter "ABLE" during diving operations.

AGENT: For dry cargo vessels only: International Shipping Agency Limited, POB Safat No. 20637, KIC Building, 1st Floor, Safat Square, Kuwait. Tel. 441860 to 441862. Telex: 2208 (answerback "Isaship KWT") and 2396 (answerback "ISATUG KT"). Cables: "Shipagent, Kuwait").

SHUWAIKH (Kuwait Harbour): 29.21 N. 47.55 E.

DOCUMENTS: **(See Plan)**

Customs:

2 Copies of Crew List and passengers, with their nationalities.
1 copy of Store List.
1 copy of Crew Personal Property List.
Deck Log Book (if vessel calling first time, then all the log books which are available on board).
1 copy of Customs form (which will be given by Customs).

Immigration:

2 copies of Crew List with their nationality.
2 copies of Passenger List (if passengers on board), with their nationality.
All seamen's books or Passports.
A certificate signed by the Master, stating that there are no Stowaways on board.

Quarantine:

1 copy of Crew List.
1 Copy of Vaccination List.
All Vaccination Books.
1 set Quarantine Forms (which will be given by Quarantine Officer).

Port Clearance:

Ship's Registry.
Load Line.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Clearance.

Port Surveyor:

Valid Liferaft Certificate (with annual renewal and survey).

Cargo Dept.: The listed documents below, should be handed to the Cargo Department, at least 48 hours before the ship's arrival.

6 copies of the Cargo Manifest, 3 copies duly signed by the Agent at loading Port.
1 copy of the Cargo Stowage Plan.
1 copy of Cargo List, in detail.
2 copies of Dangerous Cargo List.

PILOTAGE: Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage.

ANCHORAGE: 1. Ships bound for Kuwait, in order to discharge their cargo, should anchor in the anchorage area (BA Chart 1214). According to this Circular the approach waterway one mile in width from Ras Al Ardh to Anchorage and, vice-versa, is left free for Navigation.

2. Ships who have no cargo for Kuwait, and calling only for Fresh Water, Provisions, Crew changing, transhipments or any other reason, but discharging cargo, should anchor:—

North of Latitude 29° 25.0′ N, and
East of Longitude 48° 03.0′ E.

3. If mentioned anchorage area described in para (2), is congested, the ships could take temporary anchorage:—

North of Latitude 29° 24.0′ N, and
East of Longitude 48° 06.0′ E.

but change their position to the area described in para (2), immediately as opportunity occurs.

The ships already in anchorage should change their positions, according to the para (1) and, para (2) above.

The Shipping Agents are kindly requested to notify the Masters of their ships, the following:—

1. When a ship sailing from Shuwaikh Port and, proceeding to sea she should give her name and Port she is proceeding to, to the Signal Station.

2. Any ship sailing from the Outer Anchorage for any reason, should notify the Signal Station that she is sailing, and give the reason.

3. If ship leaving Shuwaikh Port, and wishes for any reason to remain in the Outer Anchorage, she can do so, but should anchor North of Latitude 29° 25.0′ N. and East of Longitude 48° 03.0′ E.

Vessels not complying with the above are liable to suffer penalties, according to the General Port Rules.

MAX. SIZE: Max. draft at berths nos. 1 to 8, 31 ft. 6 in. (32 ft. at Spring tides), and 27 ft. at dolphins. These drafts allow 2 ft. of water under the keel. Tidal range is about 2.8 m. (9 ft.). Berthing draft dependent upon tidal conditions at time of arrival, and vessels exceeding 27 ft. have to wait for tide.

HEALTH: Vessels calling at Kuwait Harbour must send the following information to "Health", Shuwaikh Port:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Free pratique will be granted at the discretion of the Quarantine Officer, and vessels must hoist the yellow flag unless they are informed by Agent or Harbour Control that free pratique is granted.

RADIO: Kuwait Radio call sign 9KK. ETA messages and draft (fore and aft) should be sent via Kuwait Radio simultaneously to Harbour Master Port of Kuwait, and to Agent, at least 24 hours prior arrival. The cables should be received by the port at least 12 hours prior to arrival. Should the vessel fail to give this notice, the port will only decide on her turn of berth the following morning. Thus an unnecessary delay of 24 hours might occur.

Vessels arriving at Kuwait Anchorage must not use radio telephone or VHF for calling other vessels and/or any other destination. The equipment should be used only for calling Kuwait Port Control. It is also forbidden to use radio equipment when vessel is alongside.

All ships calling at Shuwaikh port must notify the Harbour Master by VHF as soon as they enter the Kuwait territorial waters.

Communications must be made via Kuwait Coast Station (9KK), which is now situated at a new combined lookout signal station at Ras-Ajuza (Lat. 29° 23.40′ N., Long. 47° 59.78′ E.), which operates a 24-hour basis.

All ships arriving should establish contact with the signal station as soon as possible, either by VHF or visual signals. The service, operating on Channel 16 for calling, and on Channel 12 for working; restricted to messages relating to the movements and safety of ships. You may call Coastal Station through Kuwait Radio (RT 2182).

All ships arriving or leaving Shuwaikh port may only anchor in the specified outer anchorage, the centre of the area is Lat. 29° 25.6′ N., Long. 47° 59.4′ E.

Masters are advised that it is forbidden to anchor in Kuwait territorial waters, other than in cases of emergency when they should inform the signal station/Kuwait Radio of the reason for stoppage.

Whilst at anchor, a proper watch must be maintained all the time and no unauthorised craft should be allowed alongside. The signal station will report to the Coast Guard all craft seen approaching or going alongside vessels in the anchorage.

REGISTRATION PROCEDURE: (To register turn for berth before proceeding to another port).

1. Prior to arrival Master to telegraph Harbour Master, Kuwait, stating his wish to register, stating draft fore and aft, ETA, and that all Kuwait cargo is clear to discharge.
2. If Master does not request confirmation of registration, the signal station and the port takes it for granted that vessels awaits her turn staying in the anchorage, and will usually not confirm the registration for turn.
3. On arrival Kuwait anchorage Master to contact signal station by VHF or visual signals requesting confirmation of registration.
4. The vessel should not leave until such confirmation is received. Confirmation will only be given by the signal station, which accepts registrations during 24 hours.
5. Upon receipt of confirmation the vessel can leave at once. Agents will cable via Kuwait Radio the return date given by port, that is the time the vessel should be back in Kuwait.

6. A stowage plan must be shown to the port within 24 hours after registration.

TUGS: Join vessel entering dredged channel, Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of Harbour Master or Pilots. Number of tugs used for each movement: *(a)* Two tugs for ships exceeding 400 ft. in length. *(b)* One tug for ships between 250 ft. and 400 ft. in length.

Five tugs available, two of 750 h.p., one of 1,000 h.p. and two of 1,140 h.p. Use of tugs is compulsory.

BERTHING: 19 deep-water berths available, plus 2 dolphin berths (also see "Developments"). The Grain Silo is at berth no. 2, capacity about 150 t.p.h.

		Depth
Berth No. 1 — 4	Conference Vessels	33 ft.
Berth No. 5 — 7	Non Conference Vessels	,,
Berth No. 8	Chartered Vessels	,,
Berth No. 9 and 10	Non Conference Vessels	,,
Berth No. 11	Chartered Vessels	,,
Berth No. 12 and 13	Non Conference Vessels	,,
Berth No. 17	Non Conference Vessels	28 ft.
Berth No. 18	Chartered Vessels	,,
Berth No. 19	Reefer — Perishable Cargo and Car Carriers.	,,

Berth turn is decided at a port meeting, held in the morning on all port-working days. With the exception of the dolphin berths, berthing takes place any hour, day or night.

1. Notification of vessels arrival. According to port regulations a questionnaire issued by the Harbour Master, duly filled in and signed by the Captain of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the Harbour Master directly, 48 hours before arrival:
   (a) ETA.
   (b) Total cargo for discharging Kuwait.
   (c) Distribution quantity each hatch.
   (d) Declaration hazardous, inflammable and explosives cargo, and guns and ammunition.
   (e) Declaration all vessels winches in good working condition and cargo clear for discharging at Kuwait.
   (f) Draft fore and aft.

   We quote below specimen cable covering the above:
   "Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, inflammable explosives guns ammunition stop All winches derricks good working condition draft fore 24 ft. Aft 27 ft.".

   The above cable sent to the Harbour Master will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.
2. Vessels with a cargo of up to 400 measurement tons will be given priority alongside pier.
3. Vessels carrying up to 500 tons weight will be given priority to discharge at the buoys providing heavy lifts do not exceed 20 tons, or vessel does not carry reefer cargo.
4. A vessel that intends to stay in the anchorage in Kuwait until her turn will be allowed to shift over-stowed cargo while waiting.
5. Liners carrying cement in bags will still be considered as liner ships. Thus they will not be taken out to wait their turn at the cement berth.

STEVEDORES: Aboard ship will be provided by the Agent. Labourers in barges and ashore will be provided by the Port of Kuwait but under ship's responsibility as for breakage, pilferage, etc. Small number of mobile cranes with lifting capacity up to 90 tons. However mobile cranes can only be used in port area for discharging barges alongside. Cranes are too small to be used for discharging from liner vessels and therefore, pieces over 6 tons to be discharged by vessel's own gear. 1 floating crane of 100 tons capacity available.

Working Hours: 0600-1300, 1500–2230; Overtime 1300-1500, 2200-2400 hrs. Overtime is compulsory for all vessels. On Fridays, only work on vessels which are to be completed during the day.

DISCHARGE RATES: Allowing for stoppages, non-working periods, etc. and, considering 4 or 5 gangs employed, the average discharging rates are as follows:

Tanker cargo (fuel oil)	300 t.p.h., 7,200 tons per day.
Bulk cargoes (grain)	150 t.p.h.
General cargo	300–400 tons per day.
Cement	1,750–2,000 tons per day.
Bag cargoes	800–1,000 tons per day.
Steel (bundles)	600–750 tons per day.
Timber (soft wood)	500 tons per day.
Timber (Teak wood)	400 tons per day.

MEDICAL: Masters to radio prior arrival if medical attendance required on board.

DENSITY: Salt water.

FRESH WATER: Berths Nos. 1–7 have fresh water connections and water can be supplied by pipe-line.

Berth No. 8, dolphins and anchorage – fresh water to be supplied by water barge. Capacity of barges 100 and 200 tons, 48 hours notice required.

FUEL: No coal bunkers are available.

In addition to the full facilities afforded at Mina-al-Ahmadi and Shuwaiba, light bunker fuel oil specific gravity 0.9339 – viscosity 570 sec. (300 t.p.h.), and marine diesel oil, specific gravity 0.8448 (200 t.p.h.), can be supplied alongside the deep water berths Nos. 1 to 7, while vessels are discharging, and provided nomination for supply has been made to K.N.P.C. London Office, B.P. Trading Ltd., or Gulf Eastern Co., London.

Gas oil, specific gravity 6.83, (25 t.p.h.) will be available on the No. 6 and No. 7 berths.

Small quantities of gas oil may be supplied by tanker truck to the berths and lubrication oils are available.

FIRE PRECAUTIONS: Kuwait Fire Brigade is responsible for all fire fighting in port areas and a new fire station is being built at Shuwaikh to cover the new port area and port storage areas. There is also a fire station situated in Kuwait Small Boat Harbour area. A salt water main for the fighting services is laid-on at the new deep water berths at Shuwaikh. The Kuwait fire service also maintain two 90 ft. fire fighting tenders each of which is capable of pumping 5,000 gallons of water per minute from 4 nozzles. In addition they can pump 900 gallons of foam per minute. These modern fire-fighting units are equipped with radio, radio-telephone, radar and echo sounding.

DEVELOPMENTS: 10 berths are to be constructed, with depths alongside up to 33 ft. These will be dry cargo, refrigerated cargo and container cargo berths.

GANGWAY/DECK WATCHMEN: Available, but not necessary in port area.

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CERTIFICATES: A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

CARGO GEAR: Ship's gear and cranes used for discharging. Slings can be hired from the port.

IDENTIFICATION CARDS: Passport or seaman's book necessary.

TELEPHONES: Cannot be arranged on board.
PROVISIONS: All kinds of food available at reasonable prices.
SERVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. Butterworth Tank Cleaning Machines and Equipment and also under-water cleaning.
SHORE LEAVE: Permitted.
REGULATIONS: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his commiting a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:
By day: "G" Flag, over a black ball or shape.
By night: A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh wharf or dolphin berth, shall ensure that:

(a) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(b) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations.

(c) The crew or watchman to attend the mooring ropes and lines, and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(d) That no substance, matter or material is thrown overboard, either into the water or on to the wharf.

(e) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(f) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(g) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(h) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(i) The Master shall at all times retain on board sufficient crew to work his ship.

The Master shall not shift his vessel while alongside the wharf, prior to receiving permission from the Harbour Master or Berthing Master.

The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropyline hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

TIME: GMT plus 3 hours.
SHIPMASTER'S REPORT: December, 1975:
Radio: Masters can communicate with their Agents or may call long distance abroad by calling Kuwait Maritime on VHF Channel 16 and shifting to appropriate channels, Channels 24 to 28. Kuwait Maritime will do the proper connections and the charge is per tariff.
Developments: The two deep water berths are now operational but there is no fuel oil or water pipe-line. Water is supplied by motor tankers of 13 tons capacity.
AUTHORITY: Government of Kuwait, Ministry of Communications.

AGENT: International Shipping Agency Limited, POB Safat No. 20637, KIC Building, 1st Floor, Safat Square, Kuwait. Tel. 441860, 441861, 441862. AO 510901. Telex: 2208 (Answerback "ISASHIP KWT"). and 2396 (Answerback "ISATUG KT"). Cables: "Shipagent Kuwait".

RESTRICTED AREAS

a) Platforms 1.0. Nautical Mile Radius
b) S.B.M.'s 1.75 Nautical Miles Radius
c) Submarine Pipe Line 1.0 Nautical Mile Radius

DESIGNATED AREAS

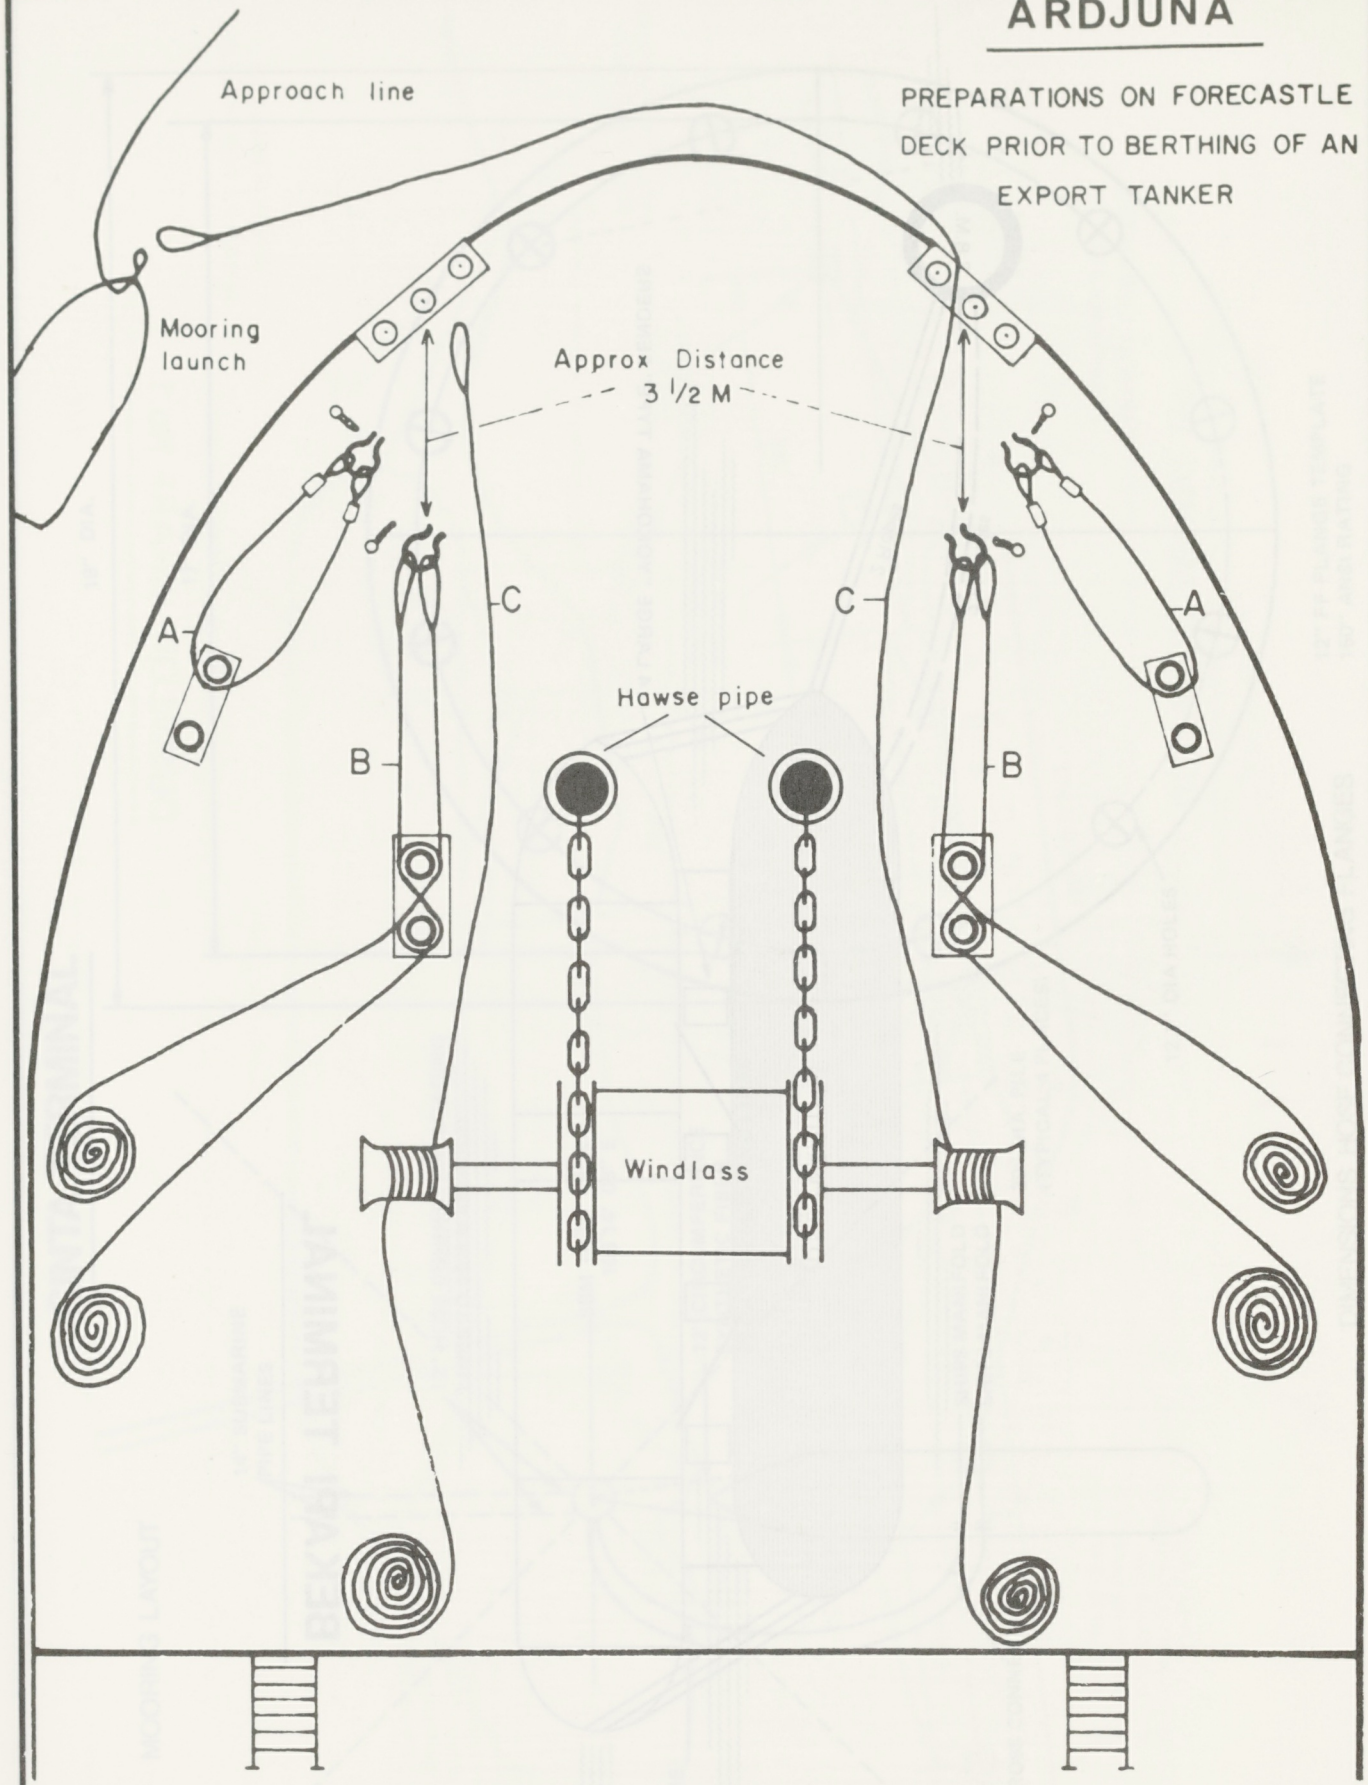
For all installations 500 Meters Radius

Note: Mariners are warned not to anchor within the Restricted Area due to the presence of underwater pipelines and other obstructions.

"Reproduced by kind permission of the Port Authority".

ARDJUNA

PREPARATIONS ON FORECASTLE DECK PRIOR TO BERTHING OF AN EXPORT TANKER



NOTE:

A : 30 feet X 2 inches dia. wire strops.

B : Ship's lines (8–10 inches circ.) as stoppers to "hang off" terminal mooring lines on the tanker

C : Ship's lines (8–10 inches circ.) as messenger lines for bringing the terminal mooring lines inboard.
